concern, while I am still in ignorance of my own self, would be ridiculous. And therefore I bid farewell to all this; the common opinion is enough for me. For, as I was saying, I want to know not about this, but about myself: am I a monster more complicated and swollen with passion than the serpent Typho, or a creature of a gentler and simpler sort, to whom Nature has given a diviner and lowlier destiny? But let me ask you, friend: have we not reached the plane-tree to which you were conducting us?

Phaedrus: Yes, this is the tree.

Socrates: By Here, a fair resting-place, full of summer sounds and scents. Here is this lofty and spreading plane-tree, and the agnus castus high and clustering, in the fullest blossom and the greatest fragrance; and the stream which flows beneath the plane-tree is deliciously cold to the feet. Judging from the ornaments and images, this must be a spot sacred to Achelous and the Nymphs. How delightful is the breeze: — so very sweet; and there is a sound in the air shrill and summerlike which makes answer to the chorus of the cicadae. But the greatest charm of all is the grass, like a pillow gently sloping to the head. My dear Phaedrus, you have been an admirable guide.

Phaedrus: What an incomprehensible being you are, Socrates: when you are in the country, as you say, you really are like some stranger who is led about by a guide. Do you ever cross the border? I rather think that you never venture even outside the gates.

Socrates: Very true, my good friend; and I hope that you will excuse me when you hear the reason, which is, that I am a lover of knowledge, and the men who dwell in the city are my teachers, and not the trees or the country. Though I do indeed believe that you have found a spell with which to draw me out of the city into the country, like a hungry cow before whom a bough or a bunch of fruit is waved. For only hold up before me in like manner a book, and you may lead me all round Attica,

and over the wide world. And now having arrived, I intend to lie down, and do you choose any posture in which you can read best. Begin.

Phaedrus: Listen. You know how matters stand with me; and how, as I conceive, this affair may be arranged for the advantage of both of us. And I maintain that I ought not to fail in my suit, because I am not your lover: for lovers repent of the kindnesses which they have shown when their passion ceases, but to the non-lovers who are free and not under any compulsion, no time of repentance ever comes; for they confer their benefits according to the measure of their ability, in the way which is most conducive to their own interest. Then again, lovers consider how by reason of their love they have neglected their own concerns and rendered service to others: and when to these benefits conferred they add on the troubles which they have endured, they think that they have long ago made to the beloved a very ample return. But the non-lover has no such tormenting recollections; he has never neglected his affairs or quarrelled with his relations; he has no troubles to add up or excuses to invent; and being well rid of all these evils, why should he not freely do what will gratify the beloved? If you say that the lover is more to be esteemed, because his love is thought to be greater; for he is willing to say and do what is hateful to other men, in order to please his beloved; — that, if true, is only a proof that he will prefer any future love to his present, and will injure his old love at the pleasure of the new. And how, in a matter of such infinite importance, can a man be right in trusting himself to one who is afflicted with a malady which no experienced person would attempt to cure, for the patient himself admits that he is not in his right mind, and acknowledges that he is wrong in his mind, but says that he is unable to control himself? And if he came to his right mind, would he ever imagine that the desires were good which he conceived when in his wrong mind? Once more, there are many more non-lovers than lovers; and if you choose the best of the

lovers, you will not have many to choose from; but if from the non-lovers, the choice will be larger, and you will be far more likely to find among them a person who is worthy of your friendship. If public opinion be your dread, and you would avoid reproach, in all probability the lover, who is always thinking that other men are as emulous of him as he is of them, will boast to some one of his successes, and make a show of them openly in the pride of his heart; — he wants others to know that his labour has not been lost; but the non-lover is more his own master, and is desirous of solid good, and not of the opinion of mankind. Again, the lover may be generally noted or seen following the beloved (this is his regular occupation), and whenever they are observed to exchange two words they are supposed to meet about some affair of love either past or in contemplation; but when non-lovers meet, no one asks the reason why, because people know that talking to another is natural, whether friendship or mere pleasure be the motive. Once more, if you fear the fickleness of friendship, consider that in any other case a quarrel might be a mutual calamity; but now, when you have given up what is most precious to you, you will be the greater loser, and therefore, you will have more reason in being afraid of the lover, for his vexations are many, and he is always fancying that every one is leagued against him. Wherefore also he debars his beloved from society; he will not have you intimate with the wealthy, lest they should exceed him in wealth, or with men of education, lest they should be his superiors in understanding; and he is equally afraid of anybody’s influence who has any other advantage over himself. If he can persuade you to break with them, you are left without a friend in the world; or if, out of a regard to your own interest, you have more sense than to comply with his desire, you will have to quarrel with him. But those who are non-lovers, and whose success in love is the reward of their merit, will not be jealous of the companions of their beloved, and will rather hate those who refuse to be his associates, thinking that their favourite is

slighted by the latter and benefited by the former; for more love than hatred may be expected to come to him out of his friendship with others. Many lovers too have loved the person of a youth before they knew his character or his belongings; so that when their passion has passed away, there is no knowing whether they will continue to be his friends; whereas, in the case of non-lovers who were always friends, the friendship is not lessened by the favours granted; but the recollection of these remains with them, and is an earnest of good things to come.

Further, I say that you are likely to be improved by me, whereas the lover will spoil you. For they praise your words and actions in a wrong way; partly, because they are afraid of offending you, and also, their judgment is weakened by passion. Such are the feats which love exhibits; he makes things painful to the disappointed which give no pain to others; he compels the successful lover to praise what ought not to give him pleasure, and therefore the beloved is to be pitied rather than envied. But if you listen to me, in the first place, I, in my intercourse with you, shall not merely regard present enjoyment, but also future advantage, being not mastered by love, but my own master; nor for small causes taking violent dislikes, but even when the cause is great, slowly laying up little wrath — unintentional offences I shall forgive, and intentional ones I shall try to prevent; and these are the marks of a friendship which will last.

Do you think that a lover only can be a firm friend? reflect: — if this were true, we should set small value on sons, or fathers, or mothers; nor should we ever have loyal friends, for our love of them arises not from passion, but from other associations. Further, if we ought to shower favours on those who are the most eager suitors, — on that principle, we ought always to do good, not to the most virtuous, but to the most needy; for they are the persons who will be most relieved, and will therefore be the most grateful; and when you make a feast you should invite not your friend, but the beggar and the empty soul; for they will

love you, and attend you, and come about your doors, and will be the best pleased, and the most grateful, and will invoke many a blessing on your head. Yet surely you ought not to be granting favours to those who besiege you with prayer, but to those who are best able to reward you; nor to the lover only, but to those who are worthy of love; nor to those who will enjoy the bloom of your youth, but to those who will share their possessions with you in age; nor to those who, having succeeded, will glory in their success to others, but to those who will be modest and tell no tales; nor to those who care about you for a moment only, but to those who will continue your friends through life; nor to those who, when their passion is over, will pick a quarrel with you, but rather to those who, when the charm of youth has left you, will show their own virtue. Remember what I have said; and consider yet this further point: friends admonish the lover under the idea that his way of life is bad, but no one of his kindred ever yet censured the non-lover, or thought that he was ill-advised about his own interests.

‘Perhaps you will ask me whether I propose that you should indulge every non-lover. To which I reply that not even the lover would advise you to indulge all lovers, for the indiscriminate favour is less esteemed by the rational recipient, and less easily hidden by him who would escape the censure of the world. Now love ought to be for the advantage of both parties, and for the injury of neither.

‘I believe that I have said enough; but if there is anything more which you desire or which in your opinion needs to be supplied, ask and I will answer.’

Now, Socrates, what do you think? Is not the discourse excellent, more especially in the matter of the language?

Socrates: Yes, quite admirable; the effect on me was ravishing. And this I owe to you, Phaedrus, for I observed you while reading to be in an ecstasy, and thinking that you are more experienced in these matters than I am, I followed your

example, and, like you, my divine darling, I became inspired with a phrenzy.

Phaedrus: Indeed, you are pleased to be merry.

Socrates: Do you mean that I am not in earnest?

Phaedrus: Now don't talk in that way, Socrates, but let me have your real opinion; I adjure you, by Zeus, the god of friendship, to tell me whether you think that any Hellene could have said more or spoken better on the same subject.

Socrates: Well, but are you and I expected to praise the sentiments of the author, or only the clearness, and roundness, and finish, and tournure of the language? As to the first I willingly submit to your better judgment, for I am not worthy to form an opinion, having only attended to the rhetorical manner; and I was doubting whether this could have been defended even by Lysias himself; I thought, though I speak under correction, that he repeated himself two or three times, either from want of words or from want of pains; and also, he appeared to me ostentatiously to exult in showing how well he could say the same thing in two or three ways.

Phaedrus: Nonsense, Socrates; what you call repetition was the especial merit of the speech; for he omitted no topic of which the subject rightly allowed, and I do not think that any one could have spoken better or more exhaustively.

Socrates: There I cannot go along with you. Ancient sages, men and women, who have spoken and written of these things, would rise up in judgment against me, if out of complaisance I assented to you.

Phaedrus: Who are they, and where did you hear anything better than this?

Socrates: I am sure that I must have heard; but at this moment I do not remember from whom; perhaps from Sappho the fair, or Anacreon the wise; or, possibly, from a prose writer. Why do I

say so? Why, because I perceive that my bosom is full, and that I could make another speech as good as that of Lysias, and different. Now I am certain that this is not an invention of my own, who am well aware that I know nothing, and therefore I can only infer that I have been filled through the ears, like a pitcher, from the waters of another, though I have actually forgotten in my stupidity who was my informant.

Phaedrus: That is grand: — but never mind where you heard the discourse or from whom; let that be a mystery not to be divulged even at my earnest desire. Only, as you say, promise to make another and better oration, equal in length and entirely new, on the same subject; and I, like the nine Archons, will promise to set up a golden image at Delphi, not only of myself, but of you, and as large as life.

Socrates: You are a dear golden ass if you suppose me to mean that Lysias has altogether missed the mark, and that I can make a speech from which all his arguments are to be excluded. The worst of authors will say something which is to the point. Who, for example, could speak on this thesis of yours without praising the discretion of the non-lover and blaming the indiscretion of the lover? These are the commonplaces of the subject which must come in (for what else is there to be said?) and must be allowed and excused; the only merit is in the arrangement of them, for there can be none in the invention; but when you leave the commonplaces, then there may be some originality.

Phaedrus: I admit that there is reason in what you say, and I too will be reasonable, and will allow you to start with the premiss that the lover is more disordered in his wits than the non-lover; if in what remains you make a longer and better speech than Lysias, and use other arguments, then I say again, that a statue you shall have of beaten gold, and take your place by the colossal offerings of the Cypselids at Olympia.

Socrates: How profoundly in earnest is the lover, because to tease him I lay a finger upon his love! And so, Phaedrus, you

really imagine that I am going to improve upon the ingenuity of Lysias?

Phaedrus: There I have you as you had me, and you must just speak ‘as you best can.’ Do not let us exchange ‘tu quoque’ as in a farce, or compel me to say to you as you said to me, ‘I know Socrates as well as I know myself, and he was wanting to speak, but he gave himself airs.’ Rather I would have you consider that from this place we stir not until you have unbosomed yourself of the speech; for here are we all alone, and I am stronger, remember, and younger than you: — Wherefore perpend, and do not compel me to use violence.

Socrates: But, my sweet Phaedrus, how ridiculous it would be of me to compete with Lysias in an extempore speech! He is a master in his art and I am an untaught man.

Phaedrus: You see how matters stand; and therefore let there be no more pretences; for, indeed, I know the word that is irresistible.

Socrates: Then don’t say it.

Phaedrus: Yes, but I will; and my word shall be an oath. ‘I say, or rather swear’ — but what god will be witness of my oath?— ‘By this plane-tree I swear, that unless you repeat the discourse here in the face of this very plane-tree, I will never tell you another; never let you have word of another!’

Socrates: Villain! I am conquered; the poor lover of discourse has no more to say.

Phaedrus: Then why are you still at your tricks?

Socrates: I am not going to play tricks now that you have taken the oath, for I cannot allow myself to be starved.

Phaedrus: Proceed.

Socrates: Shall I tell you what I will do?

Phaedrus: What?

Socrates: I will veil my face and gallop through the discourse as fast as I can, for if I see you I shall feel ashamed and not know what to say.

Phaedrus: Only go on and you may do anything else which you please.

Socrates: Come, O ye Muses, melodious, as ye are called, whether you have received this name from the character of your strains, or because the Melians are a musical race, help, O help me in the tale which my good friend here desires me to rehearse, in order that his friend whom he always deemed wise may seem to him to be wiser than ever.

Once upon a time there was a fair boy, or, more properly speaking, a youth; he was very fair and had a great many lovers; and there was one special cunning one, who had persuaded the youth that he did not love him, but he really loved him all the same; and one day when he was paying his addresses to him, he used this very argument — that he ought to accept the non-lover rather than the lover; his words were as follows: —

‘All good counsel begins in the same way; a man should know what he is advising about, or his counsel will all come to nought. But people imagine that they know about the nature of things, when they don’t know about them, and, not having come to an understanding at first because they think that they know, they end, as might be expected, in contradicting one another and themselves. Now you and I must not be guilty of this fundamental error which we condemn in others; but as our question is whether the lover or non-lover is to be preferred, let us first of all agree in defining the nature and power of love, and then, keeping our eyes upon the definition and to this appealing, let us further enquire whether love brings advantage or disadvantage.

‘Every one sees that love is a desire, and we know also that non-lovers desire the beautiful and good. Now in what way is

the lover to be distinguished from the non-lover? Let us note that in every one of us there are two guiding and ruling principles which lead us whither they will; one is the natural desire of pleasure, the other is an acquired opinion which aspires after the best; and these two are sometimes in harmony and then again at war, and sometimes the one, sometimes the other conquers. When opinion by the help of reason leads us to the best, the conquering principle is called temperance; but when desire, which is devoid of reason, rules in us and drags us to pleasure, that power of misrule is called excess. Now excess has many names, and many members, and many forms, and any of these forms when very marked gives a name, neither honourable nor creditable, to the bearer of the name. The desire of eating, for example, which gets the better of the higher reason and the other desires, is called gluttony, and he who is possessed by it is called a glutton; the tyrannical desire of drink, which inclines the possessor of the desire to drink, has a name which is only too obvious, and there can be as little doubt by what name any other appetite of the same family would be called; — it will be the name of that which happens to be dominant. And now I think that you will perceive the drift of my discourse; but as every spoken word is in a manner plainer than the unspoken, I had better say further that the irrational desire which overcomes the tendency of opinion towards right, and is led away to the enjoyment of beauty, and especially of personal beauty, by the desires which are her own kindred — that supreme desire, I say, which by leading conquers and by the force of passion is reinforced, from this very force, receiving a name, is called love (erromenos eros).'

And now, dear Phaedrus, I shall pause for an instant to ask whether you do not think me, as I appear to myself, inspired?

Phaedrus: Yes, Socrates, you seem to have a very unusual flow of words.

Socrates: Listen to me, then, in silence; for surely the place is holy; so that you must not wonder, if, as I proceed, I appear to be in a divine fury, for already I am getting into dithyrambics.

Phaedrus: Nothing can be truer.

Socrates: The responsibility rests with you. But hear what follows, and perhaps the fit may be averted; all is in their hands above. I will go on talking to my youth. Listen: —

Thus, my friend, we have declared and defined the nature of the subject. Keeping the definition in view, let us now enquire what advantage or disadvantage is likely to ensue from the lover or the non-lover to him who accepts their advances.

He who is the victim of his passions and the slave of pleasure will of course desire to make his beloved as agreeable to himself as possible. Now to him who has a mind diseased anything is agreeable which is not opposed to him, but that which is equal or superior is hateful to him, and therefore the lover will not brook any superiority or equality on the part of his beloved; he is always employed in reducing him to inferiority. And the ignorant is the inferior of the wise, the coward of the brave, the slow of speech of the speaker, the dull of the clever. These, and not these only, are the mental defects of the beloved; — defects which, when implanted by nature, are necessarily a delight to the lover, and when not implanted, he must contrive to implant them in him, if he would not be deprived of his fleeting joy. And therefore he cannot help being jealous, and will debar his beloved from the advantages of society which would make a man of him, and especially from that society which would have given him wisdom, and thereby he cannot fail to do him great harm. That is to say, in his excessive fear lest he should come to be despised in his eyes he will be compelled to banish from him divine philosophy; and there is no greater injury which he can inflict upon him than this. He will contrive that his beloved shall be wholly ignorant, and in everything shall look to him; he is to be the delight of the lover’s heart, and a curse to himself. Verily,

a lover is a profitable guardian and associate for him in all that relates to his mind.

Let us next see how his master, whose law of life is pleasure and not good, will keep and train the body of his servant. Will he not choose a beloved who is delicate rather than sturdy and strong? One brought up in shady bowers and not in the bright sun, a stranger to manly exercises and the sweat of toil, accustomed only to a soft and luxurious diet, instead of the hues of health having the colours of paint and ornament, and the rest of a piece? — such a life as any one can imagine and which I need not detail at length. But I may sum up all that I have to say in a word, and pass on. Such a person in war, or in any of the great crises of life, will be the anxiety of his friends and also of his lover, and certainly not the terror of his enemies; which nobody can deny.

And now let us tell what advantage or disadvantage the beloved will receive from the guardianship and society of his lover in the matter of his property; this is the next point to be considered. The lover will be the first to see what, indeed, will be sufficiently evident to all men, that he desires above all things to deprive his beloved of his dearest and best and holiest possessions, father, mother, kindred, friends, of all whom he thinks may be hinderers or reprovers of their most sweet converse; he will even cast a jealous eye upon his gold and silver or other property, because these make him a less easy prey, and when caught less manageable; hence he is of necessity displeased at his possession of them and rejoices at their loss; and he would like him to be wifeless, childless, homeless, as well; and the longer the better, for the longer he is all this, the longer he will enjoy him.

There are some sort of animals, such as flatterers, who are dangerous and mischievous enough, and yet nature has mingled a temporary pleasure and grace in their composition. You may say that a courtesan is hurtful, and disapprove of such creatures

and their practices, and yet for the time they are very pleasant. But the lover is not only hurtful to his love; he is also an extremely disagreeable companion. The old proverb says that ‘birds of a feather flock together’; I suppose that equality of years inclines them to the same pleasures, and similarity begets friendship; yet you may have more than enough even of this; and verily constraint is always said to be grievous. Now the lover is not only unlike his beloved, but he forces himself upon him. For he is old and his love is young, and neither day nor night will he leave him if he can help; necessity and the sting of desire drive him on, and allure him with the pleasure which he receives from seeing, hearing, touching, perceiving him in every way. And therefore he is delighted to fasten upon him and to minister to him. But what pleasure or consolation can the beloved be receiving all this time? Must he not feel the extremity of disgust when he looks at an old shrivelled face and the remainder to match, which even in a description is disagreeable, and quite detestable when he is forced into daily contact with his lover; moreover he is jealously watched and guarded against everything and everybody, and has to hear misplaced and exaggerated praises of himself, and censures equally inappropriate, which are intolerable when the man is sober, and, besides being intolerable, are published all over the world in all their indelicacy and wearisomeness when he is drunk.

And not only while his love continues is he mischievous and unpleasant, but when his love ceases he becomes a perfidious enemy of him on whom he showered his oaths and prayers and promises, and yet could hardly prevail upon him to tolerate the tedium of his company even from motives of interest. The hour of payment arrives, and now he is the servant of another master; instead of love and infatuation, wisdom and temperance are his bosom’s lords; but the beloved has not discovered the change which has taken place in him, when he asks for a return and recalls to his recollection former sayings and doings; he believes himself to be speaking to the same person, and the other, not

having the courage to confess the truth, and not knowing how to fulfil the oaths and promises which he made when under the dominion of folly, and having now grown wise and temperate, does not want to do as he did or to be as he was before. And so he runs away and is constrained to be a defaulter; the oyster-shell (In allusion to a game in which two parties fled or pursued according as an oyster-shell which was thrown into the air fell with the dark or light side uppermost.) has fallen with the other side uppermost — he changes pursuit into flight, while the other is compelled to follow him with passion and imprecation, not knowing that he ought never from the first to have accepted a demented lover instead of a sensible non-lover; and that in making such a choice he was giving himself up to a faithless, morose, envious, disagreeable being, hurtful to his estate, hurtful to his bodily health, and still more hurtful to the cultivation of his mind, than which there neither is nor ever will be anything more honoured in the eyes both of gods and men. Consider this, fair youth, and know that in the friendship of the lover there is no real kindness; he has an appetite and wants to feed upon you:

‘As wolves love lambs so lovers love their loves.’

But I told you so, I am speaking in verse, and therefore I had better make an end; enough.

Phaedrus: I thought that you were only half-way and were going to make a similar speech about all the advantages of accepting the non-lover. Why do you not proceed?

Socrates: Does not your simplicity observe that I have got out of dithyrambics into heroics, when only uttering a censure on the lover? And if I am to add the praises of the non-lover what will become of me? Do you not perceive that I am already overtaken by the Nymphs to whom you have mischievously exposed me? And therefore I will only add that the non-lover has all the advantages in which the lover is accused of being deficient. And now I will say no more; there has been enough of both of them.

Leaving the tale to its fate, I will cross the river and make the best of my way home, lest a worse thing be inflicted upon me by you.

Phaedrus: Not yet, Socrates; not until the heat of the day has passed; do you not see that the hour is almost noon? there is the midday sun standing still, as people say, in the meridian. Let us rather stay and talk over what has been said, and then return in the cool.

Socrates: Your love of discourse, Phaedrus, is superhuman, simply marvellous, and I do not believe that there is any one of your contemporaries who has either made or in one way or another has compelled others to make an equal number of speeches. I would except Simmias the Theban, but all the rest are far behind you. And now I do verily believe that you have been the cause of another.

Phaedrus: That is good news. But what do you mean?

Socrates: I mean to say that as I was about to cross the stream the usual sign was given to me, — that sign which always forbids, but never bids, me to do anything which I am going to do; and I thought that I heard a voice saying in my ear that I had been guilty of impiety, and that I must not go away until I had made an atonement. Now I am a diviner, though not a very good one, but I have enough religion for my own use, as you might say of a bad writer — his writing is good enough for him; and I am beginning to see that I was in error. O my friend, how prophetic is the human soul! At the time I had a sort of misgiving, and, like Ibycus, 'I was troubled; I feared that I might be buying honour from men at the price of sinning against the gods.' Now I recognize my error.

Phaedrus: What error?

Socrates: That was a dreadful speech which you brought with you, and you made me utter one as bad.

Phaedrus: How so?

Socrates: It was foolish, I say, — to a certain extent, impious; can anything be more dreadful?

Phaedrus: Nothing, if the speech was really such as you describe.

Socrates: Well, and is not Eros the son of Aphrodite, and a god?

Phaedrus: So men say.

Socrates: But that was not acknowledged by Lysias in his speech, nor by you in that other speech which you by a charm drew from my lips. For if love be, as he surely is, a divinity, he cannot be evil. Yet this was the error of both the speeches. There was also a simplicity about them which was refreshing; having no truth or honesty in them, nevertheless they pretended to be something, hoping to succeed in deceiving the manikins of earth and gain celebrity among them. Wherefore I must have a purgation. And I bethink me of an ancient purgation of mythological error which was devised, not by Homer, for he never had the wit to discover why he was blind, but by Stesichorus, who was a philosopher and knew the reason why; and therefore, when he lost his eyes, for that was the penalty which was inflicted upon him for reviling the lovely Helen, he at once purged himself. And the purgation was a recantation, which began thus, —

‘False is that word of mine — the truth is that thou didst not embark in

ships, nor ever go to the walls of Troy;’

and when he had completed his poem, which is called ‘the recantation,’ immediately his sight returned to him. Now I will be wiser than either Stesichorus or Homer, in that I am going to make my recantation for reviling love before I suffer; and this I will attempt, not as before, veiled and ashamed, but with forehead bold and bare.

Phaedrus: Nothing could be more agreeable to me than to hear you say so.

Socrates: Only think, my good Phaedrus, what an utter want of delicacy was shown in the two discourses; I mean, in my own and in that which you recited out of the book. Would not any one who was himself of a noble and gentle nature, and who loved or ever had loved a nature like his own, when we tell of the petty causes of lovers' jealousies, and of their exceeding animosities, and of the injuries which they do to their beloved, have imagined that our ideas of love were taken from some haunt of sailors to which good manners were unknown — he would certainly never have admitted the justice of our censure?

Phaedrus: I dare say not, Socrates.

Socrates: Therefore, because I blush at the thought of this person, and also because I am afraid of Love himself, I desire to wash the brine out of my ears with water from the spring; and I would counsel Lysias not to delay, but to write another discourse, which shall prove that 'ceteris paribus' the lover ought to be accepted rather than the non-lover.

Phaedrus: Be assured that he shall. You shall speak the praises of the lover, and Lysias shall be compelled by me to write another discourse on the same theme.

Socrates: You will be true to your nature in that, and therefore I believe you.

Phaedrus: Speak, and fear not.

Socrates: But where is the fair youth whom I was addressing before, and who ought to listen now; lest, if he hear me not, he should accept a non-lover before he knows what he is doing?

Phaedrus: He is close at hand, and always at your service.

Socrates: Know then, fair youth, that the former discourse was the word of Phaedrus, the son of Vain Man, who dwells in the city of Myrrhina (Myrrhinusius). And this which I am about to

utter is the recantation of Stesichorus the son of Godly Man (Euphemus), who comes from the town of Desire (Himera), and is to the following effect: 'I told a lie when I said' that the beloved ought to accept the non-lover when he might have the lover, because the one is sane, and the other mad. It might be so if madness were simply an evil; but there is also a madness which is a divine gift, and the source of the chiefest blessings granted to men. For prophecy is a madness, and the prophetess at Delphi and the priestesses at Dodona when out of their senses have conferred great benefits on Hellas, both in public and private life, but when in their senses few or none. And I might also tell you how the Sibyl and other inspired persons have given to many an one many an intimation of the future which has saved them from falling. But it would be tedious to speak of what every one knows.

There will be more reason in appealing to the ancient inventors of names (compare Cratylus), who would never have connected prophecy (mantike) which foretells the future and is the noblest of arts, with madness (manike), or called them both by the same name, if they had deemed madness to be a disgrace or dishonour; — they must have thought that there was an inspired madness which was a noble thing; for the two words, mantike and manike, are really the same, and the letter tau is only a modern and tasteless insertion. And this is confirmed by the name which was given by them to the rational investigation of futurity, whether made by the help of birds or of other signs — this, for as much as it is an art which supplies from the reasoning faculty mind (nous) and information (istoria) to human thought (oiesis) they originally termed oionoistike, but the word has been lately altered and made sonorous by the modern introduction of the letter Omega (oionoistike and oionistike), and in proportion as prophecy (mantike) is more perfect and august than augury, both in name and fact, in the same proportion, as the ancients testify, is madness superior to a sane mind (sophrosune) for the one is only of human, but the

other of divine origin. Again, where plagues and mightiest woes have bred in certain families, owing to some ancient blood-guiltiness, there madness has entered with holy prayers and rites, and by inspired utterances found a way of deliverance for those who are in need; and he who has part in this gift, and is truly possessed and duly out of his mind, is by the use of purifications and mysteries made whole and exempt from evil, future as well as present, and has a release from the calamity which was afflicting him. The third kind is the madness of those who are possessed by the Muses; which taking hold of a delicate and virgin soul, and there inspiring frenzy, awakens lyrical and all other numbers; with these adorning the myriad actions of ancient heroes for the instruction of posterity. But he who, having no touch of the Muses' madness in his soul, comes to the door and thinks that he will get into the temple by the help of art — he, I say, and his poetry are not admitted; the sane man disappears and is nowhere when he enters into rivalry with the madman.

I might tell of many other noble deeds which have sprung from inspired madness. And therefore, let no one frighten or flutter us by saying that the temperate friend is to be chosen rather than the inspired, but let him further show that love is not sent by the gods for any good to lover or beloved; if he can do so we will allow him to carry off the palm. And we, on our part, will prove in answer to him that the madness of love is the greatest of heaven's blessings, and the proof shall be one which the wise will receive, and the witling disbelieve. But first of all, let us view the affections and actions of the soul divine and human, and try to ascertain the truth about them. The beginning of our proof is as follows: —

(Translated by Cic. Tus. Quaest.) The soul through all her being is immortal, for that which is ever in motion is immortal; but that which moves another and is moved by another, in ceasing to move ceases also to live. Only the self-moving, never leaving

self, never ceases to move, and is the fountain and beginning of motion to all that moves besides. Now, the beginning is unbegotten, for that which is begotten has a beginning; but the beginning is begotten of nothing, for if it were begotten of something, then the begotten would not come from a beginning. But if unbegotten, it must also be indestructible; for if beginning were destroyed, there could be no beginning out of anything, nor anything out of a beginning; and all things must have a beginning. And therefore the self-moving is the beginning of motion; and this can neither be destroyed nor begotten, else the whole heavens and all creation would collapse and stand still, and never again have motion or birth. But if the self-moving is proved to be immortal, he who affirms that self-motion is the very idea and essence of the soul will not be put to confusion. For the body which is moved from without is soulless; but that which is moved from within has a soul, for such is the nature of the soul. But if this be true, must not the soul be the self-moving, and therefore of necessity unbegotten and immortal? Enough of the soul's immortality.

Of the nature of the soul, though her true form be ever a theme of large and more than mortal discourse, let me speak briefly, and in a figure. And let the figure be composite — a pair of winged horses and a charioteer. Now the winged horses and the charioteers of the gods are all of them noble and of noble descent, but those of other races are mixed; the human charioteer drives his in a pair; and one of them is noble and of noble breed, and the other is ignoble and of ignoble breed; and the driving of them of necessity gives a great deal of trouble to him. I will endeavour to explain to you in what way the mortal differs from the immortal creature. The soul in her totality has the care of inanimate being everywhere, and traverses the whole heaven in divers forms appearing — when perfect and fully winged she soars upward, and orders the whole world; whereas the imperfect soul, losing her wings and drooping in her flight at last settles on the solid ground — there, finding a

home, she receives an earthly frame which appears to be self-moved, but is really moved by her power; and this composition of soul and body is called a living and mortal creature. For immortal no such union can be reasonably believed to be; although fancy, not having seen nor surely known the nature of God, may imagine an immortal creature having both a body and also a soul which are united throughout all time. Let that, however, be as God wills, and be spoken of acceptably to him. And now let us ask the reason why the soul loses her wings!

The wing is the corporeal element which is most akin to the divine, and which by nature tends to soar aloft and carry that which gravitates downwards into the upper region, which is the habitation of the gods. The divine is beauty, wisdom, goodness, and the like; and by these the wing of the soul is nourished, and grows apace; but when fed upon evil and foulness and the opposite of good, wastes and falls away. Zeus, the mighty lord, holding the reins of a winged chariot, leads the way in heaven, ordering all and taking care of all; and there follows him the array of gods and demi-gods, marshalled in eleven bands; Hestia alone abides at home in the house of heaven; of the rest they who are reckoned among the princely twelve march in their appointed order. They see many blessed sights in the inner heaven, and there are many ways to and fro, along which the blessed gods are passing, every one doing his own work; he may follow who will and can, for jealousy has no place in the celestial choir. But when they go to banquet and festival, then they move up the steep to the top of the vault of heaven. The chariots of the gods in even poise, obeying the rein, glide rapidly; but the others labour, for the vicious steed goes heavily, weighing down the charioteer to the earth when his steed has not been thoroughly trained: — and this is the hour of agony and extremest conflict for the soul. For the immortals, when they are at the end of their course, go forth and stand upon the outside of heaven, and the revolution of the spheres carries them round,

and they behold the things beyond. But of the heaven which is above the heavens, what earthly poet ever did or ever will sing worthily? It is such as I will describe; for I must dare to speak the truth, when truth is my theme. There abides the very being with which true knowledge is concerned; the colourless, formless, intangible essence, visible only to mind, the pilot of the soul. The divine intelligence, being nurtured upon mind and pure knowledge, and the intelligence of every soul which is capable of receiving the food proper to it, rejoices at beholding reality, and once more gazing upon truth, is replenished and made glad, until the revolution of the worlds brings her round again to the same place. In the revolution she beholds justice, and temperance, and knowledge absolute, not in the form of generation or of relation, which men call existence, but knowledge absolute in existence absolute; and beholding the other true existences in like manner, and feasting upon them, she passes down into the interior of the heavens and returns home; and there the charioteer putting up his horses at the stall, gives them ambrosia to eat and nectar to drink.

Such is the life of the gods; but of other souls, that which follows God best and is likest to him lifts the head of the charioteer into the outer world, and is carried round in the revolution, troubled indeed by the steeds, and with difficulty beholding true being; while another only rises and falls, and sees, and again fails to see by reason of the unruliness of the steeds. The rest of the souls are also longing after the upper world and they all follow, but not being strong enough they are carried round below the surface, plunging, treading on one another, each striving to be first; and there is confusion and perspiration and the extremity of effort; and many of them are lamed or have their wings broken through the ill-driving of the charioteers; and all of them after a fruitless toil, not having attained to the mysteries of true being, go away, and feed upon opinion. The reason why the souls exhibit this exceeding eagerness to behold the plain of truth is that pasturage is found there, which is suited to the

highest part of the soul; and the wing on which the soul soars is nourished with this. And there is a law of Destiny, that the soul which attains any vision of truth in company with a god is preserved from harm until the next period, and if attaining always is always unharmed. But when she is unable to follow, and fails to behold the truth, and through some ill-hap sinks beneath the double load of forgetfulness and vice, and her wings fall from her and she drops to the ground, then the law ordains that this soul shall at her first birth pass, not into any other animal, but only into man; and the soul which has seen most of truth shall come to the birth as a philosopher, or artist, or some musical and loving nature; that which has seen truth in the second degree shall be some righteous king or warrior chief; the soul which is of the third class shall be a politician, or economist, or trader; the fourth shall be a lover of gymnastic toils, or a physician; the fifth shall lead the life of a prophet or hierophant; to the sixth the character of poet or some other imitative artist will be assigned; to the seventh the life of an artisan or husbandman; to the eighth that of a sophist or demagogue; to the ninth that of a tyrant — all these are states of probation, in which he who does righteously improves, and he who does unrighteously, deteriorates his lot.

Ten thousand years must elapse before the soul of each one can return to the place from whence she came, for she cannot grow her wings in less; only the soul of a philosopher, guileless and true, or the soul of a lover, who is not devoid of philosophy, may acquire wings in the third of the recurring periods of a thousand years; he is distinguished from the ordinary good man who gains wings in three thousand years: — and they who choose this life three times in succession have wings given them, and go away at the end of three thousand years. But the others (The philosopher alone is not subject to judgment (krisis), for he has never lost the vision of truth.) receive judgment when they have completed their first life, and after the judgment they go, some of them to the houses of correction which are under the earth,

and are punished; others to some place in heaven whither they are lightly borne by justice, and there they live in a manner worthy of the life which they led here when in the form of men. And at the end of the first thousand years the good souls and also the evil souls both come to draw lots and choose their second life, and they may take any which they please. The soul of a man may pass into the life of a beast, or from the beast return again into the man. But the soul which has never seen the truth will not pass into the human form. For a man must have intelligence of universals, and be able to proceed from the many particulars of sense to one conception of reason; — this is the recollection of those things which our soul once saw while following God — when regardless of that which we now call being she raised her head up towards the true being. And therefore the mind of the philosopher alone has wings; and this is just, for he is always, according to the measure of his abilities, clinging in recollection to those things in which God abides, and in beholding which He is what He is. And he who employs aright these memories is ever being initiated into perfect mysteries and alone becomes truly perfect. But, as he forgets earthly interests and is rapt in the divine, the vulgar deem him mad, and rebuke him; they do not see that he is inspired.

Thus far I have been speaking of the fourth and last kind of madness, which is imputed to him who, when he sees the beauty of earth, is transported with the recollection of the true beauty; he would like to fly away, but he cannot; he is like a bird fluttering and looking upward and careless of the world below; and he is therefore thought to be mad. And I have shown this of all inspirations to be the noblest and highest and the offspring of the highest to him who has or shares in it, and that he who loves the beautiful is called a lover because he partakes of it. For, as has been already said, every soul of man has in the way of nature beheld true being; this was the condition of her passing into the form of man. But all souls do not easily recall the things of the other world; they may have seen them for a short time

only, or they may have been unfortunate in their earthly lot, and, having had their hearts turned to unrighteousness through some corrupting influence, they may have lost the memory of the holy things which once they saw. Few only retain an adequate remembrance of them; and they, when they behold here any image of that other world, are rapt in amazement; but they are ignorant of what this rapture means, because they do not clearly perceive. For there is no light of justice or temperance or any of the higher ideas which are precious to souls in the earthly copies of them: they are seen through a glass dimly; and there are few who, going to the images, behold in them the realities, and these only with difficulty. There was a time when with the rest of the happy band they saw beauty shining in brightness, — we philosophers following in the train of Zeus, others in company with other gods; and then we beheld the beatific vision and were initiated into a mystery which may be truly called most blessed, celebrated by us in our state of innocence, before we had any experience of evils to come, when we were admitted to the sight of apparitions innocent and simple and calm and happy, which we beheld shining in pure light, pure ourselves and not yet enshrined in that living tomb which we carry about, now that we are imprisoned in the body, like an oyster in his shell. Let me linger over the memory of scenes which have passed away.

But of beauty, I repeat again that we saw her there shining in company with the celestial forms; and coming to earth we find her here too, shining in clearness through the clearest aperture of sense. For sight is the most piercing of our bodily senses; though not by that is wisdom seen; her loveliness would have been transporting if there had been a visible image of her, and the other ideas, if they had visible counterparts, would be equally lovely. But this is the privilege of beauty, that being the loveliest she is also the most palpable to sight. Now he who is not newly initiated or who has become corrupted, does not easily rise out of this world to the sight of true beauty in the

other; he looks only at her earthly namesake, and instead of being awed at the sight of her, he is given over to pleasure, and like a brutish beast he rushes on to enjoy and beget; he consorts with wantonness, and is not afraid or ashamed of pursuing pleasure in violation of nature. But he whose initiation is recent, and who has been the spectator of many glories in the other world, is amazed when he sees any one having a godlike face or form, which is the expression of divine beauty; and at first a shudder runs through him, and again the old awe steals over him; then looking upon the face of his beloved as of a god he reverences him, and if he were not afraid of being thought a downright madman, he would sacrifice to his beloved as to the image of a god; then while he gazes on him there is a sort of reaction, and the shudder passes into an unusual heat and perspiration; for, as he receives the effluence of beauty through the eyes, the wing moistens and he warms. And as he warms, the parts out of which the wing grew, and which had been hitherto closed and rigid, and had prevented the wing from shooting forth, are melted, and as nourishment streams upon him, the lower end of the wing begins to swell and grow from the root upwards; and the growth extends under the whole soul — for once the whole was winged. During this process the whole soul is all in a state of ebullition and effervescence, — which may be compared to the irritation and uneasiness in the gums at the time of cutting teeth, — bubbles up, and has a feeling of uneasiness and tickling; but when in like manner the soul is beginning to grow wings, the beauty of the beloved meets her eye and she receives the sensible warm motion of particles which flow towards her, therefore called emotion (imeros), and is refreshed and warmed by them, and then she ceases from her pain with joy. But when she is parted from her beloved and her moisture fails, then the orifices of the passage out of which the wing shoots dry up and close, and intercept the germ of the wing; which, being shut up with the emotion, throbbing as with the pulsations of an artery, pricks the aperture which is nearest,

until at length the entire soul is pierced and maddened and pained, and at the recollection of beauty is again delighted. And from both of them together the soul is oppressed at the strangeness of her condition, and is in a great strait and excitement, and in her madness can neither sleep by night nor abide in her place by day. And wherever she thinks that she will behold the beautiful one, thither in her desire she runs. And when she has seen him, and bathed herself in the waters of beauty, her constraint is loosened, and she is refreshed, and has no more pangs and pains; and this is the sweetest of all pleasures at the time, and is the reason why the soul of the lover will never forsake his beautiful one, whom he esteems above all; he has forgotten mother and brethren and companions, and he thinks nothing of the neglect and loss of his property; the rules and proprieties of life, on which he formerly prided himself, he now despises, and is ready to sleep like a servant, wherever he is allowed, as near as he can to his desired one, who is the object of his worship, and the physician who can alone assuage the greatness of his pain. And this state, my dear imaginary youth to whom I am talking, is by men called love, and among the gods has a name at which you, in your simplicity, may be inclined to mock; there are two lines in the apocryphal writings of Homer in which the name occurs. One of them is rather outrageous, and not altogether metrical. They are as follows:

‘Mortals call him fluttering love, But the immortals call him winged one, Because the growing of wings (Or, reading pterothoiton, ‘the movement of wings.’) is a necessity to him.’

You may believe this, but not unless you like. At any rate the loves of lovers and their causes are such as I have described.

Now the lover who is taken to be the attendant of Zeus is better able to bear the winged god, and can endure a heavier burden; but the attendants and companions of Ares, when under the influence of love, if they fancy that they have been at all wronged, are ready to kill and put an end to themselves and

their beloved. And he who follows in the train of any other god, while he is unspoiled and the impression lasts, honours and imitates him, as far as he is able; and after the manner of his God he behaves in his intercourse with his beloved and with the rest of the world during the first period of his earthly existence. Every one chooses his love from the ranks of beauty according to his character, and this he makes his god, and fashions and adorns as a sort of image which he is to fall down and worship. The followers of Zeus desire that their beloved should have a soul like him; and therefore they seek out some one of a philosophical and imperial nature, and when they have found him and loved him, they do all they can to confirm such a nature in him, and if they have no experience of such a disposition hitherto, they learn of any one who can teach them, and themselves follow in the same way. And they have the less difficulty in finding the nature of their own god in themselves, because they have been compelled to gaze intensely on him; their recollection clings to him, and they become possessed of him, and receive from him their character and disposition, so far as man can participate in God. The qualities of their god they attribute to the beloved, wherefore they love him all the more, and if, like the Bacchic Nymphs, they draw inspiration from Zeus, they pour out their own fountain upon him, wanting to make him as like as possible to their own god. But those who are the followers of Here seek a royal love, and when they have found him they do just the same with him; and in like manner the followers of Apollo, and of every other god walking in the ways of their god, seek a love who is to be made like him whom they serve, and when they have found him, they themselves imitate their god, and persuade their love to do the same, and educate him into the manner and nature of the god as far as they each can; for no feelings of envy or jealousy are entertained by them towards their beloved, but they do their utmost to create in him the greatest likeness of themselves and of the god whom they honour. Thus fair and blissful to the beloved is the

desire of the inspired lover, and the initiation of which I speak into the mysteries of true love, if he be captured by the lover and their purpose is effected. Now the beloved is taken captive in the following manner: —

As I said at the beginning of this tale, I divided each soul into three — two horses and a charioteer; and one of the horses was good and the other bad: the division may remain, but I have not yet explained in what the goodness or badness of either consists, and to that I will now proceed. The right-hand horse is upright and cleanly made; he has a lofty neck and an aquiline nose; his colour is white, and his eyes dark; he is a lover of honour and modesty and temperance, and the follower of true glory; he needs no touch of the whip, but is guided by word and admonition only. The other is a crooked lumbering animal, put together anyhow; he has a short thick neck; he is flat-faced and of a dark colour, with grey eyes and blood-red complexion (Or with grey and blood-shot eyes.); the mate of insolence and pride, shag-eared and deaf, hardly yielding to whip and spur. Now when the charioteer beholds the vision of love, and has his whole soul warmed through sense, and is full of the prickings and ticklings of desire, the obedient steed, then as always under the government of shame, refrains from leaping on the beloved; but the other, heedless of the pricks and of the blows of the whip, plunges and runs away, giving all manner of trouble to his companion and the charioteer, whom he forces to approach the beloved and to remember the joys of love. They at first indignantly oppose him and will not be urged on to do terrible and unlawful deeds; but at last, when he persists in plaguing them, they yield and agree to do as he bids them. And now they are at the spot and behold the flashing beauty of the beloved; which when the charioteer sees, his memory is carried to the true beauty, whom he beholds in company with Modesty like an image placed upon a holy pedestal. He sees her, but he is afraid and falls backwards in adoration, and by his fall is compelled to pull back the reins with such violence as to bring both the

steeds on their haunches, the one willing and unresisting, the unruly one very unwilling; and when they have gone back a little, the one is overcome with shame and wonder, and his whole soul is bathed in perspiration; the other, when the pain is over which the bridle and the fall had given him, having with difficulty taken breath, is full of wrath and reproaches, which he heaps upon the charioteer and his fellow-steed, for want of courage and manhood, declaring that they have been false to their agreement and guilty of desertion. Again they refuse, and again he urges them on, and will scarce yield to their prayer that he would wait until another time. When the appointed hour comes, they make as if they had forgotten, and he reminds them, fighting and neighing and dragging them on, until at length he on the same thoughts intent, forces them to draw near again. And when they are near he stoops his head and puts up his tail, and takes the bit in his teeth and pulls shamelessly. Then the charioteer is worse off than ever; he falls back like a racer at the barrier, and with a still more violent wrench drags the bit out of the teeth of the wild steed and covers his abusive tongue and jaws with blood, and forces his legs and haunches to the ground and punishes him sorely. And when this has happened several times and the villain has ceased from his wanton way, he is tamed and humbled, and follows the will of the charioteer, and when he sees the beautiful one he is ready to die of fear. And from that time forward the soul of the lover follows the beloved in modesty and holy fear.

And so the beloved who, like a god, has received every true and loyal service from his lover, not in pretence but in reality, being also himself of a nature friendly to his admirer, if in former days he has blushed to own his passion and turned away his lover, because his youthful companions or others slanderously told him that he would be disgraced, now as years advance, at the appointed age and time, is led to receive him into communion. For fate which has ordained that there shall be no friendship among the evil has also ordained that there shall ever be

friendship among the good. And the beloved when he has received him into communion and intimacy, is quite amazed at the good-will of the lover; he recognises that the inspired friend is worth all other friends or kinsmen; they have nothing of friendship in them worthy to be compared with his. And when this feeling continues and he is nearer to him and embraces him, in gymnastic exercises and at other times of meeting, then the fountain of that stream, which Zeus when he was in love with Ganymede named Desire, overflows upon the lover, and some enters into his soul, and some when he is filled flows out again; and as a breeze or an echo rebounds from the smooth rocks and returns whence it came, so does the stream of beauty, passing through the eyes which are the windows of the soul, come back to the beautiful one; there arriving and quickening the passages of the wings, watering them and inclining them to grow, and filling the soul of the beloved also with love. And thus he loves, but he knows not what; he does not understand and cannot explain his own state; he appears to have caught the infection of blindness from another; the lover is his mirror in whom he is beholding himself, but he is not aware of this. When he is with the lover, both cease from their pain, but when he is away then he longs as he is longed for, and has love's image, love for love (Anteros) lodging in his breast, which he calls and believes to be not love but friendship only, and his desire is as the desire of the other, but weaker; he wants to see him, touch him, kiss him, embrace him, and probably not long afterwards his desire is accomplished. When they meet, the wanton steed of the lover has a word to say to the charioteer; he would like to have a little pleasure in return for many pains, but the wanton steed of the beloved says not a word, for he is bursting with passion which he understands not; — he throws his arms round the lover and embraces him as his dearest friend; and, when they are side by side, he is not in a state in which he can refuse the lover anything, if he ask him; although his fellow-steed and the charioteer oppose him with the arguments of shame and reason.

After this their happiness depends upon their self-control; if the better elements of the mind which lead to order and philosophy prevail, then they pass their life here in happiness and harmony — masters of themselves and orderly — enslaving the vicious and emancipating the virtuous elements of the soul; and when the end comes, they are light and winged for flight, having conquered in one of the three heavenly or truly Olympian victories; nor can human discipline or divine inspiration confer any greater blessing on man than this. If, on the other hand, they leave philosophy and lead the lower life of ambition, then probably, after wine or in some other careless hour, the two wanton animals take the two souls when off their guard and bring them together, and they accomplish that desire of their hearts which to the many is bliss; and this having once enjoyed they continue to enjoy, yet rarely because they have not the approval of the whole soul. They too are dear, but not so dear to one another as the others, either at the time of their love or afterwards. They consider that they have given and taken from each other the most sacred pledges, and they may not break them and fall into enmity. At last they pass out of the body, unwinged, but eager to soar, and thus obtain no mean reward of love and madness. For those who have once begun the heavenward pilgrimage may not go down again to darkness and the journey beneath the earth, but they live in light always; happy companions in their pilgrimage, and when the time comes at which they receive their wings they have the same plumage because of their love.

Thus great are the heavenly blessings which the friendship of a lover will confer upon you, my youth. Whereas the attachment of the non-lover, which is alloyed with a worldly prudence and has worldly and niggardly ways of doling out benefits, will breed in your soul those vulgar qualities which the populace applaud, will send you bowling round the earth during a period of nine thousand years, and leave you a fool in the world below.

And thus, dear Eros, I have made and paid my recantation, as well and as fairly as I could; more especially in the matter of the poetical figures which I was compelled to use, because Phaedrus would have them. And now forgive the past and accept the present, and be gracious and merciful to me, and do not in thine anger deprive me of sight, or take from me the art of love which thou hast given me, but grant that I may be yet more esteemed in the eyes of the fair. And if Phaedrus or I myself said anything rude in our first speeches, blame Lysias, who is the father of the brat, and let us have no more of his progeny; bid him study philosophy, like his brother Polemarchus; and then his lover Phaedrus will no longer halt between two opinions, but will dedicate himself wholly to love and to philosophical discourses.

Phaedrus: I join in the prayer, Socrates, and say with you, if this be for my good, may your words come to pass. But why did you make your second oration so much finer than the first? I wonder why. And I begin to be afraid that I shall lose conceit of Lysias, and that he will appear tame in comparison, even if he be willing to put another as fine and as long as yours into the field, which I doubt. For quite lately one of your politicians was abusing him on this very account; and called him a ‘speech writer’ again and again. So that a feeling of pride may probably induce him to give up writing speeches.

Socrates: What a very amusing notion! But I think, my young man, that you are much mistaken in your friend if you imagine that he is frightened at a little noise; and, possibly, you think that his assailant was in earnest?

Phaedrus: I thought, Socrates, that he was. And you are aware that the greatest and most influential statesmen are ashamed of writing speeches and leaving them in a written form, lest they should be called Sophists by posterity.

Socrates: You seem to be unconscious, Phaedrus, that the ‘sweet elbow’ (A proverb, like ‘the grapes are sour,’ applied to

pleasures which cannot be had, meaning sweet things which, like the elbow, are out of the reach of the mouth. The promised pleasure turns out to be a long and tedious affair.) of the proverb is really the long arm of the Nile. And you appear to be equally unaware of the fact that this sweet elbow of theirs is also a long arm. For there is nothing of which our great politicians are so fond as of writing speeches and bequeathing them to posterity. And they add their admirers' names at the top of the writing, out of gratitude to them.

Phaedrus: What do you mean? I do not understand.

Socrates: Why, do you not know that when a politician writes, he begins with the names of his approvers?

Phaedrus: How so?

Socrates: Why, he begins in this manner: 'Be it enacted by the senate, the people, or both, on the motion of a certain person,' who is our author; and so putting on a serious face, he proceeds to display his own wisdom to his admirers in what is often a long and tedious composition. Now what is that sort of thing but a regular piece of authorship?

Phaedrus: True.

Socrates: And if the law is finally approved, then the author leaves the theatre in high delight; but if the law is rejected and he is done out of his speech-making, and not thought good enough to write, then he and his party are in mourning.

Phaedrus: Very true.

Socrates: So far are they from despising, or rather so highly do they value the practice of writing.

Phaedrus: No doubt.

Socrates: And when the king or orator has the power, as Lycurgus or Solon or Darius had, of attaining an immortality or authorship in a state, is he not thought by posterity, when they see his compositions, and does he not think himself, while he is

yet alive, to be a god?

Phaedrus: Very true.

Socrates: Then do you think that any one of this class, however ill-disposed, would reproach Lysias with being an author?

Phaedrus: Not upon your view; for according to you he would be casting a slur upon his own favourite pursuit.

Socrates: Any one may see that there is no disgrace in the mere fact of writing.

Phaedrus: Certainly not.

Socrates: The disgrace begins when a man writes not well, but badly.

Phaedrus: Clearly.

Socrates: And what is well and what is badly — need we ask Lysias, or any other poet or orator, who ever wrote or will write either a political or any other work, in metre or out of metre, poet or prose writer, to teach us this?

Phaedrus: Need we? For what should a man live if not for the pleasures of discourse? Surely not for the sake of bodily pleasures, which almost always have previous pain as a condition of them, and therefore are rightly called slavish.

Socrates: There is time enough. And I believe that the grasshoppers chirruping after their manner in the heat of the sun over our heads are talking to one another and looking down at us. What would they say if they saw that we, like the many, are not conversing, but slumbering at mid-day, lulled by their voices, too indolent to think? Would they not have a right to laugh at us? They might imagine that we were slaves, who, coming to rest at a place of resort of theirs, like sheep lie asleep at noon around the well. But if they see us discoursing, and like Odysseus sailing past them, deaf to their siren voices, they may perhaps, out of respect, give us of the gifts which they receive from the gods that they may impart them to men.

Phaedrus: What gifts do you mean? I never heard of any.

Socrates: A lover of music like yourself ought surely to have heard the story of the grasshoppers, who are said to have been human beings in an age before the Muses. And when the Muses came and song appeared they were ravished with delight; and singing always, never thought of eating and drinking, until at last in their forgetfulness they died. And now they live again in the grasshoppers; and this is the return which the Muses make to them — they neither hunger, nor thirst, but from the hour of their birth are always singing, and never eating or drinking; and when they die they go and inform the Muses in heaven who honours them on earth. They win the love of Terpsichore for the dancers by their report of them; of Erato for the lovers, and of the other Muses for those who do them honour, according to the several ways of honouring them; — of Calliope the eldest Muse and of Urania who is next to her, for the philosophers, of whose music the grasshoppers make report to them; for these are the Muses who are chiefly concerned with heaven and thought, divine as well as human, and they have the sweetest utterance. For many reasons, then, we ought always to talk and not to sleep at mid-day.

Phaedrus: Let us talk.

Socrates: Shall we discuss the rules of writing and speech as we were proposing?

Phaedrus: Very good.

Socrates: In good speaking should not the mind of the speaker know the truth of the matter about which he is going to speak?

Phaedrus: And yet, Socrates, I have heard that he who would be an orator has nothing to do with true justice, but only with that which is likely to be approved by the many who sit in judgment; nor with the truly good or honourable, but only with opinion about them, and that from opinion comes persuasion, and not from the truth.

Socrates: The words of the wise are not to be set aside; for there is probably something in them; and therefore the meaning of this saying is not hastily to be dismissed.

Phaedrus: Very true.

Socrates: Let us put the matter thus: — Suppose that I persuaded you to buy a horse and go to the wars. Neither of us knew what a horse was like, but I knew that you believed a horse to be of tame animals the one which has the longest ears.

Phaedrus: That would be ridiculous.

Socrates: There is something more ridiculous coming: — Suppose, further, that in sober earnest I, having persuaded you of this, went and composed a speech in honour of an ass, whom I entitled a horse beginning: 'A noble animal and a most useful possession, especially in war, and you may get on his back and fight, and he will carry baggage or anything.'

Phaedrus: How ridiculous!

Socrates: Ridiculous! Yes; but is not even a ridiculous friend better than a cunning enemy?

Phaedrus: Certainly.

Socrates: And when the orator instead of putting an ass in the place of a horse, puts good for evil, being himself as ignorant of their true nature as the city on which he imposes is ignorant; and having studied the notions of the multitude, falsely persuades them not about 'the shadow of an ass,' which he confounds with a horse, but about good which he confounds with evil, — what will be the harvest which rhetoric will be likely to gather after the sowing of that seed?

Phaedrus: The reverse of good.

Socrates: But perhaps rhetoric has been getting too roughly handled by us, and she might answer: What amazing nonsense you are talking! As if I forced any man to learn to speak in ignorance of the truth! Whatever my advice may be worth, I

should have told him to arrive at the truth first, and then come to me. At the same time I boldly assert that mere knowledge of the truth will not give you the art of persuasion.

Phaedrus: There is reason in the lady’s defence of herself.

Socrates: Quite true; if only the other arguments which remain to be brought up bear her witness that she is an art at all. But I seem to hear them arraying themselves on the opposite side, declaring that she speaks falsely, and that rhetoric is a mere routine and trick, not an art. Lo! a Spartan appears, and says that there never is nor ever will be a real art of speaking which is divorced from the truth.

Phaedrus: And what are these arguments, Socrates? Bring them out that we may examine them.

Socrates: Come out, fair children, and convince Phaedrus, who is the father of similar beauties, that he will never be able to speak about anything as he ought to speak unless he have a knowledge of philosophy. And let Phaedrus answer you.

Phaedrus: Put the question.

Socrates: Is not rhetoric, taken generally, a universal art of enchanting the mind by arguments; which is practised not only in courts and public assemblies, but in private houses also, having to do with all matters, great as well as small, good and bad alike, and is in all equally right, and equally to be esteemed — that is what you have heard?

Phaedrus: Nay, not exactly that; I should say rather that I have heard the art confined to speaking and writing in lawsuits, and to speaking in public assemblies — not extended farther.

Socrates: Then I suppose that you have only heard of the rhetoric of Nestor and Odysseus, which they composed in their leisure hours when at Troy, and never of the rhetoric of Palamedes?

Phaedrus: No more than of Nestor and Odysseus, unless Gorgias is your Nestor, and Thrasymachus or Theodorus your Odysseus.

Socrates: Perhaps that is my meaning. But let us leave them. And do you tell me, instead, what are plaintiff and defendant doing in a law court — are they not contending?

Phaedrus: Exactly so.

Socrates: About the just and unjust — that is the matter in dispute?

Phaedrus: Yes.

Socrates: And a professor of the art will make the same thing appear to the same persons to be at one time just, at another time, if he is so inclined, to be unjust?

Phaedrus: Exactly.

Socrates: And when he speaks in the assembly, he will make the same things seem good to the city at one time, and at another time the reverse of good?

Phaedrus: That is true.

Socrates: Have we not heard of the Eleatic Palamedes (Zeno), who has an art of speaking by which he makes the same things appear to his hearers like and unlike, one and many, at rest and in motion?

Phaedrus: Very true.

Socrates: The art of disputation, then, is not confined to the courts and the assembly, but is one and the same in every use of language; this is the art, if there be such an art, which is able to find a likeness of everything to which a likeness can be found, and draws into the light of day the likenesses and disguises which are used by others?

Phaedrus: How do you mean?

Socrates: Let me put the matter thus: When will there be more chance of deception — when the difference is large or small?

Phaedrus: When the difference is small.

Socrates: And you will be less likely to be discovered in passing by degrees into the other extreme than when you go all at once?

Phaedrus: Of course.

Socrates: He, then, who would deceive others, and not be deceived, must exactly know the real likenesses and differences of things?

Phaedrus: He must.

Socrates: And if he is ignorant of the true nature of any subject, how can he detect the greater or less degree of likeness in other things to that of which by the hypothesis he is ignorant?

Phaedrus: He cannot.

Socrates: And when men are deceived and their notions are at variance with realities, it is clear that the error slips in through resemblances?

Phaedrus: Yes, that is the way.

Socrates: Then he who would be a master of the art must understand the real nature of everything; or he will never know either how to make the gradual departure from truth into the opposite of truth which is effected by the help of resemblances, or how to avoid it?

Phaedrus: He will not.

Socrates: He then, who being ignorant of the truth aims at appearances, will only attain an art of rhetoric which is ridiculous and is not an art at all?

Phaedrus: That may be expected.

Socrates: Shall I propose that we look for examples of art and want of art, according to our notion of them, in the speech of

Lysias which you have in your hand, and in my own speech?

Phaedrus: Nothing could be better; and indeed I think that our previous argument has been too abstract and wanting in illustrations.

Socrates: Yes; and the two speeches happen to afford a very good example of the way in which the speaker who knows the truth may, without any serious purpose, steal away the hearts of his hearers. This piece of good-fortune I attribute to the local deities; and, perhaps, the prophets of the Muses who are singing over our heads may have imparted their inspiration to me. For I do not imagine that I have any rhetorical art of my own.

Phaedrus: Granted; if you will only please to get on.

Socrates: Suppose that you read me the first words of Lysias' speech.

Phaedrus: 'You know how matters stand with me, and how, as I conceive, they might be arranged for our common interest; and I maintain that I ought not to fail in my suit, because I am not your lover. For lovers repent—'

Socrates: Enough: — Now, shall I point out the rhetorical error of those words?

Phaedrus: Yes.

Socrates: Every one is aware that about some things we are agreed, whereas about other things we differ.

Phaedrus: I think that I understand you; but will you explain yourself?

Socrates: When any one speaks of iron and silver, is not the same thing present in the minds of all?

Phaedrus: Certainly.

Socrates: But when any one speaks of justice and goodness we part company and are at odds with one another and with

ourselves?

Phaedrus: Precisely.

Socrates: Then in some things we agree, but not in others?

Phaedrus: That is true.

Socrates: In which are we more likely to be deceived, and in which has rhetoric the greater power?

Phaedrus: Clearly, in the uncertain class.

Socrates: Then the rhetorician ought to make a regular division, and acquire a distinct notion of both classes, as well of that in which the many err, as of that in which they do not err?

Phaedrus: He who made such a distinction would have an excellent principle.

Socrates: Yes; and in the next place he must have a keen eye for the observation of particulars in speaking, and not make a mistake about the class to which they are to be referred.

Phaedrus: Certainly.

Socrates: Now to which class does love belong — to the debatable or to the undisputed class?

Phaedrus: To the debatable, clearly; for if not, do you think that love would have allowed you to say as you did, that he is an evil both to the lover and the beloved, and also the greatest possible good?

Socrates: Capital. But will you tell me whether I defined love at the beginning of my speech? for, having been in an ecstasy, I cannot well remember.

Phaedrus: Yes, indeed; that you did, and no mistake.

Socrates: Then I perceive that the Nymphs of Achelous and Pan the son of Hermes, who inspired me, were far better rhetoricians than Lysias the son of Cephalus. Alas! how inferior to them he is! But perhaps I am mistaken; and Lysias at the

commencement of his lover’s speech did insist on our supposing love to be something or other which he fancied him to be, and according to this model he fashioned and framed the remainder of his discourse. Suppose we read his beginning over again:

Phaedrus: If you please; but you will not find what you want.

Socrates: Read, that I may have his exact words.

Phaedrus: ‘You know how matters stand with me, and how, as I conceive, they might be arranged for our common interest; and I maintain I ought not to fail in my suit because I am not your lover, for lovers repent of the kindnesses which they have shown, when their love is over.’

Socrates: Here he appears to have done just the reverse of what he ought; for he has begun at the end, and is swimming on his back through the flood to the place of starting. His address to the fair youth begins where the lover would have ended. Am I not right, sweet Phaedrus?

Phaedrus: Yes, indeed, Socrates; he does begin at the end.

Socrates: Then as to the other topics — are they not thrown down anyhow? Is there any principle in them? Why should the next topic follow next in order, or any other topic? I cannot help fancying in my ignorance that he wrote off boldly just what came into his head, but I dare say that you would recognize a rhetorical necessity in the succession of the several parts of the composition?

Phaedrus: You have too good an opinion of me if you think that I have any such insight into his principles of composition.

Socrates: At any rate, you will allow that every discourse ought to be a living creature, having a body of its own and a head and feet; there should be a middle, beginning, and end, adapted to one another and to the whole?

Phaedrus: Certainly.

Socrates: Can this be said of the discourse of Lysias? See whether you can find any more connexion in his words than in the epitaph which is said by some to have been inscribed on the grave of Midas the Phrygian.

Phaedrus: What is there remarkable in the epitaph?

Socrates: It is as follows: —

‘I am a maiden of bronze and lie on the tomb of Midas; So long as water flows and tall trees grow, So long here on this spot by his sad tomb abiding, I shall declare to passers-by that Midas sleeps below.’

Now in this rhyme whether a line comes first or comes last, as you will perceive, makes no difference.

Phaedrus: You are making fun of that oration of ours.

Socrates: Well, I will say no more about your friend’s speech lest I should give offence to you; although I think that it might furnish many other examples of what a man ought rather to avoid. But I will proceed to the other speech, which, as I think, is also suggestive to students of rhetoric.

Phaedrus: In what way?

Socrates: The two speeches, as you may remember, were unlike; the one argued that the lover and the other that the non-lover ought to be accepted.

Phaedrus: And right manfully.

Socrates: You should rather say ‘madly;’ and madness was the argument of them, for, as I said, ‘love is a madness.’

Phaedrus: Yes.

Socrates: And of madness there were two kinds; one produced by human infirmity, the other was a divine release of the soul from the yoke of custom and convention.

Phaedrus: True.

Socrates: The divine madness was subdivided into four kinds, prophetic, initiatory, poetic, erotic, having four gods presiding over them; the first was the inspiration of Apollo, the second that of Dionysus, the third that of the Muses, the fourth that of Aphrodite and Eros. In the description of the last kind of madness, which was also said to be the best, we spoke of the affection of love in a figure, into which we introduced a tolerably credible and possibly true though partly erring myth, which was also a hymn in honour of Love, who is your lord and also mine, Phaedrus, and the guardian of fair children, and to him we sung the hymn in measured and solemn strain.

Phaedrus: I know that I had great pleasure in listening to you.

Socrates: Let us take this instance and note how the transition was made from blame to praise.

Phaedrus: What do you mean?

Socrates: I mean to say that the composition was mostly playful. Yet in these chance fancies of the hour were involved two principles of which we should be too glad to have a clearer description if art could give us one.

Phaedrus: What are they?

Socrates: First, the comprehension of scattered particulars in one idea; as in our definition of love, which whether true or false certainly gave clearness and consistency to the discourse, the speaker should define his several notions and so make his meaning clear.

Phaedrus: What is the other principle, Socrates?

Socrates: The second principle is that of division into species according to the natural formation, where the joint is, not breaking any part as a bad carver might. Just as our two discourses, alike assumed, first of all, a single form of unreason; and then, as the body which from being one becomes double and may be divided into a left side and right side, each having parts

right and left of the same name — after this manner the speaker proceeded to divide the parts of the left side and did not desist until he found in them an evil or left-handed love which he justly reviled; and the other discourse leading us to the madness which lay on the right side, found another love, also having the same name, but divine, which the speaker held up before us and applauded and affirmed to be the author of the greatest benefits.

Phaedrus: Most true.

Socrates: I am myself a great lover of these processes of division and generalization; they help me to speak and to think. And if I find any man who is able to see ‘a One and Many’ in nature, him I follow, and ‘walk in his footsteps as if he were a god.’ And those who have this art, I have hitherto been in the habit of calling dialecticians; but God knows whether the name is right or not. And I should like to know what name you would give to your or to Lysias’ disciples, and whether this may not be that famous art of rhetoric which Thrasymachus and others teach and practise? Skilful speakers they are, and impart their skill to any who is willing to make kings of them and to bring gifts to them.

Phaedrus: Yes, they are royal men; but their art is not the same with the art of those whom you call, and rightly, in my opinion, dialecticians: — Still we are in the dark about rhetoric.

Socrates: What do you mean? The remains of it, if there be anything remaining which can be brought under rules of art, must be a fine thing; and, at any rate, is not to be despised by you and me. But how much is left?

Phaedrus: There is a great deal surely to be found in books of rhetoric?

Socrates: Yes; thank you for reminding me: — There is the exordium, showing how the speech should begin, if I remember rightly; that is what you mean — the niceties of the art?

Phaedrus: Yes.

Socrates: Then follows the statement of facts, and upon that witnesses; thirdly, proofs; fourthly, probabilities are to come; the great Byzantian word-maker also speaks, if I am not mistaken, of confirmation and further confirmation.

Phaedrus: You mean the excellent Theodorus.

Socrates: Yes; and he tells how refutation or further refutation is to be managed, whether in accusation or defence. I ought also to mention the illustrious Parian, Evenus, who first invented insinuations and indirect praises; and also indirect censures, which according to some he put into verse to help the memory. But shall I 'to dumb forgetfulness consign' Tisias and Gorgias, who are not ignorant that probability is superior to truth, and who by force of argument make the little appear great and the great little, disguise the new in old fashions and the old in new fashions, and have discovered forms for everything, either short or going on to infinity. I remember Prodicus laughing when I told him of this; he said that he had himself discovered the true rule of art, which was to be neither long nor short, but of a convenient length.

Phaedrus: Well done, Prodicus!

Socrates: Then there is Hippias the Elean stranger, who probably agrees with him.

Phaedrus: Yes.

Socrates: And there is also Polus, who has treasuries of diplasiology, and gnomology, and eikonology, and who teaches in them the names of which Licymnius made him a present; they were to give a polish.

Phaedrus: Had not Protagoras something of the same sort?

Socrates: Yes, rules of correct diction and many other fine precepts; for the 'sorrows of a poor old man,' or any other pathetic case, no one is better than the Chalcedonian giant; he

can put a whole company of people into a passion and out of one again by his mighty magic, and is first-rate at inventing or disposing of any sort of calumny on any grounds or none. All of them agree in asserting that a speech should end in a recapitulation, though they do not all agree to use the same word.

Phaedrus: You mean that there should be a summing up of the arguments in order to remind the hearers of them.

Socrates: I have now said all that I have to say of the art of rhetoric: have you anything to add?

Phaedrus: Not much; nothing very important.

Socrates: Leave the unimportant and let us bring the really important question into the light of day, which is: What power has this art of rhetoric, and when?

Phaedrus: A very great power in public meetings.

Socrates: It has. But I should like to know whether you have the same feeling as I have about the rhetoricians? To me there seem to be a great many holes in their web.

Phaedrus: Give an example.

Socrates: I will. Suppose a person to come to your friend Eryximachus, or to his father Acumenus, and to say to him: 'I know how to apply drugs which shall have either a heating or a cooling effect, and I can give a vomit and also a purge, and all that sort of thing; and knowing all this, as I do, I claim to be a physician and to make physicians by imparting this knowledge to others,' — what do you suppose that they would say?

Phaedrus: They would be sure to ask him whether he knew 'to whom' he would give his medicines, and 'when,' and 'how much.'

Socrates: And suppose that he were to reply: 'No; I know nothing of all that; I expect the patient who consults me to be able to do these things for himself'?

Phaedrus: They would say in reply that he is a madman or a pedant who fancies that he is a physician because he has read something in a book, or has stumbled on a prescription or two, although he has no real understanding of the art of medicine.

Socrates: And suppose a person were to come to Sophocles or Euripides and say that he knows how to make a very long speech about a small matter, and a short speech about a great matter, and also a sorrowful speech, or a terrible, or threatening speech, or any other kind of speech, and in teaching this fancies that he is teaching the art of tragedy — ?

Phaedrus: They too would surely laugh at him if he fancies that tragedy is anything but the arranging of these elements in a manner which will be suitable to one another and to the whole.

Socrates: But I do not suppose that they would be rude or abusive to him: Would they not treat him as a musician a man who thinks that he is a harmonist because he knows how to pitch the highest and lowest note; happening to meet such an one he would not say to him savagely, 'Fool, you are mad!' But like a musician, in a gentle and harmonious tone of voice, he would answer: 'My good friend, he who would be a harmonist must certainly know this, and yet he may understand nothing of harmony if he has not got beyond your stage of knowledge, for you only know the preliminaries of harmony and not harmony itself.'

Phaedrus: Very true.

Socrates: And will not Sophocles say to the display of the would-be tragedian, that this is not tragedy but the preliminaries of tragedy? and will not Acumenus say the same of medicine to the would-be physician?

Phaedrus: Quite true.

Socrates: And if Adrastus the mellifluous or Pericles heard of these wonderful arts, brachylogies and eikonologies and all the hard names which we have been endeavouring to draw into the

light of day, what would they say? Instead of losing temper and applying uncomplimentary epithets, as you and I have been doing, to the authors of such an imaginary art, their superior wisdom would rather censure us, as well as them. ‘Have a little patience, Phaedrus and Socrates, they would say; you should not be in such a passion with those who from some want of dialectical skill are unable to define the nature of rhetoric, and consequently suppose that they have found the art in the preliminary conditions of it, and when these have been taught by them to others, fancy that the whole art of rhetoric has been taught by them; but as to using the several instruments of the art effectively, or making the composition a whole, — an application of it such as this is they regard as an easy thing which their disciples may make for themselves.’

Phaedrus: I quite admit, Socrates, that the art of rhetoric which these men teach and of which they write is such as you describe — there I agree with you. But I still want to know where and how the true art of rhetoric and persuasion is to be acquired.

Socrates: The perfection which is required of the finished orator is, or rather must be, like the perfection of anything else; partly given by nature, but may also be assisted by art. If you have the natural power and add to it knowledge and practice, you will be a distinguished speaker; if you fall short in either of these, you will be to that extent defective. But the art, as far as there is an art, of rhetoric does not lie in the direction of Lysias or Thrasymachus.

Phaedrus: In what direction then?

Socrates: I conceive Pericles to have been the most accomplished of rhetoricians.

Phaedrus: What of that?

Socrates: All the great arts require discussion and high speculation about the truths of nature; hence come loftiness of thought and completeness of execution. And this, as I conceive,

was the quality which, in addition to his natural gifts, Pericles acquired from his intercourse with Anaxagoras whom he happened to know. He was thus imbued with the higher philosophy, and attained the knowledge of Mind and the negative of Mind, which were favourite themes of Anaxagoras, and applied what suited his purpose to the art of speaking.

Phaedrus: Explain.

Socrates: Rhetoric is like medicine.

Phaedrus: How so?

Socrates: Why, because medicine has to define the nature of the body and rhetoric of the soul — if we would proceed, not empirically but scientifically, in the one case to impart health and strength by giving medicine and food, in the other to implant the conviction or virtue which you desire, by the right application of words and training.

Phaedrus: There, Socrates, I suspect that you are right.

Socrates: And do you think that you can know the nature of the soul intelligently without knowing the nature of the whole?

Phaedrus: Hippocrates the Asclepiad says that the nature even of the body can only be understood as a whole. (Compare Charmides.)

Socrates: Yes, friend, and he was right: — still, we ought not to be content with the name of Hippocrates, but to examine and see whether his argument agrees with his conception of nature.

Phaedrus: I agree.

Socrates: Then consider what truth as well as Hippocrates says about this or about any other nature. Ought we not to consider first whether that which we wish to learn and to teach is a simple or multiform thing, and if simple, then to enquire what power it has of acting or being acted upon in relation to other things, and if multiform, then to number the forms; and see first in the case of one of them, and then in the case of all of them,

what is that power of acting or being acted upon which makes each and all of them to be what they are?

Phaedrus: You may very likely be right, Socrates.

Socrates: The method which proceeds without analysis is like the groping of a blind man. Yet, surely, he who is an artist ought not to admit of a comparison with the blind, or deaf. The rhetorician, who teaches his pupil to speak scientifically, will particularly set forth the nature of that being to which he addresses his speeches; and this, I conceive, to be the soul.

Phaedrus: Certainly.

Socrates: His whole effort is directed to the soul; for in that he seeks to produce conviction.

Phaedrus: Yes.

Socrates: Then clearly, Thrasymachus or any one else who teaches rhetoric in earnest will give an exact description of the nature of the soul; which will enable us to see whether she be single and same, or, like the body, multiform. That is what we should call showing the nature of the soul.

Phaedrus: Exactly.

Socrates: He will explain, secondly, the mode in which she acts or is acted upon.

Phaedrus: True.

Socrates: Thirdly, having classified men and speeches, and their kinds and affections, and adapted them to one another, he will tell the reasons of his arrangement, and show why one soul is persuaded by a particular form of argument, and another not.

Phaedrus: You have hit upon a very good way.

Socrates: Yes, that is the true and only way in which any subject can be set forth or treated by rules of art, whether in speaking or writing. But the writers of the present day, at whose feet you have sat, craftily conceal the nature of the soul which they know

quite well. Nor, until they adopt our method of reading and writing, can we admit that they write by rules of art?

Phaedrus: What is our method?

Socrates: I cannot give you the exact details; but I should like to tell you generally, as far as is in my power, how a man ought to proceed according to rules of art.

Phaedrus: Let me hear.

Socrates: Oratory is the art of enchanting the soul, and therefore he who would be an orator has to learn the differences of human souls — they are so many and of such a nature, and from them come the differences between man and man. Having proceeded thus far in his analysis, he will next divide speeches into their different classes:— 'Such and such persons,' he will say, are affected by this or that kind of speech in this or that way,' and he will tell you why. The pupil must have a good theoretical notion of them first, and then he must have experience of them in actual life, and be able to follow them with all his senses about him, or he will never get beyond the precepts of his masters. But when he understands what persons are persuaded by what arguments, and sees the person about whom he was speaking in the abstract actually before him, and knows that it is he, and can say to himself, 'This is the man or this is the character who ought to have a certain argument applied to him in order to convince him of a certain opinion;' — he who knows all this, and knows also when he should speak and when he should refrain, and when he should use pithy sayings, pathetic appeals, sensational effects, and all the other modes of speech which he has learned; — when, I say, he knows the times and seasons of all these things, then, and not till then, he is a perfect master of his art; but if he fail in any of these points, whether in speaking or teaching or writing them, and yet declares that he speaks by rules of art, he who says 'I don't believe you' has the better of him. Well, the teacher will say, is this, Phaedrus and Socrates, your account of the so-called art of

rhetoric, or am I to look for another?

Phaedrus: He must take this, Socrates, for there is no possibility of another, and yet the creation of such an art is not easy.

Socrates: Very true; and therefore let us consider this matter in every light, and see whether we cannot find a shorter and easier road; there is no use in taking a long rough roundabout way if there be a shorter and easier one. And I wish that you would try and remember whether you have heard from Lysias or any one else anything which might be of service to us.

Phaedrus: If trying would avail, then I might; but at the moment I can think of nothing.

Socrates: Suppose I tell you something which somebody who knows told me.

Phaedrus: Certainly.

Socrates: May not 'the wolf,' as the proverb says, 'claim a hearing'?

Phaedrus: Do you say what can be said for him.

Socrates: He will argue that there is no use in putting a solemn face on these matters, or in going round and round, until you arrive at first principles; for, as I said at first, when the question is of justice and good, or is a question in which men are concerned who are just and good, either by nature or habit, he who would be a skilful rhetorician has no need of truth — for that in courts of law men literally care nothing about truth, but only about conviction: and this is based on probability, to which he who would be a skilful orator should therefore give his whole attention. And they say also that there are cases in which the actual facts, if they are improbable, ought to be withheld, and only the probabilities should be told either in accusation or defence, and that always in speaking, the orator should keep probability in view, and say good-bye to the truth. And the observance of this principle throughout a speech furnishes the

whole art.

Phaedrus: That is what the professors of rhetoric do actually say, Socrates. I have not forgotten that we have quite briefly touched upon this matter already; with them the point is all-important.

Socrates: I dare say that you are familiar with Tisias. Does he not define probability to be that which the many think?

Phaedrus: Certainly, he does.

Socrates: I believe that he has a clever and ingenious case of this sort: — He supposes a feeble and valiant man to have assaulted a strong and cowardly one, and to have robbed him of his coat or of something or other; he is brought into court, and then Tisias says that both parties should tell lies: the coward should say that he was assaulted by more men than one; the other should prove that they were alone, and should argue thus: 'How could a weak man like me have assaulted a strong man like him?' The complainant will not like to confess his own cowardice, and will therefore invent some other lie which his adversary will thus gain an opportunity of refuting. And there are other devices of the same kind which have a place in the system. Am I not right, Phaedrus?

Phaedrus: Certainly.

Socrates: Bless me, what a wonderfully mysterious art is this which Tisias or some other gentleman, in whatever name or country he rejoices, has discovered. Shall we say a word to him or not?

Phaedrus: What shall we say to him?

Socrates: Let us tell him that, before he appeared, you and I were saying that the probability of which he speaks was engendered in the minds of the many by the likeness of the truth, and we had just been affirming that he who knew the truth would always know best how to discover the resemblances

of the truth. If he has anything else to say about the art of speaking we should like to hear him; but if not, we are satisfied with our own view, that unless a man estimates the various characters of his hearers and is able to divide all things into classes and to comprehend them under single ideas, he will never be a skilful rhetorician even within the limits of human power. And this skill he will not attain without a great deal of trouble, which a good man ought to undergo, not for the sake of speaking and acting before men, but in order that he may be able to say what is acceptable to God and always to act acceptably to Him as far as in him lies; for there is a saying of wiser men than ourselves, that a man of sense should not try to please his fellow-servants (at least this should not be his first object) but his good and noble masters; and therefore if the way is long and circuitous, marvel not at this, for, where the end is great, there we may take the longer road, but not for lesser ends such as yours. Truly, the argument may say, Tisias, that if you do not mind going so far, rhetoric has a fair beginning here.

Phaedrus: I think, Socrates, that this is admirable, if only practicable.

Socrates: But even to fail in an honourable object is honourable.

Phaedrus: True.

Socrates: Enough appears to have been said by us of a true and false art of speaking.

Phaedrus: Certainly.

Socrates: But there is something yet to be said of propriety and impropriety of writing.

Phaedrus: Yes.

Socrates: Do you know how you can speak or act about rhetoric in a manner which will be acceptable to God?

Phaedrus: No, indeed. Do you?

Socrates: I have heard a tradition of the ancients, whether true or not they only know; although if we had found the truth ourselves, do you think that we should care much about the opinions of men?

Phaedrus: Your question needs no answer; but I wish that you would tell me what you say that you have heard.

Socrates: At the Egyptian city of Naucratis, there was a famous old god, whose name was Theuth; the bird which is called the Ibis is sacred to him, and he was the inventor of many arts, such as arithmetic and calculation and geometry and astronomy and draughts and dice, but his great discovery was the use of letters. Now in those days the god Thamus was the king of the whole country of Egypt; and he dwelt in that great city of Upper Egypt which the Hellenes call Egyptian Thebes, and the god himself is called by them Ammon. To him came Theuth and showed his inventions, desiring that the other Egyptians might be allowed to have the benefit of them; he enumerated them, and Thamus enquired about their several uses, and praised some of them and censured others, as he approved or disapproved of them. It would take a long time to repeat all that Thamus said to Theuth in praise or blame of the various arts. But when they came to letters, This, said Theuth, will make the Egyptians wiser and give them better memories; it is a specific both for the memory and for the wit. Thamus replied: O most ingenious Theuth, the parent or inventor of an art is not always the best judge of the utility or inutility of his own inventions to the users of them. And in this instance, you who are the father of letters, from a paternal love of your own children have been led to attribute to them a quality which they cannot have; for this discovery of yours will create forgetfulness in the learners’ souls, because they will not use their memories; they will trust to the external written characters and not remember of themselves. The specific which you have discovered is an aid not to memory, but to reminiscence, and you give your disciples not truth, but only

the semblance of truth; they will be hearers of many things and will have learned nothing; they will appear to be omniscient and will generally know nothing; they will be tiresome company, having the show of wisdom without the reality.

Phaedrus: Yes, Socrates, you can easily invent tales of Egypt, or of any other country.

Socrates: There was a tradition in the temple of Dodona that oaks first gave prophetic utterances. The men of old, unlike in their simplicity to young philosophy, deemed that if they heard the truth even from ‘oak or rock,’ it was enough for them; whereas you seem to consider not whether a thing is or is not true, but who the speaker is and from what country the tale comes.

Phaedrus: I acknowledge the justice of your rebuke; and I think that the Theban is right in his view about letters.

Socrates: He would be a very simple person, and quite a stranger to the oracles of Thamus or Ammon, who should leave in writing or receive in writing any art under the idea that the written word would be intelligible or certain; or who deemed that writing was at all better than knowledge and recollection of the same matters?

Phaedrus: That is most true.

Socrates: I cannot help feeling, Phaedrus, that writing is unfortunately like painting; for the creations of the painter have the attitude of life, and yet if you ask them a question they preserve a solemn silence. And the same may be said of speeches. You would imagine that they had intelligence, but if you want to know anything and put a question to one of them, the speaker always gives one unvarying answer. And when they have been once written down they are tumbled about anywhere among those who may or may not understand them, and know not to whom they should reply, to whom not: and, if they are maltreated or abused, they have no parent to protect them; and

they cannot protect or defend themselves.

Phaedrus: That again is most true.

Socrates: Is there not another kind of word or speech far better than this, and having far greater power — a son of the same family, but lawfully begotten?

Phaedrus: Whom do you mean, and what is his origin?

Socrates: I mean an intelligent word graven in the soul of the learner, which can defend itself, and knows when to speak and when to be silent.

Phaedrus: You mean the living word of knowledge which has a soul, and of which the written word is properly no more than an image?

Socrates: Yes, of course that is what I mean. And now may I be allowed to ask you a question: Would a husbandman, who is a man of sense, take the seeds, which he values and which he wishes to bear fruit, and in sober seriousness plant them during the heat of summer, in some garden of Adonis, that he may rejoice when he sees them in eight days appearing in beauty? at least he would do so, if at all, only for the sake of amusement and pastime. But when he is in earnest he sows in fitting soil, and practises husbandry, and is satisfied if in eight months the seeds which he has sown arrive at perfection?

Phaedrus: Yes, Socrates, that will be his way when he is in earnest; he will do the other, as you say, only in play.

Socrates: And can we suppose that he who knows the just and good and honourable has less understanding, than the husbandman, about his own seeds?

Phaedrus: Certainly not.

Socrates: Then he will not seriously incline to ‘write’ his thoughts ‘in water’ with pen and ink, sowing words which can neither speak for themselves nor teach the truth adequately to others?

Phaedrus: No, that is not likely.

Socrates: No, that is not likely — in the garden of letters he will sow and plant, but only for the sake of recreation and amusement; he will write them down as memorials to be treasured against the forgetfulness of old age, by himself, or by any other old man who is treading the same path. He will rejoice in beholding their tender growth; and while others are refreshing their souls with banqueting and the like, this will be the pastime in which his days are spent.

Phaedrus: A pastime, Socrates, as noble as the other is ignoble, the pastime of a man who can be amused by serious talk, and can discourse merrily about justice and the like.

Socrates: True, Phaedrus. But nobler far is the serious pursuit of the dialectician, who, finding a congenial soul, by the help of science sows and plants therein words which are able to help themselves and him who planted them, and are not unfruitful, but have in them a seed which others brought up in different soils render immortal, making the possessors of it happy to the utmost extent of human happiness.

Phaedrus: Far nobler, certainly.

Socrates: And now, Phaedrus, having agreed upon the premises we may decide about the conclusion.

Phaedrus: About what conclusion?

Socrates: About Lysias, whom we censured, and his art of writing, and his discourses, and the rhetorical skill or want of skill which was shown in them — these are the questions which we sought to determine, and they brought us to this point. And I think that we are now pretty well informed about the nature of art and its opposite.

Phaedrus: Yes, I think with you; but I wish that you would repeat what was said.

Socrates: Until a man knows the truth of the several particulars of which he is writing or speaking, and is able to define them as they are, and having defined them again to divide them until they can be no longer divided, and until in like manner he is able to discern the nature of the soul, and discover the different modes of discourse which are adapted to different natures, and to arrange and dispose them in such a way that the simple form of speech may be addressed to the simpler nature, and the complex and composite to the more complex nature — until he has accomplished all this, he will be unable to handle arguments according to rules of art, as far as their nature allows them to be subjected to art, either for the purpose of teaching or persuading; — such is the view which is implied in the whole preceding argument.

Phaedrus: Yes, that was our view, certainly.

Socrates: Secondly, as to the censure which was passed on the speaking or writing of discourses, and how they might be rightly or wrongly censured — did not our previous argument show — ?

Phaedrus: Show what?

Socrates: That whether Lysias or any other writer that ever was or will be, whether private man or statesman, proposes laws and so becomes the author of a political treatise, fancying that there is any great certainty and clearness in his performance, the fact of his so writing is only a disgrace to him, whatever men may say. For not to know the nature of justice and injustice, and good and evil, and not to be able to distinguish the dream from the reality, cannot in truth be otherwise than disgraceful to him, even though he have the applause of the whole world.

Phaedrus: Certainly.

Socrates: But he who thinks that in the written word there is necessarily much which is not serious, and that neither poetry nor prose, spoken or written, is of any great value, if, like the compositions of the rhapsodes, they are only recited in order to

be believed, and not with any view to criticism or instruction; and who thinks that even the best of writings are but a reminiscence of what we know, and that only in principles of justice and goodness and nobility taught and communicated orally for the sake of instruction and graven in the soul, which is the true way of writing, is there clearness and perfection and seriousness, and that such principles are a man's own and his legitimate offspring; — being, in the first place, the word which he finds in his own bosom; secondly, the brethren and descendants and relations of his idea which have been duly implanted by him in the souls of others; — and who cares for them and no others — this is the right sort of man; and you and I, Phaedrus, would pray that we may become like him.

Phaedrus: That is most assuredly my desire and prayer.

Socrates: And now the play is played out; and of rhetoric enough. Go and tell Lysias that to the fountain and school of the Nymphs we went down, and were bidden by them to convey a message to him and to other composers of speeches — to Homer and other writers of poems, whether set to music or not; and to Solon and others who have composed writings in the form of political discourses which they would term laws — to all of them we are to say that if their compositions are based on knowledge of the truth, and they can defend or prove them, when they are put to the test, by spoken arguments, which leave their writings poor in comparison of them, then they are to be called, not only poets, orators, legislators, but are worthy of a higher name, befitting the serious pursuit of their life.

Phaedrus: What name would you assign to them?

Socrates: Wise, I may not call them; for that is a great name which belongs to God alone, — lovers of wisdom or philosophers is their modest and befitting title.

Phaedrus: Very suitable.

Socrates: And he who cannot rise above his own compilations and compositions, which he has been long patching and piecing, adding some and taking away some, may be justly called poet or speech-maker or law-maker.

Phaedrus: Certainly.

Socrates: Now go and tell this to your companion.

Phaedrus: But there is also a friend of yours who ought not to be forgotten.

Socrates: Who is he?

Phaedrus: Isocrates the fair: — What message will you send to him, and how shall we describe him?

Socrates: Isocrates is still young, Phaedrus; but I am willing to hazard a prophecy concerning him.

Phaedrus: What would you prophesy?

Socrates: I think that he has a genius which soars above the orations of Lysias, and that his character is cast in a finer mould. My impression of him is that he will marvellously improve as he grows older, and that all former rhetoricians will be as children in comparison of him. And I believe that he will not be satisfied with rhetoric, but that there is in him a divine inspiration which will lead him to things higher still. For he has an element of philosophy in his nature. This is the message of the gods dwelling in this place, and which I will myself deliver to Isocrates, who is my delight; and do you give the other to Lysias, who is yours.

Phaedrus: I will; and now as the heat is abated let us depart.

Socrates: Should we not offer up a prayer first of all to the local deities?

Phaedrus: By all means.

Socrates: Beloved Pan, and all ye other gods who haunt this place, give me beauty in the inward soul; and may the outward

and inward man be at one. May I reckon the wise to be the wealthy, and may I have such a quantity of gold as a temperate man and he only can bear and carry. — Anything more? The prayer, I think, is enough for me.

Phaedrus: Ask the same for me, for friends should have all things in common.

Socrates: Let us go.

Hippias Major

ΙΠΠΙΑΣ ΜΕΓΑΣ

Socrates: Hippias, beautiful and wise, what a long time it is since you have put in at the port of Athens!

Hippias: I am too busy, Socrates. For whenever Elis needs to have any business transacted with any of the states, she always comes to me first of her citizens and chooses me as envoy, thinking that I am the ablest judge and messenger of the words that are spoken by the several states. So I have often gone as envoy to other states, but most often and concerning the most numerous and important matters to Lacedaemon. For that reason, then, since you ask me, I do not often come to this neighborhood.

Socrates: That’s what it is, Hippias, to be a truly wise and perfect man! For you are both in your private capacity able to earn much money from the young and to confer upon them still greater benefits than you receive, and in public affairs you are able to benefit your own state, as a man must who is to be not despised but held in high repute among the many. And yet, Hippias, what in the world is the reason why those men of old whose names are called great in respect to wisdom — Pittacus, and Bias, and the Milesian Thales with his followers and also the later ones, down to Anaxagoras, are all, or most of them, found to refrain from affairs of state?

Hippias: What else do you suppose, Socrates, than that they were not able to compass by their wisdom both public and private matters?

Socrates: Then for Heaven's sake, just as the other arts have progressed, and the ancients are of no account in comparison with the artisans of today, shall we say that your art also has progressed and those of the ancients who were concerned with wisdom are of no account in comparison with you?

Hippias: Yes, you are quite right.

Socrates: Then, Hippias, if Bias were to come to life again now, he would be a laughing-stock in comparison with you, just as the sculptors say that Daedalus, if he were to be born now and were to create such works as those from which he got his reputation, would be ridiculous.

Hippias: That, Socrates, is exactly as you say. I, however, am in the habit of praising the ancients and our predecessors rather than the men of the present day, and more greatly, as a precaution against the envy of the living and through fear of the wrath of those who are dead.

Socrates: Yours, Hippias, is a most excellent way, at any rate, of speaking about them and of thinking, it seems to me and I can bear you witness that you speak the truth, and that your art really has progressed in the direction of ability to carry on public together with private affairs. For this man Gorgias, the sophist from Leontini, came here from home in the public capacity of envoy, as being best able of all the citizens of Leontini to attend to the interests of the community, and it was the general opinion that he spoke excellently in the public assembly, and in his private capacity, by giving exhibitions and associating with the young, he earned and received a great deal of money from this city; or, if you like, our friend here, Prodicus, often went to other places in a public capacity, and the last time, just lately, when he came here in a public capacity from Ceos, he gained great reputation by his speaking before the Council, and in his private capacity, by giving exhibitions and associating with the young, he received a marvellous sum of money; but none of those ancients ever thought fit to exact the money as

payment for his wisdom or to give exhibitions among people of various places; so simple-minded were they, and so unconscious of the fact that money is of the greatest value. But either of these two has earned more money from his wisdom than any artisan from his art. And even before these Protagoras did so.

Hippias: Why, Socrates, you know nothing of the beauties of this. For if you were to know how much money I have made, you would be amazed. I won't mention the rest, but once, when I went to Sicily, although Protagoras was staying there and had a great reputation and was the older, I, who was much younger, made in a very short time more than one hundred and fifty minas, and in one very small place, Inycus, more than twenty minas; and when I came home, I took this and gave it to my father, so that he and the other citizens were overwhelmed with amazement. And I pretty well think I have made more money than any other two sophists together.

Socrates: That's a fine thing you say, Hippias, and strong testimony to your wisdom and that of the men of today and to their great superiority to the ancients. For the earlier sophists of the school of Anaxagoras must have been very ignorant to judge from what is said, according to your view; for they say that what happened to Anaxagoras was the opposite of what happens to you; for though much money was left him, he neglected it and lost it all so senseless was his wisdom. And they tell similar tales about others among the ancients. So this seems to me fine testimony that you adduce for the wisdom of the men of today as compared with the earlier men, and many people agree with me that the wise man must be wise for himself especially; and the test of this is, who makes the most money. Well, so much for that. But tell me this: at which of the cities that you go to did you make the most money? Or are we to take it that it was at Lacedaemon, where your visits have been most frequent?

Hippias: No, by Zeus, it was not, Socrates.

Socrates: What's that you say? But did you make least there?

Hippias: Why, I never made anything at all.

Socrates: That is a prodigious marvel that you tell, Hippias; and say now: is not your wisdom such as to make those who are in contact with it and learn it, better men in respect to virtue?

Hippias: Yes, much better, Socrates.

Socrates: But you were able to make the sons of the Inycenes better, and had no power to improve the sons of the Spartans?

Hippias: That is far from true.

Socrates: Well, then, the Siceliotes desire to become better, and the Lacedaemonians do not?

Hippias: No certainly, Socrates, the Lacedaemonians also desire it.

Socrates: Then it was for lack of money that they avoided intercourse with you?

Hippias: Not at all, since they have plenty of money.

Socrates: What, then, could be the reason, that when they desired it and had money, and you had power to confer upon them the greatest benefits, they did not send you away loaded with money? But I see; perhaps the Lacedaemonians might educate their own children better than you? Shall we state it so, and do you agree?

Hippias: Not in the least.

Socrates: Then were you not able to persuade the young men at Lacedaemon that they would make more progress towards virtue by associating with you than with their own people, or were you powerless to persuade their fathers that they ought rather to hand them over to you than to care for them themselves, if they are at all concerned for their sons? For surely they did not begrudge it to their children to become as good as possible.

Hippias: I do not think they begrudged it.

Socrates: But certainly Lacedaemon is well governed.

Hippias: Of course it is.

Socrates: And in well-governed states virtue is most highly honored.

Hippias: Certainly.

Socrates: And you know best of all men how to transmit that to another.

Hippias: Much best, Socrates.

Socrates: Well, he who knows best how to transmit horsemanship would be most honored in Thessaly of all parts of Greece and would receive most money — and anywhere else where horsemanship is a serious interest, would he not?

Hippias: Very likely.

Socrates: Then will not he who is able to transmit the doctrines that are of most value for the acquisition of virtue be most highly honored in Lacedaemon and make most money, if he so wishes, and in any other of the Greek states that is well governed? But do you, my friend, think he will fare better in Sicily and at Inycus? Are we to believe that, Hippias? For if you tell us to do so, we must believe it.

Hippias: Yes, for it is not the inherited usage of the Lacedaemonians to change their laws or to educate their children differently from what is customary.

Socrates: What? For the Lacedaemonians is it the hereditary usage not to act rightly, but to commit errors?

Hippias: I wouldn’t say so, Socrates.

Socrates: Would they, then, not act rightly in educating the young men better, but not in educating them worse?

Hippias: Yes, they would; but it is not lawful for them to give them a foreign education; for you may be sure that if anybody

had ever received money there in payment for education, I should have received by far the most; they certainly enjoy hearing me and they applaud me; but, as I say, it is not the law.

Socrates: But, Hippias, do you say that law is an injury to the state, or a benefit?

Hippias: It is made, I think, with benefit in view, but sometimes, if the law is badly made, it is injurious.

Socrates: Well, then, is it not true that those who make the law make it as the greatest good to the state, and that without this it is impossible to enjoy good government?

Hippias: What you say is true.

Socrates: Then, when those who make the laws miss the good, they have missed the lawful and the law; or what do you say?

Hippias: Speaking accurately, Socrates, that is true; however, men are not accustomed to think so.

Socrates: The men who know, Hippias, or those who do not know?

Hippias: The many.

Socrates: Are these, the many, those who know the truth?

Hippias: Certainly not.

Socrates: But surely those who know, think that in truth for all men that which is more beneficial is more lawful than that which is less beneficial; or do you not agree?

Hippias: Yes, I agree that they think it is so in truth.

Socrates: Well, it actually is as those who know think it is, is it not?

Hippias: Certainly.

Socrates: But or the Lacedaemonians, as you say, it is more beneficial to be educated in your education, which is foreign, than in the local education.

Hippias: Yes, and what I say is true.

Socrates: And do you say this also, Hippias, that beneficial things are more lawful?

Hippias: Yes, I said so.

Socrates: Then, according to what you say, it is more lawful for the sons of the Lacedaemonians to be educated by Hippias and less lawful for them to be educated by their fathers, if in reality they will be more benefited by you.

Hippias: But certainly they will be benefited, Socrates.

Socrates: Then the Lacedaemonians in not giving you money and entrusting their sons to you, act contrary to law.

Hippias: I agree to that; for you seem to be making your argument in my favour, and there is no need of my opposing it.

Socrates: Then my friends, we find that the Lacedaemonians are law-breakers, and that too in the most important affairs — they who are regarded as the most law-abiding of men. But then, for Heaven's sake, Hippias, what sort of discourses are those for which they applaud you and which they enjoy hearing? Or are they evidently those which you understand most admirably, those about the stars and the phenomena of the heavens?

Hippias: Not in the least; they won't even endure those.

Socrates: But they enjoy hearing about geometry?

Hippias: Not at all, since one might say that many of them do not even know how to count.

Socrates: Then they are far from enduring a lecture by you on the processes of thought.

Hippias: Far from it indeed, by Zeus.

Socrates: Well, then, those matters which you of all men know best how to discuss, concerning the value of letters and syllables and rhythms and harmonies?

Hippias: Harmonies indeed, my good fellow, and letters!

Socrates: But then what are the things about which they like to listen to you and which they applaud? Tell me yourself, for I cannot discover them.

Hippias: They are very fond of hearing about the genealogies of heroes and men, Socrates, and the foundations of cities in ancient times and, in short, about antiquity in general, so that for their sake I have been obliged to learn all that sort of thing by heartand practise it thoroughly.

Socrates: By Zeus, Hippias, it is lucky for you that the Lacedaemonians do not enjoy hearing one recite the list of our archons from Solon's time; if they did, you would have trouble in learning it by heart.

Hippias: How so, Socrates? After hearing them once, I can remember fifty names.

Socrates: True, but I did not understand that you possess the science of memory; and so I understand that the Lacedaemonians naturally enjoy you as one who knows many things, and they make use of you as children make use of old women, to tell stories agreeably.

Hippias: And by Zeus, Socrates, I have just lately gained reputation there by telling about noble or beautiful pursuits, recounting what those of a young man should be. For I have a very beautiful discourse composed about them, well arranged in its words and also in other respects. And the plan of the discourse, and its beginning, is something like this: After the fall of Troy, the story goes that Neoptolemus asked Nestor what the noble and beautiful pursuits were, by following which a young man would become most famous; so after that we have Nestor speaking and suggesting to him very many lawful and most beautiful pursuits. That discourse, then, I delivered there and intend to deliver here the day after tomorrow in Pheidostratus's schoolroom, with many other things worth hearing; for Eudicus,

the son of Apemantus, asked me to do so. Now be sure to be there yourself and to bring others who are able to judge of discourses that they hear.

Socrates: Well, that shall be done, God willing, Hippias. Now, however, give me a brief answer to a question about your discourse, for you reminded me of the beautiful just at the right moment. For recently, my most excellent friend, as I was finding fault with some things in certain speeches as ugly and praising other things as beautiful, a man threw me into confusion by questioning me very insolently somewhat after this fashion: “How, if you please, do you know, Socrates,” said he, “what sort of things are beautiful and ugly? For, come now, could you tell me what the beautiful is?” And I, being of no account, was at a loss and could not answer him properly; and so, as I was going away from the company, I was angry with myself and reproached myself, and threatened that the first time I met one of you wise men, I would hear and learn and practise and then go back to the man who questioned me to renew the wordy strife. So now, as I say, you have come at the right moment; just teach me satisfactorily what the absolute beautiful is, and try in replying to speak as accurately as possible, that I may not be confuted a second time and be made ridiculous again. For you doubtless know clearly, and this would doubtless be but a small example of your wide learning.

Hippias: Yes, surely, by Zeus, a small one, Socrates, and, I may say, of no value.

Socrates: Then I shall learn it easily, and nobody will confute me any more.

Hippias: Nobody, surely; for in that case my profession would be worthless and ordinary.

Socrates: That is good, by Hera, Hippias, if we are to worst the fellow. But may I without hindering you imitate him, and when you answer, take exception to what you say, in order that you

may give me as much practice as possible? For I am more or less experienced in taking exceptions. So, if it is all the same to you, I wish to take exceptions, that I may learn more vigorously.

Hippias: Oh yes, take exceptions. For, as I said just now, the question is no great matter, but I could teach you to answer much harder ones than this, so that nobody in the world could confute you.

Socrates: Oh how good that is! But come, since you tell me to do so, now let me try to play that man's part, so far as possible, and ask you questions. For if you were to deliver for him this discourse that you mention, the one about beautiful pursuits, when he had heard it, after you had stopped speaking, the very first thing he would ask about would be the beautiful; for he has that sort of habit, and he would say, "Stranger from Elis, is it not by justice that the just are just?" So answer, Hippias, as though he were asking the question.

Hippias: I shall answer that it is by justice.

Socrates: "Then this — I mean justice — is something?"

Hippias: Certainly.

Socrates: "Then, too, by wisdom the wise are wise and by the good all things are good, are they not?"

Hippias: Of course.

Socrates: "And justice, wisdom, and so forth are something; for the just, wise, and so forth would not be such by them, if they were not something."

Hippias: To be sure, they are something.

Socrates: "Then are not all beautiful things beautiful by the beautiful?"

Hippias: Yes, by the beautiful.

Socrates: "By the beautiful, which is something?"

Hippias: Yes, for what alternative is there?

Socrates: “Tell me, then, stranger,” he will say, “what is this, the beautiful?”

Hippias: Well, Socrates, does he who asks this question want to find out anything else than what is beautiful?

Socrates: I do not think that is what he wants to find out, but what the beautiful is.

Hippias: And what difference is there between the two?

Socrates: Do you think there is none?

Hippias: Yes, for there is no difference.

Socrates: Well, surely it is plain that you know best; but still, my good friend, consider; for he asked you, not what is beautiful, but what the beautiful is.

Hippias: I understand, my good friend, and I will answer and tell him what the beautiful is, and I shall never be confuted. For be assured, Socrates, if I must speak the truth, a beautiful maiden is beautiful.

Socrates: Beautifully answered, Hippias, by the dog, and notably! Then if I give this answer, I shall have answered the question that was asked, and shall have answered it correctly, and shall never be confuted?

Hippias: Yes, for how could you, Socrates, be confuted, when you say what everybody thinks, and when all who hear it will bear witness that what you say is correct?

Socrates: Very well; certainly. Come, then, Hippias, let me rehearse to myself what you say. The man will question me in some such fashion as this: “Come Socrates, answer me. All these things which you say are beautiful, if the absolute beautiful is anything, would be beautiful?” And I shall say that if a beautiful maiden is beautiful, there is something by reason of which these things would be beautiful.

Hippias: Do you think, then, that he will still attempt to refute you and to show that what you say is not beautiful, or, if he does attempt it, that he will not be ridiculous?

Socrates: That he will attempt it, my admirable friend, I am sure but whether the attempt will make him ridiculous, the event will show. However, I should like to tell you what he will ask.

Hippias: Do so.

Socrates: “How charming you are, Socrates!” he will say. “But is not a beautiful mare beautiful, which even the god praised in his oracle?” What shall we say, Hippias? Shall we not say that the mare is beautiful, I mean the beautiful mare? For how could we dare to deny that the beautiful thing is beautiful?

Hippias: Quite true, Socrates for what the god said is quite correct, too; for very beautiful mares are bred in our country.

Socrates: “Very well,” he will say, “and how about a beautiful lyre? Is it not beautiful?” Shall we agree, Hippias?

Hippias: Yes.

Socrates: After this, then, the man will ask, I am sure, judging by his character: “You most excellent man, how about a beautiful pot? Is it, then, not beautiful?”

Hippias: Socrates, who is the fellow? What an uncultivated person, who has the face to mention such worthless things in a dignified discussion!

Socrates: That’s the kind of person he is, Hippias, not elegant, but vulgar, thinking of nothing but the truth. But nevertheless the man must be answered, and I will declare my opinion beforehand: if the pot were made by a good potter, were smooth and round and well fired, as are some of the two-handled pots, those that hold six choes, very beautiful ones — if that were the kind of pot he asked about, we must agree that it is beautiful; for how could we say that being beautiful it is not beautiful?

Hippias: We could not at all, Socrates.

Socrates: “Then,” he will say, “a beautiful pot also is beautiful, is it not?” Answer.

Hippias: Well, Socrates, it is like this, I think. This utensil, when well wrought, is beautiful, but absolutely considered it does not deserve to be regarded as beautiful in comparison with a mare and a maiden and all the beautiful things.

Socrates: Very well I understand, Hippias, that the proper reply to him who asks these questions is this: “Sir, you are not aware that the saying of Heracleitus is good, that ‘the most beautiful of monkeys is ugly compared with the race of man,’ and the most beautiful of pots is ugly compared with the race of maidens, as Hippias the wise man says.” Is it not so, Hippias?

Hippias: Certainly, Socrates; you replied rightly.

Socrates: Listen then. For I am sure that after this he will say: “Yes, but, Socrates, if we compare maidens with gods, will not the same thing happen to them that happened to pots when compared with maidens? Will not the most beautiful maiden appear ugly? Or does not Heracleitus, whom you cite, mean just this, that the wisest of men, if compared with a god, will appear a monkey, both in wisdom and in beauty and in everything else?” Shall we agree, Hippias, that the most beautiful maiden is ugly if compared with the gods?

Hippias: Yes, for who would deny that, Socrates?

Socrates: If, then, we agree to that, he will laugh and say: “Socrates, do you remember the question you were asked?” “I do,” I shall say, “the question was what the absolute beautiful is.” “Then,” he will say, “when you were asked for the beautiful, do you give as your reply what is, as you yourself say, no more beautiful than ugly?” “So it seems,” I shall say; or what do you, my friend, advise me to say?

Hippias: That is what I advise; for, of course, in saying that the human race is not beautiful in comparison with gods, you will be speaking the truth.

Socrates: “But if I had asked you,” he will say, “in the beginning what is beautiful and ugly, if you had replied as you now do, would you not have replied correctly? But do you still think that the absolute beautiful, by the addition of which all other things are adorned and made to appear beautiful, when its form is added to any of them — do you think that is a maiden or a mare or a lyre?”

Hippias: Well, certainly, Socrates, if that is what he is looking for, nothing is easier than to answer and tell him what the beautiful is, by which all other things are adorned and by the addition of which they are made to appear beautiful. So the fellow is very simple-minded and knows nothing about beautiful possessions. For if you reply to him: “This that you ask about, the beautiful, is nothing else but gold,” he will be thrown into confusion and will not attempt to confute you. For we all know, I fancy, that wherever this is added, even what before appears ugly will appear beautiful when adorned with gold.

Socrates: You don’t know the man, Hippias, what a wretch he is, and how certain not to accept anything easily.

Hippias: What of that, then, Socrates? For he must perforce accept what is correct, or if he does not accept it, be ridiculous.

Socrates: This reply, my most excellent friend, he not only will certainly not accept, but he will even jeer at me grossly and will say: “You lunatic, do you think Pheidias is a bad craftsman?” And I shall say, “Not in the least.”

Hippias: And you will be right, Socrates.

Socrates: Yes, to be sure. Consequently when I agree that Pheidias is a good craftsman, “Well, then,” he will say, “do you imagine that Pheidias did not know this beautiful that you speak of?” “Why do you ask that?” I shall say. “Because,” he will say, “he did not make the eyes of his Athena of gold, nor the rest of her face, nor her hands and feet, if, that is, they were sure to appear most beautiful provided only they were made of gold, but

he made them of ivory; evidently he made this mistake through ignorance, not knowing that it is gold which makes everything beautiful to which it is added." When he says that, what reply shall we make to him, Hippias?

Hippias: That is easy; for we shall say that Pheidias did right; for ivory, I think, is beautiful.

Socrates: "Why, then," he will say, "did he not make the middle parts of the eyes also of ivory, but of stone, procuring stone as similar as possible to the ivory? Or is beautiful stone also beautiful?" Shall we say that it is, Hippias?

Hippias: Surely we shall say so, that is, where it is appropriate.

Socrates: "But ugly when not appropriate?" Shall I agree, or not?

Hippias: Agree, that is, when it is not appropriate.

Socrates: "What then? Do not gold and ivory," he will say, "when they are appropriate, make things beautiful, and when they are not appropriate, ugly?" Shall we deny that, or agree that what he says is correct?

Hippias: We shall agree to this, at any rate, that whatever is appropriate to any particular thing makes that thing beautiful.

Socrates: "Well, then," he will say, "when some one has boiled the pot of which we were speaking just now, the beautiful one, full of beautiful soup, is a golden ladle appropriate to it, or one made of fig wood?"

Hippias: Heracles! What a fellow this is that you speak of! Won't you tell me who he is?

Socrates: You would not know him if I should tell you his name.

Hippias: But even now I know that he is an ignoramus.

Socrates: He is a great nuisance, Hippias, but yet, what shall we say? Which of the two ladles shall we say is appropriate to the soup and the pot? Is it not evidently the one of fig wood? For it

is likely to make the soup smell better, and besides, my friend, it would not break the pot, thereby spilling the soup, putting out the fire, and making those who are to be entertained go without their splendid soup; whereas the golden ladle would do all those things, so that it seems to me that we must say that the wooden ladle is more appropriate than the golden one, unless you disagree.

Hippias: No, for it is more appropriate, Socrates; however, I, for my part, would not talk with the fellow when he asks such questions.

Socrates: Quite right, my friend; for it would not be appropriate for you to be filled up with such words, you who are so beautifully clad, so beautifully shod, and so famous for your wisdom among all the Greeks; but for me it doesn't matter if I do associate with the fellow; so instruct me and for my sake answer him. "For if the wooden one is more appropriate than the golden one," the fellow will say, "would it not be more beautiful, since you agreed, Socrates, that the appropriate is more beautiful than that which is not appropriate?" Shall we not agree, Hippias, that the wooden one is more beautiful than the golden?

Hippias: Do you wish me to tell you, Socrates, what definition of the beautiful will enable you to free yourself from long discussion?

Socrates: Certainly; but not until after you have told me which of the two ladles I just spoke of I shall reply is appropriate and more beautiful.

Hippias: Well, if you like, reply to him that it is the one made of fig wood.

Socrates: Now, then, say what you were just now going to say. For by this reply, if I say that the beautiful is gold, it seems to me that gold will be shown to be no more beautiful than fig wood; but what do you now, once more, say that the beautiful is?

Hippias: I will tell you; for you seem to me to be seeking to reply that the beautiful is something of such sort that it will never appear ugly anywhere to anybody.

Socrates: Certainly, Hippias; now you understand beautifully.

Hippias: Listen, then; for, mind you, if anyone has anything to say against this, you may say I know nothing at all.

Socrates: Then for Heaven's sake, speak as quickly as you can.

Hippias: I say, then, that for every man and everywhere it is most beautiful to be rich and healthy, and honored by the Greeks, to reach old age, and, after providing a beautiful funeral for his deceased parents, to be beautifully and splendidly buried by his own offspring.

Socrates: Bravo, bravo, Hippias! You have spoken in a way that is wonderful and great and worthy of you; and now, by Hera, I thank you, because you are kindly coming to my assistance to the best of your ability. But our shots are not hitting the man; no, he will laugh at us now more than ever, be sure of that.

Hippias: A wretched laugh, Socrates; for when he has nothing to say to this, but laughs, he will be laughing at himself and will himself be laughed at by those present.

Socrates: Perhaps that is so perhaps, however, after this reply, he will, I foresee, be likely to do more than laugh at me.

Hippias: Why do you say that, pray?

Socrates: Because, if he happens to have a stick, unless I get away in a hurry, he will try to fetch me a good one.

Hippias: What? Is the fellow some sort of master of yours, and if he does that, will he not be arrested and have to pay for it? Or does your city disregard justice and allow the citizens to beat one another unjustly?

Socrates: Oh no that is not allowed at all.

Hippias: Then he will have to pay a penalty for beating you unjustly.

Socrates: I do not think so, Hippias. No, if I were to make that reply, the beating would be just, I think.

Hippias: Then I think so, too, Socrates, since that is your own belief.

Socrates: Shall I, then, not tell you why it is my own belief that the beating would be just, if I made that reply? Or will you also beat me without trial? Or will you listen to what I have to say?

Hippias: It would be shocking if I would not listen; but what have you to say?

Socrates: I will tell you, imitating him in the same way as a while ago, that I may not use to you such harsh and uncouth words as he uses to me. For you may be sure, “Tell me, Socrates,” he will say, “do you think it would be unjust if you got a beating for singing such a long dithyramb so unmusically and so far from the question?” “How so?” I shall say. “How so?” he will say; “are you not able to remember that I asked for the absolute beautiful, by which everything to which it is added has the property of being beautiful, both stone and stick and man and god and every act and every acquisition of knowledge? For what I am asking is this, man: what is absolute beauty? and I cannot make you hear what I say any more than if you were a stone sitting beside me, and a millstone at that, having neither ears nor brain.” Would you, then, not be angry, Hippias, if I should be frightened and should reply in this way? “Well, but Hippias said that this was the beautiful; and yet I asked him, just as you asked me, what is beautiful to all and always.” What do you say? Will you not be angry if I say that?

Hippias: I know very well, Socrates, that this which I said was beautiful is beautiful to all and will seem so.

Socrates: And will it be so, too he will say for the beautiful is always beautiful, is it not?

Hippias: Certainly.

Socrates: “Then was it so, too?” he will say.

Hippias: It was so, too.

Socrates: “And,” he will say, “did the stranger from Elis say also that for Achilles it was beautiful to be buried later than his parents, and for his grandfather Aeacus, and all the others who were born of gods, and for the gods themselves?”

Hippias: What’s that? Confound it! These questions of the fellow’s are not even respectful to religion.

Socrates: Well, then, when another asks the question, perhaps it is not quite disrespectful to religion to say that these things are so?

Hippias: Perhaps.

Socrates: “Perhaps, then, you are the man,” he will say, “who says that it is beautiful for every one and always to be buried by one’s offspring, and to bury one’s parents; or was not Heracles included in ‘every one,’ he and all those whom we just now mentioned?”

Hippias: But I did not say it was so for the gods.

Socrates: “Nor for the heroes either, apparently.”

Hippias: Not those who were children of gods.

Socrates: “But those who were not?”

Hippias: Certainly.

Socrates: “Then again, according to your statement, among the heroes it is terrible and impious and disgraceful for Tantalus and Dardanus and Zethus, but beautiful for Pelops and the others who were born as he was?”

Hippias: I think so.

Socrates: “You think, then, what you did not say just now, that to bury one’s parents and be buried by one’s offspring is

sometimes and for some persons disgraceful; and it is still more impossible, as it seems, for this to become and to be beautiful for all, so that the same thing has happened to this as to the things we mentioned before, the maiden and the pot, in a still more ridiculous way than to them; it is beautiful for some and not beautiful for others. And you are not able yet, even today, Socrates," he will say, "to answer what is asked about the beautiful, namely what it is." With these words and the like he will rebuke me, if I reply to him in this way. For the most part, Hippias, he talks with me in some such way as that but sometimes, as if in pity for my inexperience and lack of training, he himself volunteers a question, and asks whether I think the beautiful is so and so or whatever else it is which happens to be the subject of our questions and our discussion.

Hippias: What do you mean by that, Socrates?

Socrates: I will tell you. "Oh, my dear Socrates," he says, "stop making replies of this sort and in this way — for they are too silly and easy to refute; but see if something like this does not seem to you to be beautiful, which we got hold of just now in our reply, when we said that gold was beautiful for those things for which it was appropriate, but not for those for which it was not, and that all the other things were beautiful to which this quality pertains; so examine this very thing, the appropriate, and see if it is perchance the beautiful." Now I am accustomed to agree to such things every time for I don't know what to say; but now does it seem to you that the appropriate is the beautiful?

Hippias: Yes, certainly, Socrates.

Socrates: Let us consider, lest we make a mistake somehow.

Hippias: Yes, we must consider.

Socrates: See, then; do we say that the appropriate is that which, when it is added, makes each of those things to which it is added appear beautiful, or which makes them be beautiful, or neither of these?

Hippias: I think so.

Socrates: Which?

Hippias: That which makes them appear beautiful; as when a man takes clothes or shoes that fit, even if he be ridiculous, he appears more beautiful.

Socrates: Then if the appropriate makes him appear more beautiful than he is, the appropriate would be a sort of deceit in respect to the beautiful, and would not be that which we are looking for, would it, Hippias? For we were rather looking for that by which all beautiful things are beautiful — like that by which all great things are great, that is, excess; for it is by this that all great things are great; for even if they do not appear great, but exceed, they are of necessity great; so, then, we say, what would the beautiful be, by which all things are beautiful, whether they appear so or not? For it could not be the appropriate, since that, by your statement, makes things appear more beautiful than they are, but does not let them appear such as they are. But we must try to say what that is which makes things be beautiful, as I said just now, whether they appear so or not; for that is what we are looking for, since we are looking for the beautiful.

Hippias: But the appropriate, Socrates, makes things both be and appear beautiful by its presence.

Socrates: Is it impossible, then, for things which are really beautiful not to appear to be beautiful, at any rate when that is present which makes them appear so?

Hippias: It is impossible.

Socrates: Shall we, then, agree to this, Hippias, that all things which are really beautiful, both uses and pursuits, are always believed to be beautiful by all, and appear so to them, or, quite the contrary, that people are ignorant about them, and that there is more strife and contention about them than about anything else, both in private between individuals and in public

between states?

Hippias: The latter rather, Socrates; that people are ignorant about them.

Socrates: They would not be so, if the appearance of beauty were added to them; and it would be added, if the appropriate were beautiful and made things not only to be beautiful, but also to appear so. So that the appropriate, if it is that which makes things be beautiful, would be the beautiful which we are looking for, but would not be that which makes things appear beautiful; but if, on the other hand, the appropriate is that which makes things appear beautiful, it would not be the beautiful for which we are looking. For that makes things be beautiful, but the same element could not make things both appear and be beautiful, nor could it make them both appear and be anything else whatsoever. Let us choose, then, whether we think that the appropriate is that which makes things appear or be beautiful.

Hippias: That which makes them appear so, in my opinion, Socrates.

Socrates: Whew! Our perception of what the beautiful is has fled away and gone, Hippias, since the appropriate has been found to be something other than the beautiful.

Hippias: Yes, by Zeus, Socrates, and to me that is very queer.

Socrates: However, my friend, let us not yet give it up, for I still have hopes that what the beautiful is will be made clear.

Hippias: Certainly, to be sure, Socrates, for it is not hard to find. Now I know that if I should go away into solitude and meditate alone by myself, I could tell it to you with the most perfect accuracy.

Socrates: Ah, don’t boast, Hippias. You see how much trouble it has caused us already; I’m afraid it may get angry and run away more than ever. And yet that is nonsense; for you, I think, will easily find it when you go away by yourself. But for Heaven’s

sake, find it in my presence, or, if you please, join me, as you are now doing, in looking for it. And if we find it, that will be splendid, but if we do not, I shall, I suppose, accept my lot, and you will go away and find it easily. And if we find it now, I shall certainly not be a nuisance to you by asking what that was which you found by yourself; but now once more see if this is in your opinion the beautiful : I say, then, that it is — but consider, paying close attention to me, that I may not talk nonsense — for I say, then, whatever is useful shall be for us beautiful. But I said it with this reason for my thought; beautiful eyes, we say, are not such as seem to be so, which are unable to see, but those which are able and useful for seeing. Is that right?

Hippias: Yes.

Socrates: Then, too, in the same way we say that the whole body is beautiful, part of it for running, part for wrestling; and again all the animals, a beautiful horse or cock or quail and all utensils and land vehicles, and on the sea freight-ships and ships of war; and all instruments in music and in the other arts, and, if you like, customs and laws also — pretty well all these we call beautiful in the same way looking at each of them — how it is formed by nature, how it is wrought, how it has been enacted — the useful we call beautiful, and beautiful in the way in which it is useful, and for the purpose for which it is useful, and at the time when it is useful; and that which is in all these aspects useless we say is ugly. Now is not this your opinion also, Hippias?

Hippias: It is.

Socrates: Then are we right in saying that the useful rather than everything else is beautiful?

Hippias: We are right, surely, Socrates.

Socrates: Now that which has power to accomplish anything is useful for that for which it has power, but that which is powerless is useless, is it not?

Hippias: Certainly.

Socrates: Power, then, is beautiful, and want of power is disgraceful or ugly.

Hippias: Decidedly. Now other things, Socrates, testify for us that this is so, but especially political affairs; for in political affairs and in one's own state to be powerful is the most beautiful of all things, but to be powerless is the most disgraceful of all.

Socrates: Good! Then, for Heaven's sake, Hippias, is wisdom also for this reason the most beautiful of all things and ignorance the most disgraceful of all things?

Hippias: Well, what do you suppose, Socrates?

Socrates: Just keep quiet, my dear friend; I am so afraid and wondering what in the world we are saying again.

Hippias: What are you afraid of again, Socrates, since now your discussion has gone ahead most beautifully?

Socrates: I wish that might be the case; but consider this point with me: could a person do what he did not know how and was utterly powerless to do?

Hippias: By no means; for how could he do what he was powerless to do?

Socrates: Then those who commit errors and accomplish and do bad things involuntarily, if they were powerless to do those things, would not do them?

Hippias: Evidently not.

Socrates: But yet it is by power that those are powerful who are powerful for surely it is not by powerlessness.

Hippias: Certainly not.

Socrates: And all who do, have power to do what they do?

Hippias: Yes.

Socrates: Men do many more bad things than good, from childhood up, and commit many errors involuntarily.

Hippias: That is true.

Socrates: Well, then, this power and these useful things, which are useful for accomplishing something bad — shall we say that they are beautiful, or far from it?

Hippias: Far from it, in my opinion, Socrates.

Socrates: Then, Hippias, the powerful and the useful are not, as it seems, our beautiful.

Hippias: They are, Socrates, if they are powerful and useful for good.

Socrates: Then that assertion, that the powerful and useful are beautiful without qualification, is gone; but was this, Hippias, what our soul wished to say, that the useful and the powerful for doing something good is the beautiful?

Hippias: Yes, in my opinion.

Socrates: But surely this is beneficial; or is it not?

Hippias: Certainly.

Socrates: So by this argument the beautiful persons and beautiful customs and all that we mentioned just now are beautiful because they are beneficial.

Hippias: Evidently.

Socrates: Then the beneficial seems to us to be the beautiful, Hippias.

Hippias: Yes, certainly, Socrates.

Socrates: But the beneficial is that which creates good.

Hippias: Yes, it is.

Socrates: But that which creates is nothing else than the cause; am I right?

Hippias: It is so.

Socrates: Then the beautiful is the cause of the good.

Hippias: Yes, it is.

Socrates: But surely, Hippias, the cause and that of which the cause is the cause are different; for the cause could not well be the cause of the cause. But look at it in this way was not the cause seen to be creating?

Hippias: Yes, certainly.

Socrates: By that which creates, then, only that is created which comes into being, but not that which creates. Is not that true?

Hippias: That is true.

Socrates: The cause, then, is not the cause of the cause, but of that which comes into being through it.

Hippias: Certainly.

Socrates: If, then, the beautiful is the cause of good, the good would come into being through the beautiful; and this is why we are eager for wisdom and all the other beautiful things, because their offspring, the good, is worthy of eagerness, and, from what we are finding, it looks as if the beautiful were a sort of father of the good.

Hippias: Certainly for what you say is well said, Socrates.

Socrates: Then is this well said, too, that the father is not the son, and the son not father?

Hippias: To be sure it is well said.

Socrates: And neither is the cause that which comes into being, nor is that which comes into being the cause.

Hippias: True.

Socrates: By Zeus, my good friend, then neither is the beautiful good, nor the good beautiful; or does it seem to you possible, after what has been said?

Hippias: No, by Zeus, it does not appear so to me.

Socrates: Does it please us, and should we be willing to say that the beautiful is not good, and the good not beautiful?

Hippias: No, by Zeus, it does not please me at all.

Socrates: Right, by Zeus, Hippias! And it pleases me least of all the things we have said.

Hippias: Yes, that is likely.

Socrates: Then there is a good chance that the statement that the beneficial and the useful and the powerful to create something good are beautiful, is not, as it appeared to be, the most beautiful of of statements, but, if that be possible, is even more ridiculous than those first ones in which we thought the maiden was the beautiful, and each of the various other things we spoke of before.

Hippias: That is likely.

Socrates: And Hippias, I no longer know where to turn; I am at a loss; but have you anything to say?

Hippias: Not at the moment, but, as I said just now, I am sure I shall find it after meditation.

Socrates: But it seems to me that I am so eager to know that I cannot wait for you while you delay; for I believe I have just now found a way out. Just see; how would it help us towards our goal if we were to say that that is beautiful which makes us feel joy; I do not mean all pleasures, but that which makes us feel joy through hearing and sight? For surely beautiful human beings, Hippias, and all decorations and paintings and works of sculpture which are beautiful, delight us when we see them; and beautiful sounds and music in general and speeches and stories do the same thing, so that if we were to reply to that impudent fellow, “My excellent man, the beautiful is that which is pleasing through hearing and sight,” don’t you think that we should put a stop to his impudence?

Hippias: To me, at any rate, Socrates, it seems that the nature of the beautiful is now well stated.

Socrates: But what then? Shall we say, Hippias, that beautiful customs and laws are beautiful because they are pleasing through hearing and sight, or that they have some other form of beauty?

Hippias: Perhaps, Socrates, these things might slip past the man unnoticed.

Socrates: No, by dog, Hippias — not past the man before whom I should be most ashamed of talking nonsenseand pretending that I was talking sense when I was not.

Hippias: What man is that?

Socrates: Socrates, the son of Sophroniscus, who would no more permit me to say these things carelessly without investigation than to say that I know what I do not know.

Hippias: But certainly I also, now that you have mentioned it, think that this about the laws is something different.

Socrates: Not too fast, Hippias; for very likely we have fallen into the same perplexity about the beautiful in which we were a while ago, although we think we have found another way out.

Hippias: What do you mean by that, Socrates?

Socrates: I will tell you what presents itself to me, if perhaps there may be some sense in it. For perhaps these matters of laws and customs might be shown to be not outside of the perception which we have through hearing and sight; but let us stick to the statement that that which is pleasing through the senses is beautiful, without interjecting the matter of the laws. But if this man of whom I speak, or anyone else whosoever, should ask us: “Hippias and Socrates, did you make the distinction that in the category of the pleasing that which is pleasing in the way you mention is beautiful, whereas you say that that which is pleasing according to the other senses —

those concerned with food and drink and sexual love and all such things — is not beautiful? Or do you say that such things are not even pleasing and that there is no pleasure at all in them, nor in anything else except sight and hearing?" What shall we say, Hippias?

Hippias: Certainly, by all means, Socrates, we shall say that there are very great pleasures in the other things also.

Socrates: "Why, then," he will say, "if they are pleasures no less than the others, do you take from them this designation and deprive them of being beautiful?" "Because," we shall say, "everybody would laugh at us if we should say that eating is not pleasant but is beautiful, and that a pleasant odor is not pleasant but is beautiful; and as to the act of sexual love, we should all, no doubt, contend that it is most pleasant, but that one must, if he perform it, do it so that no one else shall see, because it is most repulsive to see." If we say this, Hippias, "I too understand," he will perhaps say, "that you have all along been ashamed to say that these pleasures are beautiful, because they do not seem so to people; but that is not what I asked, what seems to most people to be beautiful, but what is so." We shall, then, I fancy, say, as we suggested, "We say that that part of the pleasant which comes by sight and hearing is beautiful." Do you think the statement is of any use, Hippias, or shall we say something else?

Hippias: Inevitably, in view of what has been said, Socrates, we must say just that.

Socrates: "Excellent!" he will say. "Then if that which is pleasant through sight and hearing is beautiful, that among pleasant things which does not happen to be of that sort would evidently not be beautiful?" Shall we agree?

Hippias: Yes.

Socrates: "Is, then, that which is pleasant through sight," he will say, "pleasant through sight and hearing, or is that which is

pleasant through hearing pleasant through hearing and sight?" "No," we shall say, "that which is pleasant through each of these would not in the least be pleasant through both — for that is what you appear to us to mean — but we said that either of these pleasant things would be beautiful alone by itself, and both together." Is not that the reply we shall make?

Hippias: Certainly.

Socrates: "Does, then," he will say, "any pleasant thing whatsoever differ from any pleasant thing whatsoever by this, by being pleasant? I ask not whether any pleasure is greater or smaller or more or less, but whether it differs by just this very thing, by the fact that one of the pleasures is a pleasure and the other is not a pleasure." "We do not think so." Do we?

Hippias: No, we do not.

Socrates: "Is it not," then, he will say, "for some other reason than because they are pleasures that you chose these pleasures out from the other pleasures — it was because you saw some quality in both, since they have something different from the others, in view of which you say that they are beautiful? For the reason why that which is pleasant through sight is beautiful, is not, I imagine, because it is through sight; for if that were the cause of its being beautiful, the other pleasure, that through hearing, would not be beautiful; it certainly is not pleasure through sight." Shall we say "What you say is true"?

Hippias: Yes, we shall.

Socrates: "Nor, again, is the pleasure through hearing beautiful for the reason that it is through hearing; for in that case, again, the pleasure through sight would not be beautiful; it certainly is not pleasure through hearing." Shall we say, Hippias, that the man who says that speaks the truth?

Hippias: Yes, he speaks the truth.

Socrates: “But yet both are beautiful, as you say.” We do say that, do we not?

Hippias: We do.

Socrates: “They have, then, something identical which makes them to be beautiful, this common quality which pertains to both of them in common and to each individually; for otherwise they would not both collectively and each individually be beautiful.” Answer me, as if you were answering him.

Hippias: I answer, and I think it is as you say.

Socrates: If, then, these pleasures are both affected in any way collectively, but each individually is not so affected, it is not by this affection that they would be beautiful.

Hippias: And how could that be, Socrates, when neither of them individually is affected by some affection or other, that then both are affected by that affection by which neither is affected?

Socrates: You think it cannot be?

Hippias: I should have to be very inexperienced both in the nature of these things and in the language of our present discussion.

Socrates: Very pretty, Hippias. But there is a chance that I think I see a case of that kind which you say is impossible, but do not really see it.

Hippias: There’s no chance about it, Socrates, but you quite purposely see wrongly.

Socrates: And certainly many such cases appear before my mind, but I mistrust them because they do not appear to you, a man who has made more money by wisdom than anyone now living, but to me who never made any money at all; and the thought disturbs me that you are playing with me and purposely deceiving me, they appear to me in such numbers and with such force.

Hippias: Nobody, Socrates, will know better than you whether I am playing with you or not, if you proceed to tell these things that appear to you; for it will be apparent to you that you are talking nonsense. For you will never find that you and I are both affected by an affection by which neither of us is affected.

Socrates: What are you saying, Hippias? Perhaps you are talking sense, and I fail to understand; but let me tell more clearly what I wish to say. For it appears to me that it is possible for us both to be so affected as to be something which I am not so affected as to be, and which I am not and you are not either; and again for neither of us to be so affected as to be other things which we both are.

Hippias: Your reply, Socrates, seems to involve miracles again even greater than those of your previous reply. For consider: if we are both just, would not each of us be just also, and if each is unjust, would not both again also be unjust, or if both are healthy, each of us also? Or if each of us were to be tired or wounded or struck or affected in any other way whatsoever, should we not both of us be affected in the same way? Then, too, if we were to be golden or of silver or of ivory, or, if you please, noble or wise or honored or old or young or whatever else you like of all that flesh is heir to, is it not quite inevitable that each of us be that also?

Socrates: Absolutely.

Hippias: But you see, Socrates, you do not consider the entirety of things, nor do they with whom you are in the habit of conversing, but you all test the beautiful and each individual entity by taking them separately and cutting them to pieces. For this reason you fail to observe that embodiments of reality are by nature so great and undivided. And now you have failed to observe to such a degree that you think there is some affection or reality which pertains to both of these together, but not to each individually, or again to each, but not to both; so unreasoning and undiscerning and foolish and unreflecting is

your state of mind.

Socrates: Human affairs, Hippias, are not what a man wishes, but what he can, as the proverb goes which people are constantly citing; but you are always aiding us with admonitions. For now too, until we were admonished by you of our foolish state of mind — shall I continue to speak and make you a still further exhibition of our thoughts on the subject, or shall I not speak?

Hippias: You will speak to one who knows, Socrates, for I know the state of mind of all who are concerned with discussions; but nevertheless, if you prefer, speak.

Socrates: Well, I do prefer. For we, my friend, were so stupid, before you spoke, as to have an opinion concerning you and me, that each of us was one, but that we were not both that which each of us was — for we are not one, but two — so foolish were we. But now we have been taught by you that if we are both two, then each of us is inevitably two, and if each is one, then both are inevitably one; for it is impossible, by the continuous doctrine of reality according to Hippias, that it be otherwise, but what we both are, that each is, and what each is, both are. So now I have been convinced by you, and I hold this position. But first, Hippias, refresh my memory: Are you and I one, or are you two and I two?

Hippias: What do you mean, Socrates?

Socrates: Just what I say; for I am afraid to speak plainly to you, because you are vexed with me, when you think you are talking sensibly; however, tell me further: is not each of us one and affected in such a way as to be one?

Hippias: Certainly.

Socrates: Then each of us, if one, would be an odd number; or do you not consider one an odd number?

Hippias: I do.

Socrates: Then are we both an odd number, being two?

Hippias: That could not be, Socrates.

Socrates: But we are both an even number, are we not?

Hippias: Certainly.

Socrates: Then because we are both even, is each of us on that account even?

Hippias: No, surely not.

Socrates: Then it is not absolutely inevitable, as you said just now, that what both are, each is, and what each is, both are.

Hippias: Not things of this sort, but such as I mentioned before.

Socrates: That suffices, Hippias; for even this is welcome, since it appears that some things are so and some are not so. For I said, if you remember the beginning of this discussion, that pleasure through sight and through hearing were beautiful, not by that by which each of them was so affected as to be beautiful, but not both, nor both but not each, but by that by which both and each were so affected, because you conceded that both and each were beautiful. For this reason I thought that if both are beautiful they must be beautiful by that essence which belongs to both, but not by that which is lacking in each; and I still think so. But tell me, as in the beginning: If pleasure through sight and pleasure through hearing are both and each beautiful, does not that which makes them beautiful belong to both and to each?

Hippias: Certainly.

Socrates: Is it, then, for this reason, because each is a pleasure and both are pleasures, that they would be beautiful? Or would all other pleasures be for this reason no less beautiful than they? For we saw, if you remember, that they were no less pleasures.

Hippias: Yes, I remember.

Socrates: But for this reason, because these pleasures were through sight and hearing, it was said that they are beautiful.

Hippias: Yes, that is what was said.

Socrates: See if what I say is true. For it was said, if my memory serves me, that this “pleasant” was beautiful, not all “pleasant,” but that which is through sight and hearing.

Hippias: True.

Socrates: Now this quality belongs to both, but not to each, does it not? For surely each of them, as was said before, is not through both senses, but both are through both, and each is not. Is that true?

Hippias: It is.

Socrates: Then it is not by that which does not belong to each that each of them is beautiful; for “both” does not belong to each; so that it is possible, according to our hypothesis, to say that they both are beautiful, but not to say that each is so; or what shall we say? Is that not inevitable?

Hippias: It appears so.

Socrates: Shall we say, then, that both are beautiful, but that each is not?

Hippias: What is to prevent?

Socrates: This seems to me, my friend, to prevent, that there were some attributes thus belonging to individual things, which belonged, we thought, to each, if they belonged to both, and to both, if they belonged to each — I mean all those attributes which you specified. Am I right?

Hippias: Yes.

Socrates: But those again which I specified did not; and among those were precisely “each” and “both”. Is that so?

Hippias: It is.

Socrates: To which group, then, Hippias, does the beautiful seem to you to belong? To the group of those that you mentioned? If I am strong and you also, are we both collectively strong, and if I am just and you also, are we both collectively just, and if both collectively, then each individually so, too, if I am beautiful and you also, are we both collectively beautiful, and if both collectively, then each individually? Or is there nothing to prevent this, as in the case that when given things are both collectively even, they may perhaps individually be odd, or perhaps even, and again, when things are individually irrational quantities they may perhaps both collectively be rational, or perhaps irrational, and countless other cases which, you know, I said appeared before my mind? To which group do you assign the beautiful? Or have you the same view about it as I? For to me it seems great foolishness that we collectively are beautiful, but each of us is not so, or that each of us is so, but both are not, or anything else of that sort. Do you choose in this way, as I do, or in some other way?

Hippias: In this way, Socrates.

Socrates: You choose well, Hippias, that we may be free from the need of further search; for if the beautiful is in this group, that which is pleasing through sight and hearing would no longer be the beautiful. For the expression through sight and hearing makes both collectively beautiful, but not each individually; and this was impossible, as you and I agree.

Hippias: Yes, we agree.

Socrates: It is, then, impossible that the pleasant through sight and hearing be the beautiful, since in becoming beautiful it offers an impossibility.

Hippias: That is true.

Socrates: “Then tell us again,” he will say, “from the beginning, since you failed this time; what do you say that this ‘beautiful’, belonging to both the pleasures, is, on account of which you

honored them before the rest and called them beautiful?" It seems to me, Hippias, inevitable that we say that these are the most harmless and the best of pleasures, both of them collectively and each of them individually; or have you anything else to suggest, by which they excel the rest?

Hippias: Not at all; for really they are the best.

Socrates: "This, then," he will say, "you say is the beautiful, beneficial pleasure?" "It seems that we do," I shall say; and you?

Hippias: I also.

Socrates: "Well, then," he will say, "beneficial is that which creates the good, but that which creates and that which is created were just now seen to be different, and our argument has come round to the earlier argument, has it not? For neither could the good be beautiful nor the beautiful good, if each of them is different from the other." "Absolutely true," we shall say, if we are reasonable; for it is inadmissible to disagree with him who says what is right.

Hippias: But now, Socrates, what do you think all this amounts to? It is mere scrapings and shavings of discourse, as I said a while ago, divided into bits; but that other ability is beautiful and of great worth, the ability to produce a discourse well and beautifully in a court of law or a council-house or before any other public body before which the discourse may be delivered, to convince the audience and to carry off, not the smallest, but the greatest of prizes, the salvation of oneself, one's property, and one's friends. For these things, therefore, one must strive, renouncing these petty arguments, that one may not, by busying oneself, as at present, with mere talk and nonsense, appear to be a fool.

Socrates: My dear Hippias, you are blessed because you know the things a man ought to practise, and have, as you say, practised them satisfactorily. But I, as it seems, am possessed by some accursed fortune, so that I am always wandering and

perplexed, and, exhibiting my perplexity to you wise men, am in turn reviled by you in speech whenever I exhibit it. For you say of me, what you are now saying, that I busy myself with silly little matters of no account; but when in turn I am convinced by you and say what you say, that it is by far the best thing to be able to produce a discourse well and beautifully and gain one's end in a court of law or in any other assemblage, I am called everything that is bad by some other men here and especially by that man who is continually refuting me; for he is a very near relative of mine and lives in the same house. So whenever I go home to my own house, and he hears me saying these things, he asks me if I am not ashamed that I have the face to talk about beautiful practices, when it is so plainly shown, to my confusion, that I do not even know what the beautiful itself is. "And yet how are you to know," he will say, "either who produced a discourse, or anything else whatsoever, beautifully, or not, when you are ignorant of the beautiful? And when you are in such a condition, do you think it is better for you to be alive than dead?" So it has come about, as I say, that I am abused and reviled by you and by him. But perhaps it is necessary to endure all this, for it is quite reasonable that I might be benefited by it. So I think, Hippias, that I have been benefited by conversation with both of you; for I think I know the meaning of the proverb "beautiful things are difficult".

Symposium

ΣΥΜΠΟΣΙΟΝ

Concerning the things about which you ask to be informed I believe that I am not ill-prepared with an answer. For the day before yesterday I was coming from my own home at Phalerum to the city, and one of my acquaintance, who had caught a sight of me from behind, calling out playfully in the distance, said: Apollodorus, O thou Phalerian (Probably a play of words on (Greek), 'bald-headed.') man, halt! So I did as I was bid; and then he said, I was looking for you, Apollodorus, only just now, that I might ask you about the speeches in praise of love, which were delivered by Socrates, Alcibiades, and others, at Agathon's supper. Phoenix, the son of Philip, told another person who told me of them; his narrative was very indistinct, but he said that you knew, and I wish that you would give me an account of them. Who, if not you, should be the reporter of the words of your friend? And first tell me, he said, were you present at this meeting?

Your informant, Glaucon, I said, must have been very indistinct indeed, if you imagine that the occasion was recent; or that I could have been of the party.

Why, yes, he replied, I thought so.

Impossible: I said. Are you ignorant that for many years Agathon has not resided at Athens; and not three have elapsed since I became acquainted with Socrates, and have made it my daily business to know all that he says and does. There was a time when I was running about the world, fancying myself to be well

employed, but I was really a most wretched being, no better than you are now. I thought that I ought to do anything rather than be a philosopher.

Well, he said, jesting apart, tell me when the meeting occurred.

In our boyhood, I replied, when Agathon won the prize with his first tragedy, on the day after that on which he and his chorus offered the sacrifice of victory.

Then it must have been a long while ago, he said; and who told you — did Socrates?

No indeed, I replied, but the same person who told Phoenix; — he was a little fellow, who never wore any shoes, Aristodemus, of the deme of Cydathenaeum. He had been at Agathon's feast; and I think that in those days there was no one who was a more devoted admirer of Socrates. Moreover, I have asked Socrates about the truth of some parts of his narrative, and he confirmed them. Then, said Glaucon, let us have the tale over again; is not the road to Athens just made for conversation? And so we walked, and talked of the discourses on love; and therefore, as I said at first, I am not ill-prepared to comply with your request, and will have another rehearsal of them if you like. For to speak or to hear others speak of philosophy always gives me the greatest pleasure, to say nothing of the profit. But when I hear another strain, especially that of you rich men and traders, such conversation displeases me; and I pity you who are my companions, because you think that you are doing something when in reality you are doing nothing. And I dare say that you pity me in return, whom you regard as an unhappy creature, and very probably you are right. But I certainly know of you what you only think of me — there is the difference.

Companion: I see, Apollodorus, that you are just the same — always speaking evil of yourself, and of others; and I do believe that you pity all mankind, with the exception of Socrates, yourself first of all, true in this to your old name, which,

however deserved, I know not how you acquired, of Apollodorus the madman; for you are always raging against yourself and everybody but Socrates.

Apollodorus: Yes, friend, and the reason why I am said to be mad, and out of my wits, is just because I have these notions of myself and you; no other evidence is required.

Companion: No more of that, Apollodorus; but let me renew my request that you would repeat the conversation.

Apollodorus: Well, the tale of love was on this wise: — But perhaps I had better begin at the beginning, and endeavour to give you the exact words of Aristodemus:

He said that he met Socrates fresh from the bath and sandalled; and as the sight of the sandals was unusual, he asked him whither he was going that he had been converted into such a beau: —

To a banquet at Agathon's, he replied, whose invitation to his sacrifice of victory I refused yesterday, fearing a crowd, but promising that I would come to-day instead; and so I have put on my finery, because he is such a fine man. What say you to going with me unasked?

I will do as you bid me, I replied.

Follow then, he said, and let us demolish the proverb: —

'To the feasts of inferior men the good unbidden go;'

instead of which our proverb will run: —

'To the feasts of the good the good unbidden go;'

and this alteration may be supported by the authority of Homer himself, who not only demolishes but literally outrages the proverb. For, after picturing Agamemnon as the most valiant of men, he makes Menelaus, who is but a fainthearted warrior, come unbidden (Iliad) to the banquet of Agamemnon, who is feasting and offering sacrifices, not the better to the worse, but

the worse to the better.

I rather fear, Socrates, said Aristodemus, lest this may still be my case; and that, like Menelaus in Homer, I shall be the inferior person, who

‘To the feasts of the wise unbidden goes.’

But I shall say that I was bidden of you, and then you will have to make an excuse.

‘Two going together,’

he replied, in Homeric fashion, one or other of them may invent an excuse by the way (Iliad).

This was the style of their conversation as they went along. Socrates dropped behind in a fit of abstraction, and desired Aristodemus, who was waiting, to go on before him. When he reached the house of Agathon he found the doors wide open, and a comical thing happened. A servant coming out met him, and led him at once into the banqueting-hall in which the guests were reclining, for the banquet was about to begin. Welcome, Aristodemus, said Agathon, as soon as he appeared — you are just in time to sup with us; if you come on any other matter put it off, and make one of us, as I was looking for you yesterday and meant to have asked you, if I could have found you. But what have you done with Socrates?

I turned round, but Socrates was nowhere to be seen; and I had to explain that he had been with me a moment before, and that I came by his invitation to the supper.

You were quite right in coming, said Agathon; but where is he himself?

He was behind me just now, as I entered, he said, and I cannot think what has become of him.

Go and look for him, boy, said Agathon, and bring him in; and do you, Aristodemus, meanwhile take the place by Eryximachus.

The servant then assisted him to wash, and he lay down, and presently another servant came in and reported that our friend Socrates had retired into the portico of the neighbouring house. ‘There he is fixed,’ said he, ‘and when I call to him he will not stir.’

How strange, said Agathon; then you must call him again, and keep calling him.

Let him alone, said my informant; he has a way of stopping anywhere and losing himself without any reason. I believe that he will soon appear; do not therefore disturb him.

Well, if you think so, I will leave him, said Agathon. And then, turning to the servants, he added, ‘Let us have supper without waiting for him. Serve up whatever you please, for there is no one to give you orders; hitherto I have never left you to yourselves. But on this occasion imagine that you are our hosts, and that I and the company are your guests; treat us well, and then we shall commend you.’ After this, supper was served, but still no Socrates; and during the meal Agathon several times expressed a wish to send for him, but Aristodemus objected; and at last when the feast was about half over — for the fit, as usual, was not of long duration — Socrates entered. Agathon, who was reclining alone at the end of the table, begged that he would take the place next to him; that ‘I may touch you,’ he said, ‘and have the benefit of that wise thought which came into your mind in the portico, and is now in your possession; for I am certain that you would not have come away until you had found what you sought.’

How I wish, said Socrates, taking his place as he was desired, that wisdom could be infused by touch, out of the fuller into the emptier man, as water runs through wool out of a fuller cup into an emptier one; if that were so, how greatly should I value the privilege of reclining at your side! For you would have filled me full with a stream of wisdom plenteous and fair; whereas my own is of a very mean and questionable sort, no better than a

dream. But yours is bright and full of promise, and was manifested forth in all the splendour of youth the day before yesterday, in the presence of more than thirty thousand Hellenes.

You are mocking, Socrates, said Agathon, and ere long you and I will have to determine who bears off the palm of wisdom — of this Dionysus shall be the judge; but at present you are better occupied with supper.

Socrates took his place on the couch, and supped with the rest; and then libations were offered, and after a hymn had been sung to the god, and there had been the usual ceremonies, they were about to commence drinking, when Pausanias said, And now, my friends, how can we drink with least injury to ourselves? I can assure you that I feel severely the effect of yesterday's potations, and must have time to recover; and I suspect that most of you are in the same predicament, for you were of the party yesterday. Consider then: How can the drinking be made easiest?

I entirely agree, said Aristophanes, that we should, by all means, avoid hard drinking, for I was myself one of those who were yesterday drowned in drink.

I think that you are right, said Eryximachus, the son of Acumenus; but I should still like to hear one other person speak: Is Agathon able to drink hard?

I am not equal to it, said Agathon.

Then, said Eryximachus, the weak heads like myself, Aristodemus, Phaedrus, and others who never can drink, are fortunate in finding that the stronger ones are not in a drinking mood. (I do not include Socrates, who is able either to drink or to abstain, and will not mind, whichever we do.) Well, as of none of the company seem disposed to drink much, I may be forgiven for saying, as a physician, that drinking deep is a bad practice, which I never follow, if I can help, and certainly do not

recommend to another, least of all to any one who still feels the effects of yesterday's carouse.

I always do what you advise, and especially what you prescribe as a physician, rejoined Phaedrus the Myrrhinusian, and the rest of the company, if they are wise, will do the same.

It was agreed that drinking was not to be the order of the day, but that they were all to drink only so much as they pleased.

Then, said Eryximachus, as you are all agreed that drinking is to be voluntary, and that there is to be no compulsion, I move, in the next place, that the flute-girl, who has just made her appearance, be told to go away and play to herself, or, if she likes, to the women who are within (compare Prot.). To-day let us have conversation instead; and, if you will allow me, I will tell you what sort of conversation. This proposal having been accepted, Eryximachus proceeded as follows: —

I will begin, he said, after the manner of Melanippe in Euripides,

'Not mine the word'

which I am about to speak, but that of Phaedrus. For often he says to me in an indignant tone:— 'What a strange thing it is, Eryximachus, that, whereas other gods have poems and hymns made in their honour, the great and glorious god, Love, has no encomiast among all the poets who are so many. There are the worthy sophists too — the excellent Prodicus for example, who have descanted in prose on the virtues of Heracles and other heroes; and, what is still more extraordinary, I have met with a philosophical work in which the utility of salt has been made the theme of an eloquent discourse; and many other like things have had a like honour bestowed upon them. And only to think that there should have been an eager interest created about them, and yet that to this day no one has ever dared worthily to hymn Love's praises! So entirely has this great deity been neglected.' Now in this Phaedrus seems to me to be quite right, and therefore I want to offer him a contribution; also I think that at

the present moment we who are here assembled cannot do better than honour the god Love. If you agree with me, there will be no lack of conversation; for I mean to propose that each of us in turn, going from left to right, shall make a speech in honour of Love. Let him give us the best which he can; and Phaedrus, because he is sitting first on the left hand, and because he is the father of the thought, shall begin.

No one will vote against you, Eryximachus, said Socrates. How can I oppose your motion, who profess to understand nothing but matters of love; nor, I presume, will Agathon and Pausanias; and there can be no doubt of Aristophanes, whose whole concern is with Dionysus and Aphrodite; nor will any one disagree of those whom I see around me. The proposal, as I am aware, may seem rather hard upon us whose place is last; but we shall be contented if we hear some good speeches first. Let Phaedrus begin the praise of Love, and good luck to him. All the company expressed their assent, and desired him to do as Socrates bade him.

Aristodemus did not recollect all that was said, nor do I recollect all that he related to me; but I will tell you what I thought most worthy of remembrance, and what the chief speakers said.

Phaedrus began by affirming that Love is a mighty god, and wonderful among gods and men, but especially wonderful in his birth. For he is the eldest of the gods, which is an honour to him; and a proof of his claim to this honour is, that of his parents there is no memorial; neither poet nor prose-writer has ever affirmed that he had any. As Hesiod says: —

‘First Chaos came, and then broad-bosomed Earth, The everlasting seat of all that is, And Love.’

In other words, after Chaos, the Earth and Love, these two, came into being. Also Parmenides sings of Generation:

‘First in the train of gods, he fashioned Love.’

And Acusilaus agrees with Hesiod. Thus numerous are the witnesses who acknowledge Love to be the eldest of the gods. And not only is he the eldest, he is also the source of the greatest benefits to us. For I know not any greater blessing to a young man who is beginning life than a virtuous lover, or to the lover than a beloved youth. For the principle which ought to be the guide of men who would nobly live — that principle, I say, neither kindred, nor honour, nor wealth, nor any other motive is able to implant so well as love. Of what am I speaking? Of the sense of honour and dishonour, without which neither states nor individuals ever do any good or great work. And I say that a lover who is detected in doing any dishonourable act, or submitting through cowardice when any dishonour is done to him by another, will be more pained at being detected by his beloved than at being seen by his father, or by his companions, or by any one else. The beloved too, when he is found in any disgraceful situation, has the same feeling about his lover. And if there were only some way of contriving that a state or an army should be made up of lovers and their loves (compare Rep.), they would be the very best governors of their own city, abstaining from all dishonour, and emulating one another in honour; and when fighting at each other's side, although a mere handful, they would overcome the world. For what lover would not choose rather to be seen by all mankind than by his beloved, either when abandoning his post or throwing away his arms? He would be ready to die a thousand deaths rather than endure this. Or who would desert his beloved or fail him in the hour of danger? The veriest coward would become an inspired hero, equal to the bravest, at such a time; Love would inspire him. That courage which, as Homer says, the god breathes into the souls of some heroes, Love of his own nature infuses into the lover.

Love will make men dare to die for their beloved — love alone; and women as well as men. Of this, Alcestis, the daughter of Pelias, is a monument to all Hellas; for she was willing to lay

down her life on behalf of her husband, when no one else would, although he had a father and mother; but the tenderness of her love so far exceeded theirs, that she made them seem to be strangers in blood to their own son, and in name only related to him; and so noble did this action of hers appear to the gods, as well as to men, that among the many who have done virtuously she is one of the very few to whom, in admiration of her noble action, they have granted the privilege of returning alive to earth; such exceeding honour is paid by the gods to the devotion and virtue of love. But Orpheus, the son of Oeagrus, the harper, they sent empty away, and presented to him an apparition only of her whom he sought, but herself they would not give up, because he showed no spirit; he was only a harp-player, and did not dare like Alcestis to die for love, but was contriving how he might enter Hades alive; moreover, they afterwards caused him to suffer death at the hands of women, as the punishment of his cowardliness. Very different was the reward of the true love of Achilles towards his lover Patroclus — his lover and not his love (the notion that Patroclus was the beloved one is a foolish error into which Aeschylus has fallen, for Achilles was surely the fairer of the two, fairer also than all the other heroes; and, as Homer informs us, he was still beardless, and younger far). And greatly as the gods honour the virtue of love, still the return of love on the part of the beloved to the lover is more admired and valued and rewarded by them, for the lover is more divine; because he is inspired by God. Now Achilles was quite aware, for he had been told by his mother, that he might avoid death and return home, and live to a good old age, if he abstained from slaying Hector. Nevertheless he gave his life to revenge his friend, and dared to die, not only in his defence, but after he was dead. Wherefore the gods honoured him even above Alcestis, and sent him to the Islands of the Blest. These are my reasons for affirming that Love is the eldest and noblest and mightiest of the gods; and the chiefest author and giver of virtue in life, and of happiness after death.

This, or something like this, was the speech of Phaedrus; and some other speeches followed which Aristodemus did not remember; the next which he repeated was that of Pausanias. Phaedrus, he said, the argument has not been set before us, I think, quite in the right form; — we should not be called upon to praise Love in such an indiscriminate manner. If there were only one Love, then what you said would be well enough; but since there are more Loves than one, — should have begun by determining which of them was to be the theme of our praises. I will amend this defect; and first of all I will tell you which Love is deserving of praise, and then try to hymn the praiseworthy one in a manner worthy of him. For we all know that Love is inseparable from Aphrodite, and if there were only one Aphrodite there would be only one Love; but as there are two goddesses there must be two Loves. And am I not right in asserting that there are two goddesses? The elder one, having no mother, who is called the heavenly Aphrodite — she is the daughter of Uranus; the younger, who is the daughter of Zeus and Dione — her we call common; and the Love who is her fellow-worker is rightly named common, as the other love is called heavenly. All the gods ought to have praise given to them, but not without distinction of their natures; and therefore I must try to distinguish the characters of the two Loves. Now actions vary according to the manner of their performance. Take, for example, that which we are now doing, drinking, singing and talking — these actions are not in themselves either good or evil, but they turn out in this or that way according to the mode of performing them; and when well done they are good, and when wrongly done they are evil; and in like manner not every love, but only that which has a noble purpose, is noble and worthy of praise. The Love who is the offspring of the common Aphrodite is essentially common, and has no discrimination, being such as the meaner sort of men feel, and is apt to be of women as well as of youths, and is of the body rather than of the soul — the most foolish beings are the objects of this love which

desires only to gain an end, but never thinks of accomplishing the end nobly, and therefore does good and evil quite indiscriminately. The goddess who is his mother is far younger than the other, and she was born of the union of the male and female, and partakes of both. But the offspring of the heavenly Aphrodite is derived from a mother in whose birth the female has no part, — she is from the male only; this is that love which is of youths, and the goddess being older, there is nothing of wantonness in her. Those who are inspired by this love turn to the male, and delight in him who is the more valiant and intelligent nature; any one may recognise the pure enthusiasts in the very character of their attachments. For they love not boys, but intelligent beings whose reason is beginning to be developed, much about the time at which their beards begin to grow. And in choosing young men to be their companions, they mean to be faithful to them, and pass their whole life in company with them, not to take them in their inexperience, and deceive them, and play the fool with them, or run away from one to another of them. But the love of young boys should be forbidden by law, because their future is uncertain; they may turn out good or bad, either in body or soul, and much noble enthusiasm may be thrown away upon them; in this matter the good are a law to themselves, and the coarser sort of lovers ought to be restrained by force; as we restrain or attempt to restrain them from fixing their affections on women of free birth. These are the persons who bring a reproach on love; and some have been led to deny the lawfulness of such attachments because they see the impropriety and evil of them; for surely nothing that is decorously and lawfully done can justly be censured. Now here and in Lacedaemon the rules about love are perplexing, but in most cities they are simple and easily intelligible; in Elis and Boeotia, and in countries having no gifts of eloquence, they are very straightforward; the law is simply in favour of these connexions, and no one, whether young or old, has anything to say to their discredit; the reason being, as I

suppose, that they are men of few words in those parts, and therefore the lovers do not like the trouble of pleading their suit. In Ionia and other places, and generally in countries which are subject to the barbarians, the custom is held to be dishonourable; loves of youths share the evil repute in which philosophy and gymnastics are held, because they are inimical to tyranny; for the interests of rulers require that their subjects should be poor in spirit (compare Arist. Politics), and that there should be no strong bond of friendship or society among them, which love, above all other motives, is likely to inspire, as our Athenian tyrants learned by experience; for the love of Aristogeiton and the constancy of Harmodius had a strength which undid their power. And, therefore, the ill-repute into which these attachments have fallen is to be ascribed to the evil condition of those who make them to be ill-reputed; that is to say, to the self-seeking of the governors and the cowardice of the governed; on the other hand, the indiscriminate honour which is given to them in some countries is attributable to the laziness of those who hold this opinion of them. In our own country a far better principle prevails, but, as I was saying, the explanation of it is rather perplexing. For, observe that open loves are held to be more honourable than secret ones, and that the love of the noblest and highest, even if their persons are less beautiful than others, is especially honourable. Consider, too, how great is the encouragement which all the world gives to the lover; neither is he supposed to be doing anything dishonourable; but if he succeeds he is praised, and if he fail he is blamed. And in the pursuit of his love the custom of mankind allows him to do many strange things, which philosophy would bitterly censure if they were done from any motive of interest, or wish for office or power. He may pray, and entreat, and supplicate, and swear, and lie on a mat at the door, and endure a slavery worse than that of any slave — in any other case friends and enemies would be equally ready to prevent him, but now there is no friend who will be ashamed of him and

admonish him, and no enemy will charge him with meanness or flattery; the actions of a lover have a grace which ennobles them; and custom has decided that they are highly commendable and that there no loss of character in them; and, what is strangest of all, he only may swear and forswear himself (so men say), and the gods will forgive his transgression, for there is no such thing as a lover's oath. Such is the entire liberty which gods and men have allowed the lover, according to the custom which prevails in our part of the world. From this point of view a man fairly argues that in Athens to love and to be loved is held to be a very honourable thing. But when parents forbid their sons to talk with their lovers, and place them under a tutor's care, who is appointed to see to these things, and their companions and equals cast in their teeth anything of the sort which they may observe, and their elders refuse to silence the reprovers and do not rebuke them — any one who reflects on all this will, on the contrary, think that we hold these practices to be most disgraceful. But, as I was saying at first, the truth as I imagine is, that whether such practices are honourable or whether they are dishonourable is not a simple question; they are honourable to him who follows them honourably, dishonourable to him who follows them dishonourably. There is dishonour in yielding to the evil, or in an evil manner; but there is honour in yielding to the good, or in an honourable manner. Evil is the vulgar lover who loves the body rather than the soul, inasmuch as he is not even stable, because he loves a thing which is in itself unstable, and therefore when the bloom of youth which he was desiring is over, he takes wing and flies away, in spite of all his words and promises; whereas the love of the noble disposition is life-long, for it becomes one with the everlasting. The custom of our country would have both of them proven well and truly, and would have us yield to the one sort of lover and avoid the other, and therefore encourages some to pursue, and others to fly; testing both the lover and beloved in contests and trials, until they show to which of the two classes

they respectively belong. And this is the reason why, in the first place, a hasty attachment is held to be dishonourable, because time is the true test of this as of most other things; and secondly there is a dishonour in being overcome by the love of money, or of wealth, or of political power, whether a man is frightened into surrender by the loss of them, or, having experienced the benefits of money and political corruption, is unable to rise above the seductions of them. For none of these things are of a permanent or lasting nature; not to mention that no generous friendship ever sprang from them. There remains, then, only one way of honourable attachment which custom allows in the beloved, and this is the way of virtue; for as we admitted that any service which the lover does to him is not to be accounted flattery or a dishonour to himself, so the beloved has one way only of voluntary service which is not dishonourable, and this is virtuous service.

For we have a custom, and according to our custom any one who does service to another under the idea that he will be improved by him either in wisdom, or in some other particular of virtue — such a voluntary service, I say, is not to be regarded as a dishonour, and is not open to the charge of flattery. And these two customs, one the love of youth, and the other the practice of philosophy and virtue in general, ought to meet in one, and then the beloved may honourably indulge the lover. For when the lover and beloved come together, having each of them a law, and the lover thinks that he is right in doing any service which he can to his gracious loving one; and the other that he is right in showing any kindness which he can to him who is making him wise and good; the one capable of communicating wisdom and virtue, the other seeking to acquire them with a view to education and wisdom, when the two laws of love are fulfilled and meet in one — then, and then only, may the beloved yield with honour to the lover. Nor when love is of this disinterested sort is there any disgrace in being deceived, but in every other case there is equal disgrace in being or not being deceived. For

he who is gracious to his lover under the impression that he is rich, and is disappointed of his gains because he turns out to be poor, is disgraced all the same: for he has done his best to show that he would give himself up to any one's 'uses base' for the sake of money; but this is not honourable. And on the same principle he who gives himself to a lover because he is a good man, and in the hope that he will be improved by his company, shows himself to be virtuous, even though the object of his affection turn out to be a villain, and to have no virtue; and if he is deceived he has committed a noble error. For he has proved that for his part he will do anything for anybody with a view to virtue and improvement, than which there can be nothing nobler. Thus noble in every case is the acceptance of another for the sake of virtue. This is that love which is the love of the heavenly godess, and is heavenly, and of great price to individuals and cities, making the lover and the beloved alike eager in the work of their own improvement. But all other loves are the offspring of the other, who is the common goddess. To you, Phaedrus, I offer this my contribution in praise of love, which is as good as I could make extempore.

Pausanias came to a pause — this is the balanced way in which I have been taught by the wise to speak; and Aristodemus said that the turn of Aristophanes was next, but either he had eaten too much, or from some other cause he had the hiccough, and was obliged to change turns with Eryximachus the physician, who was reclining on the couch below him. Eryximachus, he said, you ought either to stop my hiccough, or to speak in my turn until I have left off.

I will do both, said Eryximachus: I will speak in your turn, and do you speak in mine; and while I am speaking let me recommend you to hold your breath, and if after you have done so for some time the hiccough is no better, then gargle with a little water; and if it still continues, tickle your nose with something and sneeze; and if you sneeze once or twice, even the

most violent hiccough is sure to go. I will do as you prescribe, said Aristophanes, and now get on.

Eryximachus spoke as follows: Seeing that Pausanias made a fair beginning, and but a lame ending, I must endeavour to supply his deficiency. I think that he has rightly distinguished two kinds of love. But my art further informs me that the double love is not merely an affection of the soul of man towards the fair, or towards anything, but is to be found in the bodies of all animals and in productions of the earth, and I may say in all that is; such is the conclusion which I seem to have gathered from my own art of medicine, whence I learn how great and wonderful and universal is the deity of love, whose empire extends over all things, divine as well as human. And from medicine I will begin that I may do honour to my art. There are in the human body these two kinds of love, which are confessedly different and unlike, and being unlike, they have loves and desires which are unlike; and the desire of the healthy is one, and the desire of the diseased is another; and as Pausanias was just now saying that to indulge good men is honourable, and bad men dishonourable: — so too in the body the good and healthy elements are to be indulged, and the bad elements and the elements of disease are not to be indulged, but discouraged. And this is what the physician has to do, and in this the art of medicine consists: for medicine may be regarded generally as the knowledge of the loves and desires of the body, and how to satisfy them or not; and the best physician is he who is able to separate fair love from foul, or to convert one into the other; and he who knows how to eradicate and how to implant love, whichever is required, and can reconcile the most hostile elements in the constitution and make them loving friends, is a skilful practitioner. Now the most hostile are the most opposite, such as hot and cold, bitter and sweet, moist and dry, and the like. And my ancestor, Asclepius, knowing how to implant friendship and accord in these elements, was the creator of our art, as our friends the poets here tell us, and I believe them; and

not only medicine in every branch but the arts of gymnastic and husbandry are under his dominion. Any one who pays the least attention to the subject will also perceive that in music there is the same reconciliation of opposites; and I suppose that this must have been the meaning of Heracleitus, although his words are not accurate; for he says that The One is united by disunion, like the harmony of the bow and the lyre. Now there is an absurdity saying that harmony is discord or is composed of elements which are still in a state of discord. But what he probably meant was, that harmony is composed of differing notes of higher or lower pitch which disagreed once, but are now reconciled by the art of music; for if the higher and lower notes still disagreed, there could be no harmony, — clearly not. For harmony is a symphony, and symphony is an agreement; but an agreement of disagreements while they disagree there cannot be; you cannot harmonize that which disagrees. In like manner rhythm is compounded of elements short and long, once differing and now in accord; which accordance, as in the former instance, medicine, so in all these other cases, music implants, making love and unison to grow up among them; and thus music, too, is concerned with the principles of love in their application to harmony and rhythm. Again, in the essential nature of harmony and rhythm there is no difficulty in discerning love which has not yet become double. But when you want to use them in actual life, either in the composition of songs or in the correct performance of airs or metres composed already, which latter is called education, then the difficulty begins, and the good artist is needed. Then the old tale has to be repeated of fair and heavenly love — the love of Urania the fair and heavenly muse, and of the duty of accepting the temperate, and those who are as yet intemperate only that they may become temperate, and of preserving their love; and again, of the vulgar Polyhymnia, who must be used with circumspection that the pleasure be enjoyed, but may not generate licentiousness; just as in my own art it is a great matter so to

regulate the desires of the epicure that he may gratify his tastes without the attendant evil of disease. Whence I infer that in music, in medicine, in all other things human as well as divine, both loves ought to be noted as far as may be, for they are both present.

The course of the seasons is also full of both these principles; and when, as I was saying, the elements of hot and cold, moist and dry, attain the harmonious love of one another and blend in temperance and harmony, they bring to men, animals, and plants health and plenty, and do them no harm; whereas the wanton love, getting the upper hand and affecting the seasons of the year, is very destructive and injurious, being the source of pestilence, and bringing many other kinds of diseases on animals and plants; for hoar-frost and hail and blight spring from the excesses and disorders of these elements of love, which to know in relation to the revolutions of the heavenly bodies and the seasons of the year is termed astronomy. Furthermore all sacrifices and the whole province of divination, which is the art of communion between gods and men — these, I say, are concerned only with the preservation of the good and the cure of the evil love. For all manner of impiety is likely to ensue if, instead of accepting and honouring and reverencing the harmonious love in all his actions, a man honours the other love, whether in his feelings towards gods or parents, towards the living or the dead. Wherefore the business of divination is to see to these loves and to heal them, and divination is the peacemaker of gods and men, working by a knowledge of the religious or irreligious tendencies which exist in human loves. Such is the great and mighty, or rather omnipotent force of love in general. And the love, more especially, which is concerned with the good, and which is perfected in company with temperance and justice, whether among gods or men, has the greatest power, and is the source of all our happiness and harmony, and makes us friends with the gods who are above us, and with one another. I dare say that I too have omitted several

things which might be said in praise of Love, but this was not intentional, and you, Aristophanes, may now supply the omission or take some other line of commendation; for I perceive that you are rid of the hiccough.

Yes, said Aristophanes, who followed, the hiccough is gone; not, however, until I applied the sneezing; and I wonder whether the harmony of the body has a love of such noises and ticklings, for I no sooner applied the sneezing than I was cured.

Eryximachus said: Beware, friend Aristophanes, although you are going to speak, you are making fun of me; and I shall have to watch and see whether I cannot have a laugh at your expense, when you might speak in peace.

You are right, said Aristophanes, laughing. I will unsay my words; but do you please not to watch me, as I fear that in the speech which I am about to make, instead of others laughing with me, which is to the manner born of our muse and would be all the better, I shall only be laughed at by them.

Do you expect to shoot your bolt and escape, Aristophanes? Well, perhaps if you are very careful and bear in mind that you will be called to account, I may be induced to let you off.

Aristophanes professed to open another vein of discourse; he had a mind to praise Love in another way, unlike that either of Pausanias or Eryximachus. Mankind, he said, judging by their neglect of him, have never, as I think, at all understood the power of Love. For if they had understood him they would surely have built noble temples and altars, and offered solemn sacrifices in his honour; but this is not done, and most certainly ought to be done: since of all the gods he is the best friend of men, the helper and the healer of the ills which are the great impediment to the happiness of the race. I will try to describe his power to you, and you shall teach the rest of the world what I am teaching you. In the first place, let me treat of the nature of man and what has happened to it; for the original human nature

was not like the present, but different. The sexes were not two as they are now, but originally three in number; there was man, woman, and the union of the two, having a name corresponding to this double nature, which had once a real existence, but is now lost, and the word ‘Androgynous’ is only preserved as a term of reproach. In the second place, the primeval man was round, his back and sides forming a circle; and he had four hands and four feet, one head with two faces, looking opposite ways, set on a round neck and precisely alike; also four ears, two privy members, and the remainder to correspond. He could walk upright as men now do, backwards or forwards as he pleased, and he could also roll over and over at a great pace, turning on his four hands and four feet, eight in all, like tumblers going over and over with their legs in the air; this was when he wanted to run fast. Now the sexes were three, and such as I have described them; because the sun, moon, and earth are three; and the man was originally the child of the sun, the woman of the earth, and the man-woman of the moon, which is made up of sun and earth, and they were all round and moved round and round like their parents. Terrible was their might and strength, and the thoughts of their hearts were great, and they made an attack upon the gods; of them is told the tale of Otys and Ephialtes who, as Homer says, dared to scale heaven, and would have laid hands upon the gods. Doubt reigned in the celestial councils. Should they kill them and annihilate the race with thunderbolts, as they had done the giants, then there would be an end of the sacrifices and worship which men offered to them; but, on the other hand, the gods could not suffer their insolence to be unrestrained. At last, after a good deal of reflection, Zeus discovered a way. He said: ‘Methinks I have a plan which will humble their pride and improve their manners; men shall continue to exist, but I will cut them in two and then they will be diminished in strength and increased in numbers; this will have the advantage of making them more profitable to us. They shall walk upright on two legs, and if they continue

insolent and will not be quiet, I will split them again and they shall hop about on a single leg.' He spoke and cut men in two, like a sorb-apple which is halved for pickling, or as you might divide an egg with a hair; and as he cut them one after another, he bade Apollo give the face and the half of the neck a turn in order that the man might contemplate the section of himself: he would thus learn a lesson of humility. Apollo was also bidden to heal their wounds and compose their forms. So he gave a turn to the face and pulled the skin from the sides all over that which in our language is called the belly, like the purses which draw in, and he made one mouth at the centre, which he fastened in a knot (the same which is called the navel); he also moulded the breast and took out most of the wrinkles, much as a shoemaker might smooth leather upon a last; he left a few, however, in the region of the belly and navel, as a memorial of the primeval state. After the division the two parts of man, each desiring his other half, came together, and throwing their arms about one another, entwined in mutual embraces, longing to grow into one, they were on the point of dying from hunger and self-neglect, because they did not like to do anything apart; and when one of the halves died and the other survived, the survivor sought another mate, man or woman as we call them, — being the sections of entire men or women, — and clung to that. They were being destroyed, when Zeus in pity of them invented a new plan: he turned the parts of generation round to the front, for this had not been always their position, and they sowed the seed no longer as hitherto like grasshoppers in the ground, but in one another; and after the transposition the male generated in the female in order that by the mutual embraces of man and woman they might breed, and the race might continue; or if man came to man they might be satisfied, and rest, and go their ways to the business of life: so ancient is the desire of one another which is implanted in us, reuniting our original nature, making one of two, and healing the state of man. Each of us when separated, having one side only, like a flat fish, is but the indenture of a

man, and he is always looking for his other half. Men who are a section of that double nature which was once called Androgynous are lovers of women; adulterers are generally of this breed, and also adulterous women who lust after men: the women who are a section of the woman do not care for men, but have female attachments; the female companions are of this sort. But they who are a section of the male follow the male, and while they are young, being slices of the original man, they hang about men and embrace them, and they are themselves the best of boys and youths, because they have the most manly nature. Some indeed assert that they are shameless, but this is not true; for they do not act thus from any want of shame, but because they are valiant and manly, and have a manly countenance, and they embrace that which is like them. And these when they grow up become our statesmen, and these only, which is a great proof of the truth of what I am saving. When they reach manhood they are lovers of youth, and are not naturally inclined to marry or beget children, — if at all, they do so only in obedience to the law; but they are satisfied if they may be allowed to live with one another unwedded; and such a nature is prone to love and ready to return love, always embracing that which is akin to him. And when one of them meets with his other half, the actual half of himself, whether he be a lover of youth or a lover of another sort, the pair are lost in an amazement of love and friendship and intimacy, and one will not be out of the other's sight, as I may say, even for a moment: these are the people who pass their whole lives together; yet they could not explain what they desire of one another. For the intense yearning which each of them has towards the other does not appear to be the desire of lover's intercourse, but of something else which the soul of either evidently desires and cannot tell, and of which she has only a dark and doubtful presentiment. Suppose Hephaestus, with his instruments, to come to the pair who are lying side by side and to say to them, 'What do you people want of one another?' they would be unable to explain. And suppose further, that when he

saw their perplexity he said: ‘Do you desire to be wholly one; always day and night to be in one another’s company? for if this is what you desire, I am ready to melt you into one and let you grow together, so that being two you shall become one, and while you live live a common life as if you were a single man, and after your death in the world below still be one departed soul instead of two — I ask whether this is what you lovingly desire, and whether you are satisfied to attain this?’ — there is not a man of them who when he heard the proposal would deny or would not acknowledge that this meeting and melting into one another, this becoming one instead of two, was the very expression of his ancient need (compare Arist. Pol.). And the reason is that human nature was originally one and we were a whole, and the desire and pursuit of the whole is called love. There was a time, I say, when we were one, but now because of the wickedness of mankind God has dispersed us, as the Arcadians were dispersed into villages by the Lacedaemonians (compare Arist. Pol.). And if we are not obedient to the gods, there is a danger that we shall be split up again and go about in basso-relievo, like the profile figures having only half a nose which are sculptured on monuments, and that we shall be like tallies. Wherefore let us exhort all men to piety, that we may avoid evil, and obtain the good, of which Love is to us the lord and minister; and let no one oppose him — he is the enemy of the gods who opposes him. For if we are friends of the God and at peace with him we shall find our own true loves, which rarely happens in this world at present. I am serious, and therefore I must beg Eryximachus not to make fun or to find any allusion in what I am saying to Pausanias and Agathon, who, as I suspect, are both of the manly nature, and belong to the class which I have been describing. But my words have a wider application — they include men and women everywhere; and I believe that if our loves were perfectly accomplished, and each one returning to his primeval nature had his original true love, then our race would be happy. And if this would be best of all, the best in the

next degree and under present circumstances must be the nearest approach to such an union; and that will be the attainment of a congenial love. Wherefore, if we would praise him who has given to us the benefit, we must praise the god Love, who is our greatest benefactor, both leading us in this life back to our own nature, and giving us high hopes for the future, for he promises that if we are pious, he will restore us to our original state, and heal us and make us happy and blessed. This, Eryximachus, is my discourse of love, which, although different to yours, I must beg you to leave unassailed by the shafts of your ridicule, in order that each may have his turn; each, or rather either, for Agathon and Socrates are the only ones left.

Indeed, I am not going to attack you, said Eryximachus, for I thought your speech charming, and did I not know that Agathon and Socrates are masters in the art of love, I should be really afraid that they would have nothing to say, after the world of things which have been said already. But, for all that, I am not without hopes.

Socrates said: You played your part well, Eryximachus; but if you were as I am now, or rather as I shall be when Agathon has spoken, you would, indeed, be in a great strait.

You want to cast a spell over me, Socrates, said Agathon, in the hope that I may be disconcerted at the expectation raised among the audience that I shall speak well.

I should be strangely forgetful, Agathon replied Socrates, of the courage and magnanimity which you showed when your own compositions were about to be exhibited, and you came upon the stage with the actors and faced the vast theatre altogether undismayed, if I thought that your nerves could be fluttered at a small party of friends.

Do you think, Socrates, said Agathon, that my head is so full of the theatre as not to know how much more formidable to a man of sense a few good judges are than many fools?

Nay, replied Socrates, I should be very wrong in attributing to you, Agathon, that or any other want of refinement. And I am quite aware that if you happened to meet with any whom you thought wise, you would care for their opinion much more than for that of the many. But then we, having been a part of the foolish many in the theatre, cannot be regarded as the select wise; though I know that if you chanced to be in the presence, not of one of ourselves, but of some really wise man, you would be ashamed of disgracing yourself before him — would you not?

Yes, said Agathon.

But before the many you would not be ashamed, if you thought that you were doing something disgraceful in their presence?

Here Phaedrus interrupted them, saying: not answer him, my dear Agathon; for if he can only get a partner with whom he can talk, especially a good-looking one, he will no longer care about the completion of our plan. Now I love to hear him talk; but just at present I must not forget the encomium on Love which I ought to receive from him and from every one. When you and he have paid your tribute to the god, then you may talk.

Very good, Phaedrus, said Agathon; I see no reason why I should not proceed with my speech, as I shall have many other opportunities of conversing with Socrates. Let me say first how I ought to speak, and then speak: —

The previous speakers, instead of praising the god Love, or unfolding his nature, appear to have congratulated mankind on the benefits which he confers upon them. But I would rather praise the god first, and then speak of his gifts; this is always the right way of praising everything. May I say without impiety or offence, that of all the blessed gods he is the most blessed because he is the fairest and best? And he is the fairest: for, in the first place, he is the youngest, and of his youth he is himself the witness, fleeing out of the way of age, who is swift enough, swifter truly than most of us like: — Love hates him and will not

come near him; but youth and love live and move together — like to like, as the proverb says. Many things were said by Phaedrus about Love in which I agree with him; but I cannot agree that he is older than Iapetus and Kronos: — not so; I maintain him to be the youngest of the gods, and youthful ever. The ancient doings among the gods of which Hesiod and Parmenides spoke, if the tradition of them be true, were done of Necessity and not of Love; had Love been in those days, there would have been no chaining or mutilation of the gods, or other violence, but peace and sweetness, as there is now in heaven, since the rule of Love began. Love is young and also tender; he ought to have a poet like Homer to describe his tenderness, as Homer says of Ate, that she is a goddess and tender: —

'Her feet are tender, for she sets her steps, Not on the ground but on the heads of men:'

herein is an excellent proof of her tenderness, — that she walks not upon the hard but upon the soft. Let us adduce a similar proof of the tenderness of Love; for he walks not upon the earth, nor yet upon the skulls of men, which are not so very soft, but in the hearts and souls of both gods and men, which are of all things the softest: in them he walks and dwells and makes his home. Not in every soul without exception, for where there is hardness he departs, where there is softness there he dwells; and nestling always with his feet and in all manner of ways in the softest of soft places, how can he be other than the softest of all things? Of a truth he is the tenderest as well as the youngest, and also he is of flexile form; for if he were hard and without flexure he could not enfold all things, or wind his way into and out of every soul of man undiscovered. And a proof of his flexibility and symmetry of form is his grace, which is universally admitted to be in an especial manner the attribute of Love; ungrace and love are always at war with one another. The fairness of his complexion is revealed by his habitation among the flowers; for he dwells not amid bloomless or fading beauties,

whether of body or soul or aught else, but in the place of flowers and scents, there he sits and abides. Concerning the beauty of the god I have said enough; and yet there remains much more which I might say. Of his virtue I have now to speak: his greatest glory is that he can neither do nor suffer wrong to or from any god or any man; for he suffers not by force if he suffers; force comes not near him, neither when he acts does he act by force. For all men in all things serve him of their own free will, and where there is voluntary agreement, there, as the laws which are the lords of the city say, is justice. And not only is he just but exceedingly temperate, for Temperance is the acknowledged ruler of the pleasures and desires, and no pleasure ever masters Love; he is their master and they are his servants; and if he conquers them he must be temperate indeed. As to courage, even the God of War is no match for him; he is the captive and Love is the lord, for love, the love of Aphrodite, masters him, as the tale runs; and the master is stronger than the servant. And if he conquers the bravest of all others, he must be himself the bravest. Of his courage and justice and temperance I have spoken, but I have yet to speak of his wisdom; and according to the measure of my ability I must try to do my best. In the first place he is a poet (and here, like Eryximachus, I magnify my art), and he is also the source of poesy in others, which he could not be if he were not himself a poet. And at the touch of him every one becomes a poet, even though he had no music in him before (A fragment of the Sthenoaoea of Euripides.); this also is a proof that Love is a good poet and accomplished in all the fine arts; for no one can give to another that which he has not himself, or teach that of which he has no knowledge. Who will deny that the creation of the animals is his doing? Are they not all the works of his wisdom, born and begotten of him? And as to the artists, do we not know that he only of them whom love inspires has the light of fame? — he whom Love touches not walks in darkness. The arts of medicine and archery and divination were discovered by Apollo, under the guidance of love

and desire; so that he too is a disciple of Love. Also the melody of the Muses, the metallurgy of Hephaestus, the weaving of Athene, the empire of Zeus over gods and men, are all due to Love, who was the inventor of them. And so Love set in order the empire of the gods — the love of beauty, as is evident, for with deformity Love has no concern. In the days of old, as I began by saying, dreadful deeds were done among the gods, for they were ruled by Necessity; but now since the birth of Love, and from the Love of the beautiful, has sprung every good in heaven and earth. Therefore, Phaedrus, I say of Love that he is the fairest and best in himself, and the cause of what is fairest and best in all other things. And there comes into my mind a line of poetry in which he is said to be the god who

'Gives peace on earth and calms the stormy deep, Who stills the winds and bids the sufferer sleep.'

This is he who empties men of disaffection and fills them with affection, who makes them to meet together at banquets such as these: in sacrifices, feasts, dances, he is our lord — who sends courtesy and sends away discourtesy, who gives kindness ever and never gives unkindness; the friend of the good, the wonder of the wise, the amazement of the gods; desired by those who have no part in him, and precious to those who have the better part in him; parent of delicacy, luxury, desire, fondness, softness, grace; regardful of the good, regardless of the evil: in every word, work, wish, fear — saviour, pilot, comrade, helper; glory of gods and men, leader best and brightest: in whose footsteps let every man follow, sweetly singing in his honour and joining in that sweet strain with which love charms the souls of gods and men. Such is the speech, Phaedrus, half-playful, yet having a certain measure of seriousness, which, according to my ability, I dedicate to the god.

When Agathon had done speaking, Aristodemus said that there was a general cheer; the young man was thought to have spoken in a manner worthy of himself, and of the god. And Socrates,

looking at Eryximachus, said: Tell me, son of Acumenus, was there not reason in my fears? and was I not a true prophet when I said that Agathon would make a wonderful oration, and that I should be in a strait?

The part of the prophecy which concerns Agathon, replied Eryximachus, appears to me to be true; but not the other part — that you will be in a strait.

Why, my dear friend, said Socrates, must not I or any one be in a strait who has to speak after he has heard such a rich and varied discourse? I am especially struck with the beauty of the concluding words — who could listen to them without amazement? When I reflected on the immeasurable inferiority of my own powers, I was ready to run away for shame, if there had been a possibility of escape. For I was reminded of Gorgias, and at the end of his speech I fancied that Agathon was shaking at me the Gorginian or Gorgonian head of the great master of rhetoric, which was simply to turn me and my speech into stone, as Homer says (Odyssey), and strike me dumb. And then I perceived how foolish I had been in consenting to take my turn with you in praising love, and saying that I too was a master of the art, when I really had no conception how anything ought to be praised. For in my simplicity I imagined that the topics of praise should be true, and that this being presupposed, out of the true the speaker was to choose the best and set them forth in the best manner. And I felt quite proud, thinking that I knew the nature of true praise, and should speak well. Whereas I now see that the intention was to attribute to Love every species of greatness and glory, whether really belonging to him or not, without regard to truth or falsehood — that was no matter; for the original proposal seems to have been not that each of you should really praise Love, but only that you should appear to praise him. And so you attribute to Love every imaginable form of praise which can be gathered anywhere; and you say that ‘he is all this,’ and ‘the cause of all that,’ making him appear the

fairest and best of all to those who know him not, for you cannot impose upon those who know him. And a noble and solemn hymn of praise have you rehearsed. But as I misunderstood the nature of the praise when I said that I would take my turn, I must beg to be absolved from the promise which I made in ignorance, and which (as Euripides would say (Eurip. Hyppolytus)) was a promise of the lips and not of the mind. Farewell then to such a strain: for I do not praise in that way; no, indeed, I cannot. But if you like to hear the truth about love, I am ready to speak in my own manner, though I will not make myself ridiculous by entering into any rivalry with you. Say then, Phaedrus, whether you would like to have the truth about love, spoken in any words and in any order which may happen to come into my mind at the time. Will that be agreeable to you?

Aristodemus said that Phaedrus and the company bid him speak in any manner which he thought best. Then, he added, let me have your permission first to ask Agathon a few more questions, in order that I may take his admissions as the premisses of my discourse.

I grant the permission, said Phaedrus: put your questions. Socrates then proceeded as follows: —

In the magnificent oration which you have just uttered, I think that you were right, my dear Agathon, in proposing to speak of the nature of Love first and afterwards of his works — that is a way of beginning which I very much approve. And as you have spoken so eloquently of his nature, may I ask you further, Whether love is the love of something or of nothing? And here I must explain myself: I do not want you to say that love is the love of a father or the love of a mother — that would be ridiculous; but to answer as you would, if I asked is a father a father of something? to which you would find no difficulty in replying, of a son or daughter: and the answer would be right.

Very true, said Agathon.

And you would say the same of a mother?

He assented.

Yet let me ask you one more question in order to illustrate my meaning: Is not a brother to be regarded essentially as a brother of something?

Certainly, he replied.

That is, of a brother or sister?

Yes, he said.

And now, said Socrates, I will ask about Love: — Is Love of something or of nothing?

Of something, surely, he replied.

Keep in mind what this is, and tell me what I want to know — whether Love desires that of which love is.

Yes, surely.

And does he possess, or does he not possess, that which he loves and desires?

Probably not, I should say.

Nay, replied Socrates, I would have you consider whether ‘necessarily’ is not rather the word. The inference that he who desires something is in want of something, and that he who desires nothing is in want of nothing, is in my judgment, Agathon, absolutely and necessarily true. What do you think?

I agree with you, said Agathon.

Very good. Would he who is great, desire to be great, or he who is strong, desire to be strong?

That would be inconsistent with our previous admissions.

True.: For he who is anything cannot want to be that which he is?

Very true.

And yet, added Socrates, if a man being strong desired to be strong, or being swift desired to be swift, or being healthy desired to be healthy, in that case he might be thought to desire something which he already has or is. I give the example in order that we may avoid misconception. For the possessors of these qualities, Agathon, must be supposed to have their respective advantages at the time, whether they choose or not; and who can desire that which he has? Therefore, when a person says, I am well and wish to be well, or I am rich and wish to be rich, and I desire simply to have what I have — to him we shall reply: 'You, my friend, having wealth and health and strength, want to have the continuance of them; for at this moment, whether you choose or no, you have them. And when you say, I desire that which I have and nothing else, is not your meaning that you want to have what you now have in the future?' He must agree with us — must he not?

He must, replied Agathon.

Then, said Socrates, he desires that what he has at present may be preserved to him in the future, which is equivalent to saying that he desires something which is non-existent to him, and which as yet he has not got:

Very true, he said.

Then he and every one who desires, desires that which he has not already, and which is future and not present, and which he has not, and is not, and of which he is in want; — these are the sort of things which love and desire seek?

Very true, he said.

Then now, said Socrates, let us recapitulate the argument. First, is not love of something, and of something too which is wanting to a man?

Yes, he replied.

Remember further what you said in your speech, or if you do not remember I will remind you: you said that the love of the beautiful set in order the empire of the gods, for that of deformed things there is no love — did you not say something of that kind?

Yes, said Agathon.

Yes, my friend, and the remark was a just one. And if this is true, Love is the love of beauty and not of deformity?

He assented.

And the admission has been already made that Love is of something which a man wants and has not?

True, he said.

Then Love wants and has not beauty?

Certainly, he replied.

And would you call that beautiful which wants and does not possess beauty?

Certainly not.

Then would you still say that love is beautiful?

Agathon replied: I fear that I did not understand what I was saying.

You made a very good speech, Agathon, replied Socrates; but there is yet one small question which I would fain ask: — Is not the good also the beautiful?

Yes.

Then in wanting the beautiful, love wants also the good?

I cannot refute you, Socrates, said Agathon: — Let us assume that what you say is true.

Say rather, beloved Agathon, that you cannot refute the truth; for Socrates is easily refuted.

And now, taking my leave of you, I would rehearse a tale of love which I heard from Diotima of Mantineia (compare 1 Alcibiades), a woman wise in this and in many other kinds of knowledge, who in the days of old, when the Athenians offered sacrifice before the coming of the plague, delayed the disease ten years. She was my instructress in the art of love, and I shall repeat to you what she said to me, beginning with the admissions made by Agathon, which are nearly if not quite the same which I made to the wise woman when she questioned me: I think that this will be the easiest way, and I shall take both parts myself as well as I can (compare Gorgias). As you, Agathon, suggested (supra), I must speak first of the being and nature of Love, and then of his works. First I said to her in nearly the same words which he used to me, that Love was a mighty god, and likewise fair; and she proved to me as I proved to him that, by my own showing, Love was neither fair nor good. 'What do you mean, Diotima,' I said, 'is love then evil and foul?' 'Hush,' she cried; 'must that be foul which is not fair?' 'Certainly,' I said. 'And is that which is not wise, ignorant? do you not see that there is a mean between wisdom and ignorance?' 'And what may that be?' I said. 'Right opinion,' she replied; 'which, as you know, being incapable of giving a reason, is not knowledge (for how can knowledge be devoid of reason? nor again, ignorance, for neither can ignorance attain the truth), but is clearly something which is a mean between ignorance and wisdom.' 'Quite true,' I replied. 'Do not then insist,' she said, 'that what is not fair is of necessity foul, or what is not good evil; or infer that because love is not fair and good he is therefore foul and evil; for he is in a mean between them.' 'Well,' I said, 'Love is surely admitted by all to be a great god.' 'By those who know or by those who do not know?' 'By all.' 'And how, Socrates,' she said with a smile, 'can Love be acknowledged to be a great god by those who say that he is not a god at all?' 'And who are they?' I said. 'You and I are two of them,' she replied. 'How can that be?' I said. 'It is quite intelligible,' she replied;

‘for you yourself would acknowledge that the gods are happy and fair — of course you would — would you dare to say that any god was not?’ ‘Certainly not,’ I replied. ‘And you mean by the happy, those who are the possessors of things good or fair?’ ‘Yes.’ ‘And you admitted that Love, because he was in want, desires those good and fair things of which he is in want?’ ‘Yes, I did.’ ‘But how can he be a god who has no portion in what is either good or fair?’ ‘Impossible.’ ‘Then you see that you also deny the divinity of Love.’

‘What then is Love?’ I asked; ’Is he mortal?’ ‘No.’ ‘What then?’ ‘As in the former instance, he is neither mortal nor immortal, but in a mean between the two.’ ‘What is he, Diotima?’ ‘He is a great spirit (daimon), and like all spirits he is intermediate between the divine and the mortal.’ ‘And what,’ I said, ’is his power?’ ‘He interprets,’ she replied, ‘between gods and men, conveying and taking across to the gods the prayers and sacrifices of men, and to men the commands and replies of the gods; he is the mediator who spans the chasm which divides them, and therefore in him all is bound together, and through him the arts of the prophet and the priest, their sacrifices and mysteries and charms, and all prophecy and incantation, find their way. For God mingles not with man; but through Love all the intercourse and converse of God with man, whether awake or asleep, is carried on. The wisdom which understands this is spiritual; all other wisdom, such as that of arts and handicrafts, is mean and vulgar. Now these spirits or intermediate powers are many and diverse, and one of them is Love.’ ‘And who,’ I said, ‘was his father, and who his mother?’ ‘The tale,’ she said, ‘will take time; nevertheless I will tell you. On the birthday of Aphrodite there was a feast of the gods, at which the god Poros or Plenty, who is the son of Metis or Discretion, was one of the guests. When the feast was over, Penia or Poverty, as the manner is on such occasions, came about the doors to beg. Now Plenty who was the worse for nectar (there was no wine in those days), went into the garden of Zeus and fell into a heavy sleep,

and Poverty considering her own straitened circumstances, plotted to have a child by him, and accordingly she lay down at his side and conceived Love, who partly because he is naturally a lover of the beautiful, and because Aphrodite is herself beautiful, and also because he was born on her birthday, is her follower and attendant. And as his parentage is, so also are his fortunes. In the first place he is always poor, and anything but tender and fair, as the many imagine him; and he is rough and squalid, and has no shoes, nor a house to dwell in; on the bare earth exposed he lies under the open heaven, in the streets, or at the doors of houses, taking his rest; and like his mother he is always in distress. Like his father too, whom he also partly resembles, he is always plotting against the fair and good; he is bold, enterprising, strong, a mighty hunter, always weaving some intrigue or other, keen in the pursuit of wisdom, fertile in resources; a philosopher at all times, terrible as an enchanter, sorcerer, sophist. He is by nature neither mortal nor immortal, but alive and flourishing at one moment when he is in plenty, and dead at another moment, and again alive by reason of his father's nature. But that which is always flowing in is always flowing out, and so he is never in want and never in wealth; and, further, he is in a mean between ignorance and knowledge. The truth of the matter is this: No god is a philosopher or seeker after wisdom, for he is wise already; nor does any man who is wise seek after wisdom. Neither do the ignorant seek after wisdom. For herein is the evil of ignorance, that he who is neither good nor wise is nevertheless satisfied with himself: he has no desire for that of which he feels no want.' 'But who then, Diotima,' I said, 'are the lovers of wisdom, if they are neither the wise nor the foolish?' 'A child may answer that question,' she replied; 'they are those who are in a mean between the two; Love is one of them. For wisdom is a most beautiful thing, and Love is of the beautiful; and therefore Love is also a philosopher or lover of wisdom, and being a lover of wisdom is in a mean between the wise and the ignorant. And of this too his birth is

the cause; for his father is wealthy and wise, and his mother poor and foolish. Such, my dear Socrates, is the nature of the spirit Love. The error in your conception of him was very natural, and as I imagine from what you say, has arisen out of a confusion of love and the beloved, which made you think that love was all beautiful. For the beloved is the truly beautiful, and delicate, and perfect, and blessed; but the principle of love is of another nature, and is such as I have described.'

I said, 'O thou stranger woman, thou sayest well; but, assuming Love to be such as you say, what is the use of him to men?' 'That, Socrates,' she replied, 'I will attempt to unfold: of his nature and birth I have already spoken; and you acknowledge that love is of the beautiful. But some one will say: Of the beautiful in what, Socrates and Diotima? — or rather let me put the question more clearly, and ask: When a man loves the beautiful, what does he desire?' I answered her 'That the beautiful may be his.' 'Still,' she said, 'the answer suggests a further question: What is given by the possession of beauty?' 'To what you have asked,' I replied, 'I have no answer ready.' 'Then,' she said, 'let me put the word "good" in the place of the beautiful, and repeat the question once more: If he who loves loves the good, what is it then that he loves?' 'The possession of the good,' I said. 'And what does he gain who possesses the good?' 'Happiness,' I replied; 'there is less difficulty in answering that question.' 'Yes,' she said, 'the happy are made happy by the acquisition of good things. Nor is there any need to ask why a man desires happiness; the answer is already final.' 'You are right.' I said. 'And is this wish and this desire common to all? and do all men always desire their own good, or only some men? — what say you?' 'All men,' I replied; 'the desire is common to all.' 'Why, then,' she rejoined, 'are not all men, Socrates, said to love, but only some of them? whereas you say that all men are always loving the same things.' 'I myself wonder,' I said, 'why this is.' 'There is nothing to wonder at,' she replied; 'the reason is that one part of love is separated off and

receives the name of the whole, but the other parts have other names.' 'Give an illustration,' I said. She answered me as follows: 'There is poetry, which, as you know, is complex and manifold. All creation or passage of non-being into being is poetry or making, and the processes of all art are creative; and the masters of arts are all poets or makers.' 'Very true.' 'Still,' she said, 'you know that they are not called poets, but have other names; only that portion of the art which is separated off from the rest, and is concerned with music and metre, is termed poetry, and they who possess poetry in this sense of the word are called poets.' 'Very true,' I said. 'And the same holds of love. For you may say generally that all desire of good and happiness is only the great and subtle power of love; but they who are drawn towards him by any other path, whether the path of money-making or gymnastics or philosophy, are not called lovers — the name of the whole is appropriated to those whose affection takes one form only — they alone are said to love, or to be lovers.' 'I dare say,' I replied, 'that you are right.' 'Yes,' she added, 'and you hear people say that lovers are seeking for their other half; but I say that they are seeking neither for the half of themselves, nor for the whole, unless the half or the whole be also a good. And they will cut off their own hands and feet and cast them away, if they are evil; for they love not what is their own, unless perchance there be some one who calls what belongs to him the good, and what belongs to another the evil. For there is nothing which men love but the good. Is there anything?' 'Certainly, I should say, that there is nothing.' 'Then,' she said, 'the simple truth is, that men love the good.' 'Yes,' I said. 'To which must be added that they love the possession of the good?' 'Yes, that must be added.' 'And not only the possession, but the everlasting possession of the good?' 'That must be added too.' 'Then love,' she said, 'may be described generally as the love of the everlasting possession of the good?' 'That is most true.'

‘Then if this be the nature of love, can you tell me further,’ she said, ‘what is the manner of the pursuit? what are they doing who show all this eagerness and heat which is called love? and what is the object which they have in view? Answer me.’ ‘Nay, Diotima,’ I replied, ‘if I had known, I should not have wondered at your wisdom, neither should I have come to learn from you about this very matter.’ ‘Well,’ she said, ‘I will teach you: — The object which they have in view is birth in beauty, whether of body or soul.’ ‘I do not understand you,’ I said; ‘the oracle requires an explanation.’ ‘I will make my meaning clearer,’ she replied. ‘I mean to say, that all men are bringing to the birth in their bodies and in their souls. There is a certain age at which human nature is desirous of procreation — procreation which must be in beauty and not in deformity; and this procreation is the union of man and woman, and is a divine thing; for conception and generation are an immortal principle in the mortal creature, and in the inharmonious they can never be. But the deformed is always inharmonious with the divine, and the beautiful harmonious. Beauty, then, is the destiny or goddess of parturition who presides at birth, and therefore, when approaching beauty, the conceiving power is propitious, and diffusive, and benign, and begets and bears fruit: at the sight of ugliness she frowns and contracts and has a sense of pain, and turns away, and shrivels up, and not without a pang refrains from conception. And this is the reason why, when the hour of conception arrives, and the teeming nature is full, there is such a flutter and ecstasy about beauty whose approach is the alleviation of the pain of travail. For love, Socrates, is not, as you imagine, the love of the beautiful only.’ ‘What then?’ ‘The love of generation and of birth in beauty.’ ‘Yes,’ I said. ‘Yes, indeed,’ she replied. ‘But why of generation?’ ‘Because to the mortal creature, generation is a sort of eternity and immortality,’ she replied; ‘and if, as has been already admitted, love is of the everlasting possession of the good, all men will necessarily desire immortality together with good: Wherefore

love is of immortality.’

All this she taught me at various times when she spoke of love. And I remember her once saying to me, ‘What is the cause, Socrates, of love, and the attendant desire? See you not how all animals, birds, as well as beasts, in their desire of procreation, are in agony when they take the infection of love, which begins with the desire of union; whereto is added the care of offspring, on whose behalf the weakest are ready to battle against the strongest even to the uttermost, and to die for them, and will let themselves be tormented with hunger or suffer anything in order to maintain their young. Man may be supposed to act thus from reason; but why should animals have these passionate feelings? Can you tell me why?’ Again I replied that I did not know. She said to me: ‘And do you expect ever to become a master in the art of love, if you do not know this?’ ‘But I have told you already, Diotima, that my ignorance is the reason why I come to you; for I am conscious that I want a teacher; tell me then the cause of this and of the other mysteries of love.’ ‘Marvel not,’ she said, ‘if you believe that love is of the immortal, as we have several times acknowledged; for here again, and on the same principle too, the mortal nature is seeking as far as is possible to be everlasting and immortal: and this is only to be attained by generation, because generation always leaves behind a new existence in the place of the old. Nay even in the life of the same individual there is succession and not absolute unity: a man is called the same, and yet in the short interval which elapses between youth and age, and in which every animal is said to have life and identity, he is undergoing a perpetual process of loss and reparation — hair, flesh, bones, blood, and the whole body are always changing. Which is true not only of the body, but also of the soul, whose habits, tempers, opinions, desires, pleasures, pains, fears, never remain the same in any one of us, but are always coming and going; and equally true of knowledge, and what is still more surprising to us mortals, not only do the sciences in general spring up and

decay, so that in respect of them we are never the same; but each of them individually experiences a like change. For what is implied in the word “recollection,” but the departure of knowledge, which is ever being forgotten, and is renewed and preserved by recollection, and appears to be the same although in reality new, according to that law of succession by which all mortal things are preserved, not absolutely the same, but by substitution, the old worn-out mortality leaving another new and similar existence behind — unlike the divine, which is always the same and not another? And in this way, Socrates, the mortal body, or mortal anything, partakes of immortality; but the immortal in another way. Marvel not then at the love which all men have of their offspring; for that universal love and interest is for the sake of immortality.’

I was astonished at her words, and said: ’Is this really true, O thou wise Diotima?’ And she answered with all the authority of an accomplished sophist: ‘Of that, Socrates, you may be assured; — think only of the ambition of men, and you will wonder at the senselessness of their ways, unless you consider how they are stirred by the love of an immortality of fame. They are ready to run all risks greater far than they would have run for their children, and to spend money and undergo any sort of toil, and even to die, for the sake of leaving behind them a name which shall be eternal. Do you imagine that Alcestis would have died to save Admetus, or Achilles to avenge Patroclus, or your own Codrus in order to preserve the kingdom for his sons, if they had not imagined that the memory of their virtues, which still survives among us, would be immortal? Nay,’ she said, ‘I am persuaded that all men do all things, and the better they are the more they do them, in hope of the glorious fame of immortal virtue; for they desire the immortal.

‘Those who are pregnant in the body only, betake themselves to women and beget children — this is the character of their love; their offspring, as they hope, will preserve their memory and

giving them the blessedness and immortality which they desire in the future. But souls which are pregnant — for there certainly are men who are more creative in their souls than in their bodies — conceive that which is proper for the soul to conceive or contain. And what are these conceptions? — wisdom and virtue in general. And such creators are poets and all artists who are deserving of the name inventor. But the greatest and fairest sort of wisdom by far is that which is concerned with the ordering of states and families, and which is called temperance and justice. And he who in youth has the seed of these implanted in him and is himself inspired, when he comes to maturity desires to beget and generate. He wanders about seeking beauty that he may beget offspring — for in deformity he will beget nothing — and naturally embraces the beautiful rather than the deformed body; above all when he finds a fair and noble and well-nurtured soul, he embraces the two in one person, and to such an one he is full of speech about virtue and the nature and pursuits of a good man; and he tries to educate him; and at the touch of the beautiful which is ever present to his memory, even when absent, he brings forth that which he had conceived long before, and in company with him tends that which he brings forth; and they are married by a far nearer tie and have a closer friendship than those who beget mortal children, for the children who are their common offspring are fairer and more immortal. Who, when he thinks of Homer and Hesiod and other great poets, would not rather have their children than ordinary human ones? Who would not emulate them in the creation of children such as theirs, which have preserved their memory and given them everlasting glory? Or who would not have such children as Lycurgus left behind him to be the saviours, not only of Lacedaemon, but of Hellas, as one may say? There is Solon, too, who is the revered father of Athenian laws; and many others there are in many other places, both among Hellenes and barbarians, who have given to the world many noble works, and have been the parents of virtue of

every kind; and many temples have been raised in their honour for the sake of children such as theirs; which were never raised in honour of any one, for the sake of his mortal children.

‘These are the lesser mysteries of love, into which even you, Socrates, may enter; to the greater and more hidden ones which are the crown of these, and to which, if you pursue them in a right spirit, they will lead, I know not whether you will be able to attain. But I will do my utmost to inform you, and do you follow if you can. For he who would proceed aright in this matter should begin in youth to visit beautiful forms; and first, if he be guided by his instructor aright, to love one such form only — out of that he should create fair thoughts; and soon he will of himself perceive that the beauty of one form is akin to the beauty of another; and then if beauty of form in general is his pursuit, how foolish would he be not to recognize that the beauty in every form is and the same! And when he perceives this he will abate his violent love of the one, which he will despise and deem a small thing, and will become a lover of all beautiful forms; in the next stage he will consider that the beauty of the mind is more honourable than the beauty of the outward form. So that if a virtuous soul have but a little comeliness, he will be content to love and tend him, and will search out and bring to the birth thoughts which may improve the young, until he is compelled to contemplate and see the beauty of institutions and laws, and to understand that the beauty of them all is of one family, and that personal beauty is a trifle; and after laws and institutions he will go on to the sciences, that he may see their beauty, being not like a servant in love with the beauty of one youth or man or institution, himself a slave mean and narrow-minded, but drawing towards and contemplating the vast sea of beauty, he will create many fair and noble thoughts and notions in boundless love of wisdom; until on that shore he grows and waxes strong, and at last the vision is revealed to him of a single science, which is the science of beauty everywhere. To this I will proceed; please to

give me your very best attention:

‘He who has been instructed thus far in the things of love, and who has learned to see the beautiful in due order and succession, when he comes toward the end will suddenly perceive a nature of wondrous beauty (and this, Socrates, is the final cause of all our former toils) — a nature which in the first place is everlasting, not growing and decaying, or waxing and waning; secondly, not fair in one point of view and foul in another, or at one time or in one relation or at one place fair, at another time or in another relation or at another place foul, as if fair to some and foul to others, or in the likeness of a face or hands or any other part of the bodily frame, or in any form of speech or knowledge, or existing in any other being, as for example, in an animal, or in heaven, or in earth, or in any other place; but beauty absolute, separate, simple, and everlasting, which without diminution and without increase, or any change, is imparted to the ever-growing and perishing beauties of all other things. He who from these ascending under the influence of true love, begins to perceive that beauty, is not far from the end. And the true order of going, or being led by another, to the things of love, is to begin from the beauties of earth and mount upwards for the sake of that other beauty, using these as steps only, and from one going on to two, and from two to all fair forms, and from fair forms to fair practices, and from fair practices to fair notions, until from fair notions he arrives at the notion of absolute beauty, and at last knows what the essence of beauty is. This, my dear Socrates,’ said the stranger of Mantineia, ’is that life above all others which man should live, in the contemplation of beauty absolute; a beauty which if you once beheld, you would see not to be after the measure of gold, and garments, and fair boys and youths, whose presence now entrances you; and you and many a one would be content to live seeing them only and conversing with them without meat or drink, if that were possible — you only want to look at them and to be with them. But what if man had eyes to see the true beauty

— the divine beauty, I mean, pure and clear and unalloyed, not clogged with the pollutions of mortality and all the colours and vanities of human life — thither looking, and holding converse with the true beauty simple and divine? Remember how in that communion only, beholding beauty with the eye of the mind, he will be enabled to bring forth, not images of beauty, but realities (for he has hold not of an image but of a reality), and bringing forth and nourishing true virtue to become the friend of God and be immortal, if mortal man may. Would that be an ignoble life?'

Such, Phaedrus — and I speak not only to you, but to all of you — were the words of Diotima; and I am persuaded of their truth. And being persuaded of them, I try to persuade others, that in the attainment of this end human nature will not easily find a helper better than love: And therefore, also, I say that every man ought to honour him as I myself honour him, and walk in his ways, and exhort others to do the same, and praise the power and spirit of love according to the measure of my ability now and ever.

The words which I have spoken, you, Phaedrus, may call an encomium of love, or anything else which you please.

When Socrates had done speaking, the company applauded, and Aristophanes was beginning to say something in answer to the allusion which Socrates had made to his own speech, when suddenly there was a great knocking at the door of the house, as of revellers, and the sound of a flute-girl was heard. Agathon told the attendants to go and see who were the intruders. 'If they are friends of ours,' he said, 'invite them in, but if not, say that the drinking is over.' A little while afterwards they heard the voice of Alcibiades resounding in the court; he was in a great state of intoxication, and kept roaring and shouting 'Where is Agathon? Lead me to Agathon,' and at length, supported by the flute-girl and some of his attendants, he found his way to them. 'Hail, friends,' he said, appearing at the door crowned with a massive garland of ivy and violets, his head

flowing with ribands. ‘Will you have a very drunken man as a companion of your revels? Or shall I crown Agathon, which was my intention in coming, and go away? For I was unable to come yesterday, and therefore I am here to-day, carrying on my head these ribands, that taking them from my own head, I may crown the head of this fairest and wisest of men, as I may be allowed to call him. Will you laugh at me because I am drunk? Yet I know very well that I am speaking the truth, although you may laugh. But first tell me; if I come in shall we have the understanding of which I spoke (supra Will you have a very drunken man? etc.)? Will you drink with me or not?’

The company were vociferous in begging that he would take his place among them, and Agathon specially invited him. Thereupon he was led in by the people who were with him; and as he was being led, intending to crown Agathon, he took the ribands from his own head and held them in front of his eyes; he was thus prevented from seeing Socrates, who made way for him, and Alcibiades took the vacant place between Agathon and Socrates, and in taking the place he embraced Agathon and crowned him. Take off his sandals, said Agathon, and let him make a third on the same couch.

By all means; but who makes the third partner in our revels? said Alcibiades, turning round and starting up as he caught sight of Socrates. By Heracles, he said, what is this? here is Socrates always lying in wait for me, and always, as his way is, coming out at all sorts of unsuspected places: and now, what have you to say for yourself, and why are you lying here, where I perceive that you have contrived to find a place, not by a joker or lover of jokes, like Aristophanes, but by the fairest of the company?

Socrates turned to Agathon and said: I must ask you to protect me, Agathon; for the passion of this man has grown quite a serious matter to me. Since I became his admirer I have never been allowed to speak to any other fair one, or so much as to

look at them. If I do, he goes wild with envy and jealousy, and not only abuses me but can hardly keep his hands off me, and at this moment he may do me some harm. Please to see to this, and either reconcile me to him, or, if he attempts violence, protect me, as I am in bodily fear of his mad and passionate attempts.

There can never be reconciliation between you and me, said Alcibiades; but for the present I will defer your chastisement. And I must beg you, Agathon, to give me back some of the ribands that I may crown the marvellous head of this universal despot — I would not have him complain of me for crowning you, and neglecting him, who in conversation is the conqueror of all mankind; and this not only once, as you were the day before yesterday, but always. Whereupon, taking some of the ribands, he crowned Socrates, and again reclined.

Then he said: You seem, my friends, to be sober, which is a thing not to be endured; you must drink — for that was the agreement under which I was admitted — and I elect myself master of the feast until you are well drunk. Let us have a large goblet, Agathon, or rather, he said, addressing the attendant, bring me that wine-cooler. The wine-cooler which had caught his eye was a vessel holding more than two quarts — this he filled and emptied, and bade the attendant fill it again for Socrates. Observe, my friends, said Alcibiades, that this ingenious trick of mine will have no effect on Socrates, for he can drink any quantity of wine and not be at all nearer being drunk. Socrates drank the cup which the attendant filled for him.

Eryximachus said: What is this, Alcibiades? Are we to have neither conversation nor singing over our cups; but simply to drink as if we were thirsty?

Alcibiades replied: Hail, worthy son of a most wise and worthy sire!

The same to you, said Eryximachus; but what shall we do?

That I leave to you, said Alcibiades.

‘The wise physician skilled our wounds to heal (from Pope’s Homer, Il.)’

shall prescribe and we will obey. What do you want?

Well, said Eryximachus, before you appeared we had passed a resolution that each one of us in turn should make a speech in praise of love, and as good a one as he could: the turn was passed round from left to right; and as all of us have spoken, and you have not spoken but have well drunken, you ought to speak, and then impose upon Socrates any task which you please, and he on his right hand neighbour, and so on.

That is good, Eryximachus, said Alcibiades; and yet the comparison of a drunken man’s speech with those of sober men is hardly fair; and I should like to know, sweet friend, whether you really believe what Socrates was just now saying; for I can assure you that the very reverse is the fact, and that if I praise any one but himself in his presence, whether God or man, he will hardly keep his hands off me.

For shame, said Socrates.

Hold your tongue, said Alcibiades, for by Poseidon, there is no one else whom I will praise when you are of the company.

Well then, said Eryximachus, if you like praise Socrates.

What do you think, Eryximachus? said Alcibiades: shall I attack him and inflict the punishment before you all?

What are you about? said Socrates; are you going to raise a laugh at my expense? Is that the meaning of your praise?

I am going to speak the truth, if you will permit me.

I not only permit, but exhort you to speak the truth.

Then I will begin at once, said Alcibiades, and if I say anything which is not true, you may interrupt me if you will, and say ‘that is a lie,’ though my intention is to speak the truth. But you must not wonder if I speak any how as things come into my mind; for

the fluent and orderly enumeration of all your singularities is not a task which is easy to a man in my condition.

And now, my boys, I shall praise Socrates in a figure which will appear to him to be a caricature, and yet I speak, not to make fun of him, but only for the truth's sake. I say, that he is exactly like the busts of Silenus, which are set up in the statuaries' shops, holding pipes and flutes in their mouths; and they are made to open in the middle, and have images of gods inside them. I say also that he is like Marsyas the satyr. You yourself will not deny, Socrates, that your face is like that of a satyr. Aye, and there is a resemblance in other points too. For example, you are a bully, as I can prove by witnesses, if you will not confess. And are you not a flute-player? That you are, and a performer far more wonderful than Marsyas. He indeed with instruments used to charm the souls of men by the power of his breath, and the players of his music do so still: for the melodies of Olympus (compare Arist. Pol.) are derived from Marsyas who taught them, and these, whether they are played by a great master or by a miserable flute-girl, have a power which no others have; they alone possess the soul and reveal the wants of those who have need of gods and mysteries, because they are divine. But you produce the same effect with your words only, and do not require the flute: that is the difference between you and him. When we hear any other speaker, even a very good one, he produces absolutely no effect upon us, or not much, whereas the mere fragments of you and your words, even at second-hand, and however imperfectly repeated, amaze and possess the souls of every man, woman, and child who comes within hearing of them. And if I were not afraid that you would think me hopelessly drunk, I would have sworn as well as spoken to the influence which they have always had and still have over me. For my heart leaps within me more than that of any Corybantian reveller, and my eyes rain tears when I hear them. And I observe that many others are affected in the same manner. I have heard Pericles and other great orators, and I thought that they spoke

well, but I never had any similar feeling; my soul was not stirred by them, nor was I angry at the thought of my own slavish state. But this Marsyas has often brought me to such a pass, that I have felt as if I could hardly endure the life which I am leading (this, Socrates, you will admit); and I am conscious that if I did not shut my ears against him, and fly as from the voice of the siren, my fate would be like that of others, — he would transfix me, and I should grow old sitting at his feet. For he makes me confess that I ought not to live as I do, neglecting the wants of my own soul, and busying myself with the concerns of the Athenians; therefore I hold my ears and tear myself away from him. And he is the only person who ever made me ashamed, which you might think not to be in my nature, and there is no one else who does the same. For I know that I cannot answer him or say that I ought not to do as he bids, but when I leave his presence the love of popularity gets the better of me. And therefore I run away and fly from him, and when I see him I am ashamed of what I have confessed to him. Many a time have I wished that he were dead, and yet I know that I should be much more sorry than glad, if he were to die: so that I am at my wit's end.

And this is what I and many others have suffered from the flute-playing of this satyr. Yet hear me once more while I show you how exact the image is, and how marvellous his power. For let me tell you; none of you know him; but I will reveal him to you; having begun, I must go on. See you how fond he is of the fair? He is always with them and is always being smitten by them, and then again he knows nothing and is ignorant of all things — such is the appearance which he puts on. Is he not like a Silenus in this? To be sure he is: his outer mask is the carved head of the Silenus; but, O my companions in drink, when he is opened, what temperance there is residing within! Know you that beauty and wealth and honour, at which the many wonder, are of no account with him, and are utterly despised by him: he regards not at all the persons who are gifted with them;

mankind are nothing to him; all his life is spent in mocking and flouting at them. But when I opened him, and looked within at his serious purpose, I saw in him divine and golden images of such fascinating beauty that I was ready to do in a moment whatever Socrates commanded: they may have escaped the observation of others, but I saw them. Now I fancied that he was seriously enamoured of my beauty, and I thought that I should therefore have a grand opportunity of hearing him tell what he knew, for I had a wonderful opinion of the attractions of my youth. In the prosecution of this design, when I next went to him, I sent away the attendant who usually accompanied me (I will confess the whole truth, and beg you to listen; and if I speak falsely, do you, Socrates, expose the falsehood). Well, he and I were alone together, and I thought that when there was nobody with us, I should hear him speak the language which lovers use to their loves when they are by themselves, and I was delighted. Nothing of the sort; he conversed as usual, and spent the day with me and then went away. Afterwards I challenged him to the palaestra; and he wrestled and closed with me several times when there was no one present; I fancied that I might succeed in this manner. Not a bit; I made no way with him. Lastly, as I had failed hitherto, I thought that I must take stronger measures and attack him boldly, and, as I had begun, not give him up, but see how matters stood between him and me. So I invited him to sup with me, just as if he were a fair youth, and I a designing lover. He was not easily persuaded to come; he did, however, after a while accept the invitation, and when he came the first time, he wanted to go away at once as soon as supper was over, and I had not the face to detain him. The second time, still in pursuance of my design, after we had supped, I went on conversing far into the night, and when he wanted to go away, I pretended that the hour was late and that he had much better remain. So he lay down on the couch next to me, the same on which he had supped, and there was no one but ourselves sleeping in the apartment. All this may be told without shame to

any one. But what follows I could hardly tell you if I were sober. Yet as the proverb says, ‘In vino veritas,’ whether with boys, or without them (In allusion to two proverbs.); and therefore I must speak. Nor, again, should I be justified in concealing the lofty actions of Socrates when I come to praise him. Moreover I have felt the serpent’s sting; and he who has suffered, as they say, is willing to tell his fellow-sufferers only, as they alone will be likely to understand him, and will not be extreme in judging of the sayings or doings which have been wrung from his agony. For I have been bitten by a more than viper’s tooth; I have known in my soul, or in my heart, or in some other part, that worst of pangs, more violent in ingenuous youth than any serpent’s tooth, the pang of philosophy, which will make a man say or do anything. And you whom I see around me, Phaedrus and Agathon and Eryximachus and Pausanias and Aristodemus and Aristophanes, all of you, and I need not say Socrates himself, have had experience of the same madness and passion in your longing after wisdom. Therefore listen and excuse my doings then and my sayings now. But let the attendants and other profane and unmannered persons close up the doors of their ears.

When the lamp was put out and the servants had gone away, I thought that I must be plain with him and have no more ambiguity. So I gave him a shake, and I said: ‘Socrates, are you asleep?’ ‘No,’ he said. ‘Do you know what I am meditating? ‘What are you meditating?’ he said. ‘I think,’ I replied, ‘that of all the lovers whom I have ever had you are the only one who is worthy of me, and you appear to be too modest to speak. Now I feel that I should be a fool to refuse you this or any other favour, and therefore I come to lay at your feet all that I have and all that my friends have, in the hope that you will assist me in the way of virtue, which I desire above all things, and in which I believe that you can help me better than any one else. And I should certainly have more reason to be ashamed of what wise men would say if I were to refuse a favour to such as you, than

of what the world, who are mostly fools, would say of me if I granted it.' To these words he replied in the ironical manner which is so characteristic of him:— 'Alcibiades, my friend, you have indeed an elevated aim if what you say is true, and if there really is in me any power by which you may become better; truly you must see in me some rare beauty of a kind infinitely higher than any which I see in you. And therefore, if you mean to share with me and to exchange beauty for beauty, you will have greatly the advantage of me; you will gain true beauty in return for appearance — like Diomede, gold in exchange for brass. But look again, sweet friend, and see whether you are not deceived in me. The mind begins to grow critical when the bodily eye fails, and it will be a long time before you get old.' Hearing this, I said: 'I have told you my purpose, which is quite serious, and do you consider what you think best for you and me.' 'That is good,' he said; 'at some other time then we will consider and act as seems best about this and about other matters.' Whereupon, I fancied that he was smitten, and that the words which I had uttered like arrows had wounded him, and so without waiting to hear more I got up, and throwing my coat about him crept under his threadbare cloak, as the time of year was winter, and there I lay during the whole night having this wonderful monster in my arms. This again, Socrates, will not be denied by you. And yet, notwithstanding all, he was so superior to my solicitations, so contemptuous and derisive and disdainful of my beauty — which really, as I fancied, had some attractions — hear, O judges; for judges you shall be of the haughty virtue of Socrates — nothing more happened, but in the morning when I awoke (let all the gods and goddesses be my witnesses) I arose as from the couch of a father or an elder brother.

What do you suppose must have been my feelings, after this rejection, at the thought of my own dishonour? And yet I could not help wondering at his natural temperance and self-restraint and manliness. I never imagined that I could have met with a man such as he is in wisdom and endurance. And therefore I

could not be angry with him or renounce his company, any more than I could hope to win him. For I well knew that if Ajax could not be wounded by steel, much less he by money; and my only chance of captivating him by my personal attractions had failed. So I was at my wit's end; no one was ever more hopelessly enslaved by another. All this happened before he and I went on the expedition to Potidaea; there we messed together, and I had the opportunity of observing his extraordinary power of sustaining fatigue. His endurance was simply marvellous when, being cut off from our supplies, we were compelled to go without food — on such occasions, which often happen in time of war, he was superior not only to me but to everybody; there was no one to be compared to him. Yet at a festival he was the only person who had any real powers of enjoyment; though not willing to drink, he could if compelled beat us all at that, — wonderful to relate! no human being had ever seen Socrates drunk; and his powers, if I am not mistaken, will be tested before long. His fortitude in enduring cold was also surprising. There was a severe frost, for the winter in that region is really tremendous, and everybody else either remained indoors, or if they went out had on an amazing quantity of clothes, and were well shod, and had their feet swathed in felt and fleeces: in the midst of this, Socrates with his bare feet on the ice and in his ordinary dress marched better than the other soldiers who had shoes, and they looked daggers at him because he seemed to despise them.

I have told you one tale, and now I must tell you another, which is worth hearing,

'Of the doings and sufferings of the enduring man'

while he was on the expedition. One morning he was thinking about something which he could not resolve; he would not give it up, but continued thinking from early dawn until noon — there he stood fixed in thought; and at noon attention was drawn to him, and the rumour ran through the wondering crowd that

Socrates had been standing and thinking about something ever since the break of day. At last, in the evening after supper, some Ionians out of curiosity (I should explain that this was not in winter but in summer), brought out their mats and slept in the open air that they might watch him and see whether he would stand all night. There he stood until the following morning; and with the return of light he offered up a prayer to the sun, and went his way (compare supra). I will also tell, if you please — and indeed I am bound to tell — of his courage in battle; for who but he saved my life? Now this was the engagement in which I received the prize of valour: for I was wounded and he would not leave me, but he rescued me and my arms; and he ought to have received the prize of valour which the generals wanted to confer on me partly on account of my rank, and I told them so, (this, again, Socrates will not impeach or deny), but he was more eager than the generals that I and not he should have the prize. There was another occasion on which his behaviour was very remarkable — in the flight of the army after the battle of Delium, where he served among the heavy-armed, — I had a better opportunity of seeing him than at Potidaea, for I was myself on horseback, and therefore comparatively out of danger. He and Laches were retreating, for the troops were in flight, and I met them and told them not to be discouraged, and promised to remain with them; and there you might see him, Aristophanes, as you describe (Aristoph. Clouds), just as he is in the streets of Athens, stalking like a pelican, and rolling his eyes, calmly contemplating enemies as well as friends, and making very intelligible to anybody, even from a distance, that whoever attacked him would be likely to meet with a stout resistance; and in this way he and his companion escaped — for this is the sort of man who is never touched in war; those only are pursued who are running away headlong. I particularly observed how superior he was to Laches in presence of mind. Many are the marvels which I might narrate in praise of Socrates; most of his ways might perhaps be paralleled in

another man, but his absolute unlikeness to any human being that is or ever has been is perfectly astonishing. You may imagine Brasidas and others to have been like Achilles; or you may imagine Nestor and Antenor to have been like Pericles; and the same may be said of other famous men, but of this strange being you will never be able to find any likeness, however remote, either among men who now are or who ever have been — other than that which I have already suggested of Silenus and the satyrs; and they represent in a figure not only himself, but his words. For, although I forgot to mention this to you before, his words are like the images of Silenus which open; they are ridiculous when you first hear them; he clothes himself in language that is like the skin of the wanton satyr — for his talk is of pack-asses and smiths and cobblers and curriers, and he is always repeating the same things in the same words (compare Gorg.), so that any ignorant or inexperienced person might feel disposed to laugh at him; but he who opens the bust and sees what is within will find that they are the only words which have a meaning in them, and also the most divine, abounding in fair images of virtue, and of the widest comprehension, or rather extending to the whole duty of a good and honourable man.

This, friends, is my praise of Socrates. I have added my blame of him for his ill-treatment of me; and he has ill-treated not only me, but Charmides the son of Glaucon, and Euthydemus the son of Diocles, and many others in the same way — beginning as their lover he has ended by making them pay their addresses to him. Wherefore I say to you, Agathon, ‘Be not deceived by him; learn from me and take warning, and do not be a fool and learn by experience, as the proverb says.’

When Alcibiades had finished, there was a laugh at his outspokenness; for he seemed to be still in love with Socrates. You are sober, Alcibiades, said Socrates, or you would never have gone so far about to hide the purpose of your satyr’s praises, for all this long story is only an ingenious

circumlocution, of which the point comes in by the way at the end; you want to get up a quarrel between me and Agathon, and your notion is that I ought to love you and nobody else, and that you and you only ought to love Agathon. But the plot of this Satyric or Silenic drama has been detected, and you must not allow him, Agathon, to set us at variance.

I believe you are right, said Agathon, and I am disposed to think that his intention in placing himself between you and me was only to divide us; but he shall gain nothing by that move; for I will go and lie on the couch next to you.

Yes, yes, replied Socrates, by all means come here and lie on the couch below me.

Alas, said Alcibiades, how I am fooled by this man; he is determined to get the better of me at every turn. I do beseech you, allow Agathon to lie between us.

Certainly not, said Socrates, as you praised me, and I in turn ought to praise my neighbour on the right, he will be out of order in praising me again when he ought rather to be praised by me, and I must entreat you to consent to this, and not be jealous, for I have a great desire to praise the youth.

Hurrah! cried Agathon, I will rise instantly, that I may be praised by Socrates.

The usual way, said Alcibiades; where Socrates is, no one else has any chance with the fair; and now how readily has he invented a specious reason for attracting Agathon to himself.

Agathon arose in order that he might take his place on the couch by Socrates, when suddenly a band of revellers entered, and spoiled the order of the banquet. Some one who was going out having left the door open, they had found their way in, and made themselves at home; great confusion ensued, and every one was compelled to drink large quantities of wine. Aristodemus said that Eryximachus, Phaedrus, and others went away — he himself fell asleep, and as the nights were long took

a good rest: he was awakened towards daybreak by a crowing of cocks, and when he awoke, the others were either asleep, or had gone away; there remained only Socrates, Aristophanes, and Agathon, who were drinking out of a large goblet which they passed round, and Socrates was discoursing to them. Aristodemus was only half awake, and he did not hear the beginning of the discourse; the chief thing which he remembered was Socrates compelling the other two to acknowledge that the genius of comedy was the same with that of tragedy, and that the true artist in tragedy was an artist in comedy also. To this they were constrained to assent, being drowsy, and not quite following the argument. And first of all Aristophanes dropped off, then, when the day was already dawning, Agathon. Socrates, having laid them to sleep, rose to depart; Aristodemus, as his manner was, following him. At the Lyceum he took a bath, and passed the day as usual. In the evening he retired to rest at his own home.

Theaetetus

ΘΕΑΙΤΗΤΟΣ

Euclid and Terpsion meet in front of Euclid's house in Megara; they enter the house, and the dialogue is read to them by a servant.

Euclid: Have you only just arrived from the country, Terpsion?

Terpsion: No, I came some time ago: and I have been in the Agora looking for you, and wondering that I could not find you.

Euclid: But I was not in the city.

Terpsion: Where then?

Euclid: As I was going down to the harbour, I met Theaetetus — he was being carried up to Athens from the army at Corinth.

Terpsion: Was he alive or dead?

Euclid: He was scarcely alive, for he has been badly wounded; but he was suffering even more from the sickness which has broken out in the army.

Terpsion: The dysentery, you mean?

Euclid: Yes.

Terpsion: Alas! what a loss he will be!

Euclid: Yes, Terpsion, he is a noble fellow; only to-day I heard some people highly praising his behaviour in this very battle.

Terpsion: No wonder; I should rather be surprised at hearing anything else of him. But why did he go on, instead of stopping at Megara?

Euclid: He wanted to get home: although I entreated and advised him to remain, he would not listen to me; so I set him on his way, and turned back, and then I remembered what Socrates had said of him, and thought how remarkably this, like all his predictions, had been fulfilled. I believe that he had seen him a little before his own death, when Theaetetus was a youth, and he had a memorable conversation with him, which he repeated to me when I came to Athens; he was full of admiration of his genius, and said that he would most certainly be a great man, if he lived.

Terpsion: The prophecy has certainly been fulfilled; but what was the conversation? can you tell me?

Euclid: No, indeed, not offhand; but I took notes of it as soon as I got home; these I filled up from memory, writing them out at leisure; and whenever I went to Athens, I asked Socrates about any point which I had forgotten, and on my return I made corrections; thus I have nearly the whole conversation written down.

Terpsion: I remember — you told me; and I have always been intending to ask you to show me the writing, but have put off doing so; and now, why should we not read it through? — having just come from the country, I should greatly like to rest.

Euclid: I too shall be very glad of a rest, for I went with Theaetetus as far as Erineum. Let us go in, then, and, while we are reposing, the servant shall read to us.

Terpsion: Very good.

Euclid: Here is the roll, Terpsion; I may observe that I have introduced Socrates, not as narrating to me, but as actually conversing with the persons whom he mentioned — these were, Theodorus the geometrician (of Cyrene), and Theaetetus. I have omitted, for the sake of convenience, the interlocutory words ‘I said,’ ‘I remarked,’ which he used when he spoke of himself, and again, ‘he agreed,’ or ‘disagreed,’ in the answer, lest the

repetition of them should be troublesome.

Terpsion: Quite right, Euclid.

Euclid: And now, boy, you may take the roll and read.

Euclid's servant reads.

Socrates: If I cared enough about the Cyrenians, Theodorus, I would ask you whether there are any rising geometricians or philosophers in that part of the world. But I am more interested in our own Athenian youth, and I would rather know who among them are likely to do well. I observe them as far as I can myself, and I enquire of any one whom they follow, and I see that a great many of them follow you, in which they are quite right, considering your eminence in geometry and in other ways. Tell me then, if you have met with any one who is good for anything.

Theodorus: Yes, Socrates, I have become acquainted with one very remarkable Athenian youth, whom I commend to you as well worthy of your attention. If he had been a beauty I should have been afraid to praise him, lest you should suppose that I was in love with him; but he is no beauty, and you must not be offended if I say that he is very like you; for he has a snub nose and projecting eyes, although these features are less marked in him than in you. Seeing, then, that he has no personal attractions, I may freely say, that in all my acquaintance, which is very large, I never knew any one who was his equal in natural gifts: for he has a quickness of apprehension which is almost unrivalled, and he is exceedingly gentle, and also the most courageous of men; there is a union of qualities in him such as I have never seen in any other, and should scarcely have thought possible; for those who, like him, have quick and ready and retentive wits, have generally also quick tempers; they are ships without ballast, and go darting about, and are mad rather than courageous; and the steadier sort, when they have to face study, prove stupid and cannot remember. Whereas he moves surely and smoothly and successfully in the path of knowledge and

enquiry; and he is full of gentleness, flowing on silently like a river of oil; at his age, it is wonderful.

Socrates: That is good news; whose son is he?

Theodorus: The name of his father I have forgotten, but the youth himself is the middle one of those who are approaching us; he and his companions have been anointing themselves in the outer court, and now they seem to have finished, and are coming towards us. Look and see whether you know him.

Socrates: I know the youth, but I do not know his name; he is the son of Euphronius the Sunian, who was himself an eminent man, and such another as his son is, according to your account of him; I believe that he left a considerable fortune.

Theodorus: Theaetetus, Socrates, is his name; but I rather think that the property disappeared in the hands of trustees; notwithstanding which he is wonderfully liberal.

Socrates: He must be a fine fellow; tell him to come and sit by me.

Theodorus: I will. Come hither, Theaetetus, and sit by Socrates.

Socrates: By all means, Theaetetus, in order that I may see the reflection of myself in your face, for Theodorus says that we are alike; and yet if each of us held in his hands a lyre, and he said that they were tuned alike, should we at once take his word, or should we ask whether he who said so was or was not a musician?

Theaetetus: We should ask.

Socrates: And if we found that he was, we should take his word; and if not, not?

Theaetetus: True.

Socrates: And if this supposed likeness of our faces is a matter of any interest to us, we should enquire whether he who says that we are alike is a painter or not?

Theaetetus: Certainly we should.

Socrates: And is Theodorus a painter?

Theaetetus: I never heard that he was.

Socrates: Is he a geometrician?

Theaetetus: Of course he is, Socrates.

Socrates: And is he an astronomer and calculator and musician, and in general an educated man?

Theaetetus: I think so.

Socrates: If, then, he remarks on a similarity in our persons, either by way of praise or blame, there is no particular reason why we should attend to him.

Theaetetus: I should say not.

Socrates: But if he praises the virtue or wisdom which are the mental endowments of either of us, then he who hears the praises will naturally desire to examine him who is praised: and he again should be willing to exhibit himself.

Theaetetus: Very true, Socrates.

Socrates: Then now is the time, my dear Theaetetus, for me to examine, and for you to exhibit; since although Theodorus has praised many a citizen and stranger in my hearing, never did I hear him praise any one as he has been praising you.

Theaetetus: I am glad to hear it, Socrates; but what if he was only in jest?

Socrates: Nay, Theodorus is not given to jesting; and I cannot allow you to retract your consent on any such pretence as that. If you do, he will have to swear to his words; and we are perfectly sure that no one will be found to impugn him. Do not be shy then, but stand to your word.

Theaetetus: I suppose I must, if you wish it.

Socrates: In the first place, I should like to ask what you learn of Theodorus: something of geometry, perhaps?

Theaetetus: Yes.

Socrates: And astronomy and harmony and calculation?

Theaetetus: I do my best.

Socrates: Yes, my boy, and so do I; and my desire is to learn of him, or of anybody who seems to understand these things. And I get on pretty well in general; but there is a little difficulty which I want you and the company to aid me in investigating. Will you answer me a question: 'Is not learning growing wiser about that which you learn?'

Theaetetus: Of course.

Socrates: And by wisdom the wise are wise?

Theaetetus: Yes.

Socrates: And is that different in any way from knowledge?

Theaetetus: What?

Socrates: Wisdom; are not men wise in that which they know?

Theaetetus: Certainly they are.

Socrates: Then wisdom and knowledge are the same?

Theaetetus: Yes.

Socrates: Herein lies the difficulty which I can never solve to my satisfaction — What is knowledge? Can we answer that question? What say you? which of us will speak first? whoever misses shall sit down, as at a game of ball, and shall be donkey, as the boys say; he who lasts out his competitors in the game without missing, shall be our king, and shall have the right of putting to us any questions which he pleases...Why is there no reply? I hope, Theodorus, that I am not betrayed into rudeness by my love of conversation? I only want to make us talk and be friendly and sociable.

Theodorus: The reverse of rudeness, Socrates: but I would rather that you would ask one of the young fellows; for the truth is, that I am unused to your game of question and answer, and I am too old to learn; the young will be more suitable, and they will improve more than I shall, for youth is always able to improve. And so having made a beginning with Theaetetus, I would advise you to go on with him and not let him off.

Socrates: Do you hear, Theaetetus, what Theodorus says? The philosopher, whom you would not like to disobey, and whose word ought to be a command to a young man, bids me interrogate you. Take courage, then, and nobly say what you think that knowledge is.

Theaetetus: Well, Socrates, I will answer as you and he bid me; and if I make a mistake, you will doubtless correct me.

Socrates: We will, if we can.

Theaetetus: Then, I think that the sciences which I learn from Theodorus — geometry, and those which you just now mentioned — are knowledge; and I would include the art of the cobbler and other craftsmen; these, each and all of, them, are knowledge.

Socrates: Too much, Theaetetus, too much; the nobility and liberality of your nature make you give many and diverse things, when I am asking for one simple thing.

Theaetetus: What do you mean, Socrates?

Socrates: Perhaps nothing. I will endeavour, however, to explain what I believe to be my meaning: When you speak of cobbling, you mean the art or science of making shoes?

Theaetetus: Just so.

Socrates: And when you speak of carpentering, you mean the art of making wooden implements?

Theaetetus: I do.

Socrates: In both cases you define the subject matter of each of the two arts?

Theaetetus: True.

Socrates: But that, Theaetetus, was not the point of my question: we wanted to know not the subjects, nor yet the number of the arts or sciences, for we were not going to count them, but we wanted to know the nature of knowledge in the abstract. Am I not right?

Theaetetus: Perfectly right.

Socrates: Let me offer an illustration: Suppose that a person were to ask about some very trivial and obvious thing — for example, What is clay? and we were to reply, that there is a clay of potters, there is a clay of oven-makers, there is a clay of brick-makers; would not the answer be ridiculous?

Theaetetus: Truly.

Socrates: In the first place, there would be an absurdity in assuming that he who asked the question would understand from our answer the nature of ‘clay,’ merely because we added ‘of the image-makers,’ or of any other workers. How can a man understand the name of anything, when he does not know the nature of it?

Theaetetus: He cannot.

Socrates: Then he who does not know what science or knowledge is, has no knowledge of the art or science of making shoes?

Theaetetus: None.

Socrates: Nor of any other science?

Theaetetus: No.

Socrates: And when a man is asked what science or knowledge is, to give in answer the name of some art or science is ridiculous; for the question is, ‘What is knowledge?’ and he

replies, ‘A knowledge of this or that.’

Theaetetus: True.

Socrates: Moreover, he might answer shortly and simply, but he makes an enormous circuit. For example, when asked about the clay, he might have said simply, that clay is moistened earth — what sort of clay is not to the point.

Theaetetus: Yes, Socrates, there is no difficulty as you put the question. You mean, if I am not mistaken, something like what occurred to me and to my friend here, your namesake Socrates, in a recent discussion.

Socrates: What was that, Theaetetus?

Theaetetus: Theodorus was writing out for us something about roots, such as the roots of three or five, showing that they are incommensurable by the unit: he selected other examples up to seventeen — there he stopped. Now as there are innumerable roots, the notion occurred to us of attempting to include them all under one name or class.

Socrates: And did you find such a class?

Theaetetus: I think that we did; but I should like to have your opinion.

Socrates: Let me hear.

Theaetetus: We divided all numbers into two classes: those which are made up of equal factors multiplying into one another, which we compared to square figures and called square or equilateral numbers; — that was one class.

Socrates: Very good.

Theaetetus: The intermediate numbers, such as three and five, and every other number which is made up of unequal factors, either of a greater multiplied by a less, or of a less multiplied by a greater, and when regarded as a figure, is contained in unequal sides; — all these we compared to oblong figures, and

called them oblong numbers.

Socrates: Capital; and what followed?

Theaetetus: The lines, or sides, which have for their squares the equilateral plane numbers, were called by us lengths or magnitudes; and the lines which are the roots of (or whose squares are equal to) the oblong numbers, were called powers or roots; the reason of this latter name being, that they are commensurable with the former [i.e., with the so-called lengths or magnitudes] not in linear measurement, but in the value of the superficial content of their squares; and the same about solids.

Socrates: Excellent, my boys; I think that you fully justify the praises of Theodorus, and that he will not be found guilty of false witness.

Theaetetus: But I am unable, Socrates, to give you a similar answer about knowledge, which is what you appear to want; and therefore Theodorus is a deceiver after all.

Socrates: Well, but if some one were to praise you for running, and to say that he never met your equal among boys, and afterwards you were beaten in a race by a grown-up man, who was a great runner — would the praise be any the less true?

Theaetetus: Certainly not.

Socrates: And is the discovery of the nature of knowledge so small a matter, as just now said? Is it not one which would task the powers of men perfect in every way?

Theaetetus: By heaven, they should be the top of all perfection!

Socrates: Well, then, be of good cheer; do not say that Theodorus was mistaken about you, but do your best to ascertain the true nature of knowledge, as well as of other things.

Theaetetus: I am eager enough, Socrates, if that would bring to light the truth.

Socrates: Come, you made a good beginning just now; let your own answer about roots be your model, and as you comprehended them all in one class, try and bring the many sorts of knowledge under one definition.

Theaetetus: I can assure you, Socrates, that I have tried very often, when the report of questions asked by you was brought to me; but I can neither persuade myself that I have a satisfactory answer to give, nor hear of any one who answers as you would have him; and I cannot shake off a feeling of anxiety.

Socrates: These are the pangs of labour, my dear Theaetetus; you have something within you which you are bringing to the birth.

Theaetetus: I do not know, Socrates; I only say what I feel.

Socrates: And have you never heard, simpleton, that I am the son of a midwife, brave and burly, whose name was Phaenarete?

Theaetetus: Yes, I have.

Socrates: And that I myself practise midwifery?

Theaetetus: No, never.

Socrates: Let me tell you that I do though, my friend: but you must not reveal the secret, as the world in general have not found me out; and therefore they only say of me, that I am the strangest of mortals and drive men to their wits' end. Did you ever hear that too?

Theaetetus: Yes.

Socrates: Shall I tell you the reason?

Theaetetus: By all means.

Socrates: Bear in mind the whole business of the midwives, and then you will see my meaning better: — No woman, as you are probably aware, who is still able to conceive and bear, attends other women, but only those who are past bearing.

Theaetetus: Yes, I know.

Socrates: The reason of this is said to be that Artemis — the goddess of childbirth — is not a mother, and she honours those who are like herself; but she could not allow the barren to be midwives, because human nature cannot know the mystery of an art without experience; and therefore she assigned this office to those who are too old to bear.

Theaetetus: I dare say.

Socrates: And I dare say too, or rather I am absolutely certain, that the midwives know better than others who is pregnant and who is not?

Theaetetus: Very true.

Socrates: And by the use of potions and incantations they are able to arouse the pangs and to soothe them at will; they can make those bear who have a difficulty in bearing, and if they think fit they can smother the embryo in the womb.

Theaetetus: They can.

Socrates: Did you ever remark that they are also most cunning matchmakers, and have a thorough knowledge of what unions are likely to produce a brave brood?

Theaetetus: No, never.

Socrates: Then let me tell you that this is their greatest pride, more than cutting the umbilical cord. And if you reflect, you will see that the same art which cultivates and gathers in the fruits of the earth, will be most likely to know in what soils the several plants or seeds should be deposited.

Theaetetus: Yes, the same art.

Socrates: And do you suppose that with women the case is otherwise?

Theaetetus: I should think not.

Socrates: Certainly not; but midwives are respectable women who have a character to lose, and they avoid this department of their profession, because they are afraid of being called procuresses, which is a name given to those who join together man and woman in an unlawful and unscientific way; and yet the true midwife is also the true and only matchmaker.

Theaetetus: Clearly.

Socrates: Such are the midwives, whose task is a very important one, but not so important as mine; for women do not bring into the world at one time real children, and at another time counterfeits which are with difficulty distinguished from them; if they did, then the discernment of the true and false birth would be the crowning achievement of the art of midwifery — you would think so?

Theaetetus: Indeed I should.

Socrates: Well, my art of midwifery is in most respects like theirs; but differs, in that I attend men and not women; and look after their souls when they are in labour, and not after their bodies: and the triumph of my art is in thoroughly examining whether the thought which the mind of the young man brings forth is a false idol or a noble and true birth. And like the midwives, I am barren, and the reproach which is often made against me, that I ask questions of others and have not the wit to answer them myself, is very just — the reason is, that the god compels me to be a midwife, but does not allow me to bring forth. And therefore I am not myself at all wise, nor have I anything to show which is the invention or birth of my own soul, but those who converse with me profit. Some of them appear dull enough at first, but afterwards, as our acquaintance ripens, if the god is gracious to them, they all make astonishing progress; and this in the opinion of others as well as in their own. It is quite dear that they never learned anything from me; the many fine discoveries to which they cling are of their own making. But to me and the god they owe their delivery. And the

proof of my words is, that many of them in their ignorance, either in their self-conceit despising me, or falling under the influence of others, have gone away too soon; and have not only lost the children of whom I had previously delivered them by an ill bringing up, but have stifled whatever else they had in them by evil communications, being fonder of lies and shams than of the truth; and they have at last ended by seeing themselves, as others see them, to be great fools. Aristeides, the son of Lysimachus, is one of them, and there are many others. The truants often return to me, and beg that I would consort with them again — they are ready to go to me on their knees — and then, if my familiar allows, which is not always the case, I receive them, and they begin to grow again. Dire are the pangs which my art is able to arouse and to allay in those who consort with me, just like the pangs of women in childbirth; night and day they are full of perplexity and travail which is even worse than that of the women. So much for them. And there are others, Theaetetus, who come to me apparently having nothing in them; and as I know that they have no need of my art, I coax them into marrying some one, and by the grace of God I can generally tell who is likely to do them good. Many of them I have given away to Prodicus, and many to other inspired sages. I tell you this long story, friend Theaetetus, because I suspect, as indeed you seem to think yourself, that you are in labour — great with some conception. Come then to me, who am a midwife's son and myself a midwife, and do your best to answer the questions which I will ask you. And if I abstract and expose your first-born, because I discover upon inspection that the conception which you have formed is a vain shadow, do not quarrel with me on that account, as the manner of women is when their first children are taken from them. For I have actually known some who were ready to bite me when I deprived them of a darling folly; they did not perceive that I acted from goodwill, not knowing that no god is the enemy of man — that was not within the range of their ideas; neither am I

their enemy in all this, but it would be wrong for me to admit falsehood, or to stifle the truth. Once more, then, Theaetetus, I repeat my old question, 'What is knowledge?' — and do not say that you cannot tell; but quit yourself like a man, and by the help of God you will be able to tell.

Theaetetus: At any rate, Socrates, after such an exhortation I should be ashamed of not trying to do my best. Now he who knows perceives what he knows, and, as far as I can see at present, knowledge is perception.

Socrates: Bravely said, boy; that is the way in which you should express your opinion. And now, let us examine together this conception of yours, and see whether it is a true birth or a mere wind-egg: — You say that knowledge is perception?

Theaetetus: Yes.

Socrates: Well, you have delivered yourself of a very important doctrine about knowledge; it is indeed the opinion of Protagoras, who has another way of expressing it. Man, he says, is the measure of all things, of the existence of things that are, and of the non-existence of things that are not: — You have read him?

Theaetetus: O yes, again and again.

Socrates: Does he not say that things are to you such as they appear to you, and to me such as they appear to me, and that you and I are men?

Theaetetus: Yes, he says so.

Socrates: A wise man is not likely to talk nonsense. Let us try to understand him: the same wind is blowing, and yet one of us may be cold and the other not, or one may be slightly and the other very cold?

Theaetetus: Quite true.

Socrates: Now is the wind, regarded not in relation to us but absolutely, cold or not; or are we to say, with Protagoras, that

the wind is cold to him who is cold, and not to him who is not?

Theaetetus: I suppose the last.

Socrates: Then it must appear so to each of them?

Theaetetus: Yes.

Socrates: And ‘appears to him’ means the same as ‘he perceives.’

Theaetetus: True.

Socrates: Then appearing and perceiving coincide in the case of hot and cold, and in similar instances; for things appear, or may be supposed to be, to each one such as he perceives them?

Theaetetus: Yes.

Socrates: Then perception is always of existence, and being the same as knowledge is unerring?

Theaetetus: Clearly.

Socrates: In the name of the Graces, what an almighty wise man Protagoras must have been! He spoke these things in a parable to the common herd, like you and me, but told the truth, ‘his Truth,’ (In allusion to a book of Protagoras’ which bore this title.) in secret to his own disciples.

Theaetetus: What do you mean, Socrates?

Socrates: I am about to speak of a high argument, in which all things are said to be relative; you cannot rightly call anything by any name, such as great or small, heavy or light, for the great will be small and the heavy light — there is no single thing or quality, but out of motion and change and admixture all things are becoming relatively to one another, which ‘becoming’ is by us incorrectly called being, but is really becoming, for nothing ever is, but all things are becoming. Summon all philosophers — Protagoras, Heracleitus, Empedocles, and the rest of them, one after another, and with the exception of Parmenides they will agree with you in this. Summon the great masters of either kind

of poetry — Epicharmus, the prince of Comedy, and Homer of Tragedy; when the latter sings of

‘Ocean whence sprang the gods, and mother Tethys,’

does he not mean that all things are the offspring, of flux and motion?

Theaetetus: I think so.

Socrates: And who could take up arms against such a great army having Homer for its general, and not appear ridiculous? (Compare Cratylus.)

Theaetetus: Who indeed, Socrates?

Socrates: Yes, Theaetetus; and there are plenty of other proofs which will show that motion is the source of what is called being and becoming, and inactivity of not-being and destruction; for fire and warmth, which are supposed to be the parent and guardian of all other things, are born of movement and of friction, which is a kind of motion; — is not this the origin of fire?

Theaetetus: It is.

Socrates: And the race of animals is generated in the same way?

Theaetetus: Certainly.

Socrates: And is not the bodily habit spoiled by rest and idleness, but preserved for a long time by motion and exercise?

Theaetetus: True.

Socrates: And what of the mental habit? Is not the soul informed, and improved, and preserved by study and attention, which are motions; but when at rest, which in the soul only means want of attention and study, is uninformed, and speedily forgets whatever she has learned?

Theaetetus: True.

Socrates: Then motion is a good, and rest an evil, to the soul as well as to the body?

Theaetetus: Clearly.

Socrates: I may add, that breathless calm, stillness and the like waste and impair, while wind and storm preserve; and the palmary argument of all, which I strongly urge, is the golden chain in Homer, by which he means the sun, thereby indicating that so long as the sun and the heavens go round in their orbits, all things human and divine are and are preserved, but if they were chained up and their motions ceased, then all things would be destroyed, and, as the saying is, turned upside down.

Theaetetus: I believe, Socrates, that you have truly explained his meaning.

Socrates: Then now apply his doctrine to perception, my good friend, and first of all to vision; that which you call white colour is not in your eyes, and is not a distinct thing which exists out of them. And you must not assign any place to it: for if it had position it would be, and be at rest, and there would be no process of becoming.

Theaetetus: Then what is colour?

Socrates: Let us carry the principle which has just been affirmed, that nothing is self-existent, and then we shall see that white, black, and every other colour, arises out of the eye meeting the appropriate motion, and that what we call a colour is in each case neither the active nor the passive element, but something which passes between them, and is peculiar to each percipient; are you quite certain that the several colours appear to a dog or to any animal whatever as they appear to you?

Theaetetus: Far from it.

Socrates: Or that anything appears the same to you as to another man? Are you so profoundly convinced of this? Rather would it not be true that it never appears exactly the same to

you, because you are never exactly the same?

Theaetetus: The latter.

Socrates: And if that with which I compare myself in size, or which I apprehend by touch, were great or white or hot, it could not become different by mere contact with another unless it actually changed; nor again, if the comparing or apprehending subject were great or white or hot, could this, when unchanged from within, become changed by any approximation or affection of any other thing. The fact is that in our ordinary way of speaking we allow ourselves to be driven into most ridiculous and wonderful contradictions, as Protagoras and all who take his line of argument would remark.

Theaetetus: How? and of what sort do you mean?

Socrates: A little instance will sufficiently explain my meaning: Here are six dice, which are more by a half when compared with four, and fewer by a half than twelve — they are more and also fewer. How can you or any one maintain the contrary?

Theaetetus: Very true.

Socrates: Well, then, suppose that Protagoras or some one asks whether anything can become greater or more if not by increasing, how would you answer him, Theaetetus?

Theaetetus: I should say ‘No,’ Socrates, if I were to speak my mind in reference to this last question, and if I were not afraid of contradicting my former answer.

Socrates: Capital! excellent! spoken like an oracle, my boy! And if you reply ‘Yes,’ there will be a case for Euripides; for our tongue will be unconvinced, but not our mind. (In allusion to the well-known line of Euripides, Hippol.: e gloss omomoch e de thren anomotos.)

Theaetetus: Very true.

Socrates: The thoroughbred Sophists, who know all that can be known about the mind, and argue only out of the superfluity of

their wits, would have had a regular sparring-match over this, and would have knocked their arguments together finely. But you and I, who have no professional aims, only desire to see what is the mutual relation of these principles, — whether they are consistent with each or not.

Theaetetus: Yes, that would be my desire.

Socrates: And mine too. But since this is our feeling, and there is plenty of time, why should we not calmly and patiently review our own thoughts, and thoroughly examine and see what these appearances in us really are? If I am not mistaken, they will be described by us as follows: — first, that nothing can become greater or less, either in number or magnitude, while remaining equal to itself — you would agree?

Theaetetus: Yes.

Socrates: Secondly, that without addition or subtraction there is no increase or diminution of anything, but only equality.

Theaetetus: Quite true.

Socrates: Thirdly, that what was not before cannot be afterwards, without becoming and having become.

Theaetetus: Yes, truly.

Socrates: These three axioms, if I am not mistaken, are fighting with one another in our minds in the case of the dice, or, again, in such a case as this — if I were to say that I, who am of a certain height and taller than you, may within a year, without gaining or losing in height, be not so tall — not that I should have lost, but that you would have increased. In such a case, I am afterwards what I once was not, and yet I have not become; for I could not have become without becoming, neither could I have become less without losing somewhat of my height; and I could give you ten thousand examples of similar contradictions, if we admit them at all. I believe that you follow me, Theaetetus; for I suspect that you have thought of these questions before

now.

Theaetetus: Yes, Socrates, and I am amazed when I think of them; by the Gods I am! and I want to know what on earth they mean; and there are times when my head quite swims with the contemplation of them.

Socrates: I see, my dear Theaetetus, that Theodorus had a true insight into your nature when he said that you were a philosopher, for wonder is the feeling of a philosopher, and philosophy begins in wonder. He was not a bad genealogist who said that Iris (the messenger of heaven) is the child of Thaumas (wonder). But do you begin to see what is the explanation of this perplexity on the hypothesis which we attribute to Protagoras?

Theaetetus: Not as yet.

Socrates: Then you will be obliged to me if I help you to unearth the hidden ‘truth’ of a famous man or school.

Theaetetus: To be sure, I shall be very much obliged.

Socrates: Take a look round, then, and see that none of the uninitiated are listening. Now by the uninitiated I mean the people who believe in nothing but what they can grasp in their hands, and who will not allow that action or generation or anything invisible can have real existence.

Theaetetus: Yes, indeed, Socrates, they are very hard and impenetrable mortals.

Socrates: Yes, my boy, outer barbarians. Far more ingenious are the brethren whose mysteries I am about to reveal to you. Their first principle is, that all is motion, and upon this all the affections of which we were just now speaking are supposed to depend: there is nothing but motion, which has two forms, one active and the other passive, both in endless number; and out of the union and friction of them there is generated a progeny endless in number, having two forms, sense and the object of sense, which are ever breaking forth and coming to the birth at

the same moment. The senses are variously named hearing, seeing, smelling; there is the sense of heat, cold, pleasure, pain, desire, fear, and many more which have names, as well as innumerable others which are without them; each has its kindred object, — each variety of colour has a corresponding variety of sight, and so with sound and hearing, and with the rest of the senses and the objects akin to them. Do you see, Theaetetus, the bearings of this tale on the preceding argument?

Theaetetus: Indeed I do not.

Socrates: Then attend, and I will try to finish the story. The purport is that all these things are in motion, as I was saying, and that this motion is of two kinds, a slower and a quicker; and the slower elements have their motions in the same place and with reference to things near them, and so they beget; but what is begotten is swifter, for it is carried to fro, and moves from place to place. Apply this to sense: — When the eye and the appropriate object meet together and give birth to whiteness and the sensation connatural with it, which could not have been given by either of them going elsewhere, then, while the sight is flowing from the eye, whiteness proceeds from the object which combines in producing the colour; and so the eye is fulfilled with sight, and really sees, and becomes, not sight, but a seeing eye; and the object which combined to form the colour is fulfilled with whiteness, and becomes not whiteness but a white thing, whether wood or stone or whatever the object may be which happens to be coloured white. And this is true of all sensible objects, hard, warm, and the like, which are similarly to be regarded, as I was saying before, not as having any absolute existence, but as being all of them of whatever kind generated by motion in their intercourse with one another; for of the agent and patient, as existing in separation, no trustworthy conception, as they say, can be formed, for the agent has no existence until united with the patient, and the patient has no

existence until united with the agent; and that which by uniting with something becomes an agent, by meeting with some other thing is converted into a patient. And from all these considerations, as I said at first, there arises a general reflection, that there is no one self-existent thing, but everything is becoming and in relation; and being must be altogether abolished, although from habit and ignorance we are compelled even in this discussion to retain the use of the term. But great philosophers tell us that we are not to allow either the word ‘something,’ or ‘belonging to something,’ or ‘to me,’ or ‘this,’ or ‘that,’ or any other detaining name to be used, in the language of nature all things are being created and destroyed, coming into being and passing into new forms; nor can any name fix or detain them; he who attempts to fix them is easily refuted. And this should be the way of speaking, not only of particulars but of aggregates; such aggregates as are expressed in the word ‘man,’ or ‘stone,’ or any name of an animal or of a class. O Theaetetus, are not these speculations sweet as honey? And do you not like the taste of them in the mouth?

Theaetetus: I do not know what to say, Socrates; for, indeed, I cannot make out whether you are giving your own opinion or only wanting to draw me out.

Socrates: You forget, my friend, that I neither know, nor profess to know, anything of these matters; you are the person who is in labour, I am the barren midwife; and this is why I soothe you, and offer you one good thing after another, that you may taste them. And I hope that I may at last help to bring your own opinion into the light of day: when this has been accomplished, then we will determine whether what you have brought forth is only a wind-egg or a real and genuine birth. Therefore, keep up your spirits, and answer like a man what you think.

Theaetetus: Ask me.

Socrates: Then once more: Is it your opinion that nothing is but what becomes? — the good and the noble, as well as all the

other things which we were just now mentioning?

Theaetetus: When I hear you discoursing in this style, I think that there is a great deal in what you say, and I am very ready to assent.

Socrates: Let us not leave the argument unfinished, then; for there still remains to be considered an objection which may be raised about dreams and diseases, in particular about madness, and the various illusions of hearing and sight, or of other senses. For you know that in all these cases the esse-percipi theory appears to be unmistakably refuted, since in dreams and illusions we certainly have false perceptions; and far from saying that everything is which appears, we should rather say that nothing is which appears.

Theaetetus: Very true, Socrates.

Socrates: But then, my boy, how can any one contend that knowledge is perception, or that to every man what appears is?

Theaetetus: I am afraid to say, Socrates, that I have nothing to answer, because you rebuked me just now for making this excuse; but I certainly cannot undertake to argue that madmen or dreamers think truly, when they imagine, some of them that they are gods, and others that they can fly, and are flying in their sleep.

Socrates: Do you see another question which can be raised about these phenomena, notably about dreaming and waking?

Theaetetus: What question?

Socrates: A question which I think that you must often have heard persons ask: — How can you determine whether at this moment we are sleeping, and all our thoughts are a dream; or whether we are awake, and talking to one another in the waking state?

Theaetetus: Indeed, Socrates, I do not know how to prove the one any more than the other, for in both cases the facts

precisely correspond; — and there is no difficulty in supposing that during all this discussion we have been talking to one another in a dream; and when in a dream we seem to be narrating dreams, the resemblance of the two states is quite astonishing.

Socrates: You see, then, that a doubt about the reality of sense is easily raised, since there may even be a doubt whether we are awake or in a dream. And as our time is equally divided between sleeping and waking, in either sphere of existence the soul contends that the thoughts which are present to our minds at the time are true; and during one half of our lives we affirm the truth of the one, and, during the other half, of the other; and are equally confident of both.

Theaetetus: Most true.

Socrates: And may not the same be said of madness and other disorders? the difference is only that the times are not equal.

Theaetetus: Certainly.

Socrates: And is truth or falsehood to be determined by duration of time?

Theaetetus: That would be in many ways ridiculous.

Socrates: But can you certainly determine by any other means which of these opinions is true?

Theaetetus: I do not think that I can.

Socrates: Listen, then, to a statement of the other side of the argument, which is made by the champions of appearance. They would say, as I imagine — Can that which is wholly other than something, have the same quality as that from which it differs? and observe, Theaetetus, that the word ‘other’ means not ‘partially,’ but ‘wholly other.’

Theaetetus: Certainly, putting the question as you do, that which is wholly other cannot either potentially or in any other way be the same.

Socrates: And must therefore be admitted to be unlike?

Theaetetus: True.

Socrates: If, then, anything happens to become like or unlike itself or another, when it becomes like we call it the same — when unlike, other?

Theaetetus: Certainly.

Socrates: Were we not saying that there are agents many and infinite, and patients many and infinite?

Theaetetus: Yes.

Socrates: And also that different combinations will produce results which are not the same, but different?

Theaetetus: Certainly.

Socrates: Let us take you and me, or anything as an example: — There is Socrates in health, and Socrates sick — Are they like or unlike?

Theaetetus: You mean to compare Socrates in health as a whole, and Socrates in sickness as a whole?

Socrates: Exactly; that is my meaning.

Theaetetus: I answer, they are unlike.

Socrates: And if unlike, they are other?

Theaetetus: Certainly.

Socrates: And would you not say the same of Socrates sleeping and waking, or in any of the states which we were mentioning?

Theaetetus: I should.

Socrates: All agents have a different patient in Socrates, accordingly as he is well or ill.

Theaetetus: Of course.

Socrates: And I who am the patient, and that which is the agent, will produce something different in each of the two cases?

Theaetetus: Certainly.

Socrates: The wine which I drink when I am in health, appears sweet and pleasant to me?

Theaetetus: True.

Socrates: For, as has been already acknowledged, the patient and agent meet together and produce sweetness and a perception of sweetness, which are in simultaneous motion, and the perception which comes from the patient makes the tongue percipient, and the quality of sweetness which arises out of and is moving about the wine, makes the wine both to be and to appear sweet to the healthy tongue.

Theaetetus: Certainly; that has been already acknowledged.

Socrates: But when I am sick, the wine really acts upon another and a different person?

Theaetetus: Yes.

Socrates: The combination of the draught of wine, and the Socrates who is sick, produces quite another result; which is the sensation of bitterness in the tongue, and the motion and creation of bitterness in and about the wine, which becomes not bitterness but something bitter; as I myself become not perception but percipient?

Theaetetus: True.

Socrates: There is no other object of which I shall ever have the same perception, for another object would give another perception, and would make the percipient other and different; nor can that object which affects me, meeting another subject, produce the same, or become similar, for that too would produce another result from another subject, and become different.

Theaetetus: True.

Socrates: Neither can I by myself, have this sensation, nor the object by itself, this quality.

Theaetetus: Certainly not.

Socrates: When I perceive I must become percipient of something — there can be no such thing as perceiving and perceiving nothing; the object, whether it become sweet, bitter, or of any other quality, must have relation to a percipient; nothing can become sweet which is sweet to no one.

Theaetetus: Certainly not.

Socrates: Then the inference is, that we (the agent and patient) are or become in relation to one another; there is a law which binds us one to the other, but not to any other existence, nor each of us to himself; and therefore we can only be bound to one another; so that whether a person says that a thing is or becomes, he must say that it is or becomes to or of or in relation to something else; but he must not say or allow any one else to say that anything is or becomes absolutely: — such is our conclusion.

Theaetetus: Very true, Socrates.

Socrates: Then, if that which acts upon me has relation to me and to no other, I and no other am the percipient of it?

Theaetetus: Of course.

Socrates: Then my perception is true to me, being inseparable from my own being; and, as Protagoras says, to myself I am judge of what is and what is not to me.

Theaetetus: I suppose so.

Socrates: How then, if I never err, and if my mind never trips in the conception of being or becoming, can I fail of knowing that which I perceive?

Theaetetus: You cannot.

Socrates: Then you were quite right in affirming that knowledge is only perception; and the meaning turns out to be the same, whether with Homer and Heracleitus, and all that company, you say that all is motion and flux, or with the great sage Protagoras, that man is the measure of all things; or with Theaetetus, that, given these premises, perception is knowledge. Am I not right, Theaetetus, and is not this your new-born child, of which I have delivered you? What say you?

Theaetetus: I cannot but agree, Socrates.

Socrates: Then this is the child, however he may turn out, which you and I have with difficulty brought into the world. And now that he is born, we must run round the hearth with him, and see whether he is worth rearing, or is only a wind-egg and a sham. Is he to be reared in any case, and not exposed? or will you bear to see him rejected, and not get into a passion if I take away your first-born?

Theodorus: Theaetetus will not be angry, for he is very good-natured. But tell me, Socrates, in heaven’s name, is this, after all, not the truth?

Socrates: You, Theodorus, are a lover of theories, and now you innocently fancy that I am a bag full of them, and can easily pull one out which will overthrow its predecessor. But you do not see that in reality none of these theories come from me; they all come from him who talks with me. I only know just enough to extract them from the wisdom of another, and to receive them in a spirit of fairness. And now I shall say nothing myself, but shall endeavour to elicit something from our young friend.

Theodorus: Do as you say, Socrates; you are quite right.

Socrates: Shall I tell you, Theodorus, what amazes me in your acquaintance Protagoras?

Theodorus: What is it?

Socrates: I am charmed with his doctrine, that what appears is to each one, but I wonder that he did not begin his book on Truth with a declaration that a pig or a dog-faced baboon, or some other yet stranger monster which has sensation, is the measure of all things; then he might have shown a magnificent contempt for our opinion of him by informing us at the outset that while we were reverencing him like a God for his wisdom he was no better than a tadpole, not to speak of his fellow-men — would not this have produced an overpowering effect? For if truth is only sensation, and no man can discern another's feelings better than he, or has any superior right to determine whether his opinion is true or false, but each, as we have several times repeated, is to himself the sole judge, and everything that he judges is true and right, why, my friend, should Protagoras be preferred to the place of wisdom and instruction, and deserve to be well paid, and we poor ignoramuses have to go to him, if each one is the measure of his own wisdom? Must he not be talking 'ad captandum' in all this? I say nothing of the ridiculous predicament in which my own midwifery and the whole art of dialectic is placed; for the attempt to supervise or refute the notions or opinions of others would be a tedious and enormous piece of folly, if to each man his own are right; and this must be the case if Protagoras' Truth is the real truth, and the philosopher is not merely amusing himself by giving oracles out of the shrine of his book.

Theodorus: He was a friend of mine, Socrates, as you were saying, and therefore I cannot have him refuted by my lips, nor can I oppose you when I agree with you; please, then, to take Theaetetus again; he seemed to answer very nicely.

Socrates: If you were to go into a Lacedaemonian palestra, Theodorus, would you have a right to look on at the naked wrestlers, some of them making a poor figure, if you did not strip and give them an opportunity of judging of your own person?

Theodorus: Why not, Socrates, if they would allow me, as I think you will, in consideration of my age and stiffness; let some more supple youth try a fall with you, and do not drag me into the gymnasium.

Socrates: Your will is my will, Theodorus, as the proverbial philosophers say, and therefore I will return to the sage Theaetetus: Tell me, Theaetetus, in reference to what I was saying, are you not lost in wonder, like myself, when you find that all of a sudden you are raised to the level of the wisest of men, or indeed of the gods? — for you would assume the measure of Protagoras to apply to the gods as well as men?

Theaetetus: Certainly I should, and I confess to you that I am lost in wonder. At first hearing, I was quite satisfied with the doctrine, that whatever appears is to each one, but now the face of things has changed.

Socrates: Why, my dear boy, you are young, and therefore your ear is quickly caught and your mind influenced by popular arguments. Protagoras, or some one speaking on his behalf, will doubtless say in reply, — Good people, young and old, you meet and harangue, and bring in the gods, whose existence or non-existence I banish from writing and speech, or you talk about the reason of man being degraded to the level of the brutes, which is a telling argument with the multitude, but not one word of proof or demonstration do you offer. All is probability with you, and yet surely you and Theodorus had better reflect whether you are disposed to admit of probability and figures of speech in matters of such importance. He or any other mathematician who argued from probabilities and likelihoods in geometry, would not be worth an ace.

Theaetetus: But neither you nor we, Socrates, would be satisfied with such arguments.

Socrates: Then you and Theodorus mean to say that we must look at the matter in some other way?

Theaetetus: Yes, in quite another way.

Socrates: And the way will be to ask whether perception is or is not the same as knowledge; for this was the real point of our argument, and with a view to this we raised (did we not?) those many strange questions.

Theaetetus: Certainly.

Socrates: Shall we say that we know every thing which we see and hear? for example, shall we say that not having learned, we do not hear the language of foreigners when they speak to us? or shall we say that we not only hear, but know what they are saying? Or again, if we see letters which we do not understand, shall we say that we do not see them? or shall we aver that, seeing them, we must know them?

Theaetetus: We shall say, Socrates, that we know what we actually see and hear of them — that is to say, we see and know the figure and colour of the letters, and we hear and know the elevation or depression of the sound of them; but we do not perceive by sight and hearing, or know, that which grammarians and interpreters teach about them.

Socrates: Capital, Theaetetus; and about this there shall be no dispute, because I want you to grow; but there is another difficulty coming, which you will also have to repulse.

Theaetetus: What is it?

Socrates: Some one will say, Can a man who has ever known anything, and still has and preserves a memory of that which he knows, not know that which he remembers at the time when he remembers? I have, I fear, a tedious way of putting a simple question, which is only, whether a man who has learned, and remembers, can fail to know?

Theaetetus: Impossible, Socrates; the supposition is monstrous.

Socrates: Am I talking nonsense, then? Think: is not seeing perceiving, and is not sight perception?

Theaetetus: True.

Socrates: And if our recent definition holds, every man knows that which he has seen?

Theaetetus: Yes.

Socrates: And you would admit that there is such a thing as memory?

Theaetetus: Yes.

Socrates: And is memory of something or of nothing?

Theaetetus: Of something, surely.

Socrates: Of things learned and perceived, that is?

Theaetetus: Certainly.

Socrates: Often a man remembers that which he has seen?

Theaetetus: True.

Socrates: And if he closed his eyes, would he forget?

Theaetetus: Who, Socrates, would dare to say so?

Socrates: But we must say so, if the previous argument is to be maintained.

Theaetetus: What do you mean? I am not quite sure that I understand you, though I have a strong suspicion that you are right.

Socrates: As thus: he who sees knows, as we say, that which he sees; for perception and sight and knowledge are admitted to be the same.

Theaetetus: Certainly.

Socrates: But he who saw, and has knowledge of that which he saw, remembers, when he closes his eyes, that which he no longer sees.

Theaetetus: True.

Socrates: And seeing is knowing, and therefore not-seeing is not-knowing?

Theaetetus: Very true.

Socrates: Then the inference is, that a man may have attained the knowledge of something, which he may remember and yet not know, because he does not see; and this has been affirmed by us to be a monstrous supposition.

Theaetetus: Most true.

Socrates: Thus, then, the assertion that knowledge and perception are one, involves a manifest impossibility?

Theaetetus: Yes.

Socrates: Then they must be distinguished?

Theaetetus: I suppose that they must.

Socrates: Once more we shall have to begin, and ask 'What is knowledge?' and yet, Theaetetus, what are we going to do?

Theaetetus: About what?

Socrates: Like a good-for-nothing cock, without having won the victory, we walk away from the argument and crow.

Theaetetus: How do you mean?

Socrates: After the manner of disputers (Lys.; Phaedo; Republic), we were satisfied with mere verbal consistency, and were well pleased if in this way we could gain an advantage. Although professing not to be mere Eristics, but philosophers, I suspect that we have unconsciously fallen into the error of that ingenious class of persons.

Theaetetus: I do not as yet understand you.

Socrates: Then I will try to explain myself: just now we asked the question, whether a man who had learned and remembered could fail to know, and we showed that a person who had seen might remember when he had his eyes shut and could not see,

and then he would at the same time remember and not know. But this was an impossibility. And so the Protagorean fable came to nought, and yours also, who maintained that knowledge is the same as perception.

Theaetetus: True.

Socrates: And yet, my friend, I rather suspect that the result would have been different if Protagoras, who was the father of the first of the two brats, had been alive; he would have had a great deal to say on their behalf. But he is dead, and we insult over his orphan child; and even the guardians whom he left, and of whom our friend Theodorus is one, are unwilling to give any help, and therefore I suppose that I must take up his cause myself, and see justice done?

Theodorus: Not I, Socrates, but rather Callias, the son of Hipponicus, is guardian of his orphans. I was too soon diverted from the abstractions of dialectic to geometry. Nevertheless, I shall be grateful to you if you assist him.

Socrates: Very good, Theodorus; you shall see how I will come to the rescue. If a person does not attend to the meaning of terms as they are commonly used in argument, he may be involved even in greater paradoxes than these. Shall I explain this matter to you or to Theaetetus?

Theodorus: To both of us, and let the younger answer; he will incur less disgrace if he is discomfited.

Socrates: Then now let me ask the awful question, which is this: — Can a man know and also not know that which he knows?

Theodorus: How shall we answer, Theaetetus?

Theaetetus: He cannot, I should say.

Socrates: He can, if you maintain that seeing is knowing. When you are imprisoned in a well, as the saying is, and the self-assured adversary closes one of your eyes with his hand, and asks whether you can see his cloak with the eye which he

has closed, how will you answer the inevitable man?

Theaetetus: I should answer, ‘Not with that eye but with the other.’

Socrates: Then you see and do not see the same thing at the same time.

Theaetetus: Yes, in a certain sense.

Socrates: None of that, he will reply; I do not ask or bid you answer in what sense you know, but only whether you know that which you do not know. You have been proved to see that which you do not see; and you have already admitted that seeing is knowing, and that not-seeing is not-knowing: I leave you to draw the inference.

Theaetetus: Yes; the inference is the contradictory of my assertion.

Socrates: Yes, my marvel, and there might have been yet worse things in store for you, if an opponent had gone on to ask whether you can have a sharp and also a dull knowledge, and whether you can know near, but not at a distance, or know the same thing with more or less intensity, and so on without end. Such questions might have been put to you by a light-armed mercenary, who argued for pay. He would have lain in wait for you, and when you took up the position, that sense is knowledge, he would have made an assault upon hearing, smelling, and the other senses; — he would have shown you no mercy; and while you were lost in envy and admiration of his wisdom, he would have got you into his net, out of which you would not have escaped until you had come to an understanding about the sum to be paid for your release. Well, you ask, and how will Protagoras reinforce his position? Shall I answer for him?

Theaetetus: By all means.

Socrates: He will repeat all those things which we have been urging on his behalf, and then he will close with us in disdain, and say: — The worthy Socrates asked a little boy, whether the same man could remember and not know the same thing, and the boy said No, because he was frightened, and could not see what was coming, and then Socrates made fun of poor me. The truth is, O slatternly Socrates, that when you ask questions about any assertion of mine, and the person asked is found tripping, if he has answered as I should have answered, then I am refuted, but if he answers something else, then he is refuted and not I. For do you really suppose that any one would admit the memory which a man has of an impression which has passed away to be the same with that which he experienced at the time? Assuredly not. Or would he hesitate to acknowledge that the same man may know and not know the same thing? Or, if he is afraid of making this admission, would he ever grant that one who has become unlike is the same as before he became unlike? Or would he admit that a man is one at all, and not rather many and infinite as the changes which take place in him? I speak by the card in order to avoid entanglements of words. But, O my good sir, he will say, come to the argument in a more generous spirit; and either show, if you can, that our sensations are not relative and individual, or, if you admit them to be so, prove that this does not involve the consequence that the appearance becomes, or, if you will have the word, is, to the individual only. As to your talk about pigs and baboons, you are yourself behaving like a pig, and you teach your hearers to make sport of my writings in the same ignorant manner; but this is not to your credit. For I declare that the truth is as I have written, and that each of us is a measure of existence and of non-existence. Yet one man may be a thousand times better than another in proportion as different things are and appear to him. And I am far from saying that wisdom and the wise man have no existence; but I say that the wise man is he who makes the evils which appear and are to a man, into goods which are and

appear to him. And I would beg you not to press my words in the letter, but to take the meaning of them as I will explain them. Remember what has been already said, — that to the sick man his food appears to be and is bitter, and to the man in health the opposite of bitter. Now I cannot conceive that one of these men can be or ought to be made wiser than the other: nor can you assert that the sick man because he has one impression is foolish, and the healthy man because he has another is wise; but the one state requires to be changed into the other, the worse into the better. As in education, a change of state has to be effected, and the sophist accomplishes by words the change which the physician works by the aid of drugs. Not that any one ever made another think truly, who previously thought falsely. For no one can think what is not, or, think anything different from that which he feels; and this is always true. But as the inferior habit of mind has thoughts of kindred nature, so I conceive that a good mind causes men to have good thoughts; and these which the inexperienced call true, I maintain to be only better, and not truer than others. And, O my dear Socrates, I do not call wise men tadpoles: far from it; I say that they are the physicians of the human body, and the husbandmen of plants — for the husbandmen also take away the evil and disordered sensations of plants, and infuse into them good and healthy sensations — aye and true ones; and the wise and good rhetoricians make the good instead of the evil to seem just to states; for whatever appears to a state to be just and fair, so long as it is regarded as such, is just and fair to it; but the teacher of wisdom causes the good to take the place of the evil, both in appearance and in reality. And in like manner the Sophist who is able to train his pupils in this spirit is a wise man, and deserves to be well paid by them. And so one man is wiser than another; and no one thinks falsely, and you, whether you will or not, must endure to be a measure. On these foundations the argument stands firm, which you, Socrates, may, if you please, overthrow by an opposite argument, or if you like you

may put questions to me — a method to which no intelligent person will object, quite the reverse. But I must beg you to put fair questions: for there is great inconsistency in saying that you have a zeal for virtue, and then always behaving unfairly in argument. The unfairness of which I complain is that you do not distinguish between mere disputation and dialectic: the disputer may trip up his opponent as often as he likes, and make fun; but the dialectician will be in earnest, and only correct his adversary when necessary, telling him the errors into which he has fallen through his own fault, or that of the company which he has previously kept. If you do so, your adversary will lay the blame of his own confusion and perplexity on himself, and not on you. He will follow and love you, and will hate himself, and escape from himself into philosophy, in order that he may become different from what he was. But the other mode of arguing, which is practised by the many, will have just the opposite effect upon him; and as he grows older, instead of turning philosopher, he will come to hate philosophy. I would recommend you, therefore, as I said before, not to encourage yourself in this polemical and controversial temper, but to find out, in a friendly and congenial spirit, what we really mean when we say that all things are in motion, and that to every individual and state what appears, is. In this manner you will consider whether knowledge and sensation are the same or different, but you will not argue, as you were just now doing, from the customary use of names and words, which the vulgar pervert in all sorts of ways, causing infinite perplexity to one another. Such, Theodorus, is the very slight help which I am able to offer to your old friend; had he been living, he would have helped himself in a far more gloriose style.

Theodorus: You are jesting, Socrates; indeed, your defence of him has been most valorous.

Socrates: Thank you, friend; and I hope that you observed Protagoras bidding us be serious, as the text, ‘Man is the

measure of all things,' was a solemn one; and he reproached us with making a boy the medium of discourse, and said that the boy's timidity was made to tell against his argument; he also declared that we made a joke of him.

Theodorus: How could I fail to observe all that, Socrates?

Socrates: Well, and shall we do as he says?

Theodorus: By all means.

Socrates: But if his wishes are to be regarded, you and I must take up the argument, and in all seriousness, and ask and answer one another, for you see that the rest of us are nothing but boys. In no other way can we escape the imputation, that in our fresh analysis of his thesis we are making fun with boys.

Theodorus: Well, but is not Theaetetus better able to follow a philosophical enquiry than a great many men who have long beards?

Socrates: Yes, Theodorus, but not better than you; and therefore please not to imagine that I am to defend by every means in my power your departed friend; and that you are to defend nothing and nobody. At any rate, my good man, do not sheer off until we know whether you are a true measure of diagrams, or whether all men are equally measures and sufficient for themselves in astronomy and geometry, and the other branches of knowledge in which you are supposed to excel them.

Theodorus: He who is sitting by you, Socrates, will not easily avoid being drawn into an argument; and when I said just now that you would excuse me, and not, like the Lacedaemonians, compel me to strip and fight, I was talking nonsense — I should rather compare you to Scirrhon, who threw travellers from the rocks; for the Lacedaemonian rule is 'strip or depart,' but you seem to go about your work more after the fashion of Antaeus: you will not allow any one who approaches you to depart until you have stripped him, and he has been compelled to try a fall with you in argument.

Socrates: There, Theodorus, you have hit off precisely the nature of my complaint; but I am even more pugnacious than the giants of old, for I have met with no end of heroes; many a Heracles, many a Theseus, mighty in words, has broken my head; nevertheless I am always at this rough exercise, which inspires me like a passion. Please, then, to try a fall with me, whereby you will do yourself good as well as me.

Theodorus: I consent; lead me whither you will, for I know that you are like destiny; no man can escape from any argument which you may weave for him. But I am not disposed to go further than you suggest.

Socrates: Once will be enough; and now take particular care that we do not again unwittingly expose ourselves to the reproach of talking childishly.

Theodorus: I will do my best to avoid that error.

Socrates: In the first place, let us return to our old objection, and see whether we were right in blaming and taking offence at Protagoras on the ground that he assumed all to be equal and sufficient in wisdom; although he admitted that there was a better and worse, and that in respect of this, some who as he said were the wise excelled others.

Theodorus: Very true.

Socrates: Had Protagoras been living and answered for himself, instead of our answering for him, there would have been no need of our reviewing or reinforcing the argument. But as he is not here, and some one may accuse us of speaking without authority on his behalf, had we not better come to a clearer agreement about his meaning, for a great deal may be at stake?

Theodorus: True.

Socrates: Then let us obtain, not through any third person, but from his own statement and in the fewest words possible, the basis of agreement.

Theodorus: In what way?

Socrates: In this way: — His words are, ‘What seems to a man, is to him.’

Theodorus: Yes, so he says.

Socrates: And are not we, Protagoras, uttering the opinion of man, or rather of all mankind, when we say that every one thinks himself wiser than other men in some things, and their inferior in others? In the hour of danger, when they are in perils of war, or of the sea, or of sickness, do they not look up to their commanders as if they were gods, and expect salvation from them, only because they excel them in knowledge? Is not the world full of men in their several employments, who are looking for teachers and rulers of themselves and of the animals? and there are plenty who think that they are able to teach and able to rule. Now, in all this is implied that ignorance and wisdom exist among them, at least in their own opinion.

Theodorus: Certainly.

Socrates: And wisdom is assumed by them to be true thought, and ignorance to be false opinion.

Theodorus: Exactly.

Socrates: How then, Protagoras, would you have us treat the argument? Shall we say that the opinions of men are always true, or sometimes true and sometimes false? In either case, the result is the same, and their opinions are not always true, but sometimes true and sometimes false. For tell me, Theodorus, do you suppose that you yourself, or any other follower of Protagoras, would contend that no one deems another ignorant or mistaken in his opinion?

Theodorus: The thing is incredible, Socrates.

Socrates: And yet that absurdity is necessarily involved in the thesis which declares man to be the measure of all things.

Theodorus: How so?

Socrates: Why, suppose that you determine in your own mind something to be true, and declare your opinion to me; let us assume, as he argues, that this is true to you. Now, if so, you must either say that the rest of us are not the judges of this opinion or judgment of yours, or that we judge you always to have a true opinion? But are there not thousands upon thousands who, whenever you form a judgment, take up arms against you and are of an opposite judgment and opinion, deeming that you judge falsely?

Theodorus: Yes, indeed, Socrates, thousands and tens of thousands, as Homer says, who give me a world of trouble.

Socrates: Well, but are we to assert that what you think is true to you and false to the ten thousand others?

Theodorus: No other inference seems to be possible.

Socrates: And how about Protagoras himself? If neither he nor the multitude thought, as indeed they do not think, that man is the measure of all things, must it not follow that the truth of which Protagoras wrote would be true to no one? But if you suppose that he himself thought this, and that the multitude does not agree with him, you must begin by allowing that in whatever proportion the many are more than one, in that proportion his truth is more untrue than true.

Theodorus: That would follow if the truth is supposed to vary with individual opinion.

Socrates: And the best of the joke is, that he acknowledges the truth of their opinion who believe his own opinion to be false; for he admits that the opinions of all men are true.

Theodorus: Certainly.

Socrates: And does he not allow that his own opinion is false, if he admits that the opinion of those who think him false is true?

Theodorus: Of course.

Socrates: Whereas the other side do not admit that they speak falsely?

Theodorus: They do not.

Socrates: And he, as may be inferred from his writings, agrees that this opinion is also true.

Theodorus: Clearly.

Socrates: Then all mankind, beginning with Protagoras, will contend, or rather, I should say that he will allow, when he concedes that his adversary has a true opinion — Protagoras, I say, will himself allow that neither a dog nor any ordinary man is the measure of anything which he has not learned — am I not right?

Theodorus: Yes.

Socrates: And the truth of Protagoras being doubted by all, will be true neither to himself to any one else?

Theodorus: I think, Socrates, that we are running my old friend too hard.

Socrates: But I do not know that we are going beyond the truth. Doubtless, as he is older, he may be expected to be wiser than we are. And if he could only just get his head out of the world below, he would have overthrown both of us again and again, me for talking nonsense and you for assenting to me, and have been off and underground in a trice. But as he is not within call, we must make the best use of our own faculties, such as they are, and speak out what appears to us to be true. And one thing which no one will deny is, that there are great differences in the understandings of men.

Theodorus: In that opinion I quite agree.

Socrates: And is there not most likely to be firm ground in the distinction which we were indicating on behalf of Protagoras, viz. that most things, and all immediate sensations, such as hot, dry, sweet, are only such as they appear; if however difference

of opinion is to be allowed at all, surely we must allow it in respect of health or disease? for every woman, child, or living creature has not such a knowledge of what conduces to health as to enable them to cure themselves.

Theodorus: I quite agree.

Socrates: Or again, in politics, while affirming that just and unjust, honourable and disgraceful, holy and unholy, are in reality to each state such as the state thinks and makes lawful, and that in determining these matters no individual or state is wiser than another, still the followers of Protagoras will not deny that in determining what is or is not expedient for the community one state is wiser and one counsellor better than another — they will scarcely venture to maintain, that what a city enacts in the belief that it is expedient will always be really expedient. But in the other case, I mean when they speak of justice and injustice, piety and impiety, they are confident that in nature these have no existence or essence of their own — the truth is that which is agreed on at the time of the agreement, and as long as the agreement lasts; and this is the philosophy of many who do not altogether go along with Protagoras. Here arises a new question, Theodorus, which threatens to be more serious than the last.

Theodorus: Well, Socrates, we have plenty of leisure.

Socrates: That is true, and your remark recalls to my mind an observation which I have often made, that those who have passed their days in the pursuit of philosophy are ridiculously at fault when they have to appear and speak in court. How natural is this!

Theodorus: What do you mean?

Socrates: I mean to say, that those who have been trained in philosophy and liberal pursuits are as unlike those who from their youth upwards have been knocking about in the courts and such places, as a freeman is in breeding unlike a slave.

Theodorus: In what is the difference seen?

Socrates: In the leisure spoken of by you, which a freeman can always command: he has his talk out in peace, and, like ourselves, he wanders at will from one subject to another, and from a second to a third, — if the fancy takes him, he begins again, as we are doing now, caring not whether his words are many or few; his only aim is to attain the truth. But the lawyer is always in a hurry; there is the water of the clepsydra driving him on, and not allowing him to expatiate at will: and there is his adversary standing over him, enforcing his rights; the indictment, which in their phraseology is termed the affidavit, is recited at the time: and from this he must not deviate. He is a servant, and is continually disputing about a fellow-servant before his master, who is seated, and has the cause in his hands; the trial is never about some indifferent matter, but always concerns himself; and often the race is for his life. The consequence has been, that he has become keen and shrewd; he has learned how to flatter his master in word and indulge him in deed; but his soul is small and unrighteous. His condition, which has been that of a slave from his youth upwards, has deprived him of growth and uprightness and independence; dangers and fears, which were too much for his truth and honesty, came upon him in early years, when the tenderness of youth was unequal to them, and he has been driven into crooked ways; from the first he has practised deception and retaliation, and has become stunted and warped. And so he has passed out of youth into manhood, having no soundness in him; and is now, as he thinks, a master in wisdom. Such is the lawyer, Theodorus. Will you have the companion picture of the philosopher, who is of our brotherhood; or shall we return to the argument? Do not let us abuse the freedom of digression which we claim.

Theodorus: Nay, Socrates, not until we have finished what we are about; for you truly said that we belong to a brotherhood which is free, and are not the servants of the argument; but the

argument is our servant, and must wait our leisure. Who is our judge? Or where is the spectator having any right to censure or control us, as he might the poets?

Socrates: Then, as this is your wish, I will describe the leaders; for there is no use in talking about the inferior sort. In the first place, the lords of philosophy have never, from their youth upwards, known their way to the Agora, or the dicastery, or the council, or any other political assembly; they neither see nor hear the laws or decrees, as they are called, of the state written or recited; the eagerness of political societies in the attainment of offices — clubs, and banquets, and revels, and singing-maidens, — do not enter even into their dreams. Whether any event has turned out well or ill in the city, what disgrace may have descended to any one from his ancestors, male or female, are matters of which the philosopher no more knows than he can tell, as they say, how many pints are contained in the ocean. Neither is he conscious of his ignorance. For he does not hold aloof in order that he may gain a reputation; but the truth is, that the outer form of him only is in the city: his mind, disdaining the littlenesses and nothingnesses of human things, is ‘flying all abroad’ as Pindar says, measuring earth and heaven and the things which are under and on the earth and above the heaven, interrogating the whole nature of each and all in their entirety, but not condescending to anything which is within reach.

Theodorus: What do you mean, Socrates?

Socrates: I will illustrate my meaning, Theodorus, by the jest which the clever witty Thracian handmaid is said to have made about Thales, when he fell into a well as he was looking up at the stars. She said, that he was so eager to know what was going on in heaven, that he could not see what was before his feet. This is a jest which is equally applicable to all philosophers. For the philosopher is wholly unacquainted with his next-door neighbour; he is ignorant, not only of what he is doing, but he

hardly knows whether he is a man or an animal; he is searching into the essence of man, and busy in enquiring what belongs to such a nature to do or suffer different from any other; — I think that you understand me, Theodorus?

Theodorus: I do, and what you say is true.

Socrates: And thus, my friend, on every occasion, private as well as public, as I said at first, when he appears in a law-court, or in any place in which he has to speak of things which are at his feet and before his eyes, he is the jest, not only of Thracian handmaids but of the general herd, tumbling into wells and every sort of disaster through his inexperience. His awkwardness is fearful, and gives the impression of imbecility. When he is reviled, he has nothing personal to say in answer to the civilities of his adversaries, for he knows no scandals of any one, and they do not interest him; and therefore he is laughed at for his sheepishness; and when others are being praised and glorified, in the simplicity of his heart he cannot help going into fits of laughter, so that he seems to be a downright idiot. When he hears a tyrant or king eulogized, he fancies that he is listening to the praises of some keeper of cattle — a swineherd, or shepherd, or perhaps a cowherd, who is congratulated on the quantity of milk which he squeezes from them; and he remarks that the creature whom they tend, and out of whom they squeeze the wealth, is of a less tractable and more insidious nature. Then, again, he observes that the great man is of necessity as ill-mannered and uneducated as any shepherd — for he has no leisure, and he is surrounded by a wall, which is his mountain-pen. Hearing of enormous landed proprietors of ten thousand acres and more, our philosopher deems this to be a trifle, because he has been accustomed to think of the whole earth; and when they sing the praises of family, and say that some one is a gentleman because he can show seven generations of wealthy ancestors, he thinks that their sentiments only betray a dull and narrow vision in those who

utter them, and who are not educated enough to look at the whole, nor to consider that every man has had thousands and ten thousands of progenitors, and among them have been rich and poor, kings and slaves, Hellenes and barbarians, innumerable. And when people pride themselves on having a pedigree of twenty-five ancestors, which goes back to Heracles, the son of Amphitryon, he cannot understand their poverty of ideas. Why are they unable to calculate that Amphitryon had a twenty-fifth ancestor, who might have been anybody, and was such as fortune made him, and he had a fiftieth, and so on? He amuses himself with the notion that they cannot count, and thinks that a little arithmetic would have got rid of their senseless vanity. Now, in all these cases our philosopher is derided by the vulgar, partly because he is thought to despise them, and also because he is ignorant of what is before him, and always at a loss.

Theodorus: That is very true, Socrates.

Socrates: But, O my friend, when he draws the other into upper air, and gets him out of his pleas and rejoinders into the contemplation of justice and injustice in their own nature and in their difference from one another and from all other things; or from the commonplaces about the happiness of a king or of a rich man to the consideration of government, and of human happiness and misery in general — what they are, and how a man is to attain the one and avoid the other — when that narrow, keen, little legal mind is called to account about all this, he gives the philosopher his revenge; for dizzied by the height at which he is hanging, whence he looks down into space, which is a strange experience to him, he being dismayed, and lost, and stammering broken words, is laughed at, not by Thracian handmaidens or any other uneducated persons, for they have no eye for the situation, but by every man who has not been brought up a slave. Such are the two characters, Theodorus: the one of the freeman, who has been trained in liberty and leisure,

whom you call the philosopher, — him we cannot blame because he appears simple and of no account when he has to perform some menial task, such as packing up bed-clothes, or flavouring a sauce or fawning speech; the other character is that of the man who is able to do all this kind of service smartly and neatly, but knows not how to wear his cloak like a gentleman; still less with the music of discourse can he hymn the true life aright which is lived by immortals or men blessed of heaven.

Theodorus: If you could only persuade everybody, Socrates, as you do me, of the truth of your words, there would be more peace and fewer evils among men.

Socrates: Evils, Theodorus, can never pass away; for there must always remain something which is antagonistic to good. Having no place among the gods in heaven, of necessity they hover around the mortal nature, and this earthly sphere. Wherefore we ought to fly away from earth to heaven as quickly as we can; and to fly away is to become like God, as far as this is possible; and to become like him, is to become holy, just, and wise. But, O my friend, you cannot easily convince mankind that they should pursue virtue or avoid vice, not merely in order that a man may seem to be good, which is the reason given by the world, and in my judgment is only a repetition of an old wives' fable. Whereas, the truth is that God is never in any way unrighteous — he is perfect righteousness; and he of us who is the most righteous is most like him. Herein is seen the true cleverness of a man, and also his nothingness and want of manhood. For to know this is true wisdom and virtue, and ignorance of this is manifest folly and vice. All other kinds of wisdom or cleverness, which seem only, such as the wisdom of politicians, or the wisdom of the arts, are coarse and vulgar. The unrighteous man, or the sayer and doer of unholy things, had far better not be encouraged in the illusion that his roguery is clever; for men glory in their shame — they fancy that they hear others saying of them, 'These are not mere good-for-nothing persons, mere burdens of the

earth, but such as men should be who mean to dwell safely in a state.' Let us tell them that they are all the more truly what they do not think they are because they do not know it; for they do not know the penalty of injustice, which above all things they ought to know — not stripes and death, as they suppose, which evil-doers often escape, but a penalty which cannot be escaped.

Theodorus: What is that?

Socrates: There are two patterns eternally set before them; the one blessed and divine, the other godless and wretched: but they do not see them, or perceive that in their utter folly and infatuation they are growing like the one and unlike the other, by reason of their evil deeds; and the penalty is, that they lead a life answering to the pattern which they are growing like. And if we tell them, that unless they depart from their cunning, the place of innocence will not receive them after death; and that here on earth, they will live ever in the likeness of their own evil selves, and with evil friends — when they hear this they in their superior cunning will seem to be listening to the talk of idiots.

Theodorus: Very true, Socrates.

Socrates: Too true, my friend, as I well know; there is, however, one peculiarity in their case: when they begin to reason in private about their dislike of philosophy, if they have the courage to hear the argument out, and do not run away, they grow at last strangely discontented with themselves; their rhetoric fades away, and they become helpless as children. These however are digressions from which we must now desist, or they will overflow, and drown the original argument; to which, if you please, we will now return.

Theodorus: For my part, Socrates, I would rather have the digressions, for at my age I find them easier to follow; but if you wish, let us go back to the argument.

Socrates: Had we not reached the point at which the partisans of the perpetual flux, who say that things are as they seem to

each one, were confidently maintaining that the ordinances which the state commanded and thought just, were just to the state which imposed them, while they were in force; this was especially asserted of justice; but as to the good, no one had any longer the hardihood to contend of any ordinances which the state thought and enacted to be good that these, while they were in force, were really good; — he who said so would be playing with the name 'good,' and would not touch the real question — it would be a mockery, would it not?

Theodorus: Certainly it would.

Socrates: He ought not to speak of the name, but of the thing which is contemplated under the name.

Theodorus: Right.

Socrates: Whatever be the term used, the good or expedient is the aim of legislation, and as far as she has an opinion, the state imposes all laws with a view to the greatest expediency; can legislation have any other aim?

Theodorus: Certainly not.

Socrates: But is the aim attained always? do not mistakes often happen?

Theodorus: Yes, I think that there are mistakes.

Socrates: The possibility of error will be more distinctly recognised, if we put the question in reference to the whole class under which the good or expedient falls. That whole class has to do with the future, and laws are passed under the idea that they will be useful in after-time; which, in other words, is the future.

Theodorus: Very true.

Socrates: Suppose now, that we ask Protagoras, or one of his disciples, a question: — O, Protagoras, we will say to him, Man is, as you declare, the measure of all things — white, heavy, light: of all such things he is the judge; for he has the criterion

of them in himself, and when he thinks that things are such as he experiences them to be, he thinks what is and is true to himself. Is it not so?

Theodorus: Yes.

Socrates: And do you extend your doctrine, Protagoras (as we shall further say), to the future as well as to the present; and has he the criterion not only of what in his opinion is but of what will be, and do things always happen to him as he expected? For example, take the case of heat: — When an ordinary man thinks that he is going to have a fever, and that this kind of heat is coming on, and another person, who is a physician, thinks the contrary, whose opinion is likely to prove right? Or are they both right? — he will have a heat and fever in his own judgment, and not have a fever in the physician's judgment?

Theodorus: How ludicrous!

Socrates: And the vinegrower, if I am not mistaken, is a better judge of the sweetness or dryness of the vintage which is not yet gathered than the harp-player?

Theodorus: Certainly.

Socrates: And in musical composition the musician will know better than the training master what the training master himself will hereafter think harmonious or the reverse?

Theodorus: Of course.

Socrates: And the cook will be a better judge than the guest, who is not a cook, of the pleasure to be derived from the dinner which is in preparation; for of present or past pleasure we are not as yet arguing; but can we say that every one will be to himself the best judge of the pleasure which will seem to be and will be to him in the future? — nay, would not you, Protagoras, better guess which arguments in a court would convince any one of us than the ordinary man?

Theodorus: Certainly, Socrates, he used to profess in the strongest manner that he was the superior of all men in this respect.

Socrates: To be sure, friend: who would have paid a large sum for the privilege of talking to him, if he had really persuaded his visitors that neither a prophet nor any other man was better able to judge what will be and seem to be in the future than every one could for himself?

Theodorus: Who indeed?

Socrates: And legislation and expediency are all concerned with the future; and every one will admit that states, in passing laws, must often fail of their highest interests?

Theodorus: Quite true.

Socrates: Then we may fairly argue against your master, that he must admit one man to be wiser than another, and that the wiser is a measure: but I, who know nothing, am not at all obliged to accept the honour which the advocate of Protagoras was just now forcing upon me, whether I would or not, of being a measure of anything.

Theodorus: That is the best refutation of him, Socrates; although he is also caught when he ascribes truth to the opinions of others, who give the lie direct to his own opinion.

Socrates: There are many ways, Theodorus, in which the doctrine that every opinion of every man is true may be refuted; but there is more difficulty in proving that states of feeling, which are present to a man, and out of which arise sensations and opinions in accordance with them, are also untrue. And very likely I have been talking nonsense about them; for they may be unassailable, and those who say that there is clear evidence of them, and that they are matters of knowledge, may probably be right; in which case our friend Theaetetus was not so far from the mark when he identified perception and knowledge. And therefore let us draw nearer, as the advocate of Protagoras

desires; and give the truth of the universal flux a ring: is the theory sound or not? at any rate, no small war is raging about it, and there are combination not a few.

Theodorus: No small, war, indeed, for in Ionia the sect makes rapid strides; the disciples of Heracleitus are most energetic upholders of the doctrine.

Socrates: Then we are the more bound, my dear Theodorus, to examine the question from the foundation as it is set forth by themselves.

Theodorus: Certainly we are. About these speculations of Heracleitus, which, as you say, are as old as Homer, or even older still, the Ephesians themselves, who profess to know them, are downright mad, and you cannot talk with them on the subject. For, in accordance with their text-books, they are always in motion; but as for dwelling upon an argument or a question, and quietly asking and answering in turn, they can no more do so than they can fly; or rather, the determination of these fellows not to have a particle of rest in them is more than the utmost powers of negation can express. If you ask any of them a question, he will produce, as from a quiver, sayings brief and dark, and shoot them at you; and if you inquire the reason of what he has said, you will be hit by some other new-fangled word, and will make no way with any of them, nor they with one another; their great care is, not to allow of any settled principle either in their arguments or in their minds, conceiving, as I imagine, that any such principle would be stationary; for they are at war with the stationary, and do what they can to drive it out everywhere.

Socrates: I suppose, Theodorus, that you have only seen them when they were fighting, and have never stayed with them in time of peace, for they are no friends of yours; and their peace doctrines are only communicated by them at leisure, as I imagine, to those disciples of theirs whom they want to make like themselves.

Theodorus: Disciples! my good sir, they have none; men of their sort are not one another's disciples, but they grow up at their own sweet will, and get their inspiration anywhere, each of them saying of his neighbour that he knows nothing. From these men, then, as I was going to remark, you will never get a reason, whether with their will or without their will; we must take the question out of their hands, and make the analysis ourselves, as if we were doing geometrical problem.

Socrates: Quite right too; but as touching the aforesaid problem, have we not heard from the ancients, who concealed their wisdom from the many in poetical figures, that Oceanus and Tethys, the origin of all things, are streams, and that nothing is at rest? And now the moderns, in their superior wisdom, have declared the same openly, that the cobbler too may hear and learn of them, and no longer foolishly imagine that some things are at rest and others in motion — having learned that all is motion, he will duly honour his teachers. I had almost forgotten the opposite doctrine, Theodorus,

'Alone Being remains unmoved, which is the name for the all.'

This is the language of Parmenides, Melissus, and their followers, who stoutly maintain that all being is one and self-contained, and has no place in which to move. What shall we do, friend, with all these people; for, advancing step by step, we have imperceptibly got between the combatants, and, unless we can protect our retreat, we shall pay the penalty of our rashness — like the players in the palaestra who are caught upon the line, and are dragged different ways by the two parties. Therefore I think that we had better begin by considering those whom we first accosted, 'the river-gods,' and, if we find any truth in them, we will help them to pull us over, and try to get away from the others. But if the partisans of 'the whole' appear to speak more truly, we will fly off from the party which would move the immovable, to them. And if I find that neither of them have anything reasonable to say, we shall be in

a ridiculous position, having so great a conceit of our own poor opinion and rejecting that of ancient and famous men. O Theodorus, do you think that there is any use in proceeding when the danger is so great?

Theodorus: Nay, Socrates, not to examine thoroughly what the two parties have to say would be quite intolerable.

Socrates: Then examine we must, since you, who were so reluctant to begin, are so eager to proceed. The nature of motion appears to be the question with which we begin. What do they mean when they say that all things are in motion? Is there only one kind of motion, or, as I rather incline to think, two? I should like to have your opinion upon this point in addition to my own, that I may err, if I must err, in your company; tell me, then, when a thing changes from one place to another, or goes round in the same place, is not that what is called motion?

Theodorus: Yes.

Socrates: Here then we have one kind of motion. But when a thing, remaining on the same spot, grows old, or becomes black from being white, or hard from being soft, or undergoes any other change, may not this be properly called motion of another kind?

Theodorus: I think so.

Socrates: Say rather that it must be so. Of motion then there are these two kinds, ‘change,’ and ‘motion in place.’

Theodorus: You are right.

Socrates: And now, having made this distinction, let us address ourselves to those who say that all is motion, and ask them whether all things according to them have the two kinds of motion, and are changed as well as move in place, or is one thing moved in both ways, and another in one only?

Theodorus: Indeed, I do not know what to answer; but I think they would say that all things are moved in both ways.

Socrates: Yes, comrade; for, if not, they would have to say that the same things are in motion and at rest, and there would be no more truth in saying that all things are in motion, than that all things are at rest.

Theodorus: To be sure.

Socrates: And if they are to be in motion, and nothing is to be devoid of motion, all things must always have every sort of motion?

Theodorus: Most true.

Socrates: Consider a further point: did we not understand them to explain the generation of heat, whiteness, or anything else, in some such manner as the following: — were they not saying that each of them is moving between the agent and the patient, together with a perception, and that the patient ceases to be a perceiving power and becomes a percipient, and the agent a quale instead of a quality? I suspect that quality may appear a strange and uncouth term to you, and that you do not understand the abstract expression. Then I will take concrete instances: I mean to say that the producing power or agent becomes neither heat nor whiteness but hot and white, and the like of other things. For I must repeat what I said before, that neither the agent nor patient have any absolute existence, but when they come together and generate sensations and their objects, the one becomes a thing of a certain quality, and the other a percipient. You remember?

Theodorus: Of course.

Socrates: We may leave the details of their theory unexamined, but we must not forget to ask them the only question with which we are concerned: Are all things in motion and flux?

Theodorus: Yes, they will reply.

Socrates: And they are moved in both those ways which we distinguished, that is to say, they move in place and are also changed?

Theodorus: Of course, if the motion is to be perfect.

Socrates: If they only moved in place and were not changed, we should be able to say what is the nature of the things which are in motion and flux?

Theodorus: Exactly.

Socrates: But now, since not even white continues to flow white, and whiteness itself is a flux or change which is passing into another colour, and is never to be caught standing still, can the name of any colour be rightly used at all?

Theodorus: How is that possible, Socrates, either in the case of this or of any other quality — if while we are using the word the object is escaping in the flux?

Socrates: And what would you say of perceptions, such as sight and hearing, or any other kind of perception? Is there any stopping in the act of seeing and hearing?

Theodorus: Certainly not, if all things are in motion.

Socrates: Then we must not speak of seeing any more than of not-seeing, nor of any other perception more than of any non-perception, if all things partake of every kind of motion?

Theodorus: Certainly not.

Socrates: Yet perception is knowledge: so at least Theaetetus and I were saying.

Theodorus: Very true.

Socrates: Then when we were asked what is knowledge, we no more answered what is knowledge than what is not knowledge?

Theodorus: I suppose not.

Socrates: Here, then, is a fine result: we corrected our first answer in our eagerness to prove that nothing is at rest. But if nothing is at rest, every answer upon whatever subject is equally right: you may say that a thing is or is not thus; or, if you prefer, ‘becomes’ thus; and if we say ‘becomes,’ we shall not then hamper them with words expressive of rest.

Theodorus: Quite true.

Socrates: Yes, Theodorus, except in saying ‘thus’ and ‘not thus.’ But you ought not to use the word ‘thus,’ for there is no motion in ‘thus’ or in ‘not thus.’ The maintainers of the doctrine have as yet no words in which to express themselves, and must get a new language. I know of no word that will suit them, except perhaps ‘no how,’ which is perfectly indefinite.

Theodorus: Yes, that is a manner of speaking in which they will be quite at home.

Socrates: And so, Theodorus, we have got rid of your friend without assenting to his doctrine, that every man is the measure of all things — a wise man only is a measure; neither can we allow that knowledge is perception, certainly not on the hypothesis of a perpetual flux, unless perchance our friend Theaetetus is able to convince us that it is.

Theodorus: Very good, Socrates; and now that the argument about the doctrine of Protagoras has been completed, I am absolved from answering; for this was the agreement.

Theaetetus: Not, Theodorus, until you and Socrates have discussed the doctrine of those who say that all things are at rest, as you were proposing.

Theodorus: You, Theaetetus, who are a young rogue, must not instigate your elders to a breach of faith, but should prepare to answer Socrates in the remainder of the argument.

Theaetetus: Yes, if he wishes; but I would rather have heard about the doctrine of rest.

Theodorus: Invite Socrates to an argument — invite horsemen to the open plain; do but ask him, and he will answer.

Socrates: Nevertheless, Theodorus, I am afraid that I shall not be able to comply with the request of Theaetetus.

Theodorus: Not comply! for what reason?

Socrates: My reason is that I have a kind of reverence; not so much for Melissus and the others, who say that 'All is one and at rest,' as for the great leader himself, Parmenides, venerable and awful, as in Homeric language he may be called; — him I should be ashamed to approach in a spirit unworthy of him. I met him when he was an old man, and I was a mere youth, and he appeared to me to have a glorious depth of mind. And I am afraid that we may not understand his words, and may be still further from understanding his meaning; above all I fear that the nature of knowledge, which is the main subject of our discussion, may be thrust out of sight by the unbidden guests who will come pouring in upon our feast of discourse, if we let them in — besides, the question which is now stirring is of immense extent, and will be treated unfairly if only considered by the way; or if treated adequately and at length, will put into the shade the other question of knowledge. Neither the one nor the other can be allowed; but I must try by my art of midwifery to deliver Theaetetus of his conceptions about knowledge.

Theaetetus: Very well; do so if you will.

Socrates: Then now, Theaetetus, take another view of the subject: you answered that knowledge is perception?

Theaetetus: I did.

Socrates: And if any one were to ask you: With what does a man see black and white colours? and with what does he hear high and low sounds? — you would say, if I am not mistaken, 'With the eyes and with the ears.'

Theaetetus: I should.

Socrates: The free use of words and phrases, rather than minute precision, is generally characteristic of a liberal education, and the opposite is pedantic; but sometimes precision is necessary, and I believe that the answer which you have just given is open to the charge of incorrectness; for which is more correct, to say that we see or hear with the eyes and with the ears, or through the eyes and through the ears.

Theaetetus: I should say ‘through,’ Socrates, rather than ‘with.’

Socrates: Yes, my boy, for no one can suppose that in each of us, as in a sort of Trojan horse, there are perched a number of unconnected senses, which do not all meet in some one nature, the mind, or whatever we please to call it, of which they are the instruments, and with which through them we perceive objects of sense.

Theaetetus: I agree with you in that opinion.

Socrates: The reason why I am thus precise is, because I want to know whether, when we perceive black and white through the eyes, and again, other qualities through other organs, we do not perceive them with one and the same part of ourselves, and, if you were asked, you might refer all such perceptions to the body. Perhaps, however, I had better allow you to answer for yourself and not interfere. Tell me, then, are not the organs through which you perceive warm and hard and light and sweet, organs of the body?

Theaetetus: Of the body, certainly.

Socrates: And you would admit that what you perceive through one faculty you cannot perceive through another; the objects of hearing, for example, cannot be perceived through sight, or the objects of sight through hearing?

Theaetetus: Of course not.

Socrates: If you have any thought about both of them, this common perception cannot come to you, either through the one

or the other organ?

Theaetetus: It cannot.

Socrates: How about sounds and colours: in the first place you would admit that they both exist?

Theaetetus: Yes.

Socrates: And that either of them is different from the other, and the same with itself?

Theaetetus: Certainly.

Socrates: And that both are two and each of them one?

Theaetetus: Yes.

Socrates: You can further observe whether they are like or unlike one another?

Theaetetus: I dare say.

Socrates: But through what do you perceive all this about them? for neither through hearing nor yet through seeing can you apprehend that which they have in common. Let me give you an illustration of the point at issue: — If there were any meaning in asking whether sounds and colours are saline or not, you would be able to tell me what faculty would consider the question. It would not be sight or hearing, but some other.

Theaetetus: Certainly; the faculty of taste.

Socrates: Very good; and now tell me what is the power which discerns, not only in sensible objects, but in all things, universal notions, such as those which are called being and not-being, and those others about which we were just asking — what organs will you assign for the perception of these notions?

Theaetetus: You are thinking of being and not being, likeness and unlikeness, sameness and difference, and also of unity and other numbers which are applied to objects of sense; and you mean to ask, through what bodily organ the soul perceives odd

and even numbers and other arithmetical conceptions.

Socrates: You follow me excellently, Theaetetus; that is precisely what I am asking.

Theaetetus: Indeed, Socrates, I cannot answer; my only notion is, that these, unlike objects of sense, have no separate organ, but that the mind, by a power of her own, contemplates the universals in all things.

Socrates: You are a beauty, Theaetetus, and not ugly, as Theodorus was saying; for he who utters the beautiful is himself beautiful and good. And besides being beautiful, you have done me a kindness in releasing me from a very long discussion, if you are clear that the soul views some things by herself and others through the bodily organs. For that was my own opinion, and I wanted you to agree with me.

Theaetetus: I am quite clear.

Socrates: And to which class would you refer being or essence; for this, of all our notions, is the most universal?

Theaetetus: I should say, to that class which the soul aspires to know of herself.

Socrates: And would you say this also of like and unlike, same and other?

Theaetetus: Yes.

Socrates: And would you say the same of the noble and base, and of good and evil?

Theaetetus: These I conceive to be notions which are essentially relative, and which the soul also perceives by comparing in herself things past and present with the future.

Socrates: And does she not perceive the hardness of that which is hard by the touch, and the softness of that which is soft equally by the touch?

Theaetetus: Yes.

Socrates: But their essence and what they are, and their opposition to one another, and the essential nature of this opposition, the soul herself endeavours to decide for us by the review and comparison of them?

Theaetetus: Certainly.

Socrates: The simple sensations which reach the soul through the body are given at birth to men and animals by nature, but their reflections on the being and use of them are slowly and hardly gained, if they are ever gained, by education and long experience.

Theaetetus: Assuredly.

Socrates: And can a man attain truth who fails of attaining being?

Theaetetus: Impossible.

Socrates: And can he who misses the truth of anything, have a knowledge of that thing?

Theaetetus: He cannot.

Socrates: Then knowledge does not consist in impressions of sense, but in reasoning about them; in that only, and not in the mere impression, truth and being can be attained?

Theaetetus: Clearly.

Socrates: And would you call the two processes by the same name, when there is so great a difference between them?

Theaetetus: That would certainly not be right.

Socrates: And what name would you give to seeing, hearing, smelling, being cold and being hot?

Theaetetus: I should call all of them perceiving — what other name could be given to them?

Socrates: Perception would be the collective name of them?

Theaetetus: Certainly.

Socrates: Which, as we say, has no part in the attainment of truth any more than of being?

Theaetetus: Certainly not.

Socrates: And therefore not in science or knowledge?

Theaetetus: No.

Socrates: Then perception, Theaetetus, can never be the same as knowledge or science?

Theaetetus: Clearly not, Socrates; and knowledge has now been most distinctly proved to be different from perception.

Socrates: But the original aim of our discussion was to find out rather what knowledge is than what it is not; at the same time we have made some progress, for we no longer seek for knowledge in perception at all, but in that other process, however called, in which the mind is alone and engaged with being.

Theaetetus: You mean, Socrates, if I am not mistaken, what is called thinking or opining.

Socrates: You conceive truly. And now, my friend, please to begin again at this point; and having wiped out of your memory all that has preceded, see if you have arrived at any clearer view, and once more say what is knowledge.

Theaetetus: I cannot say, Socrates, that all opinion is knowledge, because there may be a false opinion; but I will venture to assert, that knowledge is true opinion: let this then be my reply; and if this is hereafter disproved, I must try to find another.

Socrates: That is the way in which you ought to answer, Theaetetus, and not in your former hesitating strain, for if we are bold we shall gain one of two advantages; either we shall find what we seek, or we shall be less likely to think that we know what we do not know — in either case we shall be richly rewarded. And now, what are you saying? — Are there two sorts

of opinion, one true and the other false; and do you define knowledge to be the true?

Theaetetus: Yes, according to my present view.

Socrates: Is it still worth our while to resume the discussion touching opinion?

Theaetetus: To what are you alluding?

Socrates: There is a point which often troubles me, and is a great perplexity to me, both in regard to myself and others. I cannot make out the nature or origin of the mental experience to which I refer.

Theaetetus: Pray what is it?

Socrates: How there can be false opinion — that difficulty still troubles the eye of my mind; and I am uncertain whether I shall leave the question, or begin over again in a new way.

Theaetetus: Begin again, Socrates, — at least if you think that there is the slightest necessity for doing so. Were not you and Theodorus just now remarking very truly, that in discussions of this kind we may take our own time?

Socrates: You are quite right, and perhaps there will be no harm in retracing our steps and beginning again. Better a little which is well done, than a great deal imperfectly.

Theaetetus: Certainly.

Socrates: Well, and what is the difficulty? Do we not speak of false opinion, and say that one man holds a false and another a true opinion, as though there were some natural distinction between them?

Theaetetus: We certainly say so.

Socrates: All things and everything are either known or not known. I leave out of view the intermediate conceptions of learning and forgetting, because they have nothing to do with our present question.

Theaetetus: There can be no doubt, Socrates, if you exclude these, that there is no other alternative but knowing or not knowing a thing.

Socrates: That point being now determined, must we not say that he who has an opinion, must have an opinion about something which he knows or does not know?

Theaetetus: He must.

Socrates: He who knows, cannot but know; and he who does not know, cannot know?

Theaetetus: Of course.

Socrates: What shall we say then? When a man has a false opinion does he think that which he knows to be some other thing which he knows, and knowing both, is he at the same time ignorant of both?

Theaetetus: That, Socrates, is impossible.

Socrates: But perhaps he thinks of something which he does not know as some other thing which he does not know; for example, he knows neither Theaetetus nor Socrates, and yet he fancies that Theaetetus is Socrates, or Socrates Theaetetus?

Theaetetus: How can he?

Socrates: But surely he cannot suppose what he knows to be what he does not know, or what he does not know to be what he knows?

Theaetetus: That would be monstrous.

Socrates: Where, then, is false opinion? For if all things are either known or unknown, there can be no opinion which is not comprehended under this alternative, and so false opinion is excluded.

Theaetetus: Most true.

Socrates: Suppose that we remove the question out of the sphere of knowing or not knowing, into that of being and not-being.

Theaetetus: What do you mean?

Socrates: May we not suspect the simple truth to be that he who thinks about anything, that which is not, will necessarily think what is false, whatever in other respects may be the state of his mind?

Theaetetus: That, again, is not unlikely, Socrates.

Socrates: Then suppose some one to say to us, Theaetetus: — Is it possible for any man to think that which is not, either as a self-existent substance or as a predicate of something else? And suppose that we answer, 'Yes, he can, when he thinks what is not true.' — That will be our answer?

Theaetetus: Yes.

Socrates: But is there any parallel to this?

Theaetetus: What do you mean?

Socrates: Can a man see something and yet see nothing?

Theaetetus: Impossible.

Socrates: But if he sees any one thing, he sees something that exists. Do you suppose that what is one is ever to be found among non-existing things?

Theaetetus: I do not.

Socrates: He then who sees some one thing, sees something which is?

Theaetetus: Clearly.

Socrates: And he who hears anything, hears some one thing, and hears that which is?

Theaetetus: Yes.

Socrates: And he who touches anything, touches something which is one and therefore is?

Theaetetus: That again is true.

Socrates: And does not he who thinks, think some one thing?

Theaetetus: Certainly.

Socrates: And does not he who thinks some one thing, think something which is?

Theaetetus: I agree.

Socrates: Then he who thinks of that which is not, thinks of nothing?

Theaetetus: Clearly.

Socrates: And he who thinks of nothing, does not think at all?

Theaetetus: Obviously.

Socrates: Then no one can think that which is not, either as a self-existent substance or as a predicate of something else?

Theaetetus: Clearly not.

Socrates: Then to think falsely is different from thinking that which is not?

Theaetetus: It would seem so.

Socrates: Then false opinion has no existence in us, either in the sphere of being or of knowledge?

Theaetetus: Certainly not.

Socrates: But may not the following be the description of what we express by this name?

Theaetetus: What?

Socrates: May we not suppose that false opinion or thought is a sort of heterodoxy; a person may make an exchange in his mind, and say that one real object is another real object. For thus he always thinks that which is, but he puts one thing in place of

another; and missing the aim of his thoughts, he may be truly said to have false opinion.

Theaetetus: Now you appear to me to have spoken the exact truth: when a man puts the base in the place of the noble, or the noble in the place of the base, then he has truly false opinion.

Socrates: I see, Theaetetus, that your fear has disappeared, and that you are beginning to despise me.

Theaetetus: What makes you say so?

Socrates: You think, if I am not mistaken, that your ‘truly false’ is safe from censure, and that I shall never ask whether there can be a swift which is slow, or a heavy which is light, or any other self-contradictory thing, which works, not according to its own nature, but according to that of its opposite. But I will not insist upon this, for I do not wish needlessly to discourage you. And so you are satisfied that false opinion is heterodoxy, or the thought of something else?

Theaetetus: I am.

Socrates: It is possible then upon your view for the mind to conceive of one thing as another?

Theaetetus: True.

Socrates: But must not the mind, or thinking power, which misplaces them, have a conception either of both objects or of one of them?

Theaetetus: Certainly.

Socrates: Either together or in succession?

Theaetetus: Very good.

Socrates: And do you mean by conceiving, the same which I mean?

Theaetetus: What is that?

Socrates: I mean the conversation which the soul holds with herself in considering of anything. I speak of what I scarcely understand; but the soul when thinking appears to me to be just talking — asking questions of herself and answering them, affirming and denying. And when she has arrived at a decision, either gradually or by a sudden impulse, and has at last agreed, and does not doubt, this is called her opinion. I say, then, that to form an opinion is to speak, and opinion is a word spoken, — I mean, to oneself and in silence, not aloud or to another: What think you?

Theaetetus: I agree.

Socrates: Then when any one thinks of one thing as another, he is saying to himself that one thing is another?

Theaetetus: Yes.

Socrates: But do you ever remember saying to yourself that the noble is certainly base, or the unjust just; or, best of all — have you ever attempted to convince yourself that one thing is another? Nay, not even in sleep, did you ever venture to say to yourself that odd is even, or anything of the kind?

Theaetetus: Never.

Socrates: And do you suppose that any other man, either in his senses or out of them, ever seriously tried to persuade himself that an ox is a horse, or that two are one?

Theaetetus: Certainly not.

Socrates: But if thinking is talking to oneself, no one speaking and thinking of two objects, and apprehending them both in his soul, will say and think that the one is the other of them, and I must add, that even you, lover of dispute as you are, had better let the word ‘other’ alone (i.e. not insist that ‘one’ and ‘other’ are the same (Both words in Greek are called eteron: compare Parmen.; Euthyd.)). I mean to say, that no one thinks the noble to be base, or anything of the kind.

Theaetetus: I will give up the word ‘other,’ Socrates; and I agree to what you say.

Socrates: If a man has both of them in his thoughts, he cannot think that the one of them is the other?

Theaetetus: True.

Socrates: Neither, if he has one of them only in his mind and not the other, can he think that one is the other?

Theaetetus: True; for we should have to suppose that he apprehends that which is not in his thoughts at all.

Socrates: Then no one who has either both or only one of the two objects in his mind can think that the one is the other. And therefore, he who maintains that false opinion is heterodoxy is talking nonsense; for neither in this, any more than in the previous way, can false opinion exist in us.

Theaetetus: No.

Socrates: But if, Theaetetus, this is not admitted, we shall be driven into many absurdities.

Theaetetus: What are they?

Socrates: I will not tell you until I have endeavoured to consider the matter from every point of view. For I should be ashamed of us if we were driven in our perplexity to admit the absurd consequences of which I speak. But if we find the solution, and get away from them, we may regard them only as the difficulties of others, and the ridicule will not attach to us. On the other hand, if we utterly fail, I suppose that we must be humble, and allow the argument to trample us under foot, as the sea-sick passenger is trampled upon by the sailor, and to do anything to us. Listen, then, while I tell you how I hope to find a way out of our difficulty.

Theaetetus: Let me hear.

Socrates: I think that we were wrong in denying that a man could think what he knew to be what he did not know; and that there is a way in which such a deception is possible.

Theaetetus: You mean to say, as I suspected at the time, that I may know Socrates, and at a distance see some one who is unknown to me, and whom I mistake for him — then the deception will occur?

Socrates: But has not that position been relinquished by us, because involving the absurdity that we should know and not know the things which we know?

Theaetetus: True.

Socrates: Let us make the assertion in another form, which may or may not have a favourable issue; but as we are in a great strait, every argument should be turned over and tested. Tell me, then, whether I am right in saying that you may learn a thing which at one time you did not know?

Theaetetus: Certainly you may.

Socrates: And another and another?

Theaetetus: Yes.

Socrates: I would have you imagine, then, that there exists in the mind of man a block of wax, which is of different sizes in different men; harder, moister, and having more or less of purity in one than another, and in some of an intermediate quality.

Theaetetus: I see.

Socrates: Let us say that this tablet is a gift of Memory, the mother of the Muses; and that when we wish to remember anything which we have seen, or heard, or thought in our own minds, we hold the wax to the perceptions and thoughts, and in that material receive the impression of them as from the seal of a ring; and that we remember and know what is imprinted as long as the image lasts; but when the image is effaced, or cannot be taken, then we forget and do not know.

Theaetetus: Very good.

Socrates: Now, when a person has this knowledge, and is considering something which he sees or hears, may not false opinion arise in the following manner?

Theaetetus: In what manner?

Socrates: When he thinks what he knows, sometimes to be what he knows, and sometimes to be what he does not know. We were wrong before in denying the possibility of this.

Theaetetus: And how would you amend the former statement?

Socrates: I should begin by making a list of the impossible cases which must be excluded. (1) No one can think one thing to be another when he does not perceive either of them, but has the memorial or seal of both of them in his mind; nor can any mistaking of one thing for another occur, when he only knows one, and does not know, and has no impression of the other; nor can he think that one thing which he does not know is another thing which he does not know, or that what he does not know is what he knows; nor (2) that one thing which he perceives is another thing which he perceives, or that something which he perceives is something which he does not perceive; or that something which he does not perceive is something else which he does not perceive; or that something which he does not perceive is something which he perceives; nor again (3) can he think that something which he knows and perceives, and of which he has the impression coinciding with sense, is something else which he knows and perceives, and of which he has the impression coinciding with sense; — this last case, if possible, is still more inconceivable than the others; nor (4) can he think that something which he knows and perceives, and of which he has the memorial coinciding with sense, is something else which he knows; nor so long as these agree, can he think that a thing which he knows and perceives is another thing which he perceives; or that a thing which he does not know and does not

perceive, is the same as another thing which he does not know and does not perceive; — nor again, can he suppose that a thing which he does not know and does not perceive is the same as another thing which he does not know; or that a thing which he does not know and does not perceive is another thing which he does not perceive: — All these utterly and absolutely exclude the possibility of false opinion. The only cases, if any, which remain, are the following.

Theaetetus: What are they? If you tell me, I may perhaps understand you better; but at present I am unable to follow you.

Socrates: A person may think that some things which he knows, or which he perceives and does not know, are some other things which he knows and perceives; or that some things which he knows and perceives, are other things which he knows and perceives.

Theaetetus: I understand you less than ever now.

Socrates: Hear me once more, then: — I, knowing Theodorus, and remembering in my own mind what sort of person he is, and also what sort of person Theaetetus is, at one time see them, and at another time do not see them, and sometimes I touch them, and at another time not, or at one time I may hear them or perceive them in some other way, and at another time not perceive them, but still I remember them, and know them in my own mind.

Theaetetus: Very true.

Socrates: Then, first of all, I want you to understand that a man may or may not perceive sensibly that which he knows.

Theaetetus: True.

Socrates: And that which he does not know will sometimes not be perceived by him and sometimes will be perceived and only perceived?

Theaetetus: That is also true.

Socrates: See whether you can follow me better now: Socrates can recognize Theodorus and Theaetetus, but he sees neither of them, nor does he perceive them in any other way; he cannot then by any possibility imagine in his own mind that Theaetetus is Theodorus. Am I not right?

Theaetetus: You are quite right.

Socrates: Then that was the first case of which I spoke.

Theaetetus: Yes.

Socrates: The second case was, that I, knowing one of you and not knowing the other, and perceiving neither, can never think him whom I know to be him whom I do not know.

Theaetetus: True.

Socrates: In the third case, not knowing and not perceiving either of you, I cannot think that one of you whom I do not know is the other whom I do not know. I need not again go over the catalogue of excluded cases, in which I cannot form a false opinion about you and Theodorus, either when I know both or when I am in ignorance of both, or when I know one and not the other. And the same of perceiving: do you understand me?

Theaetetus: I do.

Socrates: The only possibility of erroneous opinion is, when knowing you and Theodorus, and having on the waxen block the impression of both of you given as by a seal, but seeing you imperfectly and at a distance, I try to assign the right impression of memory to the right visual impression, and to fit this into its own print: if I succeed, recognition will take place; but if I fail and transpose them, putting the foot into the wrong shoe — that is to say, putting the vision of either of you on to the wrong impression, or if my mind, like the sight in a mirror, which is transferred from right to left, err by reason of some similar affection, then ‘heterodoxy’ and false opinion ensues.

Theaetetus: Yes, Socrates, you have described the nature of opinion with wonderful exactness.

Socrates: Or again, when I know both of you, and perceive as well as know one of you, but not the other, and my knowledge of him does not accord with perception — that was the case put by me just now which you did not understand.

Theaetetus: No, I did not.

Socrates: I meant to say, that when a person knows and perceives one of you, his knowledge coincides with his perception, he will never think him to be some other person, whom he knows and perceives, and the knowledge of whom coincides with his perception — for that also was a case supposed.

Theaetetus: True.

Socrates: But there was an omission of the further case, in which, as we now say, false opinion may arise, when knowing both, and seeing, or having some other sensible perception of both, I fail in holding the seal over against the corresponding sensation; like a bad archer, I miss and fall wide of the mark — and this is called falsehood.

Theaetetus: Yes; it is rightly so called.

Socrates: When, therefore, perception is present to one of the seals or impressions but not to the other, and the mind fits the seal of the absent perception on the one which is present, in any case of this sort the mind is deceived; in a word, if our view is sound, there can be no error or deception about things which a man does not know and has never perceived, but only in things which are known and perceived; in these alone opinion turns and twists about, and becomes alternately true and false; — true when the seals and impressions of sense meet straight and opposite — false when they go awry and crooked.

Theaetetus: And is not that, Socrates, nobly said?

Socrates: Nobly! yes; but wait a little and hear the explanation, and then you will say so with more reason; for to think truly is noble and to be deceived is base.

Theaetetus: Undoubtedly.

Socrates: And the origin of truth and error is as follows: — When the wax in the soul of any one is deep and abundant, and smooth and perfectly tempered, then the impressions which pass through the senses and sink into the heart of the soul, as Homer says in a parable, meaning to indicate the likeness of the soul to wax (Kerh Kerhos); these, I say, being pure and clear, and having a sufficient depth of wax, are also lasting, and minds, such as these, easily learn and easily retain, and are not liable to confusion, but have true thoughts, for they have plenty of room, and having clear impressions of things, as we term them, quickly distribute them into their proper places on the block. And such men are called wise. Do you agree?

Theaetetus: Entirely.

Socrates: But when the heart of any one is shaggy — a quality which the all-wise poet commends, or muddy and of impure wax, or very soft, or very hard, then there is a corresponding defect in the mind — the soft are good at learning, but apt to forget; and the hard are the reverse; the shaggy and rugged and gritty, or those who have an admixture of earth or dung in their composition, have the impressions indistinct, as also the hard, for there is no depth in them; and the soft too are indistinct, for their impressions are easily confused and effaced. Yet greater is the indistinctness when they are all jostled together in a little soul, which has no room. These are the natures which have false opinion; for when they see or hear or think of anything, they are slow in assigning the right objects to the right impressions — in their stupidity they confuse them, and are apt to see and hear and think amiss — and such men are said to be deceived in their knowledge of objects, and ignorant.

Theaetetus: No man, Socrates, can say anything truer than that.

Socrates: Then now we may admit the existence of false opinion in us?

Theaetetus: Certainly.

Socrates: And of true opinion also?

Theaetetus: Yes.

Socrates: We have at length satisfactorily proven beyond a doubt there are these two sorts of opinion?

Theaetetus: Undoubtedly.

Socrates: Alas, Theaetetus, what a tiresome creature is a man who is fond of talking!

Theaetetus: What makes you say so?

Socrates: Because I am disheartened at my own stupidity and tiresome garrulity; for what other term will describe the habit of a man who is always arguing on all sides of a question; whose dulness cannot be convinced, and who will never leave off?

Theaetetus: But what puts you out of heart?

Socrates: I am not only out of heart, but in positive despair; for I do not know what to answer if any one were to ask me: — O Socrates, have you indeed discovered that false opinion arises neither in the comparison of perceptions with one another nor yet in thought, but in union of thought and perception? Yes, I shall say, with the complacence of one who thinks that he has made a noble discovery.

Theaetetus: I see no reason why we should be ashamed of our demonstration, Socrates.

Socrates: He will say: You mean to argue that the man whom we only think of and do not see, cannot be confused with the horse which we do not see or touch, but only think of and do not perceive? That I believe to be my meaning, I shall reply.

Theaetetus: Quite right.

Socrates: Well, then, he will say, according to that argument, the number eleven, which is only thought, can never be mistaken for twelve, which is only thought: How would you answer him?

Theaetetus: I should say that a mistake may very likely arise between the eleven or twelve which are seen or handled, but that no similar mistake can arise between the eleven and twelve which are in the mind.

Socrates: Well, but do you think that no one ever put before his own mind five and seven, — I do not mean five or seven men or horses, but five or seven in the abstract, which, as we say, are recorded on the waxen block, and in which false opinion is held to be impossible; did no man ever ask himself how many these numbers make when added together, and answer that they are eleven, while another thinks that they are twelve, or would all agree in thinking and saying that they are twelve?

Theaetetus: Certainly not; many would think that they are eleven, and in the higher numbers the chance of error is greater still; for I assume you to be speaking of numbers in general.

Socrates: Exactly; and I want you to consider whether this does not imply that the twelve in the waxen block are supposed to be eleven?

Theaetetus: Yes, that seems to be the case.

Socrates: Then do we not come back to the old difficulty? For he who makes such a mistake does think one thing which he knows to be another thing which he knows; but this, as we said, was impossible, and afforded an irresistible proof of the non-existence of false opinion, because otherwise the same person would inevitably know and not know the same thing at the same time.

Theaetetus: Most true.

Socrates: Then false opinion cannot be explained as a confusion of thought and sense, for in that case we could not have been mistaken about pure conceptions of thought; and thus we are obliged to say, either that false opinion does not exist, or that a man may not know that which he knows; — which alternative do you prefer?

Theaetetus: It is hard to determine, Socrates.

Socrates: And yet the argument will scarcely admit of both. But, as we are at our wits' end, suppose that we do a shameless thing?

Theaetetus: What is it?

Socrates: Let us attempt to explain the verb 'to know.'

Theaetetus: And why should that be shameless?

Socrates: You seem not to be aware that the whole of our discussion from the very beginning has been a search after knowledge, of which we are assumed not to know the nature.

Theaetetus: Nay, but I am well aware.

Socrates: And is it not shameless when we do not know what knowledge is, to be explaining the verb 'to know'? The truth is, Theaetetus, that we have long been infected with logical impurity. Thousands of times have we repeated the words 'we know,' and 'do not know,' and 'we have or have not science or knowledge,' as if we could understand what we are saying to one another, so long as we remain ignorant about knowledge; and at this moment we are using the words 'we understand,' 'we are ignorant,' as though we could still employ them when deprived of knowledge or science.

Theaetetus: But if you avoid these expressions, Socrates, how will you ever argue at all?

Socrates: I could not, being the man I am. The case would be different if I were a true hero of dialectic: and O that such an one were present! for he would have told us to avoid the use of

these terms; at the same time he would not have spared in you and me the faults which I have noted. But, seeing that we are no great wits, shall I venture to say what knowing is? for I think that the attempt may be worth making.

Theaetetus: Then by all means venture, and no one shall find fault with you for using the forbidden terms.

Socrates: You have heard the common explanation of the verb ‘to know’?

Theaetetus: I think so, but I do not remember it at the moment.

Socrates: They explain the word ‘to know’ as meaning ‘to have knowledge.’

Theaetetus: True.

Socrates: I should like to make a slight change, and say ‘to possess’ knowledge.

Theaetetus: How do the two expressions differ?

Socrates: Perhaps there may be no difference; but still I should like you to hear my view, that you may help me to test it.

Theaetetus: I will, if I can.

Socrates: I should distinguish ‘having’ from ‘possessing’: for example, a man may buy and keep under his control a garment which he does not wear; and then we should say, not that he has, but that he possesses the garment.

Theaetetus: It would be the correct expression.

Socrates: Well, may not a man ‘possess’ and yet not ‘have’ knowledge in the sense of which I am speaking? As you may suppose a man to have caught wild birds — doves or any other birds — and to be keeping them in an aviary which he has constructed at home; we might say of him in one sense, that he always has them because he possesses them, might we not?

Theaetetus: Yes.

Socrates: And yet, in another sense, he has none of them; but they are in his power, and he has got them under his hand in an enclosure of his own, and can take and have them whenever he likes; — he can catch any which he likes, and let the bird go again, and he may do so as often as he pleases.

Theaetetus: True.

Socrates: Once more, then, as in what preceded we made a sort of waxen figment in the mind, so let us now suppose that in the mind of each man there is an aviary of all sorts of birds — some flocking together apart from the rest, others in small groups, others solitary, flying anywhere and everywhere.

Theaetetus: Let us imagine such an aviary — and what is to follow?

Socrates: We may suppose that the birds are kinds of knowledge, and that when we were children, this receptacle was empty; whenever a man has gotten and detained in the enclosure a kind of knowledge, he may be said to have learned or discovered the thing which is the subject of the knowledge: and this is to know.

Theaetetus: Granted.

Socrates: And further, when any one wishes to catch any of these knowledges or sciences, and having taken, to hold it, and again to let them go, how will he express himself? — will he describe the ‘catching’ of them and the original ‘possession’ in the same words? I will make my meaning clearer by an example: — You admit that there is an art of arithmetic?

Theaetetus: To be sure.

Socrates: Conceive this under the form of a hunt after the science of odd and even in general.

Theaetetus: I follow.

Socrates: Having the use of the art, the arithmetician, if I am not mistaken, has the conceptions of number under his hand, and

can transmit them to another.

Theaetetus: Yes.

Socrates: And when transmitting them he may be said to teach them, and when receiving to learn them, and when receiving to learn them, and when having them in possession in the aforesaid aviary he may be said to know them.

Theaetetus: Exactly.

Socrates: Attend to what follows: must not the perfect arithmetician know all numbers, for he has the science of all numbers in his mind?

Theaetetus: True.

Socrates: And he can reckon abstract numbers in his head, or things about him which are numerable?

Theaetetus: Of course he can.

Socrates: And to reckon is simply to consider how much such and such a number amounts to?

Theaetetus: Very true.

Socrates: And so he appears to be searching into something which he knows, as if he did not know it, for we have already admitted that he knows all numbers; — you have heard these perplexing questions raised?

Theaetetus: I have.

Socrates: May we not pursue the image of the doves, and say that the chase after knowledge is of two kinds? one kind is prior to possession and for the sake of possession, and the other for the sake of taking and holding in the hands that which is possessed already. And thus, when a man has learned and known something long ago, he may resume and get hold of the knowledge which he has long possessed, but has not at hand in his mind.

Theaetetus: True.

Socrates: That was my reason for asking how we ought to speak when an arithmetician sets about numbering, or a grammarian about reading? Shall we say, that although he knows, he comes back to himself to learn what he already knows?

Theaetetus: It would be too absurd, Socrates.

Socrates: Shall we say then that he is going to read or number what he does not know, although we have admitted that he knows all letters and all numbers?

Theaetetus: That, again, would be an absurdity.

Socrates: Then shall we say that about names we care nothing? — any one may twist and turn the words ‘knowing’ and ‘learning’ in any way which he likes, but since we have determined that the possession of knowledge is not the having or using it, we do assert that a man cannot not possess that which he possesses; and, therefore, in no case can a man not know that which he knows, but he may get a false opinion about it; for he may have the knowledge, not of this particular thing, but of some other; — when the various numbers and forms of knowledge are flying about in the aviary, and wishing to capture a certain sort of knowledge out of the general store, he takes the wrong one by mistake, that is to say, when he thought eleven to be twelve, he got hold of the ring-dove which he had in his mind, when he wanted the pigeon.

Theaetetus: A very rational explanation.

Socrates: But when he catches the one which he wants, then he is not deceived, and has an opinion of what is, and thus false and true opinion may exist, and the difficulties which were previously raised disappear. I dare say that you agree with me, do you not?

Theaetetus: Yes.

Socrates: And so we are rid of the difficulty of a man's not knowing what he knows, for we are not driven to the inference that he does not possess what he possesses, whether he be or be not deceived. And yet I fear that a greater difficulty is looking in at the window.

Theaetetus: What is it?

Socrates: How can the exchange of one knowledge for another ever become false opinion?

Theaetetus: What do you mean?

Socrates: In the first place, how can a man who has the knowledge of anything be ignorant of that which he knows, not by reason of ignorance, but by reason of his own knowledge? And, again, is it not an extreme absurdity that he should suppose another thing to be this, and this to be another thing; — that, having knowledge present with him in his mind, he should still know nothing and be ignorant of all things? — you might as well argue that ignorance may make a man know, and blindness make him see, as that knowledge can make him ignorant.

Theaetetus: Perhaps, Socrates, we may have been wrong in making only forms of knowledge our birds: whereas there ought to have been forms of ignorance as well, flying about together in the mind, and then he who sought to take one of them might sometimes catch a form of knowledge, and sometimes a form of ignorance; and thus he would have a false opinion from ignorance, but a true one from knowledge, about the same thing.

Socrates: I cannot help praising you, Theaetetus, and yet I must beg you to reconsider your words. Let us grant what you say — then, according to you, he who takes ignorance will have a false opinion — am I right?

Theaetetus: Yes.

Socrates: He will certainly not think that he has a false opinion?

Theaetetus: Of course not.

Socrates: He will think that his opinion is true, and he will fancy that he knows the things about which he has been deceived?

Theaetetus: Certainly.

Socrates: Then he will think that he has captured knowledge and not ignorance?

Theaetetus: Clearly.

Socrates: And thus, after going a long way round, we are once more face to face with our original difficulty. The hero of dialectic will retort upon us:— 'O my excellent friends, he will say, laughing, if a man knows the form of ignorance and the form of knowledge, can he think that one of them which he knows is the other which he knows? or, if he knows neither of them, can he think that the one which he knows not is another which he knows not? or, if he knows one and not the other, can he think the one which he knows to be the one which he does not know? or the one which he does not know to be the one which he knows? or will you tell me that there are other forms of knowledge which distinguish the right and wrong birds, and which the owner keeps in some other aviaries or graven on waxen blocks according to your foolish images, and which he may be said to know while he possesses them, even though he have them not at hand in his mind? And thus, in a perpetual circle, you will be compelled to go round and round, and you will make no progress.' What are we to say in reply, Theaetetus?

Theaetetus: Indeed, Socrates, I do not know what we are to say.

Socrates: Are not his reproaches just, and does not the argument truly show that we are wrong in seeking for false opinion until we know what knowledge is; that must be first ascertained; then, the nature of false opinion?

Theaetetus: I cannot but agree with you, Socrates, so far as we have yet gone.

Socrates: Then, once more, what shall we say that knowledge is? — for we are not going to lose heart as yet.

Theaetetus: Certainly, I shall not lose heart, if you do not.

Socrates: What definition will be most consistent with our former views?

Theaetetus: I cannot think of any but our old one, Socrates.

Socrates: What was it?

Theaetetus: Knowledge was said by us to be true opinion; and true opinion is surely unerring, and the results which follow from it are all noble and good.

Socrates: He who led the way into the river, Theaetetus, said 'The experiment will show;' and perhaps if we go forward in the search, we may stumble upon the thing which we are looking for; but if we stay where we are, nothing will come to light.

Theaetetus: Very true; let us go forward and try.

Socrates: The trail soon comes to an end, for a whole profession is against us.

Theaetetus: How is that, and what profession do you mean?

Socrates: The profession of the great wise ones who are called orators and lawyers; for these persuade men by their art and make them think whatever they like, but they do not teach them. Do you imagine that there are any teachers in the world so clever as to be able to convince others of the truth about acts of robbery or violence, of which they were not eye-witnesses, while a little water is flowing in the clepsydra?

Theaetetus: Certainly not, they can only persuade them.

Socrates: And would you not say that persuading them is making them have an opinion?

Theaetetus: To be sure.

Socrates: When, therefore, judges are justly persuaded about matters which you can know only by seeing them, and not in any other way, and when thus judging of them from report they attain a true opinion about them, they judge without knowledge, and yet are rightly persuaded, if they have judged well.

Theaetetus: Certainly.

Socrates: And yet, O my friend, if true opinion in law courts and knowledge are the same, the perfect judge could not have judged rightly without knowledge; and therefore I must infer that they are not the same.

Theaetetus: That is a distinction, Socrates, which I have heard made by some one else, but I had forgotten it. He said that true opinion, combined with reason, was knowledge, but that the opinion which had no reason was out of the sphere of knowledge; and that things of which there is no rational account are not knowable — such was the singular expression which he used — and that things which have a reason or explanation are knowable.

Socrates: Excellent; but then, how did he distinguish between things which are and are not 'knowable'? I wish that you would repeat to me what he said, and then I shall know whether you and I have heard the same tale.

Theaetetus: I do not know whether I can recall it; but if another person would tell me, I think that I could follow him.

Socrates: Let me give you, then, a dream in return for a dream: — Methought that I too had a dream, and I heard in my dream that the primeval letters or elements out of which you and I and all other things are compounded, have no reason or explanation; you can only name them, but no predicate can be either affirmed or denied of them, for in the one case existence, in the other non-existence is already implied, neither of which must be added, if you mean to speak of this or that thing by itself alone. It should not be called itself, or that, or each, or alone, or this, or

the like; for these go about everywhere and are applied to all things, but are distinct from them; whereas, if the first elements could be described, and had a definition of their own, they would be spoken of apart from all else. But none of these primeval elements can be defined; they can only be named, for they have nothing but a name, and the things which are compounded of them, as they are complex, are expressed by a combination of names, for the combination of names is the essence of a definition. Thus, then, the elements or letters are only objects of perception, and cannot be defined or known; but the syllables or combinations of them are known and expressed, and are apprehended by true opinion. When, therefore, any one forms the true opinion of anything without rational explanation, you may say that his mind is truly exercised, but has no knowledge; for he who cannot give and receive a reason for a thing, has no knowledge of that thing; but when he adds rational explanation, then, he is perfected in knowledge and may be all that I have been denying of him. Was that the form in which the dream appeared to you?

Theaetetus: Precisely.

Socrates: And you allow and maintain that true opinion, combined with definition or rational explanation, is knowledge?

Theaetetus: Exactly.

Socrates: Then may we assume, Theaetetus, that to-day, and in this casual manner, we have found a truth which in former times many wise men have grown old and have not found?

Theaetetus: At any rate, Socrates, I am satisfied with the present statement.

Socrates: Which is probably correct — for how can there be knowledge apart from definition and true opinion? And yet there is one point in what has been said which does not quite satisfy me.

Theaetetus: What was it?

Socrates: What might seem to be the most ingenious notion of all: — That the elements or letters are unknown, but the combination or syllables known.

Theaetetus: And was that wrong?

Socrates: We shall soon know; for we have as hostages the instances which the author of the argument himself used.

Theaetetus: What hostages?

Socrates: The letters, which are the clements; and the syllables, which are the combinations; — he reasoned, did he not, from the letters of the alphabet?

Theaetetus: Yes; he did.

Socrates: Let us take them and put them to the test, or rather, test ourselves: — What was the way in which we learned letters? and, first of all, are we right in saying that syllables have a definition, but that letters have no definition?

Theaetetus: I think so.

Socrates: I think so too; for, suppose that some one asks you to spell the first syllable of my name: — Theaetetus, he says, what is SO?

Theaetetus: I should reply S and O.

Socrates: That is the definition which you would give of the syllable?

Theaetetus: I should.

Socrates: I wish that you would give me a similar definition of the S.

Theaetetus: But how can any one, Socrates, tell the elements of an element? I can only reply, that S is a consonant, a mere noise, as of the tongue hissing; B, and most other letters, again, are neither vowel-sounds nor noises. Thus letters may be most truly said to be undefined; for even the most distinct of them,

which are the seven vowels, have a sound only, but no definition at all.

Socrates: Then, I suppose, my friend, that we have been so far right in our idea about knowledge?

Theaetetus: Yes; I think that we have.

Socrates: Well, but have we been right in maintaining that the syllables can be known, but not the letters?

Theaetetus: I think so.

Socrates: And do we mean by a syllable two letters, or if there are more, all of them, or a single idea which arises out of the combination of them?

Theaetetus: I should say that we mean all the letters.

Socrates: Take the case of the two letters S and O, which form the first syllable of my own name; must not he who knows the syllable, know both of them?

Theaetetus: Certainly.

Socrates: He knows, that is, the S and O?

Theaetetus: Yes.

Socrates: But can he be ignorant of either singly and yet know both together?

Theaetetus: Such a supposition, Socrates, is monstrous and unmeaning.

Socrates: But if he cannot know both without knowing each, then if he is ever to know the syllable, he must know the letters first; and thus the fine theory has again taken wings and departed.

Theaetetus: Yes, with wonderful celerity.

Socrates: Yes, we did not keep watch properly. Perhaps we ought to have maintained that a syllable is not the letters, but rather one single idea framed out of them, having a separate

form distinct from them.

Theaetetus: Very true; and a more likely notion than the other.

Socrates: Take care; let us not be cowards and betray a great and imposing theory.

Theaetetus: No, indeed.

Socrates: Let us assume then, as we now say, that the syllable is a simple form arising out of the several combinations of harmonious elements — of letters or of any other elements.

Theaetetus: Very good.

Socrates: And it must have no parts.

Theaetetus: Why?

Socrates: Because that which has parts must be a whole of all the parts. Or would you say that a whole, although formed out of the parts, is a single notion different from all the parts?

Theaetetus: I should.

Socrates: And would you say that all and the whole are the same, or different?

Theaetetus: I am not certain; but, as you like me to answer at once, I shall hazard the reply, that they are different.

Socrates: I approve of your readiness, Theaetetus, but I must take time to think whether I equally approve of your answer.

Theaetetus: Yes; the answer is the point.

Socrates: According to this new view, the whole is supposed to differ from all?

Theaetetus: Yes.

Socrates: Well, but is there any difference between all (in the plural) and the all (in the singular)? Take the case of number: — When we say one, two, three, four, five, six; or when we say twice three, or three times two, or four and two, or three and

two and one, are we speaking of the same or of different numbers?

Theaetetus: Of the same.

Socrates: That is of six?

Theaetetus: Yes.

Socrates: And in each form of expression we spoke of all the six?

Theaetetus: True.

Socrates: Again, in speaking of all (in the plural) is there not one thing which we express?

Theaetetus: Of course there is.

Socrates: And that is six?

Theaetetus: Yes.

Socrates: Then in predicating the word ‘all’ of things measured by number, we predicate at the same time a singular and a plural?

Theaetetus: Clearly we do.

Socrates: Again, the number of the acre and the acre are the same; are they not?

Theaetetus: Yes.

Socrates: And the number of the stadium in like manner is the stadium?

Theaetetus: Yes.

Socrates: And the army is the number of the army; and in all similar cases, the entire number of anything is the entire thing?

Theaetetus: True.

Socrates: And the number of each is the parts of each?

Theaetetus: Exactly.

Socrates: Then as many things as have parts are made up of parts?

Theaetetus: Clearly.

Socrates: But all the parts are admitted to be the all, if the entire number is the all?

Theaetetus: True.

Socrates: Then the whole is not made up of parts, for it would be the all, if consisting of all the parts?

Theaetetus: That is the inference.

Socrates: But is a part a part of anything but the whole?

Theaetetus: Yes, of the all.

Socrates: You make a valiant defence, Theaetetus. And yet is not the all that of which nothing is wanting?

Theaetetus: Certainly.

Socrates: And is not a whole likewise that from which nothing is absent? but that from which anything is absent is neither a whole nor all; — if wanting in anything, both equally lose their entirety of nature.

Theaetetus: I now think that there is no difference between a whole and all.

Socrates: But were we not saying that when a thing has parts, all the parts will be a whole and all?

Theaetetus: Certainly.

Socrates: Then, as I was saying before, must not the alternative be that either the syllable is not the letters, and then the letters are not parts of the syllable, or that the syllable will be the same with the letters, and will therefore be equally known with them?

Theaetetus: You are right.

Socrates: And, in order to avoid this, we suppose it to be different from them?

Theaetetus: Yes.

Socrates: But if letters are not parts of syllables, can you tell me of any other parts of syllables, which are not letters?

Theaetetus: No, indeed, Socrates; for if I admit the existence of parts in a syllable, it would be ridiculous in me to give up letters and seek for other parts.

Socrates: Quite true, Theaetetus, and therefore, according to our present view, a syllable must surely be some indivisible form?

Theaetetus: True.

Socrates: But do you remember, my friend, that only a little while ago we admitted and approved the statement, that of the first elements out of which all other things are compounded there could be no definition, because each of them when taken by itself is uncompounded; nor can one rightly attribute to them the words ‘being’ or ‘this,’ because they are alien and inappropriate words, and for this reason the letters or elements were indefinable and unknown?

Theaetetus: I remember.

Socrates: And is not this also the reason why they are simple and indivisible? I can see no other.

Theaetetus: No other reason can be given.

Socrates: Then is not the syllable in the same case as the elements or letters, if it has no parts and is one form?

Theaetetus: To be sure.

Socrates: If, then, a syllable is a whole, and has many parts or letters, the letters as well as the syllable must be intelligible and expressible, since all the parts are acknowledged to be the same as the whole?

Theaetetus: True.

Socrates: But if it be one and indivisible, then the syllables and the letters are alike undefined and unknown, and for the same reason?

Theaetetus: I cannot deny that.

Socrates: We cannot, therefore, agree in the opinion of him who says that the syllable can be known and expressed, but not the letters.

Theaetetus: Certainly not; if we may trust the argument.

Socrates: Well, but will you not be equally inclined to disagree with him, when you remember your own experience in learning to read?

Theaetetus: What experience?

Socrates: Why, that in learning you were kept trying to distinguish the separate letters both by the eye and by the ear, in order that, when you heard them spoken or saw them written, you might not be confused by their position.

Theaetetus: Very true.

Socrates: And is the education of the harp-player complete unless he can tell what string answers to a particular note; the notes, as every one would allow, are the elements or letters of music?

Theaetetus: Exactly.

Socrates: Then, if we argue from the letters and syllables which we know to other simples and compounds, we shall say that the letters or simple elements as a class are much more certainly known than the syllables, and much more indispensable to a perfect knowledge of any subject; and if some one says that the syllable is known and the letter unknown, we shall consider that either intentionally or unintentionally he is talking nonsense?

Theaetetus: Exactly.

Socrates: And there might be given other proofs of this belief, if I am not mistaken. But do not let us in looking for them lose sight of the question before us, which is the meaning of the statement, that right opinion with rational definition or explanation is the most perfect form of knowledge.

Theaetetus: We must not.

Socrates: Well, and what is the meaning of the term ‘explanation’? I think that we have a choice of three meanings.

Theaetetus: What are they?

Socrates: In the first place, the meaning may be, manifesting one’s thought by the voice with verbs and nouns, imaging an opinion in the stream which flows from the lips, as in a mirror or water. Does not explanation appear to be of this nature?

Theaetetus: Certainly; he who so manifests his thought, is said to explain himself.

Socrates: And every one who is not born deaf or dumb is able sooner or later to manifest what he thinks of anything; and if so, all those who have a right opinion about anything will also have right explanation; nor will right opinion be anywhere found to exist apart from knowledge.

Theaetetus: True.

Socrates: Let us not, therefore, hastily charge him who gave this account of knowledge with uttering an unmeaning word; for perhaps he only intended to say, that when a person was asked what was the nature of anything, he should be able to answer his questioner by giving the elements of the thing.

Theaetetus: As for example, Socrates…?

Socrates: As, for example, when Hesiod says that a waggon is made up of a hundred planks. Now, neither you nor I could describe all of them individually; but if any one asked what is a waggon, we should be content to answer, that a waggon consists of wheels, axle, body, rims, yoke.

Theaetetus: Certainly.

Socrates: And our opponent will probably laugh at us, just as he would if we professed to be grammarians and to give a grammatical account of the name of Theaetetus, and yet could only tell the syllables and not the letters of your name — that would be true opinion, and not knowledge; for knowledge, as has been already remarked, is not attained until, combined with true opinion, there is an enumeration of the elements out of which anything is composed.

Theaetetus: Yes.

Socrates: In the same general way, we might also have true opinion about a waggon; but he who can describe its essence by an enumeration of the hundred planks, adds rational explanation to true opinion, and instead of opinion has art and knowledge of the nature of a waggon, in that he attains to the whole through the elements.

Theaetetus: And do you not agree in that view, Socrates?

Socrates: If you do, my friend; but I want to know first, whether you admit the resolution of all things into their elements to be a rational explanation of them, and the consideration of them in syllables or larger combinations of them to be irrational — is this your view?

Theaetetus: Precisely.

Socrates: Well, and do you conceive that a man has knowledge of any element who at one time affirms and at another time denies that element of something, or thinks that the same thing is composed of different elements at different times?

Theaetetus: Assuredly not.

Socrates: And do you not remember that in your case and in that of others this often occurred in the process of learning to read?

Theaetetus: You mean that I mistook the letters and misspelt the syllables?

Socrates: Yes.

Theaetetus: To be sure; I perfectly remember, and I am very far from supposing that they who are in this condition have knowledge.

Socrates: When a person at the time of learning writes the name of Theaetetus, and thinks that he ought to write and does write Th and e; but, again, meaning to write the name of Theododorus, thinks that he ought to write and does write T and e — can we suppose that he knows the first syllables of your two names?

Theaetetus: We have already admitted that such a one has not yet attained knowledge.

Socrates: And in like manner be may enumerate without knowing them the second and third and fourth syllables of your name?

Theaetetus: He may.

Socrates: And in that case, when he knows the order of the letters and can write them out correctly, he has right opinion?

Theaetetus: Clearly.

Socrates: But although we admit that he has right opinion, he will still be without knowledge?

Theaetetus: Yes.

Socrates: And yet he will have explanation, as well as right opinion, for he knew the order of the letters when he wrote; and this we admit to be explanation.

Theaetetus: True.

Socrates: Then, my friend, there is such a thing as right opinion united with definition or explanation, which does not as yet attain to the exactness of knowledge.

Theaetetus: It would seem so.

Socrates: And what we fancied to be a perfect definition of knowledge is a dream only. But perhaps we had better not say so as yet, for were there not three explanations of knowledge, one of which must, as we said, be adopted by him who maintains knowledge to be true opinion combined with rational explanation? And very likely there may be found some one who will not prefer this but the third.

Theaetetus: You are quite right; there is still one remaining. The first was the image or expression of the mind in speech; the second, which has just been mentioned, is a way of reaching the whole by an enumeration of the elements. But what is the third definition?

Socrates: There is, further, the popular notion of telling the mark or sign of difference which distinguishes the thing in question from all others.

Theaetetus: Can you give me any example of such a definition?

Socrates: As, for example, in the case of the sun, I think that you would be contented with the statement that the sun is the brightest of the heavenly bodies which revolve about the earth.

Theaetetus: Certainly.

Socrates: Understand why: — the reason is, as I was just now saying, that if you get at the difference and distinguishing characteristic of each thing, then, as many persons affirm, you will get at the definition or explanation of it; but while you lay hold only of the common and not of the characteristic notion, you will only have the definition of those things to which this common quality belongs.

Theaetetus: I understand you, and your account of definition is in my judgment correct.

Socrates: But he, who having right opinion about anything, can find out the difference which distinguishes it from other things will know that of which before he had only an opinion.

Theaetetus: Yes; that is what we are maintaining.

Socrates: Nevertheless, Theaetetus, on a nearer view, I find myself quite disappointed; the picture, which at a distance was not so bad, has now become altogether unintelligible.

Theaetetus: What do you mean?

Socrates: I will endeavour to explain: I will suppose myself to have true opinion of you, and if to this I add your definition, then I have knowledge, but if not, opinion only.

Theaetetus: Yes.

Socrates: The definition was assumed to be the interpretation of your difference.

Theaetetus: True.

Socrates: But when I had only opinion, I had no conception of your distinguishing characteristics.

Theaetetus: I suppose not.

Socrates: Then I must have conceived of some general or common nature which no more belonged to you than to another.

Theaetetus: True.

Socrates: Tell me, now — How in that case could I have formed a judgment of you any more than of any one else? Suppose that I imagine Theaetetus to be a man who has nose, eyes, and mouth, and every other member complete; how would that enable me to distinguish Theaetetus from Theodorus, or from some outer barbarian?

Theaetetus: How could it?

Socrates: Or if I had further conceived of you, not only as having nose and eyes, but as having a snub nose and prominent eyes, should I have any more notion of you than of myself and others who resemble me?

Theaetetus: Certainly not.

Socrates: Surely I can have no conception of Theaetetus until your snub-nosedness has left an impression on my mind different from the snub-nosedness of all others whom I have ever seen, and until your other peculiarities have a like distinctness; and so when I meet you to-morrow the right opinion will be re-called?

Theaetetus: Most true.

Socrates: Then right opinion implies the perception of differences?

Theaetetus: Clearly.

Socrates: What, then, shall we say of adding reason or explanation to right opinion? If the meaning is, that we should form an opinion of the way in which something differs from another thing, the proposal is ridiculous.

Theaetetus: How so?

Socrates: We are supposed to acquire a right opinion of the differences which distinguish one thing from another when we have already a right opinion of them, and so we go round and round: — the revolution of the scytal, or pestle, or any other rotatory machine, in the same circles, is as nothing compared with such a requirement; and we may be truly described as the blind directing the blind; for to add those things which we already have, in order that we may learn what we already think, is like a soul utterly benighted.

Theaetetus: Tell me; what were you going to say just now, when you asked the question?

Socrates: If, my boy, the argument, in speaking of adding the definition, had used the word to ‘know,’ and not merely ‘have an opinion’ of the difference, this which is the most promising of all the definitions of knowledge would have come to a pretty end, for to know is surely to acquire knowledge.

Theaetetus: True.

Socrates: And so, when the question is asked, What is knowledge? this fair argument will answer ‘Right opinion with knowledge,’ — knowledge, that is, of difference, for this, as the said argument maintains, is adding the definition.

Theaetetus: That seems to be true.

Socrates: But how utterly foolish, when we are asking what is knowledge, that the reply should only be, right opinion with knowledge of difference or of anything! And so, Theaetetus, knowledge is neither sensation nor true opinion, nor yet definition and explanation accompanying and added to true opinion?

Theaetetus: I suppose not.

Socrates: And are you still in labour and travail, my dear friend, or have you brought all that you have to say about knowledge to the birth?

Theaetetus: I am sure, Socrates, that you have elicited from me a good deal more than ever was in me.

Socrates: And does not my art show that you have brought forth wind, and that the offspring of your brain are not worth bringing up?

Theaetetus: Very true.

Socrates: But if, Theaetetus, you should ever conceive afresh, you will be all the better for the present investigation, and if not, you will be soberer and humbler and gentler to other men, and will be too modest to fancy that you know what you do not know. These are the limits of my art; I can no further go, nor do I know aught of the things which great and famous men know or have known in this or former ages. The office of a midwife I, like my mother, have received from God; she delivered women, I deliver men; but they must be young and noble and fair.

And now I have to go to the porch of the King Archon, where I am to meet Meletus and his indictment. To-morrow morning,

Theodorus, I shall hope to see you again at this place.

Statesman

ΠΟΛΙΤΙΚΟΣ

Socrates: I owe you many thanks, indeed, Theodorus, for the acquaintance both of Theaetetus and of the Stranger.

Theodorus: And in a little while, Socrates, you will owe me three times as many, when they have completed for you the delineation of the Statesman and of the Philosopher, as well as of the Sophist.

Socrates: Sophist, statesman, philosopher! O my dear Theodorus, do my ears truly witness that this is the estimate formed of them by the great calculator and geometrician?

Theodorus: What do you mean, Socrates?

Socrates: I mean that you rate them all at the same value, whereas they are really separated by an interval, which no geometrical ratio can express.

Theodorus: By Ammon, the god of Cyrene, Socrates, that is a very fair hit; and shows that you have not forgotten your geometry. I will retaliate on you at some other time, but I must now ask the Stranger, who will not, I hope, tire of his goodness to us, to proceed either with the Statesman or with the Philosopher, whichever he prefers.

Stranger: That is my duty, Theodorus; having begun I must go on, and not leave the work unfinished. But what shall be done with Theaetetus?

Theodorus: In what respect?

Stranger: Shall we relieve him, and take his companion, the Young Socrates, instead of him? What do you advise?

Theodorus: Yes, give the other a turn, as you propose. The young always do better when they have intervals of rest.

Socrates: I think, Stranger, that both of them may be said to be in some way related to me; for the one, as you affirm, has the cut of my ugly face (compare Theaet.), the other is called by my name. And we should always be on the look-out to recognize a kinsman by the style of his conversation. I myself was discoursing with Theaetetus yesterday, and I have just been listening to his answers; my namesake I have not yet examined, but I must. Another time will do for me; to-day let him answer you.

Stranger: Very good. Young Socrates, do you hear what the elder Socrates is proposing?

Young Socrates: I do.

Stranger: And do you agree to his proposal?

Young Socrates: Certainly.

Stranger: As you do not object, still less can I. After the Sophist, then, I think that the Statesman naturally follows next in the order of enquiry. And please to say, whether he, too, should be ranked among those who have science.

Young Socrates: Yes.

Stranger: Then the sciences must be divided as before?

Young Socrates: I dare say.

Stranger: But yet the division will not be the same?

Young Socrates: How then?

Stranger: They will be divided at some other point.

Young Socrates: Yes.

Stranger: Where shall we discover the path of the Statesman? We must find and separate off, and set our seal upon this, and we will set the mark of another class upon all diverging paths. Thus the soul will conceive of all kinds of knowledge under two classes.

Young Socrates: To find the path is your business, Stranger, and not mine.

Stranger: Yes, Socrates, but the discovery, when once made, must be yours as well as mine.

Young Socrates: Very good.

Stranger: Well, and are not arithmetic and certain other kindred arts, merely abstract knowledge, wholly separated from action?

Young Socrates: True.

Stranger: But in the art of carpentering and all other handicrafts, the knowledge of the workman is merged in his work; he not only knows, but he also makes things which previously did not exist.

Young Socrates: Certainly.

Stranger: Then let us divide sciences in general into those which are practical and those which are purely intellectual.

Young Socrates: Let us assume these two divisions of science, which is one whole.

Stranger: And are ‘statesman,’ ‘king,’ ‘master,’ or ‘householder,’ one and the same; or is there a science or art answering to each of these names? Or rather, allow me to put the matter in another way.

Young Socrates: Let me hear.

Stranger: If any one who is in a private station has the skill to advise one of the public physicians, must not he also be called a physician?

Young Socrates: Yes.

Stranger: And if any one who is in a private station is able to advise the ruler of a country, may not he be said to have the knowledge which the ruler himself ought to have?

Young Socrates: True.

Stranger: But surely the science of a true king is royal science?

Young Socrates: Yes.

Stranger: And will not he who possesses this knowledge, whether he happens to be a ruler or a private man, when regarded only in reference to his art, be truly called ‘royal’?

Young Socrates: He certainly ought to be.

Stranger: And the householder and master are the same?

Young Socrates: Of course.

Stranger: Again, a large household may be compared to a small state: — will they differ at all, as far as government is concerned?

Young Socrates: They will not.

Stranger: Then, returning to the point which we were just now discussing, do we not clearly see that there is one science of all of them; and this science may be called either royal or political or economical; we will not quarrel with any one about the name.

Young Socrates: Certainly not.

Stranger: This too, is evident, that the king cannot do much with his hands, or with his whole body, towards the maintenance of his empire, compared with what he does by the intelligence and strength of his mind.

Young Socrates: Clearly not.

Stranger: Then, shall we say that the king has a greater affinity to knowledge than to manual arts and to practical life in general?

Young Socrates: Certainly he has.

Stranger: Then we may put all together as one and the same — statesmanship and the statesman — the kingly science and the king.

Young Socrates: Clearly.

Stranger: And now we shall only be proceeding in due order if we go on to divide the sphere of knowledge?

Young Socrates: Very good.

Stranger: Think whether you can find any joint or parting in knowledge.

Young Socrates: Tell me of what sort.

Stranger: Such as this: You may remember that we made an art of calculation?

Young Socrates: Yes.

Stranger: Which was, unmistakeably, one of the arts of knowledge?

Young Socrates: Certainly.

Stranger: And to this art of calculation which discerns the differences of numbers shall we assign any other function except to pass judgment on their differences?

Young Socrates: How could we?

Stranger: You know that the master-builder does not work himself, but is the ruler of workmen?

Young Socrates: Yes.

Stranger: He contributes knowledge, not manual labour?

Young Socrates: True.

Stranger: And may therefore be justly said to share in theoretical science?

Young Socrates: Quite true.

Stranger: But he ought not, like the calculator, to regard his functions as at an end when he has formed a judgment; — he must assign to the individual workmen their appropriate task until they have completed the work.

Young Socrates: True.

Stranger: Are not all such sciences, no less than arithmetic and the like, subjects of pure knowledge; and is not the difference between the two classes, that the one sort has the power of judging only, and the other of ruling as well?

Young Socrates: That is evident.

Stranger: May we not very properly say, that of all knowledge, there are two divisions — one which rules, and the other which judges?

Young Socrates: I should think so.

Stranger: And when men have anything to do in common, that they should be of one mind is surely a desirable thing?

Young Socrates: Very true.

Stranger: Then while we are at unity among ourselves, we need not mind about the fancies of others?

Young Socrates: Certainly not.

Stranger: And now, in which of these divisions shall we place the king? — Is he a judge and a kind of spectator? Or shall we assign to him the art of command — for he is a ruler?

Young Socrates: The latter, clearly.

Stranger: Then we must see whether there is any mark of division in the art of command too. I am inclined to think that there is a distinction similar to that of manufacturer and retail dealer, which parts off the king from the herald.

Young Socrates: How is this?

Stranger: Why, does not the retailer receive and sell over again the productions of others, which have been sold before?

Young Socrates: Certainly he does.

Stranger: And is not the herald under command, and does he not receive orders, and in his turn give them to others?

Young Socrates: Very true.

Stranger: Then shall we mingle the kingly art in the same class with the art of the herald, the interpreter, the boatswain, the prophet, and the numerous kindred arts which exercise command; or, as in the preceding comparison we spoke of manufacturers, or sellers for themselves, and of retailers, — seeing, too, that the class of supreme rulers, or rulers for themselves, is almost nameless — shall we make a word following the same analogy, and refer kings to a supreme or ruling-for-self science, leaving the rest to receive a name from some one else? For we are seeking the ruler; and our enquiry is not concerned with him who is not a ruler.

Young Socrates: Very good.

Stranger: Thus a very fair distinction has been attained between the man who gives his own commands, and him who gives another's. And now let us see if the supreme power allows of any further division.

Young Socrates: By all means.

Stranger: I think that it does; and please to assist me in making the division.

Young Socrates: At what point?

Stranger: May not all rulers be supposed to command for the sake of producing something?

Young Socrates: Certainly.

Stranger: Nor is there any difficulty in dividing the things produced into two classes.

Young Socrates: How would you divide them?

Stranger: Of the whole class, some have life and some are without life.

Young Socrates: True.

Stranger: And by the help of this distinction we may make, if we please, a subdivision of the section of knowledge which commands.

Young Socrates: At what point?

Stranger: One part may be set over the production of lifeless, the other of living objects; and in this way the whole will be divided.

Young Socrates: Certainly.

Stranger: That division, then, is complete; and now we may leave one half, and take up the other; which may also be divided into two.

Young Socrates: Which of the two halves do you mean?

Stranger: Of course that which exercises command about animals. For, surely, the royal science is not like that of a master-workman, a science presiding over lifeless objects; — the king has a nobler function, which is the management and control of living beings.

Young Socrates: True.

Stranger: And the breeding and tending of living beings may be observed to be sometimes a tending of the individual; in other cases, a common care of creatures in flocks?

Young Socrates: True.

Stranger: But the statesman is not a tender of individuals — not like the driver or groom of a single ox or horse; he is rather to be compared with the keeper of a drove of horses or oxen.

Young Socrates: Yes, I see, thanks to you.

Stranger: Shall we call this art of tending many animals together, the art of managing a herd, or the art of collective management?

Young Socrates: No matter; — whichever suggests itself to us in the course of conversation.

Stranger: Very good, Socrates; and, if you continue to be not too particular about names, you will be all the richer in wisdom when you are an old man. And now, as you say, leaving the discussion of the name, — can you see a way in which a person, by showing the art of herding to be of two kinds, may cause that which is now sought amongst twice the number of things, to be then sought amongst half that number?

Young Socrates: I will try; — there appears to me to be one management of men and another of beasts.

Stranger: You have certainly divided them in a most straightforward and manly style; but you have fallen into an error which hereafter I think that we had better avoid.

Young Socrates: What is the error?

Stranger: I think that we had better not cut off a single small portion which is not a species, from many larger portions; the part should be a species. To separate off at once the subject of investigation, is a most excellent plan, if only the separation be rightly made; and you were under the impression that you were right, because you saw that you would come to man; and this led you to hasten the steps. But you should not chip off too small a piece, my friend; the safer way is to cut through the middle; which is also the more likely way of finding classes. Attention to this principle makes all the difference in a process of enquiry.

Young Socrates: What do you mean, Stranger?

Stranger: I will endeavour to speak more plainly out of love to your good parts, Socrates; and, although I cannot at present entirely explain myself, I will try, as we proceed, to make my

meaning a little clearer.

Young Socrates: What was the error of which, as you say, we were guilty in our recent division?

Stranger: The error was just as if some one who wanted to divide the human race, were to divide them after the fashion which prevails in this part of the world; here they cut off the Hellenes as one species, and all the other species of mankind, which are innumerable, and have no ties or common language, they include under the single name of 'barbarians,' and because they have one name they are supposed to be of one species also. Or suppose that in dividing numbers you were to cut off ten thousand from all the rest, and make of it one species, comprehending the rest under another separate name, you might say that here too was a single class, because you had given it a single name. Whereas you would make a much better and more equal and logical classification of numbers, if you divided them into odd and even; or of the human species, if you divided them into male and female; and only separated off Lydians or Phrygians, or any other tribe, and arrayed them against the rest of the world, when you could no longer make a division into parts which were also classes.

Young Socrates: Very true; but I wish that this distinction between a part and a class could still be made somewhat plainer.

Stranger: O Socrates, best of men, you are imposing upon me a very difficult task. We have already digressed further from our original intention than we ought, and you would have us wander still further away. But we must now return to our subject; and hereafter, when there is a leisure hour, we will follow up the other track; at the same time, I wish you to guard against imagining that you ever heard me declare —

Young Socrates: What?

Stranger: That a class and a part are distinct.

Young Socrates: What did I hear, then?

Stranger: That a class is necessarily a part, but there is no similar necessity that a part should be a class; that is the view which I should always wish you to attribute to me, Socrates.

Young Socrates: So be it.

Stranger: There is another thing which I should like to know.

Young Socrates: What is it?

Stranger: The point at which we digressed; for, if I am not mistaken, the exact place was at the question, Where you would divide the management of herds. To this you appeared rather too ready to answer that there were two species of animals; man being one, and all brutes making up the other.

Young Socrates: True.

Stranger: I thought that in taking away a part, you imagined that the remainder formed a class, because you were able to call them by the common name of brutes.

Young Socrates: That again is true.

Stranger: Suppose now, O most courageous of dialecticians, that some wise and understanding creature, such as a crane is reputed to be, were, in imitation of you, to make a similar division, and set up cranes against all other animals to their own special glorification, at the same time jumbling together all the others, including man, under the appellation of brutes, — here would be the sort of error which we must try to avoid.

Young Socrates: How can we be safe?

Stranger: If we do not divide the whole class of animals, we shall be less likely to fall into that error.

Young Socrates: We had better not take the whole?

Stranger: Yes, there lay the source of error in our former division.

Young Socrates: How?

Stranger: You remember how that part of the art of knowledge which was concerned with command, had to do with the rearing of living creatures, — I mean, with animals in herds?

Young Socrates: Yes.

Stranger: In that case, there was already implied a division of all animals into tame and wild; those whose nature can be tamed are called tame, and those which cannot be tamed are called wild.

Young Socrates: True.

Stranger: And the political science of which we are in search, is and ever was concerned with tame animals, and is also confined to gregarious animals.

Young Socrates: Yes.

Stranger: But then we ought not to divide, as we did, taking the whole class at once. Neither let us be in too great haste to arrive quickly at the political science; for this mistake has already brought upon us the misfortune of which the proverb speaks.

Young Socrates: What misfortune?

Stranger: The misfortune of too much haste, which is too little speed.

Young Socrates: And all the better, Stranger; — we got what we deserved.

Stranger: Very well: Let us then begin again, and endeavour to divide the collective rearing of animals; for probably the completion of the argument will best show what you are so anxious to know. Tell me, then —

Young Socrates: What?

Stranger: Have you ever heard, as you very likely may — for I do not suppose that you ever actually visited them — of the

preserves of fishes in the Nile, and in the ponds of the Great King; or you may have seen similar preserves in wells at home?

Young Socrates: Yes, to be sure, I have seen them, and I have often heard the others described.

Stranger: And you may have heard also, and may have been assured by report, although you have not travelled in those regions, of nurseries of geese and cranes in the plains of Thessaly?

Young Socrates: Certainly.

Stranger: I asked you, because here is a new division of the management of herds, into the management of land and of water herds.

Young Socrates: There is.

Stranger: And do you agree that we ought to divide the collective rearing of herds into two corresponding parts, the one the rearing of water, and the other the rearing of land herds?

Young Socrates: Yes.

Stranger: There is surely no need to ask which of these two contains the royal art, for it is evident to everybody.

Young Socrates: Certainly.

Stranger: Any one can divide the herds which feed on dry land?

Young Socrates: How would you divide them?

Stranger: I should distinguish between those which fly and those which walk.

Young Socrates: Most true.

Stranger: And where shall we look for the political animal? Might not an idiot, so to speak, know that he is a pedestrian?

Young Socrates: Certainly.

Stranger: The art of managing the walking animal has to be further divided, just as you might halve an even number.

Young Socrates: Clearly.

Stranger: Let me note that here appear in view two ways to that part or class which the argument aims at reaching, — the one a speedier way, which cuts off a small portion and leaves a large; the other agrees better with the principle which we were laying down, that as far as we can we should divide in the middle; but it is longer. We can take either of them, whichever we please.

Young Socrates: Cannot we have both ways?

Stranger: Together? What a thing to ask! but, if you take them in turn, you clearly may.

Young Socrates: Then I should like to have them in turn.

Stranger: There will be no difficulty, as we are near the end; if we had been at the beginning, or in the middle, I should have demurred to your request; but now, in accordance with your desire, let us begin with the longer way; while we are fresh, we shall get on better. And now attend to the division.

Young Socrates: Let me hear.

Stranger: The tame walking herding animals are distributed by nature into two classes.

Young Socrates: Upon what principle?

Stranger: The one grows horns; and the other is without horns.

Young Socrates: Clearly.

Stranger: Suppose that you divide the science which manages pedestrian animals into two corresponding parts, and define them; for if you try to invent names for them, you will find the intricacy too great.

Young Socrates: How must I speak of them, then?

Stranger: In this way: let the science of managing pedestrian animals be divided into two parts, and one part assigned to the horned herd, and the other to the herd that has no horns.

Young Socrates: All that you say has been abundantly proved, and may therefore be assumed.

Stranger: The king is clearly the shepherd of a polled herd, who have no horns.

Young Socrates: That is evident.

Stranger: Shall we break up this hornless herd into sections, and endeavour to assign to him what is his?

Young Socrates: By all means.

Stranger: Shall we distinguish them by their having or not having cloven feet, or by their mixing or not mixing the breed? You know what I mean.

Young Socrates: What?

Stranger: I mean that horses and asses naturally breed from one another.

Young Socrates: Yes.

Stranger: But the remainder of the hornless herd of tame animals will not mix the breed.

Young Socrates: Very true.

Stranger: And of which has the Statesman charge, — of the mixed or of the unmixed race?

Young Socrates: Clearly of the unmixed.

Stranger: I suppose that we must divide this again as before.

Young Socrates: We must.

Stranger: Every tame and herding animal has now been split up, with the exception of two species; for I hardly think that dogs should be reckoned among gregarious animals.

Young Socrates: Certainly not; but how shall we divide the two remaining species?

Stranger: There is a measure of difference which may be appropriately employed by you and Theaetetus, who are students of geometry.

Young Socrates: What is that?

Stranger: The diameter; and, again, the diameter of a diameter. (Compare Meno.)

Young Socrates: What do you mean?

Stranger: How does man walk, but as a diameter whose power is two feet?

Young Socrates: Just so.

Stranger: And the power of the remaining kind, being the power of twice two feet, may be said to be the diameter of our diameter.

Young Socrates: Certainly; and now I think that I pretty nearly understand you.

Stranger: In these divisions, Socrates, I descry what would make another famous jest.

Young Socrates: What is it?

Stranger: Human beings have come out in the same class with the freest and airiest of creation, and have been running a race with them.

Young Socrates: I remark that very singular coincidence.

Stranger: And would you not expect the slowest to arrive last?

Young Socrates: Indeed I should.

Stranger: And there is a still more ridiculous consequence, that the king is found running about with the herd and in close competition with the bird-catcher, who of all mankind is most of an adept at the airy life. (Plato is here introducing a new

subdivision, i.e. that of bipeds into men and birds. Others however refer the passage to the division into quadrupeds and bipeds, making pigs compete with human beings and the pig-driver with the king. According to this explanation we must translate the words above, ‘freest and airiest of creation,’ ‘worthiest and laziest of creation.’)

Young Socrates: Certainly.

Stranger: Then here, Socrates, is still clearer evidence of the truth of what was said in the enquiry about the Sophist? (Compare Sophist.)

Young Socrates: What?

Stranger: That the dialectical method is no respecter of persons, and does not set the great above the small, but always arrives in her own way at the truest result.

Young Socrates: Clearly.

Stranger: And now, I will not wait for you to ask, but will of my own accord take you by the shorter road to the definition of a king.

Young Socrates: By all means.

Stranger: I say that we should have begun at first by dividing land animals into biped and quadruped; and since the winged herd, and that alone, comes out in the same class with man, we should divide bipeds into those which have feathers and those which have not, and when they have been divided, and the art of the management of mankind is brought to light, the time will have come to produce our Statesman and ruler, and set him like a charioteer in his place, and hand over to him the reins of state, for that too is a vocation which belongs to him.

Young Socrates: Very good; you have paid me the debt, — I mean, that you have completed the argument, and I suppose that you added the digression by way of interest. (Compare Republic.)

Stranger: Then now, let us go back to the beginning, and join the links, which together make the definition of the name of the Statesman’s art.

Young Socrates: By all means.

Stranger: The science of pure knowledge had, as we said originally, a part which was the science of rule or command, and from this was derived another part, which was called command-for-self, on the analogy of selling-for-self; an important section of this was the management of living animals, and this again was further limited to the management of them in herds; and again in herds of pedestrian animals. The chief division of the latter was the art of managing pedestrian animals which are without horns; this again has a part which can only be comprehended under one term by joining together three names — shepherding pure-bred animals. The only further subdivision is the art of man-herding, — this has to do with bipeds, and is what we were seeking after, and have now found, being at once the royal and political.

Young Socrates: To be sure.

Stranger: And do you think, Socrates, that we really have done as you say?

Young Socrates: What?

Stranger: Do you think, I mean, that we have really fulfilled our intention? — There has been a sort of discussion, and yet the investigation seems to me not to be perfectly worked out: this is where the enquiry fails.

Young Socrates: I do not understand.

Stranger: I will try to make the thought, which is at this moment present in my mind, clearer to us both.

Young Socrates: Let me hear.

Stranger: There were many arts of shepherding, and one of them was the political, which had the charge of one particular

herd?

Young Socrates: Yes.

Stranger: And this the argument defined to be the art of rearing, not horses or other brutes, but the art of rearing man collectively?

Young Socrates: True.

Stranger: Note, however, a difference which distinguishes the king from all other shepherds.

Young Socrates: To what do you refer?

Stranger: I want to ask, whether any one of the other herdsmen has a rival who professes and claims to share with him in the management of the herd?

Young Socrates: What do you mean?

Stranger: I mean to say that merchants, husbandmen, providers of food, and also training-masters and physicians, will all contend with the herdsmen of humanity, whom we call Statesmen, declaring that they themselves have the care of rearing or managing mankind, and that they rear not only the common herd, but also the rulers themselves.

Young Socrates: Are they not right in saying so?

Stranger: Very likely they may be, and we will consider their claim. But we are certain of this, — that no one will raise a similar claim as against the herdsman, who is allowed on all hands to be the sole and only feeder and physician of his herd; he is also their match-maker and accoucheur; no one else knows that department of science. And he is their merry-maker and musician, as far as their nature is susceptible of such influences, and no one can console and soothe his own herd better than he can, either with the natural tones of his voice or with instruments. And the same may be said of tenders of animals in general.

Young Socrates: Very true.

Stranger: But if this is as you say, can our argument about the king be true and unimpeachable? Were we right in selecting him out of ten thousand other claimants to be the shepherd and rearer of the human flock?

Young Socrates: Surely not.

Stranger: Had we not reason just to now to apprehend, that although we may have described a sort of royal form, we have not as yet accurately worked out the true image of the Statesman? and that we cannot reveal him as he truly is in his own nature, until we have disengaged and separated him from those who hang about him and claim to share in his prerogatives?

Young Socrates: Very true.

Stranger: And that, Socrates, is what we must do, if we do not mean to bring disgrace upon the argument at its close.

Young Socrates: We must certainly avoid that.

Stranger: Then let us make a new beginning, and travel by a different road.

Young Socrates: What road?

Stranger: I think that we may have a little amusement; there is a famous tale, of which a good portion may with advantage be interwoven, and then we may resume our series of divisions, and proceed in the old path until we arrive at the desired summit. Shall we do as I say?

Young Socrates: By all means.

Stranger: Listen, then, to a tale which a child would love to hear; and you are not too old for childish amusement.

Young Socrates: Let me hear.

Stranger: There did really happen, and will again happen, like many other events of which ancient tradition has preserved the record, the portent which is traditionally said to have occurred in the quarrel of Atreus and Thyestes. You have heard, no doubt, and remember what they say happened at that time?

Young Socrates: I suppose you to mean the token of the birth of the golden lamb.

Stranger: No, not that; but another part of the story, which tells how the sun and the stars once rose in the west, and set in the east, and that the god reversed their motion, and gave them that which they now have as a testimony to the right of Atreus.

Young Socrates: Yes; there is that legend also.

Stranger: Again, we have been often told of the reign of Cronos.

Young Socrates: Yes, very often.

Stranger: Did you ever hear that the men of former times were earth-born, and not begotten of one another?

Young Socrates: Yes, that is another old tradition.

Stranger: All these stories, and ten thousand others which are still more wonderful, have a common origin; many of them have been lost in the lapse of ages, or are repeated only in a disconnected form; but the origin of them is what no one has told, and may as well be told now; for the tale is suited to throw light on the nature of the king.

Young Socrates: Very good; and I hope that you will give the whole story, and leave out nothing.

Stranger: Listen, then. There is a time when God himself guides and helps to roll the world in its course; and there is a time, on the completion of a certain cycle, when he lets go, and the world being a living creature, and having originally received intelligence from its author and creator, turns about and by an inherent necessity revolves in the opposite direction.

Young Socrates: Why is that?

Stranger: Why, because only the most divine things of all remain ever unchanged and the same, and body is not included in this class. Heaven and the universe, as we have termed them, although they have been endowed by the Creator with many glories, partake of a bodily nature, and therefore cannot be entirely free from perturbation. But their motion is, as far as possible, single and in the same place, and of the same kind; and is therefore only subject to a reversal, which is the least alteration possible. For the lord of all moving things is alone able to move of himself; and to think that he moves them at one time in one direction and at another time in another is blasphemy. Hence we must not say that the world is either self-moved always, or all made to go round by God in two opposite courses; or that two Gods, having opposite purposes, make it move round. But as I have already said (and this is the only remaining alternative) the world is guided at one time by an external power which is divine and receives fresh life and immortality from the renewing hand of the Creator, and again, when let go, moves spontaneously, being set free at such a time as to have, during infinite cycles of years, a reverse movement: this is due to its perfect balance, to its vast size, and to the fact that it turns on the smallest pivot.

Young Socrates: Your account of the world seems to be very reasonable indeed.

Stranger: Let us now reflect and try to gather from what has been said the nature of the phenomenon which we affirmed to be the cause of all these wonders. It is this.

Young Socrates: What?

Stranger: The reversal which takes place from time to time of the motion of the universe.

Young Socrates: How is that the cause?

Stranger: Of all changes of the heavenly motions, we may consider this to be the greatest and most complete.

Young Socrates: I should imagine so.

Stranger: And it may be supposed to result in the greatest changes to the human beings who are the inhabitants of the world at the time.

Young Socrates: Such changes would naturally occur.

Stranger: And animals, as we know, survive with difficulty great and serious changes of many different kinds when they come upon them at once.

Young Socrates: Very true.

Stranger: Hence there necessarily occurs a great destruction of them, which extends also to the life of man; few survivors of the race are left, and those who remain become the subjects of several novel and remarkable phenomena, and of one in particular, which takes place at the time when the transition is made to the cycle opposite to that in which we are now living.

Young Socrates: What is it?

Stranger: The life of all animals first came to a standstill, and the mortal nature ceased to be or look older, and was then reversed and grew young and delicate; the white locks of the aged darkened again, and the cheeks the bearded man became smooth, and recovered their former bloom; the bodies of youths in their prime grew softer and smaller, continually by day and night returning and becoming assimilated to the nature of a newly-born child in mind as well as body; in the succeeding stage they wasted away and wholly disappeared. And the bodies of those who died by violence at that time quickly passed through the like changes, and in a few days were no more seen.

Young Socrates: Then how, Stranger, were the animals created in those days; and in what way were they begotten of one another?

Stranger: It is evident, Socrates, that there was no such thing in the then order of nature as the procreation of animals from one another; the earth-born race, of which we hear in story, was the one which existed in those days — they rose again from the ground; and of this tradition, which is now-a-days often unduly discredited, our ancestors, who were nearest in point of time to the end of the last period and came into being at the beginning of this, are to us the heralds. And mark how consistent the sequel of the tale is; after the return of age to youth, follows the return of the dead, who are lying in the earth, to life; simultaneously with the reversal of the world the wheel of their generation has been turned back, and they are put together and rise and live in the opposite order, unless God has carried any of them away to some other lot. According to this tradition they of necessity sprang from the earth and have the name of earth-born, and so the above legend clings to them.

Young Socrates: Certainly that is quite consistent with what has preceded; but tell me, was the life which you said existed in the reign of Cronos in that cycle of the world, or in this? For the change in the course of the stars and the sun must have occurred in both.

Stranger: I see that you enter into my meaning; — no, that blessed and spontaneous life does not belong to the present cycle of the world, but to the previous one, in which God superintended the whole revolution of the universe; and the several parts the universe were distributed under the rule of certain inferior deities, as is the way in some places still. There were demigods, who were the shepherds of the various species and herds of animals, and each one was in all respects sufficient for those of whom he was the shepherd; neither was there any violence, or devouring of one another, or war or quarrel among them; and I might tell of ten thousand other blessings, which belonged to that dispensation. The reason why the life of man was, as tradition says, spontaneous, is as follows: In those days

God himself was their shepherd, and ruled over them, just as man, who is by comparison a divine being, still rules over the lower animals. Under him there were no forms of government or separate possession of women and children; for all men rose again from the earth, having no memory of the past. And although they had nothing of this sort, the earth gave them fruits in abundance, which grew on trees and shrubs unbidden, and were not planted by the hand of man. And they dwelt naked, and mostly in the open air, for the temperature of their seasons was mild; and they had no beds, but lay on soft couches of grass, which grew plentifully out of the earth. Such was the life of man in the days of Cronos, Socrates; the character of our present life, which is said to be under Zeus, you know from your own experience. Can you, and will you, determine which of them you deem the happier?

Young Socrates: Impossible.

Stranger: Then shall I determine for you as well as I can?

Young Socrates: By all means.

Stranger: Suppose that the nurslings of Cronos, having this boundless leisure, and the power of holding intercourse, not only with men, but with the brute creation, had used all these advantages with a view to philosophy, conversing with the brutes as well as with one another, and learning of every nature which was gifted with any special power, and was able to contribute some special experience to the store of wisdom, there would be no difficulty in deciding that they would be a thousand times happier than the men of our own day. Or, again, if they had merely eaten and drunk until they were full, and told stories to one another and to the animals — such stories as are now attributed to them — in this case also, as I should imagine, the answer would be easy. But until some satisfactory witness can be found of the love of that age for knowledge and discussion, we had better let the matter drop, and give the reason why we have unearthed this tale, and then we shall be able to get on. In

the fulness of time, when the change was to take place, and the earth-born race had all perished, and every soul had completed its proper cycle of births and been sown in the earth her appointed number of times, the pilot of the universe let the helm go, and retired to his place of view; and then Fate and innate desire reversed the motion of the world. Then also all the inferior deities who share the rule of the supreme power, being informed of what was happening, let go the parts of the world which were under their control. And the world turning round with a sudden shock, being impelled in an opposite direction from beginning to end, was shaken by a mighty earthquake, which wrought a new destruction of all manner of animals. Afterwards, when sufficient time had elapsed, the tumult and confusion and earthquake ceased, and the universal creature, once more at peace, attained to a calm, and settled down into his own orderly and accustomed course, having the charge and rule of himself and of all the creatures which are contained in him, and executing, as far as he remembered them, the instructions of his Father and Creator, more precisely at first, but afterwords with less exactness. The reason of the falling off was the admixture of matter in him; this was inherent in the primal nature, which was full of disorder, until attaining to the present order. From God, the constructor, the world received all that is good in him, but from a previous state came elements of evil and unrighteousness, which, thence derived, first of all passed into the world, and were then transmitted to the animals. While the world was aided by the pilot in nurturing the animals, the evil was small, and great the good which he produced, but after the separation, when the world was let go, at first all proceeded well enough; but, as time went on, there was more and more forgetting, and the old discord again held sway and burst forth in full glory; and at last small was the good, and great was the admixture of evil, and there was a danger of universal ruin to the world, and to the things contained in him. Wherefore God, the orderer of all, in his tender care, seeing that

the world was in great straits, and fearing that all might be dissolved in the storm and disappear in infinite chaos, again seated himself at the helm; and bringing back the elements which had fallen into dissolution and disorder to the motion which had prevailed under his dispensation, he set them in order and restored them, and made the world imperishable and immortal. And this is the whole tale, of which the first part will suffice to illustrate the nature of the king. For when the world turned towards the present cycle of generation, the age of man again stood still, and a change opposite to the previous one was the result. The small creatures which had almost disappeared grew in and stature, and the newly-born children of the earth became grey and died and sank into the earth again. All things changed, imitating and following the condition of the universe, and of necessity agreeing with that in their mode of conception and generation and nurture; for no animal was any longer allowed to come into being in the earth through the agency of other creative beings, but as the world was ordained to be the lord of his own progress, in like manner the parts were ordained to grow and generate and give nourishment, as far as they could, of themselves, impelled by a similar movement. And so we have arrived at the real end of this discourse; for although there might be much to tell of the lower animals, and of the condition out of which they changed and of the causes of the change, about men there is not much, and that little is more to the purpose. Deprived of the care of God, who had possessed and tended them, they were left helpless and defenceless, and were torn in pieces by the beasts, who were naturally fierce and had now grown wild. And in the first ages they were still without skill or resource; the food which once grew spontaneously had failed, and as yet they knew not how to procure it, because they had never felt the pressure of necessity. For all these reasons they were in a great strait; wherefore also the gifts spoken of in the old tradition were imparted to man by the gods, together with so much teaching and education as was indispensable; fire

was given to them by Prometheus, the arts by Hephaestus and his fellow-worker, Athene, seeds and plants by others. From these is derived all that has helped to frame human life; since the care of the Gods, as I was saying, had now failed men, and they had to order their course of life for themselves, and were their own masters, just like the universal creature whom they imitate and follow, ever changing, as he changes, and ever living and growing, at one time in one manner, and at another time in another. Enough of the story, which may be of use in showing us how greatly we erred in the delineation of the king and the statesman in our previous discourse.

Young Socrates: What was this great error of which you speak?

Stranger: There were two; the first a lesser one, the other was an error on a much larger and grander scale.

Young Socrates: What do you mean?

Stranger: I mean to say that when we were asked about a king and statesman of the present cycle and generation, we told of a shepherd of a human flock who belonged to the other cycle, and of one who was a god when he ought to have been a man; and this a great error. Again, we declared him to be the ruler of the entire State, without explaining how: this was not the whole truth, nor very intelligible; but still it was true, and therefore the second error was not so great as the first.

Young Socrates: Very good.

Stranger: Before we can expect to have a perfect description of the statesman we must define the nature of his office.

Young Socrates: Certainly.

Stranger: And the myth was introduced in order to show, not only that all others are rivals of the true shepherd who is the object of our search, but in order that we might have a clearer view of him who is alone worthy to receive this appellation, because he alone of shepherds and herdsmen, according to the

image which we have employed, has the care of human beings.

Young Socrates: Very true.

Stranger: And I cannot help thinking, Socrates, that the form of the divine shepherd is even higher than that of a king; whereas the statesmen who are now on earth seem to be much more like their subjects in character, and much more nearly to partake of their breeding and education.

Young Socrates: Certainly.

Stranger: Still they must be investigated all the same, to see whether, like the divine shepherd, they are above their subjects or on a level with them.

Young Socrates: Of course.

Stranger: To resume: — Do you remember that we spoke of a command-for-self exercised over animals, not singly but collectively, which we called the art of rearing a herd?

Young Socrates: Yes, I remember.

Stranger: There, somewhere, lay our error; for we never included or mentioned the Statesman; and we did not observe that he had no place in our nomenclature.

Young Socrates: How was that?

Stranger: All other herdsmen ‘rear’ their herds, but this is not a suitable term to apply to the Statesman; we should use a name which is common to them all.

Young Socrates: True, if there be such a name.

Stranger: Why, is not ‘care’ of herds applicable to all? For this implies no feeding, or any special duty; if we say either ‘tending’ the herds, or ‘managing’ the herds, or ‘having the care’ of them, the same word will include all, and then we may wrap up the Statesman with the rest, as the argument seems to require.

Young Socrates: Quite right; but how shall we take the next step in the division?

Stranger: As before we divided the art of ‘rearing’ herds accordingly as they were land or water herds, winged and wingless, mixing or not mixing the breed, horned and hornless, so we may divide by these same differences the ‘tending’ of herds, comprehending in our definition the kingship of to-day and the rule of Cronos.

Young Socrates: That is clear; but I still ask, what is to follow.

Stranger: If the word had been ‘managing’ herds, instead of feeding or rearing them, no one would have argued that there was no care of men in the case of the politician, although it was justly contended, that there was no human art of feeding them which was worthy of the name, or at least, if there were, many a man had a prior and greater right to share in such an art than any king.

Young Socrates: True.

Stranger: But no other art or science will have a prior or better right than the royal science to care for human society and to rule over men in general.

Young Socrates: Quite true.

Stranger: In the next place, Socrates, we must surely notice that a great error was committed at the end of our analysis.

Young Socrates: What was it?

Stranger: Why, supposing we were ever so sure that there is such an art as the art of rearing or feeding bipeds, there was no reason why we should call this the royal or political art, as though there were no more to be said.

Young Socrates: Certainly not.

Stranger: Our first duty, as we were saying, was to remodel the name, so as to have the notion of care rather than of feeding,

and then to divide, for there may be still considerable divisions.

Young Socrates: How can they be made?

Stranger: First, by separating the divine shepherd from the human guardian or manager.

Young Socrates: True.

Stranger: And the art of management which is assigned to man would again have to be subdivided.

Young Socrates: On what principle?

Stranger: On the principle of voluntary and compulsory.

Young Socrates: Why?

Stranger: Because, if I am not mistaken, there has been an error here; for our simplicity led us to rank king and tyrant together, whereas they are utterly distinct, like their modes of government.

Young Socrates: True.

Stranger: Then, now, as I said, let us make the correction and divide human care into two parts, on the principle of voluntary and compulsory.

Young Socrates: Certainly.

Stranger: And if we call the management of violent rulers tyranny, and the voluntary management of herds of voluntary bipeds politics, may we not further assert that he who has this latter art of management is the true king and statesman?

Young Socrates: I think, Stranger, that we have now completed the account of the Statesman.

Stranger: Would that we had, Socrates, but I have to satisfy myself as well as you; and in my judgment the figure of the king is not yet perfected; like statuaries who, in their too great haste, having overdone the several parts of their work, lose time in cutting them down, so too we, partly out of haste, partly out of a

magnanimous desire to expose our former error, and also because we imagined that a king required grand illustrations, have taken up a marvellous lump of fable, and have been obliged to use more than was necessary. This made us discourse at large, and, nevertheless, the story never came to an end. And our discussion might be compared to a picture of some living being which had been fairly drawn in outline, but had not yet attained the life and clearness which is given by the blending of colours. Now to intelligent persons a living being had better be delineated by language and discourse than by any painting or work of art: to the duller sort by works of art.

Young Socrates: Very true; but what is the imperfection which still remains? I wish that you would tell me.

Stranger: The higher ideas, my dear friend, can hardly be set forth except through the medium of examples; every man seems to know all things in a dreamy sort of way, and then again to wake up and to know nothing.

Young Socrates: What do you mean?

Stranger: I fear that I have been unfortunate in raising a question about our experience of knowledge.

Young Socrates: Why so?

Stranger: Why, because my ‘example’ requires the assistance of another example.

Young Socrates: Proceed; you need not fear that I shall tire.

Stranger: I will proceed, finding, as I do, such a ready listener in you: when children are beginning to know their letters —

Young Socrates: What are you going to say?

Stranger: That they distinguish the several letters well enough in very short and easy syllables, and are able to tell them correctly.

Young Socrates: Certainly.

Stranger: Whereas in other syllables they do not recognize them, and think and speak falsely of them.

Young Socrates: Very true.

Stranger: Will not the best and easiest way of bringing them to a knowledge of what they do not as yet know be —

Young Socrates: Be what?

Stranger: To refer them first of all to cases in which they judge correctly about the letters in question, and then to compare these with the cases in which they do not as yet know, and to show them that the letters are the same, and have the same character in both combinations, until all cases in which they are right have been placed side by side with all cases in which they are wrong. In this way they have examples, and are made to learn that each letter in every combination is always the same and not another, and is always called by the same name.

Young Socrates: Certainly.

Stranger: Are not examples formed in this manner? We take a thing and compare it with another distinct instance of the same thing, of which we have a right conception, and out of the comparison there arises one true notion, which includes both of them.

Young Socrates: Exactly.

Stranger: Can we wonder, then, that the soul has the same uncertainty about the alphabet of things, and sometimes and in some cases is firmly fixed by the truth in each particular, and then, again, in other cases is altogether at sea; having somehow or other a correct notion of combinations; but when the elements are transferred into the long and difficult language (syllables) of facts, is again ignorant of them?

Young Socrates: There is nothing wonderful in that.

Stranger: Could any one, my friend, who began with false opinion ever expect to arrive even at a small portion of truth and

to attain wisdom?

Young Socrates: Hardly.

Stranger: Then you and I will not be far wrong in trying to see the nature of example in general in a small and particular instance; afterwards from lesser things we intend to pass to the royal class, which is the highest form of the same nature, and endeavour to discover by rules of art what the management of cities is; and then the dream will become a reality to us.

Young Socrates: Very true.

Stranger: Then, once more, let us resume the previous argument, and as there were innumerable rivals of the royal race who claim to have the care of states, let us part them all off, and leave him alone; and, as I was saying, a model or example of this process has first to be framed.

Young Socrates: Exactly.

Stranger: What model is there which is small, and yet has any analogy with the political occupation? Suppose, Socrates, that if we have no other example at hand, we choose weaving, or, more precisely, weaving of wool — this will be quite enough, without taking the whole of weaving, to illustrate our meaning?

Young Socrates: Certainly.

Stranger: Why should we not apply to weaving the same processes of division and subdivision which we have already applied to other classes; going once more as rapidly as we can through all the steps until we come to that which is needed for our purpose?

Young Socrates: How do you mean?

Stranger: I shall reply by actually performing the process.

Young Socrates: Very good.

Stranger: All things which we make or acquire are either creative or preventive; of the preventive class are antidotes,

divine and human, and also defences; and defences are either military weapons or protections; and protections are veils, and also shields against heat and cold, and shields against heat and cold are shelters and coverings; and coverings are blankets and garments; and garments are some of them in one piece, and others of them are made in several parts; and of these latter some are stitched, others are fastened and not stitched; and of the not stitched, some are made of the sinews of plants, and some of hair; and of these, again, some are cemented with water and earth, and others are fastened together by themselves. And these last defences and coverings which are fastened together by themselves are called clothes, and the art which superintends them we may call, from the nature of the operation, the art of clothing, just as before the art of the Statesman was derived from the State; and may we not say that the art of weaving, at least that largest portion of it which was concerned with the making of clothes, differs only in name from this art of clothing, in the same way that, in the previous case, the royal science differed from the political?

Young Socrates: Most true.

Stranger: In the next place, let us make the reflection, that the art of weaving clothes, which an incompetent person might fancy to have been sufficiently described, has been separated off from several others which are of the same family, but not from the co-operative arts.

Young Socrates: And which are the kindred arts?

Stranger: I see that I have not taken you with me. So I think that we had better go backwards, starting from the end. We just now parted off from the weaving of clothes, the making of blankets, which differ from each other in that one is put under and the other is put around: and these are what I termed kindred arts.

Young Socrates: I understand.

Stranger: And we have subtracted the manufacture of all articles made of flax and cords, and all that we just now metaphorically termed the sinews of plants, and we have also separated off the process of felting and the putting together of materials by stitching and sewing, of which the most important part is the cobbler’s art.

Young Socrates: Precisely.

Stranger: Then we separated off the currier’s art, which prepared coverings in entire pieces, and the art of sheltering, and subtracted the various arts of making water-tight which are employed in building, and in general in carpentering, and in other crafts, and all such arts as furnish impediments to thieving and acts of violence, and are concerned with making the lids of boxes and the fixing of doors, being divisions of the art of joining; and we also cut off the manufacture of arms, which is a section of the great and manifold art of making defences; and we originally began by parting off the whole of the magic art which is concerned with antidotes, and have left, as would appear, the very art of which we were in search, the art of protection against winter cold, which fabricates woollen defences, and has the name of weaving.

Young Socrates: Very true.

Stranger: Yes, my boy, but that is not all; for the first process to which the material is subjected is the opposite of weaving.

Young Socrates: How so?

Stranger: Weaving is a sort of uniting?

Young Socrates: Yes.

Stranger: But the first process is a separation of the clotted and matted fibres?

Young Socrates: What do you mean?

Stranger: I mean the work of the carder’s art; for we cannot say that carding is weaving, or that the carder is a weaver.

Young Socrates: Certainly not.

Stranger: Again, if a person were to say that the art of making the warp and the woof was the art of weaving, he would say what was paradoxical and false.

Young Socrates: To be sure.

Stranger: Shall we say that the whole art of the fuller or of the mender has nothing to do with the care and treatment of clothes, or are we to regard all these as arts of weaving?

Young Socrates: Certainly not.

Stranger: And yet surely all these arts will maintain that they are concerned with the treatment and production of clothes; they will dispute the exclusive prerogative of weaving, and though assigning a larger sphere to that, will still reserve a considerable field for themselves.

Young Socrates: Very true.

Stranger: Besides these, there are the arts which make tools and instruments of weaving, and which will claim at least to be co-operative causes in every work of the weaver.

Young Socrates: Most true.

Stranger: Well, then, suppose that we define weaving, or rather that part of it which has been selected by us, to be the greatest and noblest of arts which are concerned with woollen garments — shall we be right? Is not the definition, although true, wanting in clearness and completeness; for do not all those other arts require to be first cleared away?

Young Socrates: True.

Stranger: Then the next thing will be to separate them, in order that the argument may proceed in a regular manner?

Young Socrates: By all means.

Stranger: Let us consider, in the first place, that there are two kinds of arts entering into everything which we do.

Young Socrates: What are they?

Stranger: The one kind is the conditional or co-operative, the other the principal cause.

Young Socrates: What do you mean?

Stranger: The arts which do not manufacture the actual thing, but which furnish the necessary tools for the manufacture, without which the several arts could not fulfil their appointed work, are co-operative; but those which make the things themselves are causal.

Young Socrates: A very reasonable distinction.

Stranger: Thus the arts which make spindles, combs, and other instruments of the production of clothes, may be called co-operative, and those which treat and fabricate the things themselves, causal.

Young Socrates: Very true.

Stranger: The arts of washing and mending, and the other preparatory arts which belong to the causal class, and form a division of the great art of adornment, may be all comprehended under what we call the fuller’s art.

Young Socrates: Very good.

Stranger: Carding and spinning threads and all the parts of the process which are concerned with the actual manufacture of a woollen garment form a single art, which is one of those universally acknowledged, — the art of working in wool.

Young Socrates: To be sure.

Stranger: Of working in wool, again, there are two divisions, and both these are parts of two arts at once.

Young Socrates: How is that?

Stranger: Carding and one half of the use of the comb, and the other processes of wool-working which separate the composite, may be classed together as belonging both to the art of wool-working, and also to one of the two great arts which are of universal application — the art of composition and the art of division.

Young Socrates: Yes.

Stranger: To the latter belong carding and the other processes of which I was just now speaking; the art of discernment or division in wool and yarn, which is effected in one manner with the comb and in another with the hands, is variously described under all the names which I just now mentioned.

Young Socrates: Very true.

Stranger: Again, let us take some process of wool-working which is also a portion of the art of composition, and, dismissing the elements of division which we found there, make two halves, one on the principle of composition, and the other on the principle of division.

Young Socrates: Let that be done.

Stranger: And once more, Socrates, we must divide the part which belongs at once both to wool-working and composition, if we are ever to discover satisfactorily the aforesaid art of weaving.

Young Socrates: We must.

Stranger: Yes, certainly, and let us call one part of the art the art of twisting threads, the other the art of combining them.

Young Socrates: Do I understand you, in speaking of twisting, to be referring to manufacture of the warp?

Stranger: Yes, and of the woof too; how, if not by twisting, is the woof made?

Young Socrates: There is no other way.

Stranger: Then suppose that you define the warp and the woof, for I think that the definition will be of use to you.

Young Socrates: How shall I define them?

Stranger: As thus: A piece of carded wool which is drawn out lengthwise and breadthwise is said to be pulled out.

Young Socrates: Yes.

Stranger: And the wool thus prepared, when twisted by the spindle, and made into a firm thread, is called the warp, and the art which regulates these operations the art of spinning the warp.

Young Socrates: True.

Stranger: And the threads which are more loosely spun, having a softness proportioned to the intertexture of the warp and to the degree of force used in dressing the cloth, — the threads which are thus spun are called the woof, and the art which is set over them may be called the art of spinning the woof.

Young Socrates: Very true.

Stranger: And, now, there can be no mistake about the nature of the part of weaving which we have undertaken to define. For when that part of the art of composition which is employed in the working of wool forms a web by the regular intertexture of warp and woof, the entire woven substance is called by us a woollen garment, and the art which presides over this is the art of weaving.

Young Socrates: Very true.

Stranger: But why did we not say at once that weaving is the art of entwining warp and woof, instead of making a long and useless circuit?

Young Socrates: I thought, Stranger, that there was nothing useless in what was said.

Stranger: Very likely, but you may not always think so, my sweet friend; and in case any feeling of dissatisfaction should hereafter arise in your mind, as it very well may, let me lay down a principle which will apply to arguments in general.

Young Socrates: Proceed.

Stranger: Let us begin by considering the whole nature of excess and defect, and then we shall have a rational ground on which we may praise or blame too much length or too much shortness in discussions of this kind.

Young Socrates: Let us do so.

Stranger: The points on which I think that we ought to dwell are the following: —

Young Socrates: What?

Stranger: Length and shortness, excess and defect; with all of these the art of measurement is conversant.

Young Socrates: Yes.

Stranger: And the art of measurement has to be divided into two parts, with a view to our present purpose.

Young Socrates: Where would you make the division?

Stranger: As thus: I would make two parts, one having regard to the relativity of greatness and smallness to each other; and there is another, without which the existence of production would be impossible.

Young Socrates: What do you mean?

Stranger: Do you not think that it is only natural for the greater to be called greater with reference to the less alone, and the less less with reference to the greater alone?

Young Socrates: Yes.

Stranger: Well, but is there not also something exceeding and exceeded by the principle of the mean, both in speech and

action, and is not this a reality, and the chief mark of difference between good and bad men?

Young Socrates: Plainly.

Stranger: Then we must suppose that the great and small exist and are discerned in both these ways, and not, as we were saying before, only relatively to one another, but there must also be another comparison of them with the mean or ideal standard; would you like to hear the reason why?

Young Socrates: Certainly.

Stranger: If we assume the greater to exist only in relation to the less, there will never be any comparison of either with the mean.

Young Socrates: True.

Stranger: And would not this doctrine be the ruin of all the arts and their creations; would not the art of the Statesman and the aforesaid art of weaving disappear? For all these arts are on the watch against excess and defect, not as unrealities, but as real evils, which occasion a difficulty in action; and the excellence or beauty of every work of art is due to this observance of measure.

Young Socrates: Certainly.

Stranger: But if the science of the Statesman disappears, the search for the royal science will be impossible.

Young Socrates: Very true.

Stranger: Well, then, as in the case of the Sophist we extorted the inference that not-being had an existence, because here was the point at which the argument eluded our grasp, so in this we must endeavour to show that the greater and less are not only to be measured with one another, but also have to do with the production of the mean; for if this is not admitted, neither a statesman nor any other man of action can be an undisputed master of his science.

Young Socrates: Yes, we must certainly do again what we did then.

Stranger: But this, Socrates, is a greater work than the other, of which we only too well remember the length. I think, however, that we may fairly assume something of this sort —

Young Socrates: What?

Stranger: That we shall some day require this notion of a mean with a view to the demonstration of absolute truth; meanwhile, the argument that the very existence of the arts must be held to depend on the possibility of measuring more or less, not only with one another, but also with a view to the attainment of the mean, seems to afford a grand support and satisfactory proof of the doctrine which we are maintaining; for if there are arts, there is a standard of measure, and if there is a standard of measure, there are arts; but if either is wanting, there is neither.

Young Socrates: True; and what is the next step?

Stranger: The next step clearly is to divide the art of measurement into two parts, as we have said already, and to place in the one part all the arts which measure number, length, depth, breadth, swiftness with their opposites; and to have another part in which they are measured with the mean, and the fit, and the opportune, and the due, and with all those words, in short, which denote a mean or standard removed from the extremes.

Young Socrates: Here are two vast divisions, embracing two very different spheres.

Stranger: There are many accomplished men, Socrates, who say, believing themselves to speak wisely, that the art of measurement is universal, and has to do with all things. And this means what we are now saying; for all things which come within the province of art do certainly in some sense partake of measure. But these persons, because they are not accustomed

to distinguish classes according to real forms, jumble together two widely different things, relation to one another, and to a standard, under the idea that they are the same, and also fall into the converse error of dividing other things not according to their real parts. Whereas the right way is, if a man has first seen the unity of things, to go on with the enquiry and not desist until he has found all the differences contained in it which form distinct classes; nor again should he be able to rest contented with the manifold diversities which are seen in a multitude of things until he has comprehended all of them that have any affinity within the bounds of one similarity and embraced them within the reality of a single kind. But we have said enough on this head, and also of excess and defect; we have only to bear in mind that two divisions of the art of measurement have been discovered which are concerned with them, and not forget what they are.

Young Socrates: We will not forget.

Stranger: And now that this discussion is completed, let us go on to consider another question, which concerns not this argument only but the conduct of such arguments in general.

Young Socrates: What is this new question?

Stranger: Take the case of a child who is engaged in learning his letters: when he is asked what letters make up a word, should we say that the question is intended to improve his grammatical knowledge of that particular word, or of all words?

Young Socrates: Clearly, in order that he may have a better knowledge of all words.

Stranger: And is our enquiry about the Statesman intended only to improve our knowledge of politics, or our power of reasoning generally?

Young Socrates: Clearly, as in the former example, the purpose is general.

Stranger: Still less would any rational man seek to analyse the notion of weaving for its own sake. But people seem to forget that some things have sensible images, which are readily known, and can be easily pointed out when any one desires to answer an enquirer without any trouble or argument; whereas the greatest and highest truths have no outward image of themselves visible to man, which he who wishes to satisfy the soul of the enquirer can adapt to the eye of sense (compare Phaedr.), and therefore we ought to train ourselves to give and accept a rational account of them; for immaterial things, which are the noblest and greatest, are shown only in thought and idea, and in no other way, and all that we are now saying is said for the sake of them. Moreover, there is always less difficulty in fixing the mind on small matters than on great.

Young Socrates: Very good.

Stranger: Let us call to mind the bearing of all this.

Young Socrates: What is it?

Stranger: I wanted to get rid of any impression of tediousness which we may have experienced in the discussion about weaving, and the reversal of the universe, and in the discussion concerning the Sophist and the being of not-being. I know that they were felt to be too long, and I reproached myself with this, fearing that they might be not only tedious but irrelevant; and all that I have now said is only designed to prevent the recurrence of any such disagreeables for the future.

Young Socrates: Very good. Will you proceed?

Stranger: Then I would like to observe that you and I, remembering what has been said, should praise or blame the length or shortness of discussions, not by comparing them with one another, but with what is fitting, having regard to the part of measurement, which, as we said, was to be borne in mind.

Young Socrates: Very true.

Stranger: And yet, not everything is to be judged even with a view to what is fitting; for we should only want such a length as is suited to give pleasure, if at all, as a secondary matter; and reason tells us, that we should be contented to make the ease or rapidity of an enquiry, not our first, but our second object; the first and highest of all being to assert the great method of division according to species — whether the discourse be shorter or longer is not to the point. No offence should be taken at length, but the longer and shorter are to be employed indifferently, according as either of them is better calculated to sharpen the wits of the auditors. Reason would also say to him who censures the length of discourses on such occasions and cannot away with their circumlocution, that he should not be in such a hurry to have done with them, when he can only complain that they are tedious, but he should prove that if they had been shorter they would have made those who took part in them better dialecticians, and more capable of expressing the truth of things; about any other praise and blame, he need not trouble himself — he should pretend not to hear them. But we have had enough of this, as you will probably agree with me in thinking. Let us return to our Statesman, and apply to his case the aforesaid example of weaving.

Young Socrates: Very good; — let us do as you say.

Stranger: The art of the king has been separated from the similar arts of shepherds, and, indeed, from all those which have to do with herds at all. There still remain, however, of the causal and co-operative arts those which are immediately concerned with States, and which must first be distinguished from one another.

Young Socrates: Very good.

Stranger: You know that these arts cannot easily be divided into two halves; the reason will be very evident as we proceed.

Young Socrates: Then we had better do so.

Stranger: We must carve them like a victim into members or limbs, since we cannot bisect them. (Compare Phaedr.) For we certainly should divide everything into as few parts as possible.

Young Socrates: What is to be done in this case?

Stranger: What we did in the example of weaving — all those arts which furnish the tools were regarded by us as co-operative.

Young Socrates: Yes.

Stranger: So now, and with still more reason, all arts which make any implement in a State, whether great or small, may be regarded by us as co-operative, for without them neither State nor Statesmanship would be possible; and yet we are not inclined to say that any of them is a product of the kingly art.

Young Socrates: No, indeed.

Stranger: The task of separating this class from others is not an easy one; for there is plausibility in saying that anything in the world is the instrument of doing something. But there is another class of possessions in a city, of which I have a word to say.

Young Socrates: What class do you mean?

Stranger: A class which may be described as not having this power; that is to say, not like an instrument, framed for production, but designed for the preservation of that which is produced.

Young Socrates: To what do you refer?

Stranger: To the class of vessels, as they are comprehensively termed, which are constructed for the preservation of things moist and dry, of things prepared in the fire or out of the fire; this is a very large class, and has, if I am not mistaken, literally nothing to do with the royal art of which we are in search.

Young Socrates: Certainly not.

Stranger: There is also a third class of possessions to be noted, different from these and very extensive, moving or resting on land or water, honourable and also dishonourable. The whole of this class has one name, because it is intended to be sat upon, being always a seat for something.

Young Socrates: What is it?

Stranger: A vehicle, which is certainly not the work of the Statesman, but of the carpenter, potter, and coppersmith.

Young Socrates: I understand.

Stranger: And is there not a fourth class which is again different, and in which most of the things formerly mentioned are contained, — every kind of dress, most sorts of arms, walls and enclosures, whether of earth or stone, and ten thousand other things? all of which being made for the sake of defence, may be truly called defences, and are for the most part to be regarded as the work of the builder or of the weaver, rather than of the Statesman.

Young Socrates: Certainly.

Stranger: Shall we add a fifth class, of ornamentation and drawing, and of the imitations produced by drawing and music, which are designed for amusement only, and may be fairly comprehended under one name?

Young Socrates: What is it?

Stranger: Plaything is the name.

Young Socrates: Certainly.

Stranger: That one name may be fitly predicated of all of them, for none of these things have a serious purpose — amusement is their sole aim.

Young Socrates: That again I understand.

Stranger: Then there is a class which provides materials for all these, out of which and in which the arts already mentioned

fabricate their works; — this manifold class, I say, which is the creation and offspring of many other arts, may I not rank sixth?

Young Socrates: What do you mean?

Stranger: I am referring to gold, silver, and other metals, and all that wood-cutting and shearing of every sort provides for the art of carpentry and plaiting; and there is the process of barking and stripping the cuticle of plants, and the currier's art, which strips off the skins of animals, and other similar arts which manufacture corks and papyri and cords, and provide for the manufacture of composite species out of simple kinds — the whole class may be termed the primitive and simple possession of man, and with this the kingly science has no concern at all.

Young Socrates: True.

Stranger: The provision of food and of all other things which mingle their particles with the particles of the human body, and minister to the body, will form a seventh class, which may be called by the general term of nourishment, unless you have any better name to offer. This, however, appertains rather to the husbandman, huntsman, trainer, doctor, cook, and is not to be assigned to the Statesman's art.

Young Socrates: Certainly not.

Stranger: These seven classes include nearly every description of property, with the exception of tame animals. Consider; — there was the original material, which ought to have been placed first; next come instruments, vessels, vehicles, defences, playthings, nourishment; small things, which may be included under one of these — as for example, coins, seals and stamps, are omitted, for they have not in them the character of any larger kind which includes them; but some of them may, with a little forcing, be placed among ornaments, and others may be made to harmonize with the class of implements. The art of herding, which has been already divided into parts, will include all property in tame animals, except slaves.

Young Socrates: Very true.

Stranger: The class of slaves and ministers only remains, and I suspect that in this the real aspirants for the throne, who are the rivals of the king in the formation of the political web, will be discovered; just as spinners, carders, and the rest of them, were the rivals of the weaver. All the others, who were termed co-operators, have been got rid of among the occupations already mentioned, and separated from the royal and political science.

Young Socrates: I agree.

Stranger: Let us go a little nearer, in order that we may be more certain of the complexion of this remaining class.

Young Socrates: Let us do so.

Stranger: We shall find from our present point of view that the greatest servants are in a case and condition which is the reverse of what we anticipated.

Young Socrates: Who are they?

Stranger: Those who have been purchased, and have so become possessions; these are unmistakably slaves, and certainly do not claim royal science.

Young Socrates: Certainly not.

Stranger: Again, freemen who of their own accord become the servants of the other classes in a State, and who exchange and equalise the products of husbandry and the other arts, some sitting in the market-place, others going from city to city by land or sea, and giving money in exchange for money or for other productions — the money-changer, the merchant, the ship-owner, the retailer, will not put in any claim to statecraft or politics?

Young Socrates: No; unless, indeed, to the politics of commerce.

Stranger: But surely men whom we see acting as hirelings and serfs, and too happy to turn their hand to anything, will not profess to share in royal science?

Young Socrates: Certainly not.

Stranger: But what would you say of some other serviceable officials?

Young Socrates: Who are they, and what services do they perform?

Stranger: There are heralds, and scribes perfected by practice, and divers others who have great skill in various sorts of business connected with the government of states — what shall we call them?

Young Socrates: They are the officials, and servants of the rulers, as you just now called them, but not themselves rulers.

Stranger: There may be something strange in any servant pretending to be a ruler, and yet I do not think that I could have been dreaming when I imagined that the principal claimants to political science would be found somewhere in this neighbourhood.

Young Socrates: Very true.

Stranger: Well, let us draw nearer, and try the claims of some who have not yet been tested: in the first place, there are diviners, who have a portion of servile or ministerial science, and are thought to be the interpreters of the gods to men.

Young Socrates: True.

Stranger: There is also the priestly class, who, as the law declares, know how to give the gods gifts from men in the form of sacrifices which are acceptable to them, and to ask on our behalf blessings in return from them. Now both these are branches of the servile or ministerial art.

Young Socrates: Yes, clearly.

Stranger: And here I think that we seem to be getting on the right track; for the priest and the diviner are swollen with pride and prerogative, and they create an awful impression of themselves by the magnitude of their enterprises; in Egypt, the king himself is not allowed to reign, unless he have priestly powers, and if he should be of another class and has thrust himself in, he must get enrolled in the priesthood. In many parts of Hellas, the duty of offering the most solemn propitiatory sacrifices is assigned to the highest magistracies, and here, at Athens, the most solemn and national of the ancient sacrifices are supposed to be celebrated by him who has been chosen by lot to be the King Archon.

Young Socrates: Precisely.

Stranger: But who are these other kings and priests elected by lot who now come into view followed by their retainers and a vast throng, as the former class disappears and the scene changes?

Young Socrates: Whom can you mean?

Stranger: They are a strange crew.

Young Socrates: Why strange?

Stranger: A minute ago I thought that they were animals of every tribe; for many of them are like lions and centaurs, and many more like satyrs and such weak and shifty creatures; — Protean shapes quickly changing into one another’s forms and natures; and now, Socrates, I begin to see who they are.

Young Socrates: Who are they? You seem to be gazing on some strange vision.

Stranger: Yes; every one looks strange when you do not know him; and just now I myself fell into this mistake — at first sight, coming suddenly upon him, I did not recognize the politician and his troop.

Young Socrates: Who is he?

Stranger: The chief of Sophists and most accomplished of wizards, who must at any cost be separated from the true king or Statesman, if we are ever to see daylight in the present enquiry.

Young Socrates: That is a hope not lightly to be renounced.

Stranger: Never, if I can help it; and, first, let me ask you a question.

Young Socrates: What?

Stranger: Is not monarchy a recognized form of government?

Young Socrates: Yes.

Stranger: And, after monarchy, next in order comes the government of the few?

Young Socrates: Of course.

Stranger: Is not the third form of government the rule of the multitude, which is called by the name of democracy?

Young Socrates: Certainly.

Stranger: And do not these three expand in a manner into five, producing out of themselves two other names?

Young Socrates: What are they?

Young Socrates: What are they?

Stranger: There is a criterion of voluntary and involuntary, poverty and riches, law and the absence of law, which men now-a-days apply to them; the two first they subdivide accordingly, and ascribe to monarchy two forms and two corresponding names, royalty and tyranny.

Young Socrates: Very true.

Stranger: And the government of the few they distinguish by the names of aristocracy and oligarchy.

Young Socrates: Certainly.

Stranger: Democracy alone, whether rigidly observing the laws or not, and whether the multitude rule over the men of property with their consent or against their consent, always in ordinary language has the same name.

Young Socrates: True.

Stranger: But do you suppose that any form of government which is defined by these characteristics of the one, the few, or the many, of poverty or wealth, of voluntary or compulsory submission, of written law or the absence of law, can be a right one?

Young Socrates: Why not?

Stranger: Reflect; and follow me.

Young Socrates: In what direction?

Stranger: Shall we abide by what we said at first, or shall we retract our words?

Young Socrates: To what do you refer?

Stranger: If I am not mistaken, we said that royal power was a science?

Young Socrates: Yes.

Stranger: And a science of a peculiar kind, which was selected out of the rest as having a character which is at once judicial and authoritative?

Young Socrates: Yes.

Stranger: And there was one kind of authority over lifeless things and another other living animals; and so we proceeded in the division step by step up to this point, not losing the idea of science, but unable as yet to determine the nature of the particular science?

Young Socrates: True.

Stranger: Hence we are led to observe that the distinguishing principle of the State cannot be the few or many, the voluntary or involuntary, poverty or riches; but some notion of science must enter into it, if we are to be consistent with what has preceded.

Young Socrates: And we must be consistent.

Stranger: Well, then, in which of these various forms of States may the science of government, which is among the greatest of all sciences and most difficult to acquire, be supposed to reside? That we must discover, and then we shall see who are the false politicians who pretend to be politicians but are not, although they persuade many, and shall separate them from the wise king.

Young Socrates: That, as the argument has already intimated, will be our duty.

Stranger: Do you think that the multitude in a State can attain political science?

Young Socrates: Impossible.

Stranger: But, perhaps, in a city of a thousand men, there would be a hundred, or say fifty, who could?

Young Socrates: In that case political science would certainly be the easiest of all sciences; there could not be found in a city of that number as many really first-rate draught-players, if judged by the standard of the rest of Hellas, and there would certainly not be as many kings. For kings we may truly call those who possess royal science, whether they rule or not, as was shown in the previous argument.

Stranger: Thank you for reminding me; and the consequence is that any true form of government can only be supposed to be the government of one, two, or, at any rate, of a few.

Young Socrates: Certainly.

Stranger: And these, whether they rule with the will, or against the will, of their subjects, with written laws or without written laws, and whether they are poor or rich, and whatever be the nature of their rule, must be supposed, according to our present view, to rule on some scientific principle; just as the physician, whether he cures us against our will or with our will, and whatever be his mode of treatment, — incision, burning, or the infliction of some other pain, — whether he practises out of a book or not out of a book, and whether he be rich or poor, whether he purges or reduces in some other way, or even fattens his patients, is a physician all the same, so long as he exercises authority over them according to rules of art, if he only does them good and heals and saves them. And this we lay down to be the only proper test of the art of medicine, or of any other art of command.

Young Socrates: Quite true.

Stranger: Then that can be the only true form of government in which the governors are really found to possess science, and are not mere pretenders, whether they rule according to law or without law, over willing or unwilling subjects, and are rich or poor themselves — none of these things can with any propriety be included in the notion of the ruler.

Young Socrates: True.

Stranger: And whether with a view to the public good they purge the State by killing some, or exiling some; whether they reduce the size of the body corporate by sending out from the hive swarms of citizens, or, by introducing persons from without, increase it; while they act according to the rules of wisdom and justice, and use their power with a view to the general security and improvement, the city over which they rule, and which has these characteristics, may be described as the only true State. All other governments are not genuine or real; but only imitations of this, and some of them are better and some of them are worse; the better are said to be well governed,

but they are mere imitations like the others.

Young Socrates: I agree, Stranger, in the greater part of what you say; but as to their ruling without laws — the expression has a harsh sound.

Stranger: You have been too quick for me, Socrates; I was just going to ask you whether you objected to any of my statements. And now I see that we shall have to consider this notion of there being good government without laws.

Young Socrates: Certainly.

Stranger: There can be no doubt that legislation is in a manner the business of a king, and yet the best thing of all is not that the law should rule, but that a man should rule supposing him to have wisdom and royal power. Do you see why this is?

Young Socrates: Why?

Stranger: Because the law does not perfectly comprehend what is noblest and most just for all and therefore cannot enforce what is best. The differences of men and actions, and the endless irregular movements of human things, do not admit of any universal and simple rule. And no art whatsoever can lay down a rule which will last for all time.

Young Socrates: Of course not.

Stranger: But the law is always striving to make one; — like an obstinate and ignorant tyrant, who will not allow anything to be done contrary to his appointment, or any question to be asked — not even in sudden changes of circumstances, when something happens to be better than what he commanded for some one.

Young Socrates: Certainly; the law treats us all precisely in the manner which you describe.

Stranger: A perfectly simple principle can never be applied to a state of things which is the reverse of simple.

Young Socrates: True.

Stranger: Then if the law is not the perfection of right, why are we compelled to make laws at all? The reason of this has next to be investigated.

Young Socrates: Certainly.

Stranger: Let me ask, whether you have not meetings for gymnastic contests in your city, such as there are in other cities, at which men compete in running, wrestling, and the like?

Young Socrates: Yes; they are very common among us.

Stranger: And what are the rules which are enforced on their pupils by professional trainers or by others having similar authority? Can you remember?

Young Socrates: To what do you refer?

Stranger: The training-masters do not issue minute rules for individuals, or give every individual what is exactly suited to his constitution; they think that they ought to go more roughly to work, and to prescribe generally the regimen which will benefit the majority.

Young Socrates: Very true.

Stranger: And therefore they assign equal amounts of exercise to them all; they send them forth together, and let them rest together from their running, wrestling, or whatever the form of bodily exercise may be.

Young Socrates: True.

Stranger: And now observe that the legislator who has to preside over the herd, and to enforce justice in their dealings with one another, will not be able, in enacting for the general good, to provide exactly what is suitable for each particular case.

Young Socrates: He cannot be expected to do so.

Stranger: He will lay down laws in a general form for the majority, roughly meeting the cases of individuals; and some of

them he will deliver in writing, and others will be unwritten; and these last will be traditional customs of the country.

Young Socrates: He will be right.

Stranger: Yes, quite right; for how can he sit at every man’s side all through his life, prescribing for him the exact particulars of his duty? Who, Socrates, would be equal to such a task? No one who really had the royal science, if he had been able to do this, would have imposed upon himself the restriction of a written law.

Young Socrates: So I should infer from what has now been said.

Stranger: Or rather, my good friend, from what is going to be said.

Young Socrates: And what is that?

Stranger: Let us put to ourselves the case of a physician, or trainer, who is about to go into a far country, and is expecting to be a long time away from his patients — thinking that his instructions will not be remembered unless they are written down, he will leave notes of them for the use of his pupils or patients.

Young Socrates: True.

Stranger: But what would you say, if he came back sooner than he had intended, and, owing to an unexpected change of the winds or other celestial influences, something else happened to be better for them, — would he not venture to suggest this new remedy, although not contemplated in his former prescription? Would he persist in observing the original law, neither himself giving any new commandments, nor the patient daring to do otherwise than was prescribed, under the idea that this course only was healthy and medicinal, all others noxious and heterodox? Viewed in the light of science and true art, would not all such enactments be utterly ridiculous?

Young Socrates: Utterly.

Stranger: And if he who gave laws, written or unwritten, determining what was good or bad, honourable or dishonourable, just or unjust, to the tribes of men who flock together in their several cities, and are governed in accordance with them; if, I say, the wise legislator were suddenly to come again, or another like to him, is he to be prohibited from changing them? — would not this prohibition be in reality quite as ridiculous as the other?

Young Socrates: Certainly.

Stranger: Do you know a plausible saying of the common people which is in point?

Young Socrates: I do not recall what you mean at the moment.

Stranger: They say that if any one knows how the ancient laws may be improved, he must first persuade his own State of the improvement, and then he may legislate, but not otherwise.

Young Socrates: And are they not right?

Stranger: I dare say. But supposing that he does use some gentle violence for their good, what is this violence to be called? Or rather, before you answer, let me ask the same question in reference to our previous instances.

Young Socrates: What do you mean?

Stranger: Suppose that a skilful physician has a patient, of whatever sex or age, whom he compels against his will to do something for his good which is contrary to the written rules; what is this compulsion to be called? Would you ever dream of calling it a violation of the art, or a breach of the laws of health? Nothing could be more unjust than for the patient to whom such violence is applied, to charge the physician who practises the violence with wanting skill or aggravating his disease.

Young Socrates: Most true.

Stranger: In the political art error is not called disease, but evil, or disgrace, or injustice.

Young Socrates: Quite true.

Stranger: And when the citizen, contrary to law and custom, is compelled to do what is juster and better and nobler than he did before, the last and most absurd thing which he could say about such violence is that he has incurred disgrace or evil or injustice at the hands of those who compelled him.

Young Socrates: Very true.

Stranger: And shall we say that the violence, if exercised by a rich man, is just, and if by a poor man, unjust? May not any man, rich or poor, with or without laws, with the will of the citizens or against the will of the citizens, do what is for their interest? Is not this the true principle of government, according to which the wise and good man will order the affairs of his subjects? As the pilot, by watching continually over the interests of the ship and of the crew, — not by laying down rules, but by making his art a law, — preserves the lives of his fellow-sailors, even so, and in the self-same way, may there not be a true form of polity created by those who are able to govern in a similar spirit, and who show a strength of art which is superior to the law? Nor can wise rulers ever err while they observing the one great rule of distributing justice to the citizens with intelligence and skill, are able to preserve them, and, as far as may be, to make them better from being worse.

Young Socrates: No one can deny what has been now said.

Stranger: Neither, if you consider, can any one deny the other statement.

Young Socrates: What was it?

Stranger: We said that no great number of persons, whoever they may be, can attain political knowledge, or order a State wisely, but that the true government is to be found in a small body, or in an individual, and that other States are but imitations of this, as we said a little while ago, some for the better and some for the worse.

Young Socrates: What do you mean? I cannot have understood your previous remark about imitations.

Stranger: And yet the mere suggestion which I hastily threw out is highly important, even if we leave the question where it is, and do not seek by the discussion of it to expose the error which prevails in this matter.

Young Socrates: What do you mean?

Stranger: The idea which has to be grasped by us is not easy or familiar; but we may attempt to express it thus: — Supposing the government of which I have been speaking to be the only true model, then the others must use the written laws of this — in no other way can they be saved; they will have to do what is now generally approved, although not the best thing in the world.

Young Socrates: What is this?

Stranger: No citizen should do anything contrary to the laws, and any infringement of them should be punished with death and the most extreme penalties; and this is very right and good when regarded as the second best thing, if you set aside the first, of which I was just now speaking. Shall I explain the nature of what I call the second best?

Young Socrates: By all means.

Stranger: I must again have recourse to my favourite images; through them, and them alone, can I describe kings and rulers.

Young Socrates: What images?

Stranger: The noble pilot and the wise physician, who ’is worth many another man’ — in the similitude of these let us endeavour to discover some image of the king.

Young Socrates: What sort of an image?

Stranger: Well, such as this: — Every man will reflect that he suffers strange things at the hands of both of them; the

physician saves any whom he wishes to save, and any whom he wishes to maltreat he maltreats — cutting or burning them; and at the same time requiring them to bring him payments, which are a sort of tribute, of which little or nothing is spent upon the sick man, and the greater part is consumed by him and his domestics; and the finale is that he receives money from the relations of the sick man or from some enemy of his, and puts him out of the way. And the pilots of ships are guilty of numberless evil deeds of the same kind; they intentionally play false and leave you ashore when the hour of sailing arrives; or they cause mishaps at sea and cast away their freight; and are guilty of other rogueries. Now suppose that we, bearing all this in mind, were to determine, after consideration, that neither of these arts shall any longer be allowed to exercise absolute control either over freemen or over slaves, but that we will summon an assembly either of all the people, or of the rich only, that anybody who likes, whatever may be his calling, or even if he have no calling, may offer an opinion either about seamanship or about diseases — whether as to the manner in which physic or surgical instruments are to be applied to the patient, or again about the vessels and the nautical implements which are required in navigation, and how to meet the dangers of winds and waves which are incidental to the voyage, how to behave when encountering pirates, and what is to be done with the old-fashioned galleys, if they have to fight with others of a similar build — and that, whatever shall be decreed by the multitude on these points, upon the advice of persons skilled or unskilled, shall be written down on triangular tablets and columns, or enacted although unwritten to be national customs; and that in all future time vessels shall be navigated and remedies administered to the patient after this fashion.

Young Socrates: What a strange notion!

Stranger: Suppose further, that the pilots and physicians are appointed annually, either out of the rich, or out of the whole

people, and that they are elected by lot; and that after their election they navigate vessels and heal the sick according to the written rules.

Young Socrates: Worse and worse.

Stranger: But hear what follows: — When the year of office has expired, the pilot or physician has to come before a court of review, in which the judges are either selected from the wealthy classes or chosen by lot out of the whole people; and anybody who pleases may be their accuser, and may lay to their charge, that during the past year they have not navigated their vessels or healed their patients according to the letter of the law and the ancient customs of their ancestors; and if either of them is condemned, some of the judges must fix what he is to suffer or pay.

Young Socrates: He who is willing to take a command under such conditions, deserves to suffer any penalty.

Stranger: Yet once more, we shall have to enact that if any one is detected enquiring into piloting and navigation, or into health and the true nature of medicine, or about the winds, or other conditions of the atmosphere, contrary to the written rules, and has any ingenious notions about such matters, he is not to be called a pilot or physician, but a cloudy prating sophist; — further, on the ground that he is a corrupter of the young, who would persuade them to follow the art of medicine or piloting in an unlawful manner, and to exercise an arbitrary rule over their patients or ships, any one who is qualified by law may inform against him, and indict him in some court, and then if he is found to be persuading any, whether young or old, to act contrary to the written law, he is to be punished with the utmost rigour; for no one should presume to be wiser than the laws; and as touching healing and health and piloting and navigation, the nature of them is known to all, for anybody may learn the written laws and the national customs. If such were the mode of procedure, Socrates, about these sciences and about

generalship, and any branch of hunting, or about painting or imitation in general, or carpentry, or any sort of handicraft, or husbandry, or planting, or if we were to see an art of rearing horses, or tending herds, or divination, or any ministerial service, or draught-playing, or any science conversant with number, whether simple or square or cube, or comprising motion, — I say, if all these things were done in this way according to written regulations, and not according to art, what would be the result?

Young Socrates: All the arts would utterly perish, and could never be recovered, because enquiry would be unlawful. And human life, which is bad enough already, would then become utterly unendurable.

Stranger: But what, if while compelling all these operations to be regulated by written law, we were to appoint as the guardian of the laws some one elected by a show of hands, or by lot, and he caring nothing about the laws, were to act contrary to them from motives of interest or favour, and without knowledge, — would not this be a still worse evil than the former?

Young Socrates: Very true.

Stranger: To go against the laws, which are based upon long experience, and the wisdom of counsellors who have graciously recommended them and persuaded the multitude to pass them, would be a far greater and more ruinous error than any adherence to written law?

Young Socrates: Certainly.

Stranger: Therefore, as there is a danger of this, the next best thing in legislating is not to allow either the individual or the multitude to break the law in any respect whatever.

Young Socrates: True.

Stranger: The laws would be copies of the true particulars of action as far as they admit of being written down from the lips of

those who have knowledge?

Young Socrates: Certainly they would.

Stranger: And, as we were saying, he who has knowledge and is a true Statesman, will do many things within his own sphere of action by his art without regard to the laws, when he is of opinion that something other than that which he has written down and enjoined to be observed during his absence would be better.

Young Socrates: Yes, we said so.

Stranger: And any individual or any number of men, having fixed laws, in acting contrary to them with a view to something better, would only be acting, as far as they are able, like the true Statesman?

Young Socrates: Certainly.

Stranger: If they had no knowledge of what they were doing, they would imitate the truth, and they would always imitate ill; but if they had knowledge, the imitation would be the perfect truth, and an imitation no longer.

Young Socrates: Quite true.

Stranger: And the principle that no great number of men are able to acquire a knowledge of any art has been already admitted by us.

Young Socrates: Yes, it has.

Stranger: Then the royal or political art, if there be such an art, will never be attained either by the wealthy or by the other mob.

Young Socrates: Impossible.

Stranger: Then the nearest approach which these lower forms of government can ever make to the true government of the one scientific ruler, is to do nothing contrary to their own written laws and national customs.

Young Socrates: Very good.

Stranger: When the rich imitate the true form, such a government is called aristocracy; and when they are regardless of the laws, oligarchy.

Young Socrates: True.

Stranger: Or again, when an individual rules according to law in imitation of him who knows, we call him a king; and if he rules according to law, we give him the same name, whether he rules with opinion or with knowledge.

Young Socrates: To be sure.

Stranger: And when an individual truly possessing knowledge rules, his name will surely be the same — he will be called a king; and thus the five names of governments, as they are now reckoned, become one.

Young Socrates: That is true.

Stranger: And when an individual ruler governs neither by law nor by custom, but following in the steps of the true man of science pretends that he can only act for the best by violating the laws, while in reality appetite and ignorance are the motives of the imitation, may not such an one be called a tyrant?

Young Socrates: Certainly.

Stranger: And this we believe to be the origin of the tyrant and the king, of oligarchies, and aristocracies, and democracies, — because men are offended at the one monarch, and can never be made to believe that any one can be worthy of such authority, or is able and willing in the spirit of virtue and knowledge to act justly and holily to all; they fancy that he will be a despot who will wrong and harm and slay whom he pleases of us; for if there could be such a despot as we describe, they would acknowledge that we ought to be too glad to have him, and that he alone would be the happy ruler of a true and perfect State.

Young Socrates: To be sure.

Stranger: But then, as the State is not like a beehive, and has no natural head who is at once recognized to be the superior both in body and in mind, mankind are obliged to meet and make laws, and endeavour to approach as nearly as they can to the true form of government.

Young Socrates: True.

Stranger: And when the foundation of politics is in the letter only and in custom, and knowledge is divorced from action, can we wonder, Socrates, at the miseries which there are, and always will be, in States? Any other art, built on such a foundation and thus conducted, would ruin all that it touched. Ought we not rather to wonder at the natural strength of the political bond? For States have endured all this, time out of mind, and yet some of them still remain and are not overthrown, though many of them, like ships at sea, founder from time to time, and perish and have perished and will hereafter perish, through the badness of their pilots and crews, who have the worst sort of ignorance of the highest truths — I mean to say, that they are wholly unaquainted with politics, of which, above all other sciences, they believe themselves to have acquired the most perfect knowledge.

Young Socrates: Very true.

Stranger: Then the question arises: — which of these untrue forms of government is the least oppressive to their subjects, though they are all oppressive; and which is the worst of them? Here is a consideration which is beside our present purpose, and yet having regard to the whole it seems to influence all our actions: we must examine it.

Young Socrates: Yes, we must.

Stranger: You may say that of the three forms, the same is at once the hardest and the easiest.

Young Socrates: What do you mean?

Stranger: I am speaking of the three forms of government, which I mentioned at the beginning of this discussion — monarchy, the rule of the few, and the rule of the many.

Young Socrates: True.

Stranger: If we divide each of these we shall have six, from which the true one may be distinguished as a seventh.

Young Socrates: How would you make the division?

Stranger: Monarchy divides into royalty and tyranny; the rule of the few into aristocracy, which has an auspicious name, and oligarchy; and democracy or the rule of the many, which before was one, must now be divided.

Young Socrates: On what principle of division?

Stranger: On the same principle as before, although the name is now discovered to have a twofold meaning. For the distinction of ruling with law or without law, applies to this as well as to the rest.

Young Socrates: Yes.

Stranger: The division made no difference when we were looking for the perfect State, as we showed before. But now that this has been separated off, and, as we said, the others alone are left for us, the principle of law and the absence of law will bisect them all.

Young Socrates: That would seem to follow, from what has been said.

Stranger: Then monarchy, when bound by good prescriptions or laws, is the best of all the six, and when lawless is the most bitter and oppressive to the subject.

Young Socrates: True.

Stranger: The government of the few, which is intermediate between that of the one and many, is also intermediate in good and evil; but the government of the many is in every respect

weak and unable to do either any great good or any great evil, when compared with the others, because the offices are too minutely subdivided and too many hold them. And this therefore is the worst of all lawful governments, and the best of all lawless ones. If they are all without the restraints of law, democracy is the form in which to live is best; if they are well ordered, then this is the last which you should choose, as royalty, the first form, is the best, with the exception of the seventh, for that excels them all, and is among States what God is among men.

Young Socrates: You are quite right, and we should choose that above all.

Stranger: The members of all these States, with the exception of the one which has knowledge, may be set aside as being not Statesmen but partisans, — upholders of the most monstrous idols, and themselves idols; and, being the greatest imitators and magicians, they are also the greatest of Sophists.

Young Socrates: The name of Sophist after many windings in the argument appears to have been most justly fixed upon the politicians, as they are termed.

Stranger: And so our satyric drama has been played out; and the troop of Centaurs and Satyrs, however unwilling to leave the stage, have at last been separated from the political science.

Young Socrates: So I perceive.

Stranger: There remain, however, natures still more troublesome, because they are more nearly akin to the king, and more difficult to discern; the examination of them may be compared to the process of refining gold.

Young Socrates: What is your meaning?

Stranger: The workmen begin by sifting away the earth and stones and the like; there remain in a confused mass the valuable elements akin to gold, which can only be separated by fire, — copper, silver, and other precious metal; these are at last

refined away by the use of tests, until the gold is left quite pure.

Young Socrates: Yes, that is the way in which these things are said to be done.

Stranger: In like manner, all alien and uncongenial matter has been separated from political science, and what is precious and of a kindred nature has been left; there remain the nobler arts of the general and the judge, and the higher sort of oratory which is an ally of the royal art, and persuades men to do justice, and assists in guiding the helm of States: — How can we best clear away all these, leaving him whom we seek alone and unalloyed?

Young Socrates: That is obviously what has in some way to be attempted.

Stranger: If the attempt is all that is wanting, he shall certainly be brought to light; and I think that the illustration of music may assist in exhibiting him. Please to answer me a question.

Young Socrates: What question?

Stranger: There is such a thing as learning music or handicraft arts in general?

Young Socrates: There is.

Stranger: And is there any higher art or science, having power to decide which of these arts are and are not to be learned; — what do you say?

Young Socrates: I should answer that there is.

Stranger: And do we acknowledge this science to be different from the others?

Young Socrates: Yes.

Stranger: And ought the other sciences to be superior to this, or no single science to any other? Or ought this science to be the overseer and governor of all the others?

Young Socrates: The latter.

Stranger: You mean to say that the science which judges whether we ought to learn or not, must be superior to the science which is learned or which teaches?

Young Socrates: Far superior.

Stranger: And the science which determines whether we ought to persuade or not, must be superior to the science which is able to persuade?

Young Socrates: Of course.

Stranger: Very good; and to what science do we assign the power of persuading a multitude by a pleasing tale and not by teaching?

Young Socrates: That power, I think, must clearly be assigned to rhetoric.

Stranger: And to what science do we give the power of determining whether we are to employ persuasion or force towards any one, or to refrain altogether?

Young Socrates: To that science which governs the arts of speech and persuasion.

Stranger: Which, if I am not mistaken, will be politics?

Young Socrates: Very good.

Stranger: Rhetoric seems to be quickly distinguished from politics, being a different species, yet ministering to it.

Young Socrates: Yes.

Stranger: But what would you think of another sort of power or science?

Young Socrates: What science?

Stranger: The science which has to do with military operations against our enemies — is that to be regarded as a science or not?

Young Socrates: How can generalship and military tactics be regarded as other than a science?

Stranger: And is the art which is able and knows how to advise when we are to go to war, or to make peace, the same as this or different?

Young Socrates: If we are to be consistent, we must say different.

Stranger: And we must also suppose that this rules the other, if we are not to give up our former notion?

Young Socrates: True.

Stranger: And, considering how great and terrible the whole art of war is, can we imagine any which is superior to it but the truly royal?

Young Socrates: No other.

Stranger: The art of the general is only ministerial, and therefore not political?

Young Socrates: Exactly.

Stranger: Once more let us consider the nature of the righteous judge.

Young Socrates: Very good.

Stranger: Does he do anything but decide the dealings of men with one another to be just or unjust in accordance with the standard which he receives from the king and legislator, — showing his own peculiar virtue only in this, that he is not perverted by gifts, or fears, or pity, or by any sort of favour or enmity, into deciding the suits of men with one another contrary to the appointment of the legislator?

Young Socrates: No; his office is such as you describe.

Stranger: Then the inference is that the power of the judge is not royal, but only the power of a guardian of the law which

ministers to the royal power?

Young Socrates: True.

Stranger: The review of all these sciences shows that none of them is political or royal. For the truly royal ought not itself to act, but to rule over those who are able to act; the king ought to know what is and what is not a fitting opportunity for taking the initiative in matters of the greatest importance, whilst others should execute his orders.

Young Socrates: True.

Stranger: And, therefore, the arts which we have described, as they have no authority over themselves or one another, but are each of them concerned with some special action of their own, have, as they ought to have, special names corresponding to their several actions.

Young Socrates: I agree.

Stranger: And the science which is over them all, and has charge of the laws, and of all matters affecting the State, and truly weaves them all into one, if we would describe under a name characteristic of their common nature, most truly we may call politics.

Young Socrates: Exactly so.

Stranger: Then, now that we have discovered the various classes in a State, shall I analyse politics after the pattern which weaving supplied?

Young Socrates: I greatly wish that you would.

Stranger: Then I must describe the nature of the royal web, and show how the various threads are woven into one piece.

Young Socrates: Clearly.

Stranger: A task has to be accomplished, which, although difficult, appears to be necessary.

Young Socrates: Certainly the attempt must be made.

Stranger: To assume that one part of virtue differs in kind from another, is a position easily assailable by contentious disputants, who appeal to popular opinion.

Young Socrates: I do not understand.

Stranger: Let me put the matter in another way: I suppose that you would consider courage to be a part of virtue?

Young Socrates: Certainly I should.

Stranger: And you would think temperance to be different from courage; and likewise to be a part of virtue?

Young Socrates: True.

Stranger: I shall venture to put forward a strange theory about them.

Young Socrates: What is it?

Stranger: That they are two principles which thoroughly hate one another and are antagonistic throughout a great part of nature.

Young Socrates: How singular!

Stranger: Yes, very — for all the parts of virtue are commonly said to be friendly to one another.

Young Socrates: Yes.

Stranger: Then let us carefully investigate whether this is universally true, or whether there are not parts of virtue which are at war with their kindred in some respect.

Young Socrates: Tell me how we shall consider that question.

Stranger: We must extend our enquiry to all those things which we consider beautiful and at the same time place in two opposite classes.

Young Socrates: Explain; what are they?

Stranger: Acuteness and quickness, whether in body or soul or in the movement of sound, and the imitations of them which painting and music supply, you must have praised yourself before now, or been present when others praised them.

Young Socrates: Certainly.

Stranger: And do you remember the terms in which they are praised?

Young Socrates: I do not.

Stranger: I wonder whether I can explain to you in words the thought which is passing in my mind.

Young Socrates: Why not?

Stranger: You fancy that this is all so easy: Well, let us consider these notions with reference to the opposite classes of action under which they fall. When we praise quickness and energy and acuteness, whether of mind or body or sound, we express our praise of the quality which we admire by one word, and that one word is manliness or courage.

Young Socrates: How?

Stranger: We speak of an action as energetic and brave, quick and manly, and vigorous too; and when we apply the name of which I speak as the common attribute of all these natures, we certainly praise them.

Young Socrates: True.

Stranger: And do we not often praise the quiet strain of action also?

Young Socrates: To be sure.

Stranger: And do we not then say the opposite of what we said of the other?

Young Socrates: How do you mean?

Stranger: We exclaim How calm! How temperate! in admiration of the slow and quiet working of the intellect, and of steadiness and gentleness in action, of smoothness and depth of voice, and of all rhythmical movement and of music in general, when these have a proper solemnity. Of all such actions we predicate not courage, but a name indicative of order.

Young Socrates: Very true.

Stranger: But when, on the other hand, either of these is out of place, the names of either are changed into terms of censure.

Young Socrates: How so?

Stranger: Too great sharpness or quickness or hardness is termed violence or madness; too great slowness or gentleness is called cowardice or sluggishness; and we may observe, that for the most part these qualities, and the temperance and manliness of the opposite characters, are arrayed as enemies on opposite sides, and do not mingle with one another in their respective actions; and if we pursue the enquiry, we shall find that men who have these different qualities of mind differ from one another.

Young Socrates: In what respect?

Stranger: In respect of all the qualities which I mentioned, and very likely of many others. According to their respective affinities to either class of actions they distribute praise and blame, — praise to the actions which are akin to their own, blame to those of the opposite party — and out of this many quarrels and occasions of quarrel arise among them.

Young Socrates: True.

Stranger: The difference between the two classes is often a trivial concern; but in a state, and when affecting really important matters, becomes of all disorders the most hateful.

Young Socrates: To what do you refer?

Stranger: To nothing short of the whole regulation of human life. For the orderly class are always ready to lead a peaceful life, quietly doing their own business; this is their manner of behaving with all men at home, and they are equally ready to find some way of keeping the peace with foreign States. And on account of this fondness of theirs for peace, which is often out of season where their influence prevails, they become by degrees unwarlike, and bring up their young men to be like themselves; they are at the mercy of their enemies; whence in a few years they and their children and the whole city often pass imperceptibly from the condition of freemen into that of slaves.

Young Socrates: What a cruel fate!

Stranger: And now think of what happens with the more courageous natures. Are they not always inciting their country to go to war, owing to their excessive love of the military life? they raise up enemies against themselves many and mighty, and either utterly ruin their native-land or enslave and subject it to its foes?

Young Socrates: That, again, is true.

Stranger: Must we not admit, then, that where these two classes exist, they always feel the greatest antipathy and antagonism towards one another?

Young Socrates: We cannot deny it.

Stranger: And returning to the enquiry with which we began, have we not found that considerable portions of virtue are at variance with one another, and give rise to a similar opposition in the characters who are endowed with them?

Young Socrates: True.

Stranger: Let us consider a further point.

Young Socrates: What is it?

Stranger: I want to know, whether any constructive art will make any, even the most trivial thing, out of bad and good

materials indifferently, if this can be helped? does not all art rather reject the bad as far as possible, and accept the good and fit materials, and from these elements, whether like or unlike, gathering them all into one, work out some nature or idea?

Young Socrates: To, be sure.

Stranger: Then the true and natural art of statesmanship will never allow any State to be formed by a combination of good and bad men, if this can be avoided; but will begin by testing human natures in play, and after testing them, will entrust them to proper teachers who are the ministers of her purposes — she will herself give orders, and maintain authority; just as the art of weaving continually gives orders and maintains authority over the carders and all the others who prepare the material for the work, commanding the subsidiary arts to execute the works which she deems necessary for making the web.

Young Socrates: Quite true.

Stranger: In like manner, the royal science appears to me to be the mistress of all lawful educators and instructors, and having this queenly power, will not permit them to train men in what will produce characters unsuited to the political constitution which she desires to create, but only in what will produce such as are suitable. Those which have no share of manliness and temperance, or any other virtuous inclination, and, from the necessity of an evil nature, are violently carried away to godlessness and insolence and injustice, she gets rid of by death and exile, and punishes them with the greatest of disgraces.

Young Socrates: That is commonly said.

Stranger: But those who are wallowing in ignorance and baseness she bows under the yoke of slavery.

Young Socrates: Quite right.

Stranger: The rest of the citizens, out of whom, if they have education, something noble may be made, and who are capable

of being united by the statesman, the kingly art blends and weaves together; taking on the one hand those whose natures tend rather to courage, which is the stronger element and may be regarded as the warp, and on the other hand those which incline to order and gentleness, and which are represented in the figure as spun thick and soft, after the manner of the woof — these, which are naturally opposed, she seeks to bind and weave together in the following manner:

Young Socrates: In what manner?

Stranger: First of all, she takes the eternal element of the soul and binds it with a divine cord, to which it is akin, and then the animal nature, and binds that with human cords.

Young Socrates: I do not understand what you mean.

Stranger: The meaning is, that the opinion about the honourable and the just and good and their opposites, which is true and confirmed by reason, is a divine principle, and when implanted in the soul, is implanted, as I maintain, in a nature of heavenly birth.

Young Socrates: Yes; what else should it be?

Stranger: Only the Statesman and the good legislator, having the inspiration of the royal muse, can implant this opinion, and he, only in the rightly educated, whom we were just now describing.

Young Socrates: Likely enough.

Stranger: But him who cannot, we will not designate by any of the names which are the subject of the present enquiry.

Young Socrates: Very right.

Stranger: The courageous soul when attaining this truth becomes civilized, and rendered more capable of partaking of justice; but when not partaking, is inclined to brutality. Is not that true?

Young Socrates: Certainly.

Stranger: And again, the peaceful and orderly nature, if sharing in these opinions, becomes temperate and wise, as far as this may be in a State, but if not, deservedly obtains the ignominious name of silliness.

Young Socrates: Quite true.

Stranger: Can we say that such a connexion as this will lastingly unite the evil with one another or with the good, or that any science would seriously think of using a bond of this kind to join such materials?

Young Socrates: Impossible.

Stranger: But in those who were originally of a noble nature, and who have been nurtured in noble ways, and in those only, may we not say that union is implanted by law, and that this is the medicine which art prescribes for them, and of all the bonds which unite the dissimilar and contrary parts of virtue is not this, as I was saying, the divinest?

Young Socrates: Very true.

Stranger: Where this divine bond exists there is no difficulty in imagining, or when you have imagined, in creating the other bonds, which are human only.

Young Socrates: How is that, and what bonds do you mean?

Stranger: Rights of intermarriage, and ties which are formed between States by giving and taking children in marriage, or between individuals by private betrothals and espousals. For most persons form marriage connexions without due regard to what is best for the procreation of children.

Young Socrates: In what way?

Stranger: They seek after wealth and power, which in matrimony are objects not worthy even of a serious censure.

Young Socrates: There is no need to consider them at all.

Stranger: More reason is there to consider the practice of those who make family their chief aim, and to indicate their error.

Young Socrates: Quite true.

Stranger: They act on no true principle at all; they seek their ease and receive with open arms those who are like themselves, and hate those who are unlike them, being too much influenced by feelings of dislike.

Young Socrates: How so?

Stranger: The quiet orderly class seek for natures like their own, and as far as they can they marry and give in marriage exclusively in this class, and the courageous do the same; they seek natures like their own, whereas they should both do precisely the opposite.

Young Socrates: How and why is that?

Stranger: Because courage, when untempered by the gentler nature during many generations, may at first bloom and strengthen, but at last bursts forth into downright madness.

Young Socrates: Like enough.

Stranger: And then, again, the soul which is over-full of modesty and has no element of courage in many successive generations, is apt to grow too indolent, and at last to become utterly paralyzed and useless.

Young Socrates: That, again, is quite likely.

Stranger: It was of these bonds I said that there would be no difficulty in creating them, if only both classes originally held the same opinion about the honourable and good; — indeed, in this single work, the whole process of royal weaving is comprised — never to allow temperate natures to be separated from the brave, but to weave them together, like the warp and the woof, by common sentiments and honours and reputation, and by the giving of pledges to one another; and out of them forming one smooth and even web, to entrust to them the offices

of State.

Young Socrates: How do you mean?

Stranger: Where one officer only is needed, you must choose a ruler who has both these qualities — when many, you must mingle some of each, for the temperate ruler is very careful and just and safe, but is wanting in thoroughness and go.

Young Socrates: Certainly, that is very true.

Stranger: The character of the courageous, on the other hand, falls short of the former in justice and caution, but has the power of action in a remarkable degree, and where either of these two qualities is wanting, there cities cannot altogether prosper either in their public or private life.

Young Socrates: Certainly they cannot.

Stranger: This then we declare to be the completion of the web of political action, which is created by a direct intertexture of the brave and temperate natures, whenever the royal science has drawn the two minds into communion with one another by unanimity and friendship, and having perfected the noblest and best of all the webs which political life admits, and enfolding therein all other inhabitants of cities, whether slaves or freemen, binds them in one fabric and governs and presides over them, and, in so far as to be happy is vouchsafed to a city, in no particular fails to secure their happiness.

Young Socrates: Your picture, Stranger, of the king and statesman, no less than of the Sophist, is quite perfect.

Minos

ΜΙΝΩΣ

Socrates: Tell me, what is law?

Companion: To what kind of law does your question refer?

Socrates: What! Is there any difference between law and law, in this particular point of being law? For just consider what is the actual question I am putting to you. It is as though I had asked, what is gold: if you had asked me in the same manner, to what kind of gold I refer, I think your question would have been incorrect. For I presume there is no difference between gold and gold, [313b] or between stone and stone, in point of being gold or stone; and so neither does law differ at all from law, I suppose, but they are all the same thing. For each of them is law alike, not one more so, and another less. That is the particular point of my question — what is law as a whole? So if you are ready, tell me.

Companion: Well, what else should law be, Socrates, but things loyally accepted?1

Socrates: And so speech, you think, is the things that are spoken, or sight the things seen, or hearing the things heard? Or is speech [313c] something distinct from the things spoken, sight something distinct from the things seen, and hearing something distinct from the things heard; and so law is something distinct from things loyally accepted? Is this so, or what is your view?

Companion: I find it now to be something distinct.

Socrates: Then law is not things loyally accepted.

Companion: I think not.

Socrates: Now what can law be? Let us consider it in this way. Suppose someone had asked us about what was stated just now: [314a] Since you say it is by sight that things seen are seen, what is this sight whereby they are seen? Our answer to him would have been: That sensation which shows objects by means of the eyes. And if he had asked us again: Well then, since it is by hearing that things heard are heard, what is hearing? Our answer to him would have been: That sensation which shows us sounds by means of the ears. In the same way then, suppose he should also ask us: Since it is by law that loyally accepted things are so accepted, what is this law whereby they are so accepted? [314b] Is it some sensation or showing, as when things learnt are learnt by knowledge showing them, or some discovery, as when things discovered are discovered — for instance, the causes of health and sickness by medicine, or the designs of the gods, as the prophets say, by prophecy; for art is surely our discovery of things, is it not?

Companion: Certainly.

Socrates: Then what thing especially of this sort shall we surmise law to be?

Companion: Our resolutions and decrees, I imagine: for how else can one describe law? [314c] So that apparently the whole thing, law, as you put it in your question, is a city’s resolution.

Socrates: State opinion, it seems, is what you call law.

Companion: I do.

Socrates: And perhaps you are right: but I fancy we shall get a better knowledge in this way. You call some men wise?

Companion: I do.

Socrates: And the wise are wise by wisdom?

Companion: Yes.

Socrates: And again, the just are just by justice?

Companion: Certainly.

Socrates: And so the law-abiding are law-abiding by law? [314d]

Companion: Yes.

Socrates: And the lawless are lawless by lawlessness?

Companion: Yes.

Socrates: And the law-abiding are just?

Companion: Yes.

Socrates: And the lawless are unjust?

Companion: Unjust.

Socrates: And justice and law are most noble?

Companion: That is so.

Socrates: And injustice and lawlessness most base?

Companion: Yes.

Socrates: And the former preserve cities and everything else, while the latter destroy and overturn them?

Companion: Yes.

Socrates: Hence we must regard law as something noble, and seek after it as a good.

Companion: Undeniably.

Socrates: And we said that law is a city's resolution? [314e]

Companion: So we did.

Socrates: Well now, are not some resolutions good, and others evil?

Companion: Yes, to be sure.

Socrates: And, you know, law was not evil.

Companion: No, indeed.

Socrates: So it is not right to reply, in that simple fashion, that law is a city's resolution.

Companion: I agree that it is not.

Socrates: An evil resolution, you see, cannot properly be a law.

Companion: No, to be sure.

Socrates: But still, I am quite clear myself that law is some sort of opinion; and since it is not evil opinion, is it not manifest by this time that it is good opinion, granting that law is opinion?

Companion: Yes.

Socrates: But what is good opinion? Is it not true opinion?

Companion: Yes. [315a]

Socrates: And true opinion is discovery of reality?

Companion: Yes, it is.

Socrates: So law tends to be discovery of reality.

Companion: Then how is it, Socrates, if law is discovery of reality, that we do not use always the same laws on the same matters, if we have thus got realities discovered?

Socrates: Law tends none the less to be discovery of reality: but men, who do not use [315b] always the same laws, as we observe, are not always able to discover what the law is intent on — reality. For come now, let us see if from this point onward we can get it clear whether we use always the same laws or different ones at different times, and whether we all use the same, or some of us use some, and others others.

Companion: Why, that, Socrates, is no difficult matter to determine — that the same men do not use always the same laws, and also that different men use different ones. With us, for instance, human sacrifice is not legal, but unholy, [315c] whereas the Carthaginians perform it as a thing they account

holy and legal, and that too when some of them sacrifice even their own sons to Cronos, as I daresay you yourself have heard. And not merely is it foreign peoples who use different laws from ours, but our neighbors in Lycaea2 and the descendants of Athamas3 — you know their sacrifices, Greeks though they be. And as to ourselves too, you know, of course, from what you have heard yourself, the kind of laws we formerly used in regard to our dead, when we slaughtered sacred victims before [315d] the funeral procession, and engaged urn-women to collect the bones from the ashes. Then again, a yet earlier generation used to bury the dead where they were, in the house: but we do none of these things. One might give thousands of other instances; for there is ample means of proving that neither we copy ourselves nor mankind each other always in laws and customs.

Socrates: And it is no wonder, my excellent friend, if what you say is correct, and I have overlooked it. But if you continue to express your views after your own fashion in lengthy speeches, [315e] and I speak likewise, we shall never come to any agreement, in my opinion: but if we study the matter jointly, we may perhaps concur. Well now, if you like, hold a joint inquiry with me by asking me questions; or if you prefer, by answering them.

Companion: Why, I am willing, Socrates, to answer anything you like.

Socrates: Come then, do you consider4 just things to be unjust and unjust things just, or just things to be just and unjust things unjust?

Companion: I consider just things to be just, and unjust things unjust. [316a]

Socrates: And are they so considered among all men elsewhere as they are here?

Companion: Yes.

Socrates: And among the Persians also?

Companion: Among the Persians also.

Socrates: Always, I presume?

Companion: Always.

Socrates: Are things that weigh more considered heavier here, and things that weigh less lighter, or the contrary?

Companion: No, those that weigh more are considered heavier, and those that weigh less lighter.

Socrates: And is it so in Carthage also, and in Lycaea?

Companion: Yes.

Socrates: Noble things, it would seem, are everywhere considered noble, [316b] and base things base; not base things noble or noble things base.

Companion: That is so.

Socrates: And thus, as a universal rule, realities, and not unrealities, are accepted as real, both among us and among all other men.

Companion: I agree.

Socrates: Then whoever fails to attain reality, fails to attain accepted law.

Companion: In your present way of putting it, Socrates, the same things appear to be accepted as lawful both by us and by the rest of the world, always: [316c] but when I reflect that we are continually changing our laws in all sorts of ways, I cannot bring myself to assent.

Socrates: Perhaps it is because you do not reflect that when we change our pieces at draughts they are the same pieces. But look at it, as I do, in this way. Have you in your time come across a treatise on healing the sick?

Companion: I have.

Socrates: Then do you know to what art such a treatise belongs?

Companion: I do: medicine.

Socrates: And you give the name of doctors to those who have knowledge of these matters?

Companion: Yes. [316d]

Socrates: Then do those who have knowledge accept the same views on the same things, or do they accept different views?

Companion: The same, in my opinion.

Socrates: Do Greeks only accept the same views as Greeks on what they know, or do foreigners also agree on these matters, both among themselves and with Greeks?

Companion: It is quite inevitable, I should say, that those who know should agree in accepting the same views, whether Greeks or foreigners.

Socrates: Well answered. And do they so always?

Companion: Yes, it is so always.

Socrates: And do doctors on their part, in their treatises on health, [316e] write what they accept as real?

Companion: Yes.

Socrates: Then these treatises of the doctors are medical, and medical laws.

Companion: Medical, to be sure.

Socrates: And are agricultural treatises likewise agricultural laws?

Companion: Yes.

Socrates: And whose are the treatises and accepted rules about garden-work?

Companion: Gardeners’.

Socrates: So these are our gardening laws.

Companion: Yes.

Socrates: Of people who know how to control gardens?

Companion: Certainly.

Socrates: And it is the gardeners who know.

Companion: Yes.

Socrates: And whose are the treatises and accepted rules about the confection of tasty dishes?

Companion: Cooks'.

Socrates: Then there are laws of cookery?

Companion: Of cookery.

Socrates: Of people who know, it would seem, how to control the confection of tasty dishes? [317a]

Companion: Yes.

Socrates: And it is the cooks, they say, who know?

Companion: Yes, it is they who know.

Socrates: Very well; and now, whose are the treatises and accepted rules about the government of a state? Of the people who know how to control states, are they not?

Companion: I agree.

Socrates: And is it anyone else than statesmen and royal persons5 who know?

Companion: It is they, to be sure.

Socrates: Then what people call "laws" are treatises of state, — [317b] writings of kings and good men.

Companion: That is true.

Socrates: And must it not be that those who know will not write differently at different times on the same matters?

Companion: They will not.

Socrates: Nor will they ever change one set of accepted rules for another in respect of the same matters.

Companion: No, indeed.

Socrates: So if we see some persons anywhere doing this, shall we say that those who do so have knowledge, or have none?

Companion: That they have no knowledge.

Socrates: And again, whatever is right, we shall say is lawful for each person, whether in medicine or in cookery or in gardening?

Companion: Yes. [317c]

Socrates: And whatever is not right we shall decline to call lawful?

Companion: We shall decline.

Socrates: Then it becomes unlawful.

Companion: It must.

Socrates: And again, in writings about what is just and unjust, and generally about the government of a state and the proper way of governing it, that which is right is the king's law, but not so that which is not right, though it seems to be law to those who do not know; for it is unlawful.

Companion: Yes. [317d]

Socrates: Then we rightly admitted that law is discovery of reality.

Companion: So it appears.

Socrates: Now let us observe this further point about it. Who has knowledge of distributing6 seed over land?

Companion: A farmer.

Socrates: And does he distribute the suitable seed to each sort of land?

Companion: Yes.

Socrates: Then the farmer is a good apportioner of it, and his laws and distributions are right in this matter?

Companion: Yes.

Socrates: And who is a good apportioner of notes struck for a tune, skilled in distributing suitable notes, and who is it whose laws are right here? [317e]

Companion: The flute-player and the harp-player.

Socrates: Then he who is the best lawyer in these matters is the best flute-player.

Companion: Yes.

Socrates: And who is most skilled in distributing food to human bodies? Is it not he who assigns suitable food?

Companion: Yes.

Socrates: Then his distributions and laws are best, and whoever is the best lawyer in this matter is also the best apportioner.

Companion: Certainly.

Socrates: Who is he?

Companion: A trainer. [318a]

Socrates: He is the best man to pasture7 the human herd of the body?8

Companion: Yes.

Socrates: And who is the best man to pasture a flock of sheep? What is his name?

Companion: A shepherd.

Socrates: Then the shepherd’s laws are best for sheep.

Companion: Yes.

Socrates: And the herdsman’s for oxen.

Companion: Yes.

Socrates: And whose laws are best for the souls of men? The king's, are they not? Say if you agree.

Companion: I do. [318b]

Socrates: Then you are quite right. Now can you tell me who, in former times, has proved himself a good lawgiver in regard to the laws of flute-playing? Perhaps you cannot think of him: would you like me to remind you?

Companion: Do by all means.

Socrates: Then is it Marsyas, by tradition, and his beloved Olympus, the Phrygian?

Companion: That is true.

Socrates: And their flute-tunes also are most divine, and alone stir and make manifest those who are in need of the gods;9 and to this day they only remain, as being divine. [318c]

Companion: That is so.

Socrates: And who by tradition has shown himself a good lawgiver among the ancient kings, so that to this day his ordinances remain, as being divine?

Companion: I cannot think.

Socrates: Do you not know which of the Greeks use the most ancient laws?

Companion: Do you mean the Spartans, and Lycurgus the lawgiver?

Socrates: Why, that is a matter, I daresay, of less than three hundred years ago, or but a little more. But whence is it that [318d] the best of those ordinances come? Do you know?

Companion: From Crete, so they say.

Socrates: Then the people there use the most ancient laws in Greece?

Companion: Yes.

Socrates: Then do you know who were their good kings? Minos and Rhadamanthus, the sons of Zeus and Europa; those laws were theirs.

Companion: Rhadamanthus, they do say, Socrates, was a just man; but Minos was a savage sort of person, harsh and unjust.

Socrates: Your tale, my excellent friend, is a fiction of Attic tragedy. [318e]

Companion: What! Is not this the tradition about Minos?

Socrates: Not in Homer and Hesiod; and yet they are more to be believed than all the tragedians together, from whom you heard your tale.

Companion: Well, and what, pray, is their tale about Minos?

Socrates: I will tell you, in order that you may not share the impiety of the multitude: for there cannot conceivably be anything more impious or more to be guarded against than being mistaken in word and deed with regard to the gods, and after them, with regard to divine men; you must take very great precaution, whenever you are about to [319a] blame or praise a man, so as not to speak incorrectly. For this reason you must learn to distinguish honest and dishonest men: for God feels resentment when one blames a man who is like himself, or praises a man who is the opposite; and the former is the good man. For you must not suppose that while stocks and stones and birds and snakes are sacred, men are not; nay, the good man is the most sacred of all these things, and the wicked man is the most defiled.

So if I now proceed to relate how Minos is eulogized by Homer [319b] and Hesiod, my purpose is to prevent you, a man sprung from a man, from making a mistake in regard to a hero who was the son of Zeus.10 For Homer, in telling of Crete that there were in it many men and “ninety cities,” says:”And amongst them is the mighty city of Cnossos, where Minos was king, having colloquy11 with mighty Zeus in the ninth year.“Hom. Od.

19.179 [319c] Now here in Homer we have a eulogy of Minos, briefly expressed, such as the poet never composed for a single one of the heroes. For that Zeus is a sophist, and that sophistry is a highly honorable art, he makes plain in many other places, and particularly here. For he says that Minos consorted and discoursed with Zeus in the ninth year, and went regularly to be educated by Zeus as though he were a sophist. And the fact that Homer assigned this privilege of having been educated by Zeus to no one among the heroes but Minos makes this a marvellous piece of praise. [319d] And in the Ghost-raising in the Odyssey12 he has described Minos as judging with a golden scepter in his hand, but not Rhadamanthus: Rhadamanthus he has neither described here as judging nor anywhere as consorting with Zeus; wherefore I say that Minos above all persons has been eulogized by Homer. For to have been the son of Zeus, and to have been the only one who was educated by Zeus, is praise unsurpassable.

For the meaning of the verse— “he was king having colloquy with mighty Zeus in the ninth year” — “Hom. Od. 19.179 [319e] is that Minos was a disciple of Zeus. For colloquies are discourses, and he who has colloquy is a disciple by means of discourse. So every ninth year Minos repaired to the cave of Zeus, to learn some things, and to show his knowledge of others that he had learnt from Zeus in the preceding nine years. Some there are who suppose that he who has colloquy is a cup-companion and fellow-jester of Zeus: but one may take the following as a proof that [320a] they who suppose so are babblers. For of all the many nations of men, both Greek and foreign, the only people who refrain from drinking-bouts and the jesting that occurs where there is wine, are the Cretans, and after them the Spartans, who learnt it from the Cretans. In Crete it is one of their laws which Minos ordained that they are not to drink with each other to intoxication. And yet it is evident that the things he thought honorable were what he ordained as lawful for his people as well. For surely Minos did not, like an

inferior person, [320b] think one thing and do another, different from what he thought: no, this intercourse, as I say, was held by means of discussion for education in virtue. Wherefore he ordained for his people these very laws, which have made Crete happy through the length of time, and Sparta happy also, since she began to use them; for they are divine.

Rhadamanthus was a good man indeed, for he had been educated by Minos; he had, however, been educated, [320c] not in the whole of the kingly art, but in one subsidiary to the kingly, enough for presiding in law courts; so that he was spoken of as a good judge. For Minos used him as guardian of the law in the city, and Talos13 as the same for the rest of Crete. For Talos thrice a year made a round of the villages, guarding the laws in them, by holding their laws inscribed on brazen tablets, which gave him his name of "brazen." And what Hesiod14 also has said [320d] of Minos is akin to this. For after mentioning him by name he remarks— "Who was most kingly of mortal kings, and lorded it over more neighboring folk than any, holding the scepter of Zeus: therewith it was that he ruled the cities as king."Hes. Fr. 144And by the scepter of Zeus he means nothing else than the education that he had of Zeus, whereby he directed Crete.

Companion: Then how has it ever come about, Socrates, that this report is spread abroad of Minos, as an uneducated [320e] and harsh-tempered person?

Socrates: Because of something that will make both you, if you are wise, my excellent friend, and everybody else who cares to have a good reputation, beware of ever quarreling with any man of a poetic turn. For poets have great influence over opinion, according as they create it in the minds of men by either commending or vilifying. And this was the mistake that Minos made, in waging war on this city of ours, which besides all its various culture has poets of every kind, and especially those who write tragedy. [321a] Now tragedy is a thing of ancient

standing here; it did not begin, as people suppose, from Thespis or from Phrynicus, but if you will reflect, you will find it is a very ancient invention of our city. Tragedy is the most popularly delightful and soul-enthralling branch of poetry: in it, accordingly, we get Minos on the rack of verse,15, and thus avenge ourselves for that tribute which he compelled us to pay16 This, then, was the mistake that Minos made — his quarrel with us — and hence it is that, as you said in your question, he has fallen more and more into evil repute. For that he was a good [321b] and law-abiding person, as we stated in what went before — a good apportioner — is most convincingly shown by the fact the his laws are unshaken, since they were made by one who discovered aright the truth of reality in regard to the management of a state.

Companion: In my opinion, Socrates, your statement is a probable one.

Socrates: Then if what I say is true, do you consider that the Cretan people of Minos and Rhadamanthus use the most ancient laws?

Companion: I do.

Socrates: So these have shown themselves the best lawgivers among men of ancient times — [321c] apportioners and shepherds of men; just as Homer called the good general a “shepherd of the folk.”

Companion: Quite so, indeed.

Socrates: Come then, in good friendship’s name: if someone should ask us what it is that the good lawgiver and apportioner for the body distributes to it when he makes it better, we should say, if we were to make a correct and brief answer, that it was food and labor; the former to strengthen, and the latter to exercise and brace it.

Companion: And we should be right. [321d]

Socrates: And if he then proceeded to ask us — And what might that be which the good lawgiver and apportioner distributes to the soul to make it better? — what would be our answer if we would avoid being ashamed of ourselves and our years?

Companion: This time I am unable to say.

Socrates: But indeed it is shameful for the soul of either of us to be found ignorant of those things within it on which its good and abject states depend, while it has studied those that pertain to the body and rest.

Apology

ΑΠΟΛΟΓΙΑ

How you, O Athenians, have been affected by my accusers, I cannot tell; but I know that they almost made me forget who I was — so persuasively did they speak; and yet they have hardly uttered a word of truth. But of the many falsehoods told by them, there was one which quite amazed me; — I mean when they said that you should be upon your guard and not allow yourselves to be deceived by the force of my eloquence. To say this, when they were certain to be detected as soon as I opened my lips and proved myself to be anything but a great speaker, did indeed appear to me most shameless — unless by the force of eloquence they mean the force of truth; for is such is their meaning, I admit that I am eloquent. But in how different a way from theirs! Well, as I was saying, they have scarcely spoken the truth at all; but from me you shall hear the whole truth: not, however, delivered after their manner in a set oration duly ornamented with words and phrases. No, by heaven! but I shall use the words and arguments which occur to me at the moment; for I am confident in the justice of my cause (Or, I am certain that I am right in taking this course.): at my time of life I ought not to be appearing before you, O men of Athens, in the character of a juvenile orator — let no one expect it of me. And I must beg of you to grant me a favour: — If I defend myself in my accustomed manner, and you hear me using the words which I have been in the habit of using in the agora, at the tables of the money-changers, or anywhere else, I would ask you not to be surprised, and not to interrupt me on this account. For I am

more than seventy years of age, and appearing now for the first time in a court of law, I am quite a stranger to the language of the place; and therefore I would have you regard me as if I were really a stranger, whom you would excuse if he spoke in his native tongue, and after the fashion of his country: — Am I making an unfair request of you? Never mind the manner, which may or may not be good; but think only of the truth of my words, and give heed to that: let the speaker speak truly and the judge decide justly.

And first, I have to reply to the older charges and to my first accusers, and then I will go on to the later ones. For of old I have had many accusers, who have accused me falsely to you during many years; and I am more afraid of them than of Anytus and his associates, who are dangerous, too, in their own way. But far more dangerous are the others, who began when you were children, and took possession of your minds with their falsehoods, telling of one Socrates, a wise man, who speculated about the heaven above, and searched into the earth beneath, and made the worse appear the better cause. The disseminators of this tale are the accusers whom I dread; for their hearers are apt to fancy that such enquirers do not believe in the existence of the gods. And they are many, and their charges against me are of ancient date, and they were made by them in the days when you were more impressible than you are now — in childhood, or it may have been in youth — and the cause when heard went by default, for there was none to answer. And hardest of all, I do not know and cannot tell the names of my accusers; unless in the chance case of a Comic poet. All who from envy and malice have persuaded you — some of them having first convinced themselves — all this class of men are most difficult to deal with; for I cannot have them up here, and cross-examine them, and therefore I must simply fight with shadows in my own defence, and argue when there is no one who answers. I will ask you then to assume with me, as I was saying, that my opponents are of two kinds; one recent, the

other ancient: and I hope that you will see the propriety of my answering the latter first, for these accusations you heard long before the others, and much oftener.

Well, then, I must make my defence, and endeavour to clear away in a short time, a slander which has lasted a long time. May I succeed, if to succeed be for my good and yours, or likely to avail me in my cause! The task is not an easy one; I quite understand the nature of it. And so leaving the event with God, in obedience to the law I will now make my defence.

I will begin at the beginning, and ask what is the accusation which has given rise to the slander of me, and in fact has encouraged Meletus to proof this charge against me. Well, what do the slanderers say? They shall be my prosecutors, and I will sum up their words in an affidavit: 'Socrates is an evil-doer, and a curious person, who searches into things under the earth and in heaven, and he makes the worse appear the better cause; and he teaches the aforesaid doctrines to others.' Such is the nature of the accusation: it is just what you have yourselves seen in the comedy of Aristophanes (Aristoph., Clouds.), who has introduced a man whom he calls Socrates, going about and saying that he walks in air, and talking a deal of nonsense concerning matters of which I do not pretend to know either much or little — not that I mean to speak disparagingly of any one who is a student of natural philosophy. I should be very sorry if Meletus could bring so grave a charge against me. But the simple truth is, O Athenians, that I have nothing to do with physical speculations. Very many of those here present are witnesses to the truth of this, and to them I appeal. Speak then, you who have heard me, and tell your neighbours whether any of you have ever known me hold forth in few words or in many upon such matters...You hear their answer. And from what they say of this part of the charge you will be able to judge of the truth of the rest.

As little foundation is there for the report that I am a teacher, and take money; this accusation has no more truth in it than the other. Although, if a man were really able to instruct mankind, to receive money for giving instruction would, in my opinion, be an honour to him. There is Gorgias of Leontium, and Prodicus of Ceos, and Hippias of Elis, who go the round of the cities, and are able to persuade the young men to leave their own citizens by whom they might be taught for nothing, and come to them whom they not only pay, but are thankful if they may be allowed to pay them. There is at this time a Parian philosopher residing in Athens, of whom I have heard; and I came to hear of him in this way: — I came across a man who has spent a world of money on the Sophists, Callias, the son of Hipponicus, and knowing that he had sons, I asked him: 'Callias,' I said, 'if your two sons were foals or calves, there would be no difficulty in finding some one to put over them; we should hire a trainer of horses, or a farmer probably, who would improve and perfect them in their own proper virtue and excellence; but as they are human beings, whom are you thinking of placing over them? Is there any one who understands human and political virtue? You must have thought about the matter, for you have sons; is there any one?' 'There is,' he said. 'Who is he?' said I; 'and of what country? and what does he charge?' 'Evenus the Parian,' he replied; 'he is the man, and his charge is five minae.' Happy is Evenus, I said to myself, if he really has this wisdom, and teaches at such a moderate charge. Had I the same, I should have been very proud and conceited; but the truth is that I have no knowledge of the kind.

I dare say, Athenians, that some one among you will reply, 'Yes, Socrates, but what is the origin of these accusations which are brought against you; there must have been something strange which you have been doing? All these rumours and this talk about you would never have arisen if you had been like other men: tell us, then, what is the cause of them, for we should be sorry to judge hastily of you.' Now I regard this as a fair

challenge, and I will endeavour to explain to you the reason why I am called wise and have such an evil fame. Please to attend then. And although some of you may think that I am joking, I declare that I will tell you the entire truth. Men of Athens, this reputation of mine has come of a certain sort of wisdom which I possess. If you ask me what kind of wisdom, I reply, wisdom such as may perhaps be attained by man, for to that extent I am inclined to believe that I am wise; whereas the persons of whom I was speaking have a superhuman wisdom which I may fail to describe, because I have it not myself; and he who says that I have, speaks falsely, and is taking away my character. And here, O men of Athens, I must beg you not to interrupt me, even if I seem to say something extravagant. For the word which I will speak is not mine. I will refer you to a witness who is worthy of credit; that witness shall be the God of Delphi — he will tell you about my wisdom, if I have any, and of what sort it is. You must have known Chaerephon; he was early a friend of mine, and also a friend of yours, for he shared in the recent exile of the people, and returned with you. Well, Chaerephon, as you know, was very impetuous in all his doings, and he went to Delphi and boldly asked the oracle to tell him whether — as I was saying, I must beg you not to interrupt — he asked the oracle to tell him whether anyone was wiser than I was, and the Pythian prophetess answered, that there was no man wiser. Chaerephon is dead himself; but his brother, who is in court, will confirm the truth of what I am saying.

Why do I mention this? Because I am going to explain to you why I have such an evil name. When I heard the answer, I said to myself, What can the god mean? and what is the interpretation of his riddle? for I know that I have no wisdom, small or great. What then can he mean when he says that I am the wisest of men? And yet he is a god, and cannot lie; that would be against his nature. After long consideration, I thought of a method of trying the question. I reflected that if I could only find a man wiser than myself, then I might go to the god with a

refutation in my hand. I should say to him, ‘Here is a man who is wiser than I am; but you said that I was the wisest.’ Accordingly I went to one who had the reputation of wisdom, and observed him — his name I need not mention; he was a politician whom I selected for examination — and the result was as follows: When I began to talk with him, I could not help thinking that he was not really wise, although he was thought wise by many, and still wiser by himself; and thereupon I tried to explain to him that he thought himself wise, but was not really wise; and the consequence was that he hated me, and his enmity was shared by several who were present and heard me. So I left him, saying to myself, as I went away: Well, although I do not suppose that either of us knows anything really beautiful and good, I am better off than he is, — for he knows nothing, and thinks that he knows; I neither know nor think that I know. In this latter particular, then, I seem to have slightly the advantage of him. Then I went to another who had still higher pretensions to wisdom, and my conclusion was exactly the same. Whereupon I made another enemy of him, and of many others besides him.

Then I went to one man after another, being not unconscious of the enmity which I provoked, and I lamented and feared this: but necessity was laid upon me, — the word of God, I thought, ought to be considered first. And I said to myself, Go I must to all who appear to know, and find out the meaning of the oracle. And I swear to you, Athenians, by the dog I swear! — for I must tell you the truth — the result of my mission was just this: I found that the men most in repute were all but the most foolish; and that others less esteemed were really wiser and better. I will tell you the tale of my wanderings and of the ‘Herculean’ labours, as I may call them, which I endured only to find at last the oracle irrefutable. After the politicians, I went to the poets; tragic, dithyrambic, and all sorts. And there, I said to myself, you will be instantly detected; now you will find out that you are more ignorant than they are. Accordingly, I took them some of the most elaborate passages in their own writings, and asked

what was the meaning of them — thinking that they would teach me something. Will you believe me? I am almost ashamed to confess the truth, but I must say that there is hardly a person present who would not have talked better about their poetry than they did themselves. Then I knew that not by wisdom do poets write poetry, but by a sort of genius and inspiration; they are like diviners or soothsayers who also say many fine things, but do not understand the meaning of them. The poets appeared to me to be much in the same case; and I further observed that upon the strength of their poetry they believed themselves to be the wisest of men in other things in which they were not wise. So I departed, conceiving myself to be superior to them for the same reason that I was superior to the politicians.

At last I went to the artisans. I was conscious that I knew nothing at all, as I may say, and I was sure that they knew many fine things; and here I was not mistaken, for they did know many things of which I was ignorant, and in this they certainly were wiser than I was. But I observed that even the good artisans fell into the same error as the poets; — because they were good workmen they thought that they also knew all sorts of high matters, and this defect in them overshadowed their wisdom; and therefore I asked myself on behalf of the oracle, whether I would like to be as I was, neither having their knowledge nor their ignorance, or like them in both; and I made answer to myself and to the oracle that I was better off as I was.

This inquisition has led to my having many enemies of the worst and most dangerous kind, and has given occasion also to many calumnies. And I am called wise, for my hearers always imagine that I myself possess the wisdom which I find wanting in others: but the truth is, O men of Athens, that God only is wise; and by his answer he intends to show that the wisdom of men is worth little or nothing; he is not speaking of Socrates, he is only using my name by way of illustration, as if he said, He, O men, is the wisest, who, like Socrates, knows that his wisdom is in truth

worth nothing. And so I go about the world, obedient to the god, and search and make enquiry into the wisdom of any one, whether citizen or stranger, who appears to be wise; and if he is not wise, then in vindication of the oracle I show him that he is not wise; and my occupation quite absorbs me, and I have no time to give either to any public matter of interest or to any concern of my own, but I am in utter poverty by reason of my devotion to the god.

There is another thing: — young men of the richer classes, who have not much to do, come about me of their own accord; they like to hear the pretenders examined, and they often imitate me, and proceed to examine others; there are plenty of persons, as they quickly discover, who think that they know something, but really know little or nothing; and then those who are examined by them instead of being angry with themselves are angry with me: This confounded Socrates, they say; this villainous misleader of youth! — and then if somebody asks them, Why, what evil does he practise or teach? they do not know, and cannot tell; but in order that they may not appear to be at a loss, they repeat the ready-made charges which are used against all philosophers about teaching things up in the clouds and under the earth, and having no gods, and making the worse appear the better cause; for they do not like to confess that their pretence of knowledge has been detected — which is the truth; and as they are numerous and ambitious and energetic, and are drawn up in battle array and have persuasive tongues, they have filled your ears with their loud and inveterate calumnies. And this is the reason why my three accusers, Meletus and Anytus and Lycon, have set upon me; Meletus, who has a quarrel with me on behalf of the poets; Anytus, on behalf of the craftsmen and politicians; Lycon, on behalf of the rhetoricians: and as I said at the beginning, I cannot expect to get rid of such a mass of calumny all in a moment. And this, O men of Athens, is the truth and the whole truth; I have concealed nothing, I have dissembled nothing. And yet, I know that my plainness of speech

makes them hate me, and what is their hatred but a proof that I am speaking the truth? — Hence has arisen the prejudice against me; and this is the reason of it, as you will find out either in this or in any future enquiry.

I have said enough in my defence against the first class of my accusers; I turn to the second class. They are headed by Meletus, that good man and true lover of his country, as he calls himself. Against these, too, I must try to make a defence: — Let their affidavit be read: it contains something of this kind: It says that Socrates is a doer of evil, who corrupts the youth; and who does not believe in the gods of the state, but has other new divinities of his own. Such is the charge; and now let us examine the particular counts. He says that I am a doer of evil, and corrupt the youth; but I say, O men of Athens, that Meletus is a doer of evil, in that he pretends to be in earnest when he is only in jest, and is so eager to bring men to trial from a pretended zeal and interest about matters in which he really never had the smallest interest. And the truth of this I will endeavour to prove to you.

Come hither, Meletus, and let me ask a question of you. You think a great deal about the improvement of youth?

Yes, I do.

Tell the judges, then, who is their improver; for you must know, as you have taken the pains to discover their corrupter, and are citing and accusing me before them. Speak, then, and tell the judges who their improver is. — Observe, Meletus, that you are silent, and have nothing to say. But is not this rather disgraceful, and a very considerable proof of what I was saying, that you have no interest in the matter? Speak up, friend, and tell us who their improver is.

The laws.

But that, my good sir, is not my meaning. I want to know who the person is, who, in the first place, knows the laws.

The judges, Socrates, who are present in court.

What, do you mean to say, Meletus, that they are able to instruct and improve youth?

Certainly they are.

What, all of them, or some only and not others?

All of them.

By the goddess Here, that is good news! There are plenty of improvers, then. And what do you say of the audience, — do they improve them?

Yes, they do.

And the senators?

Yes, the senators improve them.

But perhaps the members of the assembly corrupt them? — or do they too improve them?

They improve them.

Then every Athenian improves and elevates them; all with the exception of myself; and I alone am their corrupter? Is that what you affirm?

That is what I stoutly affirm.

I am very unfortunate if you are right. But suppose I ask you a question: How about horses? Does one man do them harm and all the world good? Is not the exact opposite the truth? One man is able to do them good, or at least not many; — the trainer of horses, that is to say, does them good, and others who have to do with them rather injure them? Is not that true, Meletus, of horses, or of any other animals? Most assuredly it is; whether you and Anytus say yes or no. Happy indeed would be the condition of youth if they had one corrupter only, and all the rest of the world were their improvers. But you, Meletus, have sufficiently shown that you never had a thought about the

young: your carelessness is seen in your not caring about the very things which you bring against me.

And now, Meletus, I will ask you another question — by Zeus I will: Which is better, to live among bad citizens, or among good ones? Answer, friend, I say; the question is one which may be easily answered. Do not the good do their neighbours good, and the bad do them evil?

Certainly.

And is there anyone who would rather be injured than benefited by those who live with him? Answer, my good friend, the law requires you to answer — does any one like to be injured?

Certainly not.

And when you accuse me of corrupting and deteriorating the youth, do you allege that I corrupt them intentionally or unintentionally?

Intentionally, I say.

But you have just admitted that the good do their neighbours good, and the evil do them evil. Now, is that a truth which your superior wisdom has recognized thus early in life, and am I, at my age, in such darkness and ignorance as not to know that if a man with whom I have to live is corrupted by me, I am very likely to be harmed by him; and yet I corrupt him, and intentionally, too — so you say, although neither I nor any other human being is ever likely to be convinced by you. But either I do not corrupt them, or I corrupt them unintentionally; and on either view of the case you lie. If my offence is unintentional, the law has no cognizance of unintentional offences: you ought to have taken me privately, and warned and admonished me; for if I had been better advised, I should have left off doing what I only did unintentionally — no doubt I should; but you would have nothing to say to me and refused to teach me. And now you bring me up in this court, which is a place not of instruction, but of punishment.

It will be very clear to you, Athenians, as I was saying, that Meletus has no care at all, great or small, about the matter. But still I should like to know, Meletus, in what I am affirmed to corrupt the young. I suppose you mean, as I infer from your indictment, that I teach them not to acknowledge the gods which the state acknowledges, but some other new divinities or spiritual agencies in their stead. These are the lessons by which I corrupt the youth, as you say.

Yes, that I say emphatically.

Then, by the gods, Meletus, of whom we are speaking, tell me and the court, in somewhat plainer terms, what you mean! for I do not as yet understand whether you affirm that I teach other men to acknowledge some gods, and therefore that I do believe in gods, and am not an entire atheist — this you do not lay to my charge, — but only you say that they are not the same gods which the city recognizes — the charge is that they are different gods. Or, do you mean that I am an atheist simply, and a teacher of atheism?

I mean the latter — that you are a complete atheist.

What an extraordinary statement! Why do you think so, Meletus? Do you mean that I do not believe in the godhead of the sun or moon, like other men?

I assure you, judges, that he does not: for he says that the sun is stone, and the moon earth.

Friend Meletus, you think that you are accusing Anaxagoras: and you have but a bad opinion of the judges, if you fancy them illiterate to such a degree as not to know that these doctrines are found in the books of Anaxagoras the Clazomenian, which are full of them. And so, forsooth, the youth are said to be taught them by Socrates, when there are not unfrequently exhibitions of them at the theatre (Probably in allusion to Aristophanes who caricatured, and to Euripides who borrowed the notions of Anaxagoras, as well as to other dramatic poets.)

(price of admission one drachma at the most); and they might pay their money, and laugh at Socrates if he pretends to father these extraordinary views. And so, Meletus, you really think that I do not believe in any god?

I swear by Zeus that you believe absolutely in none at all.

Nobody will believe you, Meletus, and I am pretty sure that you do not believe yourself. I cannot help thinking, men of Athens, that Meletus is reckless and impudent, and that he has written this indictment in a spirit of mere wantonness and youthful bravado. Has he not compounded a riddle, thinking to try me? He said to himself: — I shall see whether the wise Socrates will discover my facetious contradiction, or whether I shall be able to deceive him and the rest of them. For he certainly does appear to me to contradict himself in the indictment as much as if he said that Socrates is guilty of not believing in the gods, and yet of believing in them — but this is not like a person who is in earnest.

I should like you, O men of Athens, to join me in examining what I conceive to be his inconsistency; and do you, Meletus, answer. And I must remind the audience of my request that they would not make a disturbance if I speak in my accustomed manner:

Did ever man, Meletus, believe in the existence of human things, and not of human beings?...I wish, men of Athens, that he would answer, and not be always trying to get up an interruption. Did ever any man believe in horsemanship, and not in horses? or in flute-playing, and not in flute-players? No, my friend; I will answer to you and to the court, as you refuse to answer for yourself. There is no man who ever did. But now please to answer the next question: Can a man believe in spiritual and divine agencies, and not in spirits or demigods?

He cannot.

How lucky I am to have extracted that answer, by the assistance of the court! But then you swear in the indictment that I teach

and believe in divine or spiritual agencies (new or old, no matter for that); at any rate, I believe in spiritual agencies, — so you say and swear in the affidavit; and yet if I believe in divine beings, how can I help believing in spirits or demigods; — must I not? To be sure I must; and therefore I may assume that your silence gives consent. Now what are spirits or demigods? Are they not either gods or the sons of gods?

Certainly they are.

But this is what I call the facetious riddle invented by you: the demigods or spirits are gods, and you say first that I do not believe in gods, and then again that I do believe in gods; that is, if I believe in demigods. For if the demigods are the illegitimate sons of gods, whether by the nymphs or by any other mothers, of whom they are said to be the sons — what human being will ever believe that there are no gods if they are the sons of gods? You might as well affirm the existence of mules, and deny that of horses and asses. Such nonsense, Meletus, could only have been intended by you to make trial of me. You have put this into the indictment because you had nothing real of which to accuse me. But no one who has a particle of understanding will ever be convinced by you that the same men can believe in divine and superhuman things, and yet not believe that there are gods and demigods and heroes.

I have said enough in answer to the charge of Meletus: any elaborate defence is unnecessary, but I know only too well how many are the enmities which I have incurred, and this is what will be my destruction if I am destroyed; — not Meletus, nor yet Anytus, but the envy and detraction of the world, which has been the death of many good men, and will probably be the death of many more; there is no danger of my being the last of them.

Some one will say: And are you not ashamed, Socrates, of a course of life which is likely to bring you to an untimely end? To him I may fairly answer: There you are mistaken: a man who is

good for anything ought not to calculate the chance of living or dying; he ought only to consider whether in doing anything he is doing right or wrong — acting the part of a good man or of a bad. Whereas, upon your view, the heroes who fell at Troy were not good for much, and the son of Thetis above all, who altogether despised danger in comparison with disgrace; and when he was so eager to slay Hector, his goddess mother said to him, that if he avenged his companion Patroclus, and slew Hector, he would die himself— 'Fate,' she said, in these or the like words, 'waits for you next after Hector;' he, receiving this warning, utterly despised danger and death, and instead of fearing them, feared rather to live in dishonour, and not to avenge his friend. 'Let me die forthwith,' he replies, 'and be avenged of my enemy, rather than abide here by the beaked ships, a laughing-stock and a burden of the earth.' Had Achilles any thought of death and danger? For wherever a man's place is, whether the place which he has chosen or that in which he has been placed by a commander, there he ought to remain in the hour of danger; he should not think of death or of anything but of disgrace. And this, O men of Athens, is a true saying.

Strange, indeed, would be my conduct, O men of Athens, if I who, when I was ordered by the generals whom you chose to command me at Potidaea and Amphipolis and Delium, remained where they placed me, like any other man, facing death — if now, when, as I conceive and imagine, God orders me to fulfil the philosopher's mission of searching into myself and other men, I were to desert my post through fear of death, or any other fear; that would indeed be strange, and I might justly be arraigned in court for denying the existence of the gods, if I disobeyed the oracle because I was afraid of death, fancying that I was wise when I was not wise. For the fear of death is indeed the pretence of wisdom, and not real wisdom, being a pretence of knowing the unknown; and no one knows whether death, which men in their fear apprehend to be the greatest evil, may not be the greatest good. Is not this ignorance of a

disgraceful sort, the ignorance which is the conceit that a man knows what he does not know? And in this respect only I believe myself to differ from men in general, and may perhaps claim to be wiser than they are: — that whereas I know but little of the world below, I do not suppose that I know: but I do know that injustice and disobedience to a better, whether God or man, is evil and dishonourable, and I will never fear or avoid a possible good rather than a certain evil. And therefore if you let me go now, and are not convinced by Anytus, who said that since I had been prosecuted I must be put to death; (or if not that I ought never to have been prosecuted at all); and that if I escape now, your sons will all be utterly ruined by listening to my words — if you say to me, Socrates, this time we will not mind Anytus, and you shall be let off, but upon one condition, that you are not to enquire and speculate in this way any more, and that if you are caught doing so again you shall die; — if this was the condition on which you let me go, I should reply: Men of Athens, I honour and love you; but I shall obey God rather than you, and while I have life and strength I shall never cease from the practice and teaching of philosophy, exhorting any one whom I meet and saying to him after my manner: You, my friend, — a citizen of the great and mighty and wise city of Athens, — are you not ashamed of heaping up the greatest amount of money and honour and reputation, and caring so little about wisdom and truth and the greatest improvement of the soul, which you never regard or heed at all? And if the person with whom I am arguing, says: Yes, but I do care; then I do not leave him or let him go at once; but I proceed to interrogate and examine and cross-examine him, and if I think that he has no virtue in him, but only says that he has, I reproach him with undervaluing the greater, and overvaluing the less. And I shall repeat the same words to every one whom I meet, young and old, citizen and alien, but especially to the citizens, inasmuch as they are my brethren. For know that this is the command of God; and I believe that no greater good has ever happened in the state than

my service to the God. For I do nothing but go about persuading you all, old and young alike, not to take thought for your persons or your properties, but first and chiefly to care about the greatest improvement of the soul. I tell you that virtue is not given by money, but that from virtue comes money and every other good of man, public as well as private. This is my teaching, and if this is the doctrine which corrupts the youth, I am a mischievous person. But if any one says that this is not my teaching, he is speaking an untruth. Wherefore, O men of Athens, I say to you, do as Anytus bids or not as Anytus bids, and either acquit me or not; but whichever you do, understand that I shall never alter my ways, not even if I have to die many times.

Men of Athens, do not interrupt, but hear me; there was an understanding between us that you should hear me to the end: I have something more to say, at which you may be inclined to cry out; but I believe that to hear me will be good for you, and therefore I beg that you will not cry out. I would have you know, that if you kill such an one as I am, you will injure yourselves more than you will injure me. Nothing will injure me, not Meletus nor yet Anytus — they cannot, for a bad man is not permitted to injure a better than himself. I do not deny that Anytus may, perhaps, kill him, or drive him into exile, or deprive him of civil rights; and he may imagine, and others may imagine, that he is inflicting a great injury upon him: but there I do not agree. For the evil of doing as he is doing — the evil of unjustly taking away the life of another — is greater far.

And now, Athenians, I am not going to argue for my own sake, as you may think, but for yours, that you may not sin against the God by condemning me, who am his gift to you. For if you kill me you will not easily find a successor to me, who, if I may use such a ludicrous figure of speech, am a sort of gadfly, given to the state by God; and the state is a great and noble steed who is tardy in his motions owing to his very size, and requires to be stirred into life. I am that gadfly which God has attached to the

state, and all day long and in all places am always fastening upon you, arousing and persuading and reproaching you. You will not easily find another like me, and therefore I would advise you to spare me. I dare say that you may feel out of temper (like a person who is suddenly awakened from sleep), and you think that you might easily strike me dead as Anytus advises, and then you would sleep on for the remainder of your lives, unless God in his care of you sent you another gadfly. When I say that I am given to you by God, the proof of my mission is this: — if I had been like other men, I should not have neglected all my own concerns or patiently seen the neglect of them during all these years, and have been doing yours, coming to you individually like a father or elder brother, exhorting you to regard virtue; such conduct, I say, would be unlike human nature. If I had gained anything, or if my exhortations had been paid, there would have been some sense in my doing so; but now, as you will perceive, not even the impudence of my accusers dares to say that I have ever exacted or sought pay of any one; of that they have no witness. And I have a sufficient witness to the truth of what I say — my poverty.

Some one may wonder why I go about in private giving advice and busying myself with the concerns of others, but do not venture to come forward in public and advise the state. I will tell you why. You have heard me speak at sundry times and in divers places of an oracle or sign which comes to me, and is the divinity which Meletus ridicules in the indictment. This sign, which is a kind of voice, first began to come to me when I was a child; it always forbids but never commands me to do anything which I am going to do. This is what deters me from being a politician. And rightly, as I think. For I am certain, O men of Athens, that if I had engaged in politics, I should have perished long ago, and done no good either to you or to myself. And do not be offended at my telling you the truth: for the truth is, that no man who goes to war with you or any other multitude, honestly striving against the many lawless and unrighteous

deeds which are done in a state, will save his life; he who will fight for the right, if he would live even for a brief space, must have a private station and not a public one.

I can give you convincing evidence of what I say, not words only, but what you value far more — actions. Let me relate to you a passage of my own life which will prove to you that I should never have yielded to injustice from any fear of death, and that 'as I should have refused to yield' I must have died at once. I will tell you a tale of the courts, not very interesting perhaps, but nevertheless true. The only office of state which I ever held, O men of Athens, was that of senator: the tribe Antiochis, which is my tribe, had the presidency at the trial of the generals who had not taken up the bodies of the slain after the battle of Arginusae; and you proposed to try them in a body, contrary to law, as you all thought afterwards; but at the time I was the only one of the Prytanes who was opposed to the illegality, and I gave my vote against you; and when the orators threatened to impeach and arrest me, and you called and shouted, I made up my mind that I would run the risk, having law and justice with me, rather than take part in your injustice because I feared imprisonment and death. This happened in the days of the democracy. But when the oligarchy of the Thirty was in power, they sent for me and four others into the rotunda, and bade us bring Leon the Salaminian from Salamis, as they wanted to put him to death. This was a specimen of the sort of commands which they were always giving with the view of implicating as many as possible in their crimes; and then I showed, not in word only but in deed, that, if I may be allowed to use such an expression, I cared not a straw for death, and that my great and only care was lest I should do an unrighteous or unholy thing. For the strong arm of that oppressive power did not frighten me into doing wrong; and when we came out of the rotunda the other four went to Salamis and fetched Leon, but I went quietly home. For which I might have lost my life, had not the power of the Thirty shortly afterwards come to an end. And many will witness to my words.

Now do you really imagine that I could have survived all these years, if I had led a public life, supposing that like a good man I had always maintained the right and had made justice, as I ought, the first thing? No indeed, men of Athens, neither I nor any other man. But I have been always the same in all my actions, public as well as private, and never have I yielded any base compliance to those who are slanderously termed my disciples, or to any other. Not that I have any regular disciples. But if any one likes to come and hear me while I am pursuing my mission, whether he be young or old, he is not excluded. Nor do I converse only with those who pay; but any one, whether he be rich or poor, may ask and answer me and listen to my words; and whether he turns out to be a bad man or a good one, neither result can be justly imputed to me; for I never taught or professed to teach him anything. And if any one says that he has ever learned or heard anything from me in private which all the world has not heard, let me tell you that he is lying.

But I shall be asked, Why do people delight in continually conversing with you? I have told you already, Athenians, the whole truth about this matter: they like to hear the cross-examination of the pretenders to wisdom; there is amusement in it. Now this duty of cross-examining other men has been imposed upon me by God; and has been signified to me by oracles, visions, and in every way in which the will of divine power was ever intimated to any one. This is true, O Athenians, or, if not true, would be soon refuted. If I am or have been corrupting the youth, those of them who are now grown up and have become sensible that I gave them bad advice in the days of their youth should come forward as accusers, and take their revenge; or if they do not like to come themselves, some of their relatives, fathers, brothers, or other kinsmen, should say what evil their families have suffered at my hands. Now is their time. Many of them I see in the court. There is Crito, who is of the same age and of the same deme with myself, and there is Critobulus his son, whom I also see. Then again there is

Lysanias of Sphettus, who is the father of Aeschines — he is present; and also there is Antiphon of Cephisus, who is the father of Epigenes; and there are the brothers of several who have associated with me. There is Nicostratus the son of Theosdotides, and the brother of Theodotus (now Theodotus himself is dead, and therefore he, at any rate, will not seek to stop him); and there is Paralus the son of Demodocus, who had a brother Theages; and Adeimantus the son of Ariston, whose brother Plato is present; and Aeantodorus, who is the brother of Apollodorus, whom I also see. I might mention a great many others, some of whom Meletus should have produced as witnesses in the course of his speech; and let him still produce them, if he has forgotten — I will make way for him. And let him say, if he has any testimony of the sort which he can produce. Nay, Athenians, the very opposite is the truth. For all these are ready to witness on behalf of the corrupter, of the injurer of their kindred, as Meletus and Anytus call me; not the corrupted youth only — there might have been a motive for that — but their uncorrupted elder relatives. Why should they too support me with their testimony? Why, indeed, except for the sake of truth and justice, and because they know that I am speaking the truth, and that Meletus is a liar.

Well, Athenians, this and the like of this is all the defence which I have to offer. Yet a word more. Perhaps there may be some one who is offended at me, when he calls to mind how he himself on a similar, or even a less serious occasion, prayed and entreated the judges with many tears, and how he produced his children in court, which was a moving spectacle, together with a host of relations and friends; whereas I, who am probably in danger of my life, will do none of these things. The contrast may occur to his mind, and he may be set against me, and vote in anger because he is displeased at me on this account. Now if there be such a person among you, — mind, I do not say that there is, — to him I may fairly reply: My friend, I am a man, and like other men, a creature of flesh and blood, and not ‘of wood

or stone,' as Homer says; and I have a family, yes, and sons, O Athenians, three in number, one almost a man, and two others who are still young; and yet I will not bring any of them hither in order to petition you for an acquittal. And why not? Not from any self-assertion or want of respect for you. Whether I am or am not afraid of death is another question, of which I will not now speak. But, having regard to public opinion, I feel that such conduct would be discreditable to myself, and to you, and to the whole state. One who has reached my years, and who has a name for wisdom, ought not to demean himself. Whether this opinion of me be deserved or not, at any rate the world has decided that Socrates is in some way superior to other men. And if those among you who are said to be superior in wisdom and courage, and any other virtue, demean themselves in this way, how shameful is their conduct! I have seen men of reputation, when they have been condemned, behaving in the strangest manner: they seemed to fancy that they were going to suffer something dreadful if they died, and that they could be immortal if you only allowed them to live; and I think that such are a dishonour to the state, and that any stranger coming in would have said of them that the most eminent men of Athens, to whom the Athenians themselves give honour and command, are no better than women. And I say that these things ought not to be done by those of us who have a reputation; and if they are done, you ought not to permit them; you ought rather to show that you are far more disposed to condemn the man who gets up a doleful scene and makes the city ridiculous, than him who holds his peace.

But, setting aside the question of public opinion, there seems to be something wrong in asking a favour of a judge, and thus procuring an acquittal, instead of informing and convincing him. For his duty is, not to make a present of justice, but to give judgment; and he has sworn that he will judge according to the laws, and not according to his own good pleasure; and we ought not to encourage you, nor should you allow yourselves to be

encouraged, in this habit of perjury — there can be no piety in that. Do not then require me to do what I consider dishonourable and impious and wrong, especially now, when I am being tried for impiety on the indictment of Meletus. For if, O men of Athens, by force of persuasion and entreaty I could overpower your oaths, then I should be teaching you to believe that there are no gods, and in defending should simply convict myself of the charge of not believing in them. But that is not so — far otherwise. For I do believe that there are gods, and in a sense higher than that in which any of my accusers believe in them. And to you and to God I commit my cause, to be determined by you as is best for you and me.

There are many reasons why I am not grieved, O men of Athens, at the vote of condemnation. I expected it, and am only surprised that the votes are so nearly equal; for I had thought that the majority against me would have been far larger; but now, had thirty votes gone over to the other side, I should have been acquitted. And I may say, I think, that I have escaped Meletus. I may say more; for without the assistance of Anytus and Lycon, any one may see that he would not have had a fifth part of the votes, as the law requires, in which case he would have incurred a fine of a thousand drachmae.

And so he proposes death as the penalty. And what shall I propose on my part, O men of Athens? Clearly that which is my due. And what is my due? What return shall be made to the man who has never had the wit to be idle during his whole life; but has been careless of what the many care for — wealth, and family interests, and military offices, and speaking in the assembly, and magistracies, and plots, and parties. Reflecting that I was really too honest a man to be a politician and live, I did not go where I could do no good to you or to myself; but where I could do the greatest good privately to every one of you, thither I went, and sought to persuade every man among you that he must look to himself, and seek virtue and wisdom before

he looks to his private interests, and look to the state before he looks to the interests of the state; and that this should be the order which he observes in all his actions. What shall be done to such an one? Doubtless some good thing, O men of Athens, if he has his reward; and the good should be of a kind suitable to him. What would be a reward suitable to a poor man who is your benefactor, and who desires leisure that he may instruct you? There can be no reward so fitting as maintenance in the Prytaneum, O men of Athens, a reward which he deserves far more than the citizen who has won the prize at Olympia in the horse or chariot race, whether the chariots were drawn by two horses or by many. For I am in want, and he has enough; and he only gives you the appearance of happiness, and I give you the reality. And if I am to estimate the penalty fairly, I should say that maintenance in the Prytaneum is the just return.

Perhaps you think that I am braving you in what I am saying now, as in what I said before about the tears and prayers. But this is not so. I speak rather because I am convinced that I never intentionally wronged any one, although I cannot convince you — the time has been too short; if there were a law at Athens, as there is in other cities, that a capital cause should not be decided in one day, then I believe that I should have convinced you. But I cannot in a moment refute great slanders; and, as I am convinced that I never wronged another, I will assuredly not wrong myself. I will not say of myself that I deserve any evil, or propose any penalty. Why should I? because I am afraid of the penalty of death which Meletus proposes? When I do not know whether death is a good or an evil, why should I propose a penalty which would certainly be an evil? Shall I say imprisonment? And why should I live in prison, and be the slave of the magistrates of the year — of the Eleven? Or shall the penalty be a fine, and imprisonment until the fine is paid? There is the same objection. I should have to lie in prison, for money I have none, and cannot pay. And if I say exile (and this may possibly be the penalty which you will affix), I must indeed be

blinded by the love of life, if I am so irrational as to expect that when you, who are my own citizens, cannot endure my discourses and words, and have found them so grievous and odious that you will have no more of them, others are likely to endure me. No indeed, men of Athens, that is not very likely. And what a life should I lead, at my age, wandering from city to city, ever changing my place of exile, and always being driven out! For I am quite sure that wherever I go, there, as here, the young men will flock to me; and if I drive them away, their elders will drive me out at their request; and if I let them come, their fathers and friends will drive me out for their sakes.

Some one will say: Yes, Socrates, but cannot you hold your tongue, and then you may go into a foreign city, and no one will interfere with you? Now I have great difficulty in making you understand my answer to this. For if I tell you that to do as you say would be a disobedience to the God, and therefore that I cannot hold my tongue, you will not believe that I am serious; and if I say again that daily to discourse about virtue, and of those other things about which you hear me examining myself and others, is the greatest good of man, and that the unexamined life is not worth living, you are still less likely to believe me. Yet I say what is true, although a thing of which it is hard for me to persuade you. Also, I have never been accustomed to think that I deserve to suffer any harm. Had I money I might have estimated the offence at what I was able to pay, and not have been much the worse. But I have none, and therefore I must ask you to proportion the fine to my means. Well, perhaps I could afford a mina, and therefore I propose that penalty: Plato, Crito, Critobulus, and Apollodorus, my friends here, bid me say thirty minae, and they will be the sureties. Let thirty minae be the penalty; for which sum they will be ample security to you.

Not much time will be gained, O Athenians, in return for the evil name which you will get from the detractors of the city, who will

say that you killed Socrates, a wise man; for they will call me wise, even although I am not wise, when they want to reproach you. If you had waited a little while, your desire would have been fulfilled in the course of nature. For I am far advanced in years, as you may perceive, and not far from death. I am speaking now not to all of you, but only to those who have condemned me to death. And I have another thing to say to them: you think that I was convicted because I had no words of the sort which would have procured my acquittal — I mean, if I had thought fit to leave nothing undone or unsaid. Not so; the deficiency which led to my conviction was not of words — certainly not. But I had not the boldness or impudence or inclination to address you as you would have liked me to do, weeping and wailing and lamenting, and saying and doing many things which you have been accustomed to hear from others, and which, as I maintain, are unworthy of me. I thought at the time that I ought not to do anything common or mean when in danger: nor do I now repent of the style of my defence; I would rather die having spoken after my manner, than speak in your manner and live. For neither in war nor yet at law ought I or any man to use every way of escaping death. Often in battle there can be no doubt that if a man will throw away his arms, and fall on his knees before his pursuers, he may escape death; and in other dangers there are other ways of escaping death, if a man is willing to say and do anything. The difficulty, my friends, is not to avoid death, but to avoid unrighteousness; for that runs faster than death. I am old and move slowly, and the slower runner has overtaken me, and my accusers are keen and quick, and the faster runner, who is unrighteousness, has overtaken them. And now I depart hence condemned by you to suffer the penalty of death, — they too go their ways condemned by the truth to suffer the penalty of villainy and wrong; and I must abide by my award — let them abide by theirs. I suppose that these things may be regarded as fated, — and I think that they are well.

And now, O men who have condemned me, I would fain prophesy to you; for I am about to die, and in the hour of death men are gifted with prophetic power. And I prophesy to you who are my murderers, that immediately after my departure punishment far heavier than you have inflicted on me will surely await you. Me you have killed because you wanted to escape the accuser, and not to give an account of your lives. But that will not be as you suppose: far otherwise. For I say that there will be more accusers of you than there are now; accusers whom hitherto I have restrained: and as they are younger they will be more inconsiderate with you, and you will be more offended at them. If you think that by killing men you can prevent some one from censuring your evil lives, you are mistaken; that is not a way of escape which is either possible or honourable; the easiest and the noblest way is not to be disabling others, but to be improving yourselves. This is the prophecy which I utter before my departure to the judges who have condemned me.

Friends, who would have acquitted me, I would like also to talk with you about the thing which has come to pass, while the magistrates are busy, and before I go to the place at which I must die. Stay then a little, for we may as well talk with one another while there is time. You are my friends, and I should like to show you the meaning of this event which has happened to me. O my judges — for you I may truly call judges — I should like to tell you of a wonderful circumstance. Hitherto the divine faculty of which the internal oracle is the source has constantly been in the habit of opposing me even about trifles, if I was going to make a slip or error in any matter; and now as you see there has come upon me that which may be thought, and is generally believed to be, the last and worst evil. But the oracle made no sign of opposition, either when I was leaving my house in the morning, or when I was on my way to the court, or while I was speaking, at anything which I was going to say; and yet I have often been stopped in the middle of a speech, but now in nothing I either said or did touching the matter in hand has the

oracle opposed me. What do I take to be the explanation of this silence? I will tell you. It is an intimation that what has happened to me is a good, and that those of us who think that death is an evil are in error. For the customary sign would surely have opposed me had I been going to evil and not to good.

Let us reflect in another way, and we shall see that there is great reason to hope that death is a good; for one of two things — either death is a state of nothingness and utter unconsciousness, or, as men say, there is a change and migration of the soul from this world to another. Now if you suppose that there is no consciousness, but a sleep like the sleep of him who is undisturbed even by dreams, death will be an unspeakable gain. For if a person were to select the night in which his sleep was undisturbed even by dreams, and were to compare with this the other days and nights of his life, and then were to tell us how many days and nights he had passed in the course of his life better and more pleasantly than this one, I think that any man, I will not say a private man, but even the great king will not find many such days or nights, when compared with the others. Now if death be of such a nature, I say that to die is gain; for eternity is then only a single night. But if death is the journey to another place, and there, as men say, all the dead abide, what good, O my friends and judges, can be greater than this? If indeed when the pilgrim arrives in the world below, he is delivered from the professors of justice in this world, and finds the true judges who are said to give judgment there, Minos and Rhadamanthus and Aeacus and Triptolemus, and other sons of God who were righteous in their own life, that pilgrimage will be worth making. What would not a man give if he might converse with Orpheus and Musaeus and Hesiod and Homer? Nay, if this be true, let me die again and again. I myself, too, shall have a wonderful interest in there meeting and conversing with Palamedes, and Ajax the son of Telamon, and any other ancient hero who has suffered death through an

unjust judgment; and there will be no small pleasure, as I think, in comparing my own sufferings with theirs. Above all, I shall then be able to continue my search into true and false knowledge; as in this world, so also in the next; and I shall find out who is wise, and who pretends to be wise, and is not. What would not a man give, O judges, to be able to examine the leader of the great Trojan expedition; or Odysseus or Sisyphus, or numberless others, men and women too! What infinite delight would there be in conversing with them and asking them questions! In another world they do not put a man to death for asking questions: assuredly not. For besides being happier than we are, they will be immortal, if what is said is true.

Wherefore, O judges, be of good cheer about death, and know of a certainty, that no evil can happen to a good man, either in life or after death. He and his are not neglected by the gods; nor has my own approaching end happened by mere chance. But I see clearly that the time had arrived when it was better for me to die and be released from trouble; wherefore the oracle gave no sign. For which reason, also, I am not angry with my condemners, or with my accusers; they have done me no harm, although they did not mean to do me any good; and for this I may gently blame them.

Still I have a favour to ask of them. When my sons are grown up, I would ask you, O my friends, to punish them; and I would have you trouble them, as I have troubled you, if they seem to care about riches, or anything, more than about virtue; or if they pretend to be something when they are really nothing, — then reprove them, as I have reproved you, for not caring about that for which they ought to care, and thinking that they are something when they are really nothing. And if you do this, both I and my sons will have received justice at your hands.

The hour of departure has arrived, and we go our ways — I to die, and you to live. Which is better God only knows.

Crito

ΚΡΙΤΩΝ

Socrates: Why have you come at this hour, Crito? it must be quite early?

Crito: Yes, certainly.

Socrates: What is the exact time?

Crito: The dawn is breaking.

Socrates: I wonder that the keeper of the prison would let you in.

Crito: He knows me, because I often come, Socrates; moreover, I have done him a kindness.

Socrates: And are you only just arrived?

Crito: No, I came some time ago.

Socrates: Then why did you sit and say nothing, instead of at once awakening me?

Crito: I should not have liked myself, Socrates, to be in such great trouble and unrest as you are — indeed I should not: I have been watching with amazement your peaceful slumbers; and for that reason I did not awake you, because I wished to minimize the pain. I have always thought you to be of a happy disposition; but never did I see anything like the easy, tranquil manner in which you bear this calamity.

Socrates: Why, Crito, when a man has reached my age he ought not to be repining at the approach of death.

Crito: And yet other old men find themselves in similar misfortunes, and age does not prevent them from repining.

Socrates: That is true. But you have not told me why you come at this early hour.

Crito: I come to bring you a message which is sad and painful; not, as I believe, to yourself, but to all of us who are your friends, and saddest of all to me.

Socrates: What? Has the ship come from Delos, on the arrival of which I am to die?

Crito: No, the ship has not actually arrived, but she will probably be here to-day, as persons who have come from Sunium tell me that they have left her there; and therefore to-morrow, Socrates, will be the last day of your life.

Socrates: Very well, Crito; if such is the will of God, I am willing; but my belief is that there will be a delay of a day.

Crito: Why do you think so?

Socrates: I will tell you. I am to die on the day after the arrival of the ship?

Crito: Yes; that is what the authorities say.

Socrates: But I do not think that the ship will be here until to-morrow; this I infer from a vision which I had last night, or rather only just now, when you fortunately allowed me to sleep.

Crito: And what was the nature of the vision?

Socrates: There appeared to me the likeness of a woman, fair and comely, clothed in bright raiment, who called to me and said: O Socrates,

'The third day hence to fertile Phthia shalt thou go.' 3

Crito: What a singular dream, Socrates!

Socrates: There can be no doubt about the meaning, Crito, I think.

Crito: Yes; the meaning is only too clear. But, oh! my beloved Socrates, let me entreat you once more to take my advice and escape. For if you die I shall not only lose a friend who can never be replaced, but there is another evil: people who do not know you and me will believe that I might have saved you if I had been willing to give money, but that I did not care. Now, can there be a worse disgrace than this — that I should be thought to value money more than the life of a friend? For the many will not be persuaded that I wanted you to escape, and that you refused.

Socrates: But why, my dear Crito, should we care about the opinion of the many? Good men, and they are the only persons who are worth considering, will think of these things truly as they occurred.

Crito: But you see, Socrates, that the opinion of the many must be regarded, for what is now happening shows that they can do the greatest evil to anyone who has lost their good opinion.

Socrates: I only wish it were so, Crito; and that the many could do the greatest evil; for then they would also be able to do the greatest good — and what a fine thing this would be! But in reality they can do neither; for they cannot make a man either wise or foolish; and whatever they do is the result of chance.

Crito: Well, I will not dispute with you; but please to tell me, Socrates, whether you are not acting out of regard to me and your other friends: are you not afraid that if you escape from prison we may get into trouble with the informers for having stolen you away, and lose either the whole or a great part of our property; or that even a worse evil may happen to us? Now, if you fear on our account, be at ease; for in order to save you, we ought surely to run this, or even a greater risk; be persuaded, then, and do as I say.

Socrates: Yes, Crito, that is one fear which you mention, but by no means the only one.

Crito: Fear not — there are persons who are willing to get you out of prison at no great cost; and as for the informers, they are far from being exorbitant in their demands — a little money will satisfy them. My means, which are certainly ample, are at your service, and if you have a scruple about spending all mine, here are strangers who will give you the use of theirs; and one of them, Simmias the Theban, has brought a large sum of money for this very purpose; and Cebes and many others are prepared to spend their money in helping you to escape. I say, therefore, do not hesitate on our account, and do not say, as you did in the court 4 that you will have a difficulty in knowing what to do with yourself anywhere else. For men will love you in other places to which you may go, and not in Athens only; there are friends of mine in Thessaly, if you like to go to them, who will value and protect you, and no Thessalian will give you any trouble. Nor can I think that you are at all justified, Socrates, in betraying your own life when you might be saved; in acting thus you are playing into the hands of your enemies, who are hurrying on your destruction. And further I should say that you are deserting your own children; for you might bring them up and educate them; instead of which you go away and leave them, and they will have to take their chance; and if they do not meet with the usual fate of orphans, there will be small thanks to you. No man should bring children into the world who is unwilling to persevere to the end in their nurture and education. But you appear to be choosing the easier part, not the better and manlier, which would have been more becoming in one who professes to care for virtue in all his actions, like yourself. And indeed, I am ashamed not only of you, but of us who are your friends, when I reflect that the whole business will be attributed entirely to our want of courage. The trial need never have come on, or might have been managed differently; and this last act, or crowning folly, will seem to have occurred through our negligence and cowardice, who might have saved you, if we had been good for anything; and you might have saved yourself, for

there was no difficulty at all. See now, Socrates, how sad and discreditable are the consequences, both to us and you. Make up your mind then, or rather have your mind already made up, for the time of deliberation is over, and there is only one thing to be done, which must be done this very night, and, if we delay at all, will be no longer practicable or possible; I beseech you therefore, Socrates, be persuaded by me, and do as I say.

Socrates: Dear Crito, your zeal is invaluable, if a right one; but if wrong, the greater the zeal the greater the danger; and therefore we ought to consider whether I shall or shall not do as you say. For I am and always have been one of those natures who must be guided by reason, whatever the reason may be which upon reflection appears to me to be the best; and now that this chance has befallen me, I cannot repudiate my own words: the principles which I have hitherto honoured and revered I still honour, and unless we can at once find other and better principles, I am certain not to agree with you; no, not even if the power of the multitude could inflict many more imprisonments, confiscations, deaths, frightening us like children with hobgoblin terrors. 5 What will be the fairest way of considering the question? Shall I return to your old argument about the opinions of men? — we were saying that some of them are to be regarded, and others not. Now were we right in maintaining this before I was condemned? And has the argument which was once good now proved to be talk for the sake of talking — mere childish nonsense? That is what I want to consider with your help, Crito: — whether, under my present circumstances, the argument appears to be in any way different or not; and is to be allowed by me or disallowed. That argument, which, as I believe, is maintained by many persons of authority, was to the effect, as I was saying, that the opinions of some men are to be regarded, and of other men not to be regarded. Now you, Crito, are not going to die to-morrow — at least, there is no human probability of this — and therefore you are disinterested and not liable to be deceived by the circumstances in which you

are placed. Tell me then, whether I am right in saying that some opinions, and the opinions of some men only, are to be valued, and that other opinions, and the opinions of other men, are not to be valued. I ask you whether I was right in maintaining this?

Crito: Certainly.

Socrates: The good are to be regarded, and not the bad?

Crito: Yes.

Socrates: And the opinions of the wise are good, and the opinions of the unwise are evil?

Crito: Certainly.

Socrates: And what was said about another matter? Is the pupil who devotes himself to the practice of gymnastics supposed to attend to the praise and blame and opinion of every man, or of one man only — his physician or trainer, whoever he may be?

Crito: Of one man only.

Socrates: And he ought to fear the censure and welcome the praise of that one only, and not of the many?

Crito: Clearly so.

Socrates: And he ought to act and train, and eat and drink in the way which seems good to his single master who has understanding, rather than according to the opinion of all other men put together?

Crito: True.

Socrates: And if he disobeys and disregards the opinion and approval of the one, and regards the opinion of the many who have no understanding, will he not suffer evil?

Crito: Certainly he will.

Socrates: And what will the evil be, whither tending and what affecting, in the disobedient person?

Crito: Clearly, affecting the body; that is what is destroyed by the evil.

Socrates: Very good; and is not this true, Crito, of other things which we need not separately enumerate? In questions of just and unjust, fair and foul, good and evil, which are the subjects of our present consultation, ought we to follow the opinion of the many and to fear them; or the opinion of the one man who has understanding? ought we not to fear and reverence him more than all the rest of the world: and if we desert him shall we not destroy and injure that principle in us which may be assumed to be improved by justice and deteriorated by injustice — there is such a principle?

Crito: Certainly there is, Socrates.

Socrates: Take a parallel instance: — if, acting under the advice of those who have no understanding, we destroy that which is improved by health and is deteriorated by disease, would life be worth having? And that which has been destroyed is — the body?

Crito: Yes.

Socrates: Could we live, having an evil and corrupted body?

Crito: Certainly not.

Socrates: And will life be worth having, if that higher part of man be destroyed, which is improved by justice and depraved by injustice? Do we suppose that principle, whatever it may be in man, which has to do with justice and injustice, to be inferior to the body?

Crito: Certainly not.

Socrates: More honourable than the body?

Crito: Far more.

Socrates: Then, my friend, we must not regard what the many say of us; but what he, the one man who has understanding of

just and unjust, will say, and what the truth will say. And therefore you begin in error when you advise that we should regard the opinion of the many about just and unjust, good and evil, honourable and dishonourable.— 'Well,' someone will say, 'but the many can kill us.'

Crito: Yes, Socrates; that will clearly be the answer.

Socrates: And it is true; but still I find with surprise that the old argument is unshaken as ever. And I should like to know whether I may say the same of another proposition — that not life, but a good life, is to be chiefly valued?

Crito: Yes, that also remains unshaken.

Socrates: And a good life is equivalent to a just and honourable one — that holds also?

Crito: Yes, it does.

Socrates: From these premises I proceed to argue the question whether I ought or ought not to try and escape without the consent of the Athenians: and if I am clearly right in escaping, then I will make the attempt; but if not, I will abstain. The other considerations which you mention, of money and loss of character and the duty of educating one's children, are, I fear, only the doctrines of the multitude, who would be as ready to restore people to life, if they were able, as they are to put them to death — and with as little reason. But now, since the argument has thus far prevailed, the only question which remains to be considered is whether we shall do rightly either in escaping or in suffering others to aid in our escape and paying them in money and thanks, or whether in reality we shall not do rightly; and if the latter, then death or any other calamity which may ensue on my remaining here must not be allowed to enter into the calculation.

Crito: I think that you are right, Socrates; how then shall we proceed?

Socrates: Let us consider the matter together, and do you either refute me if you can, and I will be convinced; or else cease, my dear friend, from repeating to me that I ought to escape against the wishes of the Athenians: for I highly value your attempts to persuade me to do so, but I may not be persuaded against my own better judgment. And now please to consider my first position, and try how you can best answer me.

Crito: I will.

Socrates: Are we to say that we are never intentionally to do wrong, or that in one way we ought and in another way we ought not to do wrong, or is doing wrong always evil and dishonourable, as I was just now saying, and as has been already acknowledged by us? Are all our former admissions which were made within a few days to be thrown away? And have we, at our age, been earnestly discoursing with one another all our life long only to discover that we are no better than children? Or, in spite of the opinion of the many, and in spite of consequences whether better or worse, shall we insist on the truth of what was then said, that injustice is always an evil and dishonour to him who acts unjustly? Shall we say so or not?

Crito: Yes.

Socrates: Then we must do no wrong?

Crito: Certainly not.

Socrates: Nor, when injured, injure in return, as the many imagine; for we must injure no one at all? 6

Crito: Clearly not.

Socrates: Again, Crito, may we do evil?

Crito: Surely not, Socrates.

Socrates: And what of doing evil in return for evil, which is the morality of the many — is that just or not?

Crito: Not just.

Socrates: For doing evil to another is the same as injuring him?

Crito: Very true.

Socrates: Then we ought not to retaliate or render evil for evil to anyone, whatever evil we may have suffered from him. But I would have you consider, Crito, whether you really mean what you are saying. For this opinion has never been held, and never will be held, by any considerable number of persons; and those who are agreed and those who are not agreed upon this point have no common ground, and can only despise one another when they see how widely they differ. Tell me, then, whether you agree with and assent to my first principle, that neither injury nor retaliation nor warding off evil by evil is ever right. And shall that be the premise of our argument? Or do you decline and dissent from this? For so I have ever thought, and continue to think; but, if you are of another opinion, let me hear what you have to say. If, however, you remain of the same mind as formerly, I will proceed to the next step.

Crito: You may proceed, for I have not changed my mind.

Socrates: Then I will go on to the next point, which may be put in the form of a question: — Ought a man to do what he admits to be right, or ought he to betray the right?

Crito: He ought to do what he thinks right.

Socrates: But if this is true, what is the application? In leaving the prison against the will of the Athenians, do I wrong any? or rather do I not wrong those whom I ought least to wrong? Do I not desert the principles which were acknowledged by us to be just — what do you say?

Crito: I cannot tell, Socrates; for I do not know.

Socrates: Then consider the matter in this way: — Imagine that I am about to play truant (you may call the proceeding by any name which you like), and the laws and the government come

and interrogate me: ‘Tell us, Socrates,’ they say; ‘what are you about? are you not going by an act of yours to overturn us — the laws, and the whole state, as far as in you lies? Do you imagine that a state can subsist and not be overthrown, in which the decisions of law have no power, but are set aside and trampled upon by individuals?’ What will be our answer, Crito, to these and the like words? Anyone, and especially a rhetorician, will have a good deal to say on behalf of the law which requires a sentence to be carried out. He will argue that this law should not be set aside; and shall we reply, ‘Yes; but the state has injured us and given an unjust sentence.’ Suppose I say that?

Crito: Very good, Socrates.

Socrates: ‘And was that our agreement with you?’ the law would answer; ‘or were you to abide by the sentence of the state?’ And if I were to express my astonishment at their words, the law would probably add: ‘Answer, Socrates, instead of opening your eyes — you are in the habit of asking and answering questions. Tell us, — What complaint have you to make against us which justifies you in attempting to destroy us and the state? In the first place did we not bring you into existence? Your father married your mother by our aid and begat you. Say whether you have any objection to urge against those of us who regulate marriage?’ None, I should reply. ‘Or against those of us who after birth regulate the nurture and education of children, in which you also were trained? Were not the laws, which have the charge of education, right in commanding your father to train you in music and gymnastic?’ Right, I should reply. ‘Well then, since you were brought into the world and nurtured and educated by us, can you deny in the first place that you are our child and slave, as your fathers were before you? And if this is true you are not on equal terms with us; nor can you think that you have a right to do to us what we are doing to you. Would you have any right to strike or revile or do any other evil to your father or your master, if you had one, because you have been

struck or reviled by him, or received some other evil at his hands? You would not say this. And because we think right to destroy you, do you think that you have any right to destroy us in return, and your country as far as in you lies? Will you, O professor of true virtue, pretend that you are justified in this? Has a philosopher like you failed to discover that our country is more to be valued and higher and holier far than mother or father or any ancestor, and more to be regarded in the eyes of the gods and of men of understanding? also to be soothed, and gently and reverently entreated when angry, even more than a father, and either to be persuaded, or if not persuaded, to be obeyed? And when we are punished by her, whether with imprisonment or stripes, the punishment is to be endured in silence; and if she lead us to wounds or death in battle, thither we follow as is right; neither may anyone yield or retreat or leave his rank, but whether in battle or in a court of law, or in any other place, he must do what his city and his country order him; or he must change their view of what is just: and if he may do no violence to his father or mother, much less may he do violence to his country.' What answer shall we make to this, Crito? Do the laws speak truly, or do they not?

Crito: I think that they do.

Socrates: Then the laws will say: 'Consider, Socrates, if we are speaking truly that in your present attempt you are going to do us an injury. For, having brought you into the world, and nurtured and educated you, and given you and every other citizen a share in every good which we had to give, we further proclaim to any Athenian by the liberty which we allow him, that if he does not like us when he has become of age and has seen the ways of the city, and made our acquaintance, he may go where he pleases and take his goods with him. None of us laws will forbid him or interfere with him. Anyone who does not like us and the city, and who wants to emigrate to a colony or to any other city, may go where he likes, retaining his property. But he

who has experience of the manner in which we order justice and administer the state, and still remains, has entered into an implied contract that he will do as we command him. And he who disobeys us is, as we maintain, thrice wrong; first, because in disobeying us he is disobeying his parents; secondly, because we are the authors of his education; thirdly, because he has made an agreement with us that he will duly obey our commands; and he neither obeys them nor convinces us that our commands are unjust; and we do not rudely impose them, but give him the alternative of obeying or convincing us; — that is what we offer, and he does neither. These are the sort of accusations to which, as we were saying, you, Socrates, will be exposed if you accomplish your intentions; you, above all other Athenians.'

Suppose now I ask, why I rather than anybody else? they will justly retort upon me that I above all other men have acknowledged the agreement. 'There is clear proof,' they will say, 'Socrates, that we and the city were not displeasing to you. Of all Athenians you have been the most constant resident in the city, which, as you never leave, you may be supposed to love. 7 For you never went out of the city either to see the games, except once when you went to the Isthmus, or to any other place unless when you were on military service; nor did you travel as other men do. Nor had you any curiosity to know other states or their laws: your affections did not go beyond us and our state; we were your especial favourites, and you acquiesced in our government of you; and here in this city you begat your children, which is a proof of your satisfaction. Moreover, you might in the course of the trial, if you had liked, have fixed the penalty at banishment; the state which refuses to let you go now would have let you go then. But you pretended that you preferred death to exile, 8 and that you were not unwilling to die. And now you have forgotten these fine sentiments, and pay no respect to us the laws, of whom you are the destroyer; and are doing what only a miserable slave would do, running away

and turning your back upon the compacts and agreements which you made as a citizen. And first of all answer this very question: Are we right in saying that you agreed to be governed according to us in deed, and not in word only? Is that true or not?' How shall we answer, Crito? Must we not assent?

Crito: We cannot help it, Socrates.

Socrates: Then will they not say: 'You, Socrates, are breaking the covenants and agreements which you made with us at your leisure, not in any haste or under any compulsion or deception, but after you have had seventy years to think of them, during which time you were at liberty to leave the city, if we were not to your mind, or if our covenants appeared to you to be unfair. You had your choice, and might have gone either to Lacedaemon or Crete, both which states are often praised by you for their good government, or to some other Hellenic or foreign state. Whereas you, above all other Athenians, seemed to be so fond of the state, or, in other words, of us, her laws (and who would care about a state which has no laws?), that you never stirred out of her; the halt, the blind, the maimed were not more stationary in her than you were. And now you run away and forsake your agreements. Not so, Socrates, if you will take our advice; do not make yourself ridiculous by escaping out of the city.

'For just consider, if you transgress and err in this sort of way, what good will you do either to yourself or to your friends? That your friends will be driven into exile and deprived of citizenship, or will lose their property, is tolerably certain; and you yourself, if you fly to one of the neighbouring cities, as, for example, Thebes or Megara, both of which are well governed, will come to them as an enemy, Socrates, and their government will be against you, and all patriotic citizens will cast an evil eye upon you as a subverter of the laws, and you will confirm in the minds of the judges the justice of their own condemnation of you. For he who is a corrupter of the laws is more than likely to be a

corrupter of the young and foolish portion of mankind. Will you then flee from well-ordered cities and virtuous men? and is existence worth having on these terms? Or will you go to them without shame, and talk to them, Socrates? And what will you say to them? What you say here about virtue and justice and institutions and laws being the best things among men? Would that be decent of you? Surely not. But if you go away from well-governed states to Crito's friends in Thessaly, where there is great disorder and licence, they will be charmed to hear the tale of your escape from prison, set off with ludicrous particulars of the manner in which you were wrapped in a goatskin or some other disguise, and metamorphosed as the manner is of runaways; but will there be no one to remind you that in your old age you were not ashamed to violate the most sacred laws from a miserable desire of a little more life? Perhaps not, if you keep them in a good temper; but if they are out of temper you will hear many degrading things; you will live, but how? — as the flatterer of all men, and the servant of all men; and doing what? — eating and drinking in Thessaly, having gone abroad in order that you may get a dinner. And where will be your fine sentiments about justice and virtue? Say that you wish to live for the sake of your children — you want to bring them up and educate them — will you take them into Thessaly and deprive them of Athenian citizenship? Is this the benefit which you will confer upon them? Or are you under the impression that they will be better cared for and educated here if you are still alive, although absent from them; for your friends will take care of them? Do you fancy that if you are an inhabitant of Thessaly they will take care of them, and if you are an inhabitant of the other world that they will not take care of them? Nay; but if they who call themselves friends are good for anything, they will — to be sure they will.

'Listen, then, Socrates, to us who have brought you up. Think not of life and children first, and of justice afterwards, but of justice first, that you may be justified before the princes of the

world below. For neither will you nor any that belong to you be happier or holier or juster in this life, or happier in another, if you do as Crito bids. Now you depart in innocence, a sufferer and not a doer of evil; a victim, not of the laws, but of men. But if you go forth, returning evil for evil, and injury for injury, breaking the covenants and agreements which you have made with us, and wronging those whom you ought least of all to wrong, that is to say, yourself, your friends, your country, and us, we shall be angry with you while you live, and our brethren, the laws in the world below, will receive you as an enemy; for they will know that you have done your best to destroy us. Listen, then, to us and not to Crito.'

This, dear Crito, is the voice which I seem to hear murmuring in my ears, like the sound of the flute in the ears of the mystic; that voice, I say, is humming in my ears, and prevents me from hearing any other. And I know that anything more which you may say will be vain. Yet speak, if you have anything to say.

Crito: I have nothing to say, Socrates.

Socrates: Leave me then, Crito, to fulfil the will of God, and to follow whither he leads.

Phaedo

ΦΑΙΔΩΝ

Place of the narration: Phlius.

Echecrates: Were you yourself, Phaedo, in the prison with Socrates on the day when he drank the poison?

Phaedo: Yes, Echecrates, I was.

Echecrates: I should so like to hear about his death. What did he say in his last hours? We were informed that he died by taking poison, but no one knew anything more; for no Phliasian ever goes to Athens now, and it is a long time since any stranger from Athens has found his way hither; so that we had no clear account.

Phaedo: Did you not hear of the proceedings at the trial?

Echecrates: Yes; some one told us about the trial, and we could not understand why, having been condemned, he should have been put to death, not at the time, but long afterwards. What was the reason of this?

Phaedo: An accident, Echecrates: the stern of the ship which the Athenians send to Delos happened to have been crowned on the day before he was tried.

Echecrates: What is this ship?

Phaedo: It is the ship in which, according to Athenian tradition, Theseus went to Crete when he took with him the fourteen youths, and was the saviour of them and of himself. And they were said to have vowed to Apollo at the time, that if they were saved they would send a yearly mission to Delos. Now this

custom still continues, and the whole period of the voyage to and from Delos, beginning when the priest of Apollo crowns the stern of the ship, is a holy season, during which the city is not allowed to be polluted by public executions; and when the vessel is detained by contrary winds, the time spent in going and returning is very considerable. As I was saying, the ship was crowned on the day before the trial, and this was the reason why Socrates lay in prison and was not put to death until long after he was condemned.

Echecrates: What was the manner of his death, Phaedo? What was said or done? And which of his friends were with him? Or did the authorities forbid them to be present — so that he had no friends near him when he died?

Phaedo: No; there were several of them with him.

Echecrates: If you have nothing to do, I wish that you would tell me what passed, as exactly as you can.

Phaedo: I have nothing at all to do, and will try to gratify your wish. To be reminded of Socrates is always the greatest delight to me, whether I speak myself or hear another speak of him.

Echecrates: You will have listeners who are of the same mind with you, and I hope that you will be as exact as you can.

Phaedo: I had a singular feeling at being in his company. For I could hardly believe that I was present at the death of a friend, and therefore I did not pity him, Echecrates; he died so fearlessly, and his words and bearing were so noble and gracious, that to me he appeared blessed. I thought that in going to the other world he could not be without a divine call, and that he would be happy, if any man ever was, when he arrived there, and therefore I did not pity him as might have seemed natural at such an hour. But I had not the pleasure which I usually feel in philosophical discourse (for philosophy was the theme of which we spoke). I was pleased, but in the pleasure there was also a strange admixture of pain; for I

reflected that he was soon to die, and this double feeling was shared by us all; we were laughing and weeping by turns, especially the excitable Apollodorus — you know the sort of man?

Echecrates: Yes.

Phaedo: He was quite beside himself; and I and all of us were greatly moved.

Echecrates: Who were present?

Phaedo: Of native Athenians there were, besides Apollodorus, Critobulus and his father Crito, Hermogenes, Epigenes, Aeschines, Antisthenes; likewise Ctesippus of the deme of Paeania, Menexenus, and some others; Plato, if I am not mistaken, was ill.

Echecrates: Were there any strangers?

Phaedo: Yes, there were; Simmias the Theban, and Cebes, and Phaedondes; Euclid and Terpison, who came from Megara.

Echecrates: And was Aristippus there, and Cleombrotus?

Phaedo: No, they were said to be in Aegina.

Echecrates: Any one else?

Phaedo: I think that these were nearly all.

Echecrates: Well, and what did you talk about?

Phaedo: I will begin at the beginning, and endeavour to repeat the entire conversation. On the previous days we had been in the habit of assembling early in the morning at the court in which the trial took place, and which is not far from the prison. There we used to wait talking with one another until the opening of the doors (for they were not opened very early); then we went in and generally passed the day with Socrates. On the last morning we assembled sooner than usual, having heard on the day before when we quitted the prison in the evening that the sacred ship had come from Delos, and so we arranged to

meet very early at the accustomed place. On our arrival the jailer who answered the door, instead of admitting us, came out and told us to stay until he called us. ‘For the Eleven,’ he said, ‘are now with Socrates; they are taking off his chains, and giving orders that he is to die to-day.’ He soon returned and said that we might come in. On entering we found Socrates just released from chains, and Xanthippe, whom you know, sitting by him, and holding his child in her arms. When she saw us she uttered a cry and said, as women will: ‘O Socrates, this is the last time that either you will converse with your friends, or they with you.’ Socrates turned to Crito and said: ‘Crito, let some one take her home.’ Some of Crito’s people accordingly led her away, crying out and beating herself. And when she was gone, Socrates, sitting up on the couch, bent and rubbed his leg, saying, as he was rubbing: How singular is the thing called pleasure, and how curiously related to pain, which might be thought to be the opposite of it; for they are never present to a man at the same instant, and yet he who pursues either is generally compelled to take the other; their bodies are two, but they are joined by a single head. And I cannot help thinking that if Aesop had remembered them, he would have made a fable about God trying to reconcile their strife, and how, when he could not, he fastened their heads together; and this is the reason why when one comes the other follows, as I know by my own experience now, when after the pain in my leg which was caused by the chain pleasure appears to succeed.

Upon this Cebes said: I am glad, Socrates, that you have mentioned the name of Aesop. For it reminds me of a question which has been asked by many, and was asked of me only the day before yesterday by Evenus the poet — he will be sure to ask it again, and therefore if you would like me to have an answer ready for him, you may as well tell me what I should say to him: — he wanted to know why you, who never before wrote a line of poetry, now that you are in prison are turning Aesop’s fables into verse, and also composing that hymn in honour of

Apollo.

Tell him, Cebes, he replied, what is the truth — that I had no idea of rivalling him or his poems; to do so, as I knew, would be no easy task. But I wanted to see whether I could purge away a scruple which I felt about the meaning of certain dreams. In the course of my life I have often had intimations in dreams 'that I should compose music.' The same dream came to me sometimes in one form, and sometimes in another, but always saying the same or nearly the same words: 'Cultivate and make music,' said the dream. And hitherto I had imagined that this was only intended to exhort and encourage me in the study of philosophy, which has been the pursuit of my life, and is the noblest and best of music. The dream was bidding me do what I was already doing, in the same way that the competitor in a race is bidden by the spectators to run when he is already running. But I was not certain of this, for the dream might have meant music in the popular sense of the word, and being under sentence of death, and the festival giving me a respite, I thought that it would be safer for me to satisfy the scruple, and, in obedience to the dream, to compose a few verses before I departed. And first I made a hymn in honour of the god of the festival, and then considering that a poet, if he is really to be a poet, should not only put together words, but should invent stories, and that I have no invention, I took some fables of Aesop, which I had ready at hand and which I knew — they were the first I came upon — and turned them into verse. Tell this to Evenus, Cebes, and bid him be of good cheer; say that I would have him come after me if he be a wise man, and not tarry; and that to-day I am likely to be going, for the Athenians say that I must.

Simmias said: What a message for such a man! having been a frequent companion of his I should say that, as far as I know him, he will never take your advice unless he is obliged.

Why, said Socrates, — is not Evenus a philosopher?

I think that he is, said Simmias.

Then he, or any man who has the spirit of philosophy, will be willing to die, but he will not take his own life, for that is held to be unlawful.

Here he changed his position, and put his legs off the couch on to the ground, and during the rest of the conversation he remained sitting.

Why do you say, enquired Cebes, that a man ought not to take his own life, but that the philosopher will be ready to follow the dying?

Socrates replied: And have you, Cebes and Simmias, who are the disciples of Philolaus, never heard him speak of this?

Yes, but his language was obscure, Socrates.

My words, too, are only an echo; but there is no reason why I should not repeat what I have heard: and indeed, as I am going to another place, it is very meet for me to be thinking and talking of the nature of the pilgrimage which I am about to make. What can I do better in the interval between this and the setting of the sun?

Then tell me, Socrates, why is suicide held to be unlawful? as I have certainly heard Philolaus, about whom you were just now asking, affirm when he was staying with us at Thebes: and there are others who say the same, although I have never understood what was meant by any of them.

Do not lose heart, replied Socrates, and the day may come when you will understand. I suppose that you wonder why, when other things which are evil may be good at certain times and to certain persons, death is to be the only exception, and why, when a man is better dead, he is not permitted to be his own benefactor, but must wait for the hand of another.

Very true, said Cebes, laughing gently and speaking in his native Boeotian.

I admit the appearance of inconsistency in what I am saying; but there may not be any real inconsistency after all. There is a doctrine whispered in secret that man is a prisoner who has no right to open the door and run away; this is a great mystery which I do not quite understand. Yet I too believe that the gods are our guardians, and that we are a possession of theirs. Do you not agree?

Yes, I quite agree, said Cebes.

And if one of your own possessions, an ox or an ass, for example, took the liberty of putting himself out of the way when you had given no intimation of your wish that he should die, would you not be angry with him, and would you not punish him if you could?

Certainly, replied Cebes.

Then, if we look at the matter thus, there may be reason in saying that a man should wait, and not take his own life until God summons him, as he is now summoning me.

Yes, Socrates, said Cebes, there seems to be truth in what you say. And yet how can you reconcile this seemingly true belief that God is our guardian and we his possessions, with the willingness to die which we were just now attributing to the philosopher? That the wisest of men should be willing to leave a service in which they are ruled by the gods who are the best of rulers, is not reasonable; for surely no wise man thinks that when set at liberty he can take better care of himself than the gods take of him. A fool may perhaps think so — he may argue that he had better run away from his master, not considering that his duty is to remain to the end, and not to run away from the good, and that there would be no sense in his running away. The wise man will want to be ever with him who is better than himself. Now this, Socrates, is the reverse of what was just now said; for upon this view the wise man should sorrow and the fool rejoice at passing out of life.

The earnestness of Cebes seemed to please Socrates. Here, said he, turning to us, is a man who is always inquiring, and is not so easily convinced by the first thing which he hears.

And certainly, added Simmias, the objection which he is now making does appear to me to have some force. For what can be the meaning of a truly wise man wanting to fly away and lightly leave a master who is better than himself? And I rather imagine that Cebes is referring to you; he thinks that you are too ready to leave us, and too ready to leave the gods whom you acknowledge to be our good masters.

Yes, replied Socrates; there is reason in what you say. And so you think that I ought to answer your indictment as if I were in a court?

We should like you to do so, said Simmias.

Then I must try to make a more successful defence before you than I did when before the judges. For I am quite ready to admit, Simmias and Cebes, that I ought to be grieved at death, if I were not persuaded in the first place that I am going to other gods who are wise and good (of which I am as certain as I can be of any such matters), and secondly (though I am not so sure of this last) to men departed, better than those whom I leave behind; and therefore I do not grieve as I might have done, for I have good hope that there is yet something remaining for the dead, and as has been said of old, some far better thing for the good than for the evil.

But do you mean to take away your thoughts with you, Socrates? said Simmias. Will you not impart them to us? — for they are a benefit in which we too are entitled to share. Moreover, if you succeed in convincing us, that will be an answer to the charge against yourself.

I will do my best, replied Socrates. But you must first let me hear what Crito wants; he has long been wishing to say something to me.

Only this, Socrates, replied Crito: — the attendant who is to give you the poison has been telling me, and he wants me to tell you, that you are not to talk much, talking, he says, increases heat, and this is apt to interfere with the action of the poison; persons who excite themselves are sometimes obliged to take a second or even a third dose.

Then, said Socrates, let him mind his business and be prepared to give the poison twice or even thrice if necessary; that is all.

I knew quite well what you would say, replied Crito; but I was obliged to satisfy him.

Never mind him, he said.

And now, O my judges, I desire to prove to you that the real philosopher has reason to be of good cheer when he is about to die, and that after death he may hope to obtain the greatest good in the other world. And how this may be, Simmias and Cebes, I will endeavour to explain. For I deem that the true votary of philosophy is likely to be misunderstood by other men; they do not perceive that he is always pursuing death and dying; and if this be so, and he has had the desire of death all his life long, why when his time comes should he repine at that which he has been always pursuing and desiring?

Simmias said laughingly: Though not in a laughing humour, you have made me laugh, Socrates; for I cannot help thinking that the many when they hear your words will say how truly you have described philosophers, and our people at home will likewise say that the life which philosophers desire is in reality death, and that they have found them out to be deserving of the death which they desire.

And they are right, Simmias, in thinking so, with the exception of the words ‘they have found them out’; for they have not found out either what is the nature of that death which the true philosopher deserves, or how he deserves or desires death. But enough of them: — let us discuss the matter among ourselves:

Do we believe that there is such a thing as death?

To be sure, replied Simmias.

Is it not the separation of soul and body? And to be dead is the completion of this; when the soul exists in herself, and is released from the body and the body is released from the soul, what is this but death?

Just so, he replied.

There is another question, which will probably throw light on our present inquiry if you and I can agree about it: — Ought the philosopher to care about the pleasures — if they are to be called pleasures — of eating and drinking?

Certainly not, answered Simmias.

And what about the pleasures of love — should he care for them?

By no means.

And will he think much of the other ways of indulging the body, for example, the acquisition of costly raiment, or sandals, or other adornments of the body? Instead of caring about them, does he not rather despise anything more than nature needs? What do you say?

I should say that the true philosopher would despise them.

Would you not say that he is entirely concerned with the soul and not with the body? He would like, as far as he can, to get away from the body and to turn to the soul.

Quite true.

In matters of this sort philosophers, above all other men, may be observed in every sort of way to dissever the soul from the communion of the body.

Very true.

Whereas, Simmias, the rest of the world are of opinion that to him who has no sense of pleasure and no part in bodily pleasure, life is not worth having; and that he who is indifferent about them is as good as dead.

That is also true.

What again shall we say of the actual acquirement of knowledge? — is the body, if invited to share in the enquiry, a hinderer or a helper? I mean to say, have sight and hearing any truth in them? Are they not, as the poets are always telling us, inaccurate witnesses? and yet, if even they are inaccurate and indistinct, what is to be said of the other senses? — for you will allow that they are the best of them?

Certainly, he replied.

Then when does the soul attain truth? — for in attempting to consider anything in company with the body she is obviously deceived.

True.

Then must not true existence be revealed to her in thought, if at all?

Yes.

And thought is best when the mind is gathered into herself and none of these things trouble her — neither sounds nor sights nor pain nor any pleasure, — when she takes leave of the body, and has as little as possible to do with it, when she has no bodily sense or desire, but is aspiring after true being?

Certainly.

And in this the philosopher dishonours the body; his soul runs away from his body and desires to be alone and by herself?

That is true.

Well, but there is another thing, Simmias: Is there or is there not an absolute justice?

Assuredly there is.

And an absolute beauty and absolute good?

Of course.

But did you ever behold any of them with your eyes?

Certainly not.

Or did you ever reach them with any other bodily sense? — and I speak not of these alone, but of absolute greatness, and health, and strength, and of the essence or true nature of everything. Has the reality of them ever been perceived by you through the bodily organs? or rather, is not the nearest approach to the knowledge of their several natures made by him who so orders his intellectual vision as to have the most exact conception of the essence of each thing which he considers?

Certainly.

And he attains to the purest knowledge of them who goes to each with the mind alone, not introducing or intruding in the act of thought sight or any other sense together with reason, but with the very light of the mind in her own clearness searches into the very truth of each; he who has got rid, as far as he can, of eyes and ears and, so to speak, of the whole body, these being in his opinion distracting elements which when they infect the soul hinder her from acquiring truth and knowledge — who, if not he, is likely to attain the knowledge of true being?

What you say has a wonderful truth in it, Socrates, replied Simmias.

And when real philosophers consider all these things, will they not be led to make a reflection which they will express in words something like the following? ‘Have we not found,’ they will say, ‘a path of thought which seems to bring us and our argument to the conclusion, that while we are in the body, and while the soul is infected with the evils of the body, our desire will not be satisfied? and our desire is of the truth. For the body is a source

of endless trouble to us by reason of the mere requirement of food; and is liable also to diseases which overtake and impede us in the search after true being: it fills us full of loves, and lusts, and fears, and fancies of all kinds, and endless foolery, and in fact, as men say, takes away from us the power of thinking at all. Whence come wars, and fightings, and factions? whence but from the body and the lusts of the body? wars are occasioned by the love of money, and money has to be acquired for the sake and in the service of the body; and by reason of all these impediments we have no time to give to philosophy; and, last and worst of all, even if we are at leisure and betake ourselves to some speculation, the body is always breaking in upon us, causing turmoil and confusion in our enquiries, and so amazing us that we are prevented from seeing the truth. It has been proved to us by experience that if we would have pure knowledge of anything we must be quit of the body — the soul in herself must behold things in themselves: and then we shall attain the wisdom which we desire, and of which we say that we are lovers, not while we live, but after death; for if while in company with the body, the soul cannot have pure knowledge, one of two things follows — either knowledge is not to be attained at all, or, if at all, after death. For then, and not till then, the soul will be parted from the body and exist in herself alone. In this present life, I reckon that we make the nearest approach to knowledge when we have the least possible intercourse or communion with the body, and are not surfeited with the bodily nature, but keep ourselves pure until the hour when God himself is pleased to release us. And thus having got rid of the foolishness of the body we shall be pure and hold converse with the pure, and know of ourselves the clear light everywhere, which is no other than the light of truth.’ For the impure are not permitted to approach the pure. These are the sort of words, Simmias, which the true lovers of knowledge cannot help saying to one another, and thinking. You would agree; would you not?

Undoubtedly, Socrates.

But, O my friend, if this is true, there is great reason to hope that, going whither I go, when I have come to the end of my journey, I shall attain that which has been the pursuit of my life. And therefore I go on my way rejoicing, and not I only, but every other man who believes that his mind has been made ready and that he is in a manner purified.

Certainly, replied Simmias.

And what is purification but the separation of the soul from the body, as I was saying before; the habit of the soul gathering and collecting herself into herself from all sides out of the body; the dwelling in her own place alone, as in another life, so also in this, as far as she can; — the release of the soul from the chains of the body?

Very true, he said.

And this separation and release of the soul from the body is termed death?

To be sure, he said.

And the true philosophers, and they only, are ever seeking to release the soul. Is not the separation and release of the soul from the body their especial study?

That is true.

And, as I was saying at first, there would be a ridiculous contradiction in men studying to live as nearly as they can in a state of death, and yet repining when it comes upon them.

Clearly.

And the true philosophers, Simmias, are always occupied in the practice of dying, wherefore also to them least of all men is death terrible. Look at the matter thus: — if they have been in every way the enemies of the body, and are wanting to be alone with the soul, when this desire of theirs is granted, how

inconsistent would they be if they trembled and repined, instead of rejoicing at their departure to that place where, when they arrive, they hope to gain that which in life they desired — and this was wisdom — and at the same time to be rid of the company of their enemy. Many a man has been willing to go to the world below animated by the hope of seeing there an earthly love, or wife, or son, and conversing with them. And will he who is a true lover of wisdom, and is strongly persuaded in like manner that only in the world below he can worthily enjoy her, still repine at death? Will he not depart with joy? Surely he will, O my friend, if he be a true philosopher. For he will have a firm conviction that there and there only, he can find wisdom in her purity. And if this be true, he would be very absurd, as I was saying, if he were afraid of death.

He would, indeed, replied Simmias.

And when you see a man who is repining at the approach of death, is not his reluctance a sufficient proof that he is not a lover of wisdom, but a lover of the body, and probably at the same time a lover of either money or power, or both?

Quite so, he replied.

And is not courage, Simmias, a quality which is specially characteristic of the philosopher?

Certainly.

There is temperance again, which even by the vulgar is supposed to consist in the control and regulation of the passions, and in the sense of superiority to them — is not temperance a virtue belonging to those only who despise the body, and who pass their lives in philosophy?

Most assuredly.

For the courage and temperance of other men, if you will consider them, are really a contradiction.

How so?

Well, he said, you are aware that death is regarded by men in general as a great evil.

Very true, he said.

And do not courageous men face death because they are afraid of yet greater evils?

That is quite true.

Then all but the philosophers are courageous only from fear, and because they are afraid; and yet that a man should be courageous from fear, and because he is a coward, is surely a strange thing.

Very true.

And are not the temperate exactly in the same case? They are temperate because they are intemperate — which might seem to be a contradiction, but is nevertheless the sort of thing which happens with this foolish temperance. For there are pleasures which they are afraid of losing; and in their desire to keep them, they abstain from some pleasures, because they are overcome by others; and although to be conquered by pleasure is called by men intemperance, to them the conquest of pleasure consists in being conquered by pleasure. And that is what I mean by saying that, in a sense, they are made temperate through intemperance.

Such appears to be the case.

Yet the exchange of one fear or pleasure or pain for another fear or pleasure or pain, and of the greater for the less, as if they were coins, is not the exchange of virtue. O my blessed Simmias, is there not one true coin for which all things ought to be exchanged? — and that is wisdom; and only in exchange for this, and in company with this, is anything truly bought or sold, whether courage or temperance or justice. And is not all true virtue the companion of wisdom, no matter what fears or pleasures or other similar goods or evils may or may not attend

her? But the virtue which is made up of these goods, when they are severed from wisdom and exchanged with one another, is a shadow of virtue only, nor is there any freedom or health or truth in her; but in the true exchange there is a purging away of all these things, and temperance, and justice, and courage, and wisdom herself are the purgation of them. The founders of the mysteries would appear to have had a real meaning, and were not talking nonsense when they intimated in a figure long ago that he who passes unsanctified and uninitiated into the world below will lie in a slough, but that he who arrives there after initiation and purification will dwell with the gods. For 'many,' as they say in the mysteries, 'are the thyrsus-bearers, but few are the mystics,' — meaning, as I interpret the words, 'the true philosophers.' In the number of whom, during my whole life, I have been seeking, according to my ability, to find a place; — whether I have sought in a right way or not, and whether I have succeeded or not, I shall truly know in a little while, if God will, when I myself arrive in the other world — such is my belief. And therefore I maintain that I am right, Simmias and Cebes, in not grieving or repining at parting from you and my masters in this world, for I believe that I shall equally find good masters and friends in another world. But most men do not believe this saying; if then I succeed in convincing you by my defence better than I did the Athenian judges, it will be well.

Cebes answered: I agree, Socrates, in the greater part of what you say. But in what concerns the soul, men are apt to be incredulous; they fear that when she has left the body her place may be nowhere, and that on the very day of death she may perish and come to an end — immediately on her release from the body, issuing forth dispersed like smoke or air and in her flight vanishing away into nothingness. If she could only be collected into herself after she has obtained release from the evils of which you are speaking, there would be good reason to hope, Socrates, that what you say is true. But surely it requires a great deal of argument and many proofs to show that when the

man is dead his soul yet exists, and has any force or intelligence.

True, Cebes, said Socrates; and shall I suggest that we converse a little of the probabilities of these things?

I am sure, said Cebes, that I should greatly like to know your opinion about them.

I reckon, said Socrates, that no one who heard me now, not even if he were one of my old enemies, the Comic poets, could accuse me of idle talking about matters in which I have no concern: — If you please, then, we will proceed with the inquiry.

Suppose we consider the question whether the souls of men after death are or are not in the world below. There comes into my mind an ancient doctrine which affirms that they go from hence into the other world, and returning hither, are born again from the dead. Now if it be true that the living come from the dead, then our souls must exist in the other world, for if not, how could they have been born again? And this would be conclusive, if there were any real evidence that the living are only born from the dead; but if this is not so, then other arguments will have to be adduced.

Very true, replied Cebes.

Then let us consider the whole question, not in relation to man only, but in relation to animals generally, and to plants, and to everything of which there is generation, and the proof will be easier. Are not all things which have opposites generated out of their opposites? I mean such things as good and evil, just and unjust — and there are innumerable other opposites which are generated out of opposites. And I want to show that in all opposites there is of necessity a similar alternation; I mean to say, for example, that anything which becomes greater must become greater after being less.

True.

And that which becomes less must have been once greater and then have become less.

Yes.

And the weaker is generated from the stronger, and the swifter from the slower.

Very true.

And the worse is from the better, and the more just is from the more unjust.

Of course.

And is this true of all opposites? and are we convinced that all of them are generated out of opposites?

Yes.

And in this universal opposition of all things, are there not also two intermediate processes which are ever going on, from one to the other opposite, and back again; where there is a greater and a less there is also an intermediate process of increase and diminution, and that which grows is said to wax, and that which decays to wane?

Yes, he said.

And there are many other processes, such as division and composition, cooling and heating, which equally involve a passage into and out of one another. And this necessarily holds of all opposites, even though not always expressed in words — they are really generated out of one another, and there is a passing or process from one to the other of them?

Very true, he replied.

Well, and is there not an opposite of life, as sleep is the opposite of waking?

True, he said.

And what is it?

Death, he answered.

And these, if they are opposites, are generated the one from the other, and have there their two intermediate processes also?

Of course.

Now, said Socrates, I will analyze one of the two pairs of opposites which I have mentioned to you, and also its intermediate processes, and you shall analyze the other to me. One of them I term sleep, the other waking. The state of sleep is opposed to the state of waking, and out of sleeping waking is generated, and out of waking, sleeping; and the process of generation is in the one case falling asleep, and in the other waking up. Do you agree?

I entirely agree.

Then, suppose that you analyze life and death to me in the same manner. Is not death opposed to life?

Yes.

And they are generated one from the other?

Yes.

What is generated from the living?

The dead.

And what from the dead?

I can only say in answer — the living.

Then the living, whether things or persons, Cebes, are generated from the dead?

That is clear, he replied.

Then the inference is that our souls exist in the world below?

That is true.

And one of the two processes or generations is visible — for surely the act of dying is visible?

Surely, he said.

What then is to be the result? Shall we exclude the opposite process? And shall we suppose nature to walk on one leg only? Must we not rather assign to death some corresponding process of generation?

Certainly, he replied.

And what is that process?

Return to life.

And return to life, if there be such a thing, is the birth of the dead into the world of the living?

Quite true.

Then here is a new way by which we arrive at the conclusion that the living come from the dead, just as the dead come from the living; and this, if true, affords a most certain proof that the souls of the dead exist in some place out of which they come again.

Yes, Socrates, he said; the conclusion seems to flow necessarily out of our previous admissions.

And that these admissions were not unfair, Cebes, he said, may be shown, I think, as follows: If generation were in a straight line only, and there were no compensation or circle in nature, no turn or return of elements into their opposites, then you know that all things would at last have the same form and pass into the same state, and there would be no more generation of them.

What do you mean? he said.

A simple thing enough, which I will illustrate by the case of sleep, he replied. You know that if there were no alternation of sleeping and waking, the tale of the sleeping Endymion would in the end have no meaning, because all other things would be asleep, too, and he would not be distinguishable from the rest. Or if there were composition only, and no division of substances,

then the chaos of Anaxagoras would come again. And in like manner, my dear Cebes, if all things which partook of life were to die, and after they were dead remained in the form of death, and did not come to life again, all would at last die, and nothing would be alive — what other result could there be? For if the living spring from any other things, and they too die, must not all things at last be swallowed up in death? (But compare Republic.)

There is no escape, Socrates, said Cebes; and to me your argument seems to be absolutely true.

Yes, he said, Cebes, it is and must be so, in my opinion; and we have not been deluded in making these admissions; but I am confident that there truly is such a thing as living again, and that the living spring from the dead, and that the souls of the dead are in existence, and that the good souls have a better portion than the evil.

Cebes added: Your favorite doctrine, Socrates, that knowledge is simply recollection, if true, also necessarily implies a previous time in which we have learned that which we now recollect. But this would be impossible unless our soul had been in some place before existing in the form of man; here then is another proof of the soul's immortality.

But tell me, Cebes, said Simmias, interposing, what arguments are urged in favour of this doctrine of recollection. I am not very sure at the moment that I remember them.

One excellent proof, said Cebes, is afforded by questions. If you put a question to a person in a right way, he will give a true answer of himself, but how could he do this unless there were knowledge and right reason already in him? And this is most clearly shown when he is taken to a diagram or to anything of that sort. (Compare Meno.)

But if, said Socrates, you are still incredulous, Simmias, I would ask you whether you may not agree with me when you look at

the matter in another way; — I mean, if you are still incredulous as to whether knowledge is recollection.

Incredulous, I am not, said Simmias; but I want to have this doctrine of recollection brought to my own recollection, and, from what Cebes has said, I am beginning to recollect and be convinced; but I should still like to hear what you were going to say.

This is what I would say, he replied: — We should agree, if I am not mistaken, that what a man recollects he must have known at some previous time.

Very true.

And what is the nature of this knowledge or recollection? I mean to ask, Whether a person who, having seen or heard or in any way perceived anything, knows not only that, but has a conception of something else which is the subject, not of the same but of some other kind of knowledge, may not be fairly said to recollect that of which he has the conception?

What do you mean?

I mean what I may illustrate by the following instance: — The knowledge of a lyre is not the same as the knowledge of a man?

True.

And yet what is the feeling of lovers when they recognize a lyre, or a garment, or anything else which the beloved has been in the habit of using? Do not they, from knowing the lyre, form in the mind’s eye an image of the youth to whom the lyre belongs? And this is recollection. In like manner any one who sees Simmias may remember Cebes; and there are endless examples of the same thing.

Endless, indeed, replied Simmias.

And recollection is most commonly a process of recovering that which has been already forgotten through time and inattention.

Very true, he said.

Well; and may you not also from seeing the picture of a horse or a lyre remember a man? and from the picture of Simmias, you may be led to remember Cebes?

True.

Or you may also be led to the recollection of Simmias himself?

Quite so.

And in all these cases, the recollection may be derived from things either like or unlike?

It may be.

And when the recollection is derived from like things, then another consideration is sure to arise, which is — whether the likeness in any degree falls short or not of that which is recollected?

Very true, he said.

And shall we proceed a step further, and affirm that there is such a thing as equality, not of one piece of wood or stone with another, but that, over and above this, there is absolute equality? Shall we say so?

Say so, yes, replied Simmias, and swear to it, with all the confidence in life.

And do we know the nature of this absolute essence?

To be sure, he said.

And whence did we obtain our knowledge? Did we not see equalities of material things, such as pieces of wood and stones, and gather from them the idea of an equality which is different from them? For you will acknowledge that there is a difference. Or look at the matter in another way: — Do not the same pieces of wood or stone appear at one time equal, and at another time unequal?

That is certain.

But are real equals ever unequal? or is the idea of equality the same as of inequality?

Impossible, Socrates.

Then these (so-called) equals are not the same with the idea of equality?

I should say, clearly not, Socrates.

And yet from these equals, although differing from the idea of equality, you conceived and attained that idea?

Very true, he said.

Which might be like, or might be unlike them?

Yes.

But that makes no difference; whenever from seeing one thing you conceived another, whether like or unlike, there must surely have been an act of recollection?

Very true.

But what would you say of equal portions of wood and stone, or other material equals? and what is the impression produced by them? Are they equals in the same sense in which absolute equality is equal? or do they fall short of this perfect equality in a measure?

Yes, he said, in a very great measure too.

And must we not allow, that when I or any one, looking at any object, observes that the thing which he sees aims at being some other thing, but falls short of, and cannot be, that other thing, but is inferior, he who makes this observation must have had a previous knowledge of that to which the other, although similar, was inferior?

Certainly.

And has not this been our own case in the matter of equals and of absolute equality?

Precisely.

Then we must have known equality previously to the time when we first saw the material equals, and reflected that all these apparent equals strive to attain absolute equality, but fall short of it?

Very true.

And we recognize also that this absolute equality has only been known, and can only be known, through the medium of sight or touch, or of some other of the senses, which are all alike in this respect?

Yes, Socrates, as far as the argument is concerned, one of them is the same as the other.

From the senses then is derived the knowledge that all sensible things aim at an absolute equality of which they fall short?

Yes.

Then before we began to see or hear or perceive in any way, we must have had a knowledge of absolute equality, or we could not have referred to that standard the equals which are derived from the senses? — for to that they all aspire, and of that they fall short.

No other inference can be drawn from the previous statements.

And did we not see and hear and have the use of our other senses as soon as we were born?

Certainly.

Then we must have acquired the knowledge of equality at some previous time?

Yes.

That is to say, before we were born, I suppose?

True.

And if we acquired this knowledge before we were born, and were born having the use of it, then we also knew before we were born and at the instant of birth not only the equal or the greater or the less, but all other ideas; for we are not speaking only of equality, but of beauty, goodness, justice, holiness, and of all which we stamp with the name of essence in the dialectical process, both when we ask and when we answer questions. Of all this we may certainly affirm that we acquired the knowledge before birth?

We may.

But if, after having acquired, we have not forgotten what in each case we acquired, then we must always have come into life having knowledge, and shall always continue to know as long as life lasts — for knowing is the acquiring and retaining knowledge and not forgetting. Is not forgetting, Simmias, just the losing of knowledge?

Quite true, Socrates.

But if the knowledge which we acquired before birth was lost by us at birth, and if afterwards by the use of the senses we recovered what we previously knew, will not the process which we call learning be a recovering of the knowledge which is natural to us, and may not this be rightly termed recollection?

Very true.

So much is clear — that when we perceive something, either by the help of sight, or hearing, or some other sense, from that perception we are able to obtain a notion of some other thing like or unlike which is associated with it but has been forgotten. Whence, as I was saying, one of two alternatives follows: — either we had this knowledge at birth, and continued to know through life; or, after birth, those who are said to learn only remember, and learning is simply recollection.

Yes, that is quite true, Socrates.

And which alternative, Simmias, do you prefer? Had we the knowledge at our birth, or did we recollect the things which we knew previously to our birth?

I cannot decide at the moment.

At any rate you can decide whether he who has knowledge will or will not be able to render an account of his knowledge? What do you say?

Certainly, he will.

But do you think that every man is able to give an account of these very matters about which we are speaking?

Would that they could, Socrates, but I rather fear that to-morrow, at this time, there will no longer be any one alive who is able to give an account of them such as ought to be given.

Then you are not of opinion, Simmias, that all men know these things?

Certainly not.

They are in process of recollecting that which they learned before?

Certainly.

But when did our souls acquire this knowledge? — not since we were born as men?

Certainly not.

And therefore, previously?

Yes.

Then, Simmias, our souls must also have existed without bodies before they were in the form of man, and must have had intelligence.

Unless indeed you suppose, Socrates, that these notions are given us at the very moment of birth; for this is the only time which remains.

Yes, my friend, but if so, when do we lose them? for they are not in us when we are born — that is admitted. Do we lose them at the moment of receiving them, or if not at what other time?

No, Socrates, I perceive that I was unconsciously talking nonsense.

Then may we not say, Simmias, that if, as we are always repeating, there is an absolute beauty, and goodness, and an absolute essence of all things; and if to this, which is now discovered to have existed in our former state, we refer all our sensations, and with this compare them, finding these ideas to be pre-existent and our inborn possession — then our souls must have had a prior existence, but if not, there would be no force in the argument? There is the same proof that these ideas must have existed before we were born, as that our souls existed before we were born; and if not the ideas, then not the souls.

Yes, Socrates; I am convinced that there is precisely the same necessity for the one as for the other; and the argument retreats successfully to the position that the existence of the soul before birth cannot be separated from the existence of the essence of which you speak. For there is nothing which to my mind is so patent as that beauty, goodness, and the other notions of which you were just now speaking, have a most real and absolute existence; and I am satisfied with the proof.

Well, but is Cebes equally satisfied? for I must convince him too.

I think, said Simmias, that Cebes is satisfied: although he is the most incredulous of mortals, yet I believe that he is sufficiently convinced of the existence of the soul before birth. But that after death the soul will continue to exist is not yet proven even to my own satisfaction. I cannot get rid of the feeling of the many to which Cebes was referring — the feeling that when the man dies

the soul will be dispersed, and that this may be the extinction of her. For admitting that she may have been born elsewhere, and framed out of other elements, and was in existence before entering the human body, why after having entered in and gone out again may she not herself be destroyed and come to an end?

Very true, Simmias, said Cebes; about half of what was required has been proven; to wit, that our souls existed before we were born: — that the soul will exist after death as well as before birth is the other half of which the proof is still wanting, and has to be supplied; when that is given the demonstration will be complete.

But that proof, Simmias and Cebes, has been already given, said Socrates, if you put the two arguments together — I mean this and the former one, in which we admitted that everything living is born of the dead. For if the soul exists before birth, and in coming to life and being born can be born only from death and dying, must she not after death continue to exist, since she has to be born again? — Surely the proof which you desire has been already furnished. Still I suspect that you and Simmias would be glad to probe the argument further. Like children, you are haunted with a fear that when the soul leaves the body, the wind may really blow her away and scatter her; especially if a man should happen to die in a great storm and not when the sky is calm.

Cebes answered with a smile: Then, Socrates, you must argue us out of our fears — and yet, strictly speaking, they are not our fears, but there is a child within us to whom death is a sort of hobgoblin; him too we must persuade not to be afraid when he is alone in the dark.

Socrates said: Let the voice of the charmer be applied daily until you have charmed away the fear.

And where shall we find a good charmer of our fears, Socrates, when you are gone?

Hellas, he replied, is a large place, Cebes, and has many good men, and there are barbarous races not a few: seek for him among them all, far and wide, sparing neither pains nor money; for there is no better way of spending your money. And you must seek among yourselves too; for you will not find others better able to make the search.

The search, replied Cebes, shall certainly be made. And now, if you please, let us return to the point of the argument at which we digressed.

By all means, replied Socrates; what else should I please?

Very good.

Must we not, said Socrates, ask ourselves what that is which, as we imagine, is liable to be scattered, and about which we fear? and what again is that about which we have no fear? And then we may proceed further to enquire whether that which suffers dispersion is or is not of the nature of soul — our hopes and fears as to our own souls will turn upon the answers to these questions.

Very true, he said.

Now the compound or composite may be supposed to be naturally capable, as of being compounded, so also of being dissolved; but that which is uncompounded, and that only, must be, if anything is, indissoluble.

Yes; I should imagine so, said Cebes.

And the uncompounded may be assumed to be the same and unchanging, whereas the compound is always changing and never the same.

I agree, he said.

Then now let us return to the previous discussion. Is that idea or essence, which in the dialectical process we define as essence or true existence — whether essence of equality, beauty, or anything else — are these essences, I say, liable at times to

some degree of change? or are they each of them always what they are, having the same simple self-existent and unchanging forms, not admitting of variation at all, or in any way, or at any time?

They must be always the same, Socrates, replied Cebes.

And what would you say of the many beautiful — whether men or horses or garments or any other things which are named by the same names and may be called equal or beautiful, — are they all unchanging and the same always, or quite the reverse? May they not rather be described as almost always changing and hardly ever the same, either with themselves or with one another?

The latter, replied Cebes; they are always in a state of change.

And these you can touch and see and perceive with the senses, but the unchanging things you can only perceive with the mind — they are invisible and are not seen?

That is very true, he said.

Well, then, added Socrates, let us suppose that there are two sorts of existences — one seen, the other unseen.

Let us suppose them.

The seen is the changing, and the unseen is the unchanging?

That may be also supposed.

And, further, is not one part of us body, another part soul?

To be sure.

And to which class is the body more alike and akin?

Clearly to the seen — no one can doubt that.

And is the soul seen or not seen?

Not by man, Socrates.

And what we mean by ‘seen’ and ‘not seen’ is that which is or is not visible to the eye of man?

Yes, to the eye of man.

And is the soul seen or not seen?

Not seen.

Unseen then?

Yes.

Then the soul is more like to the unseen, and the body to the seen?

That follows necessarily, Socrates.

And were we not saying long ago that the soul when using the body as an instrument of perception, that is to say, when using the sense of sight or hearing or some other sense (for the meaning of perceiving through the body is perceiving through the senses) — were we not saying that the soul too is then dragged by the body into the region of the changeable, and wanders and is confused; the world spins round her, and she is like a drunkard, when she touches change?

Very true.

But when returning into herself she reflects, then she passes into the other world, the region of purity, and eternity, and immortality, and unchangeableness, which are her kindred, and with them she ever lives, when she is by herself and is not let or hindered; then she ceases from her erring ways, and being in communion with the unchanging is unchanging. And this state of the soul is called wisdom?

That is well and truly said, Socrates, he replied.

And to which class is the soul more nearly alike and akin, as far as may be inferred from this argument, as well as from the preceding one?

I think, Socrates, that, in the opinion of every one who follows the argument, the soul will be infinitely more like the unchangeable — even the most stupid person will not deny that.

And the body is more like the changing?

Yes.

Yet once more consider the matter in another light: When the soul and the body are united, then nature orders the soul to rule and govern, and the body to obey and serve. Now which of these two functions is akin to the divine? and which to the mortal? Does not the divine appear to you to be that which naturally orders and rules, and the mortal to be that which is subject and servant?

True.

And which does the soul resemble?

The soul resembles the divine, and the body the mortal — there can be no doubt of that, Socrates.

Then reflect, Cebes: of all which has been said is not this the conclusion? — that the soul is in the very likeness of the divine, and immortal, and intellectual, and uniform, and indissoluble, and unchangeable; and that the body is in the very likeness of the human, and mortal, and unintellectual, and multiform, and dissoluble, and changeable. Can this, my dear Cebes, be denied?

It cannot.

But if it be true, then is not the body liable to speedy dissolution? and is not the soul almost or altogether indissoluble?

Certainly.

And do you further observe, that after a man is dead, the body, or visible part of him, which is lying in the visible world, and is called a corpse, and would naturally be dissolved and decomposed and dissipated, is not dissolved or decomposed at

once, but may remain for a for some time, nay even for a long time, if the constitution be sound at the time of death, and the season of the year favourable? For the body when shrunk and embalmed, as the manner is in Egypt, may remain almost entire through infinite ages; and even in decay, there are still some portions, such as the bones and ligaments, which are practically indestructible: — Do you agree?

Yes.

And is it likely that the soul, which is invisible, in passing to the place of the true Hades, which like her is invisible, and pure, and noble, and on her way to the good and wise God, whither, if God will, my soul is also soon to go, — that the soul, I repeat, if this be her nature and origin, will be blown away and destroyed immediately on quitting the body, as the many say? That can never be, my dear Simmias and Cebes. The truth rather is, that the soul which is pure at departing and draws after her no bodily taint, having never voluntarily during life had connection with the body, which she is ever avoiding, herself gathered into herself; — and making such abstraction her perpetual study — which means that she has been a true disciple of philosophy; and therefore has in fact been always engaged in the practice of dying? For is not philosophy the practice of death? —

Certainly —

That soul, I say, herself invisible, departs to the invisible world — to the divine and immortal and rational: thither arriving, she is secure of bliss and is released from the error and folly of men, their fears and wild passions and all other human ills, and for ever dwells, as they say of the initiated, in company with the gods (compare Apol.). Is not this true, Cebes?

Yes, said Cebes, beyond a doubt.

But the soul which has been polluted, and is impure at the time of her departure, and is the companion and servant of the body always, and is in love with and fascinated by the body and by the

desires and pleasures of the body, until she is led to believe that the truth only exists in a bodily form, which a man may touch and see and taste, and use for the purposes of his lusts, — the soul, I mean, accustomed to hate and fear and avoid the intellectual principle, which to the bodily eye is dark and invisible, and can be attained only by philosophy; — do you suppose that such a soul will depart pure and unalloyed?

Impossible, he replied.

She is held fast by the corporeal, which the continual association and constant care of the body have wrought into her nature.

Very true.

And this corporeal element, my friend, is heavy and weighty and earthy, and is that element of sight by which a soul is depressed and dragged down again into the visible world, because she is afraid of the invisible and of the world below — prowling about tombs and sepulchres, near which, as they tell us, are seen certain ghostly apparitions of souls which have not departed pure, but are cloyed with sight and therefore visible.

(Compare Milton, Comus: —

‘But when lust,

By unchaste looks, loose gestures, and foul talk,

But most by lewd and lavish act of sin,

Lets in defilement to the inward parts,

The soul grows clotted by contagion,

Imbodies, and imbrutes, till she quite lose,

The divine property of her first being.

Such are those thick and gloomy shadows damp

Oft seen in charnel vaults and sepulchres,

Lingering, and sitting by a new made grave,

As loath to leave the body that it lov’d,

And linked itself by carnal sensuality

To a degenerate and degraded state.’)

That is very likely, Socrates.

Yes, that is very likely, Cebes; and these must be the souls, not of the good, but of the evil, which are compelled to wander about such places in payment of the penalty of their former evil way of life; and they continue to wander until through the craving after the corporeal which never leaves them, they are imprisoned finally in another body. And they may be supposed to find their prisons in the same natures which they have had in their former lives.

What natures do you mean, Socrates?

What I mean is that men who have followed after gluttony, and wantonness, and drunkenness, and have had no thought of avoiding them, would pass into asses and animals of that sort. What do you think?

I think such an opinion to be exceedingly probable.

And those who have chosen the portion of injustice, and tyranny, and violence, will pass into wolves, or into hawks and kites; — whither else can we suppose them to go?

Yes, said Cebes; with such natures, beyond question.

And there is no difficulty, he said, in assigning to all of them places answering to their several natures and propensities?

There is not, he said.

Some are happier than others; and the happiest both in themselves and in the place to which they go are those who have practised the civil and social virtues which are called temperance and justice, and are acquired by habit and attention without philosophy and mind. (Compare Republic.)

Why are they the happiest?

Because they may be expected to pass into some gentle and social kind which is like their own, such as bees or wasps or ants, or back again into the form of man, and just and moderate men may be supposed to spring from them.

Very likely.

No one who has not studied philosophy and who is not entirely pure at the time of his departure is allowed to enter the company of the Gods, but the lover of knowledge only. And this is the reason, Simmias and Cebes, why the true votaries of philosophy abstain from all fleshly lusts, and hold out against them and refuse to give themselves up to them, — not because they fear poverty or the ruin of their families, like the lovers of money, and the world in general; nor like the lovers of power and honour, because they dread the dishonour or disgrace of evil deeds.

No, Socrates, that would not become them, said Cebes.

No indeed, he replied; and therefore they who have any care of their own souls, and do not merely live moulding and fashioning the body, say farewell to all this; they will not walk in the ways of the blind: and when philosophy offers them purification and release from evil, they feel that they ought not to resist her influence, and whither she leads they turn and follow.

What do you mean, Socrates?

I will tell you, he said. The lovers of knowledge are conscious that the soul was simply fastened and glued to the body — until philosophy received her, she could only view real existence through the bars of a prison, not in and through herself; she was wallowing in the mire of every sort of ignorance; and by reason of lust had become the principal accomplice in her own captivity. This was her original state; and then, as I was saying, and as the lovers of knowledge are well aware, philosophy, seeing how terrible was her confinement, of which she was to

herself the cause, received and gently comforted her and sought to release her, pointing out that the eye and the ear and the other senses are full of deception, and persuading her to retire from them, and abstain from all but the necessary use of them, and be gathered up and collected into herself, bidding her trust in herself and her own pure apprehension of pure existence, and to mistrust whatever comes to her through other channels and is subject to variation; for such things are visible and tangible, but what she sees in her own nature is intelligible and invisible. And the soul of the true philosopher thinks that she ought not to resist this deliverance, and therefore abstains from pleasures and desires and pains and fears, as far as she is able; reflecting that when a man has great joys or sorrows or fears or desires, he suffers from them, not merely the sort of evil which might be anticipated — as for example, the loss of his health or property which he has sacrificed to his lusts — but an evil greater far, which is the greatest and worst of all evils, and one of which he never thinks.

What is it, Socrates? said Cebes.

The evil is that when the feeling of pleasure or pain is most intense, every soul of man imagines the objects of this intense feeling to be then plainest and truest: but this is not so, they are really the things of sight.

Very true.

And is not this the state in which the soul is most enthralled by the body?

How so?

Why, because each pleasure and pain is a sort of nail which nails and rivets the soul to the body, until she becomes like the body, and believes that to be true which the body affirms to be true; and from agreeing with the body and having the same delights she is obliged to have the same habits and haunts, and is not likely ever to be pure at her departure to the world below, but is

always infected by the body; and so she sinks into another body and there germinates and grows, and has therefore no part in the communion of the divine and pure and simple.

Most true, Socrates, answered Cebes.

And this, Cebes, is the reason why the true lovers of knowledge are temperate and brave; and not for the reason which the world gives.

Certainly not.

Certainly not! The soul of a philosopher will reason in quite another way; she will not ask philosophy to release her in order that when released she may deliver herself up again to the thraldom of pleasures and pains, doing a work only to be undone again, weaving instead of unweaving her Penelope's web. But she will calm passion, and follow reason, and dwell in the contemplation of her, beholding the true and divine (which is not matter of opinion), and thence deriving nourishment. Thus she seeks to live while she lives, and after death she hopes to go to her own kindred and to that which is like her, and to be freed from human ills. Never fear, Simmias and Cebes, that a soul which has been thus nurtured and has had these pursuits, will at her departure from the body be scattered and blown away by the winds and be nowhere and nothing.

When Socrates had done speaking, for a considerable time there was silence; he himself appeared to be meditating, as most of us were, on what had been said; only Cebes and Simmias spoke a few words to one another. And Socrates observing them asked what they thought of the argument, and whether there was anything wanting? For, said he, there are many points still open to suspicion and attack, if any one were disposed to sift the matter thoroughly. Should you be considering some other matter I say no more, but if you are still in doubt do not hesitate to say exactly what you think, and let us have anything better which you can suggest; and if you think that I can be of any use,

allow me to help you.

Simmias said: I must confess, Socrates, that doubts did arise in our minds, and each of us was urging and inciting the other to put the question which we wanted to have answered and which neither of us liked to ask, fearing that our importunity might be troublesome under present at such a time.

Socrates replied with a smile: O Simmias, what are you saying? I am not very likely to persuade other men that I do not regard my present situation as a misfortune, if I cannot even persuade you that I am no worse off now than at any other time in my life. Will you not allow that I have as much of the spirit of prophecy in me as the swans? For they, when they perceive that they must die, having sung all their life long, do then sing more lustily than ever, rejoicing in the thought that they are about to go away to the god whose ministers they are. But men, because they are themselves afraid of death, slanderously affirm of the swans that they sing a lament at the last, not considering that no bird sings when cold, or hungry, or in pain, not even the nightingale, nor the swallow, nor yet the hoopoe; which are said indeed to tune a lay of sorrow, although I do not believe this to be true of them any more than of the swans. But because they are sacred to Apollo, they have the gift of prophecy, and anticipate the good things of another world, wherefore they sing and rejoice in that day more than they ever did before. And I too, believing myself to be the consecrated servant of the same God, and the fellow-servant of the swans, and thinking that I have received from my master gifts of prophecy which are not inferior to theirs, would not go out of life less merrily than the swans. Never mind then, if this be your only objection, but speak and ask anything which you like, while the eleven magistrates of Athens allow.

Very good, Socrates, said Simmias; then I will tell you my difficulty, and Cebes will tell you his. I feel myself, (and I daresay that you have the same feeling), how hard or rather

impossible is the attainment of any certainty about questions such as these in the present life. And yet I should deem him a coward who did not prove what is said about them to the uttermost, or whose heart failed him before he had examined them on every side. For he should persevere until he has achieved one of two things: either he should discover, or be taught the truth about them; or, if this be impossible, I would have him take the best and most irrefragable of human theories, and let this be the raft upon which he sails through life — not without risk, as I admit, if he cannot find some word of God which will more surely and safely carry him. And now, as you bid me, I will venture to question you, and then I shall not have to reproach myself hereafter with not having said at the time what I think. For when I consider the matter, either alone or with Cebes, the argument does certainly appear to me, Socrates, to be not sufficient.

Socrates answered: I dare say, my friend, that you may be right, but I should like to know in what respect the argument is insufficient.

In this respect, replied Simmias: — Suppose a person to use the same argument about harmony and the lyre — might he not say that harmony is a thing invisible, incorporeal, perfect, divine, existing in the lyre which is harmonized, but that the lyre and the strings are matter and material, composite, earthy, and akin to mortality? And when some one breaks the lyre, or cuts and rends the strings, then he who takes this view would argue as you do, and on the same analogy, that the harmony survives and has not perished — you cannot imagine, he would say, that the lyre without the strings, and the broken strings themselves which are mortal remain, and yet that the harmony, which is of heavenly and immortal nature and kindred, has perished — perished before the mortal. The harmony must still be somewhere, and the wood and strings will decay before anything can happen to that. The thought, Socrates, must have

occurred to your own mind that such is our conception of the soul; and that when the body is in a manner strung and held together by the elements of hot and cold, wet and dry, then the soul is the harmony or due proportionate admixture of them. But if so, whenever the strings of the body are unduly loosened or overstrained through disease or other injury, then the soul, though most divine, like other harmonies of music or of works of art, of course perishes at once, although the material remains of the body may last for a considerable time, until they are either decayed or burnt. And if any one maintains that the soul, being the harmony of the elements of the body, is first to perish in that which is called death, how shall we answer him?

Socrates looked fixedly at us as his manner was, and said with a smile: Simmias has reason on his side; and why does not some one of you who is better able than myself answer him? for there is force in his attack upon me. But perhaps, before we answer him, we had better also hear what Cebes has to say that we may gain time for reflection, and when they have both spoken, we may either assent to them, if there is truth in what they say, or if not, we will maintain our position. Please to tell me then, Cebes, he said, what was the difficulty which troubled you?

Cebes said: I will tell you. My feeling is that the argument is where it was, and open to the same objections which were urged before; for I am ready to admit that the existence of the soul before entering into the bodily form has been very ingeniously, and, if I may say so, quite sufficiently proven; but the existence of the soul after death is still, in my judgment, unproven. Now my objection is not the same as that of Simmias; for I am not disposed to deny that the soul is stronger and more lasting than the body, being of opinion that in all such respects the soul very far excels the body. Well, then, says the argument to me, why do you remain unconvinced? — When you see that the weaker continues in existence after the man is dead, will you not admit that the more lasting must also survive during the same period

of time? Now I will ask you to consider whether the objection, which, like Simmias, I will express in a figure, is of any weight. The analogy which I will adduce is that of an old weaver, who dies, and after his death somebody says: — He is not dead, he must be alive; — see, there is the coat which he himself wove and wore, and which remains whole and undecayed. And then he proceeds to ask of some one who is incredulous, whether a man lasts longer, or the coat which is in use and wear; and when he is answered that a man lasts far longer, thinks that he has thus certainly demonstrated the survival of the man, who is the more lasting, because the less lasting remains. But that, Simmias, as I would beg you to remark, is a mistake; any one can see that he who talks thus is talking nonsense. For the truth is, that the weaver aforesaid, having woven and worn many such coats, outlived several of them, and was outlived by the last; but a man is not therefore proved to be slighter and weaker than a coat. Now the relation of the body to the soul may be expressed in a similar figure; and any one may very fairly say in like manner that the soul is lasting, and the body weak and shortlived in comparison. He may argue in like manner that every soul wears out many bodies, especially if a man live many years. While he is alive the body deliquesces and decays, and the soul always weaves another garment and repairs the waste. But of course, whenever the soul perishes, she must have on her last garment, and this will survive her; and then at length, when the soul is dead, the body will show its native weakness, and quickly decompose and pass away. I would therefore rather not rely on the argument from superior strength to prove the continued existence of the soul after death. For granting even more than you affirm to be possible, and acknowledging not only that the soul existed before birth, but also that the souls of some exist, and will continue to exist after death, and will be born and die again and again, and that there is a natural strength in the soul which will hold out and be born many times — nevertheless, we may be still inclined to think that she will weary in the

labours of successive births, and may at last succumb in one of her deaths and utterly perish; and this death and dissolution of the body which brings destruction to the soul may be unknown to any of us, for no one of us can have had any experience of it: and if so, then I maintain that he who is confident about death has but a foolish confidence, unless he is able to prove that the soul is altogether immortal and imperishable. But if he cannot prove the soul's immortality, he who is about to die will always have reason to fear that when the body is disunited, the soul also may utterly perish.

All of us, as we afterwards remarked to one another, had an unpleasant feeling at hearing what they said. When we had been so firmly convinced before, now to have our faith shaken seemed to introduce a confusion and uncertainty, not only into the previous argument, but into any future one; either we were incapable of forming a judgment, or there were no grounds of belief.

Echecrates: There I feel with you — by heaven I do, Phaedo, and when you were speaking, I was beginning to ask myself the same question: What argument can I ever trust again? For what could be more convincing than the argument of Socrates, which has now fallen into discredit? That the soul is a harmony is a doctrine which has always had a wonderful attraction for me, and, when mentioned, came back to me at once, as my own original conviction. And now I must begin again and find another argument which will assure me that when the man is dead the soul survives. Tell me, I implore you, how did Socrates proceed? Did he appear to share the unpleasant feeling which you mention? or did he calmly meet the attack? And did he answer forcibly or feebly? Narrate what passed as exactly as you can.

Phaedo: Often, Echecrates, I have wondered at Socrates, but never more than on that occasion. That he should be able to answer was nothing, but what astonished me was, first, the

gentle and pleasant and approving manner in which he received the words of the young men, and then his quick sense of the wound which had been inflicted by the argument, and the readiness with which he healed it. He might be compared to a general rallying his defeated and broken army, urging them to accompany him and return to the field of argument.

Echecrates: What followed?

Phaedo: You shall hear, for I was close to him on his right hand, seated on a sort of stool, and he on a couch which was a good deal higher. He stroked my head, and pressed the hair upon my neck — he had a way of playing with my hair; and then he said: To-morrow, Phaedo, I suppose that these fair locks of yours will be severed.

Yes, Socrates, I suppose that they will, I replied.

Not so, if you will take my advice.

What shall I do with them? I said.

To-day, he replied, and not to-morrow, if this argument dies and we cannot bring it to life again, you and I will both shave our locks; and if I were you, and the argument got away from me, and I could not hold my ground against Simmias and Cebes, I would myself take an oath, like the Argives, not to wear hair any more until I had renewed the conflict and defeated them.

Yes, I said, but Heracles himself is said not to be a match for two.

Summon me then, he said, and I will be your Iolaus until the sun goes down.

I summon you rather, I rejoined, not as Heracles summoning Iolaus, but as Iolaus might summon Heracles.

That will do as well, he said. But first let us take care that we avoid a danger.

Of what nature? I said.

Lest we become misologists, he replied, no worse thing can happen to a man than this. For as there are misanthropists or haters of men, there are also misologists or haters of ideas, and both spring from the same cause, which is ignorance of the world. Misanthropy arises out of the too great confidence of inexperience; — you trust a man and think him altogether true and sound and faithful, and then in a little while he turns out to be false and knavish; and then another and another, and when this has happened several times to a man, especially when it happens among those whom he deems to be his own most trusted and familiar friends, and he has often quarreled with them, he at last hates all men, and believes that no one has any good in him at all. You must have observed this trait of character?

I have.

And is not the feeling discreditable? Is it not obvious that such an one having to deal with other men, was clearly without any experience of human nature; for experience would have taught him the true state of the case, that few are the good and few the evil, and that the great majority are in the interval between them.

What do you mean? I said.

I mean, he replied, as you might say of the very large and very small, that nothing is more uncommon than a very large or very small man; and this applies generally to all extremes, whether of great and small, or swift and slow, or fair and foul, or black and white: and whether the instances you select be men or dogs or anything else, few are the extremes, but many are in the mean between them. Did you never observe this?

Yes, I said, I have.

And do you not imagine, he said, that if there were a competition in evil, the worst would be found to be very few?

Yes, that is very likely, I said.

Yes, that is very likely, he replied; although in this respect arguments are unlike men — there I was led on by you to say more than I had intended; but the point of comparison was, that when a simple man who has no skill in dialectics believes an argument to be true which he afterwards imagines to be false, whether really false or not, and then another and another, he has no longer any faith left, and great disputers, as you know, come to think at last that they have grown to be the wisest of mankind; for they alone perceive the utter unsoundness and instability of all arguments, or indeed, of all things, which, like the currents in the Euripus, are going up and down in never-ceasing ebb and flow.

That is quite true, I said.

Yes, Phaedo, he replied, and how melancholy, if there be such a thing as truth or certainty or possibility of knowledge — that a man should have lighted upon some argument or other which at first seemed true and then turned out to be false, and instead of blaming himself and his own want of wit, because he is annoyed, should at last be too glad to transfer the blame from himself to arguments in general: and for ever afterwards should hate and revile them, and lose truth and the knowledge of realities.

Yes, indeed, I said; that is very melancholy.

Let us then, in the first place, he said, be careful of allowing or of admitting into our souls the notion that there is no health or soundness in any arguments at all. Rather say that we have not yet attained to soundness in ourselves, and that we must struggle manfully and do our best to gain health of mind — you and all other men having regard to the whole of your future life, and I myself in the prospect of death. For at this moment I am sensible that I have not the temper of a philosopher; like the vulgar, I am only a partisan. Now the partisan, when he is engaged in a dispute, cares nothing about the rights of the question, but is anxious only to convince his hearers of his own assertions. And the difference between him and me at the

present moment is merely this — that whereas he seeks to convince his hearers that what he says is true, I am rather seeking to convince myself; to convince my hearers is a secondary matter with me. And do but see how much I gain by the argument. For if what I say is true, then I do well to be persuaded of the truth, but if there be nothing after death, still, during the short time that remains, I shall not distress my friends with lamentations, and my ignorance will not last, but will die with me, and therefore no harm will be done. This is the state of mind, Simmias and Cebes, in which I approach the argument. And I would ask you to be thinking of the truth and not of Socrates: agree with me, if I seem to you to be speaking the truth; or if not, withstand me might and main, that I may not deceive you as well as myself in my enthusiasm, and like the bee, leave my sting in you before I die.

And now let us proceed, he said. And first of all let me be sure that I have in my mind what you were saying. Simmias, if I remember rightly, has fears and misgivings whether the soul, although a fairer and diviner thing than the body, being as she is in the form of harmony, may not perish first. On the other hand, Cebes appeared to grant that the soul was more lasting than the body, but he said that no one could know whether the soul, after having worn out many bodies, might not perish herself and leave her last body behind her; and that this is death, which is the destruction not of the body but of the soul, for in the body the work of destruction is ever going on. Are not these, Simmias and Cebes, the points which we have to consider?

They both agreed to this statement of them.

He proceeded: And did you deny the force of the whole preceding argument, or of a part only?

Of a part only, they replied.

And what did you think, he said, of that part of the argument in which we said that knowledge was recollection, and hence

inferred that the soul must have previously existed somewhere else before she was enclosed in the body?

Cebes said that he had been wonderfully impressed by that part of the argument, and that his conviction remained absolutely unshaken. Simmias agreed, and added that he himself could hardly imagine the possibility of his ever thinking differently.

But, rejoined Socrates, you will have to think differently, my Theban friend, if you still maintain that harmony is a compound, and that the soul is a harmony which is made out of strings set in the frame of the body; for you will surely never allow yourself to say that a harmony is prior to the elements which compose it.

Never, Socrates.

But do you not see that this is what you imply when you say that the soul existed before she took the form and body of man, and was made up of elements which as yet had no existence? For harmony is not like the soul, as you suppose; but first the lyre, and the strings, and the sounds exist in a state of discord, and then harmony is made last of all, and perishes first. And how can such a notion of the soul as this agree with the other?

Not at all, replied Simmias.

And yet, he said, there surely ought to be harmony in a discourse of which harmony is the theme.

There ought, replied Simmias.

But there is no harmony, he said, in the two propositions that knowledge is recollection, and that the soul is a harmony. Which of them will you retain?

I think, he replied, that I have a much stronger faith, Socrates, in the first of the two, which has been fully demonstrated to me, than in the latter, which has not been demonstrated at all, but rests only on probable and plausible grounds; and is therefore believed by the many. I know too well that these arguments from probabilities are impostors, and unless great caution is

observed in the use of them, they are apt to be deceptive — in geometry, and in other things too. But the doctrine of knowledge and recollection has been proven to me on trustworthy grounds; and the proof was that the soul must have existed before she came into the body, because to her belongs the essence of which the very name implies existence. Having, as I am convinced, rightly accepted this conclusion, and on sufficient grounds, I must, as I suppose, cease to argue or allow others to argue that the soul is a harmony.

Let me put the matter, Simmias, he said, in another point of view: Do you imagine that a harmony or any other composition can be in a state other than that of the elements, out of which it is compounded?

Certainly not.

Or do or suffer anything other than they do or suffer?

He agreed.

Then a harmony does not, properly speaking, lead the parts or elements which make up the harmony, but only follows them.

He assented.

For harmony cannot possibly have any motion, or sound, or other quality which is opposed to its parts.

That would be impossible, he replied.

And does not the nature of every harmony depend upon the manner in which the elements are harmonized?

I do not understand you, he said.

I mean to say that a harmony admits of degrees, and is more of a harmony, and more completely a harmony, when more truly and fully harmonized, to any extent which is possible; and less of a harmony, and less completely a harmony, when less truly and fully harmonized.

True.

But does the soul admit of degrees? or is one soul in the very least degree more or less, or more or less completely, a soul than another?

Not in the least.

Yet surely of two souls, one is said to have intelligence and virtue, and to be good, and the other to have folly and vice, and to be an evil soul: and this is said truly?

Yes, truly.

But what will those who maintain the soul to be a harmony say of this presence of virtue and vice in the soul? — will they say that here is another harmony, and another discord, and that the virtuous soul is harmonized, and herself being a harmony has another harmony within her, and that the vicious soul is inharmonical and has no harmony within her?

I cannot tell, replied Simmias; but I suppose that something of the sort would be asserted by those who say that the soul is a harmony.

And we have already admitted that no soul is more a soul than another; which is equivalent to admitting that harmony is not more or less harmony, or more or less completely a harmony?

Quite true.

And that which is not more or less a harmony is not more or less harmonized?

True.

And that which is not more or less harmonized cannot have more or less of harmony, but only an equal harmony?

Yes, an equal harmony.

Then one soul not being more or less absolutely a soul than another, is not more or less harmonized?

Exactly.

And therefore has neither more nor less of discord, nor yet of harmony?

She has not.

And having neither more nor less of harmony or of discord, one soul has no more vice or virtue than another, if vice be discord and virtue harmony?

Not at all more.

Or speaking more correctly, Simmias, the soul, if she is a harmony, will never have any vice; because a harmony, being absolutely a harmony, has no part in the inharmonical.

No.

And therefore a soul which is absolutely a soul has no vice?

How can she have, if the previous argument holds?

Then, if all souls are equally by their nature souls, all souls of all living creatures will be equally good?

I agree with you, Socrates, he said.

And can all this be true, think you? he said; for these are the consequences which seem to follow from the assumption that the soul is a harmony?

It cannot be true.

Once more, he said, what ruler is there of the elements of human nature other than the soul, and especially the wise soul? Do you know of any?

Indeed, I do not.

And is the soul in agreement with the affections of the body? or is she at variance with them? For example, when the body is hot and thirsty, does not the soul incline us against drinking? and when the body is hungry, against eating? And this is only one instance out of ten thousand of the opposition of the soul to the things of the body.

Very true.

But we have already acknowledged that the soul, being a harmony, can never utter a note at variance with the tensions and relaxations and vibrations and other affections of the strings out of which she is composed; she can only follow, she cannot lead them?

It must be so, he replied.

And yet do we not now discover the soul to be doing the exact opposite — leading the elements of which she is believed to be composed; almost always opposing and coercing them in all sorts of ways throughout life, sometimes more violently with the pains of medicine and gymnastic; then again more gently; now threatening, now admonishing the desires, passions, fears, as if talking to a thing which is not herself, as Homer in the Odyssee represents Odysseus doing in the words —

'He beat his breast, and thus reproached his heart: Endure, my heart; far worse hast thou endured!'

Do you think that Homer wrote this under the idea that the soul is a harmony capable of being led by the affections of the body, and not rather of a nature which should lead and master them — herself a far diviner thing than any harmony?

Yes, Socrates, I quite think so.

Then, my friend, we can never be right in saying that the soul is a harmony, for we should contradict the divine Homer, and contradict ourselves.

True, he said.

Thus much, said Socrates, of Harmonia, your Theban goddess, who has graciously yielded to us; but what shall I say, Cebes, to her husband Cadmus, and how shall I make peace with him?

I think that you will discover a way of propitiating him, said Cebes; I am sure that you have put the argument with Harmonia in a manner that I could never have expected. For when

Simmias was mentioning his difficulty, I quite imagined that no answer could be given to him, and therefore I was surprised at finding that his argument could not sustain the first onset of yours, and not impossibly the other, whom you call Cadmus, may share a similar fate.

Nay, my good friend, said Socrates, let us not boast, lest some evil eye should put to flight the word which I am about to speak. That, however, may be left in the hands of those above, while I draw near in Homeric fashion, and try the mettle of your words. Here lies the point: — You want to have it proven to you that the soul is imperishable and immortal, and the philosopher who is confident in death appears to you to have but a vain and foolish confidence, if he believes that he will fare better in the world below than one who has led another sort of life, unless he can prove this; and you say that the demonstration of the strength and divinity of the soul, and of her existence prior to our becoming men, does not necessarily imply her immortality. Admitting the soul to be longlived, and to have known and done much in a former state, still she is not on that account immortal; and her entrance into the human form may be a sort of disease which is the beginning of dissolution, and may at last, after the toils of life are over, end in that which is called death. And whether the soul enters into the body once only or many times, does not, as you say, make any difference in the fears of individuals. For any man, who is not devoid of sense, must fear, if he has no knowledge and can give no account of the soul’s immortality. This, or something like this, I suspect to be your notion, Cebes; and I designedly recur to it in order that nothing may escape us, and that you may, if you wish, add or subtract anything.

But, said Cebes, as far as I see at present, I have nothing to add or subtract: I mean what you say that I mean.

Socrates paused awhile, and seemed to be absorbed in reflection. At length he said: You are raising a tremendous

question, Cebes, involving the whole nature of generation and corruption, about which, if you like, I will give you my own experience; and if anything which I say is likely to avail towards the solution of your difficulty you may make use of it.

I should very much like, said Cebes, to hear what you have to say.

Then I will tell you, said Socrates. When I was young, Cebes, I had a prodigious desire to know that department of philosophy which is called the investigation of nature; to know the causes of things, and why a thing is and is created or destroyed appeared to me to be a lofty profession; and I was always agitating myself with the consideration of questions such as these: — Is the growth of animals the result of some decay which the hot and cold principle contracts, as some have said? Is the blood the element with which we think, or the air, or the fire? or perhaps nothing of the kind — but the brain may be the originating power of the perceptions of hearing and sight and smell, and memory and opinion may come from them, and science may be based on memory and opinion when they have attained fixity. And then I went on to examine the corruption of them, and then to the things of heaven and earth, and at last I concluded myself to be utterly and absolutely incapable of these enquiries, as I will satisfactorily prove to you. For I was fascinated by them to such a degree that my eyes grew blind to things which I had seemed to myself, and also to others, to know quite well; I forgot what I had before thought self-evident truths; e.g. such a fact as that the growth of man is the result of eating and drinking; for when by the digestion of food flesh is added to flesh and bone to bone, and whenever there is an aggregation of congenial elements, the lesser bulk becomes larger and the small man great. Was not that a reasonable notion?

Yes, said Cebes, I think so.

Well; but let me tell you something more. There was a time when I thought that I understood the meaning of greater and

less pretty well; and when I saw a great man standing by a little one, I fancied that one was taller than the other by a head; or one horse would appear to be greater than another horse: and still more clearly did I seem to perceive that ten is two more than eight, and that two cubits are more than one, because two is the double of one.

And what is now your notion of such matters? said Cebes.

I should be far enough from imagining, he replied, that I knew the cause of any of them, by heaven I should; for I cannot satisfy myself that, when one is added to one, the one to which the addition is made becomes two, or that the two units added together make two by reason of the addition. I cannot understand how, when separated from the other, each of them was one and not two, and now, when they are brought together, the mere juxtaposition or meeting of them should be the cause of their becoming two: neither can I understand how the division of one is the way to make two; for then a different cause would produce the same effect, — as in the former instance the addition and juxtaposition of one to one was the cause of two, in this the separation and subtraction of one from the other would be the cause. Nor am I any longer satisfied that I understand the reason why one or anything else is either generated or destroyed or is at all, but I have in my mind some confused notion of a new method, and can never admit the other.

Then I heard some one reading, as he said, from a book of Anaxagoras, that mind was the disposer and cause of all, and I was delighted at this notion, which appeared quite admirable, and I said to myself: If mind is the disposer, mind will dispose all for the best, and put each particular in the best place; and I argued that if any one desired to find out the cause of the generation or destruction or existence of anything, he must find out what state of being or doing or suffering was best for that thing, and therefore a man had only to consider the best for himself and others, and then he would also know the worse,

since the same science comprehended both. And I rejoiced to think that I had found in Anaxagoras a teacher of the causes of existence such as I desired, and I imagined that he would tell me first whether the earth is flat or round; and whichever was true, he would proceed to explain the cause and the necessity of this being so, and then he would teach me the nature of the best and show that this was best; and if he said that the earth was in the centre, he would further explain that this position was the best, and I should be satisfied with the explanation given, and not want any other sort of cause. And I thought that I would then go on and ask him about the sun and moon and stars, and that he would explain to me their comparative swiftness, and their returnings and various states, active and passive, and how all of them were for the best. For I could not imagine that when he spoke of mind as the disposer of them, he would give any other account of their being as they are, except that this was best; and I thought that when he had explained to me in detail the cause of each and the cause of all, he would go on to explain to me what was best for each and what was good for all. These hopes I would not have sold for a large sum of money, and I seized the books and read them as fast as I could in my eagerness to know the better and the worse.

What expectations I had formed, and how grievously was I disappointed! As I proceeded, I found my philosopher altogether forsaking mind or any other principle of order, but having recourse to air, and ether, and water, and other eccentricities. I might compare him to a person who began by maintaining generally that mind is the cause of the actions of Socrates, but who, when he endeavoured to explain the causes of my several actions in detail, went on to show that I sit here because my body is made up of bones and muscles; and the bones, as he would say, are hard and have joints which divide them, and the muscles are elastic, and they cover the bones, which have also a covering or environment of flesh and skin which contains them; and as the bones are lifted at their joints by the contraction or

relaxation of the muscles, I am able to bend my limbs, and this is why I am sitting here in a curved posture — that is what he would say, and he would have a similar explanation of my talking to you, which he would attribute to sound, and air, and hearing, and he would assign ten thousand other causes of the same sort, forgetting to mention the true cause, which is, that the Athenians have thought fit to condemn me, and accordingly I have thought it better and more right to remain here and undergo my sentence; for I am inclined to think that these muscles and bones of mine would have gone off long ago to Megara or Boeotia — by the dog they would, if they had been moved only by their own idea of what was best, and if I had not chosen the better and nobler part, instead of playing truant and running away, of enduring any punishment which the state inflicts. There is surely a strange confusion of causes and conditions in all this. It may be said, indeed, that without bones and muscles and the other parts of the body I cannot execute my purposes. But to say that I do as I do because of them, and that this is the way in which mind acts, and not from the choice of the best, is a very careless and idle mode of speaking. I wonder that they cannot distinguish the cause from the condition, which the many, feeling about in the dark, are always mistaking and misnaming. And thus one man makes a vortex all round and steadies the earth by the heaven; another gives the air as a support to the earth, which is a sort of broad trough. Any power which in arranging them as they are arranges them for the best never enters into their minds; and instead of finding any superior strength in it, they rather expect to discover another Atlas of the world who is stronger and more everlasting and more containing than the good; — of the obligatory and containing power of the good they think nothing; and yet this is the principle which I would fain learn if any one would teach me. But as I have failed either to discover myself, or to learn of any one else, the nature of the best, I will exhibit to you, if you like, what I have found to be the second best mode of enquiring into

the cause.

I should very much like to hear, he replied.

Socrates proceeded: — I thought that as I had failed in the contemplation of true existence, I ought to be careful that I did not lose the eye of my soul; as people may injure their bodily eye by observing and gazing on the sun during an eclipse, unless they take the precaution of only looking at the image reflected in the water, or in some similar medium. So in my own case, I was afraid that my soul might be blinded altogether if I looked at things with my eyes or tried to apprehend them by the help of the senses. And I thought that I had better have recourse to the world of mind and seek there the truth of existence. I dare say that the simile is not perfect — for I am very far from admitting that he who contemplates existences through the medium of thought, sees them only 'through a glass darkly,' any more than he who considers them in action and operation. However, this was the method which I adopted: I first assumed some principle which I judged to be the strongest, and then I affirmed as true whatever seemed to agree with this, whether relating to the cause or to anything else; and that which disagreed I regarded as untrue. But I should like to explain my meaning more clearly, as I do not think that you as yet understand me.

No indeed, replied Cebes, not very well.

There is nothing new, he said, in what I am about to tell you; but only what I have been always and everywhere repeating in the previous discussion and on other occasions: I want to show you the nature of that cause which has occupied my thoughts. I shall have to go back to those familiar words which are in the mouth of every one, and first of all assume that there is an absolute beauty and goodness and greatness, and the like; grant me this, and I hope to be able to show you the nature of the cause, and to prove the immortality of the soul.

Cebes said: You may proceed at once with the proof, for I grant you this.

Well, he said, then I should like to know whether you agree with me in the next step; for I cannot help thinking, if there be anything beautiful other than absolute beauty should there be such, that it can be beautiful only in as far as it partakes of absolute beauty — and I should say the same of everything. Do you agree in this notion of the cause?

Yes, he said, I agree.

He proceeded: I know nothing and can understand nothing of any other of those wise causes which are alleged; and if a person says to me that the bloom of colour, or form, or any such thing is a source of beauty, I leave all that, which is only confusing to me, and simply and singly, and perhaps foolishly, hold and am assured in my own mind that nothing makes a thing beautiful but the presence and participation of beauty in whatever way or manner obtained; for as to the manner I am uncertain, but I stoutly contend that by beauty all beautiful things become beautiful. This appears to me to be the safest answer which I can give, either to myself or to another, and to this I cling, in the persuasion that this principle will never be overthrown, and that to myself or to any one who asks the question, I may safely reply, That by beauty beautiful things become beautiful. Do you not agree with me?

I do.

And that by greatness only great things become great and greater greater, and by smallness the less become less?

True.

Then if a person were to remark that A is taller by a head than B, and B less by a head than A, you would refuse to admit his statement, and would stoutly contend that what you mean is only that the greater is greater by, and by reason of, greatness, and the less is less only by, and by reason of, smallness; and

thus you would avoid the danger of saying that the greater is greater and the less less by the measure of the head, which is the same in both, and would also avoid the monstrous absurdity of supposing that the greater man is greater by reason of the head, which is small. You would be afraid to draw such an inference, would you not?

Indeed, I should, said Cebes, laughing.

In like manner you would be afraid to say that ten exceeded eight by, and by reason of, two; but would say by, and by reason of, number; or you would say that two cubits exceed one cubit not by a half, but by magnitude?-for there is the same liability to error in all these cases.

Very true, he said.

Again, would you not be cautious of affirming that the addition of one to one, or the division of one, is the cause of two? And you would loudly asseverate that you know of no way in which anything comes into existence except by participation in its own proper essence, and consequently, as far as you know, the only cause of two is the participation in duality — this is the way to make two, and the participation in one is the way to make one. You would say: I will let alone puzzles of division and addition — wiser heads than mine may answer them; inexperienced as I am, and ready to start, as the proverb says, at my own shadow, I cannot afford to give up the sure ground of a principle. And if any one assails you there, you would not mind him, or answer him, until you had seen whether the consequences which follow agree with one another or not, and when you are further required to give an explanation of this principle, you would go on to assume a higher principle, and a higher, until you found a resting-place in the best of the higher; but you would not confuse the principle and the consequences in your reasoning, like the Eristics — at least if you wanted to discover real existence. Not that this confusion signifies to them, who never care or think about the matter at all, for they have the wit to be

well pleased with themselves however great may be the turmoil of their ideas. But you, if you are a philosopher, will certainly do as I say.

What you say is most true, said Simmias and Cebes, both speaking at once.

Echecrates: Yes, Phaedo; and I do not wonder at their assenting. Any one who has the least sense will acknowledge the wonderful clearness of Socrates' reasoning.

Phaedo: Certainly, Echecrates; and such was the feeling of the whole company at the time.

Echecrates: Yes, and equally of ourselves, who were not of the company, and are now listening to your recital. But what followed?

Phaedo: After all this had been admitted, and they had that ideas exist, and that other things participate in them and derive their names from them, Socrates, if I remember rightly, said: —

This is your way of speaking; and yet when you say that Simmias is greater than Socrates and less than Phaedo, do you not predicate of Simmias both greatness and smallness?

Yes, I do.

But still you allow that Simmias does not really exceed Socrates, as the words may seem to imply, because he is Simmias, but by reason of the size which he has; just as Simmias does not exceed Socrates because he is Simmias, any more than because Socrates is Socrates, but because he has smallness when compared with the greatness of Simmias?

True.

And if Phaedo exceeds him in size, this is not because Phaedo is Phaedo, but because Phaedo has greatness relatively to Simmias, who is comparatively smaller?

That is true.

And therefore Simmias is said to be great, and is also said to be small, because he is in a mean between them, exceeding the smallness of the one by his greatness, and allowing the greatness of the other to exceed his smallness. He added, laughing, I am speaking like a book, but I believe that what I am saying is true.

Simmias assented.

I speak as I do because I want you to agree with me in thinking, not only that absolute greatness will never be great and also small, but that greatness in us or in the concrete will never admit the small or admit of being exceeded: instead of this, one of two things will happen, either the greater will fly or retire before the opposite, which is the less, or at the approach of the less has already ceased to exist; but will not, if allowing or admitting of smallness, be changed by that; even as I, having received and admitted smallness when compared with Simmias, remain just as I was, and am the same small person. And as the idea of greatness cannot condescend ever to be or become small, in like manner the smallness in us cannot be or become great; nor can any other opposite which remains the same ever be or become its own opposite, but either passes away or perishes in the change.

That, replied Cebes, is quite my notion.

Hereupon one of the company, though I do not exactly remember which of them, said: In heaven’s name, is not this the direct contrary of what was admitted before — that out of the greater came the less and out of the less the greater, and that opposites were simply generated from opposites; but now this principle seems to be utterly denied.

Socrates inclined his head to the speaker and listened. I like your courage, he said, in reminding us of this. But you do not observe that there is a difference in the two cases. For then we were speaking of opposites in the concrete, and now of the

essential opposite which, as is affirmed, neither in us nor in nature can ever be at variance with itself: then, my friend, we were speaking of things in which opposites are inherent and which are called after them, but now about the opposites which are inherent in them and which give their name to them; and these essential opposites will never, as we maintain, admit of generation into or out of one another. At the same time, turning to Cebes, he said: Are you at all disconcerted, Cebes, at our friend's objection?

No, I do not feel so, said Cebes; and yet I cannot deny that I am often disturbed by objections.

Then we are agreed after all, said Socrates, that the opposite will never in any case be opposed to itself?

To that we are quite agreed, he replied.

Yet once more let me ask you to consider the question from another point of view, and see whether you agree with me: — There is a thing which you term heat, and another thing which you term cold?

Certainly.

But are they the same as fire and snow?

Most assuredly not.

Heat is a thing different from fire, and cold is not the same with snow?

Yes.

And yet you will surely admit, that when snow, as was before said, is under the influence of heat, they will not remain snow and heat; but at the advance of the heat, the snow will either retire or perish?

Very true, he replied.

And the fire too at the advance of the cold will either retire or perish; and when the fire is under the influence of the cold, they

will not remain as before, fire and cold.

That is true, he said.

And in some cases the name of the idea is not only attached to the idea in an eternal connection, but anything else which, not being the idea, exists only in the form of the idea, may also lay claim to it. I will try to make this clearer by an example: — The odd number is always called by the name of odd?

Very true.

But is this the only thing which is called odd? Are there not other things which have their own name, and yet are called odd, because, although not the same as oddness, they are never without oddness? — that is what I mean to ask — whether numbers such as the number three are not of the class of odd. And there are many other examples: would you not say, for example, that three may be called by its proper name, and also be called odd, which is not the same with three? and this may be said not only of three but also of five, and of every alternate number — each of them without being oddness is odd, and in the same way two and four, and the other series of alternate numbers, has every number even, without being evenness. Do you agree?

Of course.

Then now mark the point at which I am aiming: — not only do essential opposites exclude one another, but also concrete things, which, although not in themselves opposed, contain opposites; these, I say, likewise reject the idea which is opposed to that which is contained in them, and when it approaches them they either perish or withdraw. For example; Will not the number three endure annihilation or anything sooner than be converted into an even number, while remaining three?

Very true, said Cebes.

And yet, he said, the number two is certainly not opposed to the number three?

It is not.

Then not only do opposite ideas repel the advance of one another, but also there are other natures which repel the approach of opposites.

Very true, he said.

Suppose, he said, that we endeavour, if possible, to determine what these are.

By all means.

Are they not, Cebes, such as compel the things of which they have possession, not only to take their own form, but also the form of some opposite?

What do you mean?

I mean, as I was just now saying, and as I am sure that you know, that those things which are possessed by the number three must not only be three in number, but must also be odd.

Quite true.

And on this oddness, of which the number three has the impress, the opposite idea will never intrude?

No.

And this impress was given by the odd principle?

Yes.

And to the odd is opposed the even?

True.

Then the idea of the even number will never arrive at three?

No.

Then three has no part in the even?

None.

Then the triad or number three is uneven?

Very true.

To return then to my distinction of natures which are not opposed, and yet do not admit opposites — as, in the instance given, three, although not opposed to the even, does not any the more admit of the even, but always brings the opposite into play on the other side; or as two does not receive the odd, or fire the cold — from these examples (and there are many more of them) perhaps you may be able to arrive at the general conclusion, that not only opposites will not receive opposites, but also that nothing which brings the opposite will admit the opposite of that which it brings, in that to which it is brought. And here let me recapitulate — for there is no harm in repetition. The number five will not admit the nature of the even, any more than ten, which is the double of five, will admit the nature of the odd. The double has another opposite, and is not strictly opposed to the odd, but nevertheless rejects the odd altogether. Nor again will parts in the ratio 3:2, nor any fraction in which there is a half, nor again in which there is a third, admit the notion of the whole, although they are not opposed to the whole: You will agree?

Yes, he said, I entirely agree and go along with you in that.

And now, he said, let us begin again; and do not you answer my question in the words in which I ask it: let me have not the old safe answer of which I spoke at first, but another equally safe, of which the truth will be inferred by you from what has been just said. I mean that if any one asks you ‘what that is, of which the inherence makes the body hot,’ you will reply not heat (this is what I call the safe and stupid answer), but fire, a far superior answer, which we are now in a condition to give. Or if any one asks you ‘why a body is diseased,’ you will not say from disease, but from fever; and instead of saying that oddness is the cause

of odd numbers, you will say that the monad is the cause of them: and so of things in general, as I dare say that you will understand sufficiently without my adducing any further examples.

Yes, he said, I quite understand you.

Tell me, then, what is that of which the inherence will render the body alive?

The soul, he replied.

And is this always the case?

Yes, he said, of course.

Then whatever the soul possesses, to that she comes bearing life?

Yes, certainly.

And is there any opposite to life?

There is, he said.

And what is that?

Death.

Then the soul, as has been acknowledged, will never receive the opposite of what she brings.

Impossible, replied Cebes.

And now, he said, what did we just now call that principle which repels the even?

The odd.

And that principle which repels the musical, or the just?

The unmusical, he said, and the unjust.

And what do we call the principle which does not admit of death?

The immortal, he said.

And does the soul admit of death?

No.

Then the soul is immortal?

Yes, he said.

And may we say that this has been proven?

Yes, abundantly proven, Socrates, he replied.

Supposing that the odd were imperishable, must not three be imperishable?

Of course.

And if that which is cold were imperishable, when the warm principle came attacking the snow, must not the snow have retired whole and unmelted — for it could never have perished, nor could it have remained and admitted the heat?

True, he said.

Again, if the uncooling or warm principle were imperishable, the fire when assailed by cold would not have perished or have been extinguished, but would have gone away unaffected?

Certainly, he said.

And the same may be said of the immortal: if the immortal is also imperishable, the soul when attacked by death cannot perish; for the preceding argument shows that the soul will not admit of death, or ever be dead, any more than three or the odd number will admit of the even, or fire or the heat in the fire, of the cold. Yet a person may say: ‘But although the odd will not become even at the approach of the even, why may not the odd perish and the even take the place of the odd?’ Now to him who makes this objection, we cannot answer that the odd principle is imperishable; for this has not been acknowledged, but if this had been acknowledged, there would have been no difficulty in contending that at the approach of the even the odd principle and the number three took their departure; and the same

argument would have held good of fire and heat and any other thing.

Very true.

And the same may be said of the immortal: if the immortal is also imperishable, then the soul will be imperishable as well as immortal; but if not, some other proof of her imperishableness will have to be given.

No other proof is needed, he said; for if the immortal, being eternal, is liable to perish, then nothing is imperishable.

Yes, replied Socrates, and yet all men will agree that God, and the essential form of life, and the immortal in general, will never perish.

Yes, all men, he said — that is true; and what is more, gods, if I am not mistaken, as well as men.

Seeing then that the immortal is indestructible, must not the soul, if she is immortal, be also imperishable?

Most certainly.

Then when death attacks a man, the mortal portion of him may be supposed to die, but the immortal retires at the approach of death and is preserved safe and sound?

True.

Then, Cebes, beyond question, the soul is immortal and imperishable, and our souls will truly exist in another world!

I am convinced, Socrates, said Cebes, and have nothing more to object; but if my friend Simmias, or any one else, has any further objection to make, he had better speak out, and not keep silence, since I do not know to what other season he can defer the discussion, if there is anything which he wants to say or to have said.

But I have nothing more to say, replied Simmias; nor can I see any reason for doubt after what has been said. But I still feel

and cannot help feeling uncertain in my own mind, when I think of the greatness of the subject and the feebleness of man.

Yes, Simmias, replied Socrates, that is well said: and I may add that first principles, even if they appear certain, should be carefully considered; and when they are satisfactorily ascertained, then, with a sort of hesitating confidence in human reason, you may, I think, follow the course of the argument; and if that be plain and clear, there will be no need for any further enquiry.

Very true.

But then, O my friends, he said, if the soul is really immortal, what care should be taken of her, not only in respect of the portion of time which is called life, but of eternity! And the danger of neglecting her from this point of view does indeed appear to be awful. If death had only been the end of all, the wicked would have had a good bargain in dying, for they would have been happily quit not only of their body, but of their own evil together with their souls. But now, inasmuch as the soul is manifestly immortal, there is no release or salvation from evil except the attainment of the highest virtue and wisdom. For the soul when on her progress to the world below takes nothing with her but nurture and education; and these are said greatly to benefit or greatly to injure the departed, at the very beginning of his journey thither.

For after death, as they say, the genius of each individual, to whom he belonged in life, leads him to a certain place in which the dead are gathered together, whence after judgment has been given they pass into the world below, following the guide, who is appointed to conduct them from this world to the other: and when they have there received their due and remained their time, another guide brings them back again after many revolutions of ages. Now this way to the other world is not, as Aeschylus says in the Telephus, a single and straight path — if that were so no guide would be needed, for no one could miss it;

but there are many partings of the road, and windings, as I infer from the rites and sacrifices which are offered to the gods below in places where three ways meet on earth. The wise and orderly soul follows in the straight path and is conscious of her surroundings; but the soul which desires the body, and which, as I was relating before, has long been fluttering about the lifeless frame and the world of sight, is after many struggles and many sufferings hardly and with violence carried away by her attendant genius, and when she arrives at the place where the other souls are gathered, if she be impure and have done impure deeds, whether foul murders or other crimes which are the brothers of these, and the works of brothers in crime — from that soul every one flees and turns away; no one will be her companion, no one her guide, but alone she wanders in extremity of evil until certain times are fulfilled, and when they are fulfilled, she is borne irresistibly to her own fitting habitation; as every pure and just soul which has passed through life in the company and under the guidance of the gods has also her own proper home.

Now the earth has divers wonderful regions, and is indeed in nature and extent very unlike the notions of geographers, as I believe on the authority of one who shall be nameless.

What do you mean, Socrates? said Simmias. I have myself heard many descriptions of the earth, but I do not know, and I should very much like to know, in which of these you put faith.

And I, Simmias, replied Socrates, if I had the art of Glaucus would tell you; although I know not that the art of Glaucus could prove the truth of my tale, which I myself should never be able to prove, and even if I could, I fear, Simmias, that my life would come to an end before the argument was completed. I may describe to you, however, the form and regions of the earth according to my conception of them.

That, said Simmias, will be enough.

Well, then, he said, my conviction is, that the earth is a round body in the centre of the heavens, and therefore has no need of air or any similar force to be a support, but is kept there and hindered from falling or inclining any way by the equability of the surrounding heaven and by her own equipoise. For that which, being in equipoise, is in the centre of that which is equably diffused, will not incline any way in any degree, but will always remain in the same state and not deviate. And this is my first notion.

Which is surely a correct one, said Simmias.

Also I believe that the earth is very vast, and that we who dwell in the region extending from the river Phasis to the Pillars of Heracles inhabit a small portion only about the sea, like ants or frogs about a marsh, and that there are other inhabitants of many other like places; for everywhere on the face of the earth there are hollows of various forms and sizes, into which the water and the mist and the lower air collect. But the true earth is pure and situated in the pure heaven — there are the stars also; and it is the heaven which is commonly spoken of by us as the ether, and of which our own earth is the sediment gathering in the hollows beneath. But we who live in these hollows are deceived into the notion that we are dwelling above on the surface of the earth; which is just as if a creature who was at the bottom of the sea were to fancy that he was on the surface of the water, and that the sea was the heaven through which he saw the sun and the other stars, he having never come to the surface by reason of his feebleness and sluggishness, and having never lifted up his head and seen, nor ever heard from one who had seen, how much purer and fairer the world above is than his own. And such is exactly our case: for we are dwelling in a hollow of the earth, and fancy that we are on the surface; and the air we call the heaven, in which we imagine that the stars move. But the fact is, that owing to our feebleness and sluggishness we are prevented from reaching the surface of

the air: for if any man could arrive at the exterior limit, or take the wings of a bird and come to the top, then like a fish who puts his head out of the water and sees this world, he would see a world beyond; and, if the nature of man could sustain the sight, he would acknowledge that this other world was the place of the true heaven and the true light and the true earth. For our earth, and the stones, and the entire region which surrounds us, are spoilt and corroded, as in the sea all things are corroded by the brine, neither is there any noble or perfect growth, but caverns only, and sand, and an endless slough of mud: and even the shore is not to be compared to the fairer sights of this world. And still less is this our world to be compared with the other. Of that upper earth which is under the heaven, I can tell you a charming tale, Simmias, which is well worth hearing.

And we, Socrates, replied Simmias, shall be charmed to listen to you.

The tale, my friend, he said, is as follows: — In the first place, the earth, when looked at from above, is in appearance streaked like one of those balls which have leather coverings in twelve pieces, and is decked with various colours, of which the colours used by painters on earth are in a manner samples. But there the whole earth is made up of them, and they are brighter far and clearer than ours; there is a purple of wonderful lustre, also the radiance of gold, and the white which is in the earth is whiter than any chalk or snow. Of these and other colours the earth is made up, and they are more in number and fairer than the eye of man has ever seen; the very hollows (of which I was speaking) filled with air and water have a colour of their own, and are seen like light gleaming amid the diversity of the other colours, so that the whole presents a single and continuous appearance of variety in unity. And in this fair region everything that grows — trees, and flowers, and fruits — are in a like degree fairer than any here; and there are hills, having stones in them in a like degree smoother, and more transparent, and

fairer in colour than our highly-valued emeralds and sardonyxes and jaspers, and other gems, which are but minute fragments of them: for there all the stones are like our precious stones, and fairer still (compare Republic). The reason is, that they are pure, and not, like our precious stones, infected or corroded by the corrupt briny elements which coagulate among us, and which breed foulness and disease both in earth and stones, as well as in animals and plants. They are the jewels of the upper earth, which also shines with gold and silver and the like, and they are set in the light of day and are large and abundant and in all places, making the earth a sight to gladden the beholder's eye. And there are animals and men, some in a middle region, others dwelling about the air as we dwell about the sea; others in islands which the air flows round, near the continent: and in a word, the air is used by them as the water and the sea are by us, and the ether is to them what the air is to us. Moreover, the temperament of their seasons is such that they have no disease, and live much longer than we do, and have sight and hearing and smell, and all the other senses, in far greater perfection, in the same proportion that air is purer than water or the ether than air. Also they have temples and sacred places in which the gods really dwell, and they hear their voices and receive their answers, and are conscious of them and hold converse with them, and they see the sun, moon, and stars as they truly are, and their other blessedness is of a piece with this.

Such is the nature of the whole earth, and of the things which are around the earth; and there are divers regions in the hollows on the face of the globe everywhere, some of them deeper and more extended than that which we inhabit, others deeper but with a narrower opening than ours, and some are shallower and also wider. All have numerous perforations, and there are passages broad and narrow in the interior of the earth, connecting them with one another; and there flows out of and into them, as into basins, a vast tide of water, and huge subterranean streams of perennial rivers, and springs hot and

cold, and a great fire, and great rivers of fire, and streams of liquid mud, thin or thick (like the rivers of mud in Sicily, and the lava streams which follow them), and the regions about which they happen to flow are filled up with them. And there is a swinging or see-saw in the interior of the earth which moves all this up and down, and is due to the following cause: — There is a chasm which is the vastest of them all, and pierces right through the whole earth; this is that chasm which Homer describes in the words, —

'Far off, where is the inmost depth beneath the earth;'

and which he in other places, and many other poets, have called Tartarus. And the see-saw is caused by the streams flowing into and out of this chasm, and they each have the nature of the soil through which they flow. And the reason why the streams are always flowing in and out, is that the watery element has no bed or bottom, but is swinging and surging up and down, and the surrounding wind and air do the same; they follow the water up and down, hither and thither, over the earth — just as in the act of respiration the air is always in process of inhalation and exhalation; — and the wind swinging with the water in and out produces fearful and irresistible blasts: when the waters retire with a rush into the lower parts of the earth, as they are called, they flow through the earth in those regions, and fill them up like water raised by a pump, and then when they leave those regions and rush back hither, they again fill the hollows here, and when these are filled, flow through subterranean channels and find their way to their several places, forming seas, and lakes, and rivers, and springs. Thence they again enter the earth, some of them making a long circuit into many lands, others going to a few places and not so distant; and again fall into Tartarus, some at a point a good deal lower than that at which they rose, and others not much lower, but all in some degree lower than the point from which they came. And some burst forth again on the opposite side, and some on the same

side, and some wind round the earth with one or many folds like the coils of a serpent, and descend as far as they can, but always return and fall into the chasm. The rivers flowing in either direction can descend only to the centre and no further, for opposite to the rivers is a precipice.

Now these rivers are many, and mighty, and diverse, and there are four principal ones, of which the greatest and outermost is that called Oceanus, which flows round the earth in a circle; and in the opposite direction flows Acheron, which passes under the earth through desert places into the Acherusian lake: this is the lake to the shores of which the souls of the many go when they are dead, and after waiting an appointed time, which is to some a longer and to some a shorter time, they are sent back to be born again as animals. The third river passes out between the two, and near the place of outlet pours into a vast region of fire, and forms a lake larger than the Mediterranean Sea, boiling with water and mud; and proceeding muddy and turbid, and winding about the earth, comes, among other places, to the extremities of the Acherusian Lake, but mingles not with the waters of the lake, and after making many coils about the earth plunges into Tartarus at a deeper level. This is that Pyriphlegethon, as the stream is called, which throws up jets of fire in different parts of the earth. The fourth river goes out on the opposite side, and falls first of all into a wild and savage region, which is all of a dark-blue colour, like lapis lazuli; and this is that river which is called the Stygian river, and falls into and forms the Lake Styx, and after falling into the lake and receiving strange powers in the waters, passes under the earth, winding round in the opposite direction, and comes near the Acherusian lake from the opposite side to Pyriphlegethon. And the water of this river too mingles with no other, but flows round in a circle and falls into Tartarus over against Pyriphlegethon; and the name of the river, as the poets say, is Cocytus.

Such is the nature of the other world; and when the dead arrive at the place to which the genius of each severally guides them, first of all, they have sentence passed upon them, as they have lived well and piously or not. And those who appear to have lived neither well nor ill, go to the river Acheron, and embarking in any vessels which they may find, are carried in them to the lake, and there they dwell and are purified of their evil deeds, and having suffered the penalty of the wrongs which they have done to others, they are absolved, and receive the rewards of their good deeds, each of them according to his deserts. But those who appear to be incurable by reason of the greatness of their crimes — who have committed many and terrible deeds of sacrilege, murders foul and violent, or the like — such are hurled into Tartarus which is their suitable destiny, and they never come out. Those again who have committed crimes, which, although great, are not irremediable — who in a moment of anger, for example, have done violence to a father or a mother, and have repented for the remainder of their lives, or, who have taken the life of another under the like extenuating circumstances — these are plunged into Tartarus, the pains of which they are compelled to undergo for a year, but at the end of the year the wave casts them forth — mere homicides by way of Cocytus, parricides and matricides by Pyriphlegethon — and they are borne to the Acherusian lake, and there they lift up their voices and call upon the victims whom they have slain or wronged, to have pity on them, and to be kind to them, and let them come out into the lake. And if they prevail, then they come forth and cease from their troubles; but if not, they are carried back again into Tartarus and from thence into the rivers unceasingly, until they obtain mercy from those whom they have wronged: for that is the sentence inflicted upon them by their judges. Those too who have been pre-eminent for holiness of life are released from this earthly prison, and go to their pure home which is above, and dwell in the purer earth; and of these, such as have duly purified themselves with philosophy live henceforth

altogether without the body, in mansions fairer still which may not be described, and of which the time would fail me to tell.

Wherefore, Simmias, seeing all these things, what ought not we to do that we may obtain virtue and wisdom in this life? Fair is the prize, and the hope great!

A man of sense ought not to say, nor will I be very confident, that the description which I have given of the soul and her mansions is exactly true. But I do say that, inasmuch as the soul is shown to be immortal, he may venture to think, not improperly or unworthily, that something of the kind is true. The venture is a glorious one, and he ought to comfort himself with words like these, which is the reason why I lengthen out the tale. Wherefore, I say, let a man be of good cheer about his soul, who having cast away the pleasures and ornaments of the body as alien to him and working harm rather than good, has sought after the pleasures of knowledge; and has arrayed the soul, not in some foreign attire, but in her own proper jewels, temperance, and justice, and courage, and nobility, and truth — in these adorned she is ready to go on her journey to the world below, when her hour comes. You, Simmias and Cebes, and all other men, will depart at some time or other. Me already, as the tragic poet would say, the voice of fate calls. Soon I must drink the poison; and I think that I had better repair to the bath first, in order that the women may not have the trouble of washing my body after I am dead.

When he had done speaking, Crito said: And have you any commands for us, Socrates — anything to say about your children, or any other matter in which we can serve you?

Nothing particular, Crito, he replied: only, as I have always told you, take care of yourselves; that is a service which you may be ever rendering to me and mine and to all of us, whether you promise to do so or not. But if you have no thought for yourselves, and care not to walk according to the rule which I have prescribed for you, not now for the first time, however

much you may profess or promise at the moment, it will be of no avail.

We will do our best, said Crito: And in what way shall we bury you?

In any way that you like; but you must get hold of me, and take care that I do not run away from you. Then he turned to us, and added with a smile: — I cannot make Crito believe that I am the same Socrates who have been talking and conducting the argument; he fancies that I am the other Socrates whom he will soon see, a dead body — and he asks, How shall he bury me? And though I have spoken many words in the endeavour to show that when I have drunk the poison I shall leave you and go to the joys of the blessed, — these words of mine, with which I was comforting you and myself, have had, as I perceive, no effect upon Crito. And therefore I want you to be surety for me to him now, as at the trial he was surety to the judges for me: but let the promise be of another sort; for he was surety for me to the judges that I would remain, and you must be my surety to him that I shall not remain, but go away and depart; and then he will suffer less at my death, and not be grieved when he sees my body being burned or buried. I would not have him sorrow at my hard lot, or say at the burial, Thus we lay out Socrates, or, Thus we follow him to the grave or bury him; for false words are not only evil in themselves, but they infect the soul with evil. Be of good cheer, then, my dear Crito, and say that you are burying my body only, and do with that whatever is usual, and what you think best.

When he had spoken these words, he arose and went into a chamber to bathe; Crito followed him and told us to wait. So we remained behind, talking and thinking of the subject of discourse, and also of the greatness of our sorrow; he was like a father of whom we were being bereaved, and we were about to pass the rest of our lives as orphans. When he had taken the bath his children were brought to him — (he had two young sons

and an elder one); and the women of his family also came, and he talked to them and gave them a few directions in the presence of Crito; then he dismissed them and returned to us.

Now the hour of sunset was near, for a good deal of time had passed while he was within. When he came out, he sat down with us again after his bath, but not much was said. Soon the jailer, who was the servant of the Eleven, entered and stood by him, saying: — To you, Socrates, whom I know to be the noblest and gentlest and best of all who ever came to this place, I will not impute the angry feelings of other men, who rage and swear at me, when, in obedience to the authorities, I bid them drink the poison — indeed, I am sure that you will not be angry with me; for others, as you are aware, and not I, are to blame. And so fare you well, and try to bear lightly what must needs be — you know my errand. Then bursting into tears he turned away and went out.

Socrates looked at him and said: I return your good wishes, and will do as you bid. Then turning to us, he said, How charming the man is: since I have been in prison he has always been coming to see me, and at times he would talk to me, and was as good to me as could be, and now see how generously he sorrows on my account. We must do as he says, Crito; and therefore let the cup be brought, if the poison is prepared: if not, let the attendant prepare some.

Yet, said Crito, the sun is still upon the hill-tops, and I know that many a one has taken the draught late, and after the announcement has been made to him, he has eaten and drunk, and enjoyed the society of his beloved; do not hurry — there is time enough.

Socrates said: Yes, Crito, and they of whom you speak are right in so acting, for they think that they will be gainers by the delay; but I am right in not following their example, for I do not think that I should gain anything by drinking the poison a little later; I should only be ridiculous in my own eyes for sparing and saving

a life which is already forfeit. Please then to do as I say, and not to refuse me.

Crito made a sign to the servant, who was standing by; and he went out, and having been absent for some time, returned with the jailer carrying the cup of poison. Socrates said: You, my good friend, who are experienced in these matters, shall give me directions how I am to proceed. The man answered: You have only to walk about until your legs are heavy, and then to lie down, and the poison will act. At the same time he handed the cup to Socrates, who in the easiest and gentlest manner, without the least fear or change of colour or feature, looking at the man with all his eyes, Echecrates, as his manner was, took the cup and said: What do you say about making a libation out of this cup to any god? May I, or not? The man answered: We only prepare, Socrates, just so much as we deem enough. I understand, he said: but I may and must ask the gods to prosper my journey from this to the other world — even so — and so be it according to my prayer. Then raising the cup to his lips, quite readily and cheerfully he drank off the poison. And hitherto most of us had been able to control our sorrow; but now when we saw him drinking, and saw too that he had finished the draught, we could no longer forbear, and in spite of myself my own tears were flowing fast; so that I covered my face and wept, not for him, but at the thought of my own calamity in having to part from such a friend. Nor was I the first; for Crito, when he found himself unable to restrain his tears, had got up, and I followed; and at that moment, Apollodorus, who had been weeping all the time, broke out in a loud and passionate cry which made cowards of us all. Socrates alone retained his calmness: What is this strange outcry? he said. I sent away the women mainly in order that they might not misbehave in this way, for I have been told that a man should die in peace. Be quiet, then, and have patience. When we heard his words we were ashamed, and refrained our tears; and he walked about until, as he said, his legs began to fail, and then he lay on his back, according to the

directions, and the man who gave him the poison now and then looked at his feet and legs; and after a while he pressed his foot hard, and asked him if he could feel; and he said, No; and then his leg, and so upwards and upwards, and showed us that he was cold and stiff. And he felt them himself, and said: When the poison reaches the heart, that will be the end. He was beginning to grow cold about the groin, when he uncovered his face, for he had covered himself up, and said — they were his last words — he said: Crito, I owe a cock to Asclepius; will you remember to pay the debt? The debt shall be paid, said Crito; is there anything else? There was no answer to this question; but in a minute or two a movement was heard, and the attendants uncovered him; his eyes were set, and Crito closed his eyes and mouth.

Such was the end, Echecrates, of our friend; concerning whom I may truly say, that of all the men of his time whom I have known, he was the wisest and justest and best.

Gorgias

ΓΟΡΓΙΑΣ

Callicles: The wise man, as the proverb says, is late for a fray, but not for a feast.

Socrates: And are we late for a feast?

Callicles: Yes, and a delightful feast; for Gorgias has just been exhibiting to us many fine things.

Socrates: It is not my fault, Callicles; our friend Chaerephon is to blame; for he would keep us loitering in the Agora.

Chaerephon: Never mind, Socrates; the misfortune of which I have been the cause I will also repair; for Gorgias is a friend of mine, and I will make him give the exhibition again either now, or, if you prefer, at some other time.

Callicles: What is the matter, Chaerephon — does Socrates want to hear Gorgias?

Chaerephon: Yes, that was our intention in coming.

Callicles: Come into my house, then; for Gorgias is staying with me, and he shall exhibit to you.

Socrates: Very good, Callicles; but will he answer our questions? for I want to hear from him what is the nature of his art, and what it is which he professes and teaches; he may, as you (Chaerephon) suggest, defer the exhibition to some other time.

Callicles: There is nothing like asking him, Socrates; and indeed to answer questions is a part of his exhibition, for he was saying only just now, that any one in my house might put any question

to him, and that he would answer.

Socrates: How fortunate! will you ask him, Chaerephon — ?

Chaerephon: What shall I ask him?

Socrates: Ask him who he is.

Chaerephon: What do you mean?

Socrates: I mean such a question as would elicit from him, if he had been a maker of shoes, the answer that he is a cobbler. Do you understand?

Chaerephon: I understand, and will ask him: Tell me, Gorgias, is our friend Callicles right in saying that you undertake to answer any questions which you are asked?

Gorgias: Quite right, Chaerephon: I was saying as much only just now; and I may add, that many years have elapsed since any one has asked me a new one.

Chaerephon: Then you must be very ready, Gorgias.

Gorgias: Of that, Chaerephon, you can make trial.

Polus: Yes, indeed, and if you like, Chaerephon, you may make trial of me too, for I think that Gorgias, who has been talking a long time, is tired.

Chaerephon: And do you, Polus, think that you can answer better than Gorgias?

Polus: What does that matter if I answer well enough for you?

Chaerephon: Not at all: — and you shall answer if you like.

Polus: Ask: —

Chaerephon: My question is this: If Gorgias had the skill of his brother Herodicus, what ought we to call him? Ought he not to have the name which is given to his brother?

Polus: Certainly.

Chaerephon: Then we should be right in calling him a physician?

Polus: Yes.

Chaerephon: And if he had the skill of Aristophon the son of Aglaophon, or of his brother Polygnotus, what ought we to call him?

Polus: Clearly, a painter.

Chaerephon: But now what shall we call him — what is the art in which he is skilled.

Polus: O Chaerephon, there are many arts among mankind which are experimental, and have their origin in experience, for experience makes the days of men to proceed according to art, and inexperience according to chance, and different persons in different ways are proficient in different arts, and the best persons in the best arts. And our friend Gorgias is one of the best, and the art in which he is a proficient is the noblest.

Socrates: Polus has been taught how to make a capital speech, Gorgias; but he is not fulfilling the promise which he made to Chaerephon.

Gorgias: What do you mean, Socrates?

Socrates: I mean that he has not exactly answered the question which he was asked.

Gorgias: Then why not ask him yourself?

Socrates: But I would much rather ask you, if you are disposed to answer: for I see, from the few words which Polus has uttered, that he has attended more to the art which is called rhetoric than to dialectic.

Polus: What makes you say so, Socrates?

Socrates: Because, Polus, when Chaerephon asked you what was the art which Gorgias knows, you praised it as if you were answering some one who found fault with it, but you never said what the art was.

Polus: Why, did I not say that it was the noblest of arts?

Socrates: Yes, indeed, but that was no answer to the question: nobody asked what was the quality, but what was the nature, of the art, and by what name we were to describe Gorgias. And I would still beg you briefly and clearly, as you answered Chaerephon when he asked you at first, to say what this art is, and what we ought to call Gorgias: Or rather, Gorgias, let me turn to you, and ask the same question, — what are we to call you, and what is the art which you profess?

Gorgias: Rhetoric, Socrates, is my art.

Socrates: Then I am to call you a rhetorician?

Gorgias: Yes, Socrates, and a good one too, if you would call me that which, in Homeric language, 'I boast myself to be.'

Socrates: I should wish to do so.

Gorgias: Then pray do.

Socrates: And are we to say that you are able to make other men rhetoricians?

Gorgias: Yes, that is exactly what I profess to make them, not only at Athens, but in all places.

Socrates: And will you continue to ask and answer questions, Gorgias, as we are at present doing, and reserve for another occasion the longer mode of speech which Polus was attempting? Will you keep your promise, and answer shortly the questions which are asked of you?

Gorgias: Some answers, Socrates, are of necessity longer; but I will do my best to make them as short as possible; for a part of my profession is that I can be as short as any one.

Socrates: That is what is wanted, Gorgias; exhibit the shorter method now, and the longer one at some other time.

Gorgias: Well, I will; and you will certainly say, that you never heard a man use fewer words.

Socrates: Very good then; as you profess to be a rhetorician, and a maker of rhetoricians, let me ask you, with what is rhetoric concerned: I might ask with what is weaving concerned, and you would reply (would you not?), with the making of garments?

Gorgias: Yes.

Socrates: And music is concerned with the composition of melodies?

Gorgias: It is.

Socrates: By Here, Gorgias, I admire the surpassing brevity of your answers.

Gorgias: Yes, Socrates, I do think myself good at that.

Socrates: I am glad to hear it; answer me in like manner about rhetoric: with what is rhetoric concerned?

Gorgias: With discourse.

Socrates: What sort of discourse, Gorgias? — such discourse as would teach the sick under what treatment they might get well?

Gorgias: No.

Socrates: Then rhetoric does not treat of all kinds of discourse?

Gorgias: Certainly not.

Socrates: And yet rhetoric makes men able to speak?

Gorgias: Yes.

Socrates: And to understand that about which they speak?

Gorgias: Of course.

Socrates: But does not the art of medicine, which we were just now mentioning, also make men able to understand and speak about the sick?

Gorgias: Certainly.

Socrates: Then medicine also treats of discourse?

Gorgias: Yes.

Socrates: Of discourse concerning diseases?

Gorgias: Just so.

Socrates: And does not gymnastic also treat of discourse concerning the good or evil condition of the body?

Gorgias: Very true.

Socrates: And the same, Gorgias, is true of the other arts: — all of them treat of discourse concerning the subjects with which they severally have to do.

Gorgias: Clearly.

Socrates: Then why, if you call rhetoric the art which treats of discourse, and all the other arts treat of discourse, do you not call them arts of rhetoric?

Gorgias: Because, Socrates, the knowledge of the other arts has only to do with some sort of external action, as of the hand; but there is no such action of the hand in rhetoric which works and takes effect only through the medium of discourse. And therefore I am justified in saying that rhetoric treats of discourse.

Socrates: I am not sure whether I entirely understand you, but I dare say I shall soon know better; please to answer me a question: — you would allow that there are arts?

Gorgias: Yes.

Socrates: As to the arts generally, they are for the most part concerned with doing, and require little or no speaking; in painting, and statuary, and many other arts, the work may proceed in silence; and of such arts I suppose you would say that they do not come within the province of rhetoric.

Gorgias: You perfectly conceive my meaning, Socrates.

Socrates: But there are other arts which work wholly through the medium of language, and require either no action or very little, as, for example, the arts of arithmetic, of calculation, of geometry, and of playing draughts; in some of these speech is pretty nearly co-extensive with action, but in most of them the verbal element is greater — they depend wholly on words for their efficacy and power: and I take your meaning to be that rhetoric is an art of this latter sort?

Gorgias: Exactly.

Socrates: And yet I do not believe that you really mean to call any of these arts rhetoric; although the precise expression which you used was, that rhetoric is an art which works and takes effect only through the medium of discourse; and an adversary who wished to be captious might say, 'And so, Gorgias, you call arithmetic rhetoric.' But I do not think that you really call arithmetic rhetoric any more than geometry would be so called by you.

Gorgias: You are quite right, Socrates, in your apprehension of my meaning.

Socrates: Well, then, let me now have the rest of my answer: — seeing that rhetoric is one of those arts which works mainly by the use of words, and there are other arts which also use words, tell me what is that quality in words with which rhetoric is concerned: — Suppose that a person asks me about some of the arts which I was mentioning just now; he might say, 'Socrates, what is arithmetic?' and I should reply to him, as you replied to me, that arithmetic is one of those arts which take effect through words. And then he would proceed to ask: 'Words about what?' and I should reply, Words about odd and even numbers, and how many there are of each. And if he asked again: 'What is the art of calculation?' I should say, That also is one of the arts which is concerned wholly with words. And if he further said, 'Concerned with what?' I should say, like the clerks in the assembly, 'as aforesaid' of arithmetic, but with a difference, the

difference being that the art of calculation considers not only the quantities of odd and even numbers, but also their numerical relations to themselves and to one another. And suppose, again, I were to say that astronomy is only words — he would ask, 'Words about what, Socrates?' and I should answer, that astronomy tells us about the motions of the stars and sun and moon, and their relative swiftness.

Gorgias: You would be quite right, Socrates.

Socrates: And now let us have from you, Gorgias, the truth about rhetoric: which you would admit (would you not?) to be one of those arts which act always and fulfil all their ends through the medium of words?

Gorgias: True.

Socrates: Words which do what? I should ask. To what class of things do the words which rhetoric uses relate?

Gorgias: To the greatest, Socrates, and the best of human things.

Socrates: That again, Gorgias is ambiguous; I am still in the dark: for which are the greatest and best of human things? I dare say that you have heard men singing at feasts the old drinking song, in which the singers enumerate the goods of life, first health, beauty next, thirdly, as the writer of the song says, wealth honestly obtained.

Gorgias: Yes, I know the song; but what is your drift?

Socrates: I mean to say, that the producers of those things which the author of the song praises, that is to say, the physician, the trainer, the money-maker, will at once come to you, and first the physician will say: 'O Socrates, Gorgias is deceiving you, for my art is concerned with the greatest good of men and not his.' And when I ask, Who are you? he will reply, 'I am a physician.' What do you mean? I shall say. Do you mean that your art produces the greatest good? 'Certainly,' he will

answer, ‘for is not health the greatest good? What greater good can men have, Socrates?’ And after him the trainer will come and say, ‘I too, Socrates, shall be greatly surprised if Gorgias can show more good of his art than I can show of mine.’ To him again I shall say, Who are you, honest friend, and what is your business? ‘I am a trainer,’ he will reply, ‘and my business is to make men beautiful and strong in body.’ When I have done with the trainer, there arrives the money-maker, and he, as I expect, will utterly despise them all. ‘Consider Socrates,’ he will say, ‘whether Gorgias or any one else can produce any greater good than wealth.’ Well, you and I say to him, and are you a creator of wealth? ‘Yes,’ he replies. And who are you? ‘A money-maker.’ And do you consider wealth to be the greatest good of man? ‘Of course,’ will be his reply. And we shall rejoin: Yes; but our friend Gorgias contends that his art produces a greater good than yours. And then he will be sure to go on and ask, ‘What good? Let Gorgias answer.’ Now I want you, Gorgias, to imagine that this question is asked of you by them and by me; What is that which, as you say, is the greatest good of man, and of which you are the creator? Answer us.

Gorgias: That good, Socrates, which is truly the greatest, being that which gives to men freedom in their own persons, and to individuals the power of ruling over others in their several states.

Socrates: And what would you consider this to be?

Gorgias: What is there greater than the word which persuades the judges in the courts, or the senators in the council, or the citizens in the assembly, or at any other political meeting? — if you have the power of uttering this word, you will have the physician your slave, and the trainer your slave, and the money-maker of whom you talk will be found to gather treasures, not for himself, but for you who are able to speak and to persuade the multitude.

Socrates: Now I think, Gorgias, that you have very accurately explained what you conceive to be the art of rhetoric; and you mean to say, if I am not mistaken, that rhetoric is the artificer of persuasion, having this and no other business, and that this is her crown and end. Do you know any other effect of rhetoric over and above that of producing persuasion?

Gorgias: No: the definition seems to me very fair, Socrates; for persuasion is the chief end of rhetoric.

Socrates: Then hear me, Gorgias, for I am quite sure that if there ever was a man who entered on the discussion of a matter from a pure love of knowing the truth, I am such a one, and I should say the same of you.

Gorgias: What is coming, Socrates?

Socrates: I will tell you: I am very well aware that I do not know what, according to you, is the exact nature, or what are the topics of that persuasion of which you speak, and which is given by rhetoric; although I have a suspicion about both the one and the other. And I am going to ask — what is this power of persuasion which is given by rhetoric, and about what? But why, if I have a suspicion, do I ask instead of telling you? Not for your sake, but in order that the argument may proceed in such a manner as is most likely to set forth the truth. And I would have you observe, that I am right in asking this further question: If I asked, 'What sort of a painter is Zeuxis?' and you said, 'The painter of figures,' should I not be right in asking, 'What kind of figures, and where do you find them?'

Gorgias: Certainly.

Socrates: And the reason for asking this second question would be, that there are other painters besides, who paint many other figures?

Gorgias: True.

Socrates: But if there had been no one but Zeuxis who painted them, then you would have answered very well?

Gorgias: Quite so.

Socrates: Now I want to know about rhetoric in the same way; — is rhetoric the only art which brings persuasion, or do other arts have the same effect? I mean to say — Does he who teaches anything persuade men of that which he teaches or not?

Gorgias: He persuades, Socrates, — there can be no mistake about that.

Socrates: Again, if we take the arts of which we were just now speaking: — do not arithmetic and the arithmeticians teach us the properties of number?

Gorgias: Certainly.

Socrates: And therefore persuade us of them?

Gorgias: Yes.

Socrates: Then arithmetic as well as rhetoric is an artificer of persuasion?

Gorgias: Clearly.

Socrates: And if any one asks us what sort of persuasion, and about what, — we shall answer, persuasion which teaches the quantity of odd and even; and we shall be able to show that all the other arts of which we were just now speaking are artificers of persuasion, and of what sort, and about what.

Gorgias: Very true.

Socrates: Then rhetoric is not the only artificer of persuasion?

Gorgias: True.

Socrates: Seeing, then, that not only rhetoric works by persuasion, but that other arts do the same, as in the case of the painter, a question has arisen which is a very fair one: Of what persuasion is rhetoric the artificer, and about what? — is not

that a fair way of putting the question?

Gorgias: I think so.

Socrates: Then, if you approve the question, Gorgias, what is the answer?

Gorgias: I answer, Socrates, that rhetoric is the art of persuasion in courts of law and other assemblies, as I was just now saying, and about the just and unjust.

Socrates: And that, Gorgias, was what I was suspecting to be your notion; yet I would not have you wonder if by-and-by I am found repeating a seemingly plain question; for I ask not in order to confute you, but as I was saying that the argument may proceed consecutively, and that we may not get the habit of anticipating and suspecting the meaning of one another's words; I would have you develope your own views in your own way, whatever may be your hypothesis.

Gorgias: I think that you are quite right, Socrates.

Socrates: Then let me raise another question; there is such a thing as 'having learned'?

Gorgias: Yes.

Socrates: And there is also 'having believed'?

Gorgias: Yes.

Socrates: And is the 'having learned' the same as 'having believed,' and are learning and belief the same things?

Gorgias: In my judgment, Socrates, they are not the same.

Socrates: And your judgment is right, as you may ascertain in this way: — If a person were to say to you, 'Is there, Gorgias, a false belief as well as a true?' — you would reply, if I am not mistaken, that there is.

Gorgias: Yes.

Socrates: Well, but is there a false knowledge as well as a true?

Gorgias: No.

Socrates: No, indeed; and this again proves that knowledge and belief differ.

Gorgias: Very true.

Socrates: And yet those who have learned as well as those who have believed are persuaded?

Gorgias: Just so.

Socrates: Shall we then assume two sorts of persuasion, — one which is the source of belief without knowledge, as the other is of knowledge?

Gorgias: By all means.

Socrates: And which sort of persuasion does rhetoric create in courts of law and other assemblies about the just and unjust, the sort of persuasion which gives belief without knowledge, or that which gives knowledge?

Gorgias: Clearly, Socrates, that which only gives belief.

Socrates: Then rhetoric, as would appear, is the artificer of a persuasion which creates belief about the just and unjust, but gives no instruction about them?

Gorgias: True.

Socrates: And the rhetorician does not instruct the courts of law or other assemblies about things just and unjust, but he creates belief about them; for no one can be supposed to instruct such a vast multitude about such high matters in a short time?

Gorgias: Certainly not.

Socrates: Come, then, and let us see what we really mean about rhetoric; for I do not know what my own meaning is as yet. When the assembly meets to elect a physician or a shipwright or any other craftsman, will the rhetorician be taken into counsel? Surely not. For at every election he ought to be chosen who is

most skilled; and, again, when walls have to be built or harbours or docks to be constructed, not the rhetorician but the master workman will advise; or when generals have to be chosen and an order of battle arranged, or a position taken, then the military will advise and not the rhetoricians: what do you say, Gorgias? Since you profess to be a rhetorician and a maker of rhetoricians, I cannot do better than learn the nature of your art from you. And here let me assure you that I have your interest in view as well as my own. For likely enough some one or other of the young men present might desire to become your pupil, and in fact I see some, and a good many too, who have this wish, but they would be too modest to question you. And therefore when you are interrogated by me, I would have you imagine that you are interrogated by them. 'What is the use of coming to you, Gorgias?' they will say— 'about what will you teach us to advise the state? — about the just and unjust only, or about those other things also which Socrates has just mentioned?' How will you answer them?

Gorgias: I like your way of leading us on, Socrates, and I will endeavour to reveal to you the whole nature of rhetoric. You must have heard, I think, that the docks and the walls of the Athenians and the plan of the harbour were devised in accordance with the counsels, partly of Themistocles, and partly of Pericles, and not at the suggestion of the builders.

Socrates: Such is the tradition, Gorgias, about Themistocles; and I myself heard the speech of Pericles when he advised us about the middle wall.

Gorgias: And you will observe, Socrates, that when a decision has to be given in such matters the rhetoricians are the advisers; they are the men who win their point.

Socrates: I had that in my admiring mind, Gorgias, when I asked what is the nature of rhetoric, which always appears to me, when I look at the matter in this way, to be a marvel of greatness.

Gorgias: A marvel, indeed, Socrates, if you only knew how rhetoric comprehends and holds under her sway all the inferior arts. Let me offer you a striking example of this. On several occasions I have been with my brother Herodicus or some other physician to see one of his patients, who would not allow the physician to give him medicine, or apply the knife or hot iron to him; and I have persuaded him to do for me what he would not do for the physician just by the use of rhetoric. And I say that if a rhetorician and a physician were to go to any city, and had there to argue in the Ecclesia or any other assembly as to which of them should be elected state-physician, the physician would have no chance; but he who could speak would be chosen if he wished; and in a contest with a man of any other profession the rhetorician more than any one would have the power of getting himself chosen, for he can speak more persuasively to the multitude than any of them, and on any subject. Such is the nature and power of the art of rhetoric! And yet, Socrates, rhetoric should be used like any other competitive art, not against everybody, — the rhetorician ought not to abuse his strength any more than a pugilist or pancratiast or other master of fence; — because he has powers which are more than a match either for friend or enemy, he ought not therefore to strike, stab, or slay his friends. Suppose a man to have been trained in the palestra and to be a skilful boxer, — he in the fulness of his strength goes and strikes his father or mother or one of his familiars or friends; but that is no reason why the trainers or fencing-masters should be held in detestation or banished from the city; — surely not. For they taught their art for a good purpose, to be used against enemies and evil-doers, in self-defence not in aggression, and others have perverted their instructions, and turned to a bad use their own strength and skill. But not on this account are the teachers bad, neither is the art in fault, or bad in itself; I should rather say that those who make a bad use of the art are to blame. And the same argument holds good of rhetoric; for the rhetorician can speak against all

men and upon any subject, — in short, he can persuade the multitude better than any other man of anything which he pleases, but he should not therefore seek to defraud the physician or any other artist of his reputation merely because he has the power; he ought to use rhetoric fairly, as he would also use his athletic powers. And if after having become a rhetorician he makes a bad use of his strength and skill, his instructor surely ought not on that account to be held in detestation or banished. For he was intended by his teacher to make a good use of his instructions, but he abuses them. And therefore he is the person who ought to be held in detestation, banished, and put to death, and not his instructor.

Socrates: You, Gorgias, like myself, have had great experience of disputations, and you must have observed, I think, that they do not always terminate in mutual edification, or in the definition by either party of the subjects which they are discussing; but disagreements are apt to arise — somebody says that another has not spoken truly or clearly; and then they get into a passion and begin to quarrel, both parties conceiving that their opponents are arguing from personal feeling only and jealousy of themselves, not from any interest in the question at issue. And sometimes they will go on abusing one another until the company at last are quite vexed at themselves for ever listening to such fellows. Why do I say this? Why, because I cannot help feeling that you are now saying what is not quite consistent or accordant with what you were saying at first about rhetoric. And I am afraid to point this out to you, lest you should think that I have some animosity against you, and that I speak, not for the sake of discovering the truth, but from jealousy of you. Now if you are one of my sort, I should like to cross-examine you, but if not I will let you alone. And what is my sort? you will ask. I am one of those who are very willing to be refuted if I say anything which is not true, and very willing to refute any one else who says what is not true, and quite as ready to be refuted as to refute; for I hold that this is the greater gain

of the two, just as the gain is greater of being cured of a very great evil than of curing another. For I imagine that there is no evil which a man can endure so great as an erroneous opinion about the matters of which we are speaking; and if you claim to be one of my sort, let us have the discussion out, but if you would rather have done, no matter; — let us make an end of it.

Gorgias: I should say, Socrates, that I am quite the man whom you indicate; but, perhaps, we ought to consider the audience, for, before you came, I had already given a long exhibition, and if we proceed the argument may run on to a great length. And therefore I think that we should consider whether we may not be detaining some part of the company when they are wanting to do something else.

Chaerephon: You hear the audience cheering, Gorgias and Socrates, which shows their desire to listen to you; and for myself, Heaven forbid that I should have any business on hand which would take me away from a discussion so interesting and so ably maintained.

Callicles: By the gods, Chaerephon, although I have been present at many discussions, I doubt whether I was ever so much delighted before, and therefore if you go on discoursing all day I shall be the better pleased.

Socrates: I may truly say, Callicles, that I am willing, if Gorgias is.

Gorgias: After all this, Socrates, I should be disgraced if I refused, especially as I have promised to answer all comers; in accordance with the wishes of the company, then, do you begin, and ask of me any question which you like.

Socrates: Let me tell you then, Gorgias, what surprises me in your words; though I dare say that you may be right, and I may have misunderstood your meaning. You say that you can make any man, who will learn of you, a rhetorician?

Gorgias: Yes.

Socrates: Do you mean that you will teach him to gain the ears of the multitude on any subject, and this not by instruction but by persuasion?

Gorgias: Quite so.

Socrates: You were saying, in fact, that the rhetorician will have greater powers of persuasion than the physician even in a matter of health?

Gorgias: Yes, with the multitude, — that is.

Socrates: You mean to say, with the ignorant; for with those who know he cannot be supposed to have greater powers of persuasion.

Gorgias: Very true.

Socrates: But if he is to have more power of persuasion than the physician, he will have greater power than he who knows?

Gorgias: Certainly.

Socrates: Although he is not a physician: — is he?

Gorgias: No.

Socrates: And he who is not a physician must, obviously, be ignorant of what the physician knows.

Gorgias: Clearly.

Socrates: Then, when the rhetorician is more persuasive than the physician, the ignorant is more persuasive with the ignorant than he who has knowledge? — is not that the inference?

Gorgias: In the case supposed: — yes.

Socrates: And the same holds of the relation of rhetoric to all the other arts; the rhetorician need not know the truth about things; he has only to discover some way of persuading the ignorant that he has more knowledge than those who know?

Gorgias: Yes, Socrates, and is not this a great comfort? — not to have learned the other arts, but the art of rhetoric only, and yet

to be in no way inferior to the professors of them?

Socrates: Whether the rhetorician is or not inferior on this account is a question which we will hereafter examine if the enquiry is likely to be of any service to us; but I would rather begin by asking, whether he is or is not as ignorant of the just and unjust, base and honourable, good and evil, as he is of medicine and the other arts; I mean to say, does he really know anything of what is good and evil, base or honourable, just or unjust in them; or has he only a way with the ignorant of persuading them that he not knowing is to be esteemed to know more about these things than some one else who knows? Or must the pupil know these things and come to you knowing them before he can acquire the art of rhetoric? If he is ignorant, you who are the teacher of rhetoric will not teach him — it is not your business; but you will make him seem to the multitude to know them, when he does not know them; and seem to be a good man, when he is not. Or will you be unable to teach him rhetoric at all, unless he knows the truth of these things first? What is to be said about all this? By heavens, Gorgias, I wish that you would reveal to me the power of rhetoric, as you were saying that you would.

Gorgias: Well, Socrates, I suppose that if the pupil does chance not to know them, he will have to learn of me these things as well.

Socrates: Say no more, for there you are right; and so he whom you make a rhetorician must either know the nature of the just and unjust already, or he must be taught by you.

Gorgias: Certainly.

Socrates: Well, and is not he who has learned carpentering a carpenter?

Gorgias: Yes.

Socrates: And he who has learned music a musician?

Gorgias: Yes.

Socrates: And he who has learned medicine is a physician, in like manner? He who has learned anything whatever is that which his knowledge makes him.

Gorgias: Certainly.

Socrates: And in the same way, he who has learned what is just is just?

Gorgias: To be sure.

Socrates: And he who is just may be supposed to do what is just?

Gorgias: Yes.

Socrates: And must not the just man always desire to do what is just?

Gorgias: That is clearly the inference.

Socrates: Surely, then, the just man will never consent to do injustice?

Gorgias: Certainly not.

Socrates: And according to the argument the rhetorician must be a just man?

Gorgias: Yes.

Socrates: And will therefore never be willing to do injustice?

Gorgias: Clearly not.

Socrates: But do you remember saying just now that the trainer is not to be accused or banished if the pugilist makes a wrong use of his pugilistic art; and in like manner, if the rhetorician makes a bad and unjust use of his rhetoric, that is not to be laid to the charge of his teacher, who is not to be banished, but the wrong-doer himself who made a bad use of his rhetoric — he is to be banished — was not that said?

Gorgias: Yes, it was.

Socrates: But now we are affirming that the aforesaid rhetorician will never have done injustice at all?

Gorgias: True.

Socrates: And at the very outset, Gorgias, it was said that rhetoric treated of discourse, not (like arithmetic) about odd and even, but about just and unjust? Was not this said?

Gorgias: Yes.

Socrates: I was thinking at the time, when I heard you saying so, that rhetoric, which is always discoursing about justice, could not possibly be an unjust thing. But when you added, shortly afterwards, that the rhetorician might make a bad use of rhetoric I noted with surprise the inconsistency into which you had fallen; and I said, that if you thought, as I did, that there was a gain in being refuted, there would be an advantage in going on with the question, but if not, I would leave off. And in the course of our investigations, as you will see yourself, the rhetorician has been acknowledged to be incapable of making an unjust use of rhetoric, or of willingness to do injustice. By the dog, Gorgias, there will be a great deal of discussion, before we get at the truth of all this.

Polus: And do even you, Socrates, seriously believe what you are now saying about rhetoric? What! because Gorgias was ashamed to deny that the rhetorician knew the just and the honourable and the good, and admitted that to any one who came to him ignorant of them he could teach them, and then out of this admission there arose a contradiction — the thing which you dearly love, and to which not he, but you, brought the argument by your captious questions — (do you seriously believe that there is any truth in all this?) For will any one ever acknowledge that he does not know, or cannot teach, the nature of justice? The truth is, that there is great want of manners in bringing the argument to such a pass.

Socrates: Illustrious Polus, the reason why we provide ourselves with friends and children is, that when we get old and stumble, a younger generation may be at hand to set us on our legs again in our words and in our actions: and now, if I and Gorgias are stumbling, here are you who should raise us up; and I for my part engage to retract any error into which you may think that I have fallen-upon one condition:

Polus: What condition?

Socrates: That you contract, Polus, the prolixity of speech in which you indulged at first.

Polus: What! do you mean that I may not use as many words as I please?

Socrates: Only to think, my friend, that having come on a visit to Athens, which is the most free-spoken state in Hellas, you when you got there, and you alone, should be deprived of the power of speech — that would be hard indeed. But then consider my case: — shall not I be very hardly used, if, when you are making a long oration, and refusing to answer what you are asked, I am compelled to stay and listen to you, and may not go away? I say rather, if you have a real interest in the argument, or, to repeat my former expression, have any desire to set it on its legs, take back any statement which you please; and in your turn ask and answer, like myself and Gorgias — refute and be refuted: for I suppose that you would claim to know what Gorgias knows — would you not?

Polus: Yes.

Socrates: And you, like him, invite any one to ask you about anything which he pleases, and you will know how to answer him?

Polus: To be sure.

Socrates: And now, which will you do, ask or answer?

Polus: I will ask; and do you answer me, Socrates, the same question which Gorgias, as you suppose, is unable to answer: What is rhetoric?

Socrates: Do you mean what sort of an art?

Polus: Yes.

Socrates: To say the truth, Polus, it is not an art at all, in my opinion.

Polus: Then what, in your opinion, is rhetoric?

Socrates: A thing which, as I was lately reading in a book of yours, you say that you have made an art.

Polus: What thing?

Socrates: I should say a sort of experience.

Polus: Does rhetoric seem to you to be an experience?

Socrates: That is my view, but you may be of another mind.

Polus: An experience in what?

Socrates: An experience in producing a sort of delight and gratification.

Polus: And if able to gratify others, must not rhetoric be a fine thing?

Socrates: What are you saying, Polus? Why do you ask me whether rhetoric is a fine thing or not, when I have not as yet told you what rhetoric is?

Polus: Did I not hear you say that rhetoric was a sort of experience?

Socrates: Will you, who are so desirous to gratify others, afford a slight gratification to me?

Polus: I will.

Socrates: Will you ask me, what sort of an art is cookery?

Polus: What sort of an art is cookery?

Socrates: Not an art at all, Polus.

Polus: What then?

Socrates: I should say an experience.

Polus: In what? I wish that you would explain to me.

Socrates: An experience in producing a sort of delight and gratification, Polus.

Polus: Then are cookery and rhetoric the same?

Socrates: No, they are only different parts of the same profession.

Polus: Of what profession?

Socrates: I am afraid that the truth may seem discourteous; and I hesitate to answer, lest Gorgias should imagine that I am making fun of his own profession. For whether or no this is that art of rhetoric which Gorgias practises I really cannot tell: — from what he was just now saying, nothing appeared of what he thought of his art, but the rhetoric which I mean is a part of a not very creditable whole.

Gorgias: A part of what, Socrates? Say what you mean, and never mind me.

Socrates: In my opinion then, Gorgias, the whole of which rhetoric is a part is not an art at all, but the habit of a bold and ready wit, which knows how to manage mankind: this habit I sum up under the word ‘flattery’; and it appears to me to have many other parts, one of which is cookery, which may seem to be an art, but, as I maintain, is only an experience or routine and not an art: — another part is rhetoric, and the art of attiring and sophistry are two others: thus there are four branches, and four different things answering to them. And Polus may ask, if he likes, for he has not as yet been informed, what part of flattery is rhetoric: he did not see that I had not yet answered him when he proceeded to ask a further question: Whether I do not think rhetoric a fine thing? But I shall not tell him whether

rhetoric is a fine thing or not, until I have first answered, ‘What is rhetoric?’ For that would not be right, Polus; but I shall be happy to answer, if you will ask me, What part of flattery is rhetoric?

Polus: I will ask and do you answer? What part of flattery is rhetoric?

Socrates: Will you understand my answer? Rhetoric, according to my view, is the ghost or counterfeit of a part of politics.

Polus: And noble or ignoble?

Socrates: Ignoble, I should say, if I am compelled to answer, for I call what is bad ignoble: though I doubt whether you understand what I was saying before.

Gorgias: Indeed, Socrates, I cannot say that I understand myself.

Socrates: I do not wonder, Gorgias; for I have not as yet explained myself, and our friend Polus, colt by name and colt by nature, is apt to run away. (This is an untranslatable play on the name ‘Polus,’ which means ‘a colt.’)

Gorgias: Never mind him, but explain to me what you mean by saying that rhetoric is the counterfeit of a part of politics.

Socrates: I will try, then, to explain my notion of rhetoric, and if I am mistaken, my friend Polus shall refute me. We may assume the existence of bodies and of souls?

Gorgias: Of course.

Socrates: You would further admit that there is a good condition of either of them?

Gorgias: Yes.

Socrates: Which condition may not be really good, but good only in appearance? I mean to say, that there are many persons who appear to be in good health, and whom only a physician or trainer will discern at first sight not to be in good health.

Gorgias: True.

Socrates: And this applies not only to the body, but also to the soul: in either there may be that which gives the appearance of health and not the reality?

Gorgias: Yes, certainly.

Socrates: And now I will endeavour to explain to you more clearly what I mean: The soul and body being two, have two arts corresponding to them: there is the art of politics attending on the soul; and another art attending on the body, of which I know no single name, but which may be described as having two divisions, one of them gymnastic, and the other medicine. And in politics there is a legislative part, which answers to gymnastic, as justice does to medicine; and the two parts run into one another, justice having to do with the same subject as legislation, and medicine with the same subject as gymnastic, but with a difference. Now, seeing that there are these four arts, two attending on the body and two on the soul for their highest good; flattery knowing, or rather guessing their natures, has distributed herself into four shams or simulations of them; she puts on the likeness of some one or other of them, and pretends to be that which she simulates, and having no regard for men's highest interests, is ever making pleasure the bait of the unwary, and deceiving them into the belief that she is of the highest value to them. Cookery simulates the disguise of medicine, and pretends to know what food is the best for the body; and if the physician and the cook had to enter into a competition in which children were the judges, or men who had no more sense than children, as to which of them best understands the goodness or badness of food, the physician would be starved to death. A flattery I deem this to be and of an ignoble sort, Polus, for to you I am now addressing myself, because it aims at pleasure without any thought of the best. An art I do not call it, but only an experience, because it is unable to explain or to give a reason of the nature of its own

applications. And I do not call any irrational thing an art; but if you dispute my words, I am prepared to argue in defence of them.

Cookery, then, I maintain to be a flattery which takes the form of medicine; and tiring, in like manner, is a flattery which takes the form of gymnastic, and is knavish, false, ignoble, illiberal, working deceitfully by the help of lines, and colours, and enamels, and garments, and making men affect a spurious beauty to the neglect of the true beauty which is given by gymnastic.

I would rather not be tedious, and therefore I will only say, after the manner of the geometricians (for I think that by this time you will be able to follow)

as tiring: gymnastic:: cookery: medicine;

or rather,

as tiring: gymnastic:: sophistry: legislation;

and

as cookery: medicine:: rhetoric: justice.

And this, I say, is the natural difference between the rhetorician and the sophist, but by reason of their near connection, they are apt to be jumbled up together; neither do they know what to make of themselves, nor do other men know what to make of them. For if the body presided over itself, and were not under the guidance of the soul, and the soul did not discern and discriminate between cookery and medicine, but the body was made the judge of them, and the rule of judgment was the bodily delight which was given by them, then the word of Anaxagoras, that word with which you, friend Polus, are so well acquainted, would prevail far and wide: ‘Chaos’ would come again, and cookery, health, and medicine would mingle in an indiscriminate mass. And now I have told you my notion of rhetoric, which is, in relation to the soul, what cookery is to the body. I may have

been inconsistent in making a long speech, when I would not allow you to discourse at length. But I think that I may be excused, because you did not understand me, and could make no use of my answer when I spoke shortly, and therefore I had to enter into an explanation. And if I show an equal inability to make use of yours, I hope that you will speak at equal length; but if I am able to understand you, let me have the benefit of your brevity, as is only fair: And now you may do what you please with my answer.

Polus: What do you mean? do you think that rhetoric is flattery?

Socrates: Nay, I said a part of flattery; if at your age, Polus, you cannot remember, what will you do by-and-by, when you get older?

Polus: And are the good rhetoricians meanly regarded in states, under the idea that they are flatterers?

Socrates: Is that a question or the beginning of a speech?

Polus: I am asking a question.

Socrates: Then my answer is, that they are not regarded at all.

Polus: How not regarded? Have they not very great power in states?

Socrates: Not if you mean to say that power is a good to the possessor.

Polus: And that is what I do mean to say.

Socrates: Then, if so, I think that they have the least power of all the citizens.

Polus: What! are they not like tyrants? They kill and despoil and exile any one whom they please.

Socrates: By the dog, Polus, I cannot make out at each deliverance of yours, whether you are giving an opinion of your own, or asking a question of me.

Polus: I am asking a question of you.

Socrates: Yes, my friend, but you ask two questions at once.

Polus: How two questions?

Socrates: Why, did you not say just now that the rhetoricians are like tyrants, and that they kill and despoil or exile any one whom they please?

Polus: I did.

Socrates: Well then, I say to you that here are two questions in one, and I will answer both of them. And I tell you, Polus, that rhetoricians and tyrants have the least possible power in states, as I was just now saying; for they do literally nothing which they will, but only what they think best.

Polus: And is not that a great power?

Socrates: Polus has already said the reverse.

Polus: Said the reverse! nay, that is what I assert.

Socrates: No, by the great — what do you call him? — not you, for you say that power is a good to him who has the power.

Polus: I do.

Socrates: And would you maintain that if a fool does what he thinks best, this is a good, and would you call this great power?

Polus: I should not.

Socrates: Then you must prove that the rhetorician is not a fool, and that rhetoric is an art and not a flattery — and so you will have refuted me; but if you leave me unrefuted, why, the rhetoricians who do what they think best in states, and the tyrants, will have nothing upon which to congratulate themselves, if as you say, power be indeed a good, admitting at the same time that what is done without sense is an evil.

Polus: Yes; I admit that.

Socrates: How then can the rhetoricians or the tyrants have great power in states, unless Polus can refute Socrates, and prove to him that they do as they will?

Polus: This fellow —

Socrates: I say that they do not do as they will; — now refute me.

Polus: Why, have you not already said that they do as they think best?

Socrates: And I say so still.

Polus: Then surely they do as they will?

Socrates: I deny it.

Polus: But they do what they think best?

Socrates: Aye.

Polus: That, Socrates, is monstrous and absurd.

Socrates: Good words, good Polus, as I may say in your own peculiar style; but if you have any questions to ask of me, either prove that I am in error or give the answer yourself.

Polus: Very well, I am willing to answer that I may know what you mean.

Socrates: Do men appear to you to will that which they do, or to will that further end for the sake of which they do a thing? when they take medicine, for example, at the bidding of a physician, do they will the drinking of the medicine which is painful, or the health for the sake of which they drink?

Polus: Clearly, the health.

Socrates: And when men go on a voyage or engage in business, they do not will that which they are doing at the time; for who would desire to take the risk of a voyage or the trouble of business? — But they will, to have the wealth for the sake of which they go on a voyage.

Polus: Certainly.

Socrates: And is not this universally true? If a man does something for the sake of something else, he wills not that which he does, but that for the sake of which he does it.

Polus: Yes.

Socrates: And are not all things either good or evil, or intermediate and indifferent?

Polus: To be sure, Socrates.

Socrates: Wisdom and health and wealth and the like you would call goods, and their opposites evils?

Polus: I should.

Socrates: And the things which are neither good nor evil, and which partake sometimes of the nature of good and at other times of evil, or of neither, are such as sitting, walking, running, sailing; or, again, wood, stones, and the like: — these are the things which you call neither good nor evil?

Polus: Exactly so.

Socrates: Are these indifferent things done for the sake of the good, or the good for the sake of the indifferent?

Polus: Clearly, the indifferent for the sake of the good.

Socrates: When we walk we walk for the sake of the good, and under the idea that it is better to walk, and when we stand we stand equally for the sake of the good?

Polus: Yes.

Socrates: And when we kill a man we kill him or exile him or despoil him of his goods, because, as we think, it will conduce to our good?

Polus: Certainly.

Socrates: Men who do any of these things do them for the sake of the good?

Polus: Yes.

Socrates: And did we not admit that in doing something for the sake of something else, we do not will those things which we do, but that other thing for the sake of which we do them?

Polus: Most true.

Socrates: Then we do not will simply to kill a man or to exile him or to despoil him of his goods, but we will to do that which conduces to our good, and if the act is not conducive to our good we do not will it; for we will, as you say, that which is our good, but that which is neither good nor evil, or simply evil, we do not will. Why are you silent, Polus? Am I not right?

Polus: You are right.

Socrates: Hence we may infer, that if any one, whether he be a tyrant or a rhetorician, kills another or exiles another or deprives him of his property, under the idea that the act is for his own interests when really not for his own interests, he may be said to do what seems best to him?

Polus: Yes.

Socrates: But does he do what he wills if he does what is evil? Why do you not answer?

Polus: Well, I suppose not.

Socrates: Then if great power is a good as you allow, will such a one have great power in a state?

Polus: He will not.

Socrates: Then I was right in saying that a man may do what seems good to him in a state, and not have great power, and not do what he wills?

Polus: As though you, Socrates, would not like to have the power of doing what seemed good to you in the state, rather than not; you would not be jealous when you saw any one killing or despoiling or imprisoning whom he pleased, Oh, no!

Socrates: Justly or unjustly, do you mean?

Polus: In either case is he not equally to be envied?

Socrates: Forbear, Polus!

Polus: Why ‘forbear’?

Socrates: Because you ought not to envy wretches who are not to be envied, but only to pity them.

Polus: And are those of whom I spoke wretches?

Socrates: Yes, certainly they are.

Polus: And so you think that he who slays any one whom he pleases, and justly slays him, is pitiable and wretched?

Socrates: No, I do not say that of him: but neither do I think that he is to be envied.

Polus: Were you not saying just now that he is wretched?

Socrates: Yes, my friend, if he killed another unjustly, in which case he is also to be pitied; and he is not to be envied if he killed him justly.

Polus: At any rate you will allow that he who is unjustly put to death is wretched, and to be pitied?

Socrates: Not so much, Polus, as he who kills him, and not so much as he who is justly killed.

Polus: How can that be, Socrates?

Socrates: That may very well be, inasmuch as doing injustice is the greatest of evils.

Polus: But is it the greatest? Is not suffering injustice a greater evil?

Socrates: Certainly not.

Polus: Then would you rather suffer than do injustice?

Socrates: I should not like either, but if I must choose between them, I would rather suffer than do.

Polus: Then you would not wish to be a tyrant?

Socrates: Not if you mean by tyranny what I mean.

Polus: I mean, as I said before, the power of doing whatever seems good to you in a state, killing, banishing, doing in all things as you like.

Socrates: Well then, illustrious friend, when I have said my say, do you reply to me. Suppose that I go into a crowded Agora, and take a dagger under my arm. Polus, I say to you, I have just acquired rare power, and become a tyrant; for if I think that any of these men whom you see ought to be put to death, the man whom I have a mind to kill is as good as dead; and if I am disposed to break his head or tear his garment, he will have his head broken or his garment torn in an instant. Such is my great power in this city. And if you do not believe me, and I show you the dagger, you would probably reply: Socrates, in that sort of way any one may have great power — he may burn any house which he pleases, and the docks and triremes of the Athenians, and all their other vessels, whether public or private — but can you believe that this mere doing as you think best is great power?

Polus: Certainly not such doing as this.

Socrates: But can you tell me why you disapprove of such a power?

Polus: I can.

Socrates: Why then?

Polus: Why, because he who did as you say would be certain to be punished.

Socrates: And punishment is an evil?

Polus: Certainly.

Socrates: And you would admit once more, my good sir, that great power is a benefit to a man if his actions turn out to his

advantage, and that this is the meaning of great power; and if not, then his power is an evil and is no power. But let us look at the matter in another way: — do we not acknowledge that the things of which we were speaking, the infliction of death, and exile, and the deprivation of property are sometimes a good and sometimes not a good?

Polus: Certainly.

Socrates: About that you and I may be supposed to agree?

Polus: Yes.

Socrates: Tell me, then, when do you say that they are good and when that they are evil — what principle do you lay down?

Polus: I would rather, Socrates, that you should answer as well as ask that question.

Socrates: Well, Polus, since you would rather have the answer from me, I say that they are good when they are just, and evil when they are unjust.

Polus: You are hard of refutation, Socrates, but might not a child refute that statement?

Socrates: Then I shall be very grateful to the child, and equally grateful to you if you will refute me and deliver me from my foolishness. And I hope that refute me you will, and not weary of doing good to a friend.

Polus: Yes, Socrates, and I need not go far or appeal to antiquity; events which happened only a few days ago are enough to refute you, and to prove that many men who do wrong are happy.

Socrates: What events?

Polus: You see, I presume, that Archelaus the son of Perdiccas is now the ruler of Macedonia?

Socrates: At any rate I hear that he is.

Polus: And do you think that he is happy or miserable?

Socrates: I cannot say, Polus, for I have never had any acquaintance with him.

Polus: And cannot you tell at once, and without having an acquaintance with him, whether a man is happy?

Socrates: Most certainly not.

Polus: Then clearly, Socrates, you would say that you did not even know whether the great king was a happy man?

Socrates: And I should speak the truth; for I do not know how he stands in the matter of education and justice.

Polus: What! and does all happiness consist in this?

Socrates: Yes, indeed, Polus, that is my doctrine; the men and women who are gentle and good are also happy, as I maintain, and the unjust and evil are miserable.

Polus: Then, according to your doctrine, the said Archelaus is miserable?

Socrates: Yes, my friend, if he is wicked.

Polus: That he is wicked I cannot deny; for he had no title at all to the throne which he now occupies, he being only the son of a woman who was the slave of Alcetas the brother of Perdiccas; he himself therefore in strict right was the slave of Alcetas; and if he had meant to do rightly he would have remained his slave, and then, according to your doctrine, he would have been happy. But now he is unspeakably miserable, for he has been guilty of the greatest crimes: in the first place he invited his uncle and master, Alcetas, to come to him, under the pretence that he would restore to him the throne which Perdiccas has usurped, and after entertaining him and his son Alexander, who was his own cousin, and nearly of an age with him, and making them drunk, he threw them into a waggon and carried them off by night, and slew them, and got both of them out of the way; and when he had done all this wickedness he never discovered

that he was the most miserable of all men, and was very far from repenting: shall I tell you how he showed his remorse? he had a younger brother, a child of seven years old, who was the legitimate son of Perdiccas, and to him of right the kingdom belonged; Archelaus, however, had no mind to bring him up as he ought and restore the kingdom to him; that was not his notion of happiness; but not long afterwards he threw him into a well and drowned him, and declared to his mother Cleopatra that he had fallen in while running after a goose, and had been killed. And now as he is the greatest criminal of all the Macedonians, he may be supposed to be the most miserable and not the happiest of them, and I dare say that there are many Athenians, and you would be at the head of them, who would rather be any other Macedonian than Archelaus!

Socrates: I praised you at first, Polus, for being a rhetorician rather than a reasoner. And this, as I suppose, is the sort of argument with which you fancy that a child might refute me, and by which I stand refuted when I say that the unjust man is not happy. But, my good friend, where is the refutation? I cannot admit a word which you have been saying.

Polus: That is because you will not; for you surely must think as I do.

Socrates: Not so, my simple friend, but because you will refute me after the manner which rhetoricians practise in courts of law. For there the one party think that they refute the other when they bring forward a number of witnesses of good repute in proof of their allegations, and their adversary has only a single one or none at all. But this kind of proof is of no value where truth is the aim; a man may often be sworn down by a multitude of false witnesses who have a great air of respectability. And in this argument nearly every one, Athenian and stranger alike, would be on your side, if you should bring witnesses in disproof of my statement; — you may, if you will, summon Nicias the son of Niceratus, and let his brothers, who

gave the row of tripods which stand in the precincts of Dionysus, come with him; or you may summon Aristocrates, the son of Scellius, who is the giver of that famous offering which is at Delphi; summon, if you will, the whole house of Pericles, or any other great Athenian family whom you choose; — they will all agree with you: I only am left alone and cannot agree, for you do not convince me; although you produce many false witnesses against me, in the hope of depriving me of my inheritance, which is the truth. But I consider that nothing worth speaking of will have been effected by me unless I make you the one witness of my words; nor by you, unless you make me the one witness of yours; no matter about the rest of the world. For there are two ways of refutation, one which is yours and that of the world in general; but mine is of another sort — let us compare them, and see in what they differ. For, indeed, we are at issue about matters which to know is honourable and not to know disgraceful; to know or not to know happiness and misery — that is the chief of them. And what knowledge can be nobler? or what ignorance more disgraceful than this? And therefore I will begin by asking you whether you do not think that a man who is unjust and doing injustice can be happy, seeing that you think Archelaus unjust, and yet happy? May I assume this to be your opinion?

Polus: Certainly.

Socrates: But I say that this is an impossibility — here is one point about which we are at issue: — very good. And do you mean to say also that if he meets with retribution and punishment he will still be happy?

Polus: Certainly not; in that case he will be most miserable.

Socrates: On the other hand, if the unjust be not punished, then, according to you, he will be happy?

Polus: Yes.

Socrates: But in my opinion, Polus, the unjust or doer of unjust actions is miserable in any case, — more miserable, however, if he be not punished and does not meet with retribution, and less miserable if he be punished and meets with retribution at the hands of gods and men.

Polus: You are maintaining a strange doctrine, Socrates.

Socrates: I shall try to make you agree with me, O my friend, for as a friend I regard you. Then these are the points at issue between us — are they not? I was saying that to do is worse than to suffer injustice?

Polus: Exactly so.

Socrates: And you said the opposite?

Polus: Yes.

Socrates: I said also that the wicked are miserable, and you refuted me?

Polus: By Zeus, I did.

Socrates: In your own opinion, Polus.

Polus: Yes, and I rather suspect that I was in the right.

Socrates: You further said that the wrong-doer is happy if he be unpunished?

Polus: Certainly.

Socrates: And I affirm that he is most miserable, and that those who are punished are less miserable — are you going to refute this proposition also?

Polus: A proposition which is harder of refutation than the other, Socrates.

Socrates: Say rather, Polus, impossible; for who can refute the truth?

Polus: What do you mean? If a man is detected in an unjust attempt to make himself a tyrant, and when detected is racked,

mutilated, has his eyes burned out, and after having had all sorts of great injuries inflicted on him, and having seen his wife and children suffer the like, is at last impaled or tarred and burned alive, will he be happier than if he escape and become a tyrant, and continue all through life doing what he likes and holding the reins of government, the envy and admiration both of citizens and strangers? Is that the paradox which, as you say, cannot be refuted?

Socrates: There again, noble Polus, you are raising hobgoblins instead of refuting me; just now you were calling witnesses against me. But please to refresh my memory a little; did you say— 'in an unjust attempt to make himself a tyrant'?

Polus: Yes, I did.

Socrates: Then I say that neither of them will be happier than the other, — neither he who unjustly acquires a tyranny, nor he who suffers in the attempt, for of two miserables one cannot be the happier, but that he who escapes and becomes a tyrant is the more miserable of the two. Do you laugh, Polus? Well, this is a new kind of refutation, — when any one says anything, instead of refuting him to laugh at him.

Polus: But do you not think, Socrates, that you have been sufficiently refuted, when you say that which no human being will allow? Ask the company.

Socrates: O Polus, I am not a public man, and only last year, when my tribe were serving as Prytanes, and it became my duty as their president to take the votes, there was a laugh at me, because I was unable to take them. And as I failed then, you must not ask me to count the suffrages of the company now; but if, as I was saying, you have no better argument than numbers, let me have a turn, and do you make trial of the sort of proof which, as I think, is required; for I shall produce one witness only of the truth of my words, and he is the person with whom I am arguing; his suffrage I know how to take; but with the many

I have nothing to do, and do not even address myself to them. May I ask then whether you will answer in turn and have your words put to the proof? For I certainly think that I and you and every man do really believe, that to do is a greater evil than to suffer injustice: and not to be punished than to be punished.

Polus: And I should say neither I, nor any man: would you yourself, for example, suffer rather than do injustice?

Socrates: Yes, and you, too; I or any man would.

Polus: Quite the reverse; neither you, nor I, nor any man.

Socrates: But will you answer?

Polus: To be sure, I will; for I am curious to hear what you can have to say.

Socrates: Tell me, then, and you will know, and let us suppose that I am beginning at the beginning: which of the two, Polus, in your opinion, is the worst? — to do injustice or to suffer?

Polus: I should say that suffering was worst.

Socrates: And which is the greater disgrace? — Answer.

Polus: To do.

Socrates: And the greater disgrace is the greater evil?

Polus: Certainly not.

Socrates: I understand you to say, if I am not mistaken, that the honourable is not the same as the good, or the disgraceful as the evil?

Polus: Certainly not.

Socrates: Let me ask a question of you: When you speak of beautiful things, such as bodies, colours, figures, sounds, institutions, do you not call them beautiful in reference to some standard: bodies, for example, are beautiful in proportion as they are useful, or as the sight of them gives pleasure to the spectators; can you give any other account of personal beauty?

Polus: I cannot.

Socrates: And you would say of figures or colours generally that they were beautiful, either by reason of the pleasure which they give, or of their use, or of both?

Polus: Yes, I should.

Socrates: And you would call sounds and music beautiful for the same reason?

Polus: I should.

Socrates: Laws and institutions also have no beauty in them except in so far as they are useful or pleasant or both?

Polus: I think not.

Socrates: And may not the same be said of the beauty of knowledge?

Polus: To be sure, Socrates; and I very much approve of your measuring beauty by the standard of pleasure and utility.

Socrates: And deformity or disgrace may be equally measured by the opposite standard of pain and evil?

Polus: Certainly.

Socrates: Then when of two beautiful things one exceeds in beauty, the measure of the excess is to be taken in one or both of these; that is to say, in pleasure or utility or both?

Polus: Very true.

Socrates: And of two deformed things, that which exceeds in deformity or disgrace, exceeds either in pain or evil — must it not be so?

Polus: Yes.

Socrates: But then again, what was the observation which you just now made, about doing and suffering wrong? Did you not say, that suffering wrong was more evil, and doing wrong more disgraceful?

Polus: I did.

Socrates: Then, if doing wrong is more disgraceful than suffering, the more disgraceful must be more painful and must exceed in pain or in evil or both: does not that also follow?

Polus: Of course.

Socrates: First, then, let us consider whether the doing of injustice exceeds the suffering in the consequent pain: Do the injurers suffer more than the injured?

Polus: No, Socrates; certainly not.

Socrates: Then they do not exceed in pain?

Polus: No.

Socrates: But if not in pain, then not in both?

Polus: Certainly not.

Socrates: Then they can only exceed in the other?

Polus: Yes.

Socrates: That is to say, in evil?

Polus: True.

Socrates: Then doing injustice will have an excess of evil, and will therefore be a greater evil than suffering injustice?

Polus: Clearly.

Socrates: But have not you and the world already agreed that to do injustice is more disgraceful than to suffer?

Polus: Yes.

Socrates: And that is now discovered to be more evil?

Polus: True.

Socrates: And would you prefer a greater evil or a greater dishonour to a less one? Answer, Polus, and fear not; for you will come to no harm if you nobly resign yourself into the healing

hand of the argument as to a physician without shrinking, and either say ‘Yes’ or ‘No’ to me.

Polus: I should say ‘No.’

Socrates: Would any other man prefer a greater to a less evil?

Polus: No, not according to this way of putting the case, Socrates.

Socrates: Then I said truly, Polus, that neither you, nor I, nor any man, would rather do than suffer injustice; for to do injustice is the greater evil of the two.

Polus: That is the conclusion.

Socrates: You see, Polus, when you compare the two kinds of refutations, how unlike they are. All men, with the exception of myself, are of your way of thinking; but your single assent and witness are enough for me, — I have no need of any other, I take your suffrage, and am regardless of the rest. Enough of this, and now let us proceed to the next question; which is, Whether the greatest of evils to a guilty man is to suffer punishment, as you supposed, or whether to escape punishment is not a greater evil, as I supposed. Consider: — You would say that to suffer punishment is another name for being justly corrected when you do wrong?

Polus: I should.

Socrates: And would you not allow that all just things are honourable in so far as they are just? Please to reflect, and tell me your opinion.

Polus: Yes, Socrates, I think that they are.

Socrates: Consider again: — Where there is an agent, must there not also be a patient?

Polus: I should say so.

Socrates: And will not the patient suffer that which the agent does, and will not the suffering have the quality of the action? I

mean, for example, that if a man strikes, there must be something which is stricken?

Polus: Yes.

Socrates: And if the striker strikes violently or quickly, that which is struck will be struck violently or quickly?

Polus: True.

Socrates: And the suffering to him who is stricken is of the same nature as the act of him who strikes?

Polus: Yes.

Socrates: And if a man burns, there is something which is burned?

Polus: Certainly.

Socrates: And if he burns in excess or so as to cause pain, the thing burned will be burned in the same way?

Polus: Truly.

Socrates: And if he cuts, the same argument holds — there will be something cut?

Polus: Yes.

Socrates: And if the cutting be great or deep or such as will cause pain, the cut will be of the same nature?

Polus: That is evident.

Socrates: Then you would agree generally to the universal proposition which I was just now asserting: that the affection of the patient answers to the affection of the agent?

Polus: I agree.

Socrates: Then, as this is admitted, let me ask whether being punished is suffering or acting?

Polus: Suffering, Socrates; there can be no doubt of that.

Socrates: And suffering implies an agent?

Polus: Certainly, Socrates; and he is the punisher.

Socrates: And he who punishes rightly, punishes justly?

Polus: Yes.

Socrates: And therefore he acts justly?

Polus: Justly.

Socrates: Then he who is punished and suffers retribution, suffers justly?

Polus: That is evident.

Socrates: And that which is just has been admitted to be honourable?

Polus: Certainly.

Socrates: Then the punisher does what is honourable, and the punished suffers what is honourable?

Polus: True.

Socrates: And if what is honourable, then what is good, for the honourable is either pleasant or useful?

Polus: Certainly.

Socrates: Then he who is punished suffers what is good?

Polus: That is true.

Socrates: Then he is benefited?

Polus: Yes.

Socrates: Do I understand you to mean what I mean by the term ‘benefited’? I mean, that if he be justly punished his soul is improved.

Polus: Surely.

Socrates: Then he who is punished is delivered from the evil of his soul?

Polus: Yes.

Socrates: And is he not then delivered from the greatest evil? Look at the matter in this way: — In respect of a man's estate, do you see any greater evil than poverty?

Polus: There is no greater evil.

Socrates: Again, in a man's bodily frame, you would say that the evil is weakness and disease and deformity?

Polus: I should.

Socrates: And do you not imagine that the soul likewise has some evil of her own?

Polus: Of course.

Socrates: And this you would call injustice and ignorance and cowardice, and the like?

Polus: Certainly.

Socrates: So then, in mind, body, and estate, which are three, you have pointed out three corresponding evils — injustice, disease, poverty?

Polus: True.

Socrates: And which of the evils is the most disgraceful? — Is not the most disgraceful of them injustice, and in general the evil of the soul?

Polus: By far the most.

Socrates: And if the most disgraceful, then also the worst?

Polus: What do you mean, Socrates?

Socrates: I mean to say, that is most disgraceful has been already admitted to be most painful or hurtful, or both.

Polus: Certainly.

Socrates: And now injustice and all evil in the soul has been admitted by us to be most disgraceful?

Polus: It has been admitted.

Socrates: And most disgraceful either because most painful and causing excessive pain, or most hurtful, or both?

Polus: Certainly.

Socrates: And therefore to be unjust and intemperate, and cowardly and ignorant, is more painful than to be poor and sick?

Polus: Nay, Socrates; the painfulness does not appear to me to follow from your premises.

Socrates: Then, if, as you would argue, not more painful, the evil of the soul is of all evils the most disgraceful; and the excess of disgrace must be caused by some preternatural greatness, or extraordinary hurtfulness of the evil.

Polus: Clearly.

Socrates: And that which exceeds most in hurtfulness will be the greatest of evils?

Polus: Yes.

Socrates: Then injustice and intemperance, and in general the depravity of the soul, are the greatest of evils?

Polus: That is evident.

Socrates: Now, what art is there which delivers us from poverty? Does not the art of making money?

Polus: Yes.

Socrates: And what art frees us from disease? Does not the art of medicine?

Polus: Very true.

Socrates: And what from vice and injustice? If you are not able to answer at once, ask yourself whither we go with the sick, and to whom we take them.

Polus: To the physicians, Socrates.

Socrates: And to whom do we go with the unjust and intemperate?

Polus: To the judges, you mean.

Socrates: — Who are to punish them?

Polus: Yes.

Socrates: And do not those who rightly punish others, punish them in accordance with a certain rule of justice?

Polus: Clearly.

Socrates: Then the art of money-making frees a man from poverty; medicine from disease; and justice from intemperance and injustice?

Polus: That is evident.

Socrates: Which, then, is the best of these three?

Polus: Will you enumerate them?

Socrates: Money-making, medicine, and justice.

Polus: Justice, Socrates, far excels the two others.

Socrates: And justice, if the best, gives the greatest pleasure or advantage or both?

Polus: Yes.

Socrates: But is the being healed a pleasant thing, and are those who are being healed pleased?

Polus: I think not.

Socrates: A useful thing, then?

Polus: Yes.

Socrates: Yes, because the patient is delivered from a great evil; and this is the advantage of enduring the pain — that you get well?

Polus: Certainly.

Socrates: And would he be the happier man in his bodily condition, who is healed, or who never was out of health?

Polus: Clearly he who was never out of health.

Socrates: Yes; for happiness surely does not consist in being delivered from evils, but in never having had them.

Polus: True.

Socrates: And suppose the case of two persons who have some evil in their bodies, and that one of them is healed and delivered from evil, and another is not healed, but retains the evil — which of them is the most miserable?

Polus: Clearly he who is not healed.

Socrates: And was not punishment said by us to be a deliverance from the greatest of evils, which is vice?

Polus: True.

Socrates: And justice punishes us, and makes us more just, and is the medicine of our vice?

Polus: True.

Socrates: He, then, has the first place in the scale of happiness who has never had vice in his soul; for this has been shown to be the greatest of evils.

Polus: Clearly.

Socrates: And he has the second place, who is delivered from vice?

Polus: True.

Socrates: That is to say, he who receives admonition and rebuke and punishment?

Polus: Yes.

Socrates: Then he lives worst, who, having been unjust, has no deliverance from injustice?

Polus: Certainly.

Socrates: That is, he lives worst who commits the greatest crimes, and who, being the most unjust of men, succeeds in escaping rebuke or correction or punishment; and this, as you say, has been accomplished by Archelaus and other tyrants and rhetoricians and potentates? (Compare Republic.)

Polus: True.

Socrates: May not their way of proceeding, my friend, be compared to the conduct of a person who is afflicted with the worst of diseases and yet contrives not to pay the penalty to the physician for his sins against his constitution, and will not be cured, because, like a child, he is afraid of the pain of being burned or cut: — Is not that a parallel case?

Polus: Yes, truly.

Socrates: He would seem as if he did not know the nature of health and bodily vigour; and if we are right, Polus, in our previous conclusions, they are in a like case who strive to evade justice, which they see to be painful, but are blind to the advantage which ensues from it, not knowing how far more miserable a companion a diseased soul is than a diseased body; a soul, I say, which is corrupt and unrighteous and unholy. And hence they do all that they can to avoid punishment and to avoid being released from the greatest of evils; they provide themselves with money and friends, and cultivate to the utmost their powers of persuasion. But if we, Polus, are right, do you see what follows, or shall we draw out the consequences in form?

Polus: If you please.

Socrates: Is it not a fact that injustice, and the doing of injustice, is the greatest of evils?

Polus: That is quite clear.

Socrates: And further, that to suffer punishment is the way to be released from this evil?

Polus: True.

Socrates: And not to suffer, is to perpetuate the evil?

Polus: Yes.

Socrates: To do wrong, then, is second only in the scale of evils; but to do wrong and not to be punished, is first and greatest of all?

Polus: That is true.

Socrates: Well, and was not this the point in dispute, my friend? You deemed Archelaus happy, because he was a very great criminal and unpunished: I, on the other hand, maintained that he or any other who like him has done wrong and has not been punished, is, and ought to be, the most miserable of all men; and that the doer of injustice is more miserable than the sufferer; and he who escapes punishment, more miserable than he who suffers. — Was not that what I said?

Polus: Yes.

Socrates: And it has been proved to be true?

Polus: Certainly.

Socrates: Well, Polus, but if this is true, where is the great use of rhetoric? If we admit what has been just now said, every man ought in every way to guard himself against doing wrong, for he will thereby suffer great evil?

Polus: True.

Socrates: And if he, or any one about whom he cares, does wrong, he ought of his own accord to go where he will be immediately punished; he will run to the judge, as he would to the physician, in order that the disease of injustice may not be rendered chronic and become the incurable cancer of the soul; must we not allow this consequence, Polus, if our former

admissions are to stand: — is any other inference consistent with them?

Polus: To that, Socrates, there can be but one answer.

Socrates: Then rhetoric is of no use to us, Polus, in helping a man to excuse his own injustice, that of his parents or friends, or children or country; but may be of use to any one who holds that instead of excusing he ought to accuse — himself above all, and in the next degree his family or any of his friends who may be doing wrong; he should bring to light the iniquity and not conceal it, that so the wrong-doer may suffer and be made whole; and he should even force himself and others not to shrink, but with closed eyes like brave men to let the physician operate with knife or searing iron, not regarding the pain, in the hope of attaining the good and the honourable; let him who has done things worthy of stripes, allow himself to be scourged, if of bonds, to be bound, if of a fine, to be fined, if of exile, to be exiled, if of death, to die, himself being the first to accuse himself and his own relations, and using rhetoric to this end, that his and their unjust actions may be made manifest, and that they themselves may be delivered from injustice, which is the greatest evil. Then, Polus, rhetoric would indeed be useful. Do you say ‘Yes’ or ‘No’ to that?

Polus: To me, Socrates, what you are saying appears very strange, though probably in agreement with your premises.

Socrates: Is not this the conclusion, if the premises are not disproven?

Polus: Yes; it certainly is.

Socrates: And from the opposite point of view, if indeed it be our duty to harm another, whether an enemy or not — I except the case of self-defence — then I have to be upon my guard — but if my enemy injures a third person, then in every sort of way, by word as well as deed, I should try to prevent his being punished, or appearing before the judge; and if he appears, I should

contrive that he should escape, and not suffer punishment: if he has stolen a sum of money, let him keep what he has stolen and spend it on him and his, regardless of religion and justice; and if he have done things worthy of death, let him not die, but rather be immortal in his wickedness; or, if this is not possible, let him at any rate be allowed to live as long as he can. For such purposes, Polus, rhetoric may be useful, but is of small if of any use to him who is not intending to commit injustice; at least, there was no such use discovered by us in the previous discussion.

Callicles: Tell me, Chaerephon, is Socrates in earnest, or is he joking?

Chaerephon: I should say, Callicles, that he is in most profound earnest; but you may well ask him.

Callicles: By the gods, and I will. Tell me, Socrates, are you in earnest, or only in jest? For if you are in earnest, and what you say is true, is not the whole of human life turned upside down; and are we not doing, as would appear, in everything the opposite of what we ought to be doing?

Socrates: O Callicles, if there were not some community of feelings among mankind, however varying in different persons — I mean to say, if every man's feelings were peculiar to himself and were not shared by the rest of his species — I do not see how we could ever communicate our impressions to one another. I make this remark because I perceive that you and I have a common feeling. For we are lovers both, and both of us have two loves apiece: — I am the lover of Alcibiades, the son of Cleinias, and of philosophy; and you of the Athenian Demus, and of Demus the son of Pyrilampes. Now, I observe that you, with all your cleverness, do not venture to contradict your favourite in any word or opinion of his; but as he changes you change, backwards and forwards. When the Athenian Demus denies anything that you are saying in the assembly, you go over to his opinion; and you do the same with Demus, the fair young son of

Pyrilampes. For you have not the power to resist the words and ideas of your loves; and if a person were to express surprise at the strangeness of what you say from time to time when under their influence, you would probably reply to him, if you were honest, that you cannot help saying what your loves say unless they are prevented; and that you can only be silent when they are. Now you must understand that my words are an echo too, and therefore you need not wonder at me; but if you want to silence me, silence philosophy, who is my love, for she is always telling me what I am now telling you, my friend; neither is she capricious like my other love, for the son of Cleinias says one thing to-day and another thing to-morrow, but philosophy is always true. She is the teacher at whose words you are now wondering, and you have heard her yourself. Her you must refute, and either show, as I was saying, that to do injustice and to escape punishment is not the worst of all evils; or, if you leave her word unrefuted, by the dog the god of Egypt, I declare, O Callicles, that Callicles will never be at one with himself, but that his whole life will be a discord. And yet, my friend, I would rather that my lyre should be inharmonious, and that there should be no music in the chorus which I provided; aye, or that the whole world should be at odds with me, and oppose me, rather than that I myself should be at odds with myself, and contradict myself.

Callicles: O Socrates, you are a regular declaimer, and seem to be running riot in the argument. And now you are declaiming in this way because Polus has fallen into the same error himself of which he accused Gorgias: — for he said that when Gorgias was asked by you, whether, if some one came to him who wanted to learn rhetoric, and did not know justice, he would teach him justice, Gorgias in his modesty replied that he would, because he thought that mankind in general would be displeased if he answered ‘No’; and then in consequence of this admission, Gorgias was compelled to contradict himself, that being just the sort of thing in which you delight. Whereupon Polus laughed at

you deservedly, as I think; but now he has himself fallen into the same trap. I cannot say very much for his wit when he conceded to you that to do is more dishonourable than to suffer injustice, for this was the admission which led to his being entangled by you; and because he was too modest to say what he thought, he had his mouth stopped. For the truth is, Socrates, that you, who pretend to be engaged in the pursuit of truth, are appealing now to the popular and vulgar notions of right, which are not natural, but only conventional. Convention and nature are generally at variance with one another: and hence, if a person is too modest to say what he thinks, he is compelled to contradict himself; and you, in your ingenuity perceiving the advantage to be thereby gained, slyly ask of him who is arguing conventionally a question which is to be determined by the rule of nature; and if he is talking of the rule of nature, you slip away to custom: as, for instance, you did in this very discussion about doing and suffering injustice. When Polus was speaking of the conventionally dishonourable, you assailed him from the point of view of nature; for by the rule of nature, to suffer injustice is the greater disgrace because the greater evil; but conventionally, to do evil is the more disgraceful. For the suffering of injustice is not the part of a man, but of a slave, who indeed had better die than live; since when he is wronged and trampled upon, he is unable to help himself, or any other about whom he cares. The reason, as I conceive, is that the makers of laws are the majority who are weak; and they make laws and distribute praises and censures with a view to themselves and to their own interests; and they terrify the stronger sort of men, and those who are able to get the better of them, in order that they may not get the better of them; and they say, that dishonesty is shameful and unjust; meaning, by the word injustice, the desire of a man to have more than his neighbours; for knowing their own inferiority, I suspect that they are too glad of equality. And therefore the endeavour to have more than the many, is conventionally said to be shameful and unjust, and is called

injustice (compare Republic), whereas nature herself intimates that it is just for the better to have more than the worse, the more powerful than the weaker; and in many ways she shows, among men as well as among animals, and indeed among whole cities and races, that justice consists in the superior ruling over and having more than the inferior. For on what principle of justice did Xerxes invade Hellas, or his father the Scythians? (not to speak of numberless other examples). Nay, but these are the men who act according to nature; yes, by Heaven, and according to the law of nature: not, perhaps, according to that artificial law, which we invent and impose upon our fellows, of whom we take the best and strongest from their youth upwards, and tame them like young lions, — charming them with the sound of the voice, and saying to them, that with equality they must be content, and that the equal is the honourable and the just. But if there were a man who had sufficient force, he would shake off and break through, and escape from all this; he would trample under foot all our formulas and spells and charms, and all our laws which are against nature: the slave would rise in rebellion and be lord over us, and the light of natural justice would shine forth. And this I take to be the sentiment of Pindar, when he says in his poem, that

‘Law is the king of all, of mortals as well as of immortals;’

this, as he says,

‘Makes might to be right, doing violence with highest hand; as I infer from the deeds of Heracles, for without buying them—’ (Fragm. Incert. 151 (Bockh).) — I do not remember the exact words, but the meaning is, that without buying them, and without their being given to him, he carried off the oxen of Geryon, according to the law of natural right, and that the oxen and other possessions of the weaker and inferior properly belong to the stronger and superior. And this is true, as you may ascertain, if you will leave philosophy and go on to higher things: for philosophy, Socrates, if pursued in moderation and at

the proper age, is an elegant accomplishment, but too much philosophy is the ruin of human life. Even if a man has good parts, still, if he carries philosophy into later life, he is necessarily ignorant of all those things which a gentleman and a person of honour ought to know; he is inexperienced in the laws of the State, and in the language which ought to be used in the dealings of man with man, whether private or public, and utterly ignorant of the pleasures and desires of mankind and of human character in general. And people of this sort, when they betake themselves to politics or business, are as ridiculous as I imagine the politicians to be, when they make their appearance in the arena of philosophy. For, as Euripides says,

‘Every man shines in that and pursues that, and devotes the greatest portion of the day to that in which he most excels,’ (Antiope, fragm. 20 (Dindorf).)

but anything in which he is inferior, he avoids and depreciates, and praises the opposite from partiality to himself, and because he thinks that he will thus praise himself. The true principle is to unite them. Philosophy, as a part of education, is an excellent thing, and there is no disgrace to a man while he is young in pursuing such a study; but when he is more advanced in years, the thing becomes ridiculous, and I feel towards philosophers as I do towards those who lisp and imitate children. For I love to see a little child, who is not of an age to speak plainly, lisping at his play; there is an appearance of grace and freedom in his utterance, which is natural to his childish years. But when I hear some small creature carefully articulating its words, I am offended; the sound is disagreeable, and has to my ears the twang of slavery. So when I hear a man lisping, or see him playing like a child, his behaviour appears to me ridiculous and unmanly and worthy of stripes. And I have the same feeling about students of philosophy; when I see a youth thus engaged, — the study appears to me to be in character, and becoming a man of liberal education, and him who neglects philosophy I

regard as an inferior man, who will never aspire to anything great or noble. But if I see him continuing the study in later life, and not leaving off, I should like to beat him, Socrates; for, as I was saying, such a one, even though he have good natural parts, becomes effeminate. He flies from the busy centre and the market-place, in which, as the poet says, men become distinguished; he creeps into a corner for the rest of his life, and talks in a whisper with three or four admiring youths, but never speaks out like a freeman in a satisfactory manner. Now I, Socrates, am very well inclined towards you, and my feeling may be compared with that of Zethus towards Amphion, in the play of Euripides, whom I was mentioning just now: for I am disposed to say to you much what Zethus said to his brother, that you, Socrates, are careless about the things of which you ought to be careful; and that you

‘Who have a soul so noble, are remarkable for a puerile exterior;
Neither in a court of justice could you state a case, or give any reason or proof,
Or offer valiant counsel on another’s behalf.’

And you must not be offended, my dear Socrates, for I am speaking out of good-will towards you, if I ask whether you are not ashamed of being thus defenceless; which I affirm to be the condition not of you only but of all those who will carry the study of philosophy too far. For suppose that some one were to take you, or any one of your sort, off to prison, declaring that you had done wrong when you had done no wrong, you must allow that you would not know what to do: — there you would stand giddy and gaping, and not having a word to say; and when you went up before the Court, even if the accuser were a poor creature and not good for much, you would die if he were disposed to claim the penalty of death. And yet, Socrates, what is the value of

‘An art which converts a man of sense into a fool,’

who is helpless, and has no power to save either himself or others, when he is in the greatest danger and is going to be

despoiled by his enemies of all his goods, and has to live, simply deprived of his rights of citizenship? — he being a man who, if I may use the expression, may be boxed on the ears with impunity. Then, my good friend, take my advice, and refute no more:

‘Learn the philosophy of business, and acquire the reputation of wisdom. But leave to others these niceties,’

whether they are to be described as follies or absurdities:

‘For they will only Give you poverty for the inmate of your dwelling.’

Cease, then, emulating these paltry splitters of words, and emulate only the man of substance and honour, who is well to do.

Socrates: If my soul, Callicles, were made of gold, should I not rejoice to discover one of those stones with which they test gold, and the very best possible one to which I might bring my soul; and if the stone and I agreed in approving of her training, then I should know that I was in a satisfactory state, and that no other test was needed by me.

Callicles: What is your meaning, Socrates?

Socrates: I will tell you; I think that I have found in you the desired touchstone.

Callicles: Why?

Socrates: Because I am sure that if you agree with me in any of the opinions which my soul forms, I have at last found the truth indeed. For I consider that if a man is to make a complete trial of the good or evil of the soul, he ought to have three qualities — knowledge, good-will, outspokenness, which are all possessed by you. Many whom I meet are unable to make trial of me, because they are not wise as you are; others are wise, but they will not tell me the truth, because they have not the same interest in me which you have; and these two strangers, Gorgias

and Polus, are undoubtedly wise men and my very good friends, but they are not outspoken enough, and they are too modest. Why, their modesty is so great that they are driven to contradict themselves, first one and then the other of them, in the face of a large company, on matters of the highest moment. But you have all the qualities in which these others are deficient, having received an excellent education; to this many Athenians can testify. And you are my friend. Shall I tell you why I think so? I know that you, Callicles, and Tisander of Aphidnae, and Andron the son of Androtion, and Nausicydes of the deme of Cholarges, studied together: there were four of you, and I once heard you advising with one another as to the extent to which the pursuit of philosophy should be carried, and, as I know, you came to the conclusion that the study should not be pushed too much into detail. You were cautioning one another not to be overwise; you were afraid that too much wisdom might unconsciously to yourselves be the ruin of you. And now when I hear you giving the same advice to me which you then gave to your most intimate friends, I have a sufficient evidence of your real good-will to me. And of the frankness of your nature and freedom from modesty I am assured by yourself, and the assurance is confirmed by your last speech. Well then, the inference in the present case clearly is, that if you agree with me in an argument about any point, that point will have been sufficiently tested by us, and will not require to be submitted to any further test. For you could not have agreed with me, either from lack of knowledge or from superfluity of modesty, nor yet from a desire to deceive me, for you are my friend, as you tell me yourself. And therefore when you and I are agreed, the result will be the attainment of perfect truth. Now there is no nobler enquiry, Callicles, than that which you censure me for making, — What ought the character of a man to be, and what his pursuits, and how far is he to go, both in maturer years and in youth? For be assured that if I err in my own conduct I do not err intentionally, but from ignorance. Do not then desist from

advising me, now that you have begun, until I have learned clearly what this is which I am to practise, and how I may acquire it. And if you find me assenting to your words, and hereafter not doing that to which I assented, call me 'dolt,' and deem me unworthy of receiving further instruction. Once more, then, tell me what you and Pindar mean by natural justice: Do you not mean that the superior should take the property of the inferior by force; that the better should rule the worse, the noble have more than the mean? Am I not right in my recollection?

Callicles: Yes; that is what I was saying, and so I still aver.

Socrates: And do you mean by the better the same as the superior? for I could not make out what you were saying at the time — whether you meant by the superior the stronger, and that the weaker must obey the stronger, as you seemed to imply when you said that great cities attack small ones in accordance with natural right, because they are superior and stronger, as though the superior and stronger and better were the same; or whether the better may be also the inferior and weaker, and the superior the worse, or whether better is to be defined in the same way as superior: — this is the point which I want to have cleared up. Are the superior and better and stronger the same or different?

Callicles: I say unequivocally that they are the same.

Socrates: Then the many are by nature superior to the one, against whom, as you were saying, they make the laws?

Callicles: Certainly.

Socrates: Then the laws of the many are the laws of the superior?

Callicles: Very true.

Socrates: Then they are the laws of the better; for the superior class are far better, as you were saying?

Callicles: Yes.

Socrates: And since they are superior, the laws which are made by them are by nature good?

Callicles: Yes.

Socrates: And are not the many of opinion, as you were lately saying, that justice is equality, and that to do is more disgraceful than to suffer injustice? — is that so or not? Answer, Callicles, and let no modesty be found to come in the way; do the many think, or do they not think thus? — I must beg of you to answer, in order that if you agree with me I may fortify myself by the assent of so competent an authority.

Callicles: Yes; the opinion of the many is what you say.

Socrates: Then not only custom but nature also affirms that to do is more disgraceful than to suffer injustice, and that justice is equality; so that you seem to have been wrong in your former assertion, when accusing me you said that nature and custom are opposed, and that I, knowing this, was dishonestly playing between them, appealing to custom when the argument is about nature, and to nature when the argument is about custom?

Callicles: This man will never cease talking nonsense. At your age, Socrates, are you not ashamed to be catching at words and chuckling over some verbal slip? do you not see — have I not told you already, that by superior I mean better: do you imagine me to say, that if a rabble of slaves and nondescripts, who are of no use except perhaps for their physical strength, get together, their ipsissima verba are laws?

Socrates: Ho! my philosopher, is that your line?

Callicles: Certainly.

Socrates: I was thinking, Callicles, that something of the kind must have been in your mind, and that is why I repeated the question, — What is the superior? I wanted to know clearly what you meant; for you surely do not think that two men are better

than one, or that your slaves are better than you because they are stronger? Then please to begin again, and tell me who the better are, if they are not the stronger; and I will ask you, great Sir, to be a little milder in your instructions, or I shall have to run away from you.

Callicles: You are ironical.

Socrates: No, by the hero Zethus, Callicles, by whose aid you were just now saying many ironical things against me, I am not: — tell me, then, whom you mean, by the better?

Callicles: I mean the more excellent.

Socrates: Do you not see that you are yourself using words which have no meaning and that you are explaining nothing? — will you tell me whether you mean by the better and superior the wiser, or if not, whom?

Callicles: Most assuredly, I do mean the wiser.

Socrates: Then according to you, one wise man may often be superior to ten thousand fools, and he ought to rule them, and they ought to be his subjects, and he ought to have more than they should. This is what I believe that you mean (and you must not suppose that I am word-catching), if you allow that the one is superior to the ten thousand?

Callicles: Yes; that is what I mean, and that is what I conceive to be natural justice — that the better and wiser should rule and have more than the inferior.

Socrates: Stop there, and let me ask you what you would say in this case: Let us suppose that we are all together as we are now; there are several of us, and we have a large common store of meats and drinks, and there are all sorts of persons in our company having various degrees of strength and weakness, and one of us, being a physician, is wiser in the matter of food than all the rest, and he is probably stronger than some and not so strong as others of us — will he not, being wiser, be also better

than we are, and our superior in this matter of food?

Callicles: Certainly.

Socrates: Either, then, he will have a larger share of the meats and drinks, because he is better, or he will have the distribution of all of them by reason of his authority, but he will not expend or make use of a larger share of them on his own person, or if he does, he will be punished; — his share will exceed that of some, and be less than that of others, and if he be the weakest of all, he being the best of all will have the smallest share of all, Callicles: — am I not right, my friend?

Callicles: You talk about meats and drinks and physicians and other nonsense; I am not speaking of them.

Socrates: Well, but do you admit that the wiser is the better? Answer 'Yes' or 'No.'

Callicles: Yes.

Socrates: And ought not the better to have a larger share?

Callicles: Not of meats and drinks.

Socrates: I understand: then, perhaps, of coats — the skilfullest weaver ought to have the largest coat, and the greatest number of them, and go about clothed in the best and finest of them?

Callicles: Fudge about coats!

Socrates: Then the skilfullest and best in making shoes ought to have the advantage in shoes; the shoemaker, clearly, should walk about in the largest shoes, and have the greatest number of them?

Callicles: Fudge about shoes! What nonsense are you talking?

Socrates: Or, if this is not your meaning, perhaps you would say that the wise and good and true husbandman should actually have a larger share of seeds, and have as much seed as possible for his own land?

Callicles: How you go on, always talking in the same way, Socrates!

Socrates: Yes, Callicles, and also about the same things.

Callicles: Yes, by the Gods, you are literally always talking of cobblers and fullers and cooks and doctors, as if this had to do with our argument.

Socrates: But why will you not tell me in what a man must be superior and wiser in order to claim a larger share; will you neither accept a suggestion, nor offer one?

Callicles: I have already told you. In the first place, I mean by superiors not cobblers or cooks, but wise politicians who understand the administration of a state, and who are not only wise, but also valiant and able to carry out their designs, and not the men to faint from want of soul.

Socrates: See now, most excellent Callicles, how different my charge against you is from that which you bring against me, for you reproach me with always saying the same; but I reproach you with never saying the same about the same things, for at one time you were defining the better and the superior to be the stronger, then again as the wiser, and now you bring forward a new notion; the superior and the better are now declared by you to be the more courageous: I wish, my good friend, that you would tell me, once for all, whom you affirm to be the better and superior, and in what they are better?

Callicles: I have already told you that I mean those who are wise and courageous in the administration of a state — they ought to be the rulers of their states, and justice consists in their having more than their subjects.

Socrates: But whether rulers or subjects will they or will they not have more than themselves, my friend?

Callicles: What do you mean?

Socrates: I mean that every man is his own ruler; but perhaps you think that there is no necessity for him to rule himself; he is only required to rule others?

Callicles: What do you mean by his ‘ruling over himself’?

Socrates: A simple thing enough; just what is commonly said, that a man should be temperate and master of himself, and ruler of his own pleasures and passions.

Callicles: What innocence! you mean those fools, — the temperate?

Socrates: Certainly: — any one may know that to be my meaning.

Callicles: Quite so, Socrates; and they are really fools, for how can a man be happy who is the servant of anything? On the contrary, I plainly assert, that he who would truly live ought to allow his desires to wax to the uttermost, and not to chastise them; but when they have grown to their greatest he should have courage and intelligence to minister to them and to satisfy all his longings. And this I affirm to be natural justice and nobility. To this however the many cannot attain; and they blame the strong man because they are ashamed of their own weakness, which they desire to conceal, and hence they say that intemperance is base. As I have remarked already, they enslave the nobler natures, and being unable to satisfy their pleasures, they praise temperance and justice out of their own cowardice. For if a man had been originally the son of a king, or had a nature capable of acquiring an empire or a tyranny or sovereignty, what could be more truly base or evil than temperance — to a man like him, I say, who might freely be enjoying every good, and has no one to stand in his way, and yet has admitted custom and reason and the opinion of other men to be lords over him? — must not he be in a miserable plight whom the reputation of justice and temperance hinders from giving more to his friends than to his enemies, even though he be a

ruler in his city? Nay, Socrates, for you profess to be a votary of the truth, and the truth is this: — that luxury and intemperance and licence, if they be provided with means, are virtue and happiness — all the rest is a mere bauble, agreements contrary to nature, foolish talk of men, nothing worth. (Compare Republic.)

Socrates: There is a noble freedom, Callicles, in your way of approaching the argument; for what you say is what the rest of the world think, but do not like to say. And I must beg of you to persevere, that the true rule of human life may become manifest. Tell me, then: — you say, do you not, that in the rightly-developed man the passions ought not to be controlled, but that we should let them grow to the utmost and somehow or other satisfy them, and that this is virtue?

Callicles: Yes; I do.

Socrates: Then those who want nothing are not truly said to be happy?

Callicles: No indeed, for then stones and dead men would be the happiest of all.

Socrates: But surely life according to your view is an awful thing; and indeed I think that Euripides may have been right in saying,

'Who knows if life be not death and death life;'

and that we are very likely dead; I have heard a philosopher say that at this moment we are actually dead, and that the body (soma) is our tomb (sema (compare Phaedr.)), and that the part of the soul which is the seat of the desires is liable to be tossed about by words and blown up and down; and some ingenious person, probably a Sicilian or an Italian, playing with the word, invented a tale in which he called the soul — because of its believing and make-believe nature — a vessel (An untranslatable pun, — dia to pithanon te kai pistikon onomase pithon.), and the ignorant he called the uninitiated or leaky, and the place in the

souls of the uninitiated in which the desires are seated, being the intemperate and incontinent part, he compared to a vessel full of holes, because it can never be satisfied. He is not of your way of thinking, Callicles, for he declares, that of all the souls in Hades, meaning the invisible world (aeides), these uninitiated or leaky persons are the most miserable, and that they pour water into a vessel which is full of holes out of a colander which is similarly perforated. The colander, as my informer assures me, is the soul, and the soul which he compares to a colander is the soul of the ignorant, which is likewise full of holes, and therefore incontinent, owing to a bad memory and want of faith. These notions are strange enough, but they show the principle which, if I can, I would fain prove to you; that you should change your mind, and, instead of the intemperate and insatiate life, choose that which is orderly and sufficient and has a due provision for daily needs. Do I make any impression on you, and are you coming over to the opinion that the orderly are happier than the intemperate? Or do I fail to persuade you, and, however many tales I rehearse to you, do you continue of the same opinion still?

Callicles: The latter, Socrates, is more like the truth.

Socrates: Well, I will tell you another image, which comes out of the same school: — Let me request you to consider how far you would accept this as an account of the two lives of the temperate and intemperate in a figure: — There are two men, both of whom have a number of casks; the one man has his casks sound and full, one of wine, another of honey, and a third of milk, besides others filled with other liquids, and the streams which fill them are few and scanty, and he can only obtain them with a great deal of toil and difficulty; but when his casks are once filled he has no need to feed them any more, and has no further trouble with them or care about them. The other, in like manner, can procure streams, though not without difficulty; but his vessels are leaky and unsound, and night and day he is

compelled to be filling them, and if he pauses for a moment, he is in an agony of pain. Such are their respective lives: — And now would you say that the life of the intemperate is happier than that of the temperate? Do I not convince you that the opposite is the truth?

Callicles: You do not convince me, Socrates, for the one who has filled himself has no longer any pleasure left; and this, as I was just now saying, is the life of a stone: he has neither joy nor sorrow after he is once filled; but the pleasure depends on the superabundance of the influx.

Socrates: But the more you pour in, the greater the waste; and the holes must be large for the liquid to escape.

Callicles: Certainly.

Socrates: The life which you are now depicting is not that of a dead man, or of a stone, but of a cormorant; you mean that he is to be hungering and eating?

Callicles: Yes.

Socrates: And he is to be thirsting and drinking?

Callicles: Yes, that is what I mean; he is to have all his desires about him, and to be able to live happily in the gratification of them.

Socrates: Capital, excellent; go on as you have begun, and have no shame; I, too, must disencumber myself of shame: and first, will you tell me whether you include itching and scratching, provided you have enough of them and pass your life in scratching, in your notion of happiness?

Callicles: What a strange being you are, Socrates! a regular mob-orator.

Socrates: That was the reason, Callicles, why I scared Polus and Gorgias, until they were too modest to say what they thought; but you will not be too modest and will not be scared, for you are a brave man. And now, answer my question.

Callicles: I answer, that even the scratcher would live pleasantly.

Socrates: And if pleasantly, then also happily?

Callicles: To be sure.

Socrates: But what if the itching is not confined to the head? Shall I pursue the question? And here, Callicles, I would have you consider how you would reply if consequences are pressed upon you, especially if in the last resort you are asked, whether the life of a catamite is not terrible, foul, miserable? Or would you venture to say, that they too are happy, if they only get enough of what they want?

Callicles: Are you not ashamed, Socrates, of introducing such topics into the argument?

Socrates: Well, my fine friend, but am I the introducer of these topics, or he who says without any qualification that all who feel pleasure in whatever manner are happy, and who admits of no distinction between good and bad pleasures? And I would still ask, whether you say that pleasure and good are the same, or whether there is some pleasure which is not a good?

Callicles: Well, then, for the sake of consistency, I will say that they are the same.

Socrates: You are breaking the original agreement, Callicles, and will no longer be a satisfactory companion in the search after truth, if you say what is contrary to your real opinion.

Callicles: Why, that is what you are doing too, Socrates.

Socrates: Then we are both doing wrong. Still, my dear friend, I would ask you to consider whether pleasure, from whatever source derived, is the good; for, if this be true, then the disagreeable consequences which have been darkly intimated must follow, and many others.

Callicles: That, Socrates, is only your opinion.

Socrates: And do you, Callicles, seriously maintain what you are saying?

Callicles: Indeed I do.

Socrates: Then, as you are in earnest, shall we proceed with the argument?

Callicles: By all means. (Or, ‘I am in profound earnest.’)

Socrates: Well, if you are willing to proceed, determine this question for me: — There is something, I presume, which you would call knowledge?

Callicles: There is.

Socrates: And were you not saying just now, that some courage implied knowledge?

Callicles: I was.

Socrates: And you were speaking of courage and knowledge as two things different from one another?

Callicles: Certainly I was.

Socrates: And would you say that pleasure and knowledge are the same, or not the same?

Callicles: Not the same, O man of wisdom.

Socrates: And would you say that courage differed from pleasure?

Callicles: Certainly.

Socrates: Well, then, let us remember that Callicles, the Acharnian, says that pleasure and good are the same; but that knowledge and courage are not the same, either with one another, or with the good.

Callicles: And what does our friend Socrates, of Foxton, say — does he assent to this, or not?

Socrates: He does not assent; neither will Callicles, when he sees himself truly. You will admit, I suppose, that good and evil fortune are opposed to each other?

Callicles: Yes.

Socrates: And if they are opposed to each other, then, like health and disease, they exclude one another; a man cannot have them both, or be without them both, at the same time?

Callicles: What do you mean?

Socrates: Take the case of any bodily affection: — a man may have the complaint in his eyes which is called ophthalmia?

Callicles: To be sure.

Socrates: But he surely cannot have the same eyes well and sound at the same time?

Callicles: Certainly not.

Socrates: And when he has got rid of his ophthalmia, has he got rid of the health of his eyes too? Is the final result, that he gets rid of them both together?

Callicles: Certainly not.

Socrates: That would surely be marvellous and absurd?

Callicles: Very.

Socrates: I suppose that he is affected by them, and gets rid of them in turns?

Callicles: Yes.

Socrates: And he may have strength and weakness in the same way, by fits?

Callicles: Yes.

Socrates: Or swiftness and slowness?

Callicles: Certainly.

Socrates: And does he have and not have good and happiness, and their opposites, evil and misery, in a similar alternation? (Compare Republic.)

Callicles: Certainly he has.

Socrates: If then there be anything which a man has and has not at the same time, clearly that cannot be good and evil — do we agree? Please not to answer without consideration.

Callicles: I entirely agree.

Socrates: Go back now to our former admissions. — Did you say that to hunger, I mean the mere state of hunger, was pleasant or painful?

Callicles: I said painful, but that to eat when you are hungry is pleasant.

Socrates: I know; but still the actual hunger is painful: am I not right?

Callicles: Yes.

Socrates: And thirst, too, is painful?

Callicles: Yes, very.

Socrates: Need I adduce any more instances, or would you agree that all wants or desires are painful?

Callicles: I agree, and therefore you need not adduce any more instances.

Socrates: Very good. And you would admit that to drink, when you are thirsty, is pleasant?

Callicles: Yes.

Socrates: And in the sentence which you have just uttered, the word ‘thirsty’ implies pain?

Callicles: Yes.

Socrates: And the word ‘drinking’ is expressive of pleasure, and of the satisfaction of the want?

Callicles: Yes.

Socrates: There is pleasure in drinking?

Callicles: Certainly.

Socrates: When you are thirsty?

Socrates: And in pain?

Callicles: Yes.

Socrates: Do you see the inference: — that pleasure and pain are simultaneous, when you say that being thirsty, you drink? For are they not simultaneous, and do they not affect at the same time the same part, whether of the soul or the body? — which of them is affected cannot be supposed to be of any consequence: Is not this true?

Callicles: It is.

Socrates: You said also, that no man could have good and evil fortune at the same time?

Callicles: Yes, I did.

Socrates: But you admitted, that when in pain a man might also have pleasure?

Callicles: Clearly.

Socrates: Then pleasure is not the same as good fortune, or pain the same as evil fortune, and therefore the good is not the same as the pleasant?

Callicles: I wish I knew, Socrates, what your quibbling means.

Socrates: You know, Callicles, but you affect not to know.

Callicles: Well, get on, and don’t keep fooling: then you will know what a wiseacre you are in your admonition of me.

Socrates: Does not a man cease from his thirst and from his pleasure in drinking at the same time?

Callicles: I do not understand what you are saying.

Gorgias: Nay, Callicles, answer, if only for our sakes; — we should like to hear the argument out.

Callicles: Yes, Gorgias, but I must complain of the habitual trifling of Socrates; he is always arguing about little and unworthy questions.

Gorgias: What matter? Your reputation, Callicles, is not at stake. Let Socrates argue in his own fashion.

Callicles: Well, then, Socrates, you shall ask these little peddling questions, since Gorgias wishes to have them.

Socrates: I envy you, Callicles, for having been initiated into the great mysteries before you were initiated into the lesser. I thought that this was not allowable. But to return to our argument: — Does not a man cease from thirsting and from the pleasure of drinking at the same moment?

Callicles: True.

Socrates: And if he is hungry, or has any other desire, does he not cease from the desire and the pleasure at the same moment?

Callicles: Very true.

Socrates: Then he ceases from pain and pleasure at the same moment?

Callicles: Yes.

Socrates: But he does not cease from good and evil at the same moment, as you have admitted: do you still adhere to what you said?

Callicles: Yes, I do; but what is the inference?

Socrates: Why, my friend, the inference is that the good is not the same as the pleasant, or the evil the same as the painful;

there is a cessation of pleasure and pain at the same moment; but not of good and evil, for they are different. How then can pleasure be the same as good, or pain as evil? And I would have you look at the matter in another light, which could hardly, I think, have been considered by you when you identified them: Are not the good good because they have good present with them, as the beautiful are those who have beauty present with them?

Callicles: Yes.

Socrates: And do you call the fools and cowards good men? For you were saying just now that the courageous and the wise are the good — would you not say so?

Callicles: Certainly.

Socrates: And did you never see a foolish child rejoicing?

Callicles: Yes, I have.

Socrates: And a foolish man too?

Callicles: Yes, certainly; but what is your drift?

Socrates: Nothing particular, if you will only answer.

Callicles: Yes, I have.

Socrates: And did you ever see a sensible man rejoicing or sorrowing?

Callicles: Yes.

Socrates: Which rejoice and sorrow most — the wise or the foolish?

Callicles: They are much upon a par, I think, in that respect.

Socrates: Enough: And did you ever see a coward in battle?

Callicles: To be sure.

Socrates: And which rejoiced most at the departure of the enemy, the coward or the brave?

Callicles: I should say ‘most’ of both; or at any rate, they rejoiced about equally.

Socrates: No matter; then the cowards, and not only the brave, rejoice?

Callicles: Greatly.

Socrates: And the foolish; so it would seem?

Callicles: Yes.

Socrates: And are only the cowards pained at the approach of their enemies, or are the brave also pained?

Callicles: Both are pained.

Socrates: And are they equally pained?

Callicles: I should imagine that the cowards are more pained.

Socrates: And are they not better pleased at the enemy’s departure?

Callicles: I dare say.

Socrates: Then are the foolish and the wise and the cowards and the brave all pleased and pained, as you were saying, in nearly equal degree; but are the cowards more pleased and pained than the brave?

Callicles: Yes.

Socrates: But surely the wise and brave are the good, and the foolish and the cowardly are the bad?

Callicles: Yes.

Socrates: Then the good and the bad are pleased and pained in a nearly equal degree?

Callicles: Yes.

Socrates: Then are the good and bad good and bad in a nearly equal degree, or have the bad the advantage both in good and evil? (i.e. in having more pleasure and more pain.)

Callicles: I really do not know what you mean.

Socrates: Why, do you not remember saying that the good were good because good was present with them, and the evil because evil; and that pleasures were goods and pains evils?

Callicles: Yes, I remember.

Socrates: And are not these pleasures or goods present to those who rejoice — if they do rejoice?

Callicles: Certainly.

Socrates: Then those who rejoice are good when goods are present with them?

Callicles: Yes.

Socrates: And those who are in pain have evil or sorrow present with them?

Callicles: Yes.

Socrates: And would you still say that the evil are evil by reason of the presence of evil?

Callicles: I should.

Socrates: Then those who rejoice are good, and those who are in pain evil?

Callicles: Yes.

Socrates: The degrees of good and evil vary with the degrees of pleasure and of pain?

Callicles: Yes.

Socrates: Have the wise man and the fool, the brave and the coward, joy and pain in nearly equal degrees? or would you say that the coward has more?

Callicles: I should say that he has.

Socrates: Help me then to draw out the conclusion which follows from our admissions; for it is good to repeat and review

what is good twice and thrice over, as they say. Both the wise man and the brave man we allow to be good?

Callicles: Yes.

Socrates: And the foolish man and the coward to be evil?

Callicles: Certainly.

Socrates: And he who has joy is good?

Callicles: Yes.

Socrates: And he who is in pain is evil?

Callicles: Certainly.

Socrates: The good and evil both have joy and pain, but, perhaps, the evil has more of them?

Callicles: Yes.

Socrates: Then must we not infer, that the bad man is as good and bad as the good, or, perhaps, even better? — is not this a further inference which follows equally with the preceding from the assertion that the good and the pleasant are the same: — can this be denied, Callicles?

Callicles: I have been listening and making admissions to you, Socrates; and I remark that if a person grants you anything in play, you, like a child, want to keep hold and will not give it back. But do you really suppose that I or any other human being denies that some pleasures are good and others bad?

Socrates: Alas, Callicles, how unfair you are! you certainly treat me as if I were a child, sometimes saying one thing, and then another, as if you were meaning to deceive me. And yet I thought at first that you were my friend, and would not have deceived me if you could have helped. But I see that I was mistaken; and now I suppose that I must make the best of a bad business, as they said of old, and take what I can get out of you. — Well, then, as I understand you to say, I may assume that some pleasures are good and others evil?

Callicles: Yes.

Socrates: The beneficial are good, and the hurtful are evil?

Callicles: To be sure.

Socrates: And the beneficial are those which do some good, and the hurtful are those which do some evil?

Callicles: Yes.

Socrates: Take, for example, the bodily pleasures of eating and drinking, which we were just now mentioning — you mean to say that those which promote health, or any other bodily excellence, are good, and their opposites evil?

Callicles: Certainly.

Socrates: And in the same way there are good pains and there are evil pains?

Callicles: To be sure.

Socrates: And ought we not to choose and use the good pleasures and pains?

Callicles: Certainly.

Socrates: But not the evil?

Callicles: Clearly.

Socrates: Because, if you remember, Polus and I have agreed that all our actions are to be done for the sake of the good; — and will you agree with us in saying, that the good is the end of all our actions, and that all our actions are to be done for the sake of the good, and not the good for the sake of them? — will you add a third vote to our two?

Callicles: I will.

Socrates: Then pleasure, like everything else, is to be sought for the sake of that which is good, and not that which is good for the sake of pleasure?

Callicles: To be sure.

Socrates: But can every man choose what pleasures are good and what are evil, or must he have art or knowledge of them in detail?

Callicles: He must have art.

Socrates: Let me now remind you of what I was saying to Gorgias and Polus; I was saying, as you will not have forgotten, that there were some processes which aim only at pleasure, and know nothing of a better and worse, and there are other processes which know good and evil. And I considered that cookery, which I do not call an art, but only an experience, was of the former class, which is concerned with pleasure, and that the art of medicine was of the class which is concerned with the good. And now, by the god of friendship, I must beg you, Callicles, not to jest, or to imagine that I am jesting with you; do not answer at random and contrary to your real opinion — for you will observe that we are arguing about the way of human life; and to a man who has any sense at all, what question can be more serious than this? — whether he should follow after that way of life to which you exhort me, and act what you call the manly part of speaking in the assembly, and cultivating rhetoric, and engaging in public affairs, according to the principles now in vogue; or whether he should pursue the life of philosophy; — and in what the latter way differs from the former. But perhaps we had better first try to distinguish them, as I did before, and when we have come to an agreement that they are distinct, we may proceed to consider in what they differ from one another, and which of them we should choose. Perhaps, however, you do not even now understand what I mean?

Callicles: No, I do not.

Socrates: Then I will explain myself more clearly: seeing that you and I have agreed that there is such a thing as good, and that there is such a thing as pleasure, and that pleasure is not

the same as good, and that the pursuit and process of acquisition of the one, that is pleasure, is different from the pursuit and process of acquisition of the other, which is good — I wish that you would tell me whether you agree with me thus far or not — do you agree?

Callicles: I do.

Socrates: Then I will proceed, and ask whether you also agree with me, and whether you think that I spoke the truth when I further said to Gorgias and Polus that cookery in my opinion is only an experience, and not an art at all; and that whereas medicine is an art, and attends to the nature and constitution of the patient, and has principles of action and reason in each case, cookery in attending upon pleasure never regards either the nature or reason of that pleasure to which she devotes herself, but goes straight to her end, nor ever considers or calculates anything, but works by experience and routine, and just preserves the recollection of what she has usually done when producing pleasure. And first, I would have you consider whether I have proved what I was saying, and then whether there are not other similar processes which have to do with the soul — some of them processes of art, making a provision for the soul's highest interest — others despising the interest, and, as in the previous case, considering only the pleasure of the soul, and how this may be acquired, but not considering what pleasures are good or bad, and having no other aim but to afford gratification, whether good or bad. In my opinion, Callicles, there are such processes, and this is the sort of thing which I term flattery, whether concerned with the body or the soul, or whenever employed with a view to pleasure and without any consideration of good and evil. And now I wish that you would tell me whether you agree with us in this notion, or whether you differ.

Callicles: I do not differ; on the contrary, I agree; for in that way I shall soonest bring the argument to an end, and shall oblige

my friend Gorgias.

Socrates: And is this notion true of one soul, or of two or more?

Callicles: Equally true of two or more.

Socrates: Then a man may delight a whole assembly, and yet have no regard for their true interests?

Callicles: Yes.

Socrates: Can you tell me the pursuits which delight mankind — or rather, if you would prefer, let me ask, and do you answer, which of them belong to the pleasurable class, and which of them not? In the first place, what say you of flute-playing? Does not that appear to be an art which seeks only pleasure, Callicles, and thinks of nothing else?

Callicles: I assent.

Socrates: And is not the same true of all similar arts, as, for example, the art of playing the lyre at festivals?

Callicles: Yes.

Socrates: And what do you say of the choral art and of dithyrambic poetry? — are not they of the same nature? Do you imagine that Cinesias the son of Meles cares about what will tend to the moral improvement of his hearers, or about what will give pleasure to the multitude?

Callicles: There can be no mistake about Cinesias, Socrates.

Socrates: And what do you say of his father, Meles the harp-player? Did he perform with any view to the good of his hearers? Could he be said to regard even their pleasure? For his singing was an infliction to his audience. And of harp-playing and dithyrambic poetry in general, what would you say? Have they not been invented wholly for the sake of pleasure?

Callicles: That is my notion of them.

Socrates: And as for the Muse of Tragedy, that solemn and august personage — what are her aspirations? Is all her aim and desire only to give pleasure to the spectators, or does she fight against them and refuse to speak of their pleasant vices, and willingly proclaim in word and song truths welcome and unwelcome? — which in your judgment is her character?

Callicles: There can be no doubt, Socrates, that Tragedy has her face turned towards pleasure and the gratification of the audience.

Socrates: And is not that the sort of thing, Callicles, which we were just now describing as flattery?

Callicles: Quite true.

Socrates: Well now, suppose that we strip all poetry of song and rhythm and metre, there will remain speech? (Compare Republic.)

Callicles: To be sure.

Socrates: And this speech is addressed to a crowd of people?

Callicles: Yes.

Socrates: Then poetry is a sort of rhetoric?

Callicles: True.

Socrates: And do not the poets in the theatres seem to you to be rhetoricians?

Callicles: Yes.

Socrates: Then now we have discovered a sort of rhetoric which is addressed to a crowd of men, women, and children, freemen and slaves. And this is not much to our taste, for we have described it as having the nature of flattery.

Callicles: Quite true.

Socrates: Very good. And what do you say of that other rhetoric which addresses the Athenian assembly and the assemblies of

freemen in other states? Do the rhetoricians appear to you always to aim at what is best, and do they seek to improve the citizens by their speeches, or are they too, like the rest of mankind, bent upon giving them pleasure, forgetting the public good in the thought of their own interest, playing with the people as with children, and trying to amuse them, but never considering whether they are better or worse for this?

Callicles: I must distinguish. There are some who have a real care of the public in what they say, while others are such as you describe.

Socrates: I am contented with the admission that rhetoric is of two sorts; one, which is mere flattery and disgraceful declamation; the other, which is noble and aims at the training and improvement of the souls of the citizens, and strives to say what is best, whether welcome or unwelcome, to the audience; but have you ever known such a rhetoric; or if you have, and can point out any rhetorician who is of this stamp, who is he?

Callicles: But, indeed, I am afraid that I cannot tell you of any such among the orators who are at present living.

Socrates: Well, then, can you mention any one of a former generation, who may be said to have improved the Athenians, who found them worse and made them better, from the day that he began to make speeches? for, indeed, I do not know of such a man.

Callicles: What! did you never hear that Themistocles was a good man, and Cimon and Miltiades and Pericles, who is just lately dead, and whom you heard yourself?

Socrates: Yes, Callicles, they were good men, if, as you said at first, true virtue consists only in the satisfaction of our own desires and those of others; but if not, and if, as we were afterwards compelled to acknowledge, the satisfaction of some desires makes us better, and of others, worse, and we ought to gratify the one and not the other, and there is an art in

distinguishing them, — can you tell me of any of these statesmen who did distinguish them?

Callicles: No, indeed, I cannot.

Socrates: Yet, surely, Callicles, if you look you will find such a one. Suppose that we just calmly consider whether any of these was such as I have described. Will not the good man, who says whatever he says with a view to the best, speak with a reference to some standard and not at random; just as all other artists, whether the painter, the builder, the shipwright, or any other look all of them to their own work, and do not select and apply at random what they apply, but strive to give a definite form to it? The artist disposes all things in order, and compels the one part to harmonize and accord with the other part, until he has constructed a regular and systematic whole; and this is true of all artists, and in the same way the trainers and physicians, of whom we spoke before, give order and regularity to the body: do you deny this?

Callicles: No; I am ready to admit it.

Socrates: Then the house in which order and regularity prevail is good; that in which there is disorder, evil?

Callicles: Yes.

Socrates: And the same is true of a ship?

Callicles: Yes.

Socrates: And the same may be said of the human body?

Callicles: Yes.

Socrates: And what would you say of the soul? Will the good soul be that in which disorder is prevalent, or that in which there is harmony and order?

Callicles: The latter follows from our previous admissions.

Socrates: What is the name which is given to the effect of harmony and order in the body?

Callicles: I suppose that you mean health and strength?

Socrates: Yes, I do; and what is the name which you would give to the effect of harmony and order in the soul? Try and discover a name for this as well as for the other.

Callicles: Why not give the name yourself, Socrates?

Socrates: Well, if you had rather that I should, I will; and you shall say whether you agree with me, and if not, you shall refute and answer me. 'Healthy,' as I conceive, is the name which is given to the regular order of the body, whence comes health and every other bodily excellence: is that true or not?

Callicles: True.

Socrates: And 'lawful' and 'law' are the names which are given to the regular order and action of the soul, and these make men lawful and orderly: — and so we have temperance and justice: have we not?

Callicles: Granted.

Socrates: And will not the true rhetorician who is honest and understands his art have his eye fixed upon these, in all the words which he addresses to the souls of men, and in all his actions, both in what he gives and in what he takes away? Will not his aim be to implant justice in the souls of his citizens and take away injustice, to implant temperance and take away intemperance, to implant every virtue and take away every vice? Do you not agree?

Callicles: I agree.

Socrates: For what use is there, Callicles, in giving to the body of a sick man who is in a bad state of health a quantity of the most delightful food or drink or any other pleasant thing, which may be really as bad for him as if you gave him nothing, or even worse if rightly estimated. Is not that true?

Callicles: I will not say No to it.

Socrates: For in my opinion there is no profit in a man’s life if his body is in an evil plight — in that case his life also is evil: am I not right?

Callicles: Yes.

Socrates: When a man is in health the physicians will generally allow him to eat when he is hungry and drink when he is thirsty, and to satisfy his desires as he likes, but when he is sick they hardly suffer him to satisfy his desires at all: even you will admit that?

Callicles: Yes.

Socrates: And does not the same argument hold of the soul, my good sir? While she is in a bad state and is senseless and intemperate and unjust and unholy, her desires ought to be controlled, and she ought to be prevented from doing anything which does not tend to her own improvement.

Callicles: Yes.

Socrates: Such treatment will be better for the soul herself?

Callicles: To be sure.

Socrates: And to restrain her from her appetites is to chastise her?

Callicles: Yes.

Socrates: Then restraint or chastisement is better for the soul than intemperance or the absence of control, which you were just now preferring?

Callicles: I do not understand you, Socrates, and I wish that you would ask some one who does.

Socrates: Here is a gentleman who cannot endure to be improved or to subject himself to that very chastisement of which the argument speaks!

Callicles: I do not heed a word of what you are saying, and have only answered hitherto out of civility to Gorgias.

Socrates: What are we to do, then? Shall we break off in the middle?

Callicles: You shall judge for yourself.

Socrates: Well, but people say that ‘a tale should have a head and not break off in the middle,’ and I should not like to have the argument going about without a head (compare Laws); please then to go on a little longer, and put the head on.

Callicles: How tyrannical you are, Socrates! I wish that you and your argument would rest, or that you would get some one else to argue with you.

Socrates: But who else is willing? — I want to finish the argument.

Callicles: Cannot you finish without my help, either talking straight on, or questioning and answering yourself?

Socrates: Must I then say with Epicharmus, ‘Two men spoke before, but now one shall be enough’? I suppose that there is absolutely no help. And if I am to carry on the enquiry by myself, I will first of all remark that not only I but all of us should have an ambition to know what is true and what is false in this matter, for the discovery of the truth is a common good. And now I will proceed to argue according to my own notion. But if any of you think that I arrive at conclusions which are untrue you must interpose and refute me, for I do not speak from any knowledge of what I am saying; I am an enquirer like yourselves, and therefore, if my opponent says anything which is of force, I shall be the first to agree with him. I am speaking on the supposition that the argument ought to be completed; but if you think otherwise let us leave off and go our ways.

Gorgias: I think, Socrates, that we should not go our ways until you have completed the argument; and this appears to me to be

the wish of the rest of the company; I myself should very much like to hear what more you have to say.

Socrates: I too, Gorgias, should have liked to continue the argument with Callicles, and then I might have given him an ‘Amphion’ in return for his ‘Zethus’; but since you, Callicles, are unwilling to continue, I hope that you will listen, and interrupt me if I seem to you to be in error. And if you refute me, I shall not be angry with you as you are with me, but I shall inscribe you as the greatest of benefactors on the tablets of my soul.

Callicles: My good fellow, never mind me, but get on.

Socrates: Listen to me, then, while I recapitulate the argument: — Is the pleasant the same as the good? Not the same. Callicles and I are agreed about that. And is the pleasant to be pursued for the sake of the good? or the good for the sake of the pleasant? The pleasant is to be pursued for the sake of the good. And that is pleasant at the presence of which we are pleased, and that is good at the presence of which we are good? To be sure. And we are good, and all good things whatever are good when some virtue is present in us or them? That, Callicles, is my conviction. But the virtue of each thing, whether body or soul, instrument or creature, when given to them in the best way comes to them not by chance but as the result of the order and truth and art which are imparted to them: Am I not right? I maintain that I am. And is not the virtue of each thing dependent on order or arrangement? Yes, I say. And that which makes a thing good is the proper order inhering in each thing? Such is my view. And is not the soul which has an order of her own better than that which has no order? Certainly. And the soul which has order is orderly? Of course. And that which is orderly is temperate? Assuredly. And the temperate soul is good? No other answer can I give, Callicles dear; have you any?

Callicles: Go on, my good fellow.

Socrates: Then I shall proceed to add, that if the temperate soul is the good soul, the soul which is in the opposite condition, that is, the foolish and intemperate, is the bad soul. Very true.

And will not the temperate man do what is proper, both in relation to the gods and to men; — for he would not be temperate if he did not? Certainly he will do what is proper. In his relation to other men he will do what is just; and in his relation to the gods he will do what is holy; and he who does what is just and holy must be just and holy? Very true. And must he not be courageous? for the duty of a temperate man is not to follow or to avoid what he ought not, but what he ought, whether things or men or pleasures or pains, and patiently to endure when he ought; and therefore, Callicles, the temperate man, being, as we have described, also just and courageous and holy, cannot be other than a perfectly good man, nor can the good man do otherwise than well and perfectly whatever he does; and he who does well must of necessity be happy and blessed, and the evil man who does evil, miserable: now this latter is he whom you were applauding — the intemperate who is the opposite of the temperate. Such is my position, and these things I affirm to be true. And if they are true, then I further affirm that he who desires to be happy must pursue and practise temperance and run away from intemperance as fast as his legs will carry him: he had better order his life so as not to need punishment; but if either he or any of his friends, whether private individual or city, are in need of punishment, then justice must be done and he must suffer punishment, if he would be happy. This appears to me to be the aim which a man ought to have, and towards which he ought to direct all the energies both of himself and of the state, acting so that he may have temperance and justice present with him and be happy, not suffering his lusts to be unrestrained, and in the never-ending desire satisfy them leading a robber’s life. Such a one is the friend neither of God nor man, for he is incapable of communion, and he who is incapable of communion is also

incapable of friendship. And philosophers tell us, Callicles, that communion and friendship and orderliness and temperance and justice bind together heaven and earth and gods and men, and that this universe is therefore called Cosmos or order, not disorder or misrule, my friend. But although you are a philosopher you seem to me never to have observed that geometrical equality is mighty, both among gods and men; you think that you ought to cultivate inequality or excess, and do not care about geometry. — Well, then, either the principle that the happy are made happy by the possession of justice and temperance, and the miserable miserable by the possession of vice, must be refuted, or, if it is granted, what will be the consequences? All the consequences which I drew before, Callicles, and about which you asked me whether I was in earnest when I said that a man ought to accuse himself and his son and his friend if he did anything wrong, and that to this end he should use his rhetoric — all those consequences are true. And that which you thought that Polus was led to admit out of modesty is true, viz., that, to do injustice, if more disgraceful than to suffer, is in that degree worse; and the other position, which, according to Polus, Gorgias admitted out of modesty, that he who would truly be a rhetorician ought to be just and have a knowledge of justice, has also turned out to be true.

And now, these things being as we have said, let us proceed in the next place to consider whether you are right in throwing in my teeth that I am unable to help myself or any of my friends or kinsmen, or to save them in the extremity of danger, and that I am in the power of another like an outlaw to whom any one may do what he likes, — he may box my ears, which was a brave saying of yours; or take away my goods or banish me, or even do his worst and kill me; a condition which, as you say, is the height of disgrace. My answer to you is one which has been already often repeated, but may as well be repeated once more. I tell you, Callicles, that to be boxed on the ears wrongfully is not the worst evil which can befall a man, nor to have my purse or my

body cut open, but that to smite and slay me and mine wrongfully is far more disgraceful and more evil; aye, and to despoil and enslave and pillage, or in any way at all to wrong me and mine, is far more disgraceful and evil to the doer of the wrong than to me who am the sufferer. These truths, which have been already set forth as I state them in the previous discussion, would seem now to have been fixed and riveted by us, if I may use an expression which is certainly bold, in words which are like bonds of iron and adamant; and unless you or some other still more enterprising hero shall break them, there is no possibility of denying what I say. For my position has always been, that I myself am ignorant how these things are, but that I have never met any one who could say otherwise, any more than you can, and not appear ridiculous. This is my position still, and if what I am saying is true, and injustice is the greatest of evils to the doer of injustice, and yet there is if possible a greater than this greatest of evils (compare Republic), in an unjust man not suffering retribution, what is that defence of which the want will make a man truly ridiculous? Must not the defence be one which will avert the greatest of human evils? And will not the worst of all defences be that with which a man is unable to defend himself or his family or his friends? — and next will come that which is unable to avert the next greatest evil; thirdly that which is unable to avert the third greatest evil; and so of other evils. As is the greatness of evil so is the honour of being able to avert them in their several degrees, and the disgrace of not being able to avert them. Am I not right Callicles?

Callicles: Yes, quite right.

Socrates: Seeing then that there are these two evils, the doing injustice and the suffering injustice — and we affirm that to do injustice is a greater, and to suffer injustice a lesser evil — by what devices can a man succeed in obtaining the two advantages, the one of not doing and the other of not suffering injustice? must he have the power, or only the will to obtain

them? I mean to ask whether a man will escape injustice if he has only the will to escape, or must he have provided himself with the power?

Callicles: He must have provided himself with the power; that is clear.

Socrates: And what do you say of doing injustice? Is the will only sufficient, and will that prevent him from doing injustice, or must he have provided himself with power and art; and if he have not studied and practised, will he be unjust still? Surely you might say, Callicles, whether you think that Polus and I were right in admitting the conclusion that no one does wrong voluntarily, but that all do wrong against their will?

Callicles: Granted, Socrates, if you will only have done.

Socrates: Then, as would appear, power and art have to be provided in order that we may do no injustice?

Callicles: Certainly.

Socrates: And what art will protect us from suffering injustice, if not wholly, yet as far as possible? I want to know whether you agree with me; for I think that such an art is the art of one who is either a ruler or even tyrant himself, or the equal and companion of the ruling power.

Callicles: Well said, Socrates; and please to observe how ready I am to praise you when you talk sense.

Socrates: Think and tell me whether you would approve of another view of mine: To me every man appears to be most the friend of him who is most like to him — like to like, as ancient sages say: Would you not agree to this?

Callicles: I should.

Socrates: But when the tyrant is rude and uneducated, he may be expected to fear any one who is his superior in virtue, and will never be able to be perfectly friendly with him.

Callicles: That is true.

Socrates: Neither will he be the friend of any one who is greatly his inferior, for the tyrant will despise him, and will never seriously regard him as a friend.

Callicles: That again is true.

Socrates: Then the only friend worth mentioning, whom the tyrant can have, will be one who is of the same character, and has the same likes and dislikes, and is at the same time willing to be subject and subservient to him; he is the man who will have power in the state, and no one will injure him with impunity: — is not that so?

Callicles: Yes.

Socrates: And if a young man begins to ask how he may become great and formidable, this would seem to be the way — he will accustom himself, from his youth upward, to feel sorrow and joy on the same occasions as his master, and will contrive to be as like him as possible?

Callicles: Yes.

Socrates: And in this way he will have accomplished, as you and your friends would say, the end of becoming a great man and not suffering injury?

Callicles: Very true.

Socrates: But will he also escape from doing injury? Must not the very opposite be true, — if he is to be like the tyrant in his injustice, and to have influence with him? Will he not rather contrive to do as much wrong as possible, and not be punished?

Callicles: True.

Socrates: And by the imitation of his master and by the power which he thus acquires will not his soul become bad and corrupted, and will not this be the greatest evil to him?

Callicles: You always contrive somehow or other, Socrates, to invert everything: do you not know that he who imitates the tyrant will, if he has a mind, kill him who does not imitate him and take away his goods?

Socrates: Excellent Callicles, I am not deaf, and I have heard that a great many times from you and from Polus and from nearly every man in the city, but I wish that you would hear me too. I dare say that he will kill him if he has a mind — the bad man will kill the good and true.

Callicles: And is not that just the provoking thing?

Socrates: Nay, not to a man of sense, as the argument shows: do you think that all our cares should be directed to prolonging life to the uttermost, and to the study of those arts which secure us from danger always; like that art of rhetoric which saves men in courts of law, and which you advise me to cultivate?

Callicles: Yes, truly, and very good advice too.

Socrates: Well, my friend, but what do you think of swimming; is that an art of any great pretensions?

Callicles: No, indeed.

Socrates: And yet surely swimming saves a man from death, and there are occasions on which he must know how to swim. And if you despise the swimmers, I will tell you of another and greater art, the art of the pilot, who not only saves the souls of men, but also their bodies and properties from the extremity of danger, just like rhetoric. Yet his art is modest and unpresuming: it has no airs or pretences of doing anything extraordinary, and, in return for the same salvation which is given by the pleader, demands only two obols, if he brings us from Aegina to Athens, or for the longer voyage from Pontus or Egypt, at the utmost two drachmae, when he has saved, as I was just now saying, the passenger and his wife and children and goods, and safely disembarked them at the Piraeus, — this is the payment which he asks in return for so great a boon; and he who is the master

of the art, and has done all this, gets out and walks about on the sea-shore by his ship in an unassuming way. For he is able to reflect and is aware that he cannot tell which of his fellow-passengers he has benefited, and which of them he has injured in not allowing them to be drowned. He knows that they are just the same when he has disembarked them as when they embarked, and not a whit better either in their bodies or in their souls; and he considers that if a man who is afflicted by great and incurable bodily diseases is only to be pitied for having escaped, and is in no way benefited by him in having been saved from drowning, much less he who has great and incurable diseases, not of the body, but of the soul, which is the more valuable part of him; neither is life worth having nor of any profit to the bad man, whether he be delivered from the sea, or the law-courts, or any other devourer; — and so he reflects that such a one had better not live, for he cannot live well. (Compare Republic.)

And this is the reason why the pilot, although he is our saviour, is not usually conceited, any more than the engineer, who is not at all behind either the general, or the pilot, or any one else, in his saving power, for he sometimes saves whole cities. Is there any comparison between him and the pleader? And if he were to talk, Callicles, in your grandiose style, he would bury you under a mountain of words, declaring and insisting that we ought all of us to be engine-makers, and that no other profession is worth thinking about; he would have plenty to say. Nevertheless you despise him and his art, and sneeringly call him an engine-maker, and you will not allow your daughters to marry his son, or marry your son to his daughters. And yet, on your principle, what justice or reason is there in your refusal? What right have you to despise the engine-maker, and the others whom I was just now mentioning? I know that you will say, ‘I am better, and better born.’ But if the better is not what I say, and virtue consists only in a man saving himself and his, whatever may be his character, then your censure of the engine-maker,

and of the physician, and of the other arts of salvation, is ridiculous. O my friend! I want you to see that the noble and the good may possibly be something different from saving and being saved: — May not he who is truly a man cease to care about living a certain time? — he knows, as women say, that no man can escape fate, and therefore he is not fond of life; he leaves all that with God, and considers in what way he can best spend his appointed term; — whether by assimilating himself to the constitution under which he lives, as you at this moment have to consider how you may become as like as possible to the Athenian people, if you mean to be in their good graces, and to have power in the state; whereas I want you to think and see whether this is for the interest of either of us; — I would not have us risk that which is dearest on the acquisition of this power, like the Thessalian enchantresses, who, as they say, bring down the moon from heaven at the risk of their own perdition. But if you suppose that any man will show you the art of becoming great in the city, and yet not conforming yourself to the ways of the city, whether for better or worse, then I can only say that you are mistaken, Callides; for he who would deserve to be the true natural friend of the Athenian Demus, aye, or of Pyrilampes' darling who is called after them, must be by nature like them, and not an imitator only. He, then, who will make you most like them, will make you as you desire, a statesman and orator: for every man is pleased when he is spoken to in his own language and spirit, and dislikes any other. But perhaps you, sweet Callicles, may be of another mind. What do you say?

Callicles: Somehow or other your words, Socrates, always appear to me to be good words; and yet, like the rest of the world, I am not quite convinced by them. (Compare Symp.: 1 Alcib.)

Socrates: The reason is, Callicles, that the love of Demus which abides in your soul is an adversary to me; but I dare say that if we recur to these same matters, and consider them more

thoroughly, you may be convinced for all that. Please, then, to remember that there are two processes of training all things, including body and soul; in the one, as we said, we treat them with a view to pleasure, and in the other with a view to the highest good, and then we do not indulge but resist them: was not that the distinction which we drew?

Callicles: Very true.

Socrates: And the one which had pleasure in view was just a vulgar flattery: — was not that another of our conclusions?

Callicles: Be it so, if you will have it.

Socrates: And the other had in view the greatest improvement of that which was ministered to, whether body or soul?

Callicles: Quite true.

Socrates: And must we not have the same end in view in the treatment of our city and citizens? Must we not try and make them as good as possible? For we have already discovered that there is no use in imparting to them any other good, unless the mind of those who are to have the good, whether money, or office, or any other sort of power, be gentle and good. Shall we say that?

Callicles: Yes, certainly, if you like.

Socrates: Well, then, if you and I, Callicles, were intending to set about some public business, and were advising one another to undertake buildings, such as walls, docks or temples of the largest size, ought we not to examine ourselves, first, as to whether we know or do not know the art of building, and who taught us? — would not that be necessary, Callicles?

Callicles: True.

Socrates: In the second place, we should have to consider whether we had ever constructed any private house, either of our own or for our friends, and whether this building of ours was a success or not; and if upon consideration we found that

we had had good and eminent masters, and had been successful in constructing many fine buildings, not only with their assistance, but without them, by our own unaided skill — in that case prudence would not dissuade us from proceeding to the construction of public works. But if we had no master to show, and only a number of worthless buildings or none at all, then, surely, it would be ridiculous in us to attempt public works, or to advise one another to undertake them. Is not this true?

Callicles: Certainly.

Socrates: And does not the same hold in all other cases? If you and I were physicians, and were advising one another that we were competent to practise as state-physicians, should I not ask about you, and would you not ask about me, Well, but how about Socrates himself, has he good health? and was any one else ever known to be cured by him, whether slave or freeman? And I should make the same enquiries about you. And if we arrived at the conclusion that no one, whether citizen or stranger, man or woman, had ever been any the better for the medical skill of either of us, then, by Heaven, Callicles, what an absurdity to think that we or any human being should be so silly as to set up as state-physicians and advise others like ourselves to do the same, without having first practised in private, whether successfully or not, and acquired experience of the art! Is not this, as they say, to begin with the big jar when you are learning the potter’s art; which is a foolish thing?

Callicles: True.

Socrates: And now, my friend, as you are already beginning to be a public character, and are admonishing and reproaching me for not being one, suppose that we ask a few questions of one another. Tell me, then, Callicles, how about making any of the citizens better? Was there ever a man who was once vicious, or unjust, or intemperate, or foolish, and became by the help of Callicles good and noble? Was there ever such a man, whether citizen or stranger, slave or freeman? Tell me, Callicles, if a

person were to ask these questions of you, what would you answer? Whom would you say that you had improved by your conversation? There may have been good deeds of this sort which were done by you as a private person, before you came forward in public. Why will you not answer?

Callicles: You are contentious, Socrates.

Socrates: Nay, I ask you, not from a love of contention, but because I really want to know in what way you think that affairs should be administered among us — whether, when you come to the administration of them, you have any other aim but the improvement of the citizens? Have we not already admitted many times over that such is the duty of a public man? Nay, we have surely said so; for if you will not answer for yourself I must answer for you. But if this is what the good man ought to effect for the benefit of his own state, allow me to recall to you the names of those whom you were just now mentioning, Pericles, and Cimon, and Miltiades, and Themistocles, and ask whether you still think that they were good citizens.

Callicles: I do.

Socrates: But if they were good, then clearly each of them must have made the citizens better instead of worse?

Callicles: Yes.

Socrates: And, therefore, when Pericles first began to speak in the assembly, the Athenians were not so good as when he spoke last?

Callicles: Very likely.

Socrates: Nay, my friend, ‘likely’ is not the word; for if he was a good citizen, the inference is certain.

Callicles: And what difference does that make?

Socrates: None; only I should like further to know whether the Athenians are supposed to have been made better by Pericles, or, on the contrary, to have been corrupted by him; for I hear

that he was the first who gave the people pay, and made them idle and cowardly, and encouraged them in the love of talk and money.

Callicles: You heard that, Socrates, from the laconising set who bruise their ears.

Socrates: But what I am going to tell you now is not mere hearsay, but well known both to you and me: that at first, Pericles was glorious and his character unimpeached by any verdict of the Athenians — this was during the time when they were not so good — yet afterwards, when they had been made good and gentle by him, at the very end of his life they convicted him of theft, and almost put him to death, clearly under the notion that he was a malefactor.

Callicles: Well, but how does that prove Pericles' badness?

Socrates: Why, surely you would say that he was a bad manager of asses or horses or oxen, who had received them originally neither kicking nor butting nor biting him, and implanted in them all these savage tricks? Would he not be a bad manager of any animals who received them gentle, and made them fiercer than they were when he received them? What do you say?

Callicles: I will do you the favour of saying 'yes.'

Socrates: And will you also do me the favour of saying whether man is an animal?

Callicles: Certainly he is.

Socrates: And was not Pericles a shepherd of men?

Callicles: Yes.

Socrates: And if he was a good political shepherd, ought not the animals who were his subjects, as we were just now acknowledging, to have become more just, and not more unjust?

Callicles: Quite true.

Socrates: And are not just men gentle, as Homer says? — or are you of another mind?

Callicles: I agree.

Socrates: And yet he really did make them more savage than he received them, and their savageness was shown towards himself; which he must have been very far from desiring.

Callicles: Do you want me to agree with you?

Socrates: Yes, if I seem to you to speak the truth.

Callicles: Granted then.

Socrates: And if they were more savage, must they not have been more unjust and inferior?

Callicles: Granted again.

Socrates: Then upon this view, Pericles was not a good statesman?

Callicles: That is, upon your view.

Socrates: Nay, the view is yours, after what you have admitted. Take the case of Cimon again. Did not the very persons whom he was serving ostracize him, in order that they might not hear his voice for ten years? and they did just the same to Themistocles, adding the penalty of exile; and they voted that Miltiades, the hero of Marathon, should be thrown into the pit of death, and he was only saved by the Prytanis. And yet, if they had been really good men, as you say, these things would never have happened to them. For the good charioteers are not those who at first keep their place, and then, when they have broken-in their horses, and themselves become better charioteers, are thrown out — that is not the way either in charioteering or in any profession. — What do you think?

Callicles: I should think not.

Socrates: Well, but if so, the truth is as I have said already, that in the Athenian State no one has ever shown himself to be a

good statesman — you admitted that this was true of our present statesmen, but not true of former ones, and you preferred them to the others; yet they have turned out to be no better than our present ones; and therefore, if they were rhetoricians, they did not use the true art of rhetoric or of flattery, or they would not have fallen out of favour.

Callicles: But surely, Socrates, no living man ever came near any one of them in his performances.

Socrates: O, my dear friend, I say nothing against them regarded as the serving-men of the State; and I do think that they were certainly more serviceable than those who are living now, and better able to gratify the wishes of the State; but as to transforming those desires and not allowing them to have their way, and using the powers which they had, whether of persuasion or of force, in the improvement of their fellow citizens, which is the prime object of the truly good citizen, I do not see that in these respects they were a whit superior to our present statesmen, although I do admit that they were more clever at providing ships and walls and docks, and all that. You and I have a ridiculous way, for during the whole time that we are arguing, we are always going round and round to the same point, and constantly misunderstanding one another. If I am not mistaken, you have admitted and acknowledged more than once, that there are two kinds of operations which have to do with the body, and two which have to do with the soul: one of the two is ministerial, and if our bodies are hungry provides food for them, and if they are thirsty gives them drink, or if they are cold supplies them with garments, blankets, shoes, and all that they crave. I use the same images as before intentionally, in order that you may understand me the better. The purveyor of the articles may provide them either wholesale or retail, or he may be the maker of any of them, — the baker, or the cook, or the weaver, or the shoemaker, or the currier; and in so doing, being such as he is, he is naturally supposed by himself and

every one to minister to the body. For none of them know that there is another art — an art of gymnastic and medicine which is the true minister of the body, and ought to be the mistress of all the rest, and to use their results according to the knowledge which she has and they have not, of the real good or bad effects of meats and drinks on the body. All other arts which have to do with the body are servile and menial and illiberal; and gymnastic and medicine are, as they ought to be, their mistresses. Now, when I say that all this is equally true of the soul, you seem at first to know and understand and assent to my words, and then a little while afterwards you come repeating, Has not the State had good and noble citizens? and when I ask you who they are, you reply, seemingly quite in earnest, as if I had asked, Who are or have been good trainers? — and you had replied, Thearion, the baker, Mithoecus, who wrote the Sicilian cookery-book, Sarambus, the vintner: these are ministers of the body, first-rate in their art; for the first makes admirable loaves, the second excellent dishes, and the third capital wine; — to me these appear to be the exact parallel of the statesmen whom you mention. Now you would not be altogether pleased if I said to you, My friend, you know nothing of gymnastics; those of whom you are speaking to me are only the ministers and purveyors of luxury, who have no good or noble notions of their art, and may very likely be filling and fattening men’s bodies and gaining their approval, although the result is that they lose their original flesh in the long run, and become thinner than they were before; and yet they, in their simplicity, will not attribute their diseases and loss of flesh to their entertainers; but when in after years the unhealthy surfeit brings the attendant penalty of disease, he who happens to be near them at the time, and offers them advice, is accused and blamed by them, and if they could they would do him some harm; while they proceed to eulogize the men who have been the real authors of the mischief. And that, Callicles, is just what you are now doing. You praise the men who feasted the citizens and satisfied their desires, and people

say that they have made the city great, not seeing that the swollen and ulcerated condition of the State is to be attributed to these elder statesmen; for they have filled the city full of harbours and docks and walls and revenues and all that, and have left no room for justice and temperance. And when the crisis of the disorder comes, the people will blame the advisers of the hour, and applaud Themistocles and Cimon and Pericles, who are the real authors of their calamities; and if you are not careful they may assail you and my friend Alcibiades, when they are losing not only their new acquisitions, but also their original possessions; not that you are the authors of these misfortunes of theirs, although you may perhaps be accessories to them. A great piece of work is always being made, as I see and am told, now as of old; about our statesmen. When the State treats any of them as malefactors, I observe that there is a great uproar and indignation at the supposed wrong which is done to them; 'after all their many services to the State, that they should unjustly perish,' — so the tale runs. But the cry is all a lie; for no statesman ever could be unjustly put to death by the city of which he is the head. The case of the professed statesman is, I believe, very much like that of the professed sophist; for the sophists, although they are wise men, are nevertheless guilty of a strange piece of folly; professing to be teachers of virtue, they will often accuse their disciples of wronging them, and defrauding them of their pay, and showing no gratitude for their services. Yet what can be more absurd than that men who have become just and good, and whose injustice has been taken away from them, and who have had justice implanted in them by their teachers, should act unjustly by reason of the injustice which is not in them? Can anything be more irrational, my friends, than this? You, Callicles, compel me to be a mob-orator, because you will not answer.

Callicles: And you are the man who cannot speak unless there is some one to answer?

Socrates: I suppose that I can; just now, at any rate, the speeches which I am making are long enough because you refuse to answer me. But I adjure you by the god of friendship, my good sir, do tell me whether there does not appear to you to be a great inconsistency in saying that you have made a man good, and then blaming him for being bad?

Callicles: Yes, it appears so to me.

Socrates: Do you never hear our professors of education speaking in this inconsistent manner?

Callicles: Yes, but why talk of men who are good for nothing?

Socrates: I would rather say, why talk of men who profess to be rulers, and declare that they are devoted to the improvement of the city, and nevertheless upon occasion declaim against the utter vileness of the city: — do you think that there is any difference between one and the other? My good friend, the sophist and the rhetorician, as I was saying to Polus, are the same, or nearly the same; but you ignorantly fancy that rhetoric is a perfect thing, and sophistry a thing to be despised; whereas the truth is, that sophistry is as much superior to rhetoric as legislation is to the practice of law, or gymnastic to medicine. The orators and sophists, as I am inclined to think, are the only class who cannot complain of the mischief ensuing to themselves from that which they teach others, without in the same breath accusing themselves of having done no good to those whom they profess to benefit. Is not this a fact?

Callicles: Certainly it is.

Socrates: If they were right in saying that they make men better, then they are the only class who can afford to leave their remuneration to those who have been benefited by them. Whereas if a man has been benefited in any other way, if, for example, he has been taught to run by a trainer, he might possibly defraud him of his pay, if the trainer left the matter to him, and made no agreement with him that he should receive

money as soon as he had given him the utmost speed; for not because of any deficiency of speed do men act unjustly, but by reason of injustice.

Callicles: Very true.

Socrates: And he who removes injustice can be in no danger of being treated unjustly: he alone can safely leave the honorarium to his pupils, if he be really able to make them good — am I not right? (Compare Protag.)

Callicles: Yes.

Socrates: Then we have found the reason why there is no dishonour in a man receiving pay who is called in to advise about building or any other art?

Callicles: Yes, we have found the reason.

Socrates: But when the point is, how a man may become best himself, and best govern his family and state, then to say that you will give no advice gratis is held to be dishonourable?

Callicles: True.

Socrates: And why? Because only such benefits call forth a desire to requite them, and there is evidence that a benefit has been conferred when the benefactor receives a return; otherwise not. Is this true?

Callicles: It is.

Socrates: Then to which service of the State do you invite me? determine for me. Am I to be the physician of the State who will strive and struggle to make the Athenians as good as possible; or am I to be the servant and flatterer of the State? Speak out, my good friend, freely and fairly as you did at first and ought to do again, and tell me your entire mind.

Callicles: I say then that you should be the servant of the State.

Socrates: The flatterer? well, sir, that is a noble invitation.

Callicles: The Mysian, Socrates, or what you please. For if you refuse, the consequences will be —

Socrates: Do not repeat the old story — that he who likes will kill me and get my money; for then I shall have to repeat the old answer, that he will be a bad man and will kill the good, and that the money will be of no use to him, but that he will wrongly use that which he wrongly took, and if wrongly, basely, and if basely, hurtfully.

Callicles: How confident you are, Socrates, that you will never come to harm! you seem to think that you are living in another country, and can never be brought into a court of justice, as you very likely may be brought by some miserable and mean person.

Socrates: Then I must indeed be a fool, Callicles, if I do not know that in the Athenian State any man may suffer anything. And if I am brought to trial and incur the dangers of which you speak, he will be a villain who brings me to trial — of that I am very sure, for no good man would accuse the innocent. Nor shall I be surprised if I am put to death. Shall I tell you why I anticipate this?

Callicles: By all means.

Socrates: I think that I am the only or almost the only Athenian living who practises the true art of politics; I am the only politician of my time. Now, seeing that when I speak my words are not uttered with any view of gaining favour, and that I look to what is best and not to what is most pleasant, having no mind to use those arts and graces which you recommend, I shall have nothing to say in the justice court. And you might argue with me, as I was arguing with Polus: — I shall be tried just as a physician would be tried in a court of little boys at the indictment of the cook. What would he reply under such circumstances, if some one were to accuse him, saying, ‘O my boys, many evil things has this man done to you: he is the death of you, especially of the younger ones among you, cutting and

burning and starving and suffocating you, until you know not what to do; he gives you the bitterest potions, and compels you to hunger and thirst. How unlike the variety of meats and sweets on which I feasted you!' What do you suppose that the physician would be able to reply when he found himself in such a predicament? If he told the truth he could only say, 'All these evil things, my boys, I did for your health,' and then would there not just be a clamour among a jury like that? How they would cry out!

Callicles: I dare say.

Socrates: Would he not be utterly at a loss for a reply?

Callicles: He certainly would.

Socrates: And I too shall be treated in the same way, as I well know, if I am brought before the court. For I shall not be able to rehearse to the people the pleasures which I have procured for them, and which, although I am not disposed to envy either the procurers or enjoyers of them, are deemed by them to be benefits and advantages. And if any one says that I corrupt young men, and perplex their minds, or that I speak evil of old men, and use bitter words towards them, whether in private or public, it is useless for me to reply, as I truly might:— 'All this I do for the sake of justice, and with a view to your interest, my judges, and to nothing else.' And therefore there is no saying what may happen to me.

Callicles: And do you think, Socrates, that a man who is thus defenceless is in a good position?

Socrates: Yes, Callicles, if he have that defence, which as you have often acknowledged he should have — if he be his own defence, and have never said or done anything wrong, either in respect of gods or men; and this has been repeatedly acknowledged by us to be the best sort of defence. And if any one could convict me of inability to defend myself or others after this sort, I should blush for shame, whether I was convicted

before many, or before a few, or by myself alone; and if I died from want of ability to do so, that would indeed grieve me. But if I died because I have no powers of flattery or rhetoric, I am very sure that you would not find me repining at death. For no man who is not an utter fool and coward is afraid of death itself, but he is afraid of doing wrong. For to go to the world below having one's soul full of injustice is the last and worst of all evils. And in proof of what I say, if you have no objection, I should like to tell you a story.

Callicles: Very well, proceed; and then we shall have done.

Socrates: Listen, then, as story-tellers say, to a very pretty tale, which I dare say that you may be disposed to regard as a fable only, but which, as I believe, is a true tale, for I mean to speak the truth. Homer tells us (Il.), how Zeus and Poseidon and Pluto divided the empire which they inherited from their father. Now in the days of Cronos there existed a law respecting the destiny of man, which has always been, and still continues to be in Heaven, — that he who has lived all his life in justice and holiness shall go, when he is dead, to the Islands of the Blessed, and dwell there in perfect happiness out of the reach of evil; but that he who has lived unjustly and impiously shall go to the house of vengeance and punishment, which is called Tartarus. And in the time of Cronos, and even quite lately in the reign of Zeus, the judgment was given on the very day on which the men were to die; the judges were alive, and the men were alive; and the consequence was that the judgments were not well given. Then Pluto and the authorities from the Islands of the Blessed came to Zeus, and said that the souls found their way to the wrong places. Zeus said: 'I shall put a stop to this; the judgments are not well given, because the persons who are judged have their clothes on, for they are alive; and there are many who, having evil souls, are apparelled in fair bodies, or encased in wealth or rank, and, when the day of judgment arrives, numerous witnesses come forward and testify on their

behalf that they have lived righteously. The judges are awed by them, and they themselves too have their clothes on when judging; their eyes and ears and their whole bodies are interposed as a veil before their own souls. All this is a hindrance to them; there are the clothes of the judges and the clothes of the judged. — What is to be done? I will tell you: — In the first place, I will deprive men of the foreknowledge of death, which they possess at present: this power which they have Prometheus has already received my orders to take from them: in the second place, they shall be entirely stripped before they are judged, for they shall be judged when they are dead; and the judge too shall be naked, that is to say, dead — he with his naked soul shall pierce into the other naked souls; and they shall die suddenly and be deprived of all their kindred, and leave their brave attire strewn upon the earth — conducted in this manner, the judgment will be just. I knew all about the matter before any of you, and therefore I have made my sons judges; two from Asia, Minos and Rhadamanthus, and one from Europe, Aeacus. And these, when they are dead, shall give judgment in the meadow at the parting of the ways, whence the two roads lead, one to the Islands of the Blessed, and the other to Tartarus. Rhadamanthus shall judge those who come from Asia, and Aeacus those who come from Europe. And to Minos I shall give the primacy, and he shall hold a court of appeal, in case either of the two others are in any doubt: — then the judgment respecting the last journey of men will be as just as possible.'

From this tale, Callicles, which I have heard and believe, I draw the following inferences: — Death, if I am right, is in the first place the separation from one another of two things, soul and body; nothing else. And after they are separated they retain their several natures, as in life; the body keeps the same habit, and the results of treatment or accident are distinctly visible in it: for example, he who by nature or training or both, was a tall man while he was alive, will remain as he was, after he is dead; and the fat man will remain fat; and so on; and the dead man,

who in life had a fancy to have flowing hair, will have flowing hair. And if he was marked with the whip and had the prints of the scourge, or of wounds in him when he was alive, you might see the same in the dead body; and if his limbs were broken or misshapen when he was alive, the same appearance would be visible in the dead. And in a word, whatever was the habit of the body during life would be distinguishable after death, either perfectly, or in a great measure and for a certain time. And I should imagine that this is equally true of the soul, Callicles; when a man is stripped of the body, all the natural or acquired affections of the soul are laid open to view. — And when they come to the judge, as those from Asia come to Rhadamanthus, he places them near him and inspects them quite impartially, not knowing whose the soul is: perhaps he may lay hands on the soul of the great king, or of some other king or potentate, who has no soundness in him, but his soul is marked with the whip, and is full of the prints and scars of perjuries and crimes with which each action has stained him, and he is all crooked with falsehood and imposture, and has no straightness, because he has lived without truth. Him Rhadamanthus beholds, full of all deformity and disproportion, which is caused by licence and luxury and insolence and incontinence, and despatches him ignominiously to his prison, and there he undergoes the punishment which he deserves.

Now the proper office of punishment is twofold: he who is rightly punished ought either to become better and profit by it, or he ought to be made an example to his fellows, that they may see what he suffers, and fear and become better. Those who are improved when they are punished by gods and men, are those whose sins are curable; and they are improved, as in this world so also in another, by pain and suffering; for there is no other way in which they can be delivered from their evil. But they who have been guilty of the worst crimes, and are incurable by reason of their crimes, are made examples; for, as they are incurable, the time has passed at which they can receive any

benefit. They get no good themselves, but others get good when they behold them enduring for ever the most terrible and painful and fearful sufferings as the penalty of their sins — there they are, hanging up as examples, in the prison-house of the world below, a spectacle and a warning to all unrighteous men who come thither. And among them, as I confidently affirm, will be found Archelaus, if Polus truly reports of him, and any other tyrant who is like him. Of these fearful examples, most, as I believe, are taken from the class of tyrants and kings and potentates and public men, for they are the authors of the greatest and most impious crimes, because they have the power. And Homer witnesses to the truth of this; for they are always kings and potentates whom he has described as suffering everlasting punishment in the world below: such were Tantalus and Sisyphus and Tityus. But no one ever described Thersites, or any private person who was a villain, as suffering everlasting punishment, or as incurable. For to commit the worst crimes, as I am inclined to think, was not in his power, and he was happier than those who had the power. No, Callicles, the very bad men come from the class of those who have power (compare Republic). And yet in that very class there may arise good men, and worthy of all admiration they are, for where there is great power to do wrong, to live and to die justly is a hard thing, and greatly to be praised, and few there are who attain to this. Such good and true men, however, there have been, and will be again, at Athens and in other states, who have fulfilled their trust righteously; and there is one who is quite famous all over Hellas, Aristeides, the son of Lysimachus. But, in general, great men are also bad, my friend.

As I was saying, Rhadamanthus, when he gets a soul of the bad kind, knows nothing about him, neither who he is, nor who his parents are; he knows only that he has got hold of a villain; and seeing this, he stamps him as curable or incurable, and sends him away to Tartarus, whither he goes and receives his proper recompense. Or, again, he looks with admiration on the soul of

some just one who has lived in holiness and truth; he may have been a private man or not; and I should say, Callicles, that he is most likely to have been a philosopher who has done his own work, and not troubled himself with the doings of other men in his lifetime; him Rhadamanthus sends to the Islands of the Blessed. Aeacus does the same; and they both have sceptres, and judge; but Minos alone has a golden sceptre and is seated looking on, as Odysseus in Homer declares that he saw him:

‘Holding a sceptre of gold, and giving laws to the dead.’

Now I, Callicles, am persuaded of the truth of these things, and I consider how I shall present my soul whole and undefiled before the judge in that day. Renouncing the honours at which the world aims, I desire only to know the truth, and to live as well as I can, and, when I die, to die as well as I can. And, to the utmost of my power, I exhort all other men to do the same. And, in return for your exhortation of me, I exhort you also to take part in the great combat, which is the combat of life, and greater than every other earthly conflict. And I retort your reproach of me, and say, that you will not be able to help yourself when the day of trial and judgment, of which I was speaking, comes upon you; you will go before the judge, the son of Aegina, and, when he has got you in his grip and is carrying you off, you will gape and your head will swim round, just as mine would in the courts of this world, and very likely some one will shamefully box you on the ears, and put upon you any sort of insult.

Perhaps this may appear to you to be only an old wife’s tale, which you will contemn. And there might be reason in your contemning such tales, if by searching we could find out anything better or truer: but now you see that you and Polus and Gorgias, who are the three wisest of the Greeks of our day, are not able to show that we ought to live any life which does not profit in another world as well as in this. And of all that has been said, nothing remains unshaken but the saying, that to do injustice is more to be avoided than to suffer injustice, and that

the reality and not the appearance of virtue is to be followed above all things, as well in public as in private life; and that when any one has been wrong in anything, he is to be chastised, and that the next best thing to a man being just is that he should become just, and be chastised and punished; also that he should avoid all flattery of himself as well as of others, of the few or of the many: and rhetoric and any other art should be used by him, and all his actions should be done always, with a view to justice.

Follow me then, and I will lead you where you will be happy in life and after death, as the argument shows. And never mind if some one despises you as a fool, and insults you, if he has a mind; let him strike you, by Zeus, and do you be of good cheer, and do not mind the insulting blow, for you will never come to any harm in the practice of virtue, if you are a really good and true man. When we have practised virtue together, we will apply ourselves to politics, if that seems desirable, or we will advise about whatever else may seem good to us, for we shall be better able to judge then. In our present condition we ought not to give ourselves airs, for even on the most important subjects we are always changing our minds; so utterly stupid are we! Let us, then, take the argument as our guide, which has revealed to us that the best way of life is to practise justice and every virtue in life and death. This way let us go; and in this exhort all men to follow, not in the way to which you trust and in which you exhort me to follow you; for that way, Callicles, is nothing worth.

Philebus

ΦΙΛΗΒΟΣ

Socrates: Observe, Protarchus, the nature of the position which you are now going to take from Philebus, and what the other position is which I maintain, and which, if you do not approve of it, is to be controverted by you. Shall you and I sum up the two sides?

Protarchus: By all means.

Socrates: Philebus was saying that enjoyment and pleasure and delight, and the class of feelings akin to them, are a good to every living being, whereas I contend, that not these, but wisdom and intelligence and memory, and their kindred, right opinion and true reasoning, are better and more desirable than pleasure for all who are able to partake of them, and that to all such who are or ever will be they are the most advantageous of all things. Have I not given, Philebus, a fair statement of the two sides of the argument?

Philebus: Nothing could be fairer, Socrates.

Socrates: And do you, Protarchus, accept the position which is assigned to you?

Protarchus: I cannot do otherwise, since our excellent Philebus has left the field.

Socrates: Surely the truth about these matters ought, by all means, to be ascertained.

Protarchus: Certainly.

Socrates: Shall we further agree —

Protarchus: To what?

Socrates: That you and I must now try to indicate some state and disposition of the soul, which has the property of making all men happy.

Protarchus: Yes, by all means.

Socrates: And you say that pleasure, and I say that wisdom, is such a state?

Protarchus: True.

Socrates: And what if there be a third state, which is better than either? Then both of us are vanquished — are we not? But if this life, which really has the power of making men happy, turn out to be more akin to pleasure than to wisdom, the life of pleasure may still have the advantage over the life of wisdom.

Protarchus: True.

Socrates: Or suppose that the better life is more nearly allied to wisdom, then wisdom conquers, and pleasure is defeated; — do you agree?

Protarchus: Certainly.

Socrates: And what do you say, Philebus?

Philebus: I say, and shall always say, that pleasure is easily the conqueror; but you must decide for yourself, Protarchus.

Protarchus: You, Philebus, have handed over the argument to me, and have no longer a voice in the matter?

Philebus: True enough. Nevertheless I would clear myself and deliver my soul of you; and I call the goddess herself to witness that I now do so.

Protarchus: You may appeal to us; we too will be the witnesses of your words. And now, Socrates, whether Philebus is pleased or displeased, we will proceed with the argument.

Socrates: Then let us begin with the goddess herself, of whom Philebus says that she is called Aphrodite, but that her real name is Pleasure.

Protarchus: Very good.

Socrates: The awe which I always feel, Protarchus, about the names of the gods is more than human — it exceeds all other fears. And now I would not sin against Aphrodite by naming her amiss; let her be called what she pleases. But Pleasure I know to be manifold, and with her, as I was just now saying, we must begin, and consider what her nature is. She has one name, and therefore you would imagine that she is one; and yet surely she takes the most varied and even unlike forms. For do we not say that the intemperate has pleasure, and that the temperate has pleasure in his very temperance, — that the fool is pleased when he is full of foolish fancies and hopes, and that the wise man has pleasure in his wisdom? and how foolish would any one be who affirmed that all these opposite pleasures are severally alike!

Protarchus: Why, Socrates, they are opposed in so far as they spring from opposite sources, but they are not in themselves opposite. For must not pleasure be of all things most absolutely like pleasure, — that is, like itself?

Socrates: Yes, my good friend, just as colour is like colour; — in so far as colours are colours, there is no difference between them; and yet we all know that black is not only unlike, but even absolutely opposed to white: or again, as figure is like figure, for all figures are comprehended under one class; and yet particular figures may be absolutely opposed to one another, and there is an infinite diversity of them. And we might find similar examples in many other things; therefore do not rely upon this argument, which would go to prove the unity of the most extreme opposites. And I suspect that we shall find a similar opposition among pleasures.

Protarchus: Very likely; but how will this invalidate the argument?

Socrates: Why, I shall reply, that dissimilar as they are, you apply to them a new predicate, for you say that all pleasant things are good; now although no one can argue that pleasure is not pleasure, he may argue, as we are doing, that pleasures are oftener bad than good; but you call them all good, and at the same time are compelled, if you are pressed, to acknowledge that they are unlike. And so you must tell us what is the identical quality existing alike in good and bad pleasures, which makes you designate all of them as good.

Protarchus: What do you mean, Socrates? Do you think that any one who asserts pleasure to be the good, will tolerate the notion that some pleasures are good and others bad?

Socrates: And yet you will acknowledge that they are different from one another, and sometimes opposed?

Protarchus: Not in so far as they are pleasures.

Socrates: That is a return to the old position, Protarchus, and so we are to say (are we?) that there is no difference in pleasures, but that they are all alike; and the examples which have just been cited do not pierce our dull minds, but we go on arguing all the same, like the weakest and most inexperienced reasoners? (Probably corrupt.)

Protarchus: What do you mean?

Socrates: Why, I mean to say, that in self-defence I may, if I like, follow your example, and assert boldly that the two things most unlike are most absolutely alike; and the result will be that you and I will prove ourselves to be very tyros in the art of disputing; and the argument will be blown away and lost. Suppose that we put back, and return to the old position; then perhaps we may come to an understanding with one another.

Protarchus: How do you mean?

Socrates: Shall I, Protarchus, have my own question asked of me by you?

Protarchus: What question?

Socrates: Ask me whether wisdom and science and mind, and those other qualities which I, when asked by you at first what is the nature of the good, affirmed to be good, are not in the same case with the pleasures of which you spoke.

Protarchus: What do you mean?

Socrates: The sciences are a numerous class, and will be found to present great differences. But even admitting that, like the pleasures, they are opposite as well as different, should I be worthy of the name of dialectician if, in order to avoid this difficulty, I were to say (as you are saying of pleasure) that there is no difference between one science and another; — would not the argument founder and disappear like an idle tale, although we might ourselves escape drowning by clinging to a fallacy?

Protarchus: May none of this befal us, except the deliverance! Yet I like the even-handed justice which is applied to both our arguments. Let us assume, then, that there are many and diverse pleasures, and many and different sciences.

Socrates: And let us have no concealment, Protarchus, of the differences between my good and yours; but let us bring them to the light in the hope that, in the process of testing them, they may show whether pleasure is to be called the good, or wisdom, or some third quality; for surely we are not now simply contending in order that my view or that yours may prevail, but I presume that we ought both of us to be fighting for the truth.

Protarchus: Certainly we ought.

Socrates: Then let us have a more definite understanding and establish the principle on which the argument rests.

Protarchus: What principle?

Socrates: A principle about which all men are always in a difficulty, and some men sometimes against their will.

Protarchus: Speak plainer.

Socrates: The principle which has just turned up, which is a marvel of nature; for that one should be many or many one, are wonderful propositions; and he who affirms either is very open to attack.

Protarchus: Do you mean, when a person says that I, Protarchus, am by nature one and also many, dividing the single ‘me’ into many ‘me’s,’ and even opposing them as great and small, light and heavy, and in ten thousand other ways?

Socrates: Those, Protarchus, are the common and acknowledged paradoxes about the one and many, which I may say that everybody has by this time agreed to dismiss as childish and obvious and detrimental to the true course of thought; and no more favour is shown to that other puzzle, in which a person proves the members and parts of anything to be divided, and then confessing that they are all one, says laughingly in disproof of his own words: Why, here is a miracle, the one is many and infinite, and the many are only one.

Protarchus: But what, Socrates, are those other marvels connected with this subject which, as you imply, have not yet become common and acknowledged?

Socrates: When, my boy, the one does not belong to the class of things that are born and perish, as in the instances which we were giving, for in those cases, and when unity is of this concrete nature, there is, as I was saying, a universal consent that no refutation is needed; but when the assertion is made that man is one, or ox is one, or beauty one, or the good one, then the interest which attaches to these and similar unities and the attempt which is made to divide them gives birth to a controversy.

Protarchus: Of what nature?

Socrates: In the first place, as to whether these unities have a real existence; and then how each individual unity, being always the same, and incapable either of generation or of destruction, but retaining a permanent individuality, can be conceived either as dispersed and multiplied in the infinity of the world of generation, or as still entire and yet divided from itself, which latter would seem to be the greatest impossibility of all, for how can one and the same thing be at the same time in one and in many things? These, Protarchus, are the real difficulties, and this is the one and many to which they relate; they are the source of great perplexity if ill decided, and the right determination of them is very helpful.

Protarchus: Then, Socrates, let us begin by clearing up these questions.

Socrates: That is what I should wish.

Protarchus: And I am sure that all my other friends will be glad to hear them discussed; Philebus, fortunately for us, is not disposed to move, and we had better not stir him up with questions.

Socrates: Good; and where shall we begin this great and multifarious battle, in which such various points are at issue? Shall we begin thus?

Protarchus: How?

Socrates: We say that the one and many become identified by thought, and that now, as in time past, they run about together, in and out of every word which is uttered, and that this union of them will never cease, and is not now beginning, but is, as I believe, an everlasting quality of thought itself, which never grows old. Any young man, when he first tastes these subtleties, is delighted, and fancies that he has found a treasure of wisdom; in the first enthusiasm of his joy he leaves no stone, or rather no thought unturned, now rolling up the many into the one, and kneading them together, now unfolding and dividing them; he

puzzles himself first and above all, and then he proceeds to puzzle his neighbours, whether they are older or younger, or of his own age — that makes no difference; neither father nor mother does he spare; no human being who has ears is safe from him, hardly even his dog, and a barbarian would have no chance of escaping him, if an interpreter could only be found.

Protarchus: Considering, Socrates, how many we are, and that all of us are young men, is there not a danger that we and Philebus may all set upon you, if you abuse us? We understand what you mean; but is there no charm by which we may dispel all this confusion, no more excellent way of arriving at the truth? If there is, we hope that you will guide us into that way, and we will do our best to follow, for the enquiry in which we are engaged, Socrates, is not unimportant.

Socrates: The reverse of unimportant, my boys, as Philebus calls you, and there neither is nor ever will be a better than my own favourite way, which has nevertheless already often deserted me and left me helpless in the hour of need.

Protarchus: Tell us what that is.

Socrates: One which may be easily pointed out, but is by no means easy of application; it is the parent of all the discoveries in the arts.

Protarchus: Tell us what it is.

Socrates: A gift of heaven, which, as I conceive, the gods tossed among men by the hands of a new Prometheus, and therewith a blaze of light; and the ancients, who were our betters and nearer the gods than we are, handed down the tradition, that whatever things are said to be are composed of one and many, and have the finite and infinite implanted in them: seeing, then, that such is the order of the world, we too ought in every enquiry to begin by laying down one idea of that which is the subject of enquiry; this unity we shall find in everything. Having found it, we may next proceed to look for two, if there be two,

or, if not, then for three or some other number, subdividing each of these units, until at last the unity with which we began is seen not only to be one and many and infinite, but also a definite number; the infinite must not be suffered to approach the many until the entire number of the species intermediate between unity and infinity has been discovered, — then, and not till then, we may rest from division, and without further troubling ourselves about the endless individuals may allow them to drop into infinity. This, as I was saying, is the way of considering and learning and teaching one another, which the gods have handed down to us. But the wise men of our time are either too quick or too slow in conceiving plurality in unity. Having no method, they make their one and many anyhow, and from unity pass at once to infinity; the intermediate steps never occur to them. And this, I repeat, is what makes the difference between the mere art of disputation and true dialectic.

Protarchus: I think that I partly understand you Socrates, but I should like to have a clearer notion of what you are saying.

Socrates: I may illustrate my meaning by the letters of the alphabet, Protarchus, which you were made to learn as a child.

Protarchus: How do they afford an illustration?

Socrates: The sound which passes through the lips whether of an individual or of all men is one and yet infinite.

Protarchus: Very true.

Socrates: And yet not by knowing either that sound is one or that sound is infinite are we perfect in the art of speech, but the knowledge of the number and nature of sounds is what makes a man a grammarian.

Protarchus: Very true.

Socrates: And the knowledge which makes a man a musician is of the same kind.

Protarchus: How so?

Socrates: Sound is one in music as well as in grammar?

Protarchus: Certainly.

Socrates: And there is a higher note and a lower note, and a note of equal pitch: — may we affirm so much?

Protarchus: Yes.

Socrates: But you would not be a real musician if this was all that you knew; though if you did not know this you would know almost nothing of music.

Protarchus: Nothing.

Socrates: But when you have learned what sounds are high and what low, and the number and nature of the intervals and their limits or proportions, and the systems compounded out of them, which our fathers discovered, and have handed down to us who are their descendants under the name of harmonies; and the affections corresponding to them in the movements of the human body, which when measured by numbers ought, as they say, to be called rhythms and measures; and they tell us that the same principle should be applied to every one and many; — when, I say, you have learned all this, then, my dear friend, you are perfect; and you may be said to understand any other subject, when you have a similar grasp of it. But the infinity of kinds and the infinity of individuals which there is in each of them, when not classified, creates in every one of us a state of infinite ignorance; and he who never looks for number in anything, will not himself be looked for in the number of famous men.

Protarchus: I think that what Socrates is now saying is excellent, Philebus.

Philebus: I think so too, but how do his words bear upon us and upon the argument?

Socrates: Philebus is right in asking that question of us, Protarchus.

Protarchus: Indeed he is, and you must answer him.

Socrates: I will; but you must let me make one little remark first about these matters; I was saying, that he who begins with any individual unity, should proceed from that, not to infinity, but to a definite number, and now I say conversely, that he who has to begin with infinity should not jump to unity, but he should look about for some number representing a certain quantity, and thus out of all end in one. And now let us return for an illustration of our principle to the case of letters.

Protarchus: What do you mean?

Socrates: Some god or divine man, who in the Egyptian legend is said to have been Theuth, observing that the human voice was infinite, first distinguished in this infinity a certain number of vowels, and then other letters which had sound, but were not pure vowels (i.e., the semivowels); these too exist in a definite number; and lastly, he distinguished a third class of letters which we now call mutes, without voice and without sound, and divided these, and likewise the two other classes of vowels and semivowels, into the individual sounds, and told the number of them, and gave to each and all of them the name of letters; and observing that none of us could learn any one of them and not learn them all, and in consideration of this common bond which in a manner united them, he assigned to them all a single art, and this he called the art of grammar or letters.

Philebus: The illustration, Protarchus, has assisted me in understanding the original statement, but I still feel the defect of which I just now complained.

Socrates: Are you going to ask, Philebus, what this has to do with the argument?

Philebus: Yes, that is a question which Protarchus and I have been long asking.

Socrates: Assuredly you have already arrived at the answer to the question which, as you say, you have been so long asking?

Philebus: How so?

Socrates: Did we not begin by enquiring into the comparative eligibility of pleasure and wisdom?

Philebus: Certainly.

Socrates: And we maintain that they are each of them one?

Philebus: True.

Socrates: And the precise question to which the previous discussion desires an answer is, how they are one and also many (i.e., how they have one genus and many species), and are not at once infinite, and what number of species is to be assigned to either of them before they pass into infinity (i.e. into the infinite number of individuals).

Protarchus: That is a very serious question, Philebus, to which Socrates has ingeniously brought us round, and please to consider which of us shall answer him; there may be something ridiculous in my being unable to answer, and therefore imposing the task upon you, when I have undertaken the whole charge of the argument, but if neither of us were able to answer, the result methinks would be still more ridiculous. Let us consider, then, what we are to do: — Socrates, if I understood him rightly, is asking whether there are not kinds of pleasure, and what is the number and nature of them, and the same of wisdom.

Socrates: Most true, O son of Callias; and the previous argument showed that if we are not able to tell the kinds of everything that has unity, likeness, sameness, or their opposites, none of us will be of the smallest use in any enquiry.

Protarchus: That seems to be very near the truth, Socrates. Happy would the wise man be if he knew all things, and the next best thing for him is that he should know himself. Why do I say so at this moment? I will tell you. You, Socrates, have granted us this opportunity of conversing with you, and are ready to assist us in determining what is the best of human goods. For when

Philebus said that pleasure and delight and enjoyment and the like were the chief good, you answered — No, not those, but another class of goods; and we are constantly reminding ourselves of what you said, and very properly, in order that we may not forget to examine and compare the two. And these goods, which in your opinion are to be designated as superior to pleasure, and are the true objects of pursuit, are mind and knowledge and understanding and art, and the like. There was a dispute about which were the best, and we playfully threatened that you should not be allowed to go home until the question was settled; and you agreed, and placed yourself at our disposal. And now, as children say, what has been fairly given cannot be taken back; cease then to fight against us in this way.

Socrates: In what way?

Philebus: Do not perplex us, and keep asking questions of us to which we have not as yet any sufficient answer to give; let us not imagine that a general puzzling of us all is to be the end of our discussion, but if we are unable to answer, do you answer, as you have promised. Consider, then, whether you will divide pleasure and knowledge according to their kinds; or you may let the matter drop, if you are able and willing to find some other mode of clearing up our controversy.

Socrates: If you say that, I have nothing to apprehend, for the words ‘if you are willing’ dispel all my fear; and, moreover, a god seems to have recalled something to my mind.

Philebus: What is that?

Socrates: I remember to have heard long ago certain discussions about pleasure and wisdom, whether awake or in a dream I cannot tell; they were to the effect that neither the one nor the other of them was the good, but some third thing, which was different from them, and better than either. If this be clearly established, then pleasure will lose the victory, for the good will cease to be identified with her: — Am I not right?

Protarchus: Yes.

Socrates: And there will cease to be any need of distinguishing the kinds of pleasures, as I am inclined to think, but this will appear more clearly as we proceed.

Protarchus: Capital, Socrates; pray go on as you propose.

Socrates: But, let us first agree on some little points.

Protarchus: What are they?

Socrates: Is the good perfect or imperfect?

Protarchus: The most perfect, Socrates, of all things.

Socrates: And is the good sufficient?

Protarchus: Yes, certainly, and in a degree surpassing all other things.

Socrates: And no one can deny that all percipient beings desire and hunt after good, and are eager to catch and have the good about them, and care not for the attainment of anything which is not accompanied by good.

Protarchus: That is undeniable.

Socrates: Now let us part off the life of pleasure from the life of wisdom, and pass them in review.

Protarchus: How do you mean?

Socrates: Let there be no wisdom in the life of pleasure, nor any pleasure in the life of wisdom, for if either of them is the chief good, it cannot be supposed to want anything, but if either is shown to want anything, then it cannot really be the chief good.

Protarchus: Impossible.

Socrates: And will you help us to test these two lives?

Protarchus: Certainly.

Socrates: Then answer.

Protarchus: Ask.

Socrates: Would you choose, Protarchus, to live all your life long in the enjoyment of the greatest pleasures?

Protarchus: Certainly I should.

Socrates: Would you consider that there was still anything wanting to you if you had perfect pleasure?

Protarchus: Certainly not.

Socrates: Reflect; would you not want wisdom and intelligence and forethought, and similar qualities? would you not at any rate want sight?

Protarchus: Why should I? Having pleasure I should have all things.

Socrates: Living thus, you would always throughout your life enjoy the greatest pleasures?

Protarchus: I should.

Socrates: But if you had neither mind, nor memory, nor knowledge, nor true opinion, you would in the first place be utterly ignorant of whether you were pleased or not, because you would be entirely devoid of intelligence.

Protarchus: Certainly.

Socrates: And similarly, if you had no memory you would not recollect that you had ever been pleased, nor would the slightest recollection of the pleasure which you feel at any moment remain with you; and if you had no true opinion you would not think that you were pleased when you were; and if you had no power of calculation you would not be able to calculate on future pleasure, and your life would be the life, not of a man, but of an oyster or ‘pulmo marinus.’ Could this be otherwise?

Protarchus: No.

Socrates: But is such a life eligible?

Protarchus: I cannot answer you, Socrates; the argument has taken away from me the power of speech.

Socrates: We must keep up our spirits; — let us now take the life of mind and examine it in turn.

Protarchus: And what is this life of mind?

Socrates: I want to know whether any one of us would consent to live, having wisdom and mind and knowledge and memory of all things, but having no sense of pleasure or pain, and wholly unaffected by these and the like feelings?

Protarchus: Neither life, Socrates, appears eligible to me, nor is likely, as I should imagine, to be chosen by any one else.

Socrates: What would you say, Protarchus, to both of these in one, or to one that was made out of the union of the two?

Protarchus: Out of the union, that is, of pleasure with mind and wisdom?

Socrates: Yes, that is the life which I mean.

Protarchus: There can be no difference of opinion; not some but all would surely choose this third rather than either of the other two, and in addition to them.

Socrates: But do you see the consequence?

Protarchus: To be sure I do. The consequence is, that two out of the three lives which have been proposed are neither sufficient nor eligible for man or for animal.

Socrates: Then now there can be no doubt that neither of them has the good, for the one which had would certainly have been sufficient and perfect and eligible for every living creature or thing that was able to live such a life; and if any of us had chosen any other, he would have chosen contrary to the nature of the truly eligible, and not of his own free will, but either through ignorance or from some unhappy necessity.

Protarchus: Certainly that seems to be true.

Socrates: And now have I not sufficiently shown that Philebus' goddess is not to be regarded as identical with the good?

Philebus: Neither is your 'mind' the good, Socrates, for that will be open to the same objections.

Socrates: Perhaps, Philebus, you may be right in saying so of my 'mind'; but of the true, which is also the divine mind, far otherwise. However, I will not at present claim the first place for mind as against the mixed life; but we must come to some understanding about the second place. For you might affirm pleasure and I mind to be the cause of the mixed life; and in that case although neither of them would be the good, one of them might be imagined to be the cause of the good. And I might proceed further to argue in opposition to Philebus, that the element which makes this mixed life eligible and good, is more akin and more similar to mind than to pleasure. And if this is true, pleasure cannot be truly said to share either in the first or second place, and does not, if I may trust my own mind, attain even to the third.

Protarchus: Truly, Socrates, pleasure appears to me to have had a fall; in fighting for the palm, she has been smitten by the argument, and is laid low. I must say that mind would have fallen too, and may therefore be thought to show discretion in not putting forward a similar claim. And if pleasure were deprived not only of the first but of the second place, she would be terribly damaged in the eyes of her admirers, for not even to them would she still appear as fair as before.

Socrates: Well, but had we not better leave her now, and not pain her by applying the crucial test, and finally detecting her?

Protarchus: Nonsense, Socrates.

Socrates: Why? because I said that we had better not pain pleasure, which is an impossibility?

Protarchus: Yes, and more than that, because you do not seem to be aware that none of us will let you go home until you have

finished the argument.

Socrates: Heavens! Protarchus, that will be a tedious business, and just at present not at all an easy one. For in going to war in the cause of mind, who is aspiring to the second prize, I ought to have weapons of another make from those which I used before; some, however, of the old ones may do again. And must I then finish the argument?

Protarchus: Of course you must.

Socrates: Let us be very careful in laying the foundation.

Protarchus: What do you mean?

Socrates: Let us divide all existing things into two, or rather, if you do not object, into three classes.

Protarchus: Upon what principle would you make the division?

Socrates: Let us take some of our newly-found notions.

Protarchus: Which of them?

Socrates: Were we not saying that God revealed a finite element of existence, and also an infinite?

Protarchus: Certainly.

Socrates: Let us assume these two principles, and also a third, which is compounded out of them; but I fear that I am ridiculously clumsy at these processes of division and enumeration.

Protarchus: What do you mean, my good friend?

Socrates: I say that a fourth class is still wanted.

Protarchus: What will that be?

Socrates: Find the cause of the third or compound, and add this as a fourth class to the three others.

Protarchus: And would you like to have a fifth class or cause of resolution as well as a cause of composition?

Socrates: Not, I think, at present; but if I want a fifth at some future time you shall allow me to have it.

Protarchus: Certainly.

Socrates: Let us begin with the first three; and as we find two out of the three greatly divided and dispersed, let us endeavour to reunite them, and see how in each of them there is a one and many.

Protarchus: If you would explain to me a little more about them, perhaps I might be able to follow you.

Socrates: Well, the two classes are the same which I mentioned before, one the finite, and the other the infinite; I will first show that the infinite is in a certain sense many, and the finite may be hereafter discussed.

Protarchus: I agree.

Socrates: And now consider well; for the question to which I invite your attention is difficult and controverted. When you speak of hotter and colder, can you conceive any limit in those qualities? Does not the more and less, which dwells in their very nature, prevent their having any end? for if they had an end, the more and less would themselves have an end.

Protarchus: That is most true.

Socrates: Ever, as we say, into the hotter and the colder there enters a more and a less.

Protarchus: Yes.

Socrates: Then, says the argument, there is never any end of them, and being endless they must also be infinite.

Protarchus: Yes, Socrates, that is exceedingly true.

Socrates: Yes, my dear Protarchus, and your answer reminds me that such an expression as ‘exceedingly,’ which you have just uttered, and also the term ‘gently,’ have the same significance as more or less; for whenever they occur they do not allow of the

existence of quantity — they are always introducing degrees into actions, instituting a comparison of a more or a less excessive or a more or a less gentle, and at each creation of more or less, quantity disappears. For, as I was just now saying, if quantity and measure did not disappear, but were allowed to intrude in the sphere of more and less and the other comparatives, these last would be driven out of their own domain. When definite quantity is once admitted, there can be no longer a ‘hotter’ or a ‘colder’ (for these are always progressing, and are never in one stay); but definite quantity is at rest, and has ceased to progress. Which proves that comparatives, such as the hotter and the colder, are to be ranked in the class of the infinite.

Protarchus: Your remark certainly has the look of truth, Socrates; but these subjects, as you were saying, are difficult to follow at first. I think however, that if I could hear the argument repeated by you once or twice, there would be a substantial agreement between us.

Socrates: Yes, and I will try to meet your wish; but, as I would rather not waste time in the enumeration of endless particulars, let me know whether I may not assume as a note of the infinite —

Protarchus: What?

Socrates: I want to know whether such things as appear to us to admit of more or less, or are denoted by the words ‘exceedingly,’ ‘gently,’ ‘extremely,’ and the like, may not be referred to the class of the infinite, which is their unity, for, as was asserted in the previous argument, all things that were divided and dispersed should be brought together, and have the mark or seal of some one nature, if possible, set upon them — do you remember?

Protarchus: Yes.

Socrates: And all things which do not admit of more or less, but admit their opposites, that is to say, first of all, equality, and the equal, or again, the double, or any other ratio of number and measure — all these may, I think, be rightly reckoned by us in the class of the limited or finite; what do you say?

Protarchus: Excellent, Socrates.

Socrates: And now what nature shall we ascribe to the third or compound kind?

Protarchus: You, I think, will have to tell me that.

Socrates: Rather God will tell you, if there be any God who will listen to my prayers.

Protarchus: Offer up a prayer, then, and think.

Socrates: I am thinking, Protarchus, and I believe that some God has befriended us.

Protarchus: What do you mean, and what proof have you to offer of what you are saying?

Socrates: I will tell you, and do you listen to my words.

Protarchus: Proceed.

Socrates: Were we not speaking just now of hotter and colder?

Protarchus: True.

Socrates: Add to them drier, wetter, more, less, swifter, slower, greater, smaller, and all that in the preceding argument we placed under the unity of more and less.

Protarchus: In the class of the infinite, you mean?

Socrates: Yes; and now mingle this with the other.

Protarchus: What is the other.

Socrates: The class of the finite which we ought to have brought together as we did the infinite; but, perhaps, it will come to the same thing if we do so now; — when the two are combined, a

third will appear.

Protarchus: What do you mean by the class of the finite?

Socrates: The class of the equal and the double, and any class which puts an end to difference and opposition, and by introducing number creates harmony and proportion among the different elements.

Protarchus: I understand; you seem to me to mean that the various opposites, when you mingle with them the class of the finite, takes certain forms.

Socrates: Yes, that is my meaning.

Protarchus: Proceed.

Socrates: Does not the right participation in the finite give health — in disease, for instance?

Protarchus: Certainly.

Socrates: And whereas the high and low, the swift and the slow are infinite or unlimited, does not the addition of the principles aforesaid introduce a limit, and perfect the whole frame of music?

Protarchus: Yes, certainly.

Socrates: Or, again, when cold and heat prevail, does not the introduction of them take away excess and indefiniteness, and infuse moderation and harmony?

Protarchus: Certainly.

Socrates: And from a like admixture of the finite and infinite come the seasons, and all the delights of life?

Protarchus: Most true.

Socrates: I omit ten thousand other things, such as beauty and health and strength, and the many beauties and high perfections of the soul: O my beautiful Philebus, the goddess, methinks, seeing the universal wantonness and wickedness of all things,

and that there was in them no limit to pleasures and self-indulgence, devised the limit of law and order, whereby, as you say, Philebus, she torments, or as I maintain, delivers the soul. — What think you, Protarchus?

Protarchus: Her ways are much to my mind, Socrates.

Socrates: You will observe that I have spoken of three classes?

Protarchus: Yes, I think that I understand you: you mean to say that the infinite is one class, and that the finite is a second class of existences; but what you would make the third I am not so certain.

Socrates: That is because the amazing variety of the third class is too much for you, my dear friend; but there was not this difficulty with the infinite, which also comprehended many classes, for all of them were sealed with the note of more and less, and therefore appeared one.

Protarchus: True.

Socrates: And the finite or limit had not many divisions, and we readily acknowledged it to be by nature one?

Protarchus: Yes.

Socrates: Yes, indeed; and when I speak of the third class, understand me to mean any offspring of these, being a birth into true being, effected by the measure which the limit introduces.

Protarchus: I understand.

Socrates: Still there was, as we said, a fourth class to be investigated, and you must assist in the investigation; for does not everything which comes into being, of necessity come into being through a cause?

Protarchus: Yes, certainly; for how can there be anything which has no cause?

Socrates: And is not the agent the same as the cause in all except name; the agent and the cause may be rightly called one?

Protarchus: Very true.

Socrates: And the same may be said of the patient, or effect; we shall find that they too differ, as I was saying, only in name — shall we not?

Protarchus: We shall.

Socrates: The agent or cause always naturally leads, and the patient or effect naturally follows it?

Protarchus: Certainly.

Socrates: Then the cause and what is subordinate to it in generation are not the same, but different?

Protarchus: True.

Socrates: Did not the things which were generated, and the things out of which they were generated, furnish all the three classes?

Protarchus: Yes.

Socrates: And the creator or cause of them has been satisfactorily proven to be distinct from them, — and may therefore be called a fourth principle?

Protarchus: So let us call it.

Socrates: Quite right; but now, having distinguished the four, I think that we had better refresh our memories by recapitulating each of them in order.

Protarchus: By all means.

Socrates: Then the first I will call the infinite or unlimited, and the second the finite or limited; then follows the third, an essence compound and generated; and I do not think that I shall be far wrong in speaking of the cause of mixture and generation as the fourth.

Protarchus: Certainly not.

Socrates: And now what is the next question, and how came we hither? Were we not enquiring whether the second place belonged to pleasure or wisdom?

Protarchus: We were.

Socrates: And now, having determined these points, shall we not be better able to decide about the first and second place, which was the original subject of dispute?

Protarchus: I dare say.

Socrates: We said, if you remember, that the mixed life of pleasure and wisdom was the conqueror — did we not?

Protarchus: True.

Socrates: And we see what is the place and nature of this life and to what class it is to be assigned?

Protarchus: Beyond a doubt.

Socrates: This is evidently comprehended in the third or mixed class; which is not composed of any two particular ingredients, but of all the elements of infinity, bound down by the finite, and may therefore be truly said to comprehend the conqueror life.

Protarchus: Most true.

Socrates: And what shall we say, Philebus, of your life which is all sweetness; and in which of the aforesaid classes is that to be placed? Perhaps you will allow me to ask you a question before you answer?

Philebus: Let me hear.

Socrates: Have pleasure and pain a limit, or do they belong to the class which admits of more and less?

Philebus: They belong to the class which admits of more, Socrates; for pleasure would not be perfectly good if she were not infinite in quantity and degree.

Socrates: Nor would pain, Philebus, be perfectly evil. And therefore the infinite cannot be that element which imparts to pleasure some degree of good. But now — admitting, if you like, that pleasure is of the nature of the infinite — in which of the aforesaid classes, O Protarchus and Philebus, can we without irreverence place wisdom and knowledge and mind? And let us be careful, for I think that the danger will be very serious if we err on this point.

Philebus: You magnify, Socrates, the importance of your favourite god.

Socrates: And you, my friend, are also magnifying your favourite goddess; but still I must beg you to answer the question.

Protarchus: Socrates is quite right, Philebus, and we must submit to him.

Philebus: And did not you, Protarchus, propose to answer in my place?

Protarchus: Certainly I did; but I am now in a great strait, and I must entreat you, Socrates, to be our spokesman, and then we shall not say anything wrong or disrespectful of your favourite.

Socrates: I must obey you, Protarchus; nor is the task which you impose a difficult one; but did I really, as Philebus implies, disconcert you with my playful solemnity, when I asked the question to what class mind and knowledge belong?

Protarchus: You did, indeed, Socrates.

Socrates: Yet the answer is easy, since all philosophers assert with one voice that mind is the king of heaven and earth — in reality they are magnifying themselves. And perhaps they are right. But still I should like to consider the class of mind, if you do not object, a little more fully.

Philebus: Take your own course, Socrates, and never mind length; we shall not tire of you.

Socrates: Very good; let us begin then, Protarchus, by asking a question.

Protarchus: What question?

Socrates: Whether all this which they call the universe is left to the guidance of unreason and chance medley, or, on the contrary, as our fathers have declared, ordered and governed by a marvellous intelligence and wisdom.

Protarchus: Wide asunder are the two assertions, illustrious Socrates, for that which you were just now saying to me appears to be blasphemy; but the other assertion, that mind orders all things, is worthy of the aspect of the world, and of the sun, and of the moon, and of the stars and of the whole circle of the heavens; and never will I say or think otherwise.

Socrates: Shall we then agree with them of old time in maintaining this doctrine, — not merely reasserting the notions of others, without risk to ourselves, — but shall we share in the danger, and take our part of the reproach which will await us, when an ingenious individual declares that all is disorder?

Protarchus: That would certainly be my wish.

Socrates: Then now please to consider the next stage of the argument.

Protarchus: Let me hear.

Socrates: We see that the elements which enter into the nature of the bodies of all animals, fire, water, air, and, as the storm-tossed sailor cries, ‘land’ (i.e., earth), reappear in the constitution of the world.

Protarchus: The proverb may be applied to us; for truly the storm gathers over us, and we are at our wit’s end.

Socrates: There is something to be remarked about each of these elements.

Protarchus: What is it?

Socrates: Only a small fraction of any one of them exists in us, and that of a mean sort, and not in any way pure, or having any power worthy of its nature. One instance will prove this of all of them; there is fire within us, and in the universe.

Protarchus: True.

Socrates: And is not our fire small and weak and mean? But the fire in the universe is wonderful in quantity and beauty, and in every power that fire has.

Protarchus: Most true.

Socrates: And is the fire in the universe nourished and generated and ruled by the fire in us, or is the fire in you and me, and in other animals, dependent on the universal fire?

Protarchus: That is a question which does not deserve an answer.

Socrates: Right; and you would say the same, if I am not mistaken, of the earth which is in animals and the earth which is in the universe, and you would give a similar reply about all the other elements?

Protarchus: Why, how could any man who gave any other be deemed in his senses?

Socrates: I do not think that he could — but now go on to the next step. When we saw those elements of which we have been speaking gathered up in one, did we not call them a body?

Protarchus: We did.

Socrates: And the same may be said of the cosmos, which for the same reason may be considered to be a body, because made up of the same elements.

Protarchus: Very true.

Socrates: But is our body nourished wholly by this body, or is this body nourished by our body, thence deriving and having the qualities of which we were just now speaking?

Protarchus: That again, Socrates, is a question which does not deserve to be asked.

Socrates: Well, tell me, is this question worth asking?

Protarchus: What question?

Socrates: May our body be said to have a soul?

Protarchus: Clearly.

Socrates: And whence comes that soul, my dear Protarchus, unless the body of the universe, which contains elements like those in our bodies but in every way fairer, had also a soul? Can there be another source?

Protarchus: Clearly, Socrates, that is the only source.

Socrates: Why, yes, Protarchus; for surely we cannot imagine that of the four classes, the finite, the infinite, the composition of the two, and the cause, the fourth, which enters into all things, giving to our bodies souls, and the art of self-management, and of healing disease, and operating in other ways to heal and organize, having too all the attributes of wisdom; — we cannot, I say, imagine that whereas the self-same elements exist, both in the entire heaven and in great provinces of the heaven, only fairer and purer, this last should not also in that higher sphere have designed the noblest and fairest things?

Protarchus: Such a supposition is quite unreasonable.

Socrates: Then if this be denied, should we not be wise in adopting the other view and maintaining that there is in the universe a mighty infinite and an adequate limit, of which we have often spoken, as well as a presiding cause of no mean power, which orders and arranges years and seasons and months, and may be justly called wisdom and mind?

Protarchus: Most justly.

Socrates: And wisdom and mind cannot exist without soul?

Protarchus: Certainly not.

Socrates: And in the divine nature of Zeus would you not say that there is the soul and mind of a king, because there is in him the power of the cause? And other gods have other attributes, by which they are pleased to be called.

Protarchus: Very true.

Socrates: Do not then suppose that these words are rashly spoken by us, O Protarchus, for they are in harmony with the testimony of those who said of old time that mind rules the universe.

Protarchus: True.

Socrates: And they furnish an answer to my enquiry; for they imply that mind is the parent of that class of the four which we called the cause of all; and I think that you now have my answer.

Protarchus: I have indeed, and yet I did not observe that you had answered.

Socrates: A jest is sometimes refreshing, Protarchus, when it interrupts earnest.

Protarchus: Very true.

Socrates: I think, friend, that we have now pretty clearly set forth the class to which mind belongs and what is the power of mind.

Protarchus: True.

Socrates: And the class to which pleasure belongs has also been long ago discovered?

Protarchus: Yes.

Socrates: And let us remember, too, of both of them, (1) that mind was akin to the cause and of this family; and (2) that pleasure is infinite and belongs to the class which neither has, nor ever will have in itself, a beginning, middle, or end of its own.

Protarchus: I shall be sure to remember.

Socrates: We must next examine what is their place and under what conditions they are generated. And we will begin with pleasure, since her class was first examined; and yet pleasure cannot be rightly tested apart from pain.

Protarchus: If this is the road, let us take it.

Socrates: I wonder whether you would agree with me about the origin of pleasure and pain.

Protarchus: What do you mean?

Socrates: I mean to say that their natural seat is in the mixed class.

Protarchus: And would you tell me again, sweet Socrates, which of the aforesaid classes is the mixed one?

Socrates: I will, my fine fellow, to the best of my ability.

Protarchus: Very good.

Socrates: Let us then understand the mixed class to be that which we placed third in the list of four.

Protarchus: That which followed the infinite and the finite; and in which you ranked health, and, if I am not mistaken, harmony.

Socrates: Capital; and now will you please to give me your best attention?

Protarchus: Proceed; I am attending.

Socrates: I say that when the harmony in animals is dissolved, there is also a dissolution of nature and a generation of pain.

Protarchus: That is very probable.

Socrates: And the restoration of harmony and return to nature is the source of pleasure, if I may be allowed to speak in the fewest and shortest words about matters of the greatest moment.

Protarchus: I believe that you are right, Socrates; but will you try to be a little plainer?

Socrates: Do not obvious and every-day phenomena furnish the simplest illustration?

Protarchus: What phenomena do you mean?

Socrates: Hunger, for example, is a dissolution and a pain.

Protarchus: True.

Socrates: Whereas eating is a replenishment and a pleasure?

Protarchus: Yes.

Socrates: Thirst again is a destruction and a pain, but the effect of moisture replenishing the dry place is a pleasure: once more, the unnatural separation and dissolution caused by heat is painful, and the natural restoration and refrigeration is pleasant.

Protarchus: Very true.

Socrates: And the unnatural freezing of the moisture in an animal is pain, and the natural process of resolution and return of the elements to their original state is pleasure. And would not the general proposition seem to you to hold, that the destroying of the natural union of the finite and infinite, which, as I was observing before, make up the class of living beings, is pain, and that the process of return of all things to their own nature is pleasure?

Protarchus: Granted; what you say has a general truth.

Socrates: Here then is one kind of pleasures and pains originating severally in the two processes which we have described?

Protarchus: Good.

Socrates: Let us next assume that in the soul herself there is an antecedent hope of pleasure which is sweet and refreshing, and

an expectation of pain, fearful and anxious.

Protarchus: Yes; this is another class of pleasures and pains, which is of the soul only, apart from the body, and is produced by expectation.

Socrates: Right; for in the analysis of these, pure, as I suppose them to be, the pleasures being unalloyed with pain and the pains with pleasure, methinks that we shall see clearly whether the whole class of pleasure is to be desired, or whether this quality of entire desirableness is not rather to be attributed to another of the classes which have been mentioned; and whether pleasure and pain, like heat and cold, and other things of the same kind, are not sometimes to be desired and sometimes not to be desired, as being not in themselves good, but only sometimes and in some instances admitting of the nature of good.

Protarchus: You say most truly that this is the track which the investigation should pursue.

Socrates: Well, then, assuming that pain ensues on the dissolution, and pleasure on the restoration of the harmony, let us now ask what will be the condition of animated beings who are neither in process of restoration nor of dissolution. And mind what you say: I ask whether any animal who is in that condition can possibly have any feeling of pleasure or pain, great or small?

Protarchus: Certainly not.

Socrates: Then here we have a third state, over and above that of pleasure and of pain?

Protarchus: Very true.

Socrates: And do not forget that there is such a state; it will make a great difference in our judgment of pleasure, whether we remember this or not. And I should like to say a few words about it.

Protarchus: What have you to say?

Socrates: Why, you know that if a man chooses the life of wisdom, there is no reason why he should not live in this neutral state.

Protarchus: You mean that he may live neither rejoicing nor sorrowing?

Socrates: Yes; and if I remember rightly, when the lives were compared, no degree of pleasure, whether great or small, was thought to be necessary to him who chose the life of thought and wisdom.

Protarchus: Yes, certainly, we said so.

Socrates: Then he will live without pleasure; and who knows whether this may not be the most divine of all lives?

Protarchus: If so, the gods, at any rate, cannot be supposed to have either joy or sorrow.

Socrates: Certainly not — there would be a great impropriety in the assumption of either alternative. But whether the gods are or are not indifferent to pleasure is a point which may be considered hereafter if in any way relevant to the argument, and whatever is the conclusion we will place it to the account of mind in her contest for the second place, should she have to resign the first.

Protarchus: Just so.

Socrates: The other class of pleasures, which as we were saying is purely mental, is entirely derived from memory.

Protarchus: What do you mean?

Socrates: I must first of all analyze memory, or rather perception which is prior to memory, if the subject of our discussion is ever to be properly cleared up.

Protarchus: How will you proceed?

Socrates: Let us imagine affections of the body which are extinguished before they reach the soul, and leave her unaffected; and again, other affections which vibrate through both soul and body, and impart a shock to both and to each of them.

Protarchus: Granted.

Socrates: And the soul may be truly said to be oblivious of the first but not of the second?

Protarchus: Quite true.

Socrates: When I say oblivious, do not suppose that I mean forgetfulness in a literal sense; for forgetfulness is the exit of memory, which in this case has not yet entered; and to speak of the loss of that which is not yet in existence, and never has been, is a contradiction; do you see?

Protarchus: Yes.

Socrates: Then just be so good as to change the terms.

Protarchus: How shall I change them?

Socrates: Instead of the oblivion of the soul, when you are describing the state in which she is unaffected by the shocks of the body, say unconsciousness.

Protarchus: I see.

Socrates: And the union or communion of soul and body in one feeling and motion would be properly called consciousness?

Protarchus: Most true.

Socrates: Then now we know the meaning of the word?

Protarchus: Yes.

Socrates: And memory may, I think, be rightly described as the preservation of consciousness?

Protarchus: Right.

Socrates: But do we not distinguish memory from recollection?

Protarchus: I think so.

Socrates: And do we not mean by recollection the power which the soul has of recovering, when by herself, some feeling which she experienced when in company with the body?

Protarchus: Certainly.

Socrates: And when she recovers of herself the lost recollection of some consciousness or knowledge, the recovery is termed recollection and reminiscence?

Protarchus: Very true.

Socrates: There is a reason why I say all this.

Protarchus: What is it?

Socrates: I want to attain the plainest possible notion of pleasure and desire, as they exist in the mind only, apart from the body; and the previous analysis helps to show the nature of both.

Protarchus: Then now, Socrates, let us proceed to the next point.

Socrates: There are certainly many things to be considered in discussing the generation and whole complexion of pleasure. At the outset we must determine the nature and seat of desire.

Protarchus: Ay; let us enquire into that, for we shall lose nothing.

Socrates: Nay, Protarchus, we shall surely lose the puzzle if we find the answer.

Protarchus: A fair retort; but let us proceed.

Socrates: Did we not place hunger, thirst, and the like, in the class of desires?

Protarchus: Certainly.

Socrates: And yet they are very different; what common nature have we in view when we call them by a single name?

Protarchus: By heavens, Socrates, that is a question which is not easily answered; but it must be answered.

Socrates: Then let us go back to our examples.

Protarchus: Where shall we begin?

Socrates: Do we mean anything when we say ‘a man thirsts’?

Protarchus: Yes.

Socrates: We mean to say that he ’is empty’?

Protarchus: Of course.

Socrates: And is not thirst desire?

Protarchus: Yes, of drink.

Socrates: Would you say of drink, or of replenishment with drink?

Protarchus: I should say, of replenishment with drink.

Socrates: Then he who is empty desires, as would appear, the opposite of what he experiences; for he is empty and desires to be full?

Protarchus: Clearly so.

Socrates: But how can a man who is empty for the first time, attain either by perception or memory to any apprehension of replenishment, of which he has no present or past experience?

Protarchus: Impossible.

Socrates: And yet he who desires, surely desires something?

Protarchus: Of course.

Socrates: He does not desire that which he experiences, for he experiences thirst, and thirst is emptiness; but he desires replenishment?

Protarchus: True.

Socrates: Then there must be something in the thirsty man which in some way apprehends replenishment?

Protarchus: There must.

Socrates: And that cannot be the body, for the body is supposed to be emptied?

Protarchus: Yes.

Socrates: The only remaining alternative is that the soul apprehends the replenishment by the help of memory; as is obvious, for what other way can there be?

Protarchus: I cannot imagine any other.

Socrates: But do you see the consequence?

Protarchus: What is it?

Socrates: That there is no such thing as desire of the body.

Protarchus: Why so?

Socrates: Why, because the argument shows that the endeavour of every animal is to the reverse of his bodily state.

Protarchus: Yes.

Socrates: And the impulse which leads him to the opposite of what he is experiencing proves that he has a memory of the opposite state.

Protarchus: True.

Socrates: And the argument, having proved that memory attracts us towards the objects of desire, proves also that the impulses and the desires and the moving principle in every living being have their origin in the soul.

Protarchus: Most true.

Socrates: The argument will not allow that our body either hungers or thirsts or has any similar experience.

Protarchus: Quite right.

Socrates: Let me make a further observation; the argument appears to me to imply that there is a kind of life which consists in these affections.

Protarchus: Of what affections, and of what kind of life, are you speaking?

Socrates: I am speaking of being emptied and replenished, and of all that relates to the preservation and destruction of living beings, as well as of the pain which is felt in one of these states and of the pleasure which succeeds to it.

Protarchus: True.

Socrates: And what would you say of the intermediate state?

Protarchus: What do you mean by ‘intermediate’?

Socrates: I mean when a person is in actual suffering and yet remembers past pleasures which, if they would only return, would relieve him; but as yet he has them not. May we not say of him, that he is in an intermediate state?

Protarchus: Certainly.

Socrates: Would you say that he was wholly pained or wholly pleased?

Protarchus: Nay, I should say that he has two pains; in his body there is the actual experience of pain, and in his soul longing and expectation.

Socrates: What do you mean, Protarchus, by the two pains? May not a man who is empty have at one time a sure hope of being filled, and at other times be quite in despair?

Protarchus: Very true.

Socrates: And has he not the pleasure of memory when he is hoping to be filled, and yet in that he is empty is he not at the same time in pain?

Protarchus: Certainly.

Socrates: Then man and the other animals have at the same time both pleasure and pain?

Protarchus: I suppose so.

Socrates: But when a man is empty and has no hope of being filled, there will be the double experience of pain. You observed this and inferred that the double experience was the single case possible.

Protarchus: Quite true, Socrates.

Socrates: Shall the enquiry into these states of feeling be made the occasion of raising a question?

Protarchus: What question?

Socrates: Whether we ought to say that the pleasures and pains of which we are speaking are true or false? or some true and some false?

Protarchus: But how, Socrates, can there be false pleasures and pains?

Socrates: And how, Protarchus, can there be true and false fears, or true and false expectations, or true and false opinions?

Protarchus: I grant that opinions may be true or false, but not pleasures.

Socrates: What do you mean? I am afraid that we are raising a very serious enquiry.

Protarchus: There I agree.

Socrates: And yet, my boy, for you are one of Philebus' boys, the point to be considered, is, whether the enquiry is relevant to the argument.

Protarchus: Surely.

Socrates: No tedious and irrelevant discussion can be allowed; what is said should be pertinent.

Protarchus: Right.

Socrates: I am always wondering at the question which has now been raised.

Protarchus: How so?

Socrates: Do you deny that some pleasures are false, and others true?

Protarchus: To be sure I do.

Socrates: Would you say that no one ever seemed to rejoice and yet did not rejoice, or seemed to feel pain and yet did not feel pain, sleeping or waking, mad or lunatic?

Protarchus: So we have always held, Socrates.

Socrates: But were you right? Shall we enquire into the truth of your opinion?

Protarchus: I think that we should.

Socrates: Let us then put into more precise terms the question which has arisen about pleasure and opinion. Is there such a thing as opinion?

Protarchus: Yes.

Socrates: And such a thing as pleasure?

Protarchus: Yes.

Socrates: And an opinion must be of something?

Protarchus: True.

Socrates: And a man must be pleased by something?

Protarchus: Quite correct.

Socrates: And whether the opinion be right or wrong, makes no difference; it will still be an opinion?

Protarchus: Certainly.

Socrates: And he who is pleased, whether he is rightly pleased or not, will always have a real feeling of pleasure?

Protarchus: Yes; that is also quite true.

Socrates: Then, how can opinion be both true and false, and pleasure true only, although pleasure and opinion are both equally real?

Protarchus: Yes; that is the question.

Socrates: You mean that opinion admits of truth and falsehood, and hence becomes not merely opinion, but opinion of a certain quality; and this is what you think should be examined?

Protarchus: Yes.

Socrates: And further, even if we admit the existence of qualities in other objects, may not pleasure and pain be simple and devoid of quality?

Protarchus: Clearly.

Socrates: But there is no difficulty in seeing that pleasure and pain as well as opinion have qualities, for they are great or small, and have various degrees of intensity; as was indeed said long ago by us.

Protarchus: Quite true.

Socrates: And if badness attaches to any of them, Protarchus, then we should speak of a bad opinion or of a bad pleasure?

Protarchus: Quite true, Socrates.

Socrates: And if rightness attaches to any of them, should we not speak of a right opinion or right pleasure; and in like manner of the reverse of rightness?

Protarchus: Certainly.

Socrates: And if the thing opined be erroneous, might we not say that the opinion, being erroneous, is not right or rightly opined?

Protarchus: Certainly.

Socrates: And if we see a pleasure or pain which errs in respect of its object, shall we call that right or good, or by any honourable name?

Protarchus: Not if the pleasure is mistaken; how could we?

Socrates: And surely pleasure often appears to accompany an opinion which is not true, but false?

Protarchus: Certainly it does; and in that case, Socrates, as we were saying, the opinion is false, but no one could call the actual pleasure false.

Socrates: How eagerly, Protarchus, do you rush to the defence of pleasure!

Protarchus: Nay, Socrates, I only repeat what I hear.

Socrates: And is there no difference, my friend, between that pleasure which is associated with right opinion and knowledge, and that which is often found in all of us associated with falsehood and ignorance?

Protarchus: There must be a very great difference, between them.

Socrates: Then, now let us proceed to contemplate this difference.

Protarchus: Lead, and I will follow.

Socrates: Well, then, my view is —

Protarchus: What is it?

Socrates: We agree — do we not? — that there is such a thing as false, and also such a thing as true opinion?

Protarchus: Yes.

Socrates: And pleasure and pain, as I was just now saying, are often consequent upon these — upon true and false opinion, I mean.

Protarchus: Very true.

Socrates: And do not opinion and the endeavour to form an opinion always spring from memory and perception?

Protarchus: Certainly.

Socrates: Might we imagine the process to be something of this nature?

Protarchus: Of what nature?

Socrates: An object may be often seen at a distance not very clearly, and the seer may want to determine what it is which he sees.

Protarchus: Very likely.

Socrates: Soon he begins to interrogate himself.

Protarchus: In what manner?

Socrates: He asks himself— 'What is that which appears to be standing by the rock under the tree?' This is the question which he may be supposed to put to himself when he sees such an appearance.

Protarchus: True.

Socrates: To which he may guess the right answer, saying as if in a whisper to himself— 'It is a man.'

Protarchus: Very good.

Socrates: Or again, he may be misled, and then he will say— 'No, it is a figure made by the shepherds.'

Protarchus: Yes.

Socrates: And if he has a companion, he repeats his thought to him in articulate sounds, and what was before an opinion, has now become a proposition.

Protarchus: Certainly.

Socrates: But if he be walking alone when these thoughts occur to him, he may not unfrequently keep them in his mind for a considerable time.

Protarchus: Very true.

Socrates: Well, now, I wonder whether you would agree in my explanation of this phenomenon.

Protarchus: What is your explanation?

Socrates: I think that the soul at such times is like a book.

Protarchus: How so?

Socrates: Memory and perception meet, and they and their attendant feelings seem to almost to write down words in the soul, and when the inscribing feeling writes truly, then true opinion and true propositions which are the expressions of opinion come into our souls — but when the scribe within us writes falsely, the result is false.

Protarchus: I quite assent and agree to your statement.

Socrates: I must bespeak your favour also for another artist, who is busy at the same time in the chambers of the soul.

Protarchus: Who is he?

Socrates: The painter, who, after the scribe has done his work, draws images in the soul of the things which he has described.

Protarchus: But when and how does he do this?

Socrates: When a man, besides receiving from sight or some other sense certain opinions or statements, sees in his mind the images of the subjects of them; — is not this a very common mental phenomenon?

Protarchus: Certainly.

Socrates: And the images answering to true opinions and words are true, and to false opinions and words false; are they not?

Protarchus: They are.

Socrates: If we are right so far, there arises a further question.

Protarchus: What is it?

Socrates: Whether we experience the feeling of which I am speaking only in relation to the present and the past, or in relation to the future also?

Protarchus: I should say in relation to all times alike.

Socrates: Have not purely mental pleasures and pains been described already as in some cases anticipations of the bodily ones; from which we may infer that anticipatory pleasures and pains have to do with the future?

Protarchus: Most true.

Socrates: And do all those writings and paintings which, as we were saying a little while ago, are produced in us, relate to the past and present only, and not to the future?

Protarchus: To the future, very much.

Socrates: When you say, 'Very much,' you mean to imply that all these representations are hopes about the future, and that mankind are filled with hopes in every stage of existence?

Protarchus: Exactly.

Socrates: Answer me another question.

Protarchus: What question?

Socrates: A just and pious and good man is the friend of the gods; is he not?

Protarchus: Certainly he is.

Socrates: And the unjust and utterly bad man is the reverse?

Protarchus: True.

Socrates: And all men, as we were saying just now, are always filled with hopes?

Protarchus: Certainly.

Socrates: And these hopes, as they are termed, are propositions which exist in the minds of each of us?

Protarchus: Yes.

Socrates: And the fancies of hope are also pictured in us; a man may often have a vision of a heap of gold, and pleasures ensuing, and in the picture there may be a likeness of himself mightily rejoicing over his good fortune.

Protarchus: True.

Socrates: And may we not say that the good, being friends of the gods, have generally true pictures presented to them, and the bad false pictures?

Protarchus: Certainly.

Socrates: The bad, too, have pleasures painted in their fancy as well as the good; but I presume that they are false pleasures.

Protarchus: They are.

Socrates: The bad then commonly delight in false pleasures, and the good in true pleasures?

Protarchus: Doubtless.

Socrates: Then upon this view there are false pleasures in the souls of men which are a ludicrous imitation of the true, and there are pains of a similar character?

Protarchus: There are.

Socrates: And did we not allow that a man who had an opinion at all had a real opinion, but often about things which had no existence either in the past, present, or future?

Protarchus: Quite true.

Socrates: And this was the source of false opinion and opining; am I not right?

Protarchus: Yes.

Socrates: And must we not attribute to pleasure and pain a similar real but illusory character?

Protarchus: How do you mean?

Socrates: I mean to say that a man must be admitted to have real pleasure who is pleased with anything or anyhow; and he may be pleased about things which neither have nor have ever had any real existence, and, more often than not, are never likely to exist.

Protarchus: Yes, Socrates, that again is undeniable.

Socrates: And may not the same be said about fear and anger and the like; are they not often false?

Protarchus: Quite so.

Socrates: And can opinions be good or bad except in as far as they are true or false?

Protarchus: In no other way.

Socrates: Nor can pleasures be conceived to be bad except in so far as they are false.

Protarchus: Nay, Socrates, that is the very opposite of truth; for no one would call pleasures and pains bad because they are false, but by reason of some other great corruption to which they are liable.

Socrates: Well, of pleasures which are corrupt and caused by corruption we will hereafter speak, if we care to continue the enquiry; for the present I would rather show by another argument that there are many false pleasures existing or coming into existence in us, because this may assist our final decision.

Protarchus: Very true; that is to say, if there are such pleasures.

Socrates: I think that there are, Protarchus; but this is an opinion which should be well assured, and not rest upon a mere assertion.

Protarchus: Very good.

Socrates: Then now, like wrestlers, let us approach and grasp this new argument.

Protarchus: Proceed.

Socrates: We were maintaining a little while since, that when desires, as they are termed, exist in us, then the body has separate feelings apart from the soul — do you remember?

Protarchus: Yes, I remember that you said so.

Socrates: And the soul was supposed to desire the opposite of the bodily state, while the body was the source of any pleasure or pain which was experienced.

Protarchus: True.

Socrates: Then now you may infer what happens in such cases.

Protarchus: What am I to infer?

Socrates: That in such cases pleasures and pains come simultaneously; and there is a juxtaposition of the opposite sensations which correspond to them, as has been already shown.

Protarchus: Clearly.

Socrates: And there is another point to which we have agreed.

Protarchus: What is it?

Socrates: That pleasure and pain both admit of more and less, and that they are of the class of infinites.

Protarchus: Certainly, we said so.

Socrates: But how can we rightly judge of them?

Protarchus: How can we?

Socrates: Is it our intention to judge of their comparative importance and intensity, measuring pleasure against pain, and pain against pain, and pleasure against pleasure?

Protarchus: Yes, such is our intention, and we shall judge of them accordingly.

Socrates: Well, take the case of sight. Does not the nearness or distance of magnitudes obscure their true proportions, and make us opine falsely; and do we not find the same illusion happening in the case of pleasures and pains?

Protarchus: Yes, Socrates, and in a degree far greater.

Socrates: Then what we are now saying is the opposite of what we were saying before.

Protarchus: What was that?

Socrates: Then the opinions were true and false, and infected the pleasures and pains with their own falsity.

Protarchus: Very true.

Socrates: But now it is the pleasures which are said to be true and false because they are seen at various distances, and subjected to comparison; the pleasures appear to be greater and more vehement when placed side by side with the pains, and the pains when placed side by side with the pleasures.

Protarchus: Certainly, and for the reason which you mention.

Socrates: And suppose you part off from pleasures and pains the element which makes them appear to be greater or less than they really are: you will acknowledge that this element is illusory, and you will never say that the corresponding excess or defect of pleasure or pain is real or true.

Protarchus: Certainly not.

Socrates: Next let us see whether in another direction we may not find pleasures and pains existing and appearing in living beings, which are still more false than these.

Protarchus: What are they, and how shall we find them?

Socrates: If I am not mistaken, I have often repeated that pains and aches and suffering and uneasiness of all sorts arise out of a corruption of nature caused by concretions, and dissolutions, and repletions, and evacuations, and also by growth and decay?

Protarchus: Yes, that has been often said.

Socrates: And we have also agreed that the restoration of the natural state is pleasure?

Protarchus: Right.

Socrates: But now let us suppose an interval of time at which the body experiences none of these changes.

Protarchus: When can that be, Socrates?

Socrates: Your question, Protarchus, does not help the argument.

Protarchus: Why not, Socrates?

Socrates: Because it does not prevent me from repeating mine.

Protarchus: And what was that?

Socrates: Why, Protarchus, admitting that there is no such interval, I may ask what would be the necessary consequence if there were?

Protarchus: You mean, what would happen if the body were not changed either for good or bad?

Socrates: Yes.

Protarchus: Why then, Socrates, I should suppose that there would be neither pleasure nor pain.

Socrates: Very good; but still, if I am not mistaken, you do assert that we must always be experiencing one of them; that is what the wise tell us; for, say they, all things are ever flowing up and down.

Protarchus: Yes, and their words are of no mean authority.

Socrates: Of course, for they are no mean authorities themselves; and I should like to avoid the brunt of their argument. Shall I tell you how I mean to escape from them? And you shall be the partner of my flight.

Protarchus: How?

Socrates: To them we will say: ‘Good; but are we, or living things in general, always conscious of what happens to us — for example, of our growth, or the like? Are we not, on the contrary, almost wholly unconscious of this and similar phenomena?’ You must answer for them.

Protarchus: The latter alternative is the true one.

Socrates: Then we were not right in saying, just now, that motions going up and down cause pleasures and pains?

Protarchus: True.

Socrates: A better and more unexceptionable way of speaking will be —

Protarchus: What?

Socrates: If we say that the great changes produce pleasures and pains, but that the moderate and lesser ones do neither.

Protarchus: That, Socrates, is the more correct mode of speaking.

Socrates: But if this be true, the life to which I was just now referring again appears.

Protarchus: What life?

Socrates: The life which we affirmed to be devoid either of pain or of joy.

Protarchus: Very true.

Socrates: We may assume then that there are three lives, one pleasant, one painful, and the third which is neither; what say you?

Protarchus: I should say as you do that there are three of them.

Socrates: But if so, the negation of pain will not be the same with pleasure.

Protarchus: Certainly not.

Socrates: Then when you hear a person saying, that always to live without pain is the pleasantest of all things, what would you understand him to mean by that statement?

Protarchus: I think that by pleasure he must mean the negative of pain.

Socrates: Let us take any three things; or suppose that we embellish a little and call the first gold, the second silver, and there shall be a third which is neither.

Protarchus: Very good.

Socrates: Now, can that which is neither be either gold or silver?

Protarchus: Impossible.

Socrates: No more can that neutral or middle life be rightly or reasonably spoken or thought of as pleasant or painful.

Protarchus: Certainly not.

Socrates: And yet, my friend, there are, as we know, persons who say and think so.

Protarchus: Certainly.

Socrates: And do they think that they have pleasure when they are free from pain?

Protarchus: They say so.

Socrates: And they must think or they would not say that they have pleasure.

Protarchus: I suppose not.

Socrates: And yet if pleasure and the negation of pain are of distinct natures, they are wrong.

Protarchus: But they are undoubtedly of distinct natures.

Socrates: Then shall we take the view that they are three, as we were just now saying, or that they are two only — the one being a state of pain, which is an evil, and the other a cessation of pain, which is of itself a good, and is called pleasant?

Protarchus: But why, Socrates, do we ask the question at all? I do not see the reason.

Socrates: You, Protarchus, have clearly never heard of certain enemies of our friend Philebus.

Protarchus: And who may they be?

Socrates: Certain persons who are reputed to be masters in natural philosophy, who deny the very existence of pleasure.

Protarchus: Indeed!

Socrates: They say that what the school of Philebus calls pleasures are all of them only avoidances of pain.

Protarchus: And would you, Socrates, have us agree with them?

Socrates: Why, no, I would rather use them as a sort of diviners, who divine the truth, not by rules of art, but by an instinctive repugnance and extreme detestation which a noble nature has of the power of pleasure, in which they think that there is nothing sound, and her seductive influence is declared by them to be witchcraft, and not pleasure. This is the use which you may make of them. And when you have considered the various grounds of their dislike, you shall hear from me what I deem to be true pleasures. Having thus examined the nature of pleasure from both points of view, we will bring her up for judgment.

Protarchus: Well said.

Socrates: Then let us enter into an alliance with these philosophers and follow in the track of their dislike. I imagine

that they would say something of this sort; they would begin at the beginning, and ask whether, if we wanted to know the nature of any quality, such as hardness, we should be more likely to discover it by looking at the hardest things, rather than at the least hard? You, Protarchus, shall answer these severe gentlemen as you answer me.

Protarchus: By all means, and I reply to them, that you should look at the greatest instances.

Socrates: Then if we want to see the true nature of pleasures as a class, we should not look at the most diluted pleasures, but at the most extreme and most vehement?

Protarchus: In that every one will agree.

Socrates: And the obvious instances of the greatest pleasures, as we have often said, are the pleasures of the body?

Protarchus: Certainly.

Socrates: And are they felt by us to be or become greater, when we are sick or when we are in health? And here we must be careful in our answer, or we shall come to grief.

Protarchus: How will that be?

Socrates: Why, because we might be tempted to answer, ‘When we are in health.’

Protarchus: Yes, that is the natural answer.

Socrates: Well, but are not those pleasures the greatest of which mankind have the greatest desires?

Protarchus: True.

Socrates: And do not people who are in a fever, or any similar illness, feel cold or thirst or other bodily affections more intensely? Am I not right in saying that they have a deeper want and greater pleasure in the satisfaction of their want?

Protarchus: That is obvious as soon as it is said.

Socrates: Well, then, shall we not be right in saying, that if a person would wish to see the greatest pleasures he ought to go and look, not at health, but at disease? And here you must distinguish: — do not imagine that I mean to ask whether those who are very ill have more pleasures than those who are well, but understand that I am speaking of the magnitude of pleasure; I want to know where pleasures are found to be most intense. For, as I say, we have to discover what is pleasure, and what they mean by pleasure who deny her very existence.

Protarchus: I think I follow you.

Socrates: You will soon have a better opportunity of showing whether you do or not, Protarchus. Answer now, and tell me whether you see, I will not say more, but more intense and excessive pleasures in wantonness than in temperance? Reflect before you speak.

Protarchus: I understand you, and see that there is a great difference between them; the temperate are restrained by the wise man's aphorism of 'Never too much,' which is their rule, but excess of pleasure possessing the minds of fools and wantons becomes madness and makes them shout with delight.

Socrates: Very good, and if this be true, then the greatest pleasures and pains will clearly be found in some vicious state of soul and body, and not in a virtuous state.

Protarchus: Certainly.

Socrates: And ought we not to select some of these for examination, and see what makes them the greatest?

Protarchus: To be sure we ought.

Socrates: Take the case of the pleasures which arise out of certain disorders.

Protarchus: What disorders?

Socrates: The pleasures of unseemly disorders, which our severe friends utterly detest.

Protarchus: What pleasures?

Socrates: Such, for example, as the relief of itching and other ailments by scratching, which is the only remedy required. For what in Heaven's name is the feeling to be called which is thus produced in us? — Pleasure or pain?

Protarchus: A villainous mixture of some kind, Socrates, I should say.

Socrates: I did not introduce the argument, O Protarchus, with any personal reference to Philebus, but because, without the consideration of these and similar pleasures, we shall not be able to determine the point at issue.

Protarchus: Then we had better proceed to analyze this family of pleasures.

Socrates: You mean the pleasures which are mingled with pain?

Protarchus: Exactly.

Socrates: There are some mixtures which are of the body, and only in the body, and others which are of the soul, and only in the soul; while there are other mixtures of pleasures with pains, common both to soul and body, which in their composite state are called sometimes pleasures and sometimes pains.

Protarchus: How is that?

Socrates: Whenever, in the restoration or in the derangement of nature, a man experiences two opposite feelings; for example, when he is cold and is growing warm, or again, when he is hot and is becoming cool, and he wants to have the one and be rid of the other; — the sweet has a bitter, as the common saying is, and both together fasten upon him and create irritation and in time drive him to distraction.

Protarchus: That description is very true to nature.

Socrates: And in these sorts of mixtures the pleasures and pains are sometimes equal, and sometimes one or other of them

predominates?

Protarchus: True.

Socrates: Of cases in which the pain exceeds the pleasure, an example is afforded by itching, of which we were just now speaking, and by the tingling which we feel when the boiling and fiery element is within, and the rubbing and motion only relieves the surface, and does not reach the parts affected; then if you put them to the fire, and as a last resort apply cold to them, you may often produce the most intense pleasure or pain in the inner parts, which contrasts and mingles with the pain or pleasure, as the case may be, of the outer parts; and this is due to the forcible separation of what is united, or to the union of what is separated, and to the juxtaposition of pleasure and pain.

Protarchus: Quite so.

Socrates: Sometimes the element of pleasure prevails in a man, and the slight undercurrent of pain makes him tingle, and causes a gentle irritation; or again, the excessive infusion of pleasure creates an excitement in him, — he even leaps for joy, he assumes all sorts of attitudes, he changes all manner of colours, he gasps for breath, and is quite amazed, and utters the most irrational exclamations.

Protarchus: Yes, indeed.

Socrates: He will say of himself, and others will say of him, that he is dying with these delights; and the more dissipated and good-for-nothing he is, the more vehemently he pursues them in every way; of all pleasures he declares them to be the greatest; and he reckons him who lives in the most constant enjoyment of them to be the happiest of mankind.

Protarchus: That, Socrates, is a very true description of the opinions of the majority about pleasures.

Socrates: Yes, Protarchus, quite true of the mixed pleasures, which arise out of the communion of external and internal

sensations in the body; there are also cases in which the mind contributes an opposite element to the body, whether of pleasure or pain, and the two unite and form one mixture. Concerning these I have already remarked, that when a man is empty he desires to be full, and has pleasure in hope and pain in vacuity. But now I must further add what I omitted before, that in all these and similar emotions in which body and mind are opposed (and they are innumerable), pleasure and pain coalesce in one.

Protarchus: I believe that to be quite true.

Socrates: There still remains one other sort of admixture of pleasures and pains.

Protarchus: What is that?

Socrates: The union which, as we were saying, the mind often experiences of purely mental feelings.

Protarchus: What do you mean?

Socrates: Why, do we not speak of anger, fear, desire, sorrow, love, emulation, envy, and the like, as pains which belong to the soul only?

Protarchus: Yes.

Socrates: And shall we not find them also full of the most wonderful pleasures? need I remind you of the anger

‘Which stirs even a wise man to violence, And is sweeter than honey and the honeycomb?’

And you remember how pleasures mingle with pains in lamentation and bereavement?

Protarchus: Yes, there is a natural connexion between them.

Socrates: And you remember also how at the sight of tragedies the spectators smile through their tears?

Protarchus: Certainly I do.

Socrates: And are you aware that even at a comedy the soul experiences a mixed feeling of pain and pleasure?

Protarchus: I do not quite understand you.

Socrates: I admit, Protarchus, that there is some difficulty in recognizing this mixture of feelings at a comedy.

Protarchus: There is, I think.

Socrates: And the greater the obscurity of the case the more desirable is the examination of it, because the difficulty in detecting other cases of mixed pleasures and pains will be less.

Protarchus: Proceed.

Socrates: I have just mentioned envy; would you not call that a pain of the soul?

Protarchus: Yes.

Socrates: And yet the envious man finds something in the misfortunes of his neighbours at which he is pleased?

Protarchus: Certainly.

Socrates: And ignorance, and what is termed clownishness, are surely an evil?

Protarchus: To be sure.

Socrates: From these considerations learn to know the nature of the ridiculous.

Protarchus: Explain.

Socrates: The ridiculous is in short the specific name which is used to describe the vicious form of a certain habit; and of vice in general it is that kind which is most at variance with the inscription at Delphi.

Protarchus: You mean, Socrates, ‘Know thyself.’

Socrates: I do; and the opposite would be, ‘Know not thyself.’

Protarchus: Certainly.

Socrates: And now, O Protarchus, try to divide this into three.

Protarchus: Indeed I am afraid that I cannot.

Socrates: Do you mean to say that I must make the division for you?

Protarchus: Yes, and what is more, I beg that you will.

Socrates: Are there not three ways in which ignorance of self may be shown?

Protarchus: What are they?

Socrates: In the first place, about money; the ignorant may fancy himself richer than he is.

Protarchus: Yes, that is a very common error.

Socrates: And still more often he will fancy that he is taller or fairer than he is, or that he has some other advantage of person which he really has not.

Protarchus: Of course.

Socrates: And yet surely by far the greatest number err about the goods of the mind; they imagine themselves to be much better men than they are.

Protarchus: Yes, that is by far the commonest delusion.

Socrates: And of all the virtues, is not wisdom the one which the mass of mankind are always claiming, and which most arouses in them a spirit of contention and lying conceit of wisdom?

Protarchus: Certainly.

Socrates: And may not all this be truly called an evil condition?

Protarchus: Very evil.

Socrates: But we must pursue the division a step further, Protarchus, if we would see in envy of the childish sort a singular mixture of pleasure and pain.

Protarchus: How can we make the further division which you suggest?

Socrates: All who are silly enough to entertain this lying conceit of themselves may of course be divided, like the rest of mankind, into two classes — one having power and might; and the other the reverse.

Protarchus: Certainly.

Socrates: Let this, then, be the principle of division; those of them who are weak and unable to revenge themselves, when they are laughed at, may be truly called ridiculous, but those who can defend themselves may be more truly described as strong and formidable; for ignorance in the powerful is hateful and horrible, because hurtful to others both in reality and in fiction, but powerless ignorance may be reckoned, and in truth is, ridiculous.

Protarchus: That is very true, but I do not as yet see where is the admixture of pleasures and pains.

Socrates: Well, then, let us examine the nature of envy.

Protarchus: Proceed.

Socrates: Is not envy an unrighteous pleasure, and also an unrighteous pain?

Protarchus: Most true.

Socrates: There is nothing envious or wrong in rejoicing at the misfortunes of enemies?

Protarchus: Certainly not.

Socrates: But to feel joy instead of sorrow at the sight of our friends' misfortunes — is not that wrong?

Protarchus: Undoubtedly.

Socrates: Did we not say that ignorance was always an evil?

Protarchus: True.

Socrates: And the three kinds of vain conceit in our friends which we enumerated — the vain conceit of beauty, of wisdom, and of wealth, are ridiculous if they are weak, and detestable when they are powerful: May we not say, as I was saying before, that our friends who are in this state of mind, when harmless to others, are simply ridiculous?

Protarchus: They are ridiculous.

Socrates: And do we not acknowledge this ignorance of theirs to be a misfortune?

Protarchus: Certainly.

Socrates: And do we feel pain or pleasure in laughing at it?

Protarchus: Clearly we feel pleasure.

Socrates: And was not envy the source of this pleasure which we feel at the misfortunes of friends?

Protarchus: Certainly.

Socrates: Then the argument shows that when we laugh at the folly of our friends, pleasure, in mingling with envy, mingles with pain, for envy has been acknowledged by us to be mental pain, and laughter is pleasant; and so we envy and laugh at the same instant.

Protarchus: True.

Socrates: And the argument implies that there are combinations of pleasure and pain in lamentations, and in tragedy and comedy, not only on the stage, but on the greater stage of human life; and so in endless other cases.

Protarchus: I do not see how any one can deny what you say, Socrates, however eager he may be to assert the opposite opinion.

Socrates: I mentioned anger, desire, sorrow, fear, love, emulation, envy, and similar emotions, as examples in which we should find a mixture of the two elements so often named; did I

not?

Protarchus: Yes.

Socrates: We may observe that our conclusions hitherto have had reference only to sorrow and envy and anger.

Protarchus: I see.

Socrates: Then many other cases still remain?

Protarchus: Certainly.

Socrates: And why do you suppose me to have pointed out to you the admixture which takes place in comedy? Why but to convince you that there was no difficulty in showing the mixed nature of fear and love and similar affections; and I thought that when I had given you the illustration, you would have let me off, and have acknowledged as a general truth that the body without the soul, and the soul without the body, as well as the two united, are susceptible of all sorts of admixtures of pleasures and pains; and so further discussion would have been unnecessary. And now I want to know whether I may depart; or will you keep me here until midnight? I fancy that I may obtain my release without many words; — if I promise that to-morrow I will give you an account of all these cases. But at present I would rather sail in another direction, and go to other matters which remain to be settled, before the judgment can be given which Philebus demands.

Protarchus: Very good, Socrates; in what remains take your own course.

Socrates: Then after the mixed pleasures the unmixed should have their turn; this is the natural and necessary order.

Protarchus: Excellent.

Socrates: These, in turn, then, I will now endeavour to indicate; for with the maintainers of the opinion that all pleasures are a cessation of pain, I do not agree, but, as I was saying, I use them as witnesses, that there are pleasures which seem only and are

not, and there are others again which have great power and appear in many forms, yet are intermingled with pains, and are partly alleviations of agony and distress, both of body and mind.

Protarchus: Then what pleasures, Socrates, should we be right in conceiving to be true?

Socrates: True pleasures are those which are given by beauty of colour and form, and most of those which arise from smells; those of sound, again, and in general those of which the want is painless and unconscious, and of which the fruition is palpable to sense and pleasant and unalloyed with pain.

Protarchus: Once more, Socrates, I must ask what you mean.

Socrates: My meaning is certainly not obvious, and I will endeavour to be plainer. I do not mean by beauty of form such beauty as that of animals or pictures, which the many would suppose to be my meaning; but, says the argument, understand me to mean straight lines and circles, and the plane or solid figures which are formed out of them by turning-lathes and rulers and measurers of angles; for these I affirm to be not only relatively beautiful, like other things, but they are eternally and absolutely beautiful, and they have peculiar pleasures, quite unlike the pleasures of scratching. And there are colours which are of the same character, and have similar pleasures; now do you understand my meaning?

Protarchus: I am trying to understand, Socrates, and I hope that you will try to make your meaning clearer.

Socrates: When sounds are smooth and clear, and have a single pure tone, then I mean to say that they are not relatively but absolutely beautiful, and have natural pleasures associated with them.

Protarchus: Yes, there are such pleasures.

Socrates: The pleasures of smell are of a less ethereal sort, but they have no necessary admixture of pain; and all pleasures,

however and wherever experienced, which are unattended by pains, I assign to an analogous class. Here then are two kinds of pleasures.

Protarchus: I understand.

Socrates: To these may be added the pleasures of knowledge, if no hunger of knowledge and no pain caused by such hunger precede them.

Protarchus: And this is the case.

Socrates: Well, but if a man who is full of knowledge loses his knowledge, are there not pains of forgetting?

Protarchus: Not necessarily, but there may be times of reflection, when he feels grief at the loss of his knowledge.

Socrates: Yes, my friend, but at present we are enumerating only the natural perceptions, and have nothing to do with reflection.

Protarchus: In that case you are right in saying that the loss of knowledge is not attended with pain.

Socrates: These pleasures of knowledge, then, are unmixed with pain; and they are not the pleasures of the many but of a very few.

Protarchus: Quite true.

Socrates: And now, having fairly separated the pure pleasures and those which may be rightly termed impure, let us further add to our description of them, that the pleasures which are in excess have no measure, but that those which are not in excess have measure; the great, the excessive, whether more or less frequent, we shall be right in referring to the class of the infinite, and of the more and less, which pours through body and soul alike; and the others we shall refer to the class which has measure.

Protarchus: Quite right, Socrates.

Socrates: Still there is something more to be considered about pleasures.

Protarchus: What is it?

Socrates: When you speak of purity and clearness, or of excess, abundance, greatness and sufficiency, in what relation do these terms stand to truth?

Protarchus: Why do you ask, Socrates?

Socrates: Because, Protarchus, I should wish to test pleasure and knowledge in every possible way, in order that if there be a pure and impure element in either of them, I may present the pure element for judgment, and then they will be more easily judged of by you and by me and by all of us.

Protarchus: Most true.

Socrates: Let us investigate all the pure kinds; first selecting for consideration a single instance.

Protarchus: What instance shall we select?

Socrates: Suppose that we first of all take whiteness.

Protarchus: Very good.

Socrates: How can there be purity in whiteness, and what purity? Is that purest which is greatest or most in quantity, or that which is most unadulterated and freest from any admixture of other colours?

Protarchus: Clearly that which is most unadulterated.

Socrates: True, Protarchus; and so the purest white, and not the greatest or largest in quantity, is to be deemed truest and most beautiful?

Protarchus: Right.

Socrates: And we shall be quite right in saying that a little pure white is whiter and fairer and truer than a great deal that is mixed.

Protarchus: Perfectly right.

Socrates: There is no need of adducing many similar examples in illustration of the argument about pleasure; one such is sufficient to prove to us that a small pleasure or a small amount of pleasure, if pure or unalloyed with pain, is always pleasanter and truer and fairer than a great pleasure or a great amount of pleasure of another kind.

Protarchus: Assuredly; and the instance you have given is quite sufficient.

Socrates: But what do you say of another question: — have we not heard that pleasure is always a generation, and has no true being? Do not certain ingenious philosophers teach this doctrine, and ought not we to be grateful to them?

Protarchus: What do they mean?

Socrates: I will explain to you, my dear Protarchus, what they mean, by putting a question.

Protarchus: Ask, and I will answer.

Socrates: I assume that there are two natures, one self-existent, and the other ever in want of something.

Protarchus: What manner of natures are they?

Socrates: The one majestic ever, the other inferior.

Protarchus: You speak riddles.

Socrates: You have seen loves good and fair, and also brave lovers of them.

Protarchus: I should think so.

Socrates: Search the universe for two terms which are like these two and are present everywhere.

Protarchus: Yet a third time I must say, Be a little plainer, Socrates.

Socrates: There is no difficulty, Protarchus; the argument is only in play, and insinuates that some things are for the sake of something else (relatives), and that other things are the ends to which the former class subserve (absolutes).

Protarchus: Your many repetitions make me slow to understand.

Socrates: As the argument proceeds, my boy, I dare say that the meaning will become clearer.

Protarchus: Very likely.

Socrates: Here are two new principles.

Protarchus: What are they?

Socrates: One is the generation of all things, and the other is essence.

Protarchus: I readily accept from you both generation and essence.

Socrates: Very right; and would you say that generation is for the sake of essence, or essence for the sake of generation?

Protarchus: You want to know whether that which is called essence is, properly speaking, for the sake of generation?

Socrates: Yes.

Protarchus: By the gods, I wish that you would repeat your question.

Socrates: I mean, O my Protarchus, to ask whether you would tell me that ship-building is for the sake of ships, or ships for the sake of ship-building? and in all similar cases I should ask the same question.

Protarchus: Why do you not answer yourself, Socrates?

Socrates: I have no objection, but you must take your part.

Protarchus: Certainly.

Socrates: My answer is, that all things instrumental, remedial, material, are given to us with a view to generation, and that each generation is relative to, or for the sake of, some being or essence, and that the whole of generation is relative to the whole of essence.

Protarchus: Assuredly.

Socrates: Then pleasure, being a generation, must surely be for the sake of some essence?

Protarchus: True.

Socrates: And that for the sake of which something else is done must be placed in the class of good, and that which is done for the sake of something else, in some other class, my good friend.

Protarchus: Most certainly.

Socrates: Then pleasure, being a generation, will be rightly placed in some other class than that of good?

Protarchus: Quite right.

Socrates: Then, as I said at first, we ought to be very grateful to him who first pointed out that pleasure was a generation only, and had no true being at all; for he is clearly one who laughs at the notion of pleasure being a good.

Protarchus: Assuredly.

Socrates: And he would surely laugh also at those who make generation their highest end.

Protarchus: Of whom are you speaking, and what do they mean?

Socrates: I am speaking of those who when they are cured of hunger or thirst or any other defect by some process of generation are delighted at the process as if it were pleasure; and they say that they would not wish to live without these and other feelings of a like kind which might be mentioned.

Protarchus: That is certainly what they appear to think.

Socrates: And is not destruction universally admitted to be the opposite of generation?

Protarchus: Certainly.

Socrates: Then he who chooses thus, would choose generation and destruction rather than that third sort of life, in which, as we were saying, was neither pleasure nor pain, but only the purest possible thought.

Protarchus: He who would make us believe pleasure to be a good is involved in great absurdities, Socrates.

Socrates: Great, indeed; and there is yet another of them.

Protarchus: What is it?

Socrates: Is there not an absurdity in arguing that there is nothing good or noble in the body, or in anything else, but that good is in the soul only, and that the only good of the soul is pleasure; and that courage or temperance or understanding, or any other good of the soul, is not really a good? — and is there not yet a further absurdity in our being compelled to say that he who has a feeling of pain and not of pleasure is bad at the time when he is suffering pain, even though he be the best of men; and again, that he who has a feeling of pleasure, in so far as he is pleased at the time when he is pleased, in that degree excels in virtue?

Protarchus: Nothing, Socrates, can be more irrational than all this.

Socrates: And now, having subjected pleasure to every sort of test, let us not appear to be too sparing of mind and knowledge: let us ring their metal bravely, and see if there be unsoundness in any part, until we have found out what in them is of the purest nature; and then the truest elements both of pleasure and knowledge may be brought up for judgment.

Protarchus: Right.

Socrates: Knowledge has two parts, — the one productive, and the other educational?

Protarchus: True.

Socrates: And in the productive or handicraft arts, is not one part more akin to knowledge, and the other less; and may not the one part be regarded as the pure, and the other as the impure?

Protarchus: Certainly.

Socrates: Let us separate the superior or dominant elements in each of them.

Protarchus: What are they, and how do you separate them?

Socrates: I mean to say, that if arithmetic, mensuration, and weighing be taken away from any art, that which remains will not be much.

Protarchus: Not much, certainly.

Socrates: The rest will be only conjecture, and the better use of the senses which is given by experience and practice, in addition to a certain power of guessing, which is commonly called art, and is perfected by attention and pains.

Protarchus: Nothing more, assuredly.

Socrates: Music, for instance, is full of this empiricism; for sounds are harmonized, not by measure, but by skilful conjecture; the music of the flute is always trying to guess the pitch of each vibrating note, and is therefore mixed up with much that is doubtful and has little which is certain.

Protarchus: Most true.

Socrates: And the same will be found to hold good of medicine and husbandry and piloting and generalship.

Protarchus: Very true.

Socrates: The art of the builder, on the other hand, which uses a number of measures and instruments, attains by their help to a greater degree of accuracy than the other arts.

Protarchus: How is that?

Socrates: In ship-building and house-building, and in other branches of the art of carpentering, the builder has his rule, lathe, compass, line, and a most ingenious machine for straightening wood.

Protarchus: Very true, Socrates.

Socrates: Then now let us divide the arts of which we were speaking into two kinds, — the arts which, like music, are less exact in their results, and those which, like carpentering, are more exact.

Protarchus: Let us make that division.

Socrates: Of the latter class, the most exact of all are those which we just now spoke of as primary.

Protarchus: I see that you mean arithmetic, and the kindred arts of weighing and measuring.

Socrates: Certainly, Protarchus; but are not these also distinguishable into two kinds?

Protarchus: What are the two kinds?

Socrates: In the first place, arithmetic is of two kinds, one of which is popular, and the other philosophical.

Protarchus: How would you distinguish them?

Socrates: There is a wide difference between them, Protarchus; some arithmeticians reckon unequal units; as for example, two armies, two oxen, two very large things or two very small things. The party who are opposed to them insist that every unit in ten thousand must be the same as every other unit.

Protarchus: Undoubtedly there is, as you say, a great difference among the votaries of the science; and there may be reasonably supposed to be two sorts of arithmetic.

Socrates: And when we compare the art of mensuration which is used in building with philosophical geometry, or the art of computation which is used in trading with exact calculation, shall we say of either of the pairs that it is one or two?

Protarchus: On the analogy of what has preceded, I should be of opinion that they were severally two.

Socrates: Right; but do you understand why I have discussed the subject?

Protarchus: I think so, but I should like to be told by you.

Socrates: The argument has all along been seeking a parallel to pleasure, and true to that original design, has gone on to ask whether one sort of knowledge is purer than another, as one pleasure is purer than another.

Protarchus: Clearly; that was the intention.

Socrates: And has not the argument in what has preceded, already shown that the arts have different provinces, and vary in their degrees of certainty?

Protarchus: Very true.

Socrates: And just now did not the argument first designate a particular art by a common term, thus making us believe in the unity of that art; and then again, as if speaking of two different things, proceed to enquire whether the art as pursed by philosophers, or as pursued by non-philosophers, has more of certainty and purity?

Protarchus: That is the very question which the argument is asking.

Socrates: And how, Protarchus, shall we answer the enquiry?

Protarchus: O Socrates, we have reached a point at which the difference of clearness in different kinds of knowledge is enormous.

Socrates: Then the answer will be the easier.

Protarchus: Certainly; and let us say in reply, that those arts into which arithmetic and mensuration enter, far surpass all others; and that of these the arts or sciences which are animated by the pure philosophic impulse are infinitely superior in accuracy and truth.

Socrates: Then this is your judgment; and this is the answer which, upon your authority, we will give to all masters of the art of misinterpretation?

Protarchus: What answer?

Socrates: That there are two arts of arithmetic, and two of mensuration; and also several other arts which in like manner have this double nature, and yet only one name.

Protarchus: Let us boldly return this answer to the masters of whom you speak, Socrates, and hope for good luck.

Socrates: We have explained what we term the most exact arts or sciences.

Protarchus: Very good.

Socrates: And yet, Protarchus, dialectic will refuse to acknowledge us, if we do not award to her the first place.

Protarchus: And pray, what is dialectic?

Socrates: Clearly the science which has to do with all that knowledge of which we are now speaking; for I am sure that all men who have a grain of intelligence will admit that the knowledge which has to do with being and reality, and sameness and unchangeableness, is by far the truest of all. But how would you decide this question, Protarchus?

Protarchus: I have often heard Gorgias maintain, Socrates, that the art of persuasion far surpassed every other; this, as he says, is by far the best of them all, for to it all things submit, not by compulsion, but of their own free will. Now, I should not like to quarrel either with you or with him.

Socrates: You mean to say that you would like to desert, if you were not ashamed?

Protarchus: As you please.

Socrates: May I not have led you into a misapprehension?

Protarchus: How?

Socrates: Dear Protarchus, I never asked which was the greatest or best or usefullest of arts or sciences, but which had clearness and accuracy, and the greatest amount of truth, however humble and little useful an art. And as for Gorgias, if you do not deny that his art has the advantage in usefulness to mankind, he will not quarrel with you for saying that the study of which I am speaking is superior in this particular of essential truth; as in the comparison of white colours, a little whiteness, if that little be only pure, was said to be superior in truth to a great mass which is impure. And now let us give our best attention and consider well, not the comparative use or reputation of the sciences, but the power or faculty, if there be such, which the soul has of loving the truth, and of doing all things for the sake of it; let us search into the pure element of mind and intelligence, and then we shall be able to say whether the science of which I have been speaking is most likely to possess the faculty, or whether there be some other which has higher claims.

Protarchus: Well, I have been considering, and I can hardly think that any other science or art has a firmer grasp of the truth than this.

Socrates: Do you say so because you observe that the arts in general and those engaged in them make use of opinion, and are

resolutely engaged in the investigation of matters of opinion? Even he who supposes himself to be occupied with nature is really occupied with the things of this world, how created, how acting or acted upon. Is not this the sort of enquiry in which his life is spent?

Protarchus: True.

Socrates: He is labouring, not after eternal being, but about things which are becoming, or which will or have become.

Protarchus: Very true.

Socrates: And can we say that any of these things which neither are nor have been nor will be unchangeable, when judged by the strict rule of truth ever become certain?

Protarchus: Impossible.

Socrates: How can anything fixed be concerned with that which has no fixedness?

Protarchus: How indeed?

Socrates: Then mind and science when employed about such changing things do not attain the highest truth?

Protarchus: I should imagine not.

Socrates: And now let us bid farewell, a long farewell, to you or me or Philebus or Gorgias, and urge on behalf of the argument a single point.

Protarchus: What point?

Socrates: Let us say that the stable and pure and true and unalloyed has to do with the things which are eternal and unchangeable and unmixed, or if not, at any rate what is most akin to them has; and that all other things are to be placed in a second or inferior class.

Protarchus: Very true.

Socrates: And of the names expressing cognition, ought not the fairest to be given to the fairest things?

Protarchus: That is natural.

Socrates: And are not mind and wisdom the names which are to be honoured most?

Protarchus: Yes.

Socrates: And these names may be said to have their truest and most exact application when the mind is engaged in the contemplation of true being?

Protarchus: Certainly.

Socrates: And these were the names which I adduced of the rivals of pleasure?

Protarchus: Very true, Socrates.

Socrates: In the next place, as to the mixture, here are the ingredients, pleasure and wisdom, and we may be compared to artists who have their materials ready to their hands.

Protarchus: Yes.

Socrates: And now we must begin to mix them?

Protarchus: By all means.

Socrates: But had we not better have a preliminary word and refresh our memories?

Protarchus: Of what?

Socrates: Of that which I have already mentioned. Well says the proverb, that we ought to repeat twice and even thrice that which is good.

Protarchus: Certainly.

Socrates: Well then, by Zeus, let us proceed, and I will make what I believe to be a fair summary of the argument.

Protarchus: Let me hear.

Socrates: Philebus says that pleasure is the true end of all living beings, at which all ought to aim, and moreover that it is the chief good of all, and that the two names ‘good’ and ‘pleasant’ are correctly given to one thing and one nature; Socrates, on the other hand, begins by denying this, and further says, that in nature as in name they are two, and that wisdom partakes more than pleasure of the good. Is not and was not this what we were saying, Protarchus?

Protarchus: Certainly.

Socrates: And is there not and was there not a further point which was conceded between us?

Protarchus: What was it?

Socrates: That the good differs from all other things.

Protarchus: In what respect?

Socrates: In that the being who possesses good always everywhere and in all things has the most perfect sufficiency, and is never in need of anything else.

Protarchus: Exactly.

Socrates: And did we not endeavour to make an imaginary separation of wisdom and pleasure, assigning to each a distinct life, so that pleasure was wholly excluded from wisdom, and wisdom in like manner had no part whatever in pleasure?

Protarchus: We did.

Socrates: And did we think that either of them alone would be sufficient?

Protarchus: Certainly not.

Socrates: And if we erred in any point, then let any one who will, take up the enquiry again and set us right; and assuming memory and wisdom and knowledge and true opinion to belong to the same class, let him consider whether he would desire to possess or acquire, — I will not say pleasure, however abundant

or intense, if he has no real perception that he is pleased, nor any consciousness of what he feels, nor any recollection, however momentary, of the feeling, — but would he desire to have anything at all, if these faculties were wanting to him? And about wisdom I ask the same question; can you conceive that any one would choose to have all wisdom absolutely devoid of pleasure, rather than with a certain degree of pleasure, or all pleasure devoid of wisdom, rather than with a certain degree of wisdom?

Protarchus: Certainly not, Socrates; but why repeat such questions any more?

Socrates: Then the perfect and universally eligible and entirely good cannot possibly be either of them?

Protarchus: Impossible.

Socrates: Then now we must ascertain the nature of the good more or less accurately, in order, as we were saying, that the second place may be duly assigned.

Protarchus: Right.

Socrates: Have we not found a road which leads towards the good?

Protarchus: What road?

Socrates: Supposing that a man had to be found, and you could discover in what house he lived, would not that be a great step towards the discovery of the man himself?

Protarchus: Certainly.

Socrates: And now reason intimates to us, as at our first beginning, that we should seek the good, not in the unmixed life but in the mixed.

Protarchus: True.

Socrates: There is greater hope of finding that which we are seeking in the life which is well mixed than in that which is not?

Protarchus: Far greater.

Socrates: Then now let us mingle, Protarchus, at the same time offering up a prayer to Dionysus or Hephaestus, or whoever is the god who presides over the ceremony of mingling.

Protarchus: By all means.

Socrates: Are not we the cup-bearers? and here are two fountains which are flowing at our side: one, which is pleasure, may be likened to a fountain of honey; the other, wisdom, a sober draught in which no wine mingles, is of water unpleasant but healthful; out of these we must seek to make the fairest of all possible mixtures.

Protarchus: Certainly.

Socrates: Tell me first; — should we be most likely to succeed if we mingled every sort of pleasure with every sort of wisdom?

Protarchus: Perhaps we might.

Socrates: But I should be afraid of the risk, and I think that I can show a safer plan.

Protarchus: What is it?

Socrates: One pleasure was supposed by us to be truer than another, and one art to be more exact than another.

Protarchus: Certainly.

Socrates: There was also supposed to be a difference in sciences; some of them regarding only the transient and perishing, and others the permanent and imperishable and everlasting and immutable; and when judged by the standard of truth, the latter, as we thought, were truer than the former.

Protarchus: Very good and right.

Socrates: If, then, we were to begin by mingling the sections of each class which have the most of truth, will not the union suffice to give us the loveliest of lives, or shall we still want

some elements of another kind?

Protarchus: I think that we ought to do what you suggest.

Socrates: Let us suppose a man who understands justice, and has reason as well as understanding about the true nature of this and of all other things.

Protarchus: We will suppose such a man.

Socrates: Will he have enough of knowledge if he is acquainted only with the divine circle and sphere, and knows nothing of our human spheres and circles, but uses only divine circles and measures in the building of a house?

Protarchus: The knowledge which is only superhuman, Socrates, is ridiculous in man.

Socrates: What do you mean? Do you mean that you are to throw into the cup and mingle the impure and uncertain art which uses the false measure and the false circle?

Protarchus: Yes, we must, if any of us is ever to find his way home.

Socrates: And am I to include music, which, as I was saying just now, is full of guesswork and imitation, and is wanting in purity?

Protarchus: Yes, I think that you must, if human life is to be a life at all.

Socrates: Well, then, suppose that I give way, and, like a doorkeeper who is pushed and overborne by the mob, I open the door wide, and let knowledge of every sort stream in, and the pure mingle with the impure?

Protarchus: I do not know, Socrates, that any great harm would come of having them all, if only you have the first sort.

Socrates: Well, then, shall I let them all flow into what Homer poetically terms ‘a meeting of the waters’?

Protarchus: By all means.

Socrates: There — I have let them in, and now I must return to the fountain of pleasure. For we were not permitted to begin by mingling in a single stream the true portions of both according to our original intention; but the love of all knowledge constrained us to let all the sciences flow in together before the pleasures.

Protarchus: Quite true.

Socrates: And now the time has come for us to consider about the pleasures also, whether we shall in like manner let them go all at once, or at first only the true ones.

Protarchus: It will be by far the safer course to let flow the true ones first.

Socrates: Let them flow, then; and now, if there are any necessary pleasures, as there were arts and sciences necessary, must we not mingle them?

Protarchus: Yes; the necessary pleasures should certainly be allowed to mingle.

Socrates: The knowledge of the arts has been admitted to be innocent and useful always; and if we say of pleasures in like manner that all of them are good and innocent for all of us at all times, we must let them all mingle?

Protarchus: What shall we say about them, and what course shall we take?

Socrates: Do not ask me, Protarchus; but ask the daughters of pleasure and wisdom to answer for themselves.

Protarchus: How?

Socrates: Tell us, O beloved — shall we call you pleasures or by some other name? — would you rather live with or without wisdom? I am of opinion that they would certainly answer as follows:

Protarchus: How?

Socrates: They would answer, as we said before, that for any single class to be left by itself pure and isolated is not good, nor altogether possible; and that if we are to make comparisons of one class with another and choose, there is no better companion than knowledge of things in general, and likewise the perfect knowledge, if that may be, of ourselves in every respect.

Protarchus: And our answer will be: — In that ye have spoken well.

Socrates: Very true. And now let us go back and interrogate wisdom and mind: Would you like to have any pleasures in the mixture? And they will reply:— 'What pleasures do you mean?'

Protarchus: Likely enough.

Socrates: And we shall take up our parable and say: Do you wish to have the greatest and most vehement pleasures for your companions in addition to the true ones? 'Why, Socrates,' they will say, 'how can we? seeing that they are the source of ten thousand hindrances to us; they trouble the souls of men, which are our habitation, with their madness; they prevent us from coming to the birth, and are commonly the ruin of the children which are born to us, causing them to be forgotten and unheeded; but the true and pure pleasures, of which you spoke, know to be of our family, and also those pleasures which accompany health and temperance, and which every Virtue, like a goddess, has in her train to follow her about wherever she goes, — mingle these and not the others; there would be great want of sense in any one who desires to see a fair and perfect mixture, and to find in it what is the highest good in man and in the universe, and to divine what is the true form of good — there would be great want of sense in his allowing the pleasures, which are always in the company of folly and vice, to mingle with mind in the cup.' — Is not this a very rational and suitable reply, which mind has made, both on her own behalf, as well as on the behalf of memory and true opinion?

Protarchus: Most certainly.

Socrates: And still there must be something more added, which is a necessary ingredient in every mixture.

Protarchus: What is that?

Socrates: Unless truth enter into the composition, nothing can truly be created or subsist.

Protarchus: Impossible.

Socrates: Quite impossible; and now you and Philebus must tell me whether anything is still wanting in the mixture, for to my way of thinking the argument is now completed, and may be compared to an incorporeal law, which is going to hold fair rule over a living body.

Protarchus: I agree with you, Socrates.

Socrates: And may we not say with reason that we are now at the vestibule of the habitation of the good?

Protarchus: I think that we are.

Socrates: What, then, is there in the mixture which is most precious, and which is the principal cause why such a state is universally beloved by all? When we have discovered it, we will proceed to ask whether this omnipresent nature is more akin to pleasure or to mind.

Protarchus: Quite right; in that way we shall be better able to judge.

Socrates: And there is no difficulty in seeing the cause which renders any mixture either of the highest value or of none at all.

Protarchus: What do you mean?

Socrates: Every man knows it.

Protarchus: What?

Socrates: He knows that any want of measure and symmetry in any mixture whatever must always of necessity be fatal, both to

the elements and to the mixture, which is then not a mixture, but only a confused medley which brings confusion on the possessor of it.

Protarchus: Most true.

Socrates: And now the power of the good has retired into the region of the beautiful; for measure and symmetry are beauty and virtue all the world over.

Protarchus: True.

Socrates: Also we said that truth was to form an element in the mixture.

Protarchus: Certainly.

Socrates: Then, if we are not able to hunt the good with one idea only, with three we may catch our prey; Beauty, Symmetry, Truth are the three, and these taken together we may regard as the single cause of the mixture, and the mixture as being good by reason of the infusion of them.

Protarchus: Quite right.

Socrates: And now, Protarchus, any man could decide well enough whether pleasure or wisdom is more akin to the highest good, and more honourable among gods and men.

Protarchus: Clearly, and yet perhaps the argument had better be pursued to the end.

Socrates: We must take each of them separately in their relation to pleasure and mind, and pronounce upon them; for we ought to see to which of the two they are severally most akin.

Protarchus: You are speaking of beauty, truth, and measure?

Socrates: Yes, Protarchus, take truth first, and, after passing in review mind, truth, pleasure, pause awhile and make answer to yourself — as to whether pleasure or mind is more akin to truth.

Protarchus: There is no need to pause, for the difference between them is palpable; pleasure is the veriest impostor in the world; and it is said that in the pleasures of love, which appear to be the greatest, perjury is excused by the gods; for pleasures, like children, have not the least particle of reason in them; whereas mind is either the same as truth, or the most like truth, and the truest.

Socrates: Shall we next consider measure, in like manner, and ask whether pleasure has more of this than wisdom, or wisdom than pleasure?

Protarchus: Here is another question which may be easily answered; for I imagine that nothing can ever be more immoderate than the transports of pleasure, or more in conformity with measure than mind and knowledge.

Socrates: Very good; but there still remains the third test: Has mind a greater share of beauty than pleasure, and is mind or pleasure the fairer of the two?

Protarchus: No one, Socrates, either awake or dreaming, ever saw or imagined mind or wisdom to be in aught unseemly, at any time, past, present, or future.

Socrates: Right.

Protarchus: But when we see some one indulging in pleasures, perhaps in the greatest of pleasures, the ridiculous or disgraceful nature of the action makes us ashamed; and so we put them out of sight, and consign them to darkness, under the idea that they ought not to meet the eye of day.

Socrates: Then, Protarchus, you will proclaim everywhere, by word of mouth to this company, and by messengers bearing the tidings far and wide, that pleasure is not the first of possessions, nor yet the second, but that in measure, and the mean, and the suitable, and the like, the eternal nature has been found.

Protarchus: Yes, that seems to be the result of what has been now said.

Socrates: In the second class is contained the symmetrical and beautiful and perfect or sufficient, and all which are of that family.

Protarchus: True.

Socrates: And if you reckon in the third class mind and wisdom, you will not be far wrong, if I divine aright.

Protarchus: I dare say.

Socrates: And would you not put in the fourth class the goods which we were affirming to appertain specially to the soul — sciences and arts and true opinions as we called them? These come after the third class, and form the fourth, as they are certainly more akin to good than pleasure is.

Protarchus: Surely.

Socrates: The fifth class are the pleasures which were defined by us as painless, being the pure pleasures of the soul herself, as we termed them, which accompany, some the sciences, and some the senses.

Protarchus: Perhaps.

Socrates: And now, as Orpheus says,

‘With the sixth generation cease the glory of my song.’

Here, at the sixth award, let us make an end; all that remains is to set the crown on our discourse.

Protarchus: True.

Socrates: Then let us sum up and reassert what has been said, thus offering the third libation to the saviour Zeus.

Protarchus: How?

Socrates: Philebus affirmed that pleasure was always and absolutely the good.

Protarchus: I understand; this third libation, Socrates, of which you spoke, meant a recapitulation.

Socrates: Yes, but listen to the sequel; convinced of what I have just been saying, and feeling indignant at the doctrine, which is maintained, not by Philebus only, but by thousands of others, I affirmed that mind was far better and far more excellent, as an element of human life, than pleasure.

Protarchus: True.

Socrates: But, suspecting that there were other things which were also better, I went on to say that if there was anything better than either, then I would claim the second place for mind over pleasure, and pleasure would lose the second place as well as the first.

Protarchus: You did.

Socrates: Nothing could be more satisfactorily shown than the unsatisfactory nature of both of them.

Protarchus: Very true.

Socrates: The claims both of pleasure and mind to be the absolute good have been entirely disproven in this argument, because they are both wanting in self-sufficiency and also in adequacy and perfection.

Protarchus: Most true.

Socrates: But, though they must both resign in favour of another, mind is ten thousand times nearer and more akin to the nature of the conqueror than pleasure.

Protarchus: Certainly.

Socrates: And, according to the judgment which has now been given, pleasure will rank fifth.

Protarchus: True.

Socrates: But not first; no, not even if all the oxen and horses and animals in the world by their pursuit of enjoyment proclaim her to be so; — although the many trusting in them, as diviners trust in birds, determine that pleasures make up the good of life, and deem the lusts of animals to be better witnesses than the inspirations of divine philosophy.

Protarchus: And now, Socrates, we tell you that the truth of what you have been saying is approved by the judgment of all of us.

Socrates: And will you let me go?

Protarchus: There is a little which yet remains, and I will remind you of it, for I am sure that you will not be the first to go away from an argument.

Alcibiades II

ΑΛΚΙΒΙΑΔΗΣ ΙΙ

Socrates: Are you going, Alcibiades, to offer prayer to Zeus?

Alcibiades: Yes, Socrates, I am.

Socrates: you seem to be troubled and to cast your eyes on the ground, as though you were thinking about something.

Alcibiades: Of what do you suppose that I am thinking?

Socrates: Of the greatest of all things, as I believe. Tell me, do you not suppose that the Gods sometimes partly grant and partly reject the requests which we make in public and private, and favour some persons and not others?

Alcibiades: Certainly.

Socrates: Do you not imagine, then, that a man ought to be very careful, lest perchance without knowing it he implore great evils for himself, deeming that he is asking for good, especially if the Gods are in the mood to grant whatever he may request? There is the story of Oedipus, for instance, who prayed that his children might divide their inheritance between them by the sword: he did not, as he might have done, beg that his present evils might be averted, but called down new ones. And was not his prayer accomplished, and did not many and terrible evils thence arise, upon which I need not dilate?

Alcibiades: Yes, Socrates, but you are speaking of a madman: surely you do not think that any one in his senses would venture to make such a prayer?

Socrates: Madness, then, you consider to be the opposite of discretion?

Alcibiades: Of course.

Socrates: And some men seem to you to be discreet, and others the contrary?

Alcibiades: They do.

Socrates: Well, then, let us discuss who these are. We acknowledge that some are discreet, some foolish, and that some are mad?

Alcibiades: Yes.

Socrates: And again, there are some who are in health?

Alcibiades: There are.

Socrates: While others are ailing?

Alcibiades: Yes.

Socrates: And they are not the same?

Alcibiades: Certainly not.

Socrates: Nor are there any who are in neither state?

Alcibiades: No.

Socrates: A man must either be sick or be well?

Alcibiades: That is my opinion.

Socrates: Very good: and do you think the same about discretion and want of discretion?

Alcibiades: How do you mean?

Socrates: Do you believe that a man must be either in or out of his senses; or is there some third or intermediate condition, in which he is neither one nor the other?

Alcibiades: Decidedly not.

Socrates: He must be either sane or insane?

Alcibiades: So I suppose.

Socrates: Did you not acknowledge that madness was the opposite of discretion?

Alcibiades: Yes.

Socrates: And that there is no third or middle term between discretion and indiscretion?

Alcibiades: True.

Socrates: And there cannot be two opposites to one thing?

Alcibiades: There cannot.

Socrates: Then madness and want of sense are the same?

Alcibiades: That appears to be the case.

Socrates: We shall be in the right, therefore, Alcibiades, if we say that all who are senseless are mad. For example, if among persons of your own age or older than yourself there are some who are senseless, — as there certainly are, — they are mad. For tell me, by heaven, do you not think that in the city the wise are few, while the foolish, whom you call mad, are many?

Alcibiades: I do.

Socrates: But how could we live in safety with so many crazy people? Should we not long since have paid the penalty at their hands, and have been struck and beaten and endured every other form of ill-usage which madmen are wont to inflict? Consider, my dear friend: may it not be quite otherwise?

Alcibiades: Why, Socrates, how is that possible? I must have been mistaken.

Socrates: So it seems to me. But perhaps we may consider the matter thus: —

Alcibiades: How?

Socrates: I will tell you. We think that some are sick; do we not?

Alcibiades: Yes.

Socrates: And must every sick person either have the gout, or be in a fever, or suffer from ophthalmia? Or do you believe that a man may labour under some other disease, even although he has none of these complaints? Surely, they are not the only maladies which exist?

Alcibiades: Certainly not.

Socrates: And is every kind of ophthalmia a disease?

Alcibiades: Yes.

Socrates: And every disease ophthalmia?

Alcibiades: Surely not. But I scarcely understand what I mean myself.

Socrates: Perhaps, if you give me your best attention, ‘two of us’ looking together, we may find what we seek.

Alcibiades: I am attending, Socrates, to the best of my power.

Socrates: We are agreed, then, that every form of ophthalmia is a disease, but not every disease ophthalmia?

Alcibiades: We are.

Socrates: And so far we seem to be right. For every one who suffers from a fever is sick; but the sick, I conceive, do not all have fever or gout or ophthalmia, although each of these is a disease, which, according to those whom we call physicians, may require a different treatment. They are not all alike, nor do they produce the same result, but each has its own effect, and yet they are all diseases. May we not take an illustration from the artizans?

Alcibiades: Certainly.

Socrates: There are cobblers and carpenters and sculptors and others of all sorts and kinds, whom we need not stop to enumerate. All have their distinct employments and all are

workmen, although they are not all of them cobblers or carpenters or sculptors.

Alcibiades: No, indeed.

Socrates: And in like manner men differ in regard to want of sense. Those who are most out of their wits we call ‘madmen,’ while we term those who are less far gone ‘stupid’ or ‘idiotic,’ or, if we prefer gentler language, describe them as ‘romantic’ or ‘simple-minded,’ or, again, as ‘innocent’ or ‘inexperienced’ or ‘foolish.’ You may even find other names, if you seek for them; but by all of them lack of sense is intended. They only differ as one art appeared to us to differ from another or one disease from another. Or what is your opinion?

Alcibiades: I agree with you.

Socrates: Then let us return to the point at which we digressed. We said at first that we should have to consider who were the wise and who the foolish. For we acknowledged that there are these two classes? Did we not?

Alcibiades: To be sure.

Socrates: And you regard those as sensible who know what ought to be done or said?

Alcibiades: Yes.

Socrates: The senseless are those who do not know this?

Alcibiades: True.

Socrates: The latter will say or do what they ought not without their own knowledge?

Alcibiades: Exactly.

Socrates: Oedipus, as I was saying, Alcibiades, was a person of this sort. And even now-a-days you will find many who (have offered inauspicious prayers), although, unlike him, they were not in anger nor thought that they were asking evil. He neither sought, nor supposed that he sought for good, but others have

had quite the contrary notion. I believe that if the God whom you are about to consult should appear to you, and, in anticipation of your request, enquired whether you would be contented to become tyrant of Athens, and if this seemed in your eyes a small and mean thing, should add to it the dominion of all Hellas; and seeing that even then you would not be satisfied unless you were ruler of the whole of Europe, should promise, not only that, but, if you so desired, should proclaim to all mankind in one and the same day that Alcibiades, son of Cleinias, was tyrant: — in such a case, I imagine, you would depart full of joy, as one who had obtained the greatest of goods.

Alcibiades: And not only I, Socrates, but any one else who should meet with such luck.

Socrates: Yet you would not accept the dominion and lordship of all the Hellenes and all the barbarians in exchange for your life?

Alcibiades: Certainly not: for then what use could I make of them?

Socrates: And would you accept them if you were likely to use them to a bad and mischievous end?

Alcibiades: I would not.

Socrates: You see that it is not safe for a man either rashly to accept whatever is offered him, or himself to request a thing, if he is likely to suffer thereby or immediately to lose his life. And yet we could tell of many who, having long desired and diligently laboured to obtain a tyranny, thinking that thus they would procure an advantage, have nevertheless fallen victims to designing enemies. You must have heard of what happened only the other day, how Archelaus of Macedonia was slain by his beloved (compare Aristotle, Pol.), whose love for the tyranny was not less than that of Archelaus for him. The tyrannicide expected by his crime to become tyrant and afterwards to have a happy life; but when he had held the tyranny three or four

days, he was in his turn conspired against and slain. Or look at certain of our own citizens, — and of their actions we have been not hearers, but eyewitnesses, — who have desired to obtain military command: of those who have gained their object, some are even to this day exiles from the city, while others have lost their lives. And even they who seem to have fared best, have not only gone through many perils and terrors during their office, but after their return home they have been beset by informers worse than they once were by their foes, insomuch that several of them have wished that they had remained in a private station rather than have had the glories of command. If, indeed, such perils and terrors were of profit to the commonwealth, there would be reason in undergoing them; but the very contrary is the case. Again, you will find persons who have prayed for offspring, and when their prayers were heard, have fallen into the greatest pains and sufferings. For some have begotten children who were utterly bad, and have therefore passed all their days in misery, while the parents of good children have undergone the misfortune of losing them, and have been so little happier than the others that they would have preferred never to have had children rather than to have had them and lost them. And yet, although these and the like examples are manifest and known of all, it is rare to find any one who has refused what has been offered him, or, if he were likely to gain aught by prayer, has refrained from making his petition. The mass of mankind would not decline to accept a tyranny, or the command of an army, or any of the numerous things which cause more harm than good: but rather, if they had them not, would have prayed to obtain them. And often in a short space of time they change their tone, and wish their old prayers unsaid. Wherefore also I suspect that men are entirely wrong when they blame the gods as the authors of the ills which befall them (compare Republic): ‘their own presumption,’ or folly (whichever is the right word) —

‘Has brought these unmeasured woes upon them.’ (Homer. Odyss.)

He must have been a wise poet, Alcibiades, who, seeing as I believe, his friends foolishly praying for and doing things which would not really profit them, offered up a common prayer in behalf of them all: —

‘King Zeus, grant us good whether prayed for or unsought by us; But that which we ask amiss, do thou avert.’ (The author of these lines, which are probably of Pythagorean origin, is unknown. They are found also in the Anthology (Anth. Pal.).)

In my opinion, I say, the poet spoke both well and prudently; but if you have anything to say in answer to him, speak out.

Alcibiades: It is difficult, Socrates, to oppose what has been well said. And I perceive how many are the ills of which ignorance is the cause, since, as would appear, through ignorance we not only do, but what is worse, pray for the greatest evils. No man would imagine that he would do so; he would rather suppose that he was quite capable of praying for what was best: to call down evils seems more like a curse than a prayer.

Socrates: But perhaps, my good friend, some one who is wiser than either you or I will say that we have no right to blame ignorance thus rashly, unless we can add what ignorance we mean and of what, and also to whom and how it is respectively a good or an evil?

Alcibiades: How do you mean? Can ignorance possibly be better than knowledge for any person in any conceivable case?

Socrates: So I believe: — you do not think so?

Alcibiades: Certainly not.

Socrates: And yet surely I may not suppose that you would ever wish to act towards your mother as they say that Orestes and Alcmeon and others have done towards their parent.

Alcibiades: Good words, Socrates, prithee.

Socrates: You ought not to bid him use auspicious words, who says that you would not be willing to commit so horrible a deed,

but rather him who affirms the contrary, if the act appear to you unfit even to be mentioned. Or do you think that Orestes, had he been in his senses and knew what was best for him to do, would ever have dared to venture on such a crime?

Alcibiades: Certainly not.

Socrates: Nor would any one else, I fancy?

Alcibiades: No.

Socrates: That ignorance is bad then, it would appear, which is of the best and does not know what is best?

Alcibiades: So I think, at least.

Socrates: And both to the person who is ignorant and everybody else?

Alcibiades: Yes.

Socrates: Let us take another case. Suppose that you were suddenly to get into your head that it would be a good thing to kill Pericles, your kinsman and guardian, and were to seize a sword and, going to the doors of his house, were to enquire if he were at home, meaning to slay only him and no one else: — the servants reply, 'Yes': (Mind, I do not mean that you would really do such a thing; but there is nothing, you think, to prevent a man who is ignorant of the best, having occasionally the whim that what is worst is best?

Alcibiades: No.)

Socrates: — If, then, you went indoors, and seeing him, did not know him, but thought that he was some one else, would you venture to slay him?

Alcibiades: Most decidedly not (it seems to me). (These words are omitted in several MSS.)

Socrates: For you designed to kill, not the first who offered, but Pericles himself?

Alcibiades: Certainly.

Socrates: And if you made many attempts, and each time failed to recognize Pericles, you would never attack him?

Alcibiades: Never.

Socrates: Well, but if Orestes in like manner had not known his mother, do you think that he would ever have laid hands upon her?

Alcibiades: No.

Socrates: He did not intend to slay the first woman he came across, nor any one else's mother, but only his own?

Alcibiades: True.

Socrates: Ignorance, then, is better for those who are in such a frame of mind, and have such ideas?

Alcibiades: Obviously.

Socrates: You acknowledge that for some persons in certain cases the ignorance of some things is a good and not an evil, as you formerly supposed?

Alcibiades: I do.

Socrates: And there is still another case which will also perhaps appear strange to you, if you will consider it? (The reading is here uncertain.)

Alcibiades: What is that, Socrates?

Socrates: It may be, in short, that the possession of all the sciences, if unaccompanied by the knowledge of the best, will more often than not injure the possessor. Consider the matter thus: — Must we not, when we intend either to do or say anything, suppose that we know or ought to know that which we propose so confidently to do or say?

Alcibiades: Yes, in my opinion.

Socrates: We may take the orators for an example, who from time to time advise us about war and peace, or the building of walls and the construction of harbours, whether they understand the business in hand, or only think that they do. Whatever the city, in a word, does to another city, or in the management of her own affairs, all happens by the counsel of the orators.

Alcibiades: True.

Socrates: But now see what follows, if I can (make it clear to you). (Some words appear to have dropped out here.) You would distinguish the wise from the foolish?

Alcibiades: Yes.

Socrates: The many are foolish, the few wise?

Alcibiades: Certainly.

Socrates: And you use both the terms, ‘wise’ and ‘foolish,’ in reference to something?

Alcibiades: I do.

Socrates: Would you call a person wise who can give advice, but does not know whether or when it is better to carry out the advice?

Alcibiades: Decidedly not.

Socrates: Nor again, I suppose, a person who knows the art of war, but does not know whether it is better to go to war or for how long?

Alcibiades: No.

Socrates: Nor, once more, a person who knows how to kill another or to take away his property or to drive him from his native land, but not when it is better to do so or for whom it is better?

Alcibiades: Certainly not.

Socrates: But he who understands anything of the kind and has at the same time the knowledge of the best course of action: — and the best and the useful are surely the same? —

Alcibiades: Yes.

Socrates: — Such an one, I say, we should call wise and a useful adviser both of himself and of the city. What do you think?

Alcibiades: I agree.

Socrates: And if any one knows how to ride or to shoot with the bow or to box or to wrestle, or to engage in any other sort of contest or to do anything whatever which is in the nature of an art, — what do you call him who knows what is best according to that art? Do you not speak of one who knows what is best in riding as a good rider?

Alcibiades: Yes.

Socrates: And in a similar way you speak of a good boxer or a good flute-player or a good performer in any other art?

Alcibiades: True.

Socrates: But is it necessary that the man who is clever in any of these arts should be wise also in general? Or is there a difference between the clever artist and the wise man?

Alcibiades: All the difference in the world.

Socrates: And what sort of a state do you think that would be which was composed of good archers and flute-players and athletes and masters in other arts, and besides them of those others about whom we spoke, who knew how to go to war and how to kill, as well as of orators puffed up with political pride, but in which not one of them all had this knowledge of the best, and there was no one who could tell when it was better to apply any of these arts or in regard to whom?

Alcibiades: I should call such a state bad, Socrates.

Socrates: You certainly would when you saw each of them rivalling the other and esteeming that of the greatest importance in the state,

'Wherein he himself most excelled.' (Euripides, Antiope.) — I mean that which was best in any art, while he was entirely ignorant of what was best for himself and for the state, because, as I think, he trusts to opinion which is devoid of intelligence. In such a case should we not be right if we said that the state would be full of anarchy and lawlessness?

Alcibiades: Decidedly.

Socrates: But ought we not then, think you, either to fancy that we know or really to know, what we confidently propose to do or say?

Alcibiades: Yes.

Socrates: And if a person does that which he knows or supposes that he knows, and the result is beneficial, he will act advantageously both for himself and for the state?

Alcibiades: True.

Socrates: And if he do the contrary, both he and the state will suffer?

Alcibiades: Yes.

Socrates: Well, and are you of the same mind, as before?

Alcibiades: I am.

Socrates: But were you not saying that you would call the many unwise and the few wise?

Alcibiades: I was.

Socrates: And have we not come back to our old assertion that the many fail to obtain the best because they trust to opinion which is devoid of intelligence?

Alcibiades: That is the case.

Socrates: It is good, then, for the many, if they particularly desire to do that which they know or suppose that they know, neither to know nor to suppose that they know, in cases where if they carry out their ideas in action they will be losers rather than gainers?

Alcibiades: What you say is very true.

Socrates: Do you not see that I was really speaking the truth when I affirmed that the possession of any other kind of knowledge was more likely to injure than to benefit the possessor, unless he had also the knowledge of the best?

Alcibiades: I do now, if I did not before, Socrates.

Socrates: The state or the soul, therefore, which wishes to have a right existence must hold firmly to this knowledge, just as the sick man clings to the physician, or the passenger depends for safety on the pilot. And if the soul does not set sail until she have obtained this she will be all the safer in the voyage through life. But when she rushes in pursuit of wealth or bodily strength or anything else, not having the knowledge of the best, so much the more is she likely to meet with misfortune. And he who has the love of learning (Or, reading polumatheian, 'abundant learning.'), and is skilful in many arts, and does not possess the knowledge of the best, but is under some other guidance, will make, as he deserves, a sorry voyage: — he will, I believe, hurry through the brief space of human life, pilotless in mid-ocean, and the words will apply to him in which the poet blamed his enemy: —

'...Full many a thing he knew; But knew them all badly.' (A fragment from the pseudo-Homeric poem, 'Margites.')

Alcibiades: How in the world, Socrates, do the words of the poet apply to him? They seem to me to have no bearing on the point whatever.

Socrates: Quite the contrary, my sweet friend: only the poet is talking in riddles after the fashion of his tribe. For all poetry has

by nature an enigmatical character, and it is by no means everybody who can interpret it. And if, moreover, the spirit of poetry happen to seize on a man who is of a begrudging temper and does not care to manifest his wisdom but keeps it to himself as far as he can, it does indeed require an almost superhuman wisdom to discover what the poet would be at. You surely do not suppose that Homer, the wisest and most divine of poets, was unaware of the impossibility of knowing a thing badly: for it was no less a person than he who said of Margites that 'he knew many things, but knew them all badly.' The solution of the riddle is this, I imagine: — By 'badly' Homer meant 'bad' and 'knew' stands for 'to know.' Put the words together; — the metre will suffer, but the poet's meaning is clear;— 'Margites knew all these things, but it was bad for him to know them.' And, obviously, if it was bad for him to know so many things, he must have been a good-for-nothing, unless the argument has played us false.

Alcibiades: But I do not think that it has, Socrates: at least, if the argument is fallacious, it would be difficult for me to find another which I could trust.

Socrates: And you are right in thinking so.

Alcibiades: Well, that is my opinion.

Socrates: But tell me, by Heaven: — you must see now the nature and greatness of the difficulty in which you, like others, have your part. For you change about in all directions, and never come to rest anywhere: what you once most strongly inclined to suppose, you put aside again and quite alter your mind. If the God to whose shrine you are going should appear at this moment, and ask before you made your prayer, 'Whether you would desire to have one of the things which we mentioned at first, or whether he should leave you to make your own request:' — what in either case, think you, would be the best way to take advantage of the opportunity?

Alcibiades: Indeed, Socrates, I could not answer you without consideration. It seems to me to be a wild thing (The Homeric word margos is said to be here employed in allusion to the quotation from the 'Margites' which Socrates has just made; but it is not used in the sense which it has in Homer.) to make such a request; a man must be very careful lest he pray for evil under the idea that he is asking for good, when shortly after he may have to recall his prayer, and, as you were saying, demand the opposite of what he at first requested.

Socrates: And was not the poet whose words I originally quoted wiser than we are, when he bade us (pray God) to defend us from evil even though we asked for it?

Alcibiades: I believe that you are right.

Socrates: The Lacedaemonians, too, whether from admiration of the poet or because they have discovered the idea for themselves, are wont to offer the prayer alike in public and private, that the Gods will give unto them the beautiful as well as the good: — no one is likely to hear them make any further petition. And yet up to the present time they have not been less fortunate than other men; or if they have sometimes met with misfortune, the fault has not been due to their prayer. For surely, as I conceive, the Gods have power either to grant our requests, or to send us the contrary of what we ask.

And now I will relate to you a story which I have heard from certain of our elders. It chanced that when the Athenians and Lacedaemonians were at war, our city lost every battle by land and sea and never gained a victory. The Athenians being annoyed and perplexed how to find a remedy for their troubles, decided to send and enquire at the shrine of Ammon. Their envoys were also to ask, 'Why the Gods always granted the victory to the Lacedaemonians?' 'We,' (they were to say,) 'offer them more and finer sacrifices than any other Hellenic state, and adorn their temples with gifts, as nobody else does; moreover, we make the most solemn and costly processions to

them every year, and spend more money in their service than all the rest of the Hellenes put together. But the Lacedaemonians take no thought of such matters, and pay so little respect to the Gods that they have a habit of sacrificing blemished animals to them, and in various ways are less zealous than we are, although their wealth is quite equal to ours.' When they had thus spoken, and had made their request to know what remedy they could find against the evils which troubled them, the prophet made no direct answer, — clearly because he was not allowed by the God to do so; — but he summoned them to him and said: 'Thus saith Ammon to the Athenians: "The silent worship of the Lacedaemonians pleaseth me better than all the offerings of the other Hellenes."' Such were the words of the God, and nothing more. He seems to have meant by 'silent worship' the prayer of the Lacedaemonians, which is indeed widely different from the usual requests of the Hellenes. For they either bring to the altar bulls with gilded horns or make offerings to the Gods, and beg at random for what they need, good or bad. When, therefore, the Gods hear them using words of ill omen they reject these costly processions and sacrifices of theirs. And we ought, I think, to be very careful and consider well what we should say and what leave unsaid. Homer, too, will furnish us with similar stories. For he tells us how the Trojans in making their encampment,

'Offered up whole hecatombs to the immortals,'

and how the 'sweet savour' was borne 'to the heavens by the winds;

'But the blessed Gods were averse and received it not.

For exceedingly did they hate the holy Ilium,

Both Priam and the people of the spear-skilled king.'

So that it was in vain for them to sacrifice and offer gifts, seeing that they were hateful to the Gods, who are not, like vile usurers, to be gained over by bribes. And it is foolish for us to

boast that we are superior to the Lacedaemonians by reason of our much worship. The idea is inconceivable that the Gods have regard, not to the justice and purity of our souls, but to costly processions and sacrifices, which men may celebrate year after year, although they have committed innumerable crimes against the Gods or against their fellow-men or the state. For the Gods, as Ammon and his prophet declare, are no receivers of gifts, and they scorn such unworthy service. Wherefore also it would seem that wisdom and justice are especially honoured both by the Gods and by men of sense; and they are the wisest and most just who know how to speak and act towards Gods and men. But I should like to hear what your opinion is about these matters.

Alcibiades: I agree, Socrates, with you and with the God, whom, indeed, it would be unbecoming for me to oppose.

Socrates: Do you not remember saying that you were in great perplexity, lest perchance you should ask for evil, supposing that you were asking for good?

Alcibiades: I do.

Socrates: You see, then, that there is a risk in your approaching the God in prayer, lest haply he should refuse your sacrifice when he hears the blasphemy which you utter, and make you partake of other evils as well. The wisest plan, therefore, seems to me that you should keep silence; for your 'highmindedness' — to use the mildest term which men apply to folly — will most likely prevent you from using the prayer of the Lacedaemonians. You had better wait until we find out how we should behave towards the Gods and towards men.

Alcibiades: And how long must I wait, Socrates, and who will be my teacher? I should be very glad to see the man.

Socrates: It is he who takes an especial interest in you. But first of all, I think, the darkness must be taken away in which your soul is now enveloped, just as Athene in Homer removes the mist from the eyes of Diomede that

‘He may distinguish between God and mortal man.’

Afterwards the means may be given to you whereby you may distinguish between good and evil. At present, I fear, this is beyond your power.

Alcibiades: Only let my instructor take away the impediment, whether it pleases him to call it mist or anything else! I care not who he is; but I am resolved to disobey none of his commands, if I am likely to be the better for them.

Socrates: And surely he has a wondrous care for you.

Alcibiades: It seems to be altogether advisable to put off the sacrifice until he is found.

Socrates: You are right: that will be safer than running such a tremendous risk.

Alcibiades: But how shall we manage, Socrates? — At any rate I will set this crown of mine upon your head, as you have given me such excellent advice, and to the Gods we will offer crowns and perform the other customary rites when I see that day approaching: nor will it be long hence, if they so will.

Socrates: I accept your gift, and shall be ready and willing to receive whatever else you may proffer. Euripides makes Creon say in the play, when he beholds Teiresias with his crown and hears that he has gained it by his skill as the first-fruits of the spoil: —

‘An auspicious omen I deem thy victor’s wreath: For well thou knowest that wave and storm oppress us.’

And so I count your gift to be a token of good-fortune; for I am in no less stress than Creon, and would fain carry off the victory over your lovers.

Euthyphro

ΕΥΘΥΦΡΩΝ

Euthyphro: Why have you left the Lyceum, Socrates? and what are you doing in the Porch of the King Archon? Surely you cannot be concerned in a suit before the King, like myself?

Socrates: Not in a suit, Euthyphro; impeachment is the word which the Athenians use.

Euthyphro: What! I suppose that some one has been prosecuting you, for I cannot believe that you are the prosecutor of another.

Socrates: Certainly not.

Euthyphro: Then some one else has been prosecuting you?

Socrates: Yes.

Euthyphro: And who is he?

Socrates: A young man who is little known, Euthyphro; and I hardly know him: his name is Meletus, and he is of the deme of Pitthis. Perhaps you may remember his appearance; he has a beak, and long straight hair, and a beard which is ill grown.

Euthyphro: No, I do not remember him, Socrates. But what is the charge which he brings against you?

Socrates: What is the charge? Well, a very serious charge, which shows a good deal of character in the young man, and for which he is certainly not to be despised. He says he knows how the youth are corrupted and who are their corruptors. I fancy that he must be a wise man, and seeing that I am the reverse of a wise man, he has found me out, and is going to accuse me of

corrupting his young friends. And of this our mother the state is to be the judge. Of all our political men he is the only one who seems to me to begin in the right way, with the cultivation of virtue in youth; like a good husbandman, he makes the young shoots his first care, and clears away us who are the destroyers of them. This is only the first step; he will afterwards attend to the elder branches; and if he goes on as he has begun, he will be a very great public benefactor.

Euthyphro: I hope that he may; but I rather fear, Socrates, that the opposite will turn out to be the truth. My opinion is that in attacking you he is simply aiming a blow at the foundation of the state. But in what way does he say that you corrupt the young?

Socrates: He brings a wonderful accusation against me, which at first hearing excites surprise: he says that I am a poet or maker of gods, and that I invent new gods and deny the existence of old ones; this is the ground of his indictment.

Euthyphro: I understand, Socrates; he means to attack you about the familiar sign which occasionally, as you say, comes to you. He thinks that you are a neologian, and he is going to have you up before the court for this. He knows that such a charge is readily received by the world, as I myself know too well; for when I speak in the assembly about divine things, and foretell the future to them, they laugh at me and think me a madman. Yet every word that I say is true. But they are jealous of us all; and we must be brave and go at them.

Socrates: Their laughter, friend Euthyphro, is not a matter of much consequence. For a man may be thought wise; but the Athenians, I suspect, do not much trouble themselves about him until he begins to impart his wisdom to others, and then for some reason or other, perhaps, as you say, from jealousy, they are angry.

Euthyphro: I am never likely to try their temper in this way.

Socrates: I dare say not, for you are reserved in your behaviour, and seldom impart your wisdom. But I have a benevolent habit of pouring out myself to everybody, and would even pay for a listener, and I am afraid that the Athenians may think me too talkative. Now if, as I was saying, they would only laugh at me, as you say that they laugh at you, the time might pass gaily enough in the court; but perhaps they may be in earnest, and then what the end will be you soothsayers only can predict.

Euthyphro: I dare say that the affair will end in nothing, Socrates, and that you will win your cause; and I think that I shall win my own.

Socrates: And what is your suit, Euthyphro? are you the pursuer or the defendant?

Euthyphro: I am the pursuer.

Socrates: Of whom?

Euthyphro: You will think me mad when I tell you.

Socrates: Why, has the fugitive wings?

Euthyphro: Nay, he is not very volatile at his time of life.

Socrates: Who is he?

Euthyphro: My father.

Socrates: Your father! my good man?

Euthyphro: Yes.

Socrates: And of what is he accused?

Euthyphro: Of murder, Socrates.

Socrates: By the powers, Euthyphro! how little does the common herd know of the nature of right and truth. A man must be an extraordinary man, and have made great strides in wisdom, before he could have seen his way to bring such an action.

Euthyphro: Indeed, Socrates, he must.

Socrates: I suppose that the man whom your father murdered was one of your relatives — clearly he was; for if he had been a stranger you would never have thought of prosecuting him.

Euthyphro: I am amused, Socrates, at your making a distinction between one who is a relation and one who is not a relation; for surely the pollution is the same in either case, if you knowingly associate with the murderer when you ought to clear yourself and him by proceeding against him. The real question is whether the murdered man has been justly slain. If justly, then your duty is to let the matter alone; but if unjustly, then even if the murderer lives under the same roof with you and eats at the same table, proceed against him. Now the man who is dead was a poor dependant of mine who worked for us as a field labourer on our farm in Naxos, and one day in a fit of drunken passion he got into a quarrel with one of our domestic servants and slew him. My father bound him hand and foot and threw him into a ditch, and then sent to Athens to ask of a diviner what he should do with him. Meanwhile he never attended to him and took no care about him, for he regarded him as a murderer; and thought that no great harm would be done even if he did die. Now this was just what happened. For such was the effect of cold and hunger and chains upon him, that before the messenger returned from the diviner, he was dead. And my father and family are angry with me for taking the part of the murderer and prosecuting my father. They say that he did not kill him, and that if he did, the dead man was but a murderer, and I ought not to take any notice, for that a son is impious who prosecutes a father. Which shows, Socrates, how little they know what the gods think about piety and impiety.

Socrates: Good heavens, Euthyphro! and is your knowledge of religion and of things pious and impious so very exact, that, supposing the circumstances to be as you state them, you are not afraid lest you too may be doing an impious thing in bringing an action against your father?

Euthyphro: The best of Euthyphro, and that which distinguishes him, Socrates, from other men, is his exact knowledge of all such matters. What should I be good for without it?

Socrates: Rare friend! I think that I cannot do better than be your disciple. Then before the trial with Meletus comes on I shall challenge him, and say that I have always had a great interest in religious questions, and now, as he charges me with rash imaginations and innovations in religion, I have become your disciple. You, Meletus, as I shall say to him, acknowledge Euthyphro to be a great theologian, and sound in his opinions; and if you approve of him you ought to approve of me, and not have me into court; but if you disapprove, you should begin by indicting him who is my teacher, and who will be the ruin, not of the young, but of the old; that is to say, of myself whom he instructs, and of his old father whom he admonishes and chastises. And if Meletus refuses to listen to me, but will go on, and will not shift the indictment from me to you, I cannot do better than repeat this challenge in the court.

Euthyphro: Yes, indeed, Socrates; and if he attempts to indict me I am mistaken if I do not find a flaw in him; the court shall have a great deal more to say to him than to me.

Socrates: And I, my dear friend, knowing this, am desirous of becoming your disciple. For I observe that no one appears to notice you — not even this Meletus; but his sharp eyes have found me out at once, and he has indicted me for impiety. And therefore, I adjure you to tell me the nature of piety and impiety, which you said that you knew so well, and of murder, and of other offences against the gods. What are they? Is not piety in every action always the same? and impiety, again — is it not always the opposite of piety, and also the same with itself, having, as impiety, one notion which includes whatever is impious?

Euthyphro: To be sure, Socrates.

Socrates: And what is piety, and what is impiety?

Euthyphro: Piety is doing as I am doing; that is to say, prosecuting any one who is guilty of murder, sacrilege, or of any similar crime — whether he be your father or mother, or whoever he may be — that makes no difference; and not to prosecute them is impiety. And please to consider, Socrates, what a notable proof I will give you of the truth of my words, a proof which I have already given to others: — of the principle, I mean, that the impious, whoever he may be, ought not to go unpunished. For do not men regard Zeus as the best and most righteous of the gods? — and yet they admit that he bound his father (Cronos) because he wickedly devoured his sons, and that he too had punished his own father (Uranus) for a similar reason, in a nameless manner. And yet when I proceed against my father, they are angry with me. So inconsistent are they in their way of talking when the gods are concerned, and when I am concerned.

Socrates: May not this be the reason, Euthyphro, why I am charged with impiety — that I cannot away with these stories about the gods? and therefore I suppose that people think me wrong. But, as you who are well informed about them approve of them, I cannot do better than assent to your superior wisdom. What else can I say, confessing as I do, that I know nothing about them? Tell me, for the love of Zeus, whether you really believe that they are true.

Euthyphro: Yes, Socrates; and things more wonderful still, of which the world is in ignorance.

Socrates: And do you really believe that the gods fought with one another, and had dire quarrels, battles, and the like, as the poets say, and as you may see represented in the works of great artists? The temples are full of them; and notably the robe of Athene, which is carried up to the Acropolis at the great Panathenaea, is embroidered with them. Are all these tales of the gods true, Euthyphro?

Euthyphro: Yes, Socrates; and, as I was saying, I can tell you, if you would like to hear them, many other things about the gods which would quite amaze you.

Socrates: I dare say; and you shall tell me them at some other time when I have leisure. But just at present I would rather hear from you a more precise answer, which you have not as yet given, my friend, to the question, What is 'piety'? When asked, you only replied, Doing as you do, charging your father with murder.

Euthyphro: And what I said was true, Socrates.

Socrates: No doubt, Euthyphro; but you would admit that there are many other pious acts?

Euthyphro: There are.

Socrates: Remember that I did not ask you to give me two or three examples of piety, but to explain the general idea which makes all pious things to be pious. Do you not recollect that there was one idea which made the impious impious, and the pious pious?

Euthyphro: I remember.

Socrates: Tell me what is the nature of this idea, and then I shall have a standard to which I may look, and by which I may measure actions, whether yours or those of any one else, and then I shall be able to say that such and such an action is pious, such another impious.

Euthyphro: I will tell you, if you like.

Socrates: I should very much like.

Euthyphro: Piety, then, is that which is dear to the gods, and impiety is that which is not dear to them.

Socrates: Very good, Euthyphro; you have now given me the sort of answer which I wanted. But whether what you say is true or not I cannot as yet tell, although I make no doubt that you will

prove the truth of your words.

Euthyphro: Of course.

Socrates: Come, then, and let us examine what we are saying. That thing or person which is dear to the gods is pious, and that thing or person which is hateful to the gods is impious, these two being the extreme opposites of one another. Was not that said?

Euthyphro: It was.

Socrates: And well said?

Euthyphro: Yes, Socrates, I thought so; it was certainly said.

Socrates: And further, Euthyphro, the gods were admitted to have enmities and hatreds and differences?

Euthyphro: Yes, that was also said.

Socrates: And what sort of difference creates enmity and anger? Suppose for example that you and I, my good friend, differ about a number; do differences of this sort make us enemies and set us at variance with one another? Do we not go at once to arithmetic, and put an end to them by a sum?

Euthyphro: True.

Socrates: Or suppose that we differ about magnitudes, do we not quickly end the differences by measuring?

Euthyphro: Very true.

Socrates: And we end a controversy about heavy and light by resorting to a weighing machine?

Euthyphro: To be sure.

Socrates: But what differences are there which cannot be thus decided, and which therefore make us angry and set us at enmity with one another? I dare say the answer does not occur to you at the moment, and therefore I will suggest that these enmities arise when the matters of difference are the just and

unjust, good and evil, honourable and dishonourable. Are not these the points about which men differ, and about which when we are unable satisfactorily to decide our differences, you and I and all of us quarrel, when we do quarrel? (Compare Alcib.)

Euthyphro: Yes, Socrates, the nature of the differences about which we quarrel is such as you describe.

Socrates: And the quarrels of the gods, noble Euthyphro, when they occur, are of a like nature?

Euthyphro: Certainly they are.

Socrates: They have differences of opinion, as you say, about good and evil, just and unjust, honourable and dishonourable: there would have been no quarrels among them, if there had been no such differences — would there now?

Euthyphro: You are quite right.

Socrates: Does not every man love that which he deems noble and just and good, and hate the opposite of them?

Euthyphro: Very true.

Socrates: But, as you say, people regard the same things, some as just and others as unjust, — about these they dispute; and so there arise wars and fightings among them.

Euthyphro: Very true.

Socrates: Then the same things are hated by the gods and loved by the gods, and are both hateful and dear to them?

Euthyphro: True.

Socrates: And upon this view the same things, Euthyphro, will be pious and also impious?

Euthyphro: So I should suppose.

Socrates: Then, my friend, I remark with surprise that you have not answered the question which I asked. For I certainly did not ask you to tell me what action is both pious and impious: but

now it would seem that what is loved by the gods is also hated by them. And therefore, Euthyphro, in thus chastising your father you may very likely be doing what is agreeable to Zeus but disagreeable to Cronos or Uranus, and what is acceptable to Hephaestus but unacceptable to Here, and there may be other gods who have similar differences of opinion.

Euthyphro: But I believe, Socrates, that all the gods would be agreed as to the propriety of punishing a murderer: there would be no difference of opinion about that.

Socrates: Well, but speaking of men, Euthyphro, did you ever hear any one arguing that a murderer or any sort of evil-doer ought to be let off?

Euthyphro: I should rather say that these are the questions which they are always arguing, especially in courts of law: they commit all sorts of crimes, and there is nothing which they will not do or say in their own defence.

Socrates: But do they admit their guilt, Euthyphro, and yet say that they ought not to be punished?

Euthyphro: No; they do not.

Socrates: Then there are some things which they do not venture to say and do: for they do not venture to argue that the guilty are to be unpunished, but they deny their guilt, do they not?

Euthyphro: Yes.

Socrates: Then they do not argue that the evil-doer should not be punished, but they argue about the fact of who the evil-doer is, and what he did and when?

Euthyphro: True.

Socrates: And the gods are in the same case, if as you assert they quarrel about just and unjust, and some of them say while others deny that injustice is done among them. For surely neither God nor man will ever venture to say that the doer of injustice is not to be punished?

Euthyphro: That is true, Socrates, in the main.

Socrates: But they join issue about the particulars — gods and men alike; and, if they dispute at all, they dispute about some act which is called in question, and which by some is affirmed to be just, by others to be unjust. Is not that true?

Euthyphro: Quite true.

Socrates: Well then, my dear friend Euthyphro, do tell me, for my better instruction and information, what proof have you that in the opinion of all the gods a servant who is guilty of murder, and is put in chains by the master of the dead man, and dies because he is put in chains before he who bound him can learn from the interpreters of the gods what he ought to do with him, dies unjustly; and that on behalf of such an one a son ought to proceed against his father and accuse him of murder. How would you show that all the gods absolutely agree in approving of his act? Prove to me that they do, and I will applaud your wisdom as long as I live.

Euthyphro: It will be a difficult task; but I could make the matter very clear indeed to you.

Socrates: I understand; you mean to say that I am not so quick of apprehension as the judges: for to them you will be sure to prove that the act is unjust, and hateful to the gods.

Euthyphro: Yes indeed, Socrates; at least if they will listen to me.

Socrates: But they will be sure to listen if they find that you are a good speaker. There was a notion that came into my mind while you were speaking; I said to myself: 'Well, and what if Euthyphro does prove to me that all the gods regarded the death of the serf as unjust, how do I know anything more of the nature of piety and impiety? for granting that this action may be hateful to the gods, still piety and impiety are not adequately defined by these distinctions, for that which is hateful to the gods has been shown to be also pleasing and dear to them.' And

therefore, Euthyphro, I do not ask you to prove this; I will suppose, if you like, that all the gods condemn and abominate such an action. But I will amend the definition so far as to say that what all the gods hate is impious, and what they love pious or holy; and what some of them love and others hate is both or neither. Shall this be our definition of piety and impiety?

Euthyphro: Why not, Socrates?

Socrates: Why not! certainly, as far as I am concerned, Euthyphro, there is no reason why not. But whether this admission will greatly assist you in the task of instructing me as you promised, is a matter for you to consider.

Euthyphro: Yes, I should say that what all the gods love is pious and holy, and the opposite which they all hate, impious.

Socrates: Ought we to enquire into the truth of this, Euthyphro, or simply to accept the mere statement on our own authority and that of others? What do you say?

Euthyphro: We should enquire; and I believe that the statement will stand the test of enquiry.

Socrates: We shall know better, my good friend, in a little while. The point which I should first wish to understand is whether the pious or holy is beloved by the gods because it is holy, or holy because it is beloved of the gods.

Euthyphro: I do not understand your meaning, Socrates.

Socrates: I will endeavour to explain: we, speak of carrying and we speak of being carried, of leading and being led, seeing and being seen. You know that in all such cases there is a difference, and you know also in what the difference lies?

Euthyphro: I think that I understand.

Socrates: And is not that which is beloved distinct from that which loves?

Euthyphro: Certainly.

Socrates: Well; and now tell me, is that which is carried in this state of carrying because it is carried, or for some other reason?

Euthyphro: No; that is the reason.

Socrates: And the same is true of what is led and of what is seen?

Euthyphro: True.

Socrates: And a thing is not seen because it is visible, but conversely, visible because it is seen; nor is a thing led because it is in the state of being led, or carried because it is in the state of being carried, but the converse of this. And now I think, Euthyphro, that my meaning will be intelligible; and my meaning is, that any state of action or passion implies previous action or passion. It does not become because it is becoming, but it is in a state of becoming because it becomes; neither does it suffer because it is in a state of suffering, but it is in a state of suffering because it suffers. Do you not agree?

Euthyphro: Yes.

Socrates: Is not that which is loved in some state either of becoming or suffering?

Euthyphro: Yes.

Socrates: And the same holds as in the previous instances; the state of being loved follows the act of being loved, and not the act the state.

Euthyphro: Certainly.

Socrates: And what do you say of piety, Euthyphro: is not piety, according to your definition, loved by all the gods?

Euthyphro: Yes.

Socrates: Because it is pious or holy, or for some other reason?

Euthyphro: No, that is the reason.

Socrates: It is loved because it is holy, not holy because it is loved?

Euthyphro: Yes.

Socrates: And that which is dear to the gods is loved by them, and is in a state to be loved of them because it is loved of them?

Euthyphro: Certainly.

Socrates: Then that which is dear to the gods, Euthyphro, is not holy, nor is that which is holy loved of God, as you affirm; but they are two different things.

Euthyphro: How do you mean, Socrates?

Socrates: I mean to say that the holy has been acknowledged by us to be loved of God because it is holy, not to be holy because it is loved.

Euthyphro: Yes.

Socrates: But that which is dear to the gods is dear to them because it is loved by them, not loved by them because it is dear to them.

Euthyphro: True.

Socrates: But, friend Euthyphro, if that which is holy is the same with that which is dear to God, and is loved because it is holy, then that which is dear to God would have been loved as being dear to God; but if that which is dear to God is dear to him because loved by him, then that which is holy would have been holy because loved by him. But now you see that the reverse is the case, and that they are quite different from one another. For one (theophiles) is of a kind to be loved cause it is loved, and the other (osion) is loved because it is of a kind to be loved. Thus you appear to me, Euthyphro, when I ask you what is the essence of holiness, to offer an attribute only, and not the essence — the attribute of being loved by all the gods. But you still refuse to explain to me the nature of holiness. And therefore, if you please, I will ask you not to hide your treasure,

but to tell me once more what holiness or piety really is, whether dear to the gods or not (for that is a matter about which we will not quarrel); and what is impiety?

Euthyphro: I really do not know, Socrates, how to express what I mean. For somehow or other our arguments, on whatever ground we rest them, seem to turn round and walk away from us.

Socrates: Your words, Euthyphro, are like the handiwork of my ancestor Daedalus; and if I were the sayer or propounder of them, you might say that my arguments walk away and will not remain fixed where they are placed because I am a descendant of his. But now, since these notions are your own, you must find some other gibe, for they certainly, as you yourself allow, show an inclination to be on the move.

Euthyphro: Nay, Socrates, I shall still say that you are the Daedalus who sets arguments in motion; not I, certainly, but you make them move or go round, for they would never have stirred, as far as I am concerned.

Socrates: Then I must be a greater than Daedalus: for whereas he only made his own inventions to move, I move those of other people as well. And the beauty of it is, that I would rather not. For I would give the wisdom of Daedalus, and the wealth of Tantalus, to be able to detain them and keep them fixed. But enough of this. As I perceive that you are lazy, I will myself endeavour to show you how you might instruct me in the nature of piety; and I hope that you will not grudge your labour. Tell me, then — Is not that which is pious necessarily just?

Euthyphro: Yes.

Socrates: And is, then, all which is just pious? or, is that which is pious all just, but that which is just, only in part and not all, pious?

Euthyphro: I do not understand you, Socrates.

Socrates: And yet I know that you are as much wiser than I am, as you are younger. But, as I was saying, revered friend, the abundance of your wisdom makes you lazy. Please to exert yourself, for there is no real difficulty in understanding me. What I mean I may explain by an illustration of what I do not mean. The poet (Stasinus) sings —

'Of Zeus, the author and creator of all these things, You will not tell: for where there is fear there is also reverence.'

Now I disagree with this poet. Shall I tell you in what respect?

Euthyphro: By all means.

Socrates: I should not say that where there is fear there is also reverence; for I am sure that many persons fear poverty and disease, and the like evils, but I do not perceive that they reverence the objects of their fear.

Euthyphro: Very true.

Socrates: But where reverence is, there is fear; for he who has a feeling of reverence and shame about the commission of any action, fears and is afraid of an ill reputation.

Euthyphro: No doubt.

Socrates: Then we are wrong in saying that where there is fear there is also reverence; and we should say, where there is reverence there is also fear. But there is not always reverence where there is fear; for fear is a more extended notion, and reverence is a part of fear, just as the odd is a part of number, and number is a more extended notion than the odd. I suppose that you follow me now?

Euthyphro: Quite well.

Socrates: That was the sort of question which I meant to raise when I asked whether the just is always the pious, or the pious always the just; and whether there may not be justice where there is not piety; for justice is the more extended notion of which piety is only a part. Do you dissent?

Euthyphro: No, I think that you are quite right.

Socrates: Then, if piety is a part of justice, I suppose that we should enquire what part? If you had pursued the enquiry in the previous cases; for instance, if you had asked me what is an even number, and what part of number the even is, I should have had no difficulty in replying, a number which represents a figure having two equal sides. Do you not agree?

Euthyphro: Yes, I quite agree.

Socrates: In like manner, I want you to tell me what part of justice is piety or holiness, that I may be able to tell Meletus not to do me injustice, or indict me for impiety, as I am now adequately instructed by you in the nature of piety or holiness, and their opposites.

Euthyphro: Piety or holiness, Socrates, appears to me to be that part of justice which attends to the gods, as there is the other part of justice which attends to men.

Socrates: That is good, Euthyphro; yet still there is a little point about which I should like to have further information, What is the meaning of ‘attention’? For attention can hardly be used in the same sense when applied to the gods as when applied to other things. For instance, horses are said to require attention, and not every person is able to attend to them, but only a person skilled in horsemanship. Is it not so?

Euthyphro: Certainly.

Socrates: I should suppose that the art of horsemanship is the art of attending to horses?

Euthyphro: Yes.

Socrates: Nor is every one qualified to attend to dogs, but only the huntsman?

Euthyphro: True.

Socrates: And I should also conceive that the art of the huntsman is the art of attending to dogs?

Euthyphro: Yes.

Socrates: As the art of the oxherd is the art of attending to oxen?

Euthyphro: Very true.

Socrates: In like manner holiness or piety is the art of attending to the gods? — that would be your meaning, Euthyphro?

Euthyphro: Yes.

Socrates: And is not attention always designed for the good or benefit of that to which the attention is given? As in the case of horses, you may observe that when attended to by the horseman's art they are benefited and improved, are they not?

Euthyphro: True.

Socrates: As the dogs are benefited by the huntsman's art, and the oxen by the art of the oxherd, and all other things are tended or attended for their good and not for their hurt?

Euthyphro: Certainly, not for their hurt.

Socrates: But for their good?

Euthyphro: Of course.

Socrates: And does piety or holiness, which has been defined to be the art of attending to the gods, benefit or improve them? Would you say that when you do a holy act you make any of the gods better?

Euthyphro: No, no; that was certainly not what I meant.

Socrates: And I, Euthyphro, never supposed that you did. I asked you the question about the nature of the attention, because I thought that you did not.

Euthyphro: You do me justice, Socrates; that is not the sort of attention which I mean.

Socrates: Good: but I must still ask what is this attention to the gods which is called piety?

Euthyphro: It is such, Socrates, as servants show to their masters.

Socrates: I understand — a sort of ministration to the gods.

Euthyphro: Exactly.

Socrates: Medicine is also a sort of ministration or service, having in view the attainment of some object — would you not say of health?

Euthyphro: I should.

Socrates: Again, there is an art which ministers to the ship-builder with a view to the attainment of some result?

Euthyphro: Yes, Socrates, with a view to the building of a ship.

Socrates: As there is an art which ministers to the house-builder with a view to the building of a house?

Euthyphro: Yes.

Socrates: And now tell me, my good friend, about the art which ministers to the gods: what work does that help to accomplish? For you must surely know if, as you say, you are of all men living the one who is best instructed in religion.

Euthyphro: And I speak the truth, Socrates.

Socrates: Tell me then, oh tell me — what is that fair work which the gods do by the help of our ministrations?

Euthyphro: Many and fair, Socrates, are the works which they do.

Socrates: Why, my friend, and so are those of a general. But the chief of them is easily told. Would you not say that victory in war is the chief of them?

Euthyphro: Certainly.

Socrates: Many and fair, too, are the works of the husbandman, if I am not mistaken; but his chief work is the production of food from the earth?

Euthyphro: Exactly.

Socrates: And of the many and fair things done by the gods, which is the chief or principal one?

Euthyphro: I have told you already, Socrates, that to learn all these things accurately will be very tiresome. Let me simply say that piety or holiness is learning how to please the gods in word and deed, by prayers and sacrifices. Such piety is the salvation of families and states, just as the impious, which is unpleasing to the gods, is their ruin and destruction.

Socrates: I think that you could have answered in much fewer words the chief question which I asked, Euthyphro, if you had chosen. But I see plainly that you are not disposed to instruct me — clearly not: else why, when we reached the point, did you turn aside? Had you only answered me I should have truly learned of you by this time the nature of piety. Now, as the asker of a question is necessarily dependent on the answerer, whither he leads I must follow; and can only ask again, what is the pious, and what is piety? Do you mean that they are a sort of science of praying and sacrificing?

Euthyphro: Yes, I do.

Socrates: And sacrificing is giving to the gods, and prayer is asking of the gods?

Euthyphro: Yes, Socrates.

Socrates: Upon this view, then, piety is a science of asking and giving?

Euthyphro: You understand me capitally, Socrates.

Socrates: Yes, my friend; the reason is that I am a votary of your science, and give my mind to it, and therefore nothing which you say will be thrown away upon me. Please then to tell me,

what is the nature of this service to the gods? Do you mean that we prefer requests and give gifts to them?

Euthyphro: Yes, I do.

Socrates: Is not the right way of asking to ask of them what we want?

Euthyphro: Certainly.

Socrates: And the right way of giving is to give to them in return what they want of us. There would be no meaning in an art which gives to any one that which he does not want.

Euthyphro: Very true, Socrates.

Socrates: Then piety, Euthyphro, is an art which gods and men have of doing business with one another?

Euthyphro: That is an expression which you may use, if you like.

Socrates: But I have no particular liking for anything but the truth. I wish, however, that you would tell me what benefit accrues to the gods from our gifts. There is no doubt about what they give to us; for there is no good thing which they do not give; but how we can give any good thing to them in return is far from being equally clear. If they give everything and we give nothing, that must be an affair of business in which we have very greatly the advantage of them.

Euthyphro: And do you imagine, Socrates, that any benefit accrues to the gods from our gifts?

Socrates: But if not, Euthyphro, what is the meaning of gifts which are conferred by us upon the gods?

Euthyphro: What else, but tributes of honour; and, as I was just now saying, what pleases them?

Socrates: Piety, then, is pleasing to the gods, but not beneficial or dear to them?

Euthyphro: I should say that nothing could be dearer.

Socrates: Then once more the assertion is repeated that piety is dear to the gods?

Euthyphro: Certainly.

Socrates: And when you say this, can you wonder at your words not standing firm, but walking away? Will you accuse me of being the Daedalus who makes them walk away, not perceiving that there is another and far greater artist than Daedalus who makes them go round in a circle, and he is yourself; for the argument, as you will perceive, comes round to the same point. Were we not saying that the holy or pious was not the same with that which is loved of the gods? Have you forgotten?

Euthyphro: I quite remember.

Socrates: And are you not saying that what is loved of the gods is holy; and is not this the same as what is dear to them — do you see?

Euthyphro: True.

Socrates: Then either we were wrong in our former assertion; or, if we were right then, we are wrong now.

Euthyphro: One of the two must be true.

Socrates: Then we must begin again and ask, What is piety? That is an enquiry which I shall never be weary of pursuing as far as in me lies; and I entreat you not to scorn me, but to apply your mind to the utmost, and tell me the truth. For, if any man knows, you are he; and therefore I must detain you, like Proteus, until you tell. If you had not certainly known the nature of piety and impiety, I am confident that you would never, on behalf of a serf, have charged your aged father with murder. You would not have run such a risk of doing wrong in the sight of the gods, and you would have had too much respect for the opinions of men. I am sure, therefore, that you know the nature of piety and impiety. Speak out then, my dear Euthyphro, and do not hide your knowledge.

Euthyphro: Another time, Socrates; for I am in a hurry, and must go now.

Socrates: Alas! my companion, and will you leave me in despair? I was hoping that you would instruct me in the nature of piety and impiety; and then I might have cleared myself of Meletus and his indictment. I would have told him that I had been enlightened by Euthyphro, and had given up rash innovations and speculations, in which I indulged only through ignorance, and that now I am about to lead a better life.

Meno

ΜΕΝΩΝ

Meno: Can you tell me, Socrates, whether virtue is acquired by teaching or by practice; or if neither by teaching nor by practice, then whether it comes to man by nature, or in what other way?

Socrates: O Meno, there was a time when the Thessalians were famous among the other Hellenes only for their riches and their riding; but now, if I am not mistaken, they are equally famous for their wisdom, especially at Larisa, which is the native city of your friend Aristippus. And this is Gorgias' doing; for when he came there, the flower of the Aleuadae, among them your admirer Aristippus, and the other chiefs of the Thessalians, fell in love with his wisdom. And he has taught you the habit of answering questions in a grand and bold style, which becomes those who know, and is the style in which he himself answers all comers; and any Hellene who likes may ask him anything. How different is our lot! my dear Meno. Here at Athens there is a dearth of the commodity, and all wisdom seems to have emigrated from us to you. I am certain that if you were to ask any Athenian whether virtue was natural or acquired, he would laugh in your face, and say: 'Stranger, you have far too good an opinion of me, if you think that I can answer your question. For I literally do not know what virtue is, and much less whether it is acquired by teaching or not.' And I myself, Meno, living as I do in this region of poverty, am as poor as the rest of the world; and I confess with shame that I know literally nothing about virtue; and when I do not know the 'quid' of anything how can I

know the ‘quale’? How, if I knew nothing at all of Meno, could I tell if he was fair, or the opposite of fair; rich and noble, or the reverse of rich and noble? Do you think that I could?

Meno: No, indeed. But are you in earnest, Socrates, in saying that you do not know what virtue is? And am I to carry back this report of you to Thessaly?

Socrates: Not only that, my dear boy, but you may say further that I have never known of any one else who did, in my judgment.

Meno: Then you have never met Gorgias when he was at Athens?

Socrates: Yes, I have.

Meno: And did you not think that he knew?

Socrates: I have not a good memory, Meno, and therefore I cannot now tell what I thought of him at the time. And I dare say that he did know, and that you know what he said: please, therefore, to remind me of what he said; or, if you would rather, tell me your own view; for I suspect that you and he think much alike.

Meno: Very true.

Socrates: Then as he is not here, never mind him, and do you tell me: By the gods, Meno, be generous, and tell me what you say that virtue is; for I shall be truly delighted to find that I have been mistaken, and that you and Gorgias do really have this knowledge; although I have been just saying that I have never found anybody who had.

Meno: There will be no difficulty, Socrates, in answering your question. Let us take first the virtue of a man — he should know how to administer the state, and in the administration of it to benefit his friends and harm his enemies; and he must also be careful not to suffer harm himself. A woman’s virtue, if you wish to know about that, may also be easily described: her duty is to

order her house, and keep what is indoors, and obey her husband. Every age, every condition of life, young or old, male or female, bond or free, has a different virtue: there are virtues numberless, and no lack of definitions of them; for virtue is relative to the actions and ages of each of us in all that we do. And the same may be said of vice, Socrates (Compare Arist. Pol.).

Socrates: How fortunate I am, Meno! When I ask you for one virtue, you present me with a swarm of them (Compare Theaet.), which are in your keeping. Suppose that I carry on the figure of the swarm, and ask of you, What is the nature of the bee? and you answer that there are many kinds of bees, and I reply: But do bees differ as bees, because there are many and different kinds of them; or are they not rather to be distinguished by some other quality, as for example beauty, size, or shape? How would you answer me?

Meno: I should answer that bees do not differ from one another, as bees.

Socrates: And if I went on to say: That is what I desire to know, Meno; tell me what is the quality in which they do not differ, but are all alike; — would you be able to answer?

Meno: I should.

Socrates: And so of the virtues, however many and different they may be, they have all a common nature which makes them virtues; and on this he who would answer the question, 'What is virtue?' would do well to have his eye fixed: Do you understand?

Meno: I am beginning to understand; but I do not as yet take hold of the question as I could wish.

Socrates: When you say, Meno, that there is one virtue of a man, another of a woman, another of a child, and so on, does this apply only to virtue, or would you say the same of health, and size, and strength? Or is the nature of health always the same, whether in man or woman?

Meno: I should say that health is the same, both in man and woman.

Socrates: And is not this true of size and strength? If a woman is strong, she will be strong by reason of the same form and of the same strength subsisting in her which there is in the man. I mean to say that strength, as strength, whether of man or woman, is the same. Is there any difference?

Meno: I think not.

Socrates: And will not virtue, as virtue, be the same, whether in a child or in a grown-up person, in a woman or in a man?

Meno: I cannot help feeling, Socrates, that this case is different from the others.

Socrates: But why? Were you not saying that the virtue of a man was to order a state, and the virtue of a woman was to order a house?

Meno: I did say so.

Socrates: And can either house or state or anything be well ordered without temperance and without justice?

Meno: Certainly not.

Socrates: Then they who order a state or a house temperately or justly order them with temperance and justice?

Meno: Certainly.

Socrates: Then both men and women, if they are to be good men and women, must have the same virtues of temperance and justice?

Meno: True.

Socrates: And can either a young man or an elder one be good, if they are intemperate and unjust?

Meno: They cannot.

Socrates: They must be temperate and just?

Meno: Yes.

Socrates: Then all men are good in the same way, and by participation in the same virtues?

Meno: Such is the inference.

Socrates: And they surely would not have been good in the same way, unless their virtue had been the same?

Meno: They would not.

Socrates: Then now that the sameness of all virtue has been proven, try and remember what you and Gorgias say that virtue is.

Meno: Will you have one definition of them all?

Socrates: That is what I am seeking.

Meno: If you want to have one definition of them all, I know not what to say, but that virtue is the power of governing mankind.

Socrates: And does this definition of virtue include all virtue? Is virtue the same in a child and in a slave, Meno? Can the child govern his father, or the slave his master; and would he who governed be any longer a slave?

Meno: I think not, Socrates.

Socrates: No, indeed; there would be small reason in that. Yet once more, fair friend; according to you, virtue is ‘the power of governing;’ but do you not add ‘justly and not unjustly’?

Meno: Yes, Socrates; I agree there; for justice is virtue.

Socrates: Would you say ‘virtue,’ Meno, or ‘a virtue’?

Meno: What do you mean?

Socrates: I mean as I might say about anything; that a round, for example, is ‘a figure’ and not simply ‘figure,’ and I should adopt this mode of speaking, because there are other figures.

Meno: Quite right; and that is just what I am saying about virtue — that there are other virtues as well as justice.

Socrates: What are they? tell me the names of them, as I would tell you the names of the other figures if you asked me.

Meno: Courage and temperance and wisdom and magnanimity are virtues; and there are many others.

Socrates: Yes, Meno; and again we are in the same case: in searching after one virtue we have found many, though not in the same way as before; but we have been unable to find the common virtue which runs through them all.

Meno: Why, Socrates, even now I am not able to follow you in the attempt to get at one common notion of virtue as of other things.

Socrates: No wonder; but I will try to get nearer if I can, for you know that all things have a common notion. Suppose now that some one asked you the question which I asked before: Meno, he would say, what is figure? And if you answered 'roundness,' he would reply to you, in my way of speaking, by asking whether you would say that roundness is 'figure' or 'a figure;' and you would answer 'a figure.'

Meno: Certainly.

Socrates: And for this reason — that there are other figures?

Meno: Yes.

Socrates: And if he proceeded to ask, What other figures are there? you would have told him.

Meno: I should.

Socrates: And if he similarly asked what colour is, and you answered whiteness, and the questioner rejoined, Would you say that whiteness is colour or a colour? you would reply, A colour, because there are other colours as well.

Meno: I should.

Socrates: And if he had said, Tell me what they are? — you would have told him of other colours which are colours just as much as whiteness.

Meno: Yes.

Socrates: And suppose that he were to pursue the matter in my way, he would say: Ever and anon we are landed in particulars, but this is not what I want; tell me then, since you call them by a common name, and say that they are all figures, even when opposed to one another, what is that common nature which you designate as figure — which contains straight as well as round, and is no more one than the other — that would be your mode of speaking?

Meno: Yes.

Socrates: And in speaking thus, you do not mean to say that the round is round any more than straight, or the straight any more straight than round?

Meno: Certainly not.

Socrates: You only assert that the round figure is not more a figure than the straight, or the straight than the round?

Meno: Very true.

Socrates: To what then do we give the name of figure? Try and answer. Suppose that when a person asked you this question either about figure or colour, you were to reply, Man, I do not understand what you want, or know what you are saying; he would look rather astonished and say: Do you not understand that I am looking for the ‘simile in multis’? And then he might put the question in another form: Meno, he might say, what is that ‘simile in multis’ which you call figure, and which includes not only round and straight figures, but all? Could you not answer that question, Meno? I wish that you would try; the attempt will be good practice with a view to the answer about virtue.

Meno: I would rather that you should answer, Socrates.

Socrates: Shall I indulge you?

Meno: By all means.

Socrates: And then you will tell me about virtue?

Meno: I will.

Socrates: Then I must do my best, for there is a prize to be won.

Meno: Certainly.

Socrates: Well, I will try and explain to you what figure is. What do you say to this answer? — Figure is the only thing which always follows colour. Will you be satisfied with it, as I am sure that I should be, if you would let me have a similar definition of virtue?

Meno: But, Socrates, it is such a simple answer.

Socrates: Why simple?

Meno: Because, according to you, figure is that which always follows colour.

(SOCRATES: Granted.)

Meno: But if a person were to say that he does not know what colour is, any more than what figure is — what sort of answer would you have given him?

Socrates: I should have told him the truth. And if he were a philosopher of the eristic and antagonistic sort, I should say to him: You have my answer, and if I am wrong, your business is to take up the argument and refute me. But if we were friends, and were talking as you and I are now, I should reply in a milder strain and more in the dialectician’s vein; that is to say, I should not only speak the truth, but I should make use of premises which the person interrogated would be willing to admit. And this is the way in which I shall endeavour to approach you. You will acknowledge, will you not, that there is such a thing as an

end, or termination, or extremity? — all which words I use in the same sense, although I am aware that Prodicus might draw distinctions about them: but still you, I am sure, would speak of a thing as ended or terminated — that is all which I am saying — not anything very difficult.

Meno: Yes, I should; and I believe that I understand your meaning.

Socrates: And you would speak of a surface and also of a solid, as for example in geometry.

Meno: Yes.

Socrates: Well then, you are now in a condition to understand my definition of figure. I define figure to be that in which the solid ends; or, more concisely, the limit of solid.

Meno: And now, Socrates, what is colour?

Socrates: You are outrageous, Meno, in thus plaguing a poor old man to give you an answer, when you will not take the trouble of remembering what is Gorgias' definition of virtue.

Meno: When you have told me what I ask, I will tell you, Socrates.

Socrates: A man who was blindfolded has only to hear you talking, and he would know that you are a fair creature and have still many lovers.

Meno: Why do you think so?

Socrates: Why, because you always speak in imperatives: like all beauties when they are in their prime, you are tyrannical; and also, as I suspect, you have found out that I have weakness for the fair, and therefore to humour you I must answer.

Meno: Please do.

Socrates: Would you like me to answer you after the manner of Gorgias, which is familiar to you?

Meno: I should like nothing better.

Socrates: Do not he and you and Empedocles say that there are certain effluences of existence?

Meno: Certainly.

Socrates: And passages into which and through which the effluences pass?

Meno: Exactly.

Socrates: And some of the effluences fit into the passages, and some of them are too small or too large?

Meno: True.

Socrates: And there is such a thing as sight?

Meno: Yes.

Socrates: And now, as Pindar says, 'read my meaning:' — colour is an effluence of form, commensurate with sight, and palpable to sense.

Meno: That, Socrates, appears to me to be an admirable answer.

Socrates: Why, yes, because it happens to be one which you have been in the habit of hearing: and your wit will have discovered, I suspect, that you may explain in the same way the nature of sound and smell, and of many other similar phenomena.

Meno: Quite true.

Socrates: The answer, Meno, was in the orthodox solemn vein, and therefore was more acceptable to you than the other answer about figure.

Meno: Yes.

Socrates: And yet, O son of Alexidemus, I cannot help thinking that the other was the better; and I am sure that you would be of the same opinion, if you would only stay and be initiated, and were not compelled, as you said yesterday, to go away before

the mysteries.

Meno: But I will stay, Socrates, if you will give me many such answers.

Socrates: Well then, for my own sake as well as for yours, I will do my very best; but I am afraid that I shall not be able to give you very many as good: and now, in your turn, you are to fulfil your promise, and tell me what virtue is in the universal; and do not make a singular into a plural, as the facetious say of those who break a thing, but deliver virtue to me whole and sound, and not broken into a number of pieces: I have given you the pattern.

Meno: Well then, Socrates, virtue, as I take it, is when he, who desires the honourable, is able to provide it for himself; so the poet says, and I say too —

'Virtue is the desire of things honourable and the power of attaining them.'

Socrates: And does he who desires the honourable also desire the good?

Meno: Certainly.

Socrates: Then are there some who desire the evil and others who desire the good? Do not all men, my dear sir, desire good?

Meno: I think not.

Socrates: There are some who desire evil?

Meno: Yes.

Socrates: Do you mean that they think the evils which they desire, to be good; or do they know that they are evil and yet desire them?

Meno: Both, I think.

Socrates: And do you really imagine, Meno, that a man knows evils to be evils and desires them notwithstanding?

Meno: Certainly I do.

Socrates: And desire is of possession?

Meno: Yes, of possession.

Socrates: And does he think that the evils will do good to him who possesses them, or does he know that they will do him harm?

Meno: There are some who think that the evils will do them good, and others who know that they will do them harm.

Socrates: And, in your opinion, do those who think that they will do them good know that they are evils?

Meno: Certainly not.

Socrates: Is it not obvious that those who are ignorant of their nature do not desire them; but they desire what they suppose to be goods although they are really evils; and if they are mistaken and suppose the evils to be goods they really desire goods?

Meno: Yes, in that case.

Socrates: Well, and do those who, as you say, desire evils, and think that evils are hurtful to the possessor of them, know that they will be hurt by them?

Meno: They must know it.

Socrates: And must they not suppose that those who are hurt are miserable in proportion to the hurt which is inflicted upon them?

Meno: How can it be otherwise?

Socrates: But are not the miserable ill-fated?

Meno: Yes, indeed.

Socrates: And does any one desire to be miserable and ill-fated?

Meno: I should say not, Socrates.

Socrates: But if there is no one who desires to be miserable, there is no one, Meno, who desires evil; for what is misery but the desire and possession of evil?

Meno: That appears to be the truth, Socrates, and I admit that nobody desires evil.

Socrates: And yet, were you not saying just now that virtue is the desire and power of attaining good?

Meno: Yes, I did say so.

Socrates: But if this be affirmed, then the desire of good is common to all, and one man is no better than another in that respect?

Meno: True.

Socrates: And if one man is not better than another in desiring good, he must be better in the power of attaining it?

Meno: Exactly.

Socrates: Then, according to your definition, virtue would appear to be the power of attaining good?

Meno: I entirely approve, Socrates, of the manner in which you now view this matter.

Socrates: Then let us see whether what you say is true from another point of view; for very likely you may be right: — You affirm virtue to be the power of attaining goods?

Meno: Yes.

Socrates: And the goods which you mean are such as health and wealth and the possession of gold and silver, and having office and honour in the state — those are what you would call goods?

Meno: Yes, I should include all those.

Socrates: Then, according to Meno, who is the hereditary friend of the great king, virtue is the power of getting silver and gold; and would you add that they must be gained piously, justly, or

do you deem this to be of no consequence? And is any mode of acquisition, even if unjust and dishonest, equally to be deemed virtue?

Meno: Not virtue, Socrates, but vice.

Socrates: Then justice or temperance or holiness, or some other part of virtue, as would appear, must accompany the acquisition, and without them the mere acquisition of good will not be virtue.

Meno: Why, how can there be virtue without these?

Socrates: And the non-acquisition of gold and silver in a dishonest manner for oneself or another, or in other words the want of them, may be equally virtue?

Meno: True.

Socrates: Then the acquisition of such goods is no more virtue than the non-acquisition and want of them, but whatever is accompanied by justice or honesty is virtue, and whatever is devoid of justice is vice.

Meno: It cannot be otherwise, in my judgment.

Socrates: And were we not saying just now that justice, temperance, and the like, were each of them a part of virtue?

Meno: Yes.

Socrates: And so, Meno, this is the way in which you mock me.

Meno: Why do you say that, Socrates?

Socrates: Why, because I asked you to deliver virtue into my hands whole and unbroken, and I gave you a pattern according to which you were to frame your answer; and you have forgotten already, and tell me that virtue is the power of attaining good justly, or with justice; and justice you acknowledge to be a part of virtue.

Meno: Yes.

Socrates: Then it follows from your own admissions, that virtue is doing what you do with a part of virtue; for justice and the like are said by you to be parts of virtue.

Meno: What of that?

Socrates: What of that! Why, did not I ask you to tell me the nature of virtue as a whole? And you are very far from telling me this; but declare every action to be virtue which is done with a part of virtue; as though you had told me and I must already know the whole of virtue, and this too when frittered away into little pieces. And, therefore, my dear Meno, I fear that I must begin again and repeat the same question: What is virtue? for otherwise, I can only say, that every action done with a part of virtue is virtue; what else is the meaning of saying that every action done with justice is virtue? Ought I not to ask the question over again; for can any one who does not know virtue know a part of virtue?

Meno: No; I do not say that he can.

Socrates: Do you remember how, in the example of figure, we rejected any answer given in terms which were as yet unexplained or unadmitted?

Meno: Yes, Socrates; and we were quite right in doing so.

Socrates: But then, my friend, do not suppose that we can explain to any one the nature of virtue as a whole through some unexplained portion of virtue, or anything at all in that fashion; we should only have to ask over again the old question, What is virtue? Am I not right?

Meno: I believe that you are.

Socrates: Then begin again, and answer me, What, according to you and your friend Gorgias, is the definition of virtue?

Meno: O Socrates, I used to be told, before I knew you, that you were always doubting yourself and making others doubt; and now you are casting your spells over me, and I am simply

getting bewitched and enchanted, and am at my wits' end. And if I may venture to make a jest upon you, you seem to me both in your appearance and in your power over others to be very like the flat torpedo fish, who torpifies those who come near him and touch him, as you have now torpified me, I think. For my soul and my tongue are really torpid, and I do not know how to answer you; and though I have been delivered of an infinite variety of speeches about virtue before now, and to many persons — and very good ones they were, as I thought — at this moment I cannot even say what virtue is. And I think that you are very wise in not voyaging and going away from home, for if you did in other places as you do in Athens, you would be cast into prison as a magician.

Socrates: You are a rogue, Meno, and had all but caught me.

Meno: What do you mean, Socrates?

Socrates: I can tell why you made a simile about me.

Meno: Why?

Socrates: In order that I might make another simile about you. For I know that all pretty young gentlemen like to have pretty similes made about them — as well they may — but I shall not return the compliment. As to my being a torpedo, if the torpedo is torpid as well as the cause of torpidity in others, then indeed I am a torpedo, but not otherwise; for I perplex others, not because I am clear, but because I am utterly perplexed myself. And now I know not what virtue is, and you seem to be in the same case, although you did once perhaps know before you touched me. However, I have no objection to join with you in the enquiry.

Meno: And how will you enquire, Socrates, into that which you do not know? What will you put forth as the subject of enquiry? And if you find what you want, how will you ever know that this is the thing which you did not know?

Socrates: I know, Meno, what you mean; but just see what a tiresome dispute you are introducing. You argue that a man cannot enquire either about that which he knows, or about that which he does not know; for if he knows, he has no need to enquire; and if not, he cannot; for he does not know the very subject about which he is to enquire (Compare Aristot. Post. Anal.).

Meno: Well, Socrates, and is not the argument sound?

Socrates: I think not.

Meno: Why not?

Socrates: I will tell you why: I have heard from certain wise men and women who spoke of things divine that —

Meno: What did they say?

Socrates: They spoke of a glorious truth, as I conceive.

Meno: What was it? and who were they?

Socrates: Some of them were priests and priestesses, who had studied how they might be able to give a reason of their profession: there have been poets also, who spoke of these things by inspiration, like Pindar, and many others who were inspired. And they say — mark, now, and see whether their words are true — they say that the soul of man is immortal, and at one time has an end, which is termed dying, and at another time is born again, but is never destroyed. And the moral is, that a man ought to live always in perfect holiness. ‘For in the ninth year Persephone sends the souls of those from whom she has received the penalty of ancient crime back again from beneath into the light of the sun above, and these are they who become noble kings and mighty men and great in wisdom and are called saintly heroes in after ages.’ The soul, then, as being immortal, and having been born again many times, and having seen all things that exist, whether in this world or in the world below, has knowledge of them all; and it is no wonder that she should

be able to call to remembrance all that she ever knew about virtue, and about everything; for as all nature is akin, and the soul has learned all things; there is no difficulty in her eliciting or as men say learning, out of a single recollection all the rest, if a man is strenuous and does not faint; for all enquiry and all learning is but recollection. And therefore we ought not to listen to this sophistical argument about the impossibility of enquiry: for it will make us idle; and is sweet only to the sluggard; but the other saying will make us active and inquisitive. In that confiding, I will gladly enquire with you into the nature of virtue.

Meno: Yes, Socrates; but what do you mean by saying that we do not learn, and that what we call learning is only a process of recollection? Can you teach me how this is?

Socrates: I told you, Meno, just now that you were a rogue, and now you ask whether I can teach you, when I am saying that there is no teaching, but only recollection; and thus you imagine that you will involve me in a contradiction.

Meno: Indeed, Socrates, I protest that I had no such intention. I only asked the question from habit; but if you can prove to me that what you say is true, I wish that you would.

Socrates: It will be no easy matter, but I will try to please you to the utmost of my power. Suppose that you call one of your numerous attendants, that I may demonstrate on him.

Meno: Certainly. Come hither, boy.

Socrates: He is Greek, and speaks Greek, does he not?

Meno: Yes, indeed; he was born in the house.

Socrates: Attend now to the questions which I ask him, and observe whether he learns of me or only remembers.

Meno: I will.

Socrates: Tell me, boy, do you know that a figure like this is a square?

Boy: I do.

Socrates: And you know that a square figure has these four lines equal?

Boy: Certainly.

Socrates: And these lines which I have drawn through the middle of the square are also equal?

Boy: Yes.

Socrates: A square may be of any size?

Boy: Certainly.

Socrates: And if one side of the figure be of two feet, and the other side be of two feet, how much will the whole be? Let me explain: if in one direction the space was of two feet, and in the other direction of one foot, the whole would be of two feet taken once?

Boy: Yes.

Socrates: But since this side is also of two feet, there are twice two feet?

Boy: There are.

Socrates: Then the square is of twice two feet?

Boy: Yes.

Socrates: And how many are twice two feet? count and tell me.

Boy: Four, Socrates.

Socrates: And might there not be another square twice as large as this, and having like this the lines equal?

Boy: Yes.

Socrates: And of how many feet will that be?

Boy: Of eight feet.

Socrates: And now try and tell me the length of the line which forms the side of that double square: this is two feet — what will that be?

Boy: Clearly, Socrates, it will be double.

Socrates: Do you observe, Meno, that I am not teaching the boy anything, but only asking him questions; and now he fancies that he knows how long a line is necessary in order to produce a figure of eight square feet; does he not?

Meno: Yes.

Socrates: And does he really know?

Meno: Certainly not.

Socrates: He only guesses that because the square is double, the line is double.

Meno: True.

Socrates: Observe him while he recalls the steps in regular order. (To the Boy:) Tell me, boy, do you assert that a double space comes from a double line? Remember that I am not speaking of an oblong, but of a figure equal every way, and twice the size of this — that is to say of eight feet; and I want to know whether you still say that a double square comes from double line?

Boy: Yes.

Socrates: But does not this line become doubled if we add another such line here?

Boy: Certainly.

Socrates: And four such lines will make a space containing eight feet?

Boy: Yes.

Socrates: Let us describe such a figure: Would you not say that this is the figure of eight feet?

Boy: Yes.

Socrates: And are there not these four divisions in the figure, each of which is equal to the figure of four feet?

Boy: True.

Socrates: And is not that four times four?

Boy: Certainly.

Socrates: And four times is not double?

Boy: No, indeed.

Socrates: But how much?

Boy: Four times as much.

Socrates: Therefore the double line, boy, has given a space, not twice, but four times as much.

Boy: True.

Socrates: Four times four are sixteen — are they not?

Boy: Yes.

Socrates: What line would give you a space of eight feet, as this gives one of sixteen feet; — do you see?

Boy: Yes.

Socrates: And the space of four feet is made from this half line?

Boy: Yes.

Socrates: Good; and is not a space of eight feet twice the size of this, and half the size of the other?

Boy: Certainly.

Socrates: Such a space, then, will be made out of a line greater than this one, and less than that one?

Boy: Yes; I think so.

Socrates: Very good; I like to hear you say what you think. And now tell me, is not this a line of two feet and that of four?

Boy: Yes.

Socrates: Then the line which forms the side of eight feet ought to be more than this line of two feet, and less than the other of four feet?

Boy: It ought.

Socrates: Try and see if you can tell me how much it will be.

Boy: Three feet.

Socrates: Then if we add a half to this line of two, that will be the line of three. Here are two and there is one; and on the other side, here are two also and there is one: and that makes the figure of which you speak?

Boy: Yes.

Socrates: But if there are three feet this way and three feet that way, the whole space will be three times three feet?

Boy: That is evident.

Socrates: And how much are three times three feet?

Boy: Nine.

Socrates: And how much is the double of four?

Boy: Eight.

Socrates: Then the figure of eight is not made out of a line of three?

Boy: No.

Socrates: But from what line? — tell me exactly; and if you would rather not reckon, try and show me the line.

Boy: Indeed, Socrates, I do not know.

Socrates: Do you see, Meno, what advances he has made in his power of recollection? He did not know at first, and he does not know now, what is the side of a figure of eight feet: but then he thought that he knew, and answered confidently as if he knew,

and had no difficulty; now he has a difficulty, and neither knows nor fancies that he knows.

Meno: True.

Socrates: Is he not better off in knowing his ignorance?

Meno: I think that he is.

Socrates: If we have made him doubt, and given him the ‘torpedo’s shock,’ have we done him any harm?

Meno: I think not.

Socrates: We have certainly, as would seem, assisted him in some degree to the discovery of the truth; and now he will wish to remedy his ignorance, but then he would have been ready to tell all the world again and again that the double space should have a double side.

Meno: True.

Socrates: But do you suppose that he would ever have enquired into or learned what he fancied that he knew, though he was really ignorant of it, until he had fallen into perplexity under the idea that he did not know, and had desired to know?

Meno: I think not, Socrates.

Socrates: Then he was the better for the torpedo’s touch?

Meno: I think so.

Socrates: Mark now the farther development. I shall only ask him, and not teach him, and he shall share the enquiry with me: and do you watch and see if you find me telling or explaining anything to him, instead of eliciting his opinion. Tell me, boy, is not this a square of four feet which I have drawn?

Boy: Yes.

Socrates: And now I add another square equal to the former one?

Boy: Yes.

Socrates: And a third, which is equal to either of them?

Boy: Yes.

Socrates: Suppose that we fill up the vacant corner?

Boy: Very good.

Socrates: Here, then, there are four equal spaces?

Boy: Yes.

Socrates: And how many times larger is this space than this other?

Boy: Four times.

Socrates: But it ought to have been twice only, as you will remember.

Boy: True.

Socrates: And does not this line, reaching from corner to corner, bisect each of these spaces?

Boy: Yes.

Socrates: And are there not here four equal lines which contain this space?

Boy: There are.

Socrates: Look and see how much this space is.

Boy: I do not understand.

Socrates: Has not each interior line cut off half of the four spaces?

Boy: Yes.

Socrates: And how many spaces are there in this section?

Boy: Four.

Socrates: And how many in this?

Boy: Two.

Socrates: And four is how many times two?

Boy: Twice.

Socrates: And this space is of how many feet?

Boy: Of eight feet.

Socrates: And from what line do you get this figure?

Boy: From this.

Socrates: That is, from the line which extends from corner to corner of the figure of four feet?

Boy: Yes.

Socrates: And that is the line which the learned call the diagonal. And if this is the proper name, then you, Meno's slave, are prepared to affirm that the double space is the square of the diagonal?

Boy: Certainly, Socrates.

Socrates: What do you say of him, Meno? Were not all these answers given out of his own head?

Meno: Yes, they were all his own.

Socrates: And yet, as we were just now saying, he did not know?

Meno: True.

Socrates: But still he had in him those notions of his — had he not?

Meno: Yes.

Socrates: Then he who does not know may still have true notions of that which he does not know?

Meno: He has.

Socrates: And at present these notions have just been stirred up in him, as in a dream; but if he were frequently asked the same questions, in different forms, he would know as well as any one at last?

Meno: I dare say.

Socrates: Without any one teaching him he will recover his knowledge for himself, if he is only asked questions?

Meno: Yes.

Socrates: And this spontaneous recovery of knowledge in him is recollection?

Meno: True.

Socrates: And this knowledge which he now has must he not either have acquired or always possessed?

Meno: Yes.

Socrates: But if he always possessed this knowledge he would always have known; or if he has acquired the knowledge he could not have acquired it in this life, unless he has been taught geometry; for he may be made to do the same with all geometry and every other branch of knowledge. Now, has any one ever taught him all this? You must know about him, if, as you say, he was born and bred in your house.

Meno: And I am certain that no one ever did teach him.

Socrates: And yet he has the knowledge?

Meno: The fact, Socrates, is undeniable.

Socrates: But if he did not acquire the knowledge in this life, then he must have had and learned it at some other time?

Meno: Clearly he must.

Socrates: Which must have been the time when he was not a man?

Meno: Yes.

Socrates: And if there have been always true thoughts in him, both at the time when he was and was not a man, which only need to be awakened into knowledge by putting questions to him, his soul must have always possessed this knowledge, for he

always either was or was not a man?

Meno: Obviously.

Socrates: And if the truth of all things always existed in the soul, then the soul is immortal. Wherefore be of good cheer, and try to recollect what you do not know, or rather what you do not remember.

Meno: I feel, somehow, that I like what you are saying.

Socrates: And I, Meno, like what I am saying. Some things I have said of which I am not altogether confident. But that we shall be better and braver and less helpless if we think that we ought to enquire, than we should have been if we indulged in the idle fancy that there was no knowing and no use in seeking to know what we do not know; — that is a theme upon which I am ready to fight, in word and deed, to the utmost of my power.

Meno: There again, Socrates, your words seem to me excellent.

Socrates: Then, as we are agreed that a man should enquire about that which he does not know, shall you and I make an effort to enquire together into the nature of virtue?

Meno: By all means, Socrates. And yet I would much rather return to my original question, Whether in seeking to acquire virtue we should regard it as a thing to be taught, or as a gift of nature, or as coming to men in some other way?

Socrates: Had I the command of you as well as of myself, Meno, I would not have enquired whether virtue is given by instruction or not, until we had first ascertained ‘what it is.’ But as you think only of controlling me who am your slave, and never of controlling yourself, — such being your notion of freedom, I must yield to you, for you are irresistible. And therefore I have now to enquire into the qualities of a thing of which I do not as yet know the nature. At any rate, will you condescend a little, and allow the question ‘Whether virtue is given by instruction, or in any other way,’ to be argued upon hypothesis? As the

geometrician, when he is asked whether a certain triangle is capable being inscribed in a certain circle (Or, whether a certain area is capable of being inscribed as a triangle in a certain circle.), will reply: 'I cannot tell you as yet; but I will offer a hypothesis which may assist us in forming a conclusion: If the figure be such that when you have produced a given side of it (Or, when you apply it to the given line, i.e. the diameter of the circle (autou).), the given area of the triangle falls short by an area corresponding to the part produced (Or, similar to the area so applied.), then one consequence follows, and if this is impossible then some other; and therefore I wish to assume a hypothesis before I tell you whether this triangle is capable of being inscribed in the circle': — that is a geometrical hypothesis. And we too, as we know not the nature and qualities of virtue, must ask, whether virtue is or is not taught, under a hypothesis: as thus, if virtue is of such a class of mental goods, will it be taught or not? Let the first hypothesis be that virtue is or is not knowledge, — in that case will it be taught or not? or, as we were just now saying, 'remembered'? For there is no use in disputing about the name. But is virtue taught or not? or rather, does not every one see that knowledge alone is taught?

Meno: I agree.

Socrates: Then if virtue is knowledge, virtue will be taught?

Meno: Certainly.

Socrates: Then now we have made a quick end of this question: if virtue is of such a nature, it will be taught; and if not, not?

Meno: Certainly.

Socrates: The next question is, whether virtue is knowledge or of another species?

Meno: Yes, that appears to be the question which comes next in order.

Socrates: Do we not say that virtue is a good? — This is a hypothesis which is not set aside.

Meno: Certainly.

Socrates: Now, if there be any sort of good which is distinct from knowledge, virtue may be that good; but if knowledge embraces all good, then we shall be right in thinking that virtue is knowledge?

Meno: True.

Socrates: And virtue makes us good?

Meno: Yes.

Socrates: And if we are good, then we are profitable; for all good things are profitable?

Meno: Yes.

Socrates: Then virtue is profitable?

Meno: That is the only inference.

Socrates: Then now let us see what are the things which severally profit us. Health and strength, and beauty and wealth — these, and the like of these, we call profitable?

Meno: True.

Socrates: And yet these things may also sometimes do us harm: would you not think so?

Meno: Yes.

Socrates: And what is the guiding principle which makes them profitable or the reverse? Are they not profitable when they are rightly used, and hurtful when they are not rightly used?

Meno: Certainly.

Socrates: Next, let us consider the goods of the soul: they are temperance, justice, courage, quickness of apprehension, memory, magnanimity, and the like?

Meno: Surely.

Socrates: And such of these as are not knowledge, but of another sort, are sometimes profitable and sometimes hurtful; as, for example, courage wanting prudence, which is only a sort of confidence? When a man has no sense he is harmed by courage, but when he has sense he is profited?

Meno: True.

Socrates: And the same may be said of temperance and quickness of apprehension; whatever things are learned or done with sense are profitable, but when done without sense they are hurtful?

Meno: Very true.

Socrates: And in general, all that the soul attempts or endures, when under the guidance of wisdom, ends in happiness; but when she is under the guidance of folly, in the opposite?

Meno: That appears to be true.

Socrates: If then virtue is a quality of the soul, and is admitted to be profitable, it must be wisdom or prudence, since none of the things of the soul are either profitable or hurtful in themselves, but they are all made profitable or hurtful by the addition of wisdom or of folly; and therefore if virtue is profitable, virtue must be a sort of wisdom or prudence?

Meno: I quite agree.

Socrates: And the other goods, such as wealth and the like, of which we were just now saying that they are sometimes good and sometimes evil, do not they also become profitable or hurtful, accordingly as the soul guides and uses them rightly or wrongly; just as the things of the soul herself are benefited when under the guidance of wisdom and harmed by folly?

Meno: True.

Socrates: And the wise soul guides them rightly, and the foolish soul wrongly.

Meno: Yes.

Socrates: And is not this universally true of human nature? All other things hang upon the soul, and the things of the soul herself hang upon wisdom, if they are to be good; and so wisdom is inferred to be that which profits — and virtue, as we say, is profitable?

Meno: Certainly.

Socrates: And thus we arrive at the conclusion that virtue is either wholly or partly wisdom?

Meno: I think that what you are saying, Socrates, is very true.

Socrates: But if this is true, then the good are not by nature good?

Meno: I think not.

Socrates: If they had been, there would assuredly have been discerners of characters among us who would have known our future great men; and on their showing we should have adopted them, and when we had got them, we should have kept them in the citadel out of the way of harm, and set a stamp upon them far rather than upon a piece of gold, in order that no one might tamper with them; and when they grew up they would have been useful to the state?

Meno: Yes, Socrates, that would have been the right way.

Socrates: But if the good are not by nature good, are they made good by instruction?

Meno: There appears to be no other alternative, Socrates. On the supposition that virtue is knowledge, there can be no doubt that virtue is taught.

Socrates: Yes, indeed; but what if the supposition is erroneous?

Meno: I certainly thought just now that we were right.

Socrates: Yes, Meno; but a principle which has any soundness should stand firm not only just now, but always.

Meno: Well; and why are you so slow of heart to believe that knowledge is virtue?

Socrates: I will try and tell you why, Meno. I do not retract the assertion that if virtue is knowledge it may be taught; but I fear that I have some reason in doubting whether virtue is knowledge: for consider now and say whether virtue, and not only virtue but anything that is taught, must not have teachers and disciples?

Meno: Surely.

Socrates: And conversely, may not the art of which neither teachers nor disciples exist be assumed to be incapable of being taught?

Meno: True; but do you think that there are no teachers of virtue?

Socrates: I have certainly often enquired whether there were any, and taken great pains to find them, and have never succeeded; and many have assisted me in the search, and they were the persons whom I thought the most likely to know. Here at the moment when he is wanted we fortunately have sitting by us Anytus, the very person of whom we should make enquiry; to him then let us repair. In the first place, he is the son of a wealthy and wise father, Anthemion, who acquired his wealth, not by accident or gift, like Ismenias the Theban (who has recently made himself as rich as Polycrates), but by his own skill and industry, and who is a well-conditioned, modest man, not insolent, or overbearing, or annoying; moreover, this son of his has received a good education, as the Athenian people certainly appear to think, for they choose him to fill the highest offices. And these are the sort of men from whom you are likely to learn whether there are any teachers of virtue, and who they are.

Please, Anytus, to help me and your friend Meno in answering our question, Who are the teachers? Consider the matter thus: If we wanted Meno to be a good physician, to whom should we send him? Should we not send him to the physicians?

Anytus: Certainly.

Socrates: Or if we wanted him to be a good cobbler, should we not send him to the cobblers?

Anytus: Yes.

Socrates: And so forth?

Anytus: Yes.

Socrates: Let me trouble you with one more question. When we say that we should be right in sending him to the physicians if we wanted him to be a physician, do we mean that we should be right in sending him to those who profess the art, rather than to those who do not, and to those who demand payment for teaching the art, and profess to teach it to any one who will come and learn? And if these were our reasons, should we not be right in sending him?

Anytus: Yes.

Socrates: And might not the same be said of flute-playing, and of the other arts? Would a man who wanted to make another a flute-player refuse to send him to those who profess to teach the art for money, and be plaguing other persons to give him instruction, who are not professed teachers and who never had a single disciple in that branch of knowledge which he wishes him to acquire — would not such conduct be the height of folly?

Anytus: Yes, by Zeus, and of ignorance too.

Socrates: Very good. And now you are in a position to advise with me about my friend Meno. He has been telling me, Anytus, that he desires to attain that kind of wisdom and virtue by which men order the state or the house, and honour their parents, and know when to receive and when to send away citizens and

strangers, as a good man should. Now, to whom should he go in order that he may learn this virtue? Does not the previous argument imply clearly that we should send him to those who profess and avouch that they are the common teachers of all Hellas, and are ready to impart instruction to any one who likes, at a fixed price?

Anytus: Whom do you mean, Socrates?

Socrates: You surely know, do you not, Anytus, that these are the people whom mankind call Sophists?

Anytus: By Heracles, Socrates, forbear! I only hope that no friend or kinsman or acquaintance of mine, whether citizen or stranger, will ever be so mad as to allow himself to be corrupted by them; for they are a manifest pest and corrupting influence to those who have to do with them.

Socrates: What, Anytus? Of all the people who profess that they know how to do men good, do you mean to say that these are the only ones who not only do them no good, but positively corrupt those who are entrusted to them, and in return for this disservice have the face to demand money? Indeed, I cannot believe you; for I know of a single man, Protagoras, who made more out of his craft than the illustrious Pheidias, who created such noble works, or any ten other statuaries. How could that be? A mender of old shoes, or patcher up of clothes, who made the shoes or clothes worse than he received them, could not have remained thirty days undetected, and would very soon have starved; whereas during more than forty years, Protagoras was corrupting all Hellas, and sending his disciples from him worse than he received them, and he was never found out. For, if I am not mistaken, he was about seventy years old at his death, forty of which were spent in the practice of his profession; and during all that time he had a good reputation, which to this day he retains: and not only Protagoras, but many others are well spoken of; some who lived before him, and others who are still living. Now, when you say that they

deceived and corrupted the youth, are they to be supposed to have corrupted them consciously or unconsciously? Can those who were deemed by many to be the wisest men of Hellas have been out of their minds?

Anytus: Out of their minds! No, Socrates; the young men who gave their money to them were out of their minds, and their relations and guardians who entrusted their youth to the care of these men were still more out of their minds, and most of all, the cities who allowed them to come in, and did not drive them out, citizen and stranger alike.

Socrates: Has any of the Sophists wronged you, Anytus? What makes you so angry with them?

Anytus: No, indeed, neither I nor any of my belongings has ever had, nor would I suffer them to have, anything to do with them.

Socrates: Then you are entirely unacquainted with them?

Anytus: And I have no wish to be acquainted.

Socrates: Then, my dear friend, how can you know whether a thing is good or bad of which you are wholly ignorant?

Anytus: Quite well; I am sure that I know what manner of men these are, whether I am acquainted with them or not.

Socrates: You must be a diviner, Anytus, for I really cannot make out, judging from your own words, how, if you are not acquainted with them, you know about them. But I am not enquiring of you who are the teachers who will corrupt Meno (let them be, if you please, the Sophists); I only ask you to tell him who there is in this great city who will teach him how to become eminent in the virtues which I was just now describing. He is the friend of your family, and you will oblige him.

Anytus: Why do you not tell him yourself?

Socrates: I have told him whom I supposed to be the teachers of these things; but I learn from you that I am utterly at fault, and I dare say that you are right. And now I wish that you, on your

part, would tell me to whom among the Athenians he should go. Whom would you name?

Anytus: Why single out individuals? Any Athenian gentleman, taken at random, if he will mind him, will do far more good to him than the Sophists.

Socrates: And did those gentlemen grow of themselves; and without having been taught by any one, were they nevertheless able to teach others that which they had never learned themselves?

Anytus: I imagine that they learned of the previous generation of gentlemen. Have there not been many good men in this city?

Socrates: Yes, certainly, Anytus; and many good statesmen also there always have been and there are still, in the city of Athens. But the question is whether they were also good teachers of their own virtue; — not whether there are, or have been, good men in this part of the world, but whether virtue can be taught, is the question which we have been discussing. Now, do we mean to say that the good men of our own and of other times knew how to impart to others that virtue which they had themselves; or is virtue a thing incapable of being communicated or imparted by one man to another? That is the question which I and Meno have been arguing. Look at the matter in your own way: Would you not admit that Themistocles was a good man?

Anytus: Certainly; no man better.

Socrates: And must not he then have been a good teacher, if any man ever was a good teacher, of his own virtue?

Anytus: Yes certainly, — if he wanted to be so.

Socrates: But would he not have wanted? He would, at any rate, have desired to make his own son a good man and a gentleman; he could not have been jealous of him, or have intentionally abstained from imparting to him his own virtue. Did you never

hear that he made his son Cleophantus a famous horseman; and had him taught to stand upright on horseback and hurl a javelin, and to do many other marvellous things; and in anything which could be learned from a master he was well trained? Have you not heard from our elders of him?

Anytus: I have.

Socrates: Then no one could say that his son showed any want of capacity?

Anytus: Very likely not.

Socrates: But did any one, old or young, ever say in your hearing that Cleophantus, son of Themistocles, was a wise or good man, as his father was?

Anytus: I have certainly never heard any one say so.

Socrates: And if virtue could have been taught, would his father Themistocles have sought to train him in these minor accomplishments, and allowed him who, as you must remember, was his own son, to be no better than his neighbours in those qualities in which he himself excelled?

Anytus: Indeed, indeed, I think not.

Socrates: Here was a teacher of virtue whom you admit to be among the best men of the past. Let us take another, — Aristides, the son of Lysimachus: would you not acknowledge that he was a good man?

Anytus: To be sure I should.

Socrates: And did not he train his son Lysimachus better than any other Athenian in all that could be done for him by the help of masters? But what has been the result? Is he a bit better than any other mortal? He is an acquaintance of yours, and you see what he is like. There is Pericles, again, magnificent in his wisdom; and he, as you are aware, had two sons, Paralus and Xanthippus.

Anytus: I know.

Socrates: And you know, also, that he taught them to be unrivalled horsemen, and had them trained in music and gymnastics and all sorts of arts — in these respects they were on a level with the best — and had he no wish to make good men of them? Nay, he must have wished it. But virtue, as I suspect, could not be taught. And that you may not suppose the incompetent teachers to be only the meaner sort of Athenians and few in number, remember again that Thucydides had two sons, Melesias and Stephanus, whom, besides giving them a good education in other things, he trained in wrestling, and they were the best wrestlers in Athens: one of them he committed to the care of Xanthias, and the other of Eudorus, who had the reputation of being the most celebrated wrestlers of that day. Do you remember them?

Anytus: I have heard of them.

Socrates: Now, can there be a doubt that Thucydides, whose children were taught things for which he had to spend money, would have taught them to be good men, which would have cost him nothing, if virtue could have been taught? Will you reply that he was a mean man, and had not many friends among the Athenians and allies? Nay, but he was of a great family, and a man of influence at Athens and in all Hellas, and, if virtue could have been taught, he would have found out some Athenian or foreigner who would have made good men of his sons, if he could not himself spare the time from cares of state. Once more, I suspect, friend Anytus, that virtue is not a thing which can be taught?

Anytus: Socrates, I think that you are too ready to speak evil of men: and, if you will take my advice, I would recommend you to be careful. Perhaps there is no city in which it is not easier to do men harm than to do them good, and this is certainly the case at Athens, as I believe that you know.

Socrates: O Meno, think that Anytus is in a rage. And he may well be in a rage, for he thinks, in the first place, that I am defaming these gentlemen; and in the second place, he is of opinion that he is one of them himself. But some day he will know what is the meaning of defamation, and if he ever does, he will forgive me. Meanwhile I will return to you, Meno; for I suppose that there are gentlemen in your region too?

Meno: Certainly there are.

Socrates: And are they willing to teach the young? and do they profess to be teachers? and do they agree that virtue is taught?

Meno: No indeed, Socrates, they are anything but agreed; you may hear them saying at one time that virtue can be taught, and then again the reverse.

Socrates: Can we call those teachers who do not acknowledge the possibility of their own vocation?

Meno: I think not, Socrates.

Socrates: And what do you think of these Sophists, who are the only professors? Do they seem to you to be teachers of virtue?

Meno: I often wonder, Socrates, that Gorgias is never heard promising to teach virtue: and when he hears others promising he only laughs at them; but he thinks that men should be taught to speak.

Socrates: Then do you not think that the Sophists are teachers?

Meno: I cannot tell you, Socrates; like the rest of the world, I am in doubt, and sometimes I think that they are teachers and sometimes not.

Socrates: And are you aware that not you only and other politicians have doubts whether virtue can be taught or not, but that Theognis the poet says the very same thing?

Meno: Where does he say so?

Socrates: In these elegiac verses (Theog.):

‘Eat and drink and sit with the mighty, and make yourself agreeable to them; for from the good you will learn what is good, but if you mix with the bad you will lose the intelligence which you already have.’

Do you observe that here he seems to imply that virtue can be taught?

Meno: Clearly.

Socrates: But in some other verses he shifts about and says (Theog.):

‘If understanding could be created and put into a man, then they’ (who were able to perform this feat) ‘would have obtained great rewards.’

And again: —

‘Never would a bad son have sprung from a good sire, for he would have heard the voice of instruction; but not by teaching will you ever make a bad man into a good one.’

And this, as you may remark, is a contradiction of the other.

Meno: Clearly.

Socrates: And is there anything else of which the professors are affirmed not only not to be teachers of others, but to be ignorant themselves, and bad at the knowledge of that which they are professing to teach? or is there anything about which even the acknowledged ‘gentlemen’ are sometimes saying that ‘this thing can be taught,’ and sometimes the opposite? Can you say that they are teachers in any true sense whose ideas are in such confusion?

Meno: I should say, certainly not.

Socrates: But if neither the Sophists nor the gentlemen are teachers, clearly there can be no other teachers?

Meno: No.

Socrates: And if there are no teachers, neither are there disciples?

Meno: Agreed.

Socrates: And we have admitted that a thing cannot be taught of which there are neither teachers nor disciples?

Meno: We have.

Socrates: And there are no teachers of virtue to be found anywhere?

Meno: There are not.

Socrates: And if there are no teachers, neither are there scholars?

Meno: That, I think, is true.

Socrates: Then virtue cannot be taught?

Meno: Not if we are right in our view. But I cannot believe, Socrates, that there are no good men: And if there are, how did they come into existence?

Socrates: I am afraid, Meno, that you and I are not good for much, and that Gorgias has been as poor an educator of you as Prodicus has been of me. Certainly we shall have to look to ourselves, and try to find some one who will help in some way or other to improve us. This I say, because I observe that in the previous discussion none of us remarked that right and good action is possible to man under other guidance than that of knowledge (episteme); — and indeed if this be denied, there is no seeing how there can be any good men at all.

Meno: How do you mean, Socrates?

Socrates: I mean that good men are necessarily useful or profitable. Were we not right in admitting this? It must be so.

Meno: Yes.

Socrates: And in supposing that they will be useful only if they are true guides to us of action — there we were also right?

Meno: Yes.

Socrates: But when we said that a man cannot be a good guide unless he have knowledge (phrhonesis), this we were wrong.

Meno: What do you mean by the word ‘right’?

Socrates: I will explain. If a man knew the way to Larisa, or anywhere else, and went to the place and led others thither, would he not be a right and good guide?

Meno: Certainly.

Socrates: And a person who had a right opinion about the way, but had never been and did not know, might be a good guide also, might he not?

Meno: Certainly.

Socrates: And while he has true opinion about that which the other knows, he will be just as good a guide if he thinks the truth, as he who knows the truth?

Meno: Exactly.

Socrates: Then true opinion is as good a guide to correct action as knowledge; and that was the point which we omitted in our speculation about the nature of virtue, when we said that knowledge only is the guide of right action; whereas there is also right opinion.

Meno: True.

Socrates: Then right opinion is not less useful than knowledge?

Meno: The difference, Socrates, is only that he who has knowledge will always be right; but he who has right opinion will sometimes be right, and sometimes not.

Socrates: What do you mean? Can he be wrong who has right opinion, so long as he has right opinion?

Meno: I admit the cogency of your argument, and therefore, Socrates, I wonder that knowledge should be preferred to right opinion — or why they should ever differ.

Socrates: And shall I explain this wonder to you?

Meno: Do tell me.

Socrates: You would not wonder if you had ever observed the images of Daedalus (Compare Euthyphro); but perhaps you have not got them in your country?

Meno: What have they to do with the question?

Socrates: Because they require to be fastened in order to keep them, and if they are not fastened they will play truant and run away.

Meno: Well, what of that?

Socrates: I mean to say that they are not very valuable possessions if they are at liberty, for they will walk off like runaway slaves; but when fastened, they are of great value, for they are really beautiful works of art. Now this is an illustration of the nature of true opinions: while they abide with us they are beautiful and fruitful, but they run away out of the human soul, and do not remain long, and therefore they are not of much value until they are fastened by the tie of the cause; and this fastening of them, friend Meno, is recollection, as you and I have agreed to call it. But when they are bound, in the first place, they have the nature of knowledge; and, in the second place, they are abiding. And this is why knowledge is more honourable and excellent than true opinion, because fastened by a chain.

Meno: What you are saying, Socrates, seems to be very like the truth.

Socrates: I too speak rather in ignorance; I only conjecture. And yet that knowledge differs from true opinion is no matter of conjecture with me. There are not many things which I profess to know, but this is most certainly one of them.

Meno: Yes, Socrates; and you are quite right in saying so.

Socrates: And am I not also right in saying that true opinion leading the way perfects action quite as well as knowledge?

Meno: There again, Socrates, I think you are right.

Socrates: Then right opinion is not a whit inferior to knowledge, or less useful in action; nor is the man who has right opinion inferior to him who has knowledge?

Meno: True.

Socrates: And surely the good man has been acknowledged by us to be useful?

Meno: Yes.

Socrates: Seeing then that men become good and useful to states, not only because they have knowledge, but because they have right opinion, and that neither knowledge nor right opinion is given to man by nature or acquired by him — (do you imagine either of them to be given by nature?

Meno: Not I.)

Socrates: Then if they are not given by nature, neither are the good by nature good?

Meno: Certainly not.

Socrates: And nature being excluded, then came the question whether virtue is acquired by teaching?

Meno: Yes.

Socrates: If virtue was wisdom (or knowledge), then, as we thought, it was taught?

Meno: Yes.

Socrates: And if it was taught it was wisdom?

Meno: Certainly.

Socrates: And if there were teachers, it might be taught; and if there were no teachers, not?

Meno: True.

Socrates: But surely we acknowledged that there were no teachers of virtue?

Meno: Yes.

Socrates: Then we acknowledged that it was not taught, and was not wisdom?

Meno: Certainly.

Socrates: And yet we admitted that it was a good?

Meno: Yes.

Socrates: And the right guide is useful and good?

Meno: Certainly.

Socrates: And the only right guides are knowledge and true opinion — these are the guides of man; for things which happen by chance are not under the guidance of man: but the guides of man are true opinion and knowledge.

Meno: I think so too.

Socrates: But if virtue is not taught, neither is virtue knowledge.

Meno: Clearly not.

Socrates: Then of two good and useful things, one, which is knowledge, has been set aside, and cannot be supposed to be our guide in political life.

Meno: I think not.

Socrates: And therefore not by any wisdom, and not because they were wise, did Themistocles and those others of whom Anytus spoke govern states. This was the reason why they were unable to make others like themselves — because their virtue was not grounded on knowledge.

Meno: That is probably true, Socrates.

Socrates: But if not by knowledge, the only alternative which remains is that statesmen must have guided states by right opinion, which is in politics what divination is in religion; for diviners and also prophets say many things truly, but they know not what they say.

Meno: So I believe.

Socrates: And may we not, Meno, truly call those men ‘divine’ who, having no understanding, yet succeed in many a grand deed and word?

Meno: Certainly.

Socrates: Then we shall also be right in calling divine those whom we were just now speaking of as diviners and prophets, including the whole tribe of poets. Yes, and statesmen above all may be said to be divine and illumined, being inspired and possessed of God, in which condition they say many grand things, not knowing what they say.

Meno: Yes.

Socrates: And the women too, Meno, call good men divine — do they not? and the Spartans, when they praise a good man, say ‘that he is a divine man.’

Meno: And I think, Socrates, that they are right; although very likely our friend Anytus may take offence at the word.

Socrates: I do not care; as for Anytus, there will be another opportunity of talking with him. To sum up our enquiry — the result seems to be, if we are at all right in our view, that virtue is neither natural nor acquired, but an instinct given by God to the virtuous. Nor is the instinct accompanied by reason, unless there may be supposed to be among statesmen some one who is capable of educating statesmen. And if there be such an one, he may be said to be among the living what Homer says that Tiresias was among the dead, ‘he alone has understanding; but

the rest are flitting shades’; and he and his virtue in like manner will be a reality among shadows.

Meno: That is excellent, Socrates.

Socrates: Then, Meno, the conclusion is that virtue comes to the virtuous by the gift of God. But we shall never know the certain truth until, before asking how virtue is given, we enquire into the actual nature of virtue. I fear that I must go away, but do you, now that you are persuaded yourself, persuade our friend Anytus. And do not let him be so exasperated; if you can conciliate him, you will have done good service to the Athenian people.

Protagoras

ΠΡΟΤΑΓΟΡΑΣ

Companion: Where do you come from, Socrates? And yet I need hardly ask the question, for I know that you have been in chase of the fair Alcibiades. I saw him the day before yesterday; and he had got a beard like a man, — and he is a man, as I may tell you in your ear. But I thought that he was still very charming.

Socrates: What of his beard? Are you not of Homer's opinion, who says

'Youth is most charming when the beard first appears'?

And that is now the charm of Alcibiades.

Companion: Well, and how do matters proceed? Have you been visiting him, and was he gracious to you?

Socrates: Yes, I thought that he was very gracious; and especially to-day, for I have just come from him, and he has been helping me in an argument. But shall I tell you a strange thing? I paid no attention to him, and several times I quite forgot that he was present.

Companion: What is the meaning of this? Has anything happened between you and him? For surely you cannot have discovered a fairer love than he is; certainly not in this city of Athens.

Socrates: Yes, much fairer.

Companion: What do you mean — a citizen or a foreigner?

Socrates: A foreigner.

Companion: Of what country?

Socrates: Of Abdera.

Companion: And is this stranger really in your opinion a fairer love than the son of Cleinias?

Socrates: And is not the wiser always the fairer, sweet friend?

Companion: But have you really met, Socrates, with some wise one?

Socrates: Say rather, with the wisest of all living men, if you are willing to accord that title to Protagoras.

Companion: What! Is Protagoras in Athens?

Socrates: Yes; he has been here two days.

Companion: And do you just come from an interview with him?

Socrates: Yes; and I have heard and said many things.

Companion: Then, if you have no engagement, suppose that you sit down and tell me what passed, and my attendant here shall give up his place to you.

Socrates: To be sure; and I shall be grateful to you for listening.

Companion: Thank you, too, for telling us.

Socrates: That is thank you twice over. Listen then: —

Last night, or rather very early this morning, Hippocrates, the son of Apollodorus and the brother of Phason, gave a tremendous thump with his staff at my door; some one opened to him, and he came rushing in and bawled out: Socrates, are you awake or asleep?

I knew his voice, and said: Hippocrates, is that you? and do you bring any news?

Good news, he said; nothing but good.

Delightful, I said; but what is the news? and why have you come hither at this unearthly hour?

He drew nearer to me and said: Protagoras is come.

Yes, I replied; he came two days ago: have you only just heard of his arrival?

Yes, by the gods, he said; but not until yesterday evening.

At the same time he felt for the truckle-bed, and sat down at my feet, and then he said: Yesterday quite late in the evening, on my return from Oenoe whither I had gone in pursuit of my runaway slave Satyrus, as I meant to have told you, if some other matter had not come in the way; — on my return, when we had done supper and were about to retire to rest, my brother said to me: Protagoras is come. I was going to you at once, and then I thought that the night was far spent. But the moment sleep left me after my fatigue, I got up and came hither direct.

I, who knew the very courageous madness of the man, said: What is the matter? Has Protagoras robbed you of anything?

He replied, laughing: Yes, indeed he has, Socrates, of the wisdom which he keeps from me.

But, surely, I said, if you give him money, and make friends with him, he will make you as wise as he is himself.

Would to heaven, he replied, that this were the case! He might take all that I have, and all that my friends have, if he pleased. But that is why I have come to you now, in order that you may speak to him on my behalf; for I am young, and also I have never seen nor heard him; (when he visited Athens before I was but a child;) and all men praise him, Socrates; he is reputed to be the most accomplished of speakers. There is no reason why we should not go to him at once, and then we shall find him at home. He lodges, as I hear, with Callias the son of Hipponicus: let us start.

I replied: Not yet, my good friend; the hour is too early. But let us rise and take a turn in the court and wait about there until day-break; when the day breaks, then we will go. For Protagoras

is generally at home, and we shall be sure to find him; never fear.

Upon this we got up and walked about in the court, and I thought that I would make trial of the strength of his resolution. So I examined him and put questions to him. Tell me, Hippocrates, I said, as you are going to Protagoras, and will be paying your money to him, what is he to whom you are going? and what will he make of you? If, for example, you had thought of going to Hippocrates of Cos, the Asclepiad, and were about to give him your money, and some one had said to you: You are paying money to your namesake Hippocrates, O Hippocrates; tell me, what is he that you give him money? how would you have answered?

I should say, he replied, that I gave money to him as a physician.

And what will he make of you?

A physician, he said.

And if you were resolved to go to Polycleitus the Argive, or Pheidias the Athenian, and were intending to give them money, and some one had asked you: What are Polycleitus and Pheidias? and why do you give them this money? — how would you have answered?

I should have answered, that they were statuaries.

And what will they make of you?

A statuary, of course.

Well now, I said, you and I are going to Protagoras, and we are ready to pay him money on your behalf. If our own means are sufficient, and we can gain him with these, we shall be only too glad; but if not, then we are to spend the money of your friends as well. Now suppose, that while we are thus enthusiastically pursuing our object some one were to say to us: Tell me, Socrates, and you Hippocrates, what is Protagoras, and why are you going to pay him money, — how should we answer? I know

that Pheidias is a sculptor, and that Homer is a poet; but what appellation is given to Protagoras? how is he designated?

They call him a Sophist, Socrates, he replied.

Then we are going to pay our money to him in the character of a Sophist?

Certainly.

But suppose a person were to ask this further question: And how about yourself? What will Protagoras make of you, if you go to see him?

He answered, with a blush upon his face (for the day was just beginning to dawn, so that I could see him): Unless this differs in some way from the former instances, I suppose that he will make a Sophist of me.

By the gods, I said, and are you not ashamed at having to appear before the Hellenes in the character of a Sophist?

Indeed, Socrates, to confess the truth, I am.

But you should not assume, Hippocrates, that the instruction of Protagoras is of this nature: may you not learn of him in the same way that you learned the arts of the grammarian, or musician, or trainer, not with the view of making any of them a profession, but only as a part of education, and because a private gentleman and freeman ought to know them?

Just so, he said; and that, in my opinion, is a far truer account of the teaching of Protagoras.

I said: I wonder whether you know what you are doing?

And what am I doing?

You are going to commit your soul to the care of a man whom you call a Sophist. And yet I hardly think that you know what a Sophist is; and if not, then you do not even know to whom you are committing your soul and whether the thing to which you commit yourself be good or evil.

I certainly think that I do know, he replied.

Then tell me, what do you imagine that he is?

I take him to be one who knows wise things, he replied, as his name implies.

And might you not, I said, affirm this of the painter and of the carpenter also: Do not they, too, know wise things? But suppose a person were to ask us: In what are the painters wise? We should answer: In what relates to the making of likenesses, and similarly of other things. And if he were further to ask: What is the wisdom of the Sophist, and what is the manufacture over which he presides? — how should we answer him?

How should we answer him, Socrates? What other answer could there be but that he presides over the art which makes men eloquent?

Yes, I replied, that is very likely true, but not enough; for in the answer a further question is involved: Of what does the Sophist make a man talk eloquently? The player on the lyre may be supposed to make a man talk eloquently about that which he makes him understand, that is about playing the lyre. Is not that true?

Yes.

Then about what does the Sophist make him eloquent? Must not he make him eloquent in that which he understands?

Yes, that may be assumed.

And what is that which the Sophist knows and makes his disciple know?

Indeed, he said, I cannot tell.

Then I proceeded to say: Well, but are you aware of the danger which you are incurring? If you were going to commit your body to some one, who might do good or harm to it, would you not carefully consider and ask the opinion of your friends and

kindred, and deliberate many days as to whether you should give him the care of your body? But when the soul is in question, which you hold to be of far more value than the body, and upon the good or evil of which depends the well-being of your all, — about this you never consulted either with your father or with your brother or with any one of us who are your companions. But no sooner does this foreigner appear, than you instantly commit your soul to his keeping. In the evening, as you say, you hear of him, and in the morning you go to him, never deliberating or taking the opinion of any one as to whether you ought to intrust yourself to him or not; — you have quite made up your mind that you will at all hazards be a pupil of Protagoras, and are prepared to expend all the property of yourself and of your friends in carrying out at any price this determination, although, as you admit, you do not know him, and have never spoken with him: and you call him a Sophist, but are manifestly ignorant of what a Sophist is; and yet you are going to commit yourself to his keeping.

When he heard me say this, he replied: No other inference, Socrates, can be drawn from your words.

I proceeded: Is not a Sophist, Hippocrates, one who deals wholesale or retail in the food of the soul? To me that appears to be his nature.

And what, Socrates, is the food of the soul?

Surely, I said, knowledge is the food of the soul; and we must take care, my friend, that the Sophist does not deceive us when he praises what he sells, like the dealers wholesale or retail who sell the food of the body; for they praise indiscriminately all their goods, without knowing what are really beneficial or hurtful: neither do their customers know, with the exception of any trainer or physician who may happen to buy of them. In like manner those who carry about the wares of knowledge, and make the round of the cities, and sell or retail them to any customer who is in want of them, praise them all alike; though I

should not wonder, O my friend, if many of them were really ignorant of their effect upon the soul; and their customers equally ignorant, unless he who buys of them happens to be a physician of the soul. If, therefore, you have understanding of what is good and evil, you may safely buy knowledge of Protagoras or of any one; but if not, then, O my friend, pause, and do not hazard your dearest interests at a game of chance. For there is far greater peril in buying knowledge than in buying meat and drink: the one you purchase of the wholesale or retail dealer, and carry them away in other vessels, and before you receive them into the body as food, you may deposit them at home and call in any experienced friend who knows what is good to be eaten or drunken, and what not, and how much, and when; and then the danger of purchasing them is not so great. But you cannot buy the wares of knowledge and carry them away in another vessel; when you have paid for them you must receive them into the soul and go your way, either greatly harmed or greatly benefited; and therefore we should deliberate and take counsel with our elders; for we are still young — too young to determine such a matter. And now let us go, as we were intending, and hear Protagoras; and when we have heard what he has to say, we may take counsel of others; for not only is Protagoras at the house of Callias, but there is Hippias of Elis, and, if I am not mistaken, Prodicus of Ceos, and several other wise men.

To this we agreed, and proceeded on our way until we reached the vestibule of the house; and there we stopped in order to conclude a discussion which had arisen between us as we were going along; and we stood talking in the vestibule until we had finished and come to an understanding. And I think that the door-keeper, who was a eunuch, and who was probably annoyed at the great inroad of the Sophists, must have heard us talking. At any rate, when we knocked at the door, and he opened and saw us, he grumbled: They are Sophists — he is not at home; and instantly gave the door a hearty bang with both his hands.

Again we knocked, and he answered without opening: Did you not hear me say that he is not at home, fellows? But, my friend, I said, you need not be alarmed; for we are not Sophists, and we are not come to see Callias, but we want to see Protagoras; and I must request you to announce us. At last, after a good deal of difficulty, the man was persuaded to open the door.

When we entered, we found Protagoras taking a walk in the cloister; and next to him, on one side, were walking Callias, the son of Hipponicus, and Paralus, the son of Pericles, who, by the mother's side, is his half-brother, and Charmides, the son of Glaucon. On the other side of him were Xanthippus, the other son of Pericles, Philippides, the son of Philomelus; also Antimoerus of Mende, who of all the disciples of Protagoras is the most famous, and intends to make sophistry his profession. A train of listeners followed him; the greater part of them appeared to be foreigners, whom Protagoras had brought with him out of the various cities visited by him in his journeys, he, like Orpheus, attracting them his voice, and they following (Compare Rep.). I should mention also that there were some Athenians in the company. Nothing delighted me more than the precision of their movements: they never got into his way at all; but when he and those who were with him turned back, then the band of listeners parted regularly on either side; he was always in front, and they wheeled round and took their places behind him in perfect order.

After him, as Homer says (Od.), 'I lifted up my eyes and saw' Hippias the Elean sitting in the opposite cloister on a chair of state, and around him were seated on benches Eryximachus, the son of Acumenus, and Phaedrus the Myrrhinusian, and Andron the son of Androtion, and there were strangers whom he had brought with him from his native city of Elis, and some others: they were putting to Hippias certain physical and astronomical questions, and he, ex cathedra, was determining their several questions to them, and discoursing of them.

Also, ‘my eyes beheld Tantalus (Od.);’ for Prodicus the Cean was at Athens: he had been lodged in a room which, in the days of Hipponicus, was a storehouse; but, as the house was full, Callias had cleared this out and made the room into a guest-chamber. Now Prodicus was still in bed, wrapped up in sheepskins and bedclothes, of which there seemed to be a great heap; and there was sitting by him on the couches near, Pausanias of the deme of Cerameis, and with Pausanias was a youth quite young, who is certainly remarkable for his good looks, and, if I am not mistaken, is also of a fair and gentle nature. I thought that I heard him called Agathon, and my suspicion is that he is the beloved of Pausanias. There was this youth, and also there were the two Adeimantuses, one the son of Cepis, and the other of Leucolophides, and some others. I was very anxious to hear what Prodicus was saying, for he seems to me to be an all-wise and inspired man; but I was not able to get into the inner circle, and his fine deep voice made an echo in the room which rendered his words inaudible.

No sooner had we entered than there followed us Alcibiades the beautiful, as you say, and I believe you; and also Critias the son of Callaeschrus.

On entering we stopped a little, in order to look about us, and then walked up to Protagoras, and I said: Protagoras, my friend Hippocrates and I have come to see you.

Do you wish, he said, to speak with me alone, or in the presence of the company?

Whichever you please, I said; you shall determine when you have heard the purpose of our visit.

And what is your purpose? he said.

I must explain, I said, that my friend Hippocrates is a native Athenian; he is the son of Apollodorus, and of a great and prosperous house, and he is himself in natural ability quite a match for anybody of his own age. I believe that he aspires to

political eminence; and this he thinks that conversation with you is most likely to procure for him. And now you can determine whether you would wish to speak to him of your teaching alone or in the presence of the company.

Thank you, Socrates, for your consideration of me. For certainly a stranger finding his way into great cities, and persuading the flower of the youth in them to leave company of their kinsmen or any other acquaintances, old or young, and live with him, under the idea that they will be improved by his conversation, ought to be very cautious; great jealousies are aroused by his proceedings, and he is the subject of many enmities and conspiracies. Now the art of the Sophist is, as I believe, of great antiquity; but in ancient times those who practised it, fearing this odium, veiled and disguised themselves under various names, some under that of poets, as Homer, Hesiod, and Simonides, some, of hierophants and prophets, as Orpheus and Musaeus, and some, as I observe, even under the name of gymnastic-masters, like Iccus of Tarentum, or the more recently celebrated Herodicus, now of Selymbria and formerly of Megara, who is a first-rate Sophist. Your own Agathocles pretended to be a musician, but was really an eminent Sophist; also Pythocleides the Cean; and there were many others; and all of them, as I was saying, adopted these arts as veils or disguises because they were afraid of the odium which they would incur. But that is not my way, for I do not believe that they effected their purpose, which was to deceive the government, who were not blinded by them; and as to the people, they have no understanding, and only repeat what their rulers are pleased to tell them. Now to run away, and to be caught in running away, is the very height of folly, and also greatly increases the exasperation of mankind; for they regard him who runs away as a rogue, in addition to any other objections which they have to him; and therefore I take an entirely opposite course, and acknowledge myself to be a Sophist and instructor of mankind; such an open acknowledgement appears to me to be a better

sort of caution than concealment. Nor do I neglect other precautions, and therefore I hope, as I may say, by the favour of heaven that no harm will come of the acknowledgment that I am a Sophist. And I have been now many years in the profession — for all my years when added up are many: there is no one here present of whom I might not be the father. Wherefore I should much prefer conversing with you, if you want to speak with me, in the presence of the company.

As I suspected that he would like to have a little display and glorification in the presence of Prodicus and Hippias, and would gladly show us to them in the light of his admirers, I said: But why should we not summon Prodicus and Hippias and their friends to hear us?

Very good, he said.

Suppose, said Callias, that we hold a council in which you may sit and discuss. — This was agreed upon, and great delight was felt at the prospect of hearing wise men talk; we ourselves took the chairs and benches, and arranged them by Hippias, where the other benches had been already placed. Meanwhile Callias and Alcibiades got Prodicus out of bed and brought in him and his companions.

When we were all seated, Protagoras said: Now that the company are assembled, Socrates, tell me about the young man of whom you were just now speaking.

I replied: I will begin again at the same point, Protagoras, and tell you once more the purport of my visit: this is my friend Hippocrates, who is desirous of making your acquaintance; he would like to know what will happen to him if he associates with you. I have no more to say.

Protagoras answered: Young man, if you associate with me, on the very first day you will return home a better man than you came, and better on the second day than on the first, and better every day than you were on the day before.

When I heard this, I said: Protagoras, I do not at all wonder at hearing you say this; even at your age, and with all your wisdom, if any one were to teach you what you did not know before, you would become better no doubt: but please to answer in a different way — I will explain how by an example. Let me suppose that Hippocrates, instead of desiring your acquaintance, wished to become acquainted with the young man Zeuxippus of Heraclea, who has lately been in Athens, and he had come to him as he has come to you, and had heard him say, as he has heard you say, that every day he would grow and become better if he associated with him: and then suppose that he were to ask him, 'In what shall I become better, and in what shall I grow?' — Zeuxippus would answer, 'In painting.' And suppose that he went to Orthagoras the Theban, and heard him say the same thing, and asked him, 'In what shall I become better day by day?' he would reply, 'In flute-playing.' Now I want you to make the same sort of answer to this young man and to me, who am asking questions on his account. When you say that on the first day on which he associates with you he will return home a better man, and on every day will grow in like manner, — in what, Protagoras, will he be better? and about what?

When Protagoras heard me say this, he replied: You ask questions fairly, and I like to answer a question which is fairly put. If Hippocrates comes to me he will not experience the sort of drudgery with which other Sophists are in the habit of insulting their pupils; who, when they have just escaped from the arts, are taken and driven back into them by these teachers, and made to learn calculation, and astronomy, and geometry, and music (he gave a look at Hippias as he said this); but if he comes to me, he will learn that which he comes to learn. And this is prudence in affairs private as well as public; he will learn to order his own house in the best manner, and he will be able to speak and act for the best in the affairs of the state.

Do I understand you, I said; and is your meaning that you teach the art of politics, and that you promise to make men good citizens?

That, Socrates, is exactly the profession which I make.

Then, I said, you do indeed possess a noble art, if there is no mistake about this; for I will freely confess to you, Protagoras, that I have a doubt whether this art is capable of being taught, and yet I know not how to disbelieve your assertion. And I ought to tell you why I am of opinion that this art cannot be taught or communicated by man to man. I say that the Athenians are an understanding people, and indeed they are esteemed to be such by the other Hellenes. Now I observe that when we are met together in the assembly, and the matter in hand relates to building, the builders are summoned as advisers; when the question is one of ship-building, then the ship-wrights; and the like of other arts which they think capable of being taught and learned. And if some person offers to give them advice who is not supposed by them to have any skill in the art, even though he be good-looking, and rich, and noble, they will not listen to him, but laugh and hoot at him, until either he is clamoured down and retires of himself; or if he persist, he is dragged away or put out by the constables at the command of the prytanes. This is their way of behaving about professors of the arts. But when the question is an affair of state, then everybody is free to have a say — carpenter, tinker, cobbler, sailor, passenger; rich and poor, high and low — any one who likes gets up, and no one reproaches him, as in the former case, with not having learned, and having no teacher, and yet giving advice; evidently because they are under the impression that this sort of knowledge cannot be taught. And not only is this true of the state, but of individuals; the best and wisest of our citizens are unable to impart their political wisdom to others: as for example, Pericles, the father of these young men, who gave them excellent instruction in all that could be learned from masters, in his own

department of politics neither taught them, nor gave them teachers; but they were allowed to wander at their own free will in a sort of hope that they would light upon virtue of their own accord. Or take another example: there was Cleinias the younger brother of our friend Alcibiades, of whom this very same Pericles was the guardian; and he being in fact under the apprehension that Cleinias would be corrupted by Alcibiades, took him away, and placed him in the house of Ariphron to be educated; but before six months had elapsed, Ariphron sent him back, not knowing what to do with him. And I could mention numberless other instances of persons who were good themselves, and never yet made any one else good, whether friend or stranger. Now I, Protagoras, having these examples before me, am inclined to think that virtue cannot be taught. But then again, when I listen to your words, I waver; and am disposed to think that there must be something in what you say, because I know that you have great experience, and learning, and invention. And I wish that you would, if possible, show me a little more clearly that virtue can be taught. Will you be so good?

That I will, Socrates, and gladly. But what would you like? Shall I, as an elder, speak to you as younger men in an apologue or myth, or shall I argue out the question?

To this several of the company answered that he should choose for himself.

Well, then, he said, I think that the myth will be more interesting.

Once upon a time there were gods only, and no mortal creatures. But when the time came that these also should be created, the gods fashioned them out of earth and fire and various mixtures of both elements in the interior of the earth; and when they were about to bring them into the light of day, they ordered Prometheus and Epimetheus to equip them, and to distribute to them severally their proper qualities. Epimetheus

said to Prometheus: ‘Let me distribute, and do you inspect.’ This was agreed, and Epimetheus made the distribution. There were some to whom he gave strength without swiftness, while he equipped the weaker with swiftness; some he armed, and others he left unarmed; and devised for the latter some other means of preservation, making some large, and having their size as a protection, and others small, whose nature was to fly in the air or burrow in the ground; this was to be their way of escape. Thus did he compensate them with the view of preventing any race from becoming extinct. And when he had provided against their destruction by one another, he contrived also a means of protecting them against the seasons of heaven; clothing them with close hair and thick skins sufficient to defend them against the winter cold and able to resist the summer heat, so that they might have a natural bed of their own when they wanted to rest; also he furnished them with hoofs and hair and hard and callous skins under their feet. Then he gave them varieties of food, — herb of the soil to some, to others fruits of trees, and to others roots, and to some again he gave other animals as food. And some he made to have few young ones, while those who were their prey were very prolific; and in this manner the race was preserved. Thus did Epimetheus, who, not being very wise, forgot that he had distributed among the brute animals all the qualities which he had to give, — and when he came to man, who was still unprovided, he was terribly perplexed. Now while he was in this perplexity, Prometheus came to inspect the distribution, and he found that the other animals were suitably furnished, but that man alone was naked and shoeless, and had neither bed nor arms of defence. The appointed hour was approaching when man in his turn was to go forth into the light of day; and Prometheus, not knowing how he could devise his salvation, stole the mechanical arts of Hephaestus and Athene, and fire with them (they could neither have been acquired nor used without fire), and gave them to man. Thus man had the wisdom necessary to the support of life, but political wisdom he

had not; for that was in the keeping of Zeus, and the power of Prometheus did not extend to entering into the citadel of heaven, where Zeus dwelt, who moreover had terrible sentinels; but he did enter by stealth into the common workshop of Athene and Hephaestus, in which they used to practise their favourite arts, and carried off Hephaestus' art of working by fire, and also the art of Athene, and gave them to man. And in this way man was supplied with the means of life. But Prometheus is said to have been afterwards prosecuted for theft, owing to the blunder of Epimetheus.

Now man, having a share of the divine attributes, was at first the only one of the animals who had any gods, because he alone was of their kindred; and he would raise altars and images of them. He was not long in inventing articulate speech and names; and he also constructed houses and clothes and shoes and beds, and drew sustenance from the earth. Thus provided, mankind at first lived dispersed, and there were no cities. But the consequence was that they were destroyed by the wild beasts, for they were utterly weak in comparison of them, and their art was only sufficient to provide them with the means of life, and did not enable them to carry on war against the animals: food they had, but not as yet the art of government, of which the art of war is a part. After a while the desire of self-preservation gathered them into cities; but when they were gathered together, having no art of government, they evil intreated one another, and were again in process of dispersion and destruction. Zeus feared that the entire race would be exterminated, and so he sent Hermes to them, bearing reverence and justice to be the ordering principles of cities and the bonds of friendship and conciliation. Hermes asked Zeus how he should impart justice and reverence among men: — Should he distribute them as the arts are distributed; that is to say, to a favoured few only, one skilled individual having enough of medicine or of any other art for many unskilled ones? 'Shall this be the manner in which I am to distribute justice and

reverence among men, or shall I give them to all?' 'To all,' said Zeus; 'I should like them all to have a share; for cities cannot exist, if a few only share in the virtues, as in the arts. And further, make a law by my order, that he who has no part in reverence and justice shall be put to death, for he is a plague of the state.'

And this is the reason, Socrates, why the Athenians and mankind in general, when the question relates to carpentering or any other mechanical art, allow but a few to share in their deliberations; and when any one else interferes, then, as you say, they object, if he be not of the favoured few; which, as I reply, is very natural. But when they meet to deliberate about political virtue, which proceeds only by way of justice and wisdom, they are patient enough of any man who speaks of them, as is also natural, because they think that every man ought to share in this sort of virtue, and that states could not exist if this were otherwise. I have explained to you, Socrates, the reason of this phenomenon.

And that you may not suppose yourself to be deceived in thinking that all men regard every man as having a share of justice or honesty and of every other political virtue, let me give you a further proof, which is this. In other cases, as you are aware, if a man says that he is a good flute-player, or skilful in any other art in which he has no skill, people either laugh at him or are angry with him, and his relations think that he is mad and go and admonish him; but when honesty is in question, or some other political virtue, even if they know that he is dishonest, yet, if the man comes publicly forward and tells the truth about his dishonesty, then, what in the other case was held by them to be good sense, they now deem to be madness. They say that all men ought to profess honesty whether they are honest or not, and that a man is out of his mind who says anything else. Their notion is, that a man must have some degree of honesty; and that if he has none at all he ought not to be in the world.

I have been showing that they are right in admitting every man as a counsellor about this sort of virtue, as they are of opinion that every man is a partaker of it. And I will now endeavour to show further that they do not conceive this virtue to be given by nature, or to grow spontaneously, but to be a thing which may be taught; and which comes to a man by taking pains. No one would instruct, no one would rebuke, or be angry with those whose calamities they suppose to be due to nature or chance; they do not try to punish or to prevent them from being what they are; they do but pity them. Who is so foolish as to chastise or instruct the ugly, or the diminutive, or the feeble? And for this reason. Because he knows that good and evil of this kind is the work of nature and of chance; whereas if a man is wanting in those good qualities which are attained by study and exercise and teaching, and has only the contrary evil qualities, other men are angry with him, and punish and reprove him — of these evil qualities one is impiety, another injustice, and they may be described generally as the very opposite of political virtue. In such cases any man will be angry with another, and reprimand him, — clearly because he thinks that by study and learning, the virtue in which the other is deficient may be acquired. If you will think, Socrates, of the nature of punishment, you will see at once that in the opinion of mankind virtue may be acquired; no one punishes the evil-doer under the notion, or for the reason, that he has done wrong, — only the unreasonable fury of a beast acts in that manner. But he who desires to inflict rational punishment does not retaliate for a past wrong which cannot be undone; he has regard to the future, and is desirous that the man who is punished, and he who sees him punished, may be deterred from doing wrong again. He punishes for the sake of prevention, thereby clearly implying that virtue is capable of being taught. This is the notion of all who retaliate upon others either privately or publicly. And the Athenians, too, your own citizens, like other men, punish and take vengeance on all whom they regard as evil doers; and hence, we may infer them to be of

the number of those who think that virtue may be acquired and taught. Thus far, Socrates, I have shown you clearly enough, if I am not mistaken, that your countrymen are right in admitting the tinker and the cobbler to advise about politics, and also that they deem virtue to be capable of being taught and acquired.

There yet remains one difficulty which has been raised by you about the sons of good men. What is the reason why good men teach their sons the knowledge which is gained from teachers, and make them wise in that, but do nothing towards improving them in the virtues which distinguish themselves? And here, Socrates, I will leave the apologue and resume the argument. Please to consider: Is there or is there not some one quality of which all the citizens must be partakers, if there is to be a city at all? In the answer to this question is contained the only solution of your difficulty; there is no other. For if there be any such quality, and this quality or unity is not the art of the carpenter, or the smith, or the potter, but justice and temperance and holiness and, in a word, manly virtue — if this is the quality of which all men must be partakers, and which is the very condition of their learning or doing anything else, and if he who is wanting in this, whether he be a child only or a grown-up man or woman, must be taught and punished, until by punishment he becomes better, and he who rebels against instruction and punishment is either exiled or condemned to death under the idea that he is incurable — if what I am saying be true, good men have their sons taught other things and not this, do consider how extraordinary their conduct would appear to be. For we have shown that they think virtue capable of being taught and cultivated both in private and public; and, notwithstanding, they have their sons taught lesser matters, ignorance of which does not involve the punishment of death: but greater things, of which the ignorance may cause death and exile to those who have no training or knowledge of them — aye, and confiscation as well as death, and, in a word, may be the ruin of families — those things, I say, they are supposed not to

teach them, — not to take the utmost care that they should learn. How improbable is this, Socrates!

Education and admonition commence in the first years of childhood, and last to the very end of life. Mother and nurse and father and tutor are vying with one another about the improvement of the child as soon as ever he is able to understand what is being said to him: he cannot say or do anything without their setting forth to him that this is just and that is unjust; this is honourable, that is dishonourable; this is holy, that is unholy; do this and abstain from that. And if he obeys, well and good; if not, he is straightened by threats and blows, like a piece of bent or warped wood. At a later stage they send him to teachers, and enjoin them to see to his manners even more than to his reading and music; and the teachers do as they are desired. And when the boy has learned his letters and is beginning to understand what is written, as before he understood only what was spoken, they put into his hands the works of great poets, which he reads sitting on a bench at school; in these are contained many admonitions, and many tales, and praises, and encomia of ancient famous men, which he is required to learn by heart, in order that he may imitate or emulate them and desire to become like them. Then, again, the teachers of the lyre take similar care that their young disciple is temperate and gets into no mischief; and when they have taught him the use of the lyre, they introduce him to the poems of other excellent poets, who are the lyric poets; and these they set to music, and make their harmonies and rhythms quite familiar to the children’s souls, in order that they may learn to be more gentle, and harmonious, and rhythmical, and so more fitted for speech and action; for the life of man in every part has need of harmony and rhythm. Then they send them to the master of gymnastic, in order that their bodies may better minister to the virtuous mind, and that they may not be compelled through bodily weakness to play the coward in war or on any other occasion. This is what is done by those who have the means, and

those who have the means are the rich; their children begin to go to school soonest and leave off latest. When they have done with masters, the state again compels them to learn the laws, and live after the pattern which they furnish, and not after their own fancies; and just as in learning to write, the writing-master first draws lines with a style for the use of the young beginner, and gives him the tablet and makes him follow the lines, so the city draws the laws, which were the invention of good lawgivers living in the olden time; these are given to the young man, in order to guide him in his conduct whether he is commanding or obeying; and he who transgresses them is to be corrected, or, in other words, called to account, which is a term used not only in your country, but also in many others, seeing that justice calls men to account. Now when there is all this care about virtue private and public, why, Socrates, do you still wonder and doubt whether virtue can be taught? Cease to wonder, for the opposite would be far more surprising.

But why then do the sons of good fathers often turn out ill? There is nothing very wonderful in this; for, as I have been saying, the existence of a state implies that virtue is not any man's private possession. If so — and nothing can be truer — then I will further ask you to imagine, as an illustration, some other pursuit or branch of knowledge which may be assumed equally to be the condition of the existence of a state. Suppose that there could be no state unless we were all flute-players, as far as each had the capacity, and everybody was freely teaching everybody the art, both in private and public, and reproving the bad player as freely and openly as every man now teaches justice and the laws, not concealing them as he would conceal the other arts, but imparting them — for all of us have a mutual interest in the justice and virtue of one another, and this is the reason why every one is so ready to teach justice and the laws; — suppose, I say, that there were the same readiness and liberality among us in teaching one another flute-playing, do you imagine, Socrates, that the sons of good flute-players would be

more likely to be good than the sons of bad ones? I think not. Would not their sons grow up to be distinguished or undistinguished according to their own natural capacities as flute-players, and the son of a good player would often turn out to be a bad one, and the son of a bad player to be a good one, all flute-players would be good enough in comparison of those who were ignorant and unacquainted with the art of flute-playing? In like manner I would have you consider that he who appears to you to be the worst of those who have been brought up in laws and humanities, would appear to be a just man and a master of justice if he were to be compared with men who had no education, or courts of justice, or laws, or any restraints upon them which compelled them to practise virtue — with the savages, for example, whom the poet Pherecrates exhibited on the stage at the last year's Lenaean festival. If you were living among men such as the man-haters in his Chorus, you would be only too glad to meet with Eurybates and Phrynondas, and you would sorrowfully long to revisit the rascality of this part of the world. You, Socrates, are discontented, and why? Because all men are teachers of virtue, each one according to his ability; and you say Where are the teachers? You might as well ask, Who teaches Greek? For of that too there will not be any teachers found. Or you might ask, Who is to teach the sons of our artisans this same art which they have learned of their fathers? He and his fellow-workmen have taught them to the best of their ability, — but who will carry them further in their arts? And you would certainly have a difficulty, Socrates, in finding a teacher of them; but there would be no difficulty in finding a teacher of those who are wholly ignorant. And this is true of virtue or of anything else; if a man is better able than we are to promote virtue ever so little, we must be content with the result. A teacher of this sort I believe myself to be, and above all other men to have the knowledge which makes a man noble and good; and I give my pupils their money's-worth, and even more, as they themselves confess. And therefore I have introduced the

following mode of payment: — When a man has been my pupil, if he likes he pays my price, but there is no compulsion; and if he does not like, he has only to go into a temple and take an oath of the value of the instructions, and he pays no more than he declares to be their value.

Such is my Apologue, Socrates, and such is the argument by which I endeavour to show that virtue may be taught, and that this is the opinion of the Athenians. And I have also attempted to show that you are not to wonder at good fathers having bad sons, or at good sons having bad fathers, of which the sons of Polycleitus afford an example, who are the companions of our friends here, Paralus and Xanthippus, but are nothing in comparison with their father; and this is true of the sons of many other artists. As yet I ought not to say the same of Paralus and Xanthippus themselves, for they are young and there is still hope of them.

Protagoras ended, and in my ear

‘So charming left his voice, that I the while Thought him still speaking; still stood fixed to hear (Borrowed by Milton, “Paradise Lost”.).’

At length, when the truth dawned upon me, that he had really finished, not without difficulty I began to collect myself, and looking at Hippocrates, I said to him: O son of Apollodorus, how deeply grateful I am to you for having brought me hither; I would not have missed the speech of Protagoras for a great deal. For I used to imagine that no human care could make men good; but I know better now. Yet I have still one very small difficulty which I am sure that Protagoras will easily explain, as he has already explained so much. If a man were to go and consult Pericles or any of our great speakers about these matters, he might perhaps hear as fine a discourse; but then when one has a question to ask of any of them, like books, they can neither answer nor ask; and if any one challenges the least particular of their speech, they go ringing on in a long

harangue, like brazen pots, which when they are struck continue to sound unless some one puts his hand upon them; whereas our friend Protagoras can not only make a good speech, as he has already shown, but when he is asked a question he can answer briefly; and when he asks he will wait and hear the answer; and this is a very rare gift. Now I, Protagoras, want to ask of you a little question, which if you will only answer, I shall be quite satisfied. You were saying that virtue can be taught; — that I will take upon your authority, and there is no one to whom I am more ready to trust. But I marvel at one thing about which I should like to have my mind set at rest. You were speaking of Zeus sending justice and reverence to men; and several times while you were speaking, justice, and temperance, and holiness, and all these qualities, were described by you as if together they made up virtue. Now I want you to tell me truly whether virtue is one whole, of which justice and temperance and holiness are parts; or whether all these are only the names of one and the same thing: that is the doubt which still lingers in my mind.

There is no difficulty, Socrates, in answering that the qualities of which you are speaking are the parts of virtue which is one.

And are they parts, I said, in the same sense in which mouth, nose, and eyes, and ears, are the parts of a face; or are they like the parts of gold, which differ from the whole and from one another only in being larger or smaller?

I should say that they differed, Socrates, in the first way; they are related to one another as the parts of a face are related to the whole face.

And do men have some one part and some another part of virtue? Or if a man has one part, must he also have all the others?

By no means, he said; for many a man is brave and not just, or just and not wise.

You would not deny, then, that courage and wisdom are also parts of virtue?

Most undoubtedly they are, he answered; and wisdom is the noblest of the parts.

And they are all different from one another? I said.

Yes.

And has each of them a distinct function like the parts of the face; — the eye, for example, is not like the ear, and has not the same functions; and the other parts are none of them like one another, either in their functions, or in any other way? I want to know whether the comparison holds concerning the parts of virtue. Do they also differ from one another in themselves and in their functions? For that is clearly what the simile would imply.

Yes, Socrates, you are right in supposing that they differ.

Then, I said, no other part of virtue is like knowledge, or like justice, or like courage, or like temperance, or like holiness?

No, he answered.

Well then, I said, suppose that you and I enquire into their natures. And first, you would agree with me that justice is of the nature of a thing, would you not? That is my opinion: would it not be yours also?

Mine also, he said.

And suppose that some one were to ask us, saying, ‘O Protagoras, and you, Socrates, what about this thing which you were calling justice, is it just or unjust?’ — and I were to answer, just: would you vote with me or against me?

With you, he said.

Thereupon I should answer to him who asked me, that justice is of the nature of the just: would not you?

Yes, he said.

And suppose that he went on to say: ‘Well now, is there also such a thing as holiness?’ — we should answer, ‘Yes,’ if I am not mistaken?

Yes, he said.

Which you would also acknowledge to be a thing — should we not say so?

He assented.

‘And is this a sort of thing which is of the nature of the holy, or of the nature of the unholy?’ I should be angry at his putting such a question, and should say, ‘Peace, man; nothing can be holy if holiness is not holy.’ What would you say? Would you not answer in the same way?

Certainly, he said.

And then after this suppose that he came and asked us, ‘What were you saying just now? Perhaps I may not have heard you rightly, but you seemed to me to be saying that the parts of virtue were not the same as one another.’ I should reply, ‘You certainly heard that said, but not, as you imagine, by me; for I only asked the question; Protagoras gave the answer.’ And suppose that he turned to you and said, ’Is this true, Protagoras? and do you maintain that one part of virtue is unlike another, and is this your position?’ — how would you answer him?

I could not help acknowledging the truth of what he said, Socrates.

Well then, Protagoras, we will assume this; and now supposing that he proceeded to say further, ‘Then holiness is not of the nature of justice, nor justice of the nature of holiness, but of the nature of unholiness; and holiness is of the nature of the not just, and therefore of the unjust, and the unjust is the unholy’: how shall we answer him? I should certainly answer him on my own behalf that justice is holy, and that holiness is just; and I

would say in like manner on your behalf also, if you would allow me, that justice is either the same with holiness, or very nearly the same; and above all I would assert that justice is like holiness and holiness is like justice; and I wish that you would tell me whether I may be permitted to give this answer on your behalf, and whether you would agree with me.

He replied, I cannot simply agree, Socrates, to the proposition that justice is holy and that holiness is just, for there appears to me to be a difference between them. But what matter? if you please I please; and let us assume, if you will I, that justice is holy, and that holiness is just.

Pardon me, I replied; I do not want this 'if you wish' or 'if you will' sort of conclusion to be proven, but I want you and me to be proven: I mean to say that the conclusion will be best proven if there be no 'if.'

Well, he said, I admit that justice bears a resemblance to holiness, for there is always some point of view in which everything is like every other thing; white is in a certain way like black, and hard is like soft, and the most extreme opposites have some qualities in common; even the parts of the face which, as we were saying before, are distinct and have different functions, are still in a certain point of view similar, and one of them is like another of them. And you may prove that they are like one another on the same principle that all things are like one another; and yet things which are like in some particular ought not to be called alike, nor things which are unlike in some particular, however slight, unlike.

And do you think, I said in a tone of surprise, that justice and holiness have but a small degree of likeness?

Certainly not; any more than I agree with what I understand to be your view.

Well, I said, as you appear to have a difficulty about this, let us take another of the examples which you mentioned instead. Do

you admit the existence of folly?

I do.

And is not wisdom the very opposite of folly?

That is true, he said.

And when men act rightly and advantageously they seem to you to be temperate?

Yes, he said.

And temperance makes them temperate?

Certainly.

And they who do not act rightly act foolishly, and in acting thus are not temperate?

I agree, he said.

Then to act foolishly is the opposite of acting temperately?

He assented.

And foolish actions are done by folly, and temperate actions by temperance?

He agreed.

And that is done strongly which is done by strength, and that which is weakly done, by weakness?

He assented.

And that which is done with swiftness is done swiftly, and that which is done with slowness, slowly?

He assented again.

And that which is done in the same manner, is done by the same; and that which is done in an opposite manner by the opposite?

He agreed.

Once more, I said, is there anything beautiful?

Yes.

To which the only opposite is the ugly?

There is no other.

And is there anything good?

There is.

To which the only opposite is the evil?

There is no other.

And there is the acute in sound?

True.

To which the only opposite is the grave?

There is no other, he said, but that.

Then every opposite has one opposite only and no more?

He assented.

Then now, I said, let us recapitulate our admissions. First of all we admitted that everything has one opposite and not more than one?

We did so.

And we admitted also that what was done in opposite ways was done by opposites?

Yes.

And that which was done foolishly, as we further admitted, was done in the opposite way to that which was done temperately?

Yes.

And that which was done temperately was done by temperance, and that which was done foolishly by folly?

He agreed.

And that which is done in opposite ways is done by opposites?

Yes.

And one thing is done by temperance, and quite another thing by folly?

Yes.

And in opposite ways?

Certainly.

And therefore by opposites: — then folly is the opposite of temperance?

Clearly.

And do you remember that folly has already been acknowledged by us to be the opposite of wisdom?

He assented.

And we said that everything has only one opposite?

Yes.

Then, Protagoras, which of the two assertions shall we renounce? One says that everything has but one opposite; the other that wisdom is distinct from temperance, and that both of them are parts of virtue; and that they are not only distinct, but dissimilar, both in themselves and in their functions, like the parts of a face. Which of these two assertions shall we renounce? For both of them together are certainly not in harmony; they do not accord or agree: for how can they be said to agree if everything is assumed to have only one opposite and not more than one, and yet folly, which is one, has clearly the two opposites — wisdom and temperance? Is not that true, Protagoras? What else would you say?

He assented, but with great reluctance.

Then temperance and wisdom are the same, as before justice and holiness appeared to us to be nearly the same. And now, Protagoras, I said, we must finish the enquiry, and not faint. Do

you think that an unjust man can be temperate in his injustice?

I should be ashamed, Socrates, he said, to acknowledge this, which nevertheless many may be found to assert.

And shall I argue with them or with you? I replied.

I would rather, he said, that you should argue with the many first, if you will.

Whichever you please, if you will only answer me and say whether you are of their opinion or not. My object is to test the validity of the argument; and yet the result may be that I who ask and you who answer may both be put on our trial.

Protagoras at first made a show of refusing, as he said that the argument was not encouraging; at length, he consented to answer.

Now then, I said, begin at the beginning and answer me. You think that some men are temperate, and yet unjust?

Yes, he said; let that be admitted.

And temperance is good sense?

Yes.

And good sense is good counsel in doing injustice?

Granted.

If they succeed, I said, or if they do not succeed?

If they succeed.

And you would admit the existence of goods?

Yes.

And is the good that which is expedient for man?

Yes, indeed, he said: and there are some things which may be inexpedient, and yet I call them good.

I thought that Protagoras was getting ruffled and excited; he seemed to be setting himself in an attitude of war. Seeing this, I

minded my business, and gently said: —

When you say, Protagoras, that things inexpedient are good, do you mean inexpedient for man only, or inexpedient altogether? and do you call the latter good?

Certainly not the last, he replied; for I know of many things — meats, drinks, medicines, and ten thousand other things, which are inexpedient for man, and some which are expedient; and some which are neither expedient nor inexpedient for man, but only for horses; and some for oxen only, and some for dogs; and some for no animals, but only for trees; and some for the roots of trees and not for their branches, as for example, manure, which is a good thing when laid about the roots of a tree, but utterly destructive if thrown upon the shoots and young branches; or I may instance olive oil, which is mischievous to all plants, and generally most injurious to the hair of every animal with the exception of man, but beneficial to human hair and to the human body generally; and even in this application (so various and changeable is the nature of the benefit), that which is the greatest good to the outward parts of a man, is a very great evil to his inward parts: and for this reason physicians always forbid their patients the use of oil in their food, except in very small quantities, just enough to extinguish the disagreeable sensation of smell in meats and sauces.

When he had given this answer, the company cheered him. And I said: Protagoras, I have a wretched memory, and when any one makes a long speech to me I never remember what he is talking about. As then, if I had been deaf, and you were going to converse with me, you would have had to raise your voice; so now, having such a bad memory, I will ask you to cut your answers shorter, if you would take me with you.

What do you mean? he said: how am I to shorten my answers? shall I make them too short?

Certainly not, I said.

But short enough?

Yes, I said.

Shall I answer what appears to me to be short enough, or what appears to you to be short enough?

I have heard, I said, that you can speak and teach others to speak about the same things at such length that words never seemed to fail, or with such brevity that no one could use fewer of them. Please therefore, if you talk with me, to adopt the latter or more compendious method.

Socrates, he replied, many a battle of words have I fought, and if I had followed the method of disputation which my adversaries desired, as you want me to do, I should have been no better than another, and the name of Protagoras would have been nowhere.

I saw that he was not satisfied with his previous answers, and that he would not play the part of answerer any more if he could help; and I considered that there was no call upon me to continue the conversation; so I said: Protagoras, I do not wish to force the conversation upon you if you had rather not, but when you are willing to argue with me in such a way that I can follow you, then I will argue with you. Now you, as is said of you by others and as you say of yourself, are able to have discussions in shorter forms of speech as well as in longer, for you are a master of wisdom; but I cannot manage these long speeches: I only wish that I could. You, on the other hand, who are capable of either, ought to speak shorter as I beg you, and then we might converse. But I see that you are disinclined, and as I have an engagement which will prevent my staying to hear you at greater length (for I have to be in another place), I will depart; although I should have liked to have heard you.

Thus I spoke, and was rising from my seat, when Callias seized me by the right hand, and in his left hand caught hold of this old cloak of mine. He said: We cannot let you go, Socrates, for if you leave us there will be an end of our discussions: I must therefore

beg you to remain, as there is nothing in the world that I should like better than to hear you and Protagoras discourse. Do not deny the company this pleasure.

Now I had got up, and was in the act of departure. Son of Hipponicus, I replied, I have always admired, and do now heartily applaud and love your philosophical spirit, and I would gladly comply with your request, if I could. But the truth is that I cannot. And what you ask is as great an impossibility to me, as if you bade me run a race with Crison of Himera, when in his prime, or with some one of the long or day course runners. To such a request I should reply that I would fain ask the same of my own legs; but they refuse to comply. And therefore if you want to see Crison and me in the same stadium, you must bid him slacken his speed to mine, for I cannot run quickly, and he can run slowly. And in like manner if you want to hear me and Protagoras discoursing, you must ask him to shorten his answers, and keep to the point, as he did at first; if not, how can there be any discussion? For discussion is one thing, and making an oration is quite another, in my humble opinion.

But you see, Socrates, said Callias, that Protagoras may fairly claim to speak in his own way, just as you claim to speak in yours.

Here Alcibiades interposed, and said: That, Callias, is not a true statement of the case. For our friend Socrates admits that he cannot make a speech — in this he yields the palm to Protagoras: but I should be greatly surprised if he yielded to any living man in the power of holding and apprehending an argument. Now if Protagoras will make a similar admission, and confess that he is inferior to Socrates in argumentative skill, that is enough for Socrates; but if he claims a superiority in argument as well, let him ask and answer — not, when a question is asked, slipping away from the point, and instead of answering, making a speech at such length that most of his hearers forget the question at issue (not that Socrates is likely

to forget — I will be bound for that, although he may pretend in fun that he has a bad memory). And Socrates appears to me to be more in the right than Protagoras; that is my view, and every man ought to say what he thinks.

When Alcibiades had done speaking, some one — Critias, I believe — went on to say: O Prodicus and Hippias, Callias appears to me to be a partisan of Protagoras: and this led Alcibiades, who loves opposition, to take the other side. But we should not be partisans either of Socrates or of Protagoras; let us rather unite in entreating both of them not to break up the discussion.

Prodicus added: That, Critias, seems to me to be well said, for those who are present at such discussions ought to be impartial hearers of both the speakers; remembering, however, that impartiality is not the same as equality, for both sides should be impartially heard, and yet an equal meed should not be assigned to both of them; but to the wiser a higher meed should be given, and a lower to the less wise. And I as well as Critias would beg you, Protagoras and Socrates, to grant our request, which is, that you will argue with one another and not wrangle; for friends argue with friends out of good-will, but only adversaries and enemies wrangle. And then our meeting will be delightful; for in this way you, who are the speakers, will be most likely to win esteem, and not praise only, among us who are your audience; for esteem is a sincere conviction of the hearers' souls, but praise is often an insincere expression of men uttering falsehoods contrary to their conviction. And thus we who are the hearers will be gratified and not pleased; for gratification is of the mind when receiving wisdom and knowledge, but pleasure is of the body when eating or experiencing some other bodily delight. Thus spoke Prodicus, and many of the company applauded his words.

Hippias the sage spoke next. He said: All of you who are here present I reckon to be kinsmen and friends and fellow-citizens,

by nature and not by law; for by nature like is akin to like, whereas law is the tyrant of mankind, and often compels us to do many things which are against nature. How great would be the disgrace then, if we, who know the nature of things, and are the wisest of the Hellenes, and as such are met together in this city, which is the metropolis of wisdom, and in the greatest and most glorious house of this city, should have nothing to show worthy of this height of dignity, but should only quarrel with one another like the meanest of mankind! I do pray and advise you, Protagoras, and you, Socrates, to agree upon a compromise. Let us be your peacemakers. And do not you, Socrates, aim at this precise and extreme brevity in discourse, if Protagoras objects, but loosen and let go the reins of speech, that your words may be grander and more becoming to you. Neither do you, Protagoras, go forth on the gale with every sail set out of sight of land into an ocean of words, but let there be a mean observed by both of you. Do as I say. And let me also persuade you to choose an arbiter or overseer or president; he will keep watch over your words and will prescribe their proper length.

This proposal was received by the company with universal approval; Callias said that he would not let me off, and they begged me to choose an arbiter. But I said that to choose an umpire of discourse would be unseemly; for if the person chosen was inferior, then the inferior or worse ought not to preside over the better; or if he was equal, neither would that be well; for he who is our equal will do as we do, and what will be the use of choosing him? And if you say, ‘Let us have a better then,’ — to that I answer that you cannot have any one who is wiser than Protagoras. And if you choose another who is not really better, and whom you only say is better, to put another over him as though he were an inferior person would be an unworthy reflection on him; not that, as far as I am concerned, any reflection is of much consequence to me. Let me tell you then what I will do in order that the conversation and discussion may go on as you desire. If Protagoras is not disposed to answer, let

him ask and I will answer; and I will endeavour to show at the same time how, as I maintain, he ought to answer: and when I have answered as many questions as he likes to ask, let him in like manner answer me; and if he seems to be not very ready at answering the precise question asked of him, you and I will unite in entreating him, as you entreated me, not to spoil the discussion. And this will require no special arbiter — all of you shall be arbiters.

This was generally approved, and Protagoras, though very much against his will, was obliged to agree that he would ask questions; and when he had put a sufficient number of them, that he would answer in his turn those which he was asked in short replies. He began to put his questions as follows: —

I am of opinion, Socrates, he said, that skill in poetry is the principal part of education; and this I conceive to be the power of knowing what compositions of the poets are correct, and what are not, and how they are to be distinguished, and of explaining when asked the reason of the difference. And I propose to transfer the question which you and I have been discussing to the domain of poetry; we will speak as before of virtue, but in reference to a passage of a poet. Now Simonides says to Scopas the son of Creon the Thessalian:

‘Hardly on the one hand can a man become truly good, built four-square in hands and feet and mind, a work without a flaw.’

Do you know the poem? or shall I repeat the whole?

There is no need, I said; for I am perfectly well acquainted with the ode, — I have made a careful study of it.

Very well, he said. And do you think that the ode is a good composition, and true?

Yes, I said, both good and true.

But if there is a contradiction, can the composition be good or true?

No, not in that case, I replied.

And is there not a contradiction? he asked. Reflect.

Well, my friend, I have reflected.

And does not the poet proceed to say, ‘I do not agree with the word of Pittacus, albeit the utterance of a wise man: Hardly can a man be good’? Now you will observe that this is said by the same poet.

I know it.

And do you think, he said, that the two sayings are consistent?

Yes, I said, I think so (at the same time I could not help fearing that there might be something in what he said). And you think otherwise?

Why, he said, how can he be consistent in both? First of all, premising as his own thought, ‘Hardly can a man become truly good’; and then a little further on in the poem, forgetting, and blaming Pittacus and refusing to agree with him, when he says, ‘Hardly can a man be good,’ which is the very same thing. And yet when he blames him who says the same with himself, he blames himself; so that he must be wrong either in his first or his second assertion.

Many of the audience cheered and applauded this. And I felt at first giddy and faint, as if I had received a blow from the hand of an expert boxer, when I heard his words and the sound of the cheering; and to confess the truth, I wanted to get time to think what the meaning of the poet really was. So I turned to Prodicus and called him. Prodicus, I said, Simonides is a countryman of yours, and you ought to come to his aid. I must appeal to you, like the river Scamander in Homer, who, when beleaguered by Achilles, summons the Simois to aid him, saying:

‘Brother dear, let us both together stay the force of the hero (Il.).’

And I summon you, for I am afraid that Protagoras will make an end of Simonides. Now is the time to rehabilitate Simonides, by the application of your philosophy of synonyms, which enables you to distinguish ‘will’ and ‘wish,’ and make other charming distinctions like those which you drew just now. And I should like to know whether you would agree with me; for I am of opinion that there is no contradiction in the words of Simonides. And first of all I wish that you would say whether, in your opinion, Prodicus, ‘being’ is the same as ‘becoming.’

Not the same, certainly, replied Prodicus.

Did not Simonides first set forth, as his own view, that ‘Hardly can a man become truly good’?

Quite right, said Prodicus.

And then he blames Pittacus, not, as Protagoras imagines, for repeating that which he says himself, but for saying something different from himself. Pittacus does not say as Simonides says, that hardly can a man become good, but hardly can a man be good: and our friend Prodicus would maintain that being, Protagoras, is not the same as becoming; and if they are not the same, then Simonides is not inconsistent with himself. I dare say that Prodicus and many others would say, as Hesiod says,

‘On the one hand, hardly can a man become good,

For the gods have made virtue the reward of toil,

But on the other hand, when you have climbed the height,

Then, to retain virtue, however difficult the acquisition, is easy

— (Works and Days).’

Prodicus heard and approved; but Protagoras said: Your correction, Socrates, involves a greater error than is contained in the sentence which you are correcting.

Alas! I said, Protagoras; then I am a sorry physician, and do but aggravate a disorder which I am seeking to cure.

Such is the fact, he said.

How so? I asked.

The poet, he replied, could never have made such a mistake as to say that virtue, which in the opinion of all men is the hardest of all things, can be easily retained.

Well, I said, and how fortunate are we in having Prodicus among us, at the right moment; for he has a wisdom, Protagoras, which, as I imagine, is more than human and of very ancient date, and may be as old as Simonides or even older. Learned as you are in many things, you appear to know nothing of this; but I know, for I am a disciple of his. And now, if I am not mistaken, you do not understand the word ‘hard’ (chalepon) in the sense which Simonides intended; and I must correct you, as Prodicus corrects me when I use the word ‘awful’ (deinon) as a term of praise. If I say that Protagoras or any one else is an ‘awfully’ wise man, he asks me if I am not ashamed of calling that which is good ‘awful’; and then he explains to me that the term ‘awful’ is always taken in a bad sense, and that no one speaks of being ‘awfully’ healthy or wealthy, or of ‘awful’ peace, but of ‘awful’ disease, ‘awful’ war, ‘awful’ poverty, meaning by the term ‘awful,’ evil. And I think that Simonides and his countrymen the Ceans, when they spoke of ‘hard’ meant ‘evil,’ or something which you do not understand. Let us ask Prodicus, for he ought to be able to answer questions about the dialect of Simonides. What did he mean, Prodicus, by the term ‘hard’?

Evil, said Prodicus.

And therefore, I said, Prodicus, he blames Pittacus for saying, ‘Hard is the good,’ just as if that were equivalent to saying, Evil is the good.

Yes, he said, that was certainly his meaning; and he is twitting Pittacus with ignorance of the use of terms, which in a Lesbian, who has been accustomed to speak a barbarous language, is natural.

Do you hear, Protagoras, I asked, what our friend Prodicus is saying? And have you an answer for him?

You are entirely mistaken, Prodicus, said Protagoras; and I know very well that Simonides in using the word ‘hard’ meant what all of us mean, not evil, but that which is not easy — that which takes a great deal of trouble: of this I am positive.

I said: I also incline to believe, Protagoras, that this was the meaning of Simonides, of which our friend Prodicus was very well aware, but he thought that he would make fun, and try if you could maintain your thesis; for that Simonides could never have meant the other is clearly proved by the context, in which he says that God only has this gift. Now he cannot surely mean to say that to be good is evil, when he afterwards proceeds to say that God only has this gift, and that this is the attribute of him and of no other. For if this be his meaning, Prodicus would impute to Simonides a character of recklessness which is very unlike his countrymen. And I should like to tell you, I said, what I imagine to be the real meaning of Simonides in this poem, if you will test what, in your way of speaking, would be called my skill in poetry; or if you would rather, I will be the listener.

To this proposal Protagoras replied: As you please; — and Hippias, Prodicus, and the others told me by all means to do as I proposed.

Then now, I said, I will endeavour to explain to you my opinion about this poem of Simonides. There is a very ancient philosophy which is more cultivated in Crete and Lacedaemon than in any other part of Hellas, and there are more philosophers in those countries than anywhere else in the world. This, however, is a secret which the Lacedaemonians deny; and they pretend to be ignorant, just because they do not wish to have it thought that they rule the world by wisdom, like the Sophists of whom Protagoras was speaking, and not by valour of arms; considering that if the reason of their superiority were disclosed, all men would be practising their wisdom. And this

secret of theirs has never been discovered by the imitators of Lacedaemonian fashions in other cities, who go about with their ears bruised in imitation of them, and have the caestus bound on their arms, and are always in training, and wear short cloaks; for they imagine that these are the practices which have enabled the Lacedaemonians to conquer the other Hellenes. Now when the Lacedaemonians want to unbend and hold free conversation with their wise men, and are no longer satisfied with mere secret intercourse, they drive out all these laconizers, and any other foreigners who may happen to be in their country, and they hold a philosophical seance unknown to strangers; and they themselves forbid their young men to go out into other cities — in this they are like the Cretans — in order that they may not unlearn the lessons which they have taught them. And in Lacedaemon and Crete not only men but also women have a pride in their high cultivation. And hereby you may know that I am right in attributing to the Lacedaemonians this excellence in philosophy and speculation: If a man converses with the most ordinary Lacedaemonian, he will find him seldom good for much in general conversation, but at any point in the discourse he will be darting out some notable saying, terse and full of meaning, with unerring aim; and the person with whom he is talking seems to be like a child in his hands. And many of our own age and of former ages have noted that the true Lacedaemonian type of character has the love of philosophy even stronger than the love of gymnastics; they are conscious that only a perfectly educated man is capable of uttering such expressions. Such were Thales of Miletus, and Pittacus of Mitylene, and Bias of Priene, and our own Solon, and Cleobulus the Lindian, and Myson the Chenian; and seventh in the catalogue of wise men was the Lacedaemonian Chilo. All these were lovers and emulators and disciples of the culture of the Lacedaemonians, and any one may perceive that their wisdom was of this character; consisting of short memorable sentences, which they severally uttered. And they met together and dedicated in the

temple of Apollo at Delphi, as the first-fruits of their wisdom, the far-famed inscriptions, which are in all men's mouths— 'Know thyself,' and 'Nothing too much.'

Why do I say all this? I am explaining that this Lacedaemonian brevity was the style of primitive philosophy. Now there was a saying of Pittacus which was privately circulated and received the approbation of the wise, 'Hard is it to be good.' And Simonides, who was ambitious of the fame of wisdom, was aware that if he could overthrow this saying, then, as if he had won a victory over some famous athlete, he would carry off the palm among his contemporaries. And if I am not mistaken, he composed the entire poem with the secret intention of damaging Pittacus and his saying.

Let us all unite in examining his words, and see whether I am speaking the truth. Simonides must have been a lunatic, if, in the very first words of the poem, wanting to say only that to become good is hard, he inserted (Greek) 'on the one hand' ('on the one hand to become good is hard'); there would be no reason for the introduction of (Greek), unless you suppose him to speak with a hostile reference to the words of Pittacus. Pittacus is saying 'Hard is it to be good,' and he, in refutation of this thesis, rejoins that the truly hard thing, Pittacus, is to become good, not joining 'truly' with 'good,' but with 'hard.' Not, that the hard thing is to be truly good, as though there were some truly good men, and there were others who were good but not truly good (this would be a very simple observation, and quite unworthy of Simonides); but you must suppose him to make a trajection of the word 'truly' (Greek), construing the saying of Pittacus thus (and let us imagine Pittacus to be speaking and Simonides answering him): 'O my friends,' says Pittacus, 'hard is it to be good,' and Simonides answers, 'In that, Pittacus, you are mistaken; the difficulty is not to be good, but on the one hand, to become good, four-square in hands and feet and mind, without a flaw — that is hard truly.'

This way of reading the passage accounts for the insertion of (Greek) ‘on the one hand,’ and for the position at the end of the clause of the word ‘truly,’ and all that follows shows this to be the meaning. A great deal might be said in praise of the details of the poem, which is a charming piece of workmanship, and very finished, but such minutiae would be tedious. I should like, however, to point out the general intention of the poem, which is certainly designed in every part to be a refutation of the saying of Pittacus. For he speaks in what follows a little further on as if he meant to argue that although there is a difficulty in becoming good, yet this is possible for a time, and only for a time. But having become good, to remain in a good state and be good, as you, Pittacus, affirm, is not possible, and is not granted to man; God only has this blessing; ‘but man cannot help being bad when the force of circumstances overpowers him.’ Now whom does the force of circumstance overpower in the command of a vessel? — not the private individual, for he is always overpowered; and as one who is already prostrate cannot be overthrown, and only he who is standing upright but not he who is prostrate can be laid prostrate, so the force of circumstances can only overpower him who, at some time or other, has resources, and not him who is at all times helpless. The descent of a great storm may make the pilot helpless, or the severity of the season the husbandman or the physician; for the good may become bad, as another poet witnesses: —

‘The good are sometimes good and sometimes bad.’

But the bad does not become bad; he is always bad. So that when the force of circumstances overpowers the man of resources and skill and virtue, then he cannot help being bad. And you, Pittacus, are saying, ‘Hard is it to be good.’ Now there is a difficulty in becoming good; and yet this is possible: but to be good is an impossibility —

‘For he who does well is the good man, and he who does ill is the bad.’

But what sort of doing is good in letters? and what sort of doing makes a man good in letters? Clearly the knowing of them. And what sort of well-doing makes a man a good physician? Clearly the knowledge of the art of healing the sick. ‘But he who does ill is the bad.’ Now who becomes a bad physician? Clearly he who is in the first place a physician, and in the second place a good physician; for he may become a bad one also: but none of us unskilled individuals can by any amount of doing ill become physicians, any more than we can become carpenters or anything of that sort; and he who by doing ill cannot become a physician at all, clearly cannot become a bad physician. In like manner the good may become deteriorated by time, or toil, or disease, or other accident (the only real doing ill is to be deprived of knowledge), but the bad man will never become bad, for he is always bad; and if he were to become bad, he must previously have been good. Thus the words of the poem tend to show that on the one hand a man cannot be continuously good, but that he may become good and may also become bad; and again that

‘They are the best for the longest time whom the gods love.’

All this relates to Pittacus, as is further proved by the sequel. For he adds: —

‘Therefore I will not throw away my span of life to no purpose in searching after the impossible, hoping in vain to find a perfectly faultless man among those who partake of the fruit of the broad-bosomed earth: if I find him, I will send you word.’

(this is the vehement way in which he pursues his attack upon Pittacus throughout the whole poem):

‘But him who does no evil, voluntarily I praise and love; — not even the gods war against necessity.’

All this has a similar drift, for Simonides was not so ignorant as to say that he praised those who did no evil voluntarily, as though there were some who did evil voluntarily. For no wise

man, as I believe, will allow that any human being errs voluntarily, or voluntarily does evil and dishonourable actions; but they are very well aware that all who do evil and dishonourable things do them against their will. And Simonides never says that he praises him who does no evil voluntarily; the word ‘voluntarily’ applies to himself. For he was under the impression that a good man might often compel himself to love and praise another, and to be the friend and approver of another; and that there might be an involuntary love, such as a man might feel to an unnatural father or mother, or country, or the like. Now bad men, when their parents or country have any defects, look on them with malignant joy, and find fault with them and expose and denounce them to others, under the idea that the rest of mankind will be less likely to take themselves to task and accuse them of neglect; and they blame their defects far more than they deserve, in order that the odium which is necessarily incurred by them may be increased: but the good man dissembles his feelings, and constrains himself to praise them; and if they have wronged him and he is angry, he pacifies his anger and is reconciled, and compels himself to love and praise his own flesh and blood. And Simonides, as is probable, considered that he himself had often had to praise and magnify a tyrant or the like, much against his will, and he also wishes to imply to Pittacus that he does not censure him because he is censorious.

‘For I am satisfied’ he says, ‘when a man is neither bad nor very stupid; and when he knows justice (which is the health of states), and is of sound mind, I will find no fault with him, for I am not given to finding fault, and there are innumerable fools’

(implying that if he delighted in censure he might have abundant opportunity of finding fault).

‘All things are good with which evil is unmingled.’

In these latter words he does not mean to say that all things are good which have no evil in them, as you might say ‘All things are

white which have no black in them,' for that would be ridiculous; but he means to say that he accepts and finds no fault with the moderate or intermediate state.

('I do not hope' he says, 'to find a perfectly blameless man among those who partake of the fruits of the broad-bosomed earth (if I find him, I will send you word); in this sense I praise no man. But he who is moderately good, and does no evil, is good enough for me, who love and approve every one')

(and here observe that he uses a Lesbian word, epainemi (approve), because he is addressing Pittacus,

'Who love and APPROVE every one VOLUNTARILY, who does no evil:'

and that the stop should be put after 'voluntarily'); 'but there are some whom I involuntarily praise and love. And you, Pittacus, I would never have blamed, if you had spoken what was moderately good and true; but I do blame you because, putting on the appearance of truth, you are speaking falsely about the highest matters.' — And this, I said, Prodicus and Protagoras, I take to be the meaning of Simonides in this poem.

Hippias said: I think, Socrates, that you have given a very good explanation of the poem; but I have also an excellent interpretation of my own which I will propound to you, if you will allow me.

Nay, Hippias, said Alcibiades; not now, but at some other time. At present we must abide by the compact which was made between Socrates and Protagoras, to the effect that as long as Protagoras is willing to ask, Socrates should answer; or that if he would rather answer, then that Socrates should ask.

I said: I wish Protagoras either to ask or answer as he is inclined; but I would rather have done with poems and odes, if he does not object, and come back to the question about which I was asking you at first, Protagoras, and by your help make an end of that. The talk about the poets seems to me like a

commonplace entertainment to which a vulgar company have recourse; who, because they are not able to converse or amuse one another, while they are drinking, with the sound of their own voices and conversation, by reason of their stupidity, raise the price of flute-girls in the market, hiring for a great sum the voice of a flute instead of their own breath, to be the medium of intercourse among them: but where the company are real gentlemen and men of education, you will see no flute-girls, nor dancing-girls, nor harp-girls; and they have no nonsense or games, but are contented with one another's conversation, of which their own voices are the medium, and which they carry on by turns and in an orderly manner, even though they are very liberal in their potations. And a company like this of ours, and men such as we profess to be, do not require the help of another's voice, or of the poets whom you cannot interrogate about the meaning of what they are saying; people who cite them declaring, some that the poet has one meaning, and others that he has another, and the point which is in dispute can never be decided. This sort of entertainment they decline, and prefer to talk with one another, and put one another to the proof in conversation. And these are the models which I desire that you and I should imitate. Leaving the poets, and keeping to ourselves, let us try the mettle of one another and make proof of the truth in conversation. If you have a mind to ask, I am ready to answer; or if you would rather, do you answer, and give me the opportunity of resuming and completing our unfinished argument.

I made these and some similar observations; but Protagoras would not distinctly say which he would do. Thereupon Alcibiades turned to Callias, and said: — Do you think, Callias, that Protagoras is fair in refusing to say whether he will or will not answer? for I certainly think that he is unfair; he ought either to proceed with the argument, or distinctly refuse to proceed, that we may know his intention; and then Socrates will be able to discourse with some one else, and the rest of the

company will be free to talk with one another.

I think that Protagoras was really made ashamed by these words of Alcibiades, and when the prayers of Callias and the company were superadded, he was at last induced to argue, and said that I might ask and he would answer.

So I said: Do not imagine, Protagoras, that I have any other interest in asking questions of you but that of clearing up my own difficulties. For I think that Homer was very right in saying that

‘When two go together, one sees before the other (Il.),’

for all men who have a companion are readier in deed, word, or thought; but if a man

‘Sees a thing when he is alone,’

he goes about straightway seeking until he finds some one to whom he may show his discoveries, and who may confirm him in them. And I would rather hold discourse with you than with any one, because I think that no man has a better understanding of most things which a good man may be expected to understand, and in particular of virtue. For who is there, but you? — who not only claim to be a good man and a gentleman, for many are this, and yet have not the power of making others good — whereas you are not only good yourself, but also the cause of goodness in others. Moreover such confidence have you in yourself, that although other Sophists conceal their profession, you proclaim in the face of Hellas that you are a Sophist or teacher of virtue and education, and are the first who demanded pay in return. How then can I do otherwise than invite you to the examination of these subjects, and ask questions and consult with you? I must, indeed. And I should like once more to have my memory refreshed by you about the questions which I was asking you at first, and also to have your help in considering them. If I am not mistaken the question was this: Are wisdom and temperance and courage and justice and holiness five names of the same

thing? or has each of the names a separate underlying essence and corresponding thing having a peculiar function, no one of them being like any other of them? And you replied that the five names were not the names of the same thing, but that each of them had a separate object, and that all these objects were parts of virtue, not in the same way that the parts of gold are like each other and the whole of which they are parts, but as the parts of the face are unlike the whole of which they are parts and one another, and have each of them a distinct function. I should like to know whether this is still your opinion; or if not, I will ask you to define your meaning, and I shall not take you to task if you now make a different statement. For I dare say that you may have said what you did only in order to make trial of me.

I answer, Socrates, he said, that all these qualities are parts of virtue, and that four out of the five are to some extent similar, and that the fifth of them, which is courage, is very different from the other four, as I prove in this way: You may observe that many men are utterly unrighteous, unholy, intemperate, ignorant, who are nevertheless remarkable for their courage.

Stop, I said; I should like to think about that. When you speak of brave men, do you mean the confident, or another sort of nature?

Yes, he said; I mean the impetuous, ready to go at that which others are afraid to approach.

In the next place, you would affirm virtue to be a good thing, of which good thing you assert yourself to be a teacher.

Yes, he said; I should say the best of all things, if I am in my right mind.

And is it partly good and partly bad, I said, or wholly good?

Wholly good, and in the highest degree.

Tell me then; who are they who have confidence when diving into a well?

I should say, the divers.

And the reason of this is that they have knowledge?

Yes, that is the reason.

And who have confidence when fighting on horseback — the skilled horseman or the unskilled?

The skilled.

And who when fighting with light shields — the peltasts or the nonpeltasts?

The peltasts. And that is true of all other things, he said, if that is your point: those who have knowledge are more confident than those who have no knowledge, and they are more confident after they have learned than before.

And have you not seen persons utterly ignorant, I said, of these things, and yet confident about them?

Yes, he said, I have seen such persons far too confident.

And are not these confident persons also courageous?

In that case, he replied, courage would be a base thing, for the men of whom we are speaking are surely madmen.

Then who are the courageous? Are they not the confident?

Yes, he said; to that statement I adhere.

And those, I said, who are thus confident without knowledge are really not courageous, but mad; and in that case the wisest are also the most confident, and being the most confident are also the bravest, and upon that view again wisdom will be courage.

Nay, Socrates, he replied, you are mistaken in your remembrance of what was said by me. When you asked me, I certainly did say that the courageous are the confident; but I was never asked whether the confident are the courageous; if

you had asked me, I should have answered ‘Not all of them’: and what I did answer you have not proved to be false, although you proceeded to show that those who have knowledge are more courageous than they were before they had knowledge, and more courageous than others who have no knowledge, and were then led on to think that courage is the same as wisdom. But in this way of arguing you might come to imagine that strength is wisdom. You might begin by asking whether the strong are able, and I should say ‘Yes’; and then whether those who know how to wrestle are not more able to wrestle than those who do not know how to wrestle, and more able after than before they had learned, and I should assent. And when I had admitted this, you might use my admissions in such a way as to prove that upon my view wisdom is strength; whereas in that case I should not have admitted, any more than in the other, that the able are strong, although I have admitted that the strong are able. For there is a difference between ability and strength; the former is given by knowledge as well as by madness or rage, but strength comes from nature and a healthy state of the body. And in like manner I say of confidence and courage, that they are not the same; and I argue that the courageous are confident, but not all the confident courageous. For confidence may be given to men by art, and also, like ability, by madness and rage; but courage comes to them from nature and the healthy state of the soul.

I said: You would admit, Protagoras, that some men live well and others ill?

He assented.

And do you think that a man lives well who lives in pain and grief?

He does not.

But if he lives pleasantly to the end of his life, will he not in that case have lived well?

He will.

Then to live pleasantly is a good, and to live unpleasantly an evil?

Yes, he said, if the pleasure be good and honourable.

And do you, Protagoras, like the rest of the world, call some pleasant things evil and some painful things good? — for I am rather disposed to say that things are good in as far as they are pleasant, if they have no consequences of another sort, and in as far as they are painful they are bad.

I do not know, Socrates, he said, whether I can venture to assert in that unqualified manner that the pleasant is the good and the painful the evil. Having regard not only to my present answer, but also to the whole of my life, I shall be safer, if I am not mistaken, in saying that there are some pleasant things which are not good, and that there are some painful things which are good, and some which are not good, and that there are some which are neither good nor evil.

And you would call pleasant, I said, the things which participate in pleasure or create pleasure?

Certainly, he said.

Then my meaning is, that in as far as they are pleasant they are good; and my question would imply that pleasure is a good in itself.

According to your favourite mode of speech, Socrates, ‘Let us reflect about this,’ he said; and if the reflection is to the point, and the result proves that pleasure and good are really the same, then we will agree; but if not, then we will argue.

And would you wish to begin the enquiry? I said; or shall I begin?

You ought to take the lead, he said; for you are the author of the discussion.

May I employ an illustration? I said. Suppose some one who is enquiring into the health or some other bodily quality of

another: — he looks at his face and at the tips of his fingers, and then he says, Uncover your chest and back to me that I may have a better view: — that is the sort of thing which I desire in this speculation. Having seen what your opinion is about good and pleasure, I am minded to say to you: Uncover your mind to me, Protagoras, and reveal your opinion about knowledge, that I may know whether you agree with the rest of the world. Now the rest of the world are of opinion that knowledge is a principle not of strength, or of rule, or of command: their notion is that a man may have knowledge, and yet that the knowledge which is in him may be overmastered by anger, or pleasure, or pain, or love, or perhaps by fear, — just as if knowledge were a slave, and might be dragged about anyhow. Now is that your view? or do you think that knowledge is a noble and commanding thing, which cannot be overcome, and will not allow a man, if he only knows the difference of good and evil, to do anything which is contrary to knowledge, but that wisdom will have strength to help him?

I agree with you, Socrates, said Protagoras; and not only so, but I, above all other men, am bound to say that wisdom and knowledge are the highest of human things.

Good, I said, and true. But are you aware that the majority of the world are of another mind; and that men are commonly supposed to know the things which are best, and not to do them when they might? And most persons whom I have asked the reason of this have said that when men act contrary to knowledge they are overcome by pain, or pleasure, or some of those affections which I was just now mentioning.

Yes, Socrates, he replied; and that is not the only point about which mankind are in error.

Suppose, then, that you and I endeavour to instruct and inform them what is the nature of this affection which they call ‘being overcome by pleasure,’ and which they affirm to be the reason why they do not always do what is best. When we say to them:

Friends, you are mistaken, and are saying what is not true, they would probably reply: Socrates and Protagoras, if this affection of the soul is not to be called 'being overcome by pleasure,' pray, what is it, and by what name would you describe it?

But why, Socrates, should we trouble ourselves about the opinion of the many, who just say anything that happens to occur to them?

I believe, I said, that they may be of use in helping us to discover how courage is related to the other parts of virtue. If you are disposed to abide by our agreement, that I should show the way in which, as I think, our recent difficulty is most likely to be cleared up, do you follow; but if not, never mind.

You are quite right, he said; and I would have you proceed as you have begun.

Well then, I said, let me suppose that they repeat their question, What account do you give of that which, in our way of speaking, is termed being overcome by pleasure? I should answer thus: Listen, and Protagoras and I will endeavour to show you. When men are overcome by eating and drinking and other sensual desires which are pleasant, and they, knowing them to be evil, nevertheless indulge in them, would you not say that they were overcome by pleasure? They will not deny this. And suppose that you and I were to go on and ask them again: 'In what way do you say that they are evil, — in that they are pleasant and give pleasure at the moment, or because they cause disease and poverty and other like evils in the future? Would they still be evil, if they had no attendant evil consequences, simply because they give the consciousness of pleasure of whatever nature?' — Would they not answer that they are not evil on account of the pleasure which is immediately given by them, but on account of the after consequences — diseases and the like?

I believe, said Protagoras, that the world in general would answer as you do.

And in causing diseases do they not cause pain? and in causing poverty do they not cause pain; — they would agree to that also, if I am not mistaken?

Protagoras assented.

Then I should say to them, in my name and yours: Do you think them evil for any other reason, except because they end in pain and rob us of other pleasures: — there again they would agree?

We both of us thought that they would.

And then I should take the question from the opposite point of view, and say: 'Friends, when you speak of goods being painful, do you not mean remedial goods, such as gymnastic exercises, and military service, and the physician's use of burning, cutting, drugging, and starving? Are these the things which are good but painful?' — they would assent to me?

He agreed.

'And do you call them good because they occasion the greatest immediate suffering and pain; or because, afterwards, they bring health and improvement of the bodily condition and the salvation of states and power over others and wealth?' — they would agree to the latter alternative, if I am not mistaken?

He assented.

'Are these things good for any other reason except that they end in pleasure, and get rid of and avert pain? Are you looking to any other standard but pleasure and pain when you call them good?' — they would acknowledge that they were not?

I think so, said Protagoras.

'And do you not pursue after pleasure as a good, and avoid pain as an evil?'

He assented.

'Then you think that pain is an evil and pleasure is a good: and even pleasure you deem an evil, when it robs you of greater

pleasures than it gives, or causes pains greater than the pleasure. If, however, you call pleasure an evil in relation to some other end or standard, you will be able to show us that standard. But you have none to show.'

I do not think that they have, said Protagoras.

'And have you not a similar way of speaking about pain? You call pain a good when it takes away greater pains than those which it has, or gives pleasures greater than the pains: then if you have some standard other than pleasure and pain to which you refer when you call actual pain a good, you can show what that is. But you cannot.'

True, said Protagoras.

Suppose again, I said, that the world says to me: 'Why do you spend many words and speak in many ways on this subject?' Excuse me, friends, I should reply; but in the first place there is a difficulty in explaining the meaning of the expression 'overcome by pleasure'; and the whole argument turns upon this. And even now, if you see any possible way in which evil can be explained as other than pain, or good as other than pleasure, you may still retract. Are you satisfied, then, at having a life of pleasure which is without pain? If you are, and if you are unable to show any good or evil which does not end in pleasure and pain, hear the consequences: — If what you say is true, then the argument is absurd which affirms that a man often does evil knowingly, when he might abstain, because he is seduced and overpowered by pleasure; or again, when you say that a man knowingly refuses to do what is good because he is overcome at the moment by pleasure. And that this is ridiculous will be evident if only we give up the use of various names, such as pleasant and painful, and good and evil. As there are two things, let us call them by two names — first, good and evil, and then pleasant and painful. Assuming this, let us go on to say that a man does evil knowing that he does evil. But some one will ask, Why? Because he is overcome, is the first answer. And by what

is he overcome? the enquirer will proceed to ask. And we shall not be able to reply 'By pleasure,' for the name of pleasure has been exchanged for that of good. In our answer, then, we shall only say that he is overcome. 'By what?' he will reiterate. By the good, we shall have to reply; indeed we shall. Nay, but our questioner will rejoin with a laugh, if he be one of the swaggering sort, 'That is too ridiculous, that a man should do what he knows to be evil when he ought not, because he is overcome by good. Is that, he will ask, because the good was worthy or not worthy of conquering the evil'? And in answer to that we shall clearly reply, Because it was not worthy; for if it had been worthy, then he who, as we say, was overcome by pleasure, would not have been wrong. 'But how,' he will reply, 'can the good be unworthy of the evil, or the evil of the good'? Is not the real explanation that they are out of proportion to one another, either as greater and smaller, or more and fewer? This we cannot deny. And when you speak of being overcome— 'what do you mean,' he will say, 'but that you choose the greater evil in exchange for the lesser good?' Admitted. And now substitute the names of pleasure and pain for good and evil, and say, not as before, that a man does what is evil knowingly, but that he does what is painful knowingly, and because he is overcome by pleasure, which is unworthy to overcome. What measure is there of the relations of pleasure to pain other than excess and defect, which means that they become greater and smaller, and more and fewer, and differ in degree? For if any one says: 'Yes, Socrates, but immediate pleasure differs widely from future pleasure and pain' — To that I should reply: And do they differ in anything but in pleasure and pain? There can be no other measure of them. And do you, like a skilful weigher, put into the balance the pleasures and the pains, and their nearness and distance, and weigh them, and then say which outweighs the other. If you weigh pleasures against pleasures, you of course take the more and greater; or if you weigh pains against pains, you take the fewer and the less; or if pleasures against pains,

then you choose that course of action in which the painful is exceeded by the pleasant, whether the distant by the near or the near by the distant; and you avoid that course of action in which the pleasant is exceeded by the painful. Would you not admit, my friends, that this is true? I am confident that they cannot deny this.

He agreed with me.

Well then, I shall say, if you agree so far, be so good as to answer me a question: Do not the same magnitudes appear larger to your sight when near, and smaller when at a distance? They will acknowledge that. And the same holds of thickness and number; also sounds, which are in themselves equal, are greater when near, and lesser when at a distance. They will grant that also. Now suppose happiness to consist in doing or choosing the greater, and in not doing or in avoiding the less, what would be the saving principle of human life? Would not the art of measuring be the saving principle; or would the power of appearance? Is not the latter that deceiving art which makes us wander up and down and take the things at one time of which we repent at another, both in our actions and in our choice of things great and small? But the art of measurement would do away with the effect of appearances, and, showing the truth, would fain teach the soul at last to find rest in the truth, and would thus save our life. Would not mankind generally acknowledge that the art which accomplishes this result is the art of measurement?

Yes, he said, the art of measurement.

Suppose, again, the salvation of human life to depend on the choice of odd and even, and on the knowledge of when a man ought to choose the greater or less, either in reference to themselves or to each other, and whether near or at a distance; what would be the saving principle of our lives? Would not knowledge? — a knowledge of measuring, when the question is one of excess and defect, and a knowledge of number, when the

question is of odd and even? The world will assent, will they not?

Protagoras himself thought that they would.

Well then, my friends, I say to them; seeing that the salvation of human life has been found to consist in the right choice of pleasures and pains, — in the choice of the more and the fewer, and the greater and the less, and the nearer and remoter, must not this measuring be a consideration of their excess and defect and equality in relation to each other?

This is undeniably true.

And this, as possessing measure, must undeniably also be an art and science?

They will agree, he said.

The nature of that art or science will be a matter of future consideration; but the existence of such a science furnishes a demonstrative answer to the question which you asked of me and Protagoras. At the time when you asked the question, if you remember, both of us were agreeing that there was nothing mightier than knowledge, and that knowledge, in whatever existing, must have the advantage over pleasure and all other things; and then you said that pleasure often got the advantage even over a man who has knowledge; and we refused to allow this, and you rejoined: O Protagoras and Socrates, what is the meaning of being overcome by pleasure if not this? — tell us what you call such a state: — if we had immediately and at the time answered 'Ignorance,' you would have laughed at us. But now, in laughing at us, you will be laughing at yourselves: for you also admitted that men err in their choice of pleasures and pains; that is, in their choice of good and evil, from defect of knowledge; and you admitted further, that they err, not only from defect of knowledge in general, but of that particular knowledge which is called measuring. And you are also aware that the erring act which is done without knowledge is done in ignorance. This, therefore, is the meaning of being overcome by

pleasure; — ignorance, and that the greatest. And our friends Protagoras and Prodicus and Hippias declare that they are the physicians of ignorance; but you, who are under the mistaken impression that ignorance is not the cause, and that the art of which I am speaking cannot be taught, neither go yourselves, nor send your children, to the Sophists, who are the teachers of these things — you take care of your money and give them none; and the result is, that you are the worse off both in public and private life: — Let us suppose this to be our answer to the world in general: And now I should like to ask you, Hippias, and you, Prodicus, as well as Protagoras (for the argument is to be yours as well as ours), whether you think that I am speaking the truth or not?

They all thought that what I said was entirely true.

Then you agree, I said, that the pleasant is the good, and the painful evil. And here I would beg my friend Prodicus not to introduce his distinction of names, whether he is disposed to say pleasurable, delightful, joyful. However, by whatever name he prefers to call them, I will ask you, most excellent Prodicus, to answer in my sense of the words.

Prodicus laughed and assented, as did the others.

Then, my friends, what do you say to this? Are not all actions honourable and useful, of which the tendency is to make life painless and pleasant? The honourable work is also useful and good?

This was admitted.

Then, I said, if the pleasant is the good, nobody does anything under the idea or conviction that some other thing would be better and is also attainable, when he might do the better. And this inferiority of a man to himself is merely ignorance, as the superiority of a man to himself is wisdom.

They all assented.

And is not ignorance the having a false opinion and being deceived about important matters?

To this also they unanimously assented.

Then, I said, no man voluntarily pursues evil, or that which he thinks to be evil. To prefer evil to good is not in human nature; and when a man is compelled to choose one of two evils, no one will choose the greater when he may have the less.

All of us agreed to every word of this.

Well, I said, there is a certain thing called fear or terror; and here, Prodicus, I should particularly like to know whether you would agree with me in defining this fear or terror as expectation of evil.

Protagoras and Hippias agreed, but Prodicus said that this was fear and not terror.

Never mind, Prodicus, I said; but let me ask whether, if our former assertions are true, a man will pursue that which he fears when he is not compelled? Would not this be in flat contradiction to the admission which has been already made, that he thinks the things which he fears to be evil; and no one will pursue or voluntarily accept that which he thinks to be evil?

That also was universally admitted.

Then, I said, these, Hippias and Prodicus, are our premisses; and I would beg Protagoras to explain to us how he can be right in what he said at first. I do not mean in what he said quite at first, for his first statement, as you may remember, was that whereas there were five parts of virtue none of them was like any other of them; each of them had a separate function. To this, however, I am not referring, but to the assertion which he afterwards made that of the five virtues four were nearly akin to each other, but that the fifth, which was courage, differed greatly from the others. And of this he gave me the following proof. He said: You will find, Socrates, that some of the most

impious, and unrighteous, and intemperate, and ignorant of men are among the most courageous; which proves that courage is very different from the other parts of virtue. I was surprised at his saying this at the time, and I am still more surprised now that I have discussed the matter with you. So I asked him whether by the brave he meant the confident. Yes, he replied, and the impetuous or goers. (You may remember, Protagoras, that this was your answer.)

He assented.

Well then, I said, tell us against what are the courageous ready to go — against the same dangers as the cowards?

No, he answered.

Then against something different?

Yes, he said.

Then do cowards go where there is safety, and the courageous where there is danger?

Yes, Socrates, so men say.

Very true, I said. But I want to know against what do you say that the courageous are ready to go — against dangers, believing them to be dangers, or not against dangers?

No, said he; the former case has been proved by you in the previous argument to be impossible.

That, again, I replied, is quite true. And if this has been rightly proven, then no one goes to meet what he thinks to be dangers, since the want of self-control, which makes men rush into dangers, has been shown to be ignorance.

He assented.

And yet the courageous man and the coward alike go to meet that about which they are confident; so that, in this point of view, the cowardly and the courageous go to meet the same things.

And yet, Socrates, said Protagoras, that to which the coward goes is the opposite of that to which the courageous goes; the one, for example, is ready to go to battle, and the other is not ready.

And is going to battle honourable or disgraceful? I said.

Honourable, he replied.

And if honourable, then already admitted by us to be good; for all honourable actions we have admitted to be good.

That is true; and to that opinion I shall always adhere.

True, I said. But which of the two are they who, as you say, are unwilling to go to war, which is a good and honourable thing?

The cowards, he replied.

And what is good and honourable, I said, is also pleasant?

It has certainly been acknowledged to be so, he replied.

And do the cowards knowingly refuse to go to the nobler, and pleasanter, and better?

The admission of that, he replied, would belie our former admissions.

But does not the courageous man also go to meet the better, and pleasanter, and nobler?

That must be admitted.

And the courageous man has no base fear or base confidence?

True, he replied.

And if not base, then honourable?

He admitted this.

And if honourable, then good?

Yes.

But the fear and confidence of the coward or foolhardy or madman, on the contrary, are base?

He assented.

And these base fears and confidences originate in ignorance and uninstructedness?

True, he said.

Then as to the motive from which the cowards act, do you call it cowardice or courage?

I should say cowardice, he replied.

And have they not been shown to be cowards through their ignorance of dangers?

Assuredly, he said.

And because of that ignorance they are cowards?

He assented.

And the reason why they are cowards is admitted by you to be cowardice?

He again assented.

Then the ignorance of what is and is not dangerous is cowardice?

He nodded assent.

But surely courage, I said, is opposed to cowardice?

Yes.

Then the wisdom which knows what are and are not dangers is opposed to the ignorance of them?

To that again he nodded assent.

And the ignorance of them is cowardice?

To that he very reluctantly nodded assent.

And the knowledge of that which is and is not dangerous is courage, and is opposed to the ignorance of these things?

At this point he would no longer nod assent, but was silent.

And why, I said, do you neither assent nor dissent, Protagoras?

Finish the argument by yourself, he said.

I only want to ask one more question, I said. I want to know whether you still think that there are men who are most ignorant and yet most courageous?

You seem to have a great ambition to make me answer, Socrates, and therefore I will gratify you, and say, that this appears to me to be impossible consistently with the argument.

My only object, I said, in continuing the discussion, has been the desire to ascertain the nature and relations of virtue; for if this were clear, I am very sure that the other controversy which has been carried on at great length by both of us — you affirming and I denying that virtue can be taught — would also become clear. The result of our discussion appears to me to be singular. For if the argument had a human voice, that voice would be heard laughing at us and saying: 'Protagoras and Socrates, you are strange beings; there are you, Socrates, who were saying that virtue cannot be taught, contradicting yourself now by your attempt to prove that all things are knowledge, including justice, and temperance, and courage, — which tends to show that virtue can certainly be taught; for if virtue were other than knowledge, as Protagoras attempted to prove, then clearly virtue cannot be taught; but if virtue is entirely knowledge, as you are seeking to show, then I cannot but suppose that virtue is capable of being taught. Protagoras, on the other hand, who started by saying that it might be taught, is now eager to prove it to be anything rather than knowledge; and if this is true, it must be quite incapable of being taught.' Now I, Protagoras, perceiving this terrible confusion of our ideas, have a great desire that they should be cleared up. And I should like to carry

on the discussion until we ascertain what virtue is, whether capable of being taught or not, lest haply Epimetheus should trip us up and deceive us in the argument, as he forgot us in the story; I prefer your Prometheus to your Epimetheus, for of him I make use, whenever I am busy about these questions, in Promethean care of my own life. And if you have no objection, as I said at first, I should like to have your help in the enquiry.

Protagoras replied: Socrates, I am not of a base nature, and I am the last man in the world to be envious. I cannot but applaud your energy and your conduct of an argument. As I have often said, I admire you above all men whom I know, and far above all men of your age; and I believe that you will become very eminent in philosophy. Let us come back to the subject at some future time; at present we had better turn to something else.

By all means, I said, if that is your wish; for I too ought long since to have kept the engagement of which I spoke before, and only tarried because I could not refuse the request of the noble Callias. So the conversation ended, and we went our way.

Theages

ΘΕΑΓΗΣ

Socrates: But I am indeed at leisure, and very much at your service. You have my permission therefore to speak, if you to fay any thing.[1]

[1] Tndetd the Athenians were vanquished at Ephesus. Xenoph. lib. i. Hence Plutarch says, in the life of A\;bi:ides, that the army of Thrasyllus was terribly gassed under the walls of Ephesus; and that in memory of this defeat the Ephesians erccted a trophy of brass, to the shame of the Athenians.—Dacier.

Demodocus: Are you willing therefore that we should retire from this place into the porch of Jupiter Eleutherius, which is very near?

Demodocus: Let us go then, Socrates. All plants, whatever is produced from the earth, other animals, and man, appear to subsist after the same manner. For in plants this thing is easy to such of us as cultivate the earth, viz. to prepare every thing prior to planting, and the planting itself; but when that which is planted lives, then the attention which the plant requires is great and very difficult. The same thing also appears to take place respecting men. For I form a conjecture of other things from my own affairs. For of this my son, the planting, or the procreating, or whatever else it may be requisite to call it, is the easiest of all things; but his education is difficult, and occasions one to be in continual fear about him. With respect to other things, therefore, much might be said; but the desire which he now possesses very much terrifies me. It is not indeed ignoble, but it is dangerous. For he desires, Socrates, as he says, to become a wise man. And as it appears to me, certain plebeians

of the same age with him, coming to this city, and re v. y pea ting

certain discourses which they have heard, have very much disturbed him. Of these he is emulous, and some time ago was troublesome to me, thinking it fit that should pay attention to him, and give a sum of money to some one of the sophists, who might make him a wise man. I am not indeed much concerned about the expense; but I think that the his pursuit will lead him into no small danger. Hitherto, therefore, I have retrained by soothing him; but as I am no longer able to effects this, I have thought it bet to comply with his wishes, left by frequently associating with others without me he should be corrupted. Hence I am come for this very purpose, that I may place him with some one of those who appear to be sophists. Our meeting with you, therefore, is a fortunate circumstance: for as am going to engage in affairs of this kind, I wish very much to consult you about them. If then you b^ve any advice to give respecting what you have heard from me, it is both lawful and proper for you to give it.

Socrates: Coutifel, however, O Demodocus, is said to be a sacred thing. If therefore any other thing whatever is sacred, this will be so which is now the object of your consultation: for it is not possible for man to consult about any thing more divine than about the erudition of himself and of those that belong to him. In the first place, therefore, you and I should mutually agree, what we think this thing to be about which we consult; left I should frequently apprehend it to be one thing, and you another, and afterwards very much dissenting from each other in our conference, we should perceive ourselves to be ridiculous: I who give, and you who request, advice not agreeing in anyone thing.

Demodocus: You appear to me, Socrates, to speak rightly, and it is proper so to do.

Socrates: I do fay right, and yet not entirely, since I make an alteration in a certain trifling particular: for I am thinking that perhaps this youth may not desire that which we think he desires, but something else. And if something else is the object of his wishes, we shall adl absurdly in consulting about that which is different from them. It appears therefore to me to be mod right to begin by inquiring of him what it is which he desires.

Demodocus: It appears indeed, as you fay, to be belt to do so.

Socrates: But tell me what the name is of this fine youth: what must we call him?

Demodocus: His name, Socrates, is Theages.

Socrates: You have given to your son, O Demodocus, a beautiful and sacred name. But tell us, O Theages, do you lay that you desire to become a wise man, and do you think it is fit that this your father should find out a man, who by associating with you may make you wile.

Socrates: But whether do you call those men wise, who are scientifically knowing, whatever that may be about which they possess this knowledge; or do you call those wise who do not possess scientific knowledge?

Socrates: What then? Has not your father taught and instructed you in those things, in which others here are instructed who are the Tons of respect£table fathers; viz. letters, to play on the harp, to wrestle, and other exercises?

Socrates: Do you think, then, that there is Bill a certain science wanting, which it is proper your father should pay attention to for your lake?

Socrates: What is it? Tell us also, that we may gratify you.

Theaetetus: My father also knows what it is, Socrates: for I have often mentioned it to him. But he designedly says these things to you, as if he did not know what desire; for in other things also he

similarly opposes me, and is not willing to place me with any one,

Socrates: But all that you have hitherto said to him has been said without witnesses: now therefore make me a witness, and before me lay what the wisdom is which you desire: for come now, if you should desire that wis. dom by which men steer Ships, and should alk you, O Theages, what is the wisdom, of which being in want, you blame your father as unwilling to place you with a man through whom you might become wise? what answer would you give me? What would you fay this wisdom is? Is it not that of piloting?

Socrates: But if you desired to be wise according to that wisdom by which they drive chariots, and afterwards blamed your father, on my asking you what this wisdom is, what answer would you give me? Would you not fay it is the charioteering art?

Socrates: But with respect to the wisdom which you now desire, whether is it without a name, or has it a name?

Socrates: Whether therefore do you know the thing itself, but not its name? Or do you also know its name?

Theaetetus: What other name, Socrates, can any one fay it has than that of wisdom?

Socrates: Is not then the charioteering art also wisdom? Or does it appear to you to be ignorance?

Socrates: What is the ufo of it? Is it not that we may know how to manage horses when yoked to a chariot?

Socrates: Is not therefore the piloting art also wisdom?

Socrates: Is it not that by. which we know how to manage ships?

Socrates: But what is the wisdom of which you are desirous B Or, what ia that which, when we obtain it, we shall know how to govern?

Theaetetus: To me it appears to be that by which we know how to govern men.

Socrates: For that wisdom is the medicinal art. Is it not?

Socrates: Is it that, then, by which we know how to regulate fingers in choirs?

Socrates: But is it that by which we know how to govern those that in gymnastic exercises?

Socrates: Is it the wisdom by which those who do something effect their purpose? Endeavour to tell me, in the same manner as I have told you above.

Theaetetus: It appears to me to be that wisdom by which we know how to> govern those in a city.

Socrates: Are there not, therefore, in a city also those that are sick?

Theaetetus: Yes: but I do not speak of these only, but also of others in the city.

Socrates: I understand then the art of which you speak. For you appear t<» me not to fay, that it is that art by which we know how to govern mowers* vine-dressers, ploughmen, sowers, and threshers: for that by which we know how to govern these is agriculture. Is it not?

Socrates: Nor is it that by which we know how to govern those that handle the saw, the plane, and the lathe; for this belongs to the carpenter’s art* Does it not?

Socrates: But perhaps you speak of that wisdom by which we these* viz. husbandmen, carpenters, all artificers, and private persons, both men and women.

Theaetetus: It is this wisdom, Socrates, of which I wished to time ago.

Socrates: Are you, therefore, disposed to fay that _ 3 who flew Agamemnon in Argos, had dominion over these things of which

you speak* viz. all artificers and private persons, both men and women, or over certain other things?

Theaetetus: He only had dominion over such as these.

Socrates: But what? Did not Peleus, the son of Aeacus, have dominion over these very things in Phthia?

Socrates: And have you not heard that Periander, the son of Cypfelus, governed

Socrates: And did he not rule over these very same things in his city?

Socrates: But what? Do you not think that Archelaus, the son of Perdiccas, who lately governed in Macedonia, had dominion over these very things?

Socrates: But over what things do you think Hippias, the son of Pifdlratus, who rules in this city, has dominion? Is it not over these things?

Socrates: Can you tell me, then, what Bacis and the Sibyl, and our Amphilytus, are called?

Theaetetus: What else, Socrates, than diviners?

Socrates: You speak rightly. Endeavour, therefore, also to tell me what name you give to Hippias and Periander through the same dominion?

Theaetetus: 1 think they are tyrants: for what else can they be called?

Socrates: Whoever, therefore, desires to have dominion over all the men in the city, desires this very same dominion, the tyrannic, and to be a tyrant,

Socrates: Do you therefore lay that you desire this dominion?

Theaetetus: It seems so from what I have said.

Socrates: O you wicked one! Do you desire to over us? And did you same time ago blame your father because he did not lend

you to some tyrannic preceptor? And ate not you, O Demodocus, ashamed; who, having for some time known what your son desires, and having likewise the

* It was five or six years before. He was kilted at the end of this very

* Hippias, the son of Pififlratus, was tyrant of Athens four years. According to Thucydidea be succeeded his father, and not Hipparchus. After he had reigned four years he was and twenty years after his exile was slain at the battle of Marathon, where he bore arms for the Persians.—Dacier.

3 Bacis was a prophet, who, long before Xerxes made a descent into Greece, predicted to the people all that would befall them. Herodotus relates some of his prophecies in his 8th book, and considers them to be so formal and plain, since their accomplishment, that he says he nei. ther dares accuse those oracles of falsehood himself, nor suffer others to do so, or to refuse to give credit to them. Arifiophanes speaks of this prophet ia his comedy of Peace.—Dacier.

ability of sending him to be made that artist in wisdom which he aspires to be, have, notwithstanding, envied him this object of his wishes, and have not been willing to fend him to obtain it? Now, however, since he a cu r es you before me, let us consult in common, you and I, whither we should fend him; and through associating with whom he may become a wise tyrant.'

Demodocus: Let us indeed, by Jupiter, Socrates, consult: for it appears to me that no despicable counsel is requisite about this affair.

Socrates: Permit us first, O good man, to make inquiry of him sufficiently. Dem. Interrogate him.

Socrates: What then, O Theages, if we should make use of Euripides? For he somewhere says.

Tyrants are wise that with the wise converse.

If, therefore, some one should ask Euripides, In what, O Euripides, do you fay tyrants become wise by the conversation of the wise? just as if he had said,

Farmers are wise that with the wise converse j

and we should ask him. In what are they rendered wise? What answer would he give us? Would he reply that they are rendered wise in any thing else than in things pertaining to agriculture?

Wise are the cooks that with the wise converse •,

and we should ask him, In what they become wise? What do you think he would answer? Would it not be, that they become wise in things pertaining to cooking?

Wrestlers are wise that with the wise converse:

and we should ask him. In what they are rendered wise? Would he not fay in things pertaining to wrestling?

Tyrants are wise that with the wise converse:

if we should ask him, In what do you fay they become wise, O Euripides? What would be his

Socrates: Are you willing, then, I should tell you?

Socrates: These are the things which Anacreon, says Callicrete r, knew. Or are you not acquainted with the verse?

Socrates: What then? Do you a'lso desire to associate with a man of this kind, who possesses the same art with Callicrete the daughter of Cyane, and who knows tyrannic concerns, in the same manner as the poet says she did; and this, that you may become a tyrant to us and the city?

Theaetetus: You have for some time, Socrates, derided and jested with me.

Socrates: But what? Do you not fay that you desire this wisdom, by which you may have dominion over all the citizens? And doing this, will you be any thing else than a tyrant?

Theaetetus: I think, indeed, that I should pray to become the tyrant of all men, or, if not of all, of the greater part; and I think that you, and all other men, would do the same. Or, perhaps, you would rather pray that you might become a god 3. But I did not fay that / desired this.

Socrates: But what then, after all, is this which you desire? Do you not fay that you desire to govern the citizens?

Theaetetus: Not by violence, nor as tyrants do; but I desire to govern the willing, in the same manner as other excellent men in the city,

Socrates: Do you speak of such men as Themistocles, and Pericles, and Ci■mon, and such as were skilful in political affairs?

1 This was a virgin who employed herself in teaching politics, as Aspasia, Diotima, and some others, did after her. The verses which Anacreon made on her are

» Theages here alludes to what Socrates was wont to fay, that men mould endeavour to become similar to divinity.

Theaetetus: By Jupiter, I speak of these.

Socrates: What then, if you desired to become wise in equestrian affairs, would you obtain the object of your wish, by going to any other than those who are Skilled in the management of horses?

Socrates: But you would go to these very men who are skilled in these things, who possess horses, and who continually use both their own and many that are the property of others.

Socrates: But what! If you desired to become wise in things pertaining to the throwing of darts, would you not go to those who are skilled in these affairs, and who continually use many darts, both those belonging to others and their own?

Socrates: Tell me then, since you wish to become wise in political affairs, do you think you will become wise by going to

any others than these politicians, who are skilful in political affairs, who continually use their own city, and many others, and who are conversant both with Grecian and Barbarian cities? Or do you think, that by associating with certain other persons you will become wise in those things in which they are wile, but not in these very things?

Theaetetus: I have heard assertions, which they fay are yours; that the sons of these political men are in no respect better than the sons of shoe-makers: and you appear to me to have spoken most truly, from what I am able to perceive. I should be stupid, therefore, if I should think that any one of these could impart to me his wisdom, when he cannot in any respect benefit his own foil; or if I should suppose that he could in these things benefit any other man.

Socrates: What then would you do, O best of men, if you had a son who caused you molestation of this kind; and who should fay that he desired to become a good painter; and should blame you, his father, becaus'e you are not willing to be at any expense for the fake of these things; while he, on the other hand, despised those artists, the painters, and was unwilling to learn from them; or, if he acted in this manner towards pipers or harpers, being at the same time desirous to become a piper or harper? What would

you do with him, and where would you fend him, being thus unwilling to learn from these persons?

Socrates: Now, therefore, doing these very things to your father, can you •wonder at and blame him, if he is dubious what he (should do with you, and where he (should feud you? For, if you are willing, he will immediately place you with those Athenians that are most (killed in political affairs: and with these you will not be at any expense, and at the lame time will be much more generally renowned than by associating with any others.

Theaetetus: What then, Socrates; are not you among the number of excellent and worthy men? For if you are willing to associate with me, it is sufficient, and I (hall seek for no other.

Demodocus: O Socrates, he does not speak badly; and at the same time by doing this you will gratify me. For there is not any thing which I (should ■consider to be a greater gain, than for my (on to be pleased with your conversation; and for you to be willing to associate with him. And indeed I am ashamed to fay how very much I wi(h this to take place. I therefore entreat both of you; you, Socrates, that you will be willing to associate with him; and you, my son, that you do not seek to associate with any other than Socrates; and you will thus liberate me from many and dreadful cares. For I now very much fear left my son (should meet with some other person who may corrupt him.

Theaetetus: You need not fear any longer, O father, forme, if you can but persuade Socrates to permit me to associate with him.

Demodocus: You (peak very well. And after this, all the conversation, Socrates, will be directed to you. For I am ready, in (hort, to give up myself to you, and whatever is most dear to me that you may require, if you will love this my Theages, and benefit him to the utmost of your ability.

Socrates: O Demodocus, I do not wonder that you are so importunate, if you think that your son can be especially benefited by me. For I do not know any thing about which he who is endued with intellect ought to be more anxious, than how his son may become the best of men. But whence it has appeared to you that I am more able to assist your son in becoming a

good citizen, than you yourself, and whence you have thought that I can benefit him more than you,l very much wonder. For you, in the fir ft place, are older than I am; and in the next place, you have exercised the principal offices among the Athenians; nor is any one more honoured than you by the Anagyrufian

populace and the rest of the city. But neither of you one of these things in me. If Thea^es, here, despises the with political men, and seeks after certain others who profess togive instruction, there and here, Prodicus of Ceos, Gorgias the Leontine, Bolus the Agrigentine, and many others, who are fb wise, that going into cities they persuade the noblest and mod wealthy of the youth, who are permitted to associate gratis with any one of the citizens they persuade these, I fay, to renounce those of their own city, and adhere though the youth give them a confTderable sum of money, and thanks besides, for their instruction. It is fit, therefore, that you and your Ion should choose some one of these; but it is not fit that you should choose met for I know none of these blessed and beautiful disciplines; though I with £ did; but I always profess to know nothing, as I may fay, except a certain small discipline of amatory affairs. In this discipline, I acknowledge myself to be more skilful than any one of the past or present age.

Theaetetus: Do you not see, O father, that Socrates does not appear to be very ■willing to associate with me. For, as to myself, I am ready, if he is willing; but he says these things in jest to us. For I know some of the same myself, and others who are a little older, who before they were familiar with him were of no worth, but when they associated with him, in a very little time appeared to be the best of all men, and surpassed those to whom they were before inferior.

Socrates: Do you know, therefore, O foil of Demodocus, how this comes to pass?

Theaetetus: Yes, by Jupiter, I do; and if you were willing, I also should become such as they were,

Socrates: Not so, O excellent youth; but you are ignorant in what manner this takes place. However, I will tell you how it happens;—There is a certain power which has followed me by a divine allotment from

•This passage incontestably proves that the daemon of Socrates was not the intellect of that

childhood. This is a voice, which when it takes place always signifies to me that I should abandon what I am about to do; but it never at any rime incites me. And, if any one of my friends communicates any thing to me, and I hear the voice, it dissuades me from this thing, and does not suffer me to do it. Of these things I will adduce to you witnesses: You know the beautiful Charmides, the sou of Glauco; he once came to me, in order to communicate to me his intention of contending in the Nemcan games*; and immediately, on his beginning to tell me that he meant to contend, heard the voice. And I forbade him, and said. While you was speaking to me, I heard the voice of the demoniacal power; do not, therefore, contend. Perhaps, said he, the voice signified to you that I should not conquer; but, though I should not be victorious, yet by exercising myself at this time I shall be benefited. Having thus spoken, he engaged in the contest. It is worth while, therefore, to inquire of him what happened to him from contending in these game-. If you are willing also, isk Clitomachus, the brother of Timarchus 2, what Timurcfius said to him when he was about to die, for having despised the admonition of the power. For he and Euathlus, who was famous for running races, and who received Timarchus when he fled, will tell you what he then said.

Socrates: O Clitomachus, laid he, I indeed am now going to die, because f was unwilling to be persuaded by Socrates. But why Timarchus said this I will tell you. When Timarchus rose from the banquet, together with Philemon the son of Philemonides, in order to kill Nicias the foil of Herofcomander, for none but they two were in the conspiracy,—Timarchus, as he rose, said to me. What do you fay, Socrates? Do you indeed continue drinking; but it is necessary that I should depart. I will, however, return shortly, if I can. I then heard the voice, and I said to him, By no means should

philosopher, nor any part of his soul, as has been asserted by some moderns in the writings and philosophy of Plato, for a full account of this see the note at the beginning of the Alcibiades.

' One of the four famous games of Greece, which were celebrated once in three years.

’ I suppose this is Timarchus of Cheronea, who desired to be interred near one of the sons of Socrates, who died a list+e before. I could never find any of this history elsewhere.—Dacier.

you leave us; for I have heard the accustomed demoniacal signal. Upon this he slayed; and having remained with us for a time, he again rose up to depart, and said, Socrates, I am going: and again I heard the voice. Again, therefore, I compelled him to slay. The third time wishing to escape me unnoticed, he rose without saying any thing to me, when my attention was otherwise engaged, and thus departing he did that which was the cause of his death. Whence he said this to his brother, which I have now told you, viz. that he was going to die, because he would not believe me. Further still, you may also learn from many in Sicily, what I said concerning the destruction of the army. And with respect to things that are part, you may hear them from those that know them; but you may now make trial of the demoniacal signal, if it says any thing to the purpos'e. For Sannion, the son of Casus, is gone to the army; and on his going, I heard the signal. But he is now gone with Thrasyllus', in order to w T age war immediately with Ephesus and Tonia; and I think that he will either die, or that some misfortune will befall him. And I very much fear’ for the rest of the enterprise. I have said all these things to you, because this power of the demon is able to effect every thing with respect to the conversations of those that associate with me. For it is adverse to many, nor can those be benefited by associating with me whom the demon opposes: so that it is not possible for me to live with these. With many, however, he does not prevent me from conversing; and yet they

are not all benefited by associating with me. But those whose conversation with me is favoured by the power of the demon, these are they whom you have noticed: for in a short time they make a proficiency. And of these, some possess this advantage with firmness and stability; but many, as long as they are with me, advance in a wonderful manner, but whi n they leave me, they again differ in no respect from other men. This Aristides, the son of Lysimachus and grandson of Aristides, once experienced: for, associating with me, he made a very great proficiency in a short

1 Thrafyllos was chosen genera! with Thrasybulus, the fourth year of the ninety-second Olympiad. —Dacier.

time; but afterwards he failed from hence, in order to engage in some military expedition. When he returned, he sound Thucydides, the son of Melefias and grandson of Thucydides 1, associating with me. But this Thucydides, the day before, had quarrelled with me in a certain conference. Aristides, therefore, seeing me, after he had saluted me, and some conversation had passed between us, said,—I hear, Socrates, that Thucydides thinks highly of himself, with respect to some things, and is angry with you, as if he were an extraordinary person. It is so, said I. But what? said he, does he not know what a (lave he was before he associated with you? It does not seem that he does, said I, by the gods. But a ridiculous circumstance, said he, has happened to me, Socrates. What is it, said I. It is this, laid he, that before I went to the army, I was able to converse with any man whoever he might be, nor did I appear to be inferior to any one in argument, so that I sought after the company of the most elegant men; but now, on the contrary, I Shun any one whom I perceive to be learned, so ashamed am I of my own vileness. But, said 1, whether did this power leave you suddenly, or by degrees F By degrees, he replied. When was it present with you, said I? Was it present while you was learning something from me, or was it in some other way? I will tell you, said he,

Socrates, a thing incredible indeed, by the gods, but true: for I never, at any time, learnt any thing from you, as you know, but I made a proficiency when I associated with you, even if I was only in the same house that you were, though not in the same room; but my proficiency was greater when I was in the same room with you. I also appeared to myself to improve much more when, being in the same room with you, I looked at you when you spoke, than, when I looked another way. But I made by far the greatest proficiency when I sat near you and touched you. Now, however, said he, all that habit has entirely fled. Such, therefore, O Theages, is the association with me: for if it pleases divinity, you will make a very great and rapid proficiency; but you will not, if he does not please. See then, whether it is not safer for you to be instructed by some one of those who have power over the benefit which they impart to men, than by me who benefit, or not, just as it may happen.

This grandson of Thucydides rivalled Pericles in the government.

Theaetetus: It appears to me, therefore, Socrates, that we (should aft in this manner, viz. that we (should make trial of this demoniacal power by together. And, if he is favourable to us, the best consequences will ensue; but if he is not, then let us immediately consult what is to be done, whether we (should associate with some other, or endeavour to appease the divine power, that is present with you, by prayers and (sacrifices, or any other means which our diviners teach.

Demodocus: Do not oppose the lad any longer, Socrates, in these things: for Theages speaks well.

Soc, If it appears proper thus to aft, let us do (o.

Laches

ΛΑΧΗΣ

Lysimachus, son of Aristides.

Melesias, son of Thucydides.

Their sons.

Nicias, Laches, Socrates.

Lysimachus: You have seen the exhibition of the man fighting in armour, Nicias and Laches, but we did not tell you at the time the reason why my friend Melesias and I asked you to go with us and see him. I think that we may as well confess what this was, for we certainly ought not to have any reserve with you. The reason was, that we were intending to ask your advice. Some laugh at the very notion of advising others, and when they are asked will not say what they think. They guess at the wishes of the person who asks them, and answer according to his, and not according to their own, opinion. But as we know that you are good judges, and will say exactly what you think, we have taken you into our counsels. The matter about which I am making all this preface is as follows: Melesias and I have two sons; that is his son, and he is named Thucydides, after his grandfather; and this is mine, who is also called after his grandfather, Aristides. Now, we are resolved to take the greatest care of the youths, and not to let them run about as they like, which is too often the way with the young, when they are no longer children, but to begin at once and do the utmost that we can for them. And knowing you to have sons of your own, we thought that you were most likely to have attended to their training and

improvement, and, if perchance you have not attended to them, we may remind you that you ought to have done so, and would invite you to assist us in the fulfilment of a common duty. I will tell you, Nicias and Laches, even at the risk of being tedious, how we came to think of this. Melesias and I live together, and our sons live with us; and now, as I was saying at first, we are going to confess to you. Both of us often talk to the lads about the many noble deeds which our own fathers did in war and peace — in the management of the allies, and in the administration of the city; but neither of us has any deeds of his own which he can show. The truth is that we are ashamed of this contrast being seen by them, and we blame our fathers for letting us be spoiled in the days of our youth, while they were occupied with the concerns of others; and we urge all this upon the lads, pointing out to them that they will not grow up to honour if they are rebellious and take no pains about themselves; but that if they take pains they may, perhaps, become worthy of the names which they bear. They, on their part, promise to comply with our wishes; and our care is to discover what studies or pursuits are likely to be most improving to them. Some one commended to us the art of fighting in armour, which he thought an excellent accomplishment for a young man to learn; and he praised the man whose exhibition you have seen, and told us to go and see him. And we determined that we would go, and get you to accompany us; and we were intending at the same time, if you did not object, to take counsel with you about the education of our sons. That is the matter which we wanted to talk over with you; and we hope that you will give us your opinion about this art of fighting in armour, and about any other studies or pursuits which may or may not be desirable for a young man to learn. Please to say whether you agree to our proposal.

Nicias: As far as I am concerned, Lysimachus and Melesias, I applaud your purpose, and will gladly assist you; and I believe that you, Laches, will be equally glad.

Laches: Certainly, Nicias; and I quite approve of the remark which Lysimachus made about his own father and the father of Melesias, and which is applicable, not only to them, but to us, and to every one who is occupied with public affairs. As he says, such persons are too apt to be negligent and careless of their own children and their private concerns. There is much truth in that remark of yours, Lysimachus. But why, instead of consulting us, do you not consult our friend Socrates about the education of the youths? He is of the same deme with you, and is always passing his time in places where the youth have any noble study or pursuit, such as you are enquiring after.

Lysimachus: Why, Laches, has Socrates ever attended to matters of this sort?

Laches: Certainly, Lysimachus.

Nicias: That I have the means of knowing as well as Laches; for quite lately he supplied me with a teacher of music for my sons, — Damon, the disciple of Agathocles, who is a most accomplished man in every way, as well as a musician, and a companion of inestimable value for young men at their age.

Lysimachus: Those who have reached my time of life, Socrates and Nicias and Laches, fall out of acquaintance with the young, because they are generally detained at home by old age; but you, O son of Sophroniscus, should let your fellow demesman have the benefit of any advice which you are able to give. Moreover I have a claim upon you as an old friend of your father; for I and he were always companions and friends, and to the hour of his death there never was a difference between us; and now it comes back to me, at the mention of your name, that I have heard these lads talking to one another at home, and often speaking of Socrates in terms of the highest praise; but I have never thought to ask them whether the son of Sophroniscus was the person whom they meant. Tell me, my boys, whether this is the Socrates of whom you have often spoken?

Son: Certainly, father, this is he.

Lysimachus: I am delighted to hear, Socrates, that you maintain the name of your father, who was a most excellent man; and I further rejoice at the prospect of our family ties being renewed.

Laches: Indeed, Lysimachus, you ought not to give him up; for I can assure you that I have seen him maintaining, not only his father's, but also his country's name. He was my companion in the retreat from Delium, and I can tell you that if others had only been like him, the honour of our country would have been upheld, and the great defeat would never have occurred.

Lysimachus: That is very high praise which is accorded to you, Socrates, by faithful witnesses and for actions like those which they praise. Let me tell you the pleasure which I feel in hearing of your fame; and I hope that you will regard me as one of your warmest friends. You ought to have visited us long ago, and made yourself at home with us; but now, from this day forward, as we have at last found one another out, do as I say — come and make acquaintance with me, and with these young men, that I may continue your friend, as I was your father's. I shall expect you to do so, and shall venture at some future time to remind you of your duty. But what say you of the matter of which we were beginning to speak — the art of fighting in armour? Is that a practice in which the lads may be advantageously instructed?

Socrates: I will endeavour to advise you, Lysimachus, as far as I can in this matter, and also in every way will comply with your wishes; but as I am younger and not so experienced, I think that I ought certainly to hear first what my elders have to say, and to learn of them, and if I have anything to add, then I may venture to give my opinion to them as well as to you. Suppose, Nicias, that one or other of you begin.

Nicias: I have no objection, Socrates; and my opinion is that the acquirement of this art is in many ways useful to young men. It

is an advantage to them that among the favourite amusements of their leisure hours they should have one which tends to improve and not to injure their bodily health. No gymnastics could be better or harder exercise; and this, and the art of riding, are of all arts most befitting to a freeman; for they only who are thus trained in the use of arms are the athletes of our military profession, trained in that on which the conflict turns. Moreover in actual battle, when you have to fight in a line with a number of others, such an acquirement will be of some use, and will be of the greatest whenever the ranks are broken and you have to fight singly, either in pursuit, when you are attacking some one who is defending himself, or in flight, when you have to defend yourself against an assailant. Certainly he who possessed the art could not meet with any harm at the hands of a single person, or perhaps of several; and in any case he would have a great advantage. Further, this sort of skill inclines a man to the love of other noble lessons; for every man who has learned how to fight in armour will desire to learn the proper arrangement of an army, which is the sequel of the lesson: and when he has learned this, and his ambition is once fired, he will go on to learn the complete art of the general. There is no difficulty in seeing that the knowledge and practice of other military arts will be honourable and valuable to a man; and this lesson may be the beginning of them. Let me add a further advantage, which is by no means a slight one, — that this science will make any man a great deal more valiant and self-possessed in the field. And I will not disdain to mention, what by some may be thought to be a small matter; — he will make a better appearance at the right time; that is to say, at the time when his appearance will strike terror into his enemies. My opinion then, Lysimachus, is, as I say, that the youths should be instructed in this art, and for the reasons which I have given. But Laches may take a different view; and I shall be very glad to hear what he has to say.

Laches: I should not like to maintain, Nicias, that any kind of knowledge is not to be learned; for all knowledge appears to be a good: and if, as Nicias and as the teachers of the art affirm, this use of arms is really a species of knowledge, then it ought to be learned; but if not, and if those who profess to teach it are deceivers only; or if it be knowledge, but not of a valuable sort, then what is the use of learning it? I say this, because I think that if it had been really valuable, the Lacedaemonians, whose whole life is passed in finding out and practising the arts which give them an advantage over other nations in war, would have discovered this one. And even if they had not, still these professors of the art would certainly not have failed to discover that of all the Hellenes the Lacedaemonians have the greatest interest in such matters, and that a master of the art who was honoured among them would be sure to make his fortune among other nations, just as a tragic poet would who is honoured among ourselves; which is the reason why he who fancies that he can write a tragedy does not go about itinerating in the neighbouring states, but rushes hither straight, and exhibits at Athens; and this is natural. Whereas I perceive that these fighters in armour regard Lacedaemon as a sacred inviolable territory, which they do not touch with the point of their foot; but they make a circuit of the neighbouring states, and would rather exhibit to any others than to the Spartans; and particularly to those who would themselves acknowledge that they are by no means first-rate in the arts of war. Further, Lysimachus, I have encountered a good many of these gentlemen in actual service, and have taken their measure, which I can give you at once; for none of these masters of fence have ever been distinguished in war, — there has been a sort of fatality about them; while in all other arts the men of note have been always those who have practised the art, they appear to be a most unfortunate exception. For example, this very Stesilaus, whom you and I have just witnessed exhibiting in all that crowd and making such great professions of his powers, I have seen at

another time making, in sober truth, an involuntary exhibition of himself, which was a far better spectacle. He was a marine on board a ship which struck a transport vessel, and was armed with a weapon, half spear, half scythe; the singularity of this weapon was worthy of the singularity of the man. To make a long story short, I will only tell you what happened to this notable invention of the scythe spear. He was fighting, and the scythe was caught in the rigging of the other ship, and stuck fast; and he tugged, but was unable to get his weapon free. The two ships were passing one another. He first ran along his own ship holding on to the spear; but as the other ship passed by and drew him after as he was holding on, he let the spear slip through his hand until he retained only the end of the handle. The people in the transport clapped their hands, and laughed at his ridiculous figure; and when some one threw a stone, which fell on the deck at his feet, and he quitted his hold of the scythe-spear, the crew of his own trireme also burst out laughing; they could not refrain when they beheld the weapon waving in the air, suspended from the transport. Now I do not deny that there may be something in such an art, as Nicias asserts, but I tell you my experience; and, as I said at first, whether this be an art of which the advantage is so slight, or not an art at all, but only an imposition, in either case such an acquirement is not worth having. For my opinion is, that if the professor of this art be a coward, he will be likely to become rash, and his character will be only more notorious; or if he be brave, and fail ever so little, other men will be on the watch, and he will be greatly traduced; for there is a jealousy of such pretenders; and unless a man be pre-eminent in valour, he cannot help being ridiculous, if he says that he has this sort of skill. Such is my judgment, Lysimachus, of the desirableness of this art; but, as I said at first, ask Socrates, and do not let him go until he has given you his opinion of the matter.

Lysimachus: I am going to ask this favour of you, Socrates; as is the more necessary because the two councillors disagree, and

some one is in a manner still needed who will decide between them. Had they agreed, no arbiter would have been required. But as Laches has voted one way and Nicias another, I should like to hear with which of our two friends you agree.

Socrates: What, Lysimachus, are you going to accept the opinion of the majority?

Lysimachus: Why, yes, Socrates; what else am I to do?

Socrates: And would you do so too, Melesias? If you were deliberating about the gymnastic training of your son, would you follow the advice of the majority of us, or the opinion of the one who had been trained and exercised under a skilful master?

Melesias: The latter, Socrates; as would surely be reasonable.

Socrates: His one vote would be worth more than the vote of all us four?

Melesias: Certainly.

Socrates: And for this reason, as I imagine, — because a good decision is based on knowledge and not on numbers?

Melesias: To be sure.

Socrates: Must we not then first of all ask, whether there is any one of us who has knowledge of that about which we are deliberating? If there is, let us take his advice, though he be one only, and not mind the rest; if there is not, let us seek further counsel. Is this a slight matter about which you and Lysimachus are deliberating? Are you not risking the greatest of your possessions? For children are your riches; and upon their turning out well or ill depends the whole order of their father’s house.

Melesias: That is true.

Socrates: Great care, then, is required in this matter?

Melesias: Certainly.

Socrates: Suppose, as I was just now saying, that we were considering, or wanting to consider, who was the best trainer. Should we not select him who knew and had practised the art, and had the best teachers?

Melesias: I think that we should.

Socrates: But would there not arise a prior question about the nature of the art of which we want to find the masters?

Melesias: I do not understand.

Socrates: Let me try to make my meaning plainer then. I do not think that we have as yet decided what that is about which we are consulting, when we ask which of us is or is not skilled in the art, and has or has not had a teacher of the art.

Nicias: Why, Socrates, is not the question whether young men ought or ought not to learn the art of fighting in armour?

Socrates: Yes, Nicias; but there is also a prior question, which I may illustrate in this way: When a person considers about applying a medicine to the eyes, would you say that he is consulting about the medicine or about the eyes?

Nicias: About the eyes.

Socrates: And when he considers whether he shall set a bridle on a horse and at what time, he is thinking of the horse and not of the bridle?

Nicias: True.

Socrates: And in a word, when he considers anything for the sake of another thing, he thinks of the end and not of the means?

Nicias: Certainly.

Socrates: And when you call in an adviser, you should see whether he too is skilful in the accomplishment of the end which you have in view?

Nicias: Most true.

Socrates: And at present we have in view some knowledge, of which the end is the soul of youth?

Nicias: Yes.

Socrates: And we are enquiring, Which of us is skilful or successful in the treatment of the soul, and which of us has had good teachers?

Laches: Well but, Socrates; did you never observe that some persons, who have had no teachers, are more skilful than those who have, in some things?

Socrates: Yes, Laches, I have observed that; but you would not be very willing to trust them if they only professed to be masters of their art, unless they could show some proof of their skill or excellence in one or more works.

Laches: That is true.

Socrates: And therefore, Laches and Nicias, as Lysimachus and Melesias, in their anxiety to improve the minds of their sons, have asked our advice about them, we too should tell them who our teachers were, if we say that we have had any, and prove them to be in the first place men of merit and experienced trainers of the minds of youth and also to have been really our teachers. Or if any of us says that he has no teacher, but that he has works of his own to show; then he should point out to them what Athenians or strangers, bond or free, he is generally acknowledged to have improved. But if he can show neither teachers nor works, then he should tell them to look out for others; and not run the risk of spoiling the children of friends, and thereby incurring the most formidable accusation which can be brought against any one by those nearest to him. As for myself, Lysimachus and Melesias, I am the first to confess that I have never had a teacher of the art of virtue; although I have always from my earliest youth desired to have one. But I am too poor to give money to the Sophists, who are the only professors

of moral improvement; and to this day I have never been able to discover the art myself, though I should not be surprised if Nicias or Laches may have discovered or learned it; for they are far wealthier than I am, and may therefore have learnt of others. And they are older too; so that they have had more time to make the discovery. And I really believe that they are able to educate a man; for unless they had been confident in their own knowledge, they would never have spoken thus decidedly of the pursuits which are advantageous or hurtful to a young man. I repose confidence in both of them; but I am surprised to find that they differ from one another. And therefore, Lysimachus, as Laches suggested that you should detain me, and not let me go until I answered, I in turn earnestly beseech and advise you to detain Laches and Nicias, and question them. I would have you say to them: Socrates avers that he has no knowledge of the matter — he is unable to decide which of you speaks truly; neither discoverer nor student is he of anything of the kind. But you, Laches and Nicias, should each of you tell us who is the most skilful educator whom you have ever known; and whether you invented the art yourselves, or learned of another; and if you learned, who were your respective teachers, and who were their brothers in the art; and then, if you are too much occupied in politics to teach us yourselves, let us go to them, and present them with gifts, or make interest with them, or both, in the hope that they may be induced to take charge of our children and of yours; and then they will not grow up inferior, and disgrace their ancestors. But if you are yourselves original discoverers in that field, give us some proof of your skill. Who are they who, having been inferior persons, have become under your care good and noble? For if this is your first attempt at education, there is a danger that you may be trying the experiment, not on the ‘vile corpus’ of a Carian slave, but on your own sons, or the sons of your friend, and, as the proverb says, ‘break the large vessel in learning to make pots.’ Tell us then, what qualities you claim or do not claim. Make them tell you that, Lysimachus, and

do not let them off.

Lysimachus: I very much approve of the words of Socrates, my friends; but you, Nicias and Laches, must determine whether you will be questioned, and give an explanation about matters of this sort. Assuredly, I and Melesias would be greatly pleased to hear you answer the questions which Socrates asks, if you will: for I began by saying that we took you into our counsels because we thought that you would have attended to the subject, especially as you have children who, like our own, are nearly of an age to be educated. Well, then, if you have no objection, suppose that you take Socrates into partnership; and do you and he ask and answer one another's questions: for, as he has well said, we are deliberating about the most important of our concerns. I hope that you will see fit to comply with our request.

Nicias: I see very clearly, Lysimachus, that you have only known Socrates' father, and have no acquaintance with Socrates himself: at least, you can only have known him when he was a child, and may have met him among his fellow-wardsmen, in company with his father, at a sacrifice, or at some other gathering. You clearly show that you have never known him since he arrived at manhood.

Lysimachus: Why do you say that, Nicias?

Nicias: Because you seem not to be aware that any one who has an intellectual affinity to Socrates and enters into conversation with him is liable to be drawn into an argument; and whatever subject he may start, he will be continually carried round and round by him, until at last he finds that he has to give an account both of his present and past life; and when he is once entangled, Socrates will not let him go until he has completely and thoroughly sifted him. Now I am used to his ways; and I know that he will certainly do as I say, and also that I myself shall be the sufferer; for I am fond of his conversation, Lysimachus. And I think that there is no harm in being reminded of any wrong thing which we are, or have been, doing: he who

does not fly from reproof will be sure to take more heed of his after-life; as Solon says, he will wish and desire to be learning so long as he lives, and will not think that old age of itself brings wisdom. To me, to be cross-examined by Socrates is neither unusual nor unpleasant; indeed, I knew all along that where Socrates was, the argument would soon pass from our sons to ourselves; and therefore, I say that for my part, I am quite willing to discourse with Socrates in his own manner; but you had better ask our friend Laches what his feeling may be.

Laches: I have but one feeling, Nicias, or (shall I say?) two feelings, about discussions. Some would think that I am a lover, and to others I may seem to be a hater of discourse; for when I hear a man discoursing of virtue, or of any sort of wisdom, who is a true man and worthy of his theme, I am delighted beyond measure: and I compare the man and his words, and note the harmony and correspondence of them. And such an one I deem to be the true musician, attuned to a fairer harmony than that of the lyre, or any pleasant instrument of music; for truly he has in his own life a harmony of words and deeds arranged, not in the Ionian, or in the Phrygian mode, nor yet in the Lydian, but in the true Hellenic mode, which is the Dorian, and no other. Such an one makes me merry with the sound of his voice; and when I hear him I am thought to be a lover of discourse; so eager am I in drinking in his words. But a man whose actions do not agree with his words is an annoyance to me; and the better he speaks the more I hate him, and then I seem to be a hater of discourse. As to Socrates, I have no knowledge of his words, but of old, as would seem, I have had experience of his deeds; and his deeds show that free and noble sentiments are natural to him. And if his words accord, then I am of one mind with him, and shall be delighted to be interrogated by a man such as he is, and shall not be annoyed at having to learn of him: for I too agree with Solon, ‘that I would fain grow old, learning many things.’ But I must be allowed to add ‘of the good only.’ Socrates must be willing to allow that he is a good teacher, or I shall be a dull and

uncongenial pupil: but that the teacher is younger, or not as yet in repute — anything of that sort is of no account with me. And therefore, Socrates, I give you notice that you may teach and confute me as much as ever you like, and also learn of me anything which I know. So high is the opinion which I have entertained of you ever since the day on which you were my companion in danger, and gave a proof of your valour such as only the man of merit can give. Therefore, say whatever you like, and do not mind about the difference of our ages.

Socrates: I cannot say that either of you show any reluctance to take counsel and advise with me.

Lysimachus: But this is our proper business; and yours as well as ours, for I reckon you as one of us. Please then to take my place, and find out from Nicias and Laches what we want to know, for the sake of the youths, and talk and consult with them: for I am old, and my memory is bad; and I do not remember the questions which I am going to ask, or the answers to them; and if there is any interruption I am quite lost. I will therefore beg of you to carry on the proposed discussion by your selves; and I will listen, and Melesias and I will act upon your conclusions.

Socrates: Let us, Nicias and Laches, comply with the request of Lysimachus and Melesias. There will be no harm in asking ourselves the question which was first proposed to us: 'Who have been our own instructors in this sort of training, and whom have we made better?' But the other mode of carrying on the enquiry will bring us equally to the same point, and will be more like proceeding from first principles. For if we knew that the addition of something would improve some other thing, and were able to make the addition, then, clearly, we must know how that about which we are advising may be best and most easily attained. Perhaps you do not understand what I mean. Then let me make my meaning plainer in this way. Suppose we knew that the addition of sight makes better the eyes which possess this gift, and also were able to impart sight to the eyes,

then, clearly, we should know the nature of sight, and should be able to advise how this gift of sight may be best and most easily attained; but if we knew neither what sight is, nor what hearing is, we should not be very good medical advisers about the eyes or the ears, or about the best mode of giving sight and hearing to them.

Laches: That is true, Socrates.

Socrates: And are not our two friends, Laches, at this very moment inviting us to consider in what way the gift of virtue may be imparted to their sons for the improvement of their minds?

Laches: Very true.

Socrates: Then must we not first know the nature of virtue? For how can we advise any one about the best mode of attaining something of which we are wholly ignorant?

Laches: I do not think that we can, Socrates.

Socrates: Then, Laches, we may presume that we know the nature of virtue?

Laches: Yes.

Socrates: And that which we know we must surely be able to tell?

Laches: Certainly.

Socrates: I would not have us begin, my friend, with enquiring about the whole of virtue; for that may be more than we can accomplish; let us first consider whether we have a sufficient knowledge of a part; the enquiry will thus probably be made easier to us.

Laches: Let us do as you say, Socrates.

Socrates: Then which of the parts of virtue shall we select? Must we not select that to which the art of fighting in armour is supposed to conduce? And is not that generally thought to be

courage?

Laches: Yes, certainly.

Socrates: Then, Laches, suppose that we first set about determining the nature of courage, and in the second place proceed to enquire how the young men may attain this quality by the help of studies and pursuits. Tell me, if you can, what is courage.

Laches: Indeed, Socrates, I see no difficulty in answering; he is a man of courage who does not run away, but remains at his post and fights against the enemy; there can be no mistake about that.

Socrates: Very good, Laches; and yet I fear that I did not express myself clearly; and therefore you have answered not the question which I intended to ask, but another.

Laches: What do you mean, Socrates?

Socrates: I will endeavour to explain; you would call a man courageous who remains at his post, and fights with the enemy?

Laches: Certainly I should.

Socrates: And so should I; but what would you say of another man, who fights flying, instead of remaining?

Laches: How flying?

Socrates: Why, as the Scythians are said to fight, flying as well as pursuing; and as Homer says in praise of the horses of Aeneas, that they knew ‘how to pursue, and fly quickly hither and thither’; and he passes an encomium on Aeneas himself, as having a knowledge of fear or flight, and calls him ‘an author of fear or flight.’

Laches: Yes, Socrates, and there Homer is right: for he was speaking of chariots, as you were speaking of the Scythian cavalry, who have that way of fighting; but the heavy-armed Greek fights, as I say, remaining in his rank.

Socrates: And yet, Laches, you must except the Lacedaemonians at Plataea, who, when they came upon the light shields of the Persians, are said not to have been willing to stand and fight, and to have fled; but when the ranks of the Persians were broken, they turned upon them like cavalry, and won the battle of Plataea.

Laches: That is true.

Socrates: That was my meaning when I said that I was to blame in having put my question badly, and that this was the reason of your answering badly. For I meant to ask you not only about the courage of heavy-armed soldiers, but about the courage of cavalry and every other style of soldier; and not only who are courageous in war, but who are courageous in perils by sea, and who in disease, or in poverty, or again in politics, are courageous; and not only who are courageous against pain or fear, but mighty to contend against desires and pleasures, either fixed in their rank or turning upon their enemy. There is this sort of courage — is there not, Laches?

Laches: Certainly, Socrates.

Socrates: And all these are courageous, but some have courage in pleasures, and some in pains: some in desires, and some in fears, and some are cowards under the same conditions, as I should imagine.

Laches: Very true.

Socrates: Now I was asking about courage and cowardice in general. And I will begin with courage, and once more ask, What is that common quality, which is the same in all these cases, and which is called courage? Do you now understand what I mean?

Laches: Not over well.

Socrates: I mean this: As I might ask what is that quality which is called quickness, and which is found in running, in playing the lyre, in speaking, in learning, and in many other similar actions,

or rather which we possess in nearly every action that is worth mentioning of arms, legs, mouth, voice, mind; — would you not apply the term quickness to all of them?

Laches: Quite true.

Socrates: And suppose I were to be asked by some one: What is that common quality, Socrates, which, in all these uses of the word, you call quickness? I should say the quality which accomplishes much in a little time — whether in running, speaking, or in any other sort of action.

Laches: You would be quite correct.

Socrates: And now, Laches, do you try and tell me in like manner, What is that common quality which is called courage, and which includes all the various uses of the term when applied both to pleasure and pain, and in all the cases to which I was just now referring?

Laches: I should say that courage is a sort of endurance of the soul, if I am to speak of the universal nature which pervades them all.

Socrates: But that is what we must do if we are to answer the question. And yet I cannot say that every kind of endurance is, in my opinion, to be deemed courage. Hear my reason: I am sure, Laches, that you would consider courage to be a very noble quality.

Laches: Most noble, certainly.

Socrates: And you would say that a wise endurance is also good and noble?

Laches: Very noble.

Socrates: But what would you say of a foolish endurance? Is not that, on the other hand, to be regarded as evil and hurtful?

Laches: True.

Socrates: And is anything noble which is evil and hurtful?

Laches: I ought not to say that, Socrates.

Socrates: Then you would not admit that sort of endurance to be courage — for it is not noble, but courage is noble?

Laches: You are right.

Socrates: Then, according to you, only the wise endurance is courage?

Laches: True.

Socrates: But as to the epithet 'wise,' — wise in what? In all things small as well as great? For example, if a man shows the quality of endurance in spending his money wisely, knowing that by spending he will acquire more in the end, do you call him courageous?

Laches: Assuredly not.

Socrates: Or, for example, if a man is a physician, and his son, or some patient of his, has inflammation of the lungs, and begs that he may be allowed to eat or drink something, and the other is firm and refuses; is that courage?

Laches: No; that is not courage at all, any more than the last.

Socrates: Again, take the case of one who endures in war, and is willing to fight, and wisely calculates and knows that others will help him, and that there will be fewer and inferior men against him than there are with him; and suppose that he has also advantages of position; would you say of such a one who endures with all this wisdom and preparation, that he, or some man in the opposing army who is in the opposite circumstances to these and yet endures and remains at his post, is the braver?

Laches: I should say that the latter, Socrates, was the braver.

Socrates: But, surely, this is a foolish endurance in comparison with the other?

Laches: That is true.

Socrates: Then you would say that he who in an engagement of cavalry endures, having the knowledge of horsemanship, is not so courageous as he who endures, having no such knowledge?

Laches: So I should say.

Socrates: And he who endures, having a knowledge of the use of the sling, or the bow, or of any other art, is not so courageous as he who endures, not having such a knowledge?

Laches: True.

Socrates: And he who descends into a well, and dives, and holds out in this or any similar action, having no knowledge of diving, or the like, is, as you would say, more courageous than those who have this knowledge?

Laches: Why, Socrates, what else can a man say?

Socrates: Nothing, if that be what he thinks.

Laches: But that is what I do think.

Socrates: And yet men who thus run risks and endure are foolish, Laches, in comparison of those who do the same things, having the skill to do them.

Laches: That is true.

Socrates: But foolish boldness and endurance appeared before to be base and hurtful to us.

Laches: Quite true.

Socrates: Whereas courage was acknowledged to be a noble quality.

Laches: True.

Socrates: And now on the contrary we are saying that the foolish endurance, which was before held in dishonour, is courage.

Laches: Very true.

Socrates: And are we right in saying so?

Laches: Indeed, Socrates, I am sure that we are not right.

Socrates: Then according to your statement, you and I, Laches, are not attuned to the Dorian mode, which is a harmony of words and deeds; for our deeds are not in accordance with our words. Any one would say that we had courage who saw us in action, but not, I imagine, he who heard us talking about courage just now.

Laches: That is most true.

Socrates: And is this condition of ours satisfactory?

Laches: Quite the reverse.

Socrates: Suppose, however, that we admit the principle of which we are speaking to a certain extent.

Laches: To what extent and what principle do you mean?

Socrates: The principle of endurance. We too must endure and persevere in the enquiry, and then courage will not laugh at our faint-heartedness in searching for courage; which after all may, very likely, be endurance.

Laches: I am ready to go on, Socrates; and yet I am unused to investigations of this sort. But the spirit of controversy has been aroused in me by what has been said; and I am really grieved at being thus unable to express my meaning. For I fancy that I do know the nature of courage; but, somehow or other, she has slipped away from me, and I cannot get hold of her and tell her nature.

Socrates: But, my dear friend, should not the good sportsman follow the track, and not be lazy?

Laches: Certainly, he should.

Socrates: And shall we invite Nicias to join us? he may be better at the sport than we are. What do you say?

Laches: I should like that.

Socrates: Come then, Nicias, and do what you can to help your friends, who are tossing on the waves of argument, and at the last gasp: you see our extremity, and may save us and also settle your own opinion, if you will tell us what you think about courage.

Nicias: I have been thinking, Socrates, that you and Laches are not defining courage in the right way; for you have forgotten an excellent saying which I have heard from your own lips.

Socrates: What is it, Nicias?

Nicias: I have often heard you say that 'Every man is good in that in which he is wise, and bad in that in which he is unwise.'

Socrates: That is certainly true, Nicias.

Nicias: And therefore if the brave man is good, he is also wise.

Socrates: Do you hear him, Laches?

Laches: Yes, I hear him, but I do not very well understand him.

Socrates: I think that I understand him; and he appears to me to mean that courage is a sort of wisdom.

Laches: What can he possibly mean, Socrates?

Socrates: That is a question which you must ask of himself.

Laches: Yes.

Socrates: Tell him then, Nicias, what you mean by this wisdom; for you surely do not mean the wisdom which plays the flute?

Nicias: Certainly not.

Socrates: Nor the wisdom which plays the lyre?

Nicias: No.

Socrates: But what is this knowledge then, and of what?

Laches: I think that you put the question to him very well, Socrates; and I would like him to say what is the nature of this knowledge or wisdom.

Nicias: I mean to say, Laches, that courage is the knowledge of that which inspires fear or confidence in war, or in anything.

Laches: How strangely he is talking, Socrates.

Socrates: Why do you say so, Laches?

Laches: Why, surely courage is one thing, and wisdom another.

Socrates: That is just what Nicias denies.

Laches: Yes, that is what he denies; but he is so silly.

Socrates: Suppose that we instruct instead of abusing him?

Nicias: Laches does not want to instruct me, Socrates; but having been proved to be talking nonsense himself, he wants to prove that I have been doing the same.

Laches: Very true, Nicias; and you are talking nonsense, as I shall endeavour to show. Let me ask you a question: Do not physicians know the dangers of disease? or do the courageous know them? or are the physicians the same as the courageous?

Nicias: Not at all.

Laches: No more than the husbandmen who know the dangers of husbandry, or than other craftsmen, who have a knowledge of that which inspires them with fear or confidence in their own arts, and yet they are not courageous a whit the more for that.

Socrates: What is Laches saying, Nicias? He appears to be saying something of importance.

Nicias: Yes, he is saying something, but it is not true.

Socrates: How so?

Nicias: Why, because he does not see that the physician’s knowledge only extends to the nature of health and disease: he can tell the sick man no more than this. Do you imagine, Laches, that the physician knows whether health or disease is the more terrible to a man? Had not many a man better never get up from a sick bed? I should like to know whether you think that life is

always better than death. May not death often be the better of the two?

Laches: Yes certainly so in my opinion.

Nicias: And do you think that the same things are terrible to those who had better die, and to those who had better live?

Laches: Certainly not.

Nicias: And do you suppose that the physician or any other artist knows this, or any one indeed, except he who is skilled in the grounds of fear and hope? And him I call the courageous.

Socrates: Do you understand his meaning, Laches?

Laches: Yes; I suppose that, in his way of speaking, the soothsayers are courageous. For who but one of them can know to whom to die or to live is better? And yet Nicias, would you allow that you are yourself a soothsayer, or are you neither a soothsayer nor courageous?

Nicias: What! do you mean to say that the soothsayer ought to know the grounds of hope or fear?

Laches: Indeed I do: who but he?

Nicias: Much rather I should say he of whom I speak; for the soothsayer ought to know only the signs of things that are about to come to pass, whether death or disease, or loss of property, or victory, or defeat in war, or in any sort of contest; but to whom the suffering or not suffering of these things will be for the best, can no more be decided by the soothsayer than by one who is no soothsayer.

Laches: I cannot understand what Nicias would be at, Socrates; for he represents the courageous man as neither a soothsayer, nor a physician, nor in any other character, unless he means to say that he is a god. My opinion is that he does not like honestly to confess that he is talking nonsense, but that he shuffles up and down in order to conceal the difficulty into which he has got himself. You and I, Socrates, might have practised a similar

shuffle just now, if we had only wanted to avoid the appearance of inconsistency. And if we had been arguing in a court of law there might have been reason in so doing; but why should a man deck himself out with vain words at a meeting of friends such as this?

Socrates: I quite agree with you, Laches, that he should not. But perhaps Nicias is serious, and not merely talking for the sake of talking. Let us ask him just to explain what he means, and if he has reason on his side we will agree with him; if not, we will instruct him.

Laches: Do you, Socrates, if you like, ask him: I think that I have asked enough.

Socrates: I do not see why I should not; and my question will do for both of us.

Laches: Very good.

Socrates: Then tell me, Nicias, or rather tell us, for Laches and I are partners in the argument: Do you mean to affirm that courage is the knowledge of the grounds of hope and fear?

Nicias: I do.

Socrates: And not every man has this knowledge; the physician and the soothsayer have it not; and they will not be courageous unless they acquire it — that is what you were saying?

Nicias: I was.

Socrates: Then this is certainly not a thing which every pig would know, as the proverb says, and therefore he could not be courageous.

Nicias: I think not.

Socrates: Clearly not, Nicias; not even such a big pig as the Crommyonian sow would be called by you courageous. And this I say not as a joke, but because I think that he who assents to your doctrine, that courage is the knowledge of the grounds of

fear and hope, cannot allow that any wild beast is courageous, unless he admits that a lion, or a leopard, or perhaps a boar, or any other animal, has such a degree of wisdom that he knows things which but a few human beings ever know by reason of their difficulty. He who takes your view of courage must affirm that a lion, and a stag, and a bull, and a monkey, have equally little pretensions to courage.

Laches: Capital, Socrates; by the gods, that is truly good. And I hope, Nicias, that you will tell us whether these animals, which we all admit to be courageous, are really wiser than mankind; or whether you will have the boldness, in the face of universal opinion, to deny their courage.

Nicias: Why, Laches, I do not call animals or any other things which have no fear of dangers, because they are ignorant of them, courageous, but only fearless and senseless. Do you imagine that I should call little children courageous, which fear no dangers because they know none? There is a difference, to my way of thinking, between fearlessness and courage. I am of opinion that thoughtful courage is a quality possessed by very few, but that rashness and boldness, and fearlessness, which has no forethought, are very common qualities possessed by many men, many women, many children, many animals. And you, and men in general, call by the term ‘courageous’ actions which I call rash; — my courageous actions are wise actions.

Laches: Behold, Socrates, how admirably, as he thinks, he dresses himself out in words, while seeking to deprive of the honour of courage those whom all the world acknowledges to be courageous.

Nicias: Not so, Laches, but do not be alarmed; for I am quite willing to say of you and also of Lamachus, and of many other Athenians, that you are courageous and therefore wise.

Laches: I could answer that; but I would not have you cast in my teeth that I am a haughty Aexonian.

Socrates: Do not answer him, Laches; I rather fancy that you are not aware of the source from which his wisdom is derived. He has got all this from my friend Damon, and Damon is always with Prodicus, who, of all the Sophists, is considered to be the best puller to pieces of words of this sort.

Laches: Yes, Socrates; and the examination of such niceties is a much more suitable employment for a Sophist than for a great statesman whom the city chooses to preside over her.

Socrates: Yes, my sweet friend, but a great statesman is likely to have a great intelligence. And I think that the view which is implied in Nicias' definition of courage is worthy of examination.

Laches: Then examine for yourself, Socrates.

Socrates: That is what I am going to do, my dear friend. Do not, however, suppose I shall let you out of the partnership; for I shall expect you to apply your mind, and join with me in the consideration of the question.

Laches: I will if you think that I ought.

Socrates: Yes, I do; but I must beg of you, Nicias, to begin again. You remember that we originally considered courage to be a part of virtue.

Nicias: Very true.

Socrates: And you yourself said that it was a part; and there were many other parts, all of which taken together are called virtue.

Nicias: Certainly.

Socrates: Do you agree with me about the parts? For I say that justice, temperance, and the like, are all of them parts of virtue as well as courage. Would you not say the same?

Nicias: Certainly.

Socrates: Well then, so far we are agreed. And now let us proceed a step, and try to arrive at a similar agreement about

the fearful and the hopeful: I do not want you to be thinking one thing and myself another. Let me then tell you my own opinion, and if I am wrong you shall set me right: in my opinion the terrible and the hopeful are the things which do or do not create fear, and fear is not of the present, nor of the past, but is of future and expected evil. Do you not agree to that, Laches?

Laches: Yes, Socrates, entirely.

Socrates: That is my view, Nicias; the terrible things, as I should say, are the evils which are future; and the hopeful are the good or not evil things which are future. Do you or do you not agree with me?

Nicias: I agree.

Socrates: And the knowledge of these things you call courage?

Nicias: Precisely.

Socrates: And now let me see whether you agree with Laches and myself as to a third point.

Nicias: What is that?

Socrates: I will tell you. He and I have a notion that there is not one knowledge or science of the past, another of the present, a third of what is likely to be best and what will be best in the future; but that of all three there is one science only: for example, there is one science of medicine which is concerned with the inspection of health equally in all times, present, past, and future; and one science of husbandry in like manner, which is concerned with the productions of the earth in all times. As to the art of the general, you yourselves will be my witnesses that he has an excellent foreknowledge of the future, and that he claims to be the master and not the servant of the soothsayer, because he knows better what is happening or is likely to happen in war: and accordingly the law places the soothsayer under the general, and not the general under the soothsayer. Am I not correct in saying so, Laches?

Laches: Quite correct.

Socrates: And do you, Nicias, also acknowledge that the same science has understanding of the same things, whether future, present, or past?

Nicias: Yes, indeed Socrates; that is my opinion.

Socrates: And courage, my friend, is, as you say, a knowledge of the fearful and of the hopeful?

Nicias: Yes.

Socrates: And the fearful, and the hopeful, are admitted to be future goods and future evils?

Nicias: True.

Socrates: And the same science has to do with the same things in the future or at any time?

Nicias: That is true.

Socrates: Then courage is not the science which is concerned with the fearful and hopeful, for they are future only; courage, like the other sciences, is concerned not only with good and evil of the future, but of the present and past, and of any time?

Nicias: That, as I suppose, is true.

Socrates: Then the answer which you have given, Nicias, includes only a third part of courage; but our question extended to the whole nature of courage: and according to your view, that is, according to your present view, courage is not only the knowledge of the hopeful and the fearful, but seems to include nearly every good and evil without reference to time. What do you say to that alteration in your statement?

Nicias: I agree, Socrates.

Socrates: But then, my dear friend, if a man knew all good and evil, and how they are, and have been, and will be produced, would he not be perfect, and wanting in no virtue, whether

justice, or temperance, or holiness? He would possess them all, and he would know which were dangers and which were not, and guard against them whether they were supernatural or natural; and he would provide the good, as he would know how to deal both with gods or men.

Nicias: I think, Socrates, that there is a great deal of truth in what you say.

Socrates: But then, Nicias, courage, according to this new definition of yours, instead of being a part of virtue only, will be all virtue?

Nicias: It would seem so.

Socrates: But we were saying that courage is one of the parts of virtue?

Nicias: Yes, that was what we were saying.

Socrates: And that is in contradiction with our present view?

Nicias: That appears to be the case.

Socrates: Then, Nicias, we have not discovered what courage is.

Nicias: We have not.

Laches: And yet, friend Nicias, I imagined that you would have made the discovery, when you were so contemptuous of the answers which I made to Socrates. I had very great hopes that you would have been enlightened by the wisdom of Damon.

Nicias: I perceive, Laches, that you think nothing of having displayed your ignorance of the nature of courage, but you look only to see whether I have not made a similar display; and if we are both equally ignorant of the things which a man who is good for anything should know, that, I suppose, will be of no consequence. You certainly appear to me very like the rest of the world, looking at your neighbour and not at yourself. I am of opinion that enough has been said on the subject which we have been discussing; and if anything has been imperfectly said, that

may be hereafter corrected by the help of Damon, whom you think to laugh down, although you have never seen him, and with the help of others. And when I am satisfied myself, I will freely impart my satisfaction to you, for I think that you are very much in want of knowledge.

Laches: You are a philosopher, Nicias; of that I am aware: nevertheless I would recommend Lysimachus and Melesias not to take you and me as advisers about the education of their children; but, as I said at first, they should ask Socrates and not let him off; if my own sons were old enough, I would have asked him myself.

Nicias: To that I quite agree, if Socrates is willing to take them under his charge. I should not wish for any one else to be the tutor of Niceratus. But I observe that when I mention the matter to him he recommends to me some other tutor and refuses himself. Perhaps he may be more ready to listen to you, Lysimachus.

Lysimachus: He ought, Nicias: for certainly I would do things for him which I would not do for many others. What do you say, Socrates — will you comply? And are you ready to give assistance in the improvement of the youths?

Socrates: Indeed, Lysimachus, I should be very wrong in refusing to aid in the improvement of anybody. And if I had shown in this conversation that I had a knowledge which Nicias and Laches have not, then I admit that you would be right in inviting me to perform this duty; but as we are all in the same perplexity, why should one of us be preferred to another? I certainly think that no one should; and under these circumstances, let me offer you a piece of advice (and this need not go further than ourselves). I maintain, my friends, that every one of us should seek out the best teacher whom he can find, first for ourselves, who are greatly in need of one, and then for the youth, regardless of expense or anything. But I cannot advise that we remain as we are. And if any one laughs at us for

going to school at our age, I would quote to them the authority of Homer, who says, that

‘Modesty is not good for a needy man.’

Let us then, regardless of what may be said of us, make the education of the youths our own education.

Lysimachus: I like your proposal, Socrates; and as I am the oldest, I am also the most eager to go to school with the boys. Let me beg a favour of you: Come to my house to-morrow at dawn, and we will advise about these matters. For the present, let us make an end of the conversation.

Socrates: I will come to you to-morrow, Lysimachus, as you propose, God willing.

Lysis

ΛΥΣΙΣ

I was going from the Academy straight to the Lyceum, intending to take the outer road, which is close under the wall. When I came to the postern gate of the city, which is by the fountain of Panops, I fell in with Hippothales, the son of Hieronymus, and Ctesippus the Paeanian, and a company of young men who were standing with them. Hippothales, seeing me approach, asked whence I came and whither I was going.

I am going, I replied, from the Academy straight to the Lyceum.

Then come straight to us, he said, and put in here; you may as well.

Who are you, I said; and where am I to come?

He showed me an enclosed space and an open door over against the wall. And there, he said, is the building at which we all meet: and a goodly company we are.

And what is this building, I asked; and what sort of entertainment have you?

The building, he replied, is a newly erected Palaestra; and the entertainment is generally conversation, to which you are welcome.

Thank you, I said; and is there any teacher there?

Yes, he said, your old friend and admirer, Miccus.

Indeed, I replied; he is a very eminent professor.

Are you disposed, he said, to go with me and see them?

Yes, I said; but I should like to know first, what is expected of me, and who is the favourite among you?

Some persons have one favourite, Socrates, and some another, he said.

And who is yours? I asked: tell me that, Hippothales.

At this he blushed; and I said to him, O Hippothales, thou son of Hieronymus! do not say that you are, or that you are not, in love; the confession is too late; for I see that you are not only in love, but are already far gone in your love. Simple and foolish as I am, the Gods have given me the power of understanding affections of this kind.

Whereupon he blushed more and more.

Ctesippus said: I like to see you blushing, Hippothales, and hesitating to tell Socrates the name; when, if he were with you but for a very short time, you would have plagued him to death by talking about nothing else. Indeed, Socrates, he has literally deafened us, and stopped our ears with the praises of Lysis; and if he is a little intoxicated, there is every likelihood that we may have our sleep murdered with a cry of Lysis. His performances in prose are bad enough, but nothing at all in comparison with his verse; and when he drenches us with his poems and other compositions, it is really too bad; and worse still is his manner of singing them to his love; he has a voice which is truly appalling, and we cannot help hearing him: and now having a question put to him by you, behold he is blushing.

Who is Lysis? I said: I suppose that he must be young; for the name does not recall any one to me.

Why, he said, his father being a very well-known man, he retains his patronymic, and is not as yet commonly called by his own name; but, although you do not know his name, I am sure that you must know his face, for that is quite enough to distinguish him.

But tell me whose son he is, I said.

He is the eldest son of Democrates, of the deme of Aexone.

Ah, Hippothales, I said; what a noble and really perfect love you have found! I wish that you would favour me with the exhibition which you have been making to the rest of the company, and then I shall be able to judge whether you know what a lover ought to say about his love, either to the youth himself, or to others.

Nay, Socrates, he said; you surely do not attach any importance to what he is saying.

Do you mean, I said, that you disown the love of the person whom he says that you love?

No; but I deny that I make verses or address compositions to him.

He is not in his right mind, said Ctesippus; he is talking nonsense, and is stark mad.

O Hippothales, I said, if you have ever made any verses or songs in honour of your favourite, I do not want to hear them; but I want to know the purport of them, that I may be able to judge of your mode of approaching your fair one.

Ctesippus will be able to tell you, he said; for if, as he avers, the sound of my words is always dinning in his ears, he must have a very accurate knowledge and recollection of them.

Yes, indeed, said Ctesippus; I know only too well; and very ridiculous the tale is: for although he is a lover, and very devotedly in love, he has nothing particular to talk about to his beloved which a child might not say. Now is not that ridiculous? He can only speak of the wealth of Democrates, which the whole city celebrates, and grandfather Lysis, and the other ancestors of the youth, and their stud of horses, and their victory at the Pythian games, and at the Isthmus, and at Nemea with four horses and single horses — these are the tales which he

composes and repeats. And there is greater twaddle still. Only the day before yesterday he made a poem in which he described the entertainment of Heracles, who was a connexion of the family, setting forth how in virtue of this relationship he was hospitably received by an ancestor of Lysis; this ancestor was himself begotten of Zeus by the daughter of the founder of the deme. And these are the sort of old wives' tales which he sings and recites to us, and we are obliged to listen to him.

When I heard this, I said: O ridiculous Hippothales! how can you be making and singing hymns in honour of yourself before you have won?

But my songs and verses, he said, are not in honour of myself, Socrates.

You think not? I said.

Nay, but what do you think? he replied.

Most assuredly, I said, those songs are all in your own honour; for if you win your beautiful love, your discourses and songs will be a glory to you, and may be truly regarded as hymns of praise composed in honour of you who have conquered and won such a love; but if he slips away from you, the more you have praised him, the more ridiculous you will look at having lost this fairest and best of blessings; and therefore the wise lover does not praise his beloved until he has won him, because he is afraid of accidents. There is also another danger; the fair, when any one praises or magnifies them, are filled with the spirit of pride and vain-glory. Do you not agree with me?

Yes, he said.

And the more vain-glorious they are, the more difficult is the capture of them?

I believe you.

What should you say of a hunter who frightened away his prey, and made the capture of the animals which he is hunting more

difficult?

He would be a bad hunter, undoubtedly.

Yes; and if, instead of soothing them, he were to infuriate them with words and songs, that would show a great want of wit: do you not agree.

Yes.

And now reflect, Hippothales, and see whether you are not guilty of all these errors in writing poetry. For I can hardly suppose that you will affirm a man to be a good poet who injures himself by his poetry.

Assuredly not, he said; such a poet would be a fool. And this is the reason why I take you into my counsels, Socrates, and I shall be glad of any further advice which you may have to offer. Will you tell me by what words or actions I may become endeared to my love?

That is not easy to determine, I said; but if you will bring your love to me, and will let me talk with him, I may perhaps be able to show you how to converse with him, instead of singing and reciting in the fashion of which you are accused.

There will be no difficulty in bringing him, he replied; if you will only go with Ctesippus into the Palaestra, and sit down and talk, I believe that he will come of his own accord; for he is fond of listening, Socrates. And as this is the festival of the Hermaea, the young men and boys are all together, and there is no separation between them. He will be sure to come: but if he does not, Ctesippus with whom he is familiar, and whose relation Menexenus is his great friend, shall call him.

That will be the way, I said. Thereupon I led Ctesippus into the Palaestra, and the rest followed.

Upon entering we found that the boys had just been sacrificing; and this part of the festival was nearly at an end. They were all in their white array, and games at dice were going on among

them. Most of them were in the outer court amusing themselves; but some were in a corner of the Apodyterium playing at odd and even with a number of dice, which they took out of little wicker baskets. There was also a circle of lookers-on; among them was Lysis. He was standing with the other boys and youths, having a crown upon his head, like a fair vision, and not less worthy of praise for his goodness than for his beauty. We left them, and went over to the opposite side of the room, where, finding a quiet place, we sat down; and then we began to talk. This attracted Lysis, who was constantly turning round to look at us — he was evidently wanting to come to us. For a time he hesitated and had not the courage to come alone; but first of all, his friend Menexenus, leaving his play, entered the Palaestra from the court, and when he saw Ctesippus and myself, was going to take a seat by us; and then Lysis, seeing him, followed, and sat down by his side; and the other boys joined. I should observe that Hippothales, when he saw the crowd, got behind them, where he thought that he would be out of sight of Lysis, lest he should anger him; and there he stood and listened.

I turned to Menexenus, and said: Son of Demophon, which of you two youths is the elder?

That is a matter of dispute between us, he said.

And which is the nobler? Is that also a matter of dispute?

Yes, certainly.

And another disputed point is, which is the fairer?

The two boys laughed.

I shall not ask which is the richer of the two, I said; for you are friends, are you not?

Certainly, they replied.

And friends have all things in common, so that one of you can be no richer than the other, if you say truly that you are friends.

They assented. I was about to ask which was the juster of the two, and which was the wiser of the two; but at this moment Menexenus was called away by some one who came and said that the gymnastic-master wanted him. I supposed that he had to offer sacrifice. So he went away, and I asked Lysis some more questions. I dare say, Lysis, I said, that your father and mother love you very much.

Certainly, he said.

And they would wish you to be perfectly happy.

Yes.

But do you think that any one is happy who is in the condition of a slave, and who cannot do what he likes?

I should think not indeed, he said.

And if your father and mother love you, and desire that you should be happy, no one can doubt that they are very ready to promote your happiness.

Certainly, he replied.

And do they then permit you to do what you like, and never rebuke you or hinder you from doing what you desire?

Yes, indeed, Socrates; there are a great many things which they hinder me from doing.

What do you mean? I said. Do they want you to be happy, and yet hinder you from doing what you like? for example, if you want to mount one of your father's chariots, and take the reins at a race, they will not allow you to do so — they will prevent you?

Certainly, he said, they will not allow me to do so.

Whom then will they allow?

There is a charioteer, whom my father pays for driving.

And do they trust a hireling more than you? and may he do what he likes with the horses? and do they pay him for this?

They do.

But I dare say that you may take the whip and guide the mule-cart if you like; — they will permit that?

Permit me! indeed they will not.

Then, I said, may no one use the whip to the mules?

Yes, he said, the muleteer.

And is he a slave or a free man?

A slave, he said.

And do they esteem a slave of more value than you who are their son? And do they entrust their property to him rather than to you? and allow him to do what he likes, when they prohibit you? Answer me now: Are you your own master, or do they not even allow that?

Nay, he said; of course they do not allow it.

Then you have a master?

Yes, my tutor; there he is.

And is he a slave?

To be sure; he is our slave, he replied.

Surely, I said, this is a strange thing, that a free man should be governed by a slave. And what does he do with you?

He takes me to my teachers.

You do not mean to say that your teachers also rule over you?

Of course they do.

Then I must say that your father is pleased to inflict many lords and masters on you. But at any rate when you go home to your mother, she will let you have your own way, and will not interfere with your happiness; her wool, or the piece of cloth

which she is weaving, are at your disposal: I am sure that there is nothing to hinder you from touching her wooden spathe, or her comb, or any other of her spinning implements.

Nay, Socrates, he replied, laughing; not only does she hinder me, but I should be beaten if I were to touch one of them.

Well, I said, this is amazing. And did you ever behave ill to your father or your mother?

No, indeed, he replied.

But why then are they so terribly anxious to prevent you from being happy, and doing as you like? — keeping you all day long in subjection to another, and, in a word, doing nothing which you desire; so that you have no good, as would appear, out of their great possessions, which are under the control of anybody rather than of you, and have no use of your own fair person, which is tended and taken care of by another; while you, Lysis, are master of nobody, and can do nothing?

Why, he said, Socrates, the reason is that I am not of age.

I doubt whether that is the real reason, I said; for I should imagine that your father Democrates, and your mother, do permit you to do many things already, and do not wait until you are of age: for example, if they want anything read or written, you, I presume, would be the first person in the house who is summoned by them.

Very true.

And you would be allowed to write or read the letters in any order which you please, or to take up the lyre and tune the notes, and play with the fingers, or strike with the plectrum, exactly as you please, and neither father nor mother would interfere with you.

That is true, he said.

Then what can be the reason, Lysis, I said, why they allow you to do the one and not the other?

I suppose, he said, because I understand the one, and not the other.

Yes, my dear youth, I said, the reason is not any deficiency of years, but a deficiency of knowledge; and whenever your father thinks that you are wiser than he is, he will instantly commit himself and his possessions to you.

I think so.

Aye, I said; and about your neighbour, too, does not the same rule hold as about your father? If he is satisfied that you know more of housekeeping than he does, will he continue to administer his affairs himself, or will he commit them to you?

I think that he will commit them to me.

Will not the Athenian people, too, entrust their affairs to you when they see that you have wisdom enough to manage them?

Yes.

And oh! let me put another case, I said: There is the great king, and he has an eldest son, who is the Prince of Asia; — suppose that you and I go to him and establish to his satisfaction that we are better cooks than his son, will he not entrust to us the prerogative of making soup, and putting in anything that we like while the pot is boiling, rather than to the Prince of Asia, who is his son?

To us, clearly.

And we shall be allowed to throw in salt by handfuls, whereas the son will not be allowed to put in as much as he can take up between his fingers?

Of course.

Or suppose again that the son has bad eyes, will he allow him, or will he not allow him, to touch his own eyes if he thinks that he has no knowledge of medicine?

He will not allow him.

Whereas, if he supposes us to have a knowledge of medicine, he will allow us to do what we like with him — even to open the eyes wide and sprinkle ashes upon them, because he supposes that we know what is best?

That is true.

And everything in which we appear to him to be wiser than himself or his son he will commit to us?

That is very true, Socrates, he replied.

Then now, my dear Lysis, I said, you perceive that in things which we know every one will trust us, — Hellenes and barbarians, men and women, — and we may do as we please about them, and no one will like to interfere with us; we shall be free, and masters of others; and these things will be really ours, for we shall be benefited by them. But in things of which we have no understanding, no one will trust us to do as seems good to us — they will hinder us as far as they can; and not only strangers, but father and mother, and the friend, if there be one, who is dearer still, will also hinder us; and we shall be subject to others; and these things will not be ours, for we shall not be benefited by them. Do you agree?

He assented.

And shall we be friends to others, and will any others love us, in as far as we are useless to them?

Certainly not.

Neither can your father or mother love you, nor can anybody love anybody else, in so far as they are useless to them?

No.

And therefore, my boy, if you are wise, all men will be your friends and kindred, for you will be useful and good; but if you are not wise, neither father, nor mother, nor kindred, nor any one else, will be your friends. And in matters of which you have as yet no knowledge, can you have any conceit of knowledge?

That is impossible, he replied.

And you, Lysis, if you require a teacher, have not yet attained to wisdom.

True.

And therefore you are not conceited, having nothing of which to be conceited.

Indeed, Socrates, I think not.

When I heard him say this, I turned to Hippothales, and was very nearly making a blunder, for I was going to say to him: That is the way, Hippothales, in which you should talk to your beloved, humbling and lowering him, and not as you do, puffing him up and spoiling him. But I saw that he was in great excitement and confusion at what had been said, and I remembered that, although he was in the neighbourhood, he did not want to be seen by Lysis; so upon second thoughts I refrained.

In the meantime Menexenus came back and sat down in his place by Lysis; and Lysis, in a childish and affectionate manner, whispered privately in my ear, so that Menexenus should not hear: Do, Socrates, tell Menexenus what you have been telling me.

Suppose that you tell him yourself, Lysis, I replied; for I am sure that you were attending.

Certainly, he replied.

Try, then, to remember the words, and be as exact as you can in repeating them to him, and if you have forgotten anything, ask me again the next time that you see me.

I will be sure to do so, Socrates; but go on telling him something new, and let me hear, as long as I am allowed to stay.

I certainly cannot refuse, I said, since you ask me; but then, as you know, Menexenus is very pugnacious, and therefore you

must come to the rescue if he attempts to upset me.

Yes, indeed, he said; he is very pugnacious, and that is the reason why I want you to argue with him.

That I may make a fool of myself?

No, indeed, he said; but I want you to put him down.

That is no easy matter, I replied; for he is a terrible fellow — a pupil of Ctesippus. And there is Ctesippus himself: do you see him?

Never mind, Socrates, you shall argue with him.

Well, I suppose that I must, I replied.

Hereupon Ctesippus complained that we were talking in secret, and keeping the feast to ourselves.

I shall be happy, I said, to let you have a share. Here is Lysis, who does not understand something that I was saying, and wants me to ask Menexenus, who, as he thinks, is likely to know.

And why do you not ask him? he said.

Very well, I said, I will; and do you, Menexenus, answer. But first I must tell you that I am one who from my childhood upward have set my heart upon a certain thing. All people have their fancies; some desire horses, and others dogs; and some are fond of gold, and others of honour. Now, I have no violent desire of any of these things; but I have a passion for friends; and I would rather have a good friend than the best cock or quail in the world: I would even go further, and say the best horse or dog. Yea, by the dog of Egypt, I should greatly prefer a real friend to all the gold of Darius, or even to Darius himself: I am such a lover of friends as that. And when I see you and Lysis, at your early age, so easily possessed of this treasure, and so soon, he of you, and you of him, I am amazed and delighted, seeing that I myself, although I am now advanced in years, am so far from having made a similar acquisition, that I do not even know in what way a friend is acquired. But I want to ask you a

question about this, for you have experience: tell me then, when one loves another, is the lover or the beloved the friend; or may either be the friend?

Either may, I should think, be the friend of either.

Do you mean, I said, that if only one of them loves the other, they are mutual friends?

Yes, he said; that is my meaning.

But what if the lover is not loved in return? which is a very possible case.

Yes.

Or is, perhaps, even hated? which is a fancy which sometimes is entertained by lovers respecting their beloved. Nothing can exceed their love; and yet they imagine either that they are not loved in return, or that they are hated. Is not that true?

Yes, he said, quite true.

In that case, the one loves, and the other is loved?

Yes.

Then which is the friend of which? Is the lover the friend of the beloved, whether he be loved in return, or hated; or is the beloved the friend; or is there no friendship at all on either side, unless they both love one another?

There would seem to be none at all.

Then this notion is not in accordance with our previous one. We were saying that both were friends, if one only loved; but now, unless they both love, neither is a friend.

That appears to be true.

Then nothing which does not love in return is beloved by a lover?

I think not.

Then they are not lovers of horses, whom the horses do not love in return; nor lovers of quails, nor of dogs, nor of wine, nor of gymnastic exercises, who have no return of love; no, nor of wisdom, unless wisdom loves them in return. Or shall we say that they do love them, although they are not beloved by them; and that the poet was wrong who sings —

‘Happy the man to whom his children are dear, and steeds having single hoofs, and dogs of chase, and the stranger of another land’?

I do not think that he was wrong.

You think that he is right?

Yes.

Then, Menexenus, the conclusion is, that what is beloved, whether loving or hating, may be dear to the lover of it: for example, very young children, too young to love, or even hating their father or mother when they are punished by them, are never dearer to them than at the time when they are being hated by them.

I think that what you say is true.

And, if so, not the lover, but the beloved, is the friend or dear one?

Yes.

And the hated one, and not the hater, is the enemy?

Clearly.

Then many men are loved by their enemies, and hated by their friends, and are the friends of their enemies, and the enemies of their friends. Yet how absurd, my dear friend, or indeed impossible is this paradox of a man being an enemy to his friend or a friend to his enemy.

I quite agree, Socrates, in what you say.

But if this cannot be, the lover will be the friend of that which is loved?

True.

And the hater will be the enemy of that which is hated?

Certainly.

Yet we must acknowledge in this, as in the preceding instance, that a man may be the friend of one who is not his friend, or who may be his enemy, when he loves that which does not love him or which even hates him. And he may be the enemy of one who is not his enemy, and is even his friend: for example, when he hates that which does not hate him, or which even loves him.

That appears to be true.

But if the lover is not a friend, nor the beloved a friend, nor both together, what are we to say? Whom are we to call friends to one another? Do any remain?

Indeed, Socrates, I cannot find any.

But, O Menexenus! I said, may we not have been altogether wrong in our conclusions?

I am sure that we have been wrong, Socrates, said Lysis. And he blushed as he spoke, the words seeming to come from his lips involuntarily, because his whole mind was taken up with the argument; there was no mistaking his attentive look while he was listening.

I was pleased at the interest which was shown by Lysis, and I wanted to give Menexenus a rest, so I turned to him and said, I think, Lysis, that what you say is true, and that, if we had been right, we should never have gone so far wrong; let us proceed no further in this direction (for the road seems to be getting troublesome), but take the other path into which we turned, and see what the poets have to say; for they are to us in a manner the fathers and authors of wisdom, and they speak of friends in no light or trivial manner, but God himself, as they say, makes

them and draws them to one another; and this they express, if I am not mistaken, in the following words: —

‘God is ever drawing like towards like, and making them acquainted.’

I dare say that you have heard those words.

Yes, he said; I have.

And have you not also met with the treatises of philosophers who say that like must love like? they are the people who argue and write about nature and the universe.

Very true, he replied.

And are they right in saying this?

They may be.

Perhaps, I said, about half, or possibly, altogether, right, if their meaning were rightly apprehended by us. For the more a bad man has to do with a bad man, and the more nearly he is brought into contact with him, the more he will be likely to hate him, for he injures him; and injurer and injured cannot be friends. Is not that true?

Yes, he said.

Then one half of the saying is untrue, if the wicked are like one another?

That is true.

But the real meaning of the saying, as I imagine, is, that the good are like one another, and friends to one another; and that the bad, as is often said of them, are never at unity with one another or with themselves; for they are passionate and restless, and anything which is at variance and enmity with itself is not likely to be in union or harmony with any other thing. Do you not agree?

Yes, I do.

Then, my friend, those who say that the like is friendly to the like mean to intimate, if I rightly apprehend them, that the good only is the friend of the good, and of him only; but that the evil never attains to any real friendship, either with good or evil. Do you agree?

He nodded assent.

Then now we know how to answer the question ‘Who are friends?’ for the argument declares ‘That the good are friends.’

Yes, he said, that is true.

Yes, I replied; and yet I am not quite satisfied with this answer. By heaven, and shall I tell you what I suspect? I will. Assuming that like, inasmuch as he is like, is the friend of like, and useful to him — or rather let me try another way of putting the matter: Can like do any good or harm to like which he could not do to himself, or suffer anything from his like which he would not suffer from himself? And if neither can be of any use to the other, how can they be loved by one another? Can they now?

They cannot.

And can he who is not loved be a friend?

Certainly not.

But say that the like is not the friend of the like in so far as he is like; still the good may be the friend of the good in so far as he is good?

True.

But then again, will not the good, in so far as he is good, be sufficient for himself? Certainly he will. And he who is sufficient wants nothing — that is implied in the word sufficient.

Of course not.

And he who wants nothing will desire nothing?

He will not.

Neither can he love that which he does not desire?

He cannot.

And he who loves not is not a lover or friend?

Clearly not.

What place then is there for friendship, if, when absent, good men have no need of one another (for even when alone they are sufficient for themselves), and when present have no use of one another? How can such persons ever be induced to value one another?

They cannot.

And friends they cannot be, unless they value one another?

Very true.

But see now, Lysis, whether we are not being deceived in all this — are we not indeed entirely wrong?

How so? he replied.

Have I not heard some one say, as I just now recollect, that the like is the greatest enemy of the like, the good of the good? — Yes, and he quoted the authority of Hesiod, who says:

‘Potter quarrels with potter, bard with bard, Beggar with beggar;’

and of all other things he affirmed, in like manner, ‘That of necessity the most like are most full of envy, strife, and hatred of one another, and the most unlike, of friendship. For the poor man is compelled to be the friend of the rich, and the weak requires the aid of the strong, and the sick man of the physician; and every one who is ignorant, has to love and court him who knows.’ And indeed he went on to say in grandiloquent language, that the idea of friendship existing between similars is not the truth, but the very reverse of the truth, and that the most opposed are the most friendly; for that everything desires not like but that which is most unlike: for example, the dry

desires the moist, the cold the hot, the bitter the sweet, the sharp the blunt, the void the full, the full the void, and so of all other things; for the opposite is the food of the opposite, whereas like receives nothing from like. And I thought that he who said this was a charming man, and that he spoke well. What do the rest of you say?

I should say, at first hearing, that he is right, said Menexenus.

Then we are to say that the greatest friendship is of opposites?

Exactly.

Yes, Menexenus; but will not that be a monstrous answer? and will not the all-wise eristics be down upon us in triumph, and ask, fairly enough, whether love is not the very opposite of hate; and what answer shall we make to them — must we not admit that they speak the truth?

We must.

They will then proceed to ask whether the enemy is the friend of the friend, or the friend the friend of the enemy?

Neither, he replied.

Well, but is a just man the friend of the unjust, or the temperate of the intemperate, or the good of the bad?

I do not see how that is possible.

And yet, I said, if friendship goes by contraries, the contraries must be friends.

They must.

Then neither like and like nor unlike and unlike are friends.

I suppose not.

And yet there is a further consideration: may not all these notions of friendship be erroneous? but may not that which is neither good nor evil still in some cases be the friend of the good?

How do you mean? he said.

Why really, I said, the truth is that I do not know; but my head is dizzy with thinking of the argument, and therefore I hazard the conjecture, that ‘the beautiful is the friend,’ as the old proverb says. Beauty is certainly a soft, smooth, slippery thing, and therefore of a nature which easily slips in and permeates our souls. For I affirm that the good is the beautiful. You will agree to that?

Yes.

This I say from a sort of notion that what is neither good nor evil is the friend of the beautiful and the good, and I will tell you why I am inclined to think so: I assume that there are three principles — the good, the bad, and that which is neither good nor bad. You would agree — would you not?

I agree.

And neither is the good the friend of the good, nor the evil of the evil, nor the good of the evil; — these alternatives are excluded by the previous argument; and therefore, if there be such a thing as friendship or love at all, we must infer that what is neither good nor evil must be the friend, either of the good, or of that which is neither good nor evil, for nothing can be the friend of the bad.

True.

But neither can like be the friend of like, as we were just now saying.

True.

And if so, that which is neither good nor evil can have no friend which is neither good nor evil.

Clearly not.

Then the good alone is the friend of that only which is neither good nor evil.

That may be assumed to be certain.

And does not this seem to put us in the right way? Just remark, that the body which is in health requires neither medical nor any other aid, but is well enough; and the healthy man has no love of the physician, because he is in health.

He has none.

But the sick loves him, because he is sick?

Certainly.

And sickness is an evil, and the art of medicine a good and useful thing?

Yes.

But the human body, regarded as a body, is neither good nor evil?

True.

And the body is compelled by reason of disease to court and make friends of the art of medicine?

Yes.

Then that which is neither good nor evil becomes the friend of good, by reason of the presence of evil?

So we may infer.

And clearly this must have happened before that which was neither good nor evil had become altogether corrupted with the element of evil — if itself had become evil it would not still desire and love the good; for, as we were saying, the evil cannot be the friend of the good.

Impossible.

Further, I must observe that some substances are assimilated when others are present with them; and there are some which are not assimilated: take, for example, the case of an ointment or colour which is put on another substance.

Very good.

In such a case, is the substance which is anointed the same as the colour or ointment?

What do you mean? he said.

This is what I mean: Suppose that I were to cover your auburn locks with white lead, would they be really white, or would they only appear to be white?

They would only appear to be white, he replied.

And yet whiteness would be present in them?

True.

But that would not make them at all the more white, notwithstanding the presence of white in them — they would not be white any more than black?

No.

But when old age infuses whiteness into them, then they become assimilated, and are white by the presence of white.

Certainly.

Now I want to know whether in all cases a substance is assimilated by the presence of another substance; or must the presence be after a peculiar sort?

The latter, he said.

Then that which is neither good nor evil may be in the presence of evil, but not as yet evil, and that has happened before now?

Yes.

And when anything is in the presence of evil, not being as yet evil, the presence of good arouses the desire of good in that thing; but the presence of evil, which makes a thing evil, takes away the desire and friendship of the good; for that which was once both good and evil has now become evil only, and the good was supposed to have no friendship with the evil?

None.

And therefore we say that those who are already wise, whether Gods or men, are no longer lovers of wisdom; nor can they be lovers of wisdom who are ignorant to the extent of being evil, for no evil or ignorant person is a lover of wisdom. There remain those who have the misfortune to be ignorant, but are not yet hardened in their ignorance, or void of understanding, and do not as yet fancy that they know what they do not know: and therefore those who are the lovers of wisdom are as yet neither good nor bad. But the bad do not love wisdom any more than the good; for, as we have already seen, neither is unlike the friend of unlike, nor like of like. You remember that?

Yes, they both said.

And so, Lysis and Menexenus, we have discovered the nature of friendship — there can be no doubt of it: Friendship is the love which by reason of the presence of evil the neither good nor evil has of the good, either in the soul, or in the body, or anywhere.

They both agreed and entirely assented, and for a moment I rejoiced and was satisfied like a huntsman just holding fast his prey. But then a most unaccountable suspicion came across me, and I felt that the conclusion was untrue. I was pained, and said, Alas! Lysis and Menexenus, I am afraid that we have been grasping at a shadow only.

Why do you say so? said Menexenus.

I am afraid, I said, that the argument about friendship is false: arguments, like men, are often pretenders.

How do you mean? he asked.

Well, I said; look at the matter in this way: a friend is the friend of some one; is he not?

Certainly he is.

And has he a motive and object in being a friend, or has he no motive and object?

He has a motive and object.

And is the object which makes him a friend, dear to him, or neither dear nor hateful to him?

I do not quite follow you, he said.

I do not wonder at that, I said. But perhaps, if I put the matter in another way, you will be able to follow me, and my own meaning will be clearer to myself. The sick man, as I was just now saying, is the friend of the physician — is he not?

Yes.

And he is the friend of the physician because of disease, and for the sake of health?

Yes.

And disease is an evil?

Certainly.

And what of health? I said. Is that good or evil, or neither?

Good, he replied.

And we were saying, I believe, that the body being neither good nor evil, because of disease, that is to say because of evil, is the friend of medicine, and medicine is a good: and medicine has entered into this friendship for the sake of health, and health is a good.

True.

And is health a friend, or not a friend?

A friend.

And disease is an enemy?

Yes.

Then that which is neither good nor evil is the friend of the good because of the evil and hateful, and for the sake of the good and the friend?

Clearly.

Then the friend is a friend for the sake of the friend, and because of the enemy?

That is to be inferred.

Then at this point, my boys, let us take heed, and be on our guard against deceptions. I will not again repeat that the friend is the friend of the friend, and the like of the like, which has been declared by us to be an impossibility; but, in order that this new statement may not delude us, let us attentively examine another point, which I will proceed to explain: Medicine, as we were saying, is a friend, or dear to us for the sake of health?

Yes.

And health is also dear?

Certainly.

And if dear, then dear for the sake of something?

Yes.

And surely this object must also be dear, as is implied in our previous admissions?

Yes.

And that something dear involves something else dear?

Yes.

But then, proceeding in this way, shall we not arrive at some first principle of friendship or dearness which is not capable of being referred to any other, for the sake of which, as we maintain, all other things are dear, and, having there arrived, we shall stop?

True.

My fear is that all those other things, which, as we say, are dear for the sake of another, are illusions and deceptions only, but where that first principle is, there is the true ideal of friendship.

Let me put the matter thus: Suppose the case of a great treasure (this may be a son, who is more precious to his father than all his other treasures); would not the father, who values his son above all things, value other things also for the sake of his son? I mean, for instance, if he knew that his son had drunk hemlock, and the father thought that wine would save him, he would value the wine?

He would.

And also the vessel which contains the wine?

Certainly.

But does he therefore value the three measures of wine, or the earthen vessel which contains them, equally with his son? Is not this rather the true state of the case? All his anxiety has regard not to the means which are provided for the sake of an object, but to the object for the sake of which they are provided. And although we may often say that gold and silver are highly valued by us, that is not the truth; for there is a further object, whatever it may be, which we value most of all, and for the sake of which gold and all our other possessions are acquired by us. Am I not right?

Yes, certainly.

And may not the same be said of the friend? That which is only dear to us for the sake of something else is improperly said to be dear, but the truly dear is that in which all these so-called dear friendships terminate.

That, he said, appears to be true.

And the truly dear or ultimate principle of friendship is not for the sake of any other or further dear.

True.

Then we have done with the notion that friendship has any further object. May we then infer that the good is the friend?

I think so.

And the good is loved for the sake of the evil? Let me put the case in this way: Suppose that of the three principles, good, evil, and that which is neither good nor evil, there remained only the good and the neutral, and that evil went far away, and in no way affected soul or body, nor ever at all that class of things which, as we say, are neither good nor evil in themselves; — would the good be of any use, or other than useless to us? For if there were nothing to hurt us any longer, we should have no need of anything that would do us good. Then would be clearly seen that we did but love and desire the good because of the evil, and as the remedy of the evil, which was the disease; but if there had been no disease, there would have been no need of a remedy. Is not this the nature of the good — to be loved by us who are placed between the two, because of the evil? but there is no use in the good for its own sake.

I suppose not.

Then the final principle of friendship, in which all other friendships terminated, those, I mean, which are relatively dear and for the sake of something else, is of another and a different nature from them. For they are called dear because of another dear or friend. But with the true friend or dear, the case is quite the reverse; for that is proved to be dear because of the hated, and if the hated were away it would be no longer dear.

Very true, he replied: at any rate not if our present view holds good.

But, oh! will you tell me, I said, whether if evil were to perish, we should hunger any more, or thirst any more, or have any similar desire? Or may we suppose that hunger will remain while men and animals remain, but not so as to be hurtful? And the same of thirst and the other desires, — that they will remain, but will not be evil because evil has perished? Or rather shall I say, that to ask what either will be then or will not be is

ridiculous, for who knows? This we do know, that in our present condition hunger may injure us, and may also benefit us: — Is not that true?

Yes.

And in like manner thirst or any similar desire may sometimes be a good and sometimes an evil to us, and sometimes neither one nor the other?

To be sure.

But is there any reason why, because evil perishes, that which is not evil should perish with it?

None.

Then, even if evil perishes, the desires which are neither good nor evil will remain?

Clearly they will.

And must not a man love that which he desires and affects?

He must.

Then, even if evil perishes, there may still remain some elements of love or friendship?

Yes.

But not if evil is the cause of friendship: for in that case nothing will be the friend of any other thing after the destruction of evil; for the effect cannot remain when the cause is destroyed.

True.

And have we not admitted already that the friend loves something for a reason? and at the time of making the admission we were of opinion that the neither good nor evil loves the good because of the evil?

Very true.

But now our view is changed, and we conceive that there must be some other cause of friendship?

I suppose so.

May not the truth be rather, as we were saying just now, that desire is the cause of friendship; for that which desires is dear to that which is desired at the time of desiring it? and may not the other theory have been only a long story about nothing?

Likely enough.

But surely, I said, he who desires, desires that of which he is in want?

Yes.

And that of which he is in want is dear to him?

True.

And he is in want of that of which he is deprived?

Certainly.

Then love, and desire, and friendship would appear to be of the natural or congenial. Such, Lysis and Menexenus, is the inference.

They assented.

Then if you are friends, you must have natures which are congenial to one another?

Certainly, they both said.

And I say, my boys, that no one who loves or desires another would ever have loved or desired or affected him, if he had not been in some way congenial to him, either in his soul, or in his character, or in his manners, or in his form.

Yes, yes, said Menexenus. But Lysis was silent.

Then, I said, the conclusion is, that what is of a congenial nature must be loved.

It follows, he said.

Then the lover, who is true and no counterfeit, must of necessity be loved by his love.

Lysis and Menexenus gave a faint assent to this; and Hippothales changed into all manner of colours with delight.

Here, intending to revise the argument, I said: Can we point out any difference between the congenial and the like? For if that is possible, then I think, Lysis and Menexenus, there may be some sense in our argument about friendship. But if the congenial is only the like, how will you get rid of the other argument, of the uselessness of like to like in as far as they are like; for to say that what is useless is dear, would be absurd? Suppose, then, that we agree to distinguish between the congenial and the like — in the intoxication of argument, that may perhaps be allowed.

Very true.

And shall we further say that the good is congenial, and the evil uncongenial to every one? Or again that the evil is congenial to the evil, and the good to the good; and that which is neither good nor evil to that which is neither good nor evil?

They agreed to the latter alternative.

Then, my boys, we have again fallen into the old discarded error; for the unjust will be the friend of the unjust, and the bad of the bad, as well as the good of the good.

That appears to be the result.

But again, if we say that the congenial is the same as the good, in that case the good and he only will be the friend of the good.

True.

But that too was a position of ours which, as you will remember, has been already refuted by ourselves.

We remember.

Then what is to be done? Or rather is there anything to be done? I can only, like the wise men who argue in courts, sum up the arguments: — If neither the beloved, nor the lover, nor the like, nor the unlike, nor the good, nor the congenial, nor any other of whom we spoke — for there were such a number of them that I cannot remember all — if none of these are friends, I know not what remains to be said.

Here I was going to invite the opinion of some older person, when suddenly we were interrupted by the tutors of Lysis and Menexenus, who came upon us like an evil apparition with their brothers, and bade them go home, as it was getting late. At first, we and the by-standers drove them off; but afterwards, as they would not mind, and only went on shouting in their barbarous dialect, and got angry, and kept calling the boys — they appeared to us to have been drinking rather too much at the Hermaea, which made them difficult to manage — we fairly gave way and broke up the company.

I said, however, a few words to the boys at parting: O Menexenus and Lysis, how ridiculous that you two boys, and I, an old boy, who would fain be one of you, should imagine ourselves to be friends — this is what the by-standers will go away and say — and as yet we have not been able to discover what is a friend!

Charmides

ΧΑΡΜΙΔΗΣ

Yesterday evening I returned from the army at Potidaea, and having been a good while away, I thought that I should like to go and look at my old haunts. So I went into the palaestra of Taureas, which is over against the temple adjoining the porch of the King Archon, and there I found a number of persons, most of whom I knew, but not all. My visit was unexpected, and no sooner did they see me entering than they saluted me from afar on all sides; and Chaerephon, who is a kind of madman, started up and ran to me, seizing my hand, and saying, How did you escape, Socrates? — (I should explain that an engagement had taken place at Potidaea not long before we came away, of which the news had only just reached Athens.)

You see, I replied, that here I am.

There was a report, he said, that the engagement was very severe, and that many of our acquaintance had fallen.

That, I replied, was not far from the truth.

I suppose, he said, that you were present.

I was.

Then sit down, and tell us the whole story, which as yet we have only heard imperfectly.

I took the place which he assigned to me, by the side of Critias the son of Callaeschrus, and when I had saluted him and the rest of the company, I told them the news from the army, and answered their several enquiries.

Then, when there had been enough of this, I, in my turn, began to make enquiries about matters at home — about the present state of philosophy, and about the youth. I asked whether any of them were remarkable for wisdom or beauty, or both. Critias, glancing at the door, invited my attention to some youths who were coming in, and talking noisily to one another, followed by a crowd. Of the beauties, Socrates, he said, I fancy that you will soon be able to form a judgment. For those who are just entering are the advanced guard of the great beauty, as he is thought to be, of the day, and he is likely to be not far off himself.

Who is he, I said; and who is his father?

Charmides, he replied, is his name; he is my cousin, and the son of my uncle Glaucon: I rather think that you know him too, although he was not grown up at the time of your departure.

Certainly, I know him, I said, for he was remarkable even then when he was still a child, and I should imagine that by this time he must be almost a young man.

You will see, he said, in a moment what progress he has made and what he is like. He had scarcely said the word, when Charmides entered.

Now you know, my friend, that I cannot measure anything, and of the beautiful, I am simply such a measure as a white line is of chalk; for almost all young persons appear to be beautiful in my eyes. But at that moment, when I saw him coming in, I confess that I was quite astonished at his beauty and stature; all the world seemed to be enamoured of him; amazement and confusion reigned when he entered; and a troop of lovers followed him. That grown-up men like ourselves should have been affected in this way was not surprising, but I observed that there was the same feeling among the boys; all of them, down to the very least child, turned and looked at him, as if he had been a statue.

Chaerephon called me and said: What do you think of him, Socrates? Has he not a beautiful face?

Most beautiful, I said.

But you would think nothing of his face, he replied, if you could see his naked form: he is absolutely perfect.

And to this they all agreed.

By Heracles, I said, there never was such a paragon, if he has only one other slight addition.

What is that? said Critias.

If he has a noble soul; and being of your house, Critias, he may be expected to have this.

He is as fair and good within, as he is without, replied Critias.

Then, before we see his body, should we not ask him to show us his soul, naked and undisguised? he is just of an age at which he will like to talk.

That he will, said Critias, and I can tell you that he is a philosopher already, and also a considerable poet, not in his own opinion only, but in that of others.

That, my dear Critias, I replied, is a distinction which has long been in your family, and is inherited by you from Solon. But why do you not call him, and show him to us? for even if he were younger than he is, there could be no impropriety in his talking to us in the presence of you, who are his guardian and cousin.

Very well, he said; then I will call him; and turning to the attendant, he said, Call Charmides, and tell him that I want him to come and see a physician about the illness of which he spoke to me the day before yesterday. Then again addressing me, he added: He has been complaining lately of having a headache when he rises in the morning: now why should you not make him believe that you know a cure for the headache?

Why not, I said; but will he come?

He will be sure to come, he replied.

He came as he was bidden, and sat down between Critias and me. Great amusement was occasioned by every one pushing with might and main at his neighbour in order to make a place for him next to themselves, until at the two ends of the row one had to get up and the other was rolled over sideways. Now I, my friend, was beginning to feel awkward; my former bold belief in my powers of conversing with him had vanished. And when Critias told him that I was the person who had the cure, he looked at me in such an indescribable manner, and was just going to ask a question. And at that moment all the people in the palaestra crowded about us, and, O rare! I caught a sight of the inwards of his garment, and took the flame. Then I could no longer contain myself. I thought how well Cydias understood the nature of love, when, in speaking of a fair youth, he warns some one ‘not to bring the fawn in the sight of the lion to be devoured by him,’ for I felt that I had been overcome by a sort of wild-beast appetite. But I controlled myself, and when he asked me if I knew the cure of the headache, I answered, but with an effort, that I did know.

And what is it? he said.

I replied that it was a kind of leaf, which required to be accompanied by a charm, and if a person would repeat the charm at the same time that he used the cure, he would be made whole; but that without the charm the leaf would be of no avail.

Then I will write out the charm from your dictation, he said.

With my consent? I said, or without my consent?

With your consent, Socrates, he said, laughing.

Very good, I said; and are you quite sure that you know my name?

I ought to know you, he replied, for there is a great deal said about you among my companions; and I remember when I was a child seeing you in company with my cousin Critias.

I am glad to find that you remember me, I said; for I shall now be more at home with you and shall be better able to explain the nature of the charm, about which I felt a difficulty before. For the charm will do more, Charmides, than only cure the headache. I dare say that you have heard eminent physicians say to a patient who comes to them with bad eyes, that they cannot cure his eyes by themselves, but that if his eyes are to be cured, his head must be treated; and then again they say that to think of curing the head alone, and not the rest of the body also, is the height of folly. And arguing in this way they apply their methods to the whole body, and try to treat and heal the whole and the part together. Did you ever observe that this is what they say?

Yes, he said.

And they are right, and you would agree with them?

Yes, he said, certainly I should.

His approving answers reassured me, and I began by degrees to regain confidence, and the vital heat returned. Such, Charmides, I said, is the nature of the charm, which I learned when serving with the army from one of the physicians of the Thracian king Zamolxis, who are said to be so skilful that they can even give immortality. This Thracian told me that in these notions of theirs, which I was just now mentioning, the Greek physicians are quite right as far as they go; but Zamolxis, he added, our king, who is also a god, says further, ‘that as you ought not to attempt to cure the eyes without the head, or the head without the body, so neither ought you to attempt to cure the body without the soul; and this,’ he said, ’is the reason why the cure of many diseases is unknown to the physicians of Hellas, because they are ignorant of the whole, which ought to

be studied also; for the part can never be well unless the whole is well.' For all good and evil, whether in the body or in human nature, originates, as he declared, in the soul, and overflows from thence, as if from the head into the eyes. And therefore if the head and body are to be well, you must begin by curing the soul; that is the first thing. And the cure, my dear youth, has to be effected by the use of certain charms, and these charms are fair words; and by them temperance is implanted in the soul, and where temperance is, there health is speedily imparted, not only to the head, but to the whole body. And he who taught me the cure and the charm at the same time added a special direction: 'Let no one,' he said, 'persuade you to cure the head, until he has first given you his soul to be cured by the charm. For this,' he said, 'is the great error of our day in the treatment of the human body, that physicians separate the soul from the body.' And he added with emphasis, at the same time making me swear to his words, 'Let no one, however rich, or noble, or fair, persuade you to give him the cure, without the charm.' Now I have sworn, and I must keep my oath, and therefore if you will allow me to apply the Thracian charm first to your soul, as the stranger directed, I will afterwards proceed to apply the cure to your head. But if not, I do not know what I am to do with you, my dear Charmides.

Critias, when he heard this, said: The headache will be an unexpected gain to my young relation, if the pain in his head compels him to improve his mind: and I can tell you, Socrates, that Charmides is not only pre-eminent in beauty among his equals, but also in that quality which is given by the charm; and this, as you say, is temperance?

Yes, I said.

Then let me tell you that he is the most temperate of human beings, and for his age inferior to none in any quality.

Yes, I said, Charmides; and indeed I think that you ought to excel others in all good qualities; for if I am not mistaken there

is no one present who could easily point out two Athenian houses, whose union would be likely to produce a better or nobler scion than the two from which you are sprung. There is your father's house, which is descended from Critias the son of Dropidas, whose family has been commemorated in the panegyrical verses of Anacreon, Solon, and many other poets, as famous for beauty and virtue and all other high fortune: and your mother's house is equally distinguished; for your maternal uncle, Pyrilampes, is reputed never to have found his equal, in Persia at the court of the great king, or on the continent of Asia, in all the places to which he went as ambassador, for stature and beauty; that whole family is not a whit inferior to the other. Having such ancestors you ought to be first in all things, and, sweet son of Glaucon, your outward form is no dishonour to any of them. If to beauty you add temperance, and if in other respects you are what Critias declares you to be, then, dear Charmides, blessed art thou, in being the son of thy mother. And here lies the point; for if, as he declares, you have this gift of temperance already, and are temperate enough, in that case you have no need of any charms, whether of Zamolxis or of Abaris the Hyperborean, and I may as well let you have the cure of the head at once; but if you have not yet acquired this quality, I must use the charm before I give you the medicine. Please, therefore, to inform me whether you admit the truth of what Critias has been saying; — have you or have you not this quality of temperance?

Charmides blushed, and the blush heightened his beauty, for modesty is becoming in youth; he then said very ingenuously, that he really could not at once answer, either yes, or no, to the question which I had asked: For, said he, if I affirm that I am not temperate, that would be a strange thing for me to say of myself, and also I should give the lie to Critias, and many others who think as he tells you, that I am temperate: but, on the other hand, if I say that I am, I shall have to praise myself, which would be ill manners; and therefore I do not know how to

answer you.

I said to him: That is a natural reply, Charmides, and I think that you and I ought together to enquire whether you have this quality about which I am asking or not; and then you will not be compelled to say what you do not like; neither shall I be a rash practitioner of medicine: therefore, if you please, I will share the enquiry with you, but I will not press you if you would rather not.

There is nothing which I should like better, he said; and as far as I am concerned you may proceed in the way which you think best.

I think, I said, that I had better begin by asking you a question; for if temperance abides in you, you must have an opinion about her; she must give some intimation of her nature and qualities, which may enable you to form a notion of her. Is not that true?

Yes, he said, that I think is true.

You know your native language, I said, and therefore you must be able to tell what you feel about this.

Certainly, he said.

In order, then, that I may form a conjecture whether you have temperance abiding in you or not, tell me, I said, what, in your opinion, is Temperance?

At first he hesitated, and was very unwilling to answer: then he said that he thought temperance was doing things orderly and quietly, such things for example as walking in the streets, and talking, or anything else of that nature. In a word, he said, I should answer that, in my opinion, temperance is quietness.

Are you right, Charmides? I said. No doubt some would affirm that the quiet are the temperate; but let us see whether these words have any meaning; and first tell me whether you would not acknowledge temperance to be of the class of the noble and good?

Yes.

But which is best when you are at the writing-master's, to write the same letters quickly or quietly?

Quickly.

And to read quickly or slowly?

Quickly again.

And in playing the lyre, or wrestling, quickness or sharpness are far better than quietness and slowness?

Yes.

And the same holds in boxing and in the pancratium?

Certainly.

And in leaping and running and in bodily exercises generally, quickness and agility are good; slowness, and inactivity, and quietness, are bad?

That is evident.

Then, I said, in all bodily actions, not quietness, but the greatest agility and quickness, is noblest and best?

Yes, certainly.

And is temperance a good?

Yes.

Then, in reference to the body, not quietness, but quickness will be the higher degree of temperance, if temperance is a good?

True, he said.

And which, I said, is better — facility in learning, or difficulty in learning?

Facility.

Yes, I said; and facility in learning is learning quickly, and difficulty in learning is learning quietly and slowly?

True.

And is it not better to teach another quickly and energetically, rather than quietly and slowly?

Yes.

And which is better, to call to mind, and to remember, quickly and readily, or quietly and slowly?

The former.

And is not shrewdness a quickness or cleverness of the soul, and not a quietness?

True.

And is it not best to understand what is said, whether at the writing-master's or the music-master's, or anywhere else, not as quietly as possible, but as quickly as possible?

Yes.

And in the searchings or deliberations of the soul, not the quietest, as I imagine, and he who with difficulty deliberates and discovers, is thought worthy of praise, but he who does so most easily and quickly?

Quite true, he said.

And in all that concerns either body or soul, swiftness and activity are clearly better than slowness and quietness?

Clearly they are.

Then temperance is not quietness, nor is the temperate life quiet, — certainly not upon this view; for the life which is temperate is supposed to be the good. And of two things, one is true, — either never, or very seldom, do the quiet actions in life appear to be better than the quick and energetic ones; or supposing that of the nobler actions, there are as many quiet, as quick and vehement: still, even if we grant this, temperance will not be acting quietly any more than acting quickly and

energetically, either in walking or talking or in anything else; nor will the quiet life be more temperate than the unquiet, seeing that temperance is admitted by us to be a good and noble thing, and the quick have been shown to be as good as the quiet.

I think, he said, Socrates, that you are right.

Then once more, Charmides, I said, fix your attention, and look within; consider the effect which temperance has upon yourself, and the nature of that which has the effect. Think over all this, and, like a brave youth, tell me — What is temperance?

After a moment's pause, in which he made a real manly effort to think, he said: My opinion is, Socrates, that temperance makes a man ashamed or modest, and that temperance is the same as modesty.

Very good, I said; and did you not admit, just now, that temperance is noble?

Yes, certainly, he said.

And the temperate are also good?

Yes.

And can that be good which does not make men good?

Certainly not.

And you would infer that temperance is not only noble, but also good?

That is my opinion.

Well, I said; but surely you would agree with Homer when he says,

'Modesty is not good for a needy man'?

Yes, he said; I agree.

Then I suppose that modesty is and is not good?

Clearly.

But temperance, whose presence makes men only good, and not bad, is always good?

That appears to me to be as you say.

And the inference is that temperance cannot be modesty — if temperance is a good, and if modesty is as much an evil as a good?

All that, Socrates, appears to me to be true; but I should like to know what you think about another definition of temperance, which I just now remember to have heard from some one, who said, 'That temperance is doing our own business.' Was he right who affirmed that?

You monster! I said; this is what Critias, or some philosopher has told you.

Some one else, then, said Critias; for certainly I have not.

But what matter, said Charmides, from whom I heard this?

No matter at all, I replied; for the point is not who said the words, but whether they are true or not.

There you are in the right, Socrates, he replied.

To be sure, I said; yet I doubt whether we shall ever be able to discover their truth or falsehood; for they are a kind of riddle.

What makes you think so? he said.

Because, I said, he who uttered them seems to me to have meant one thing, and said another. Is the scribe, for example, to be regarded as doing nothing when he reads or writes?

I should rather think that he was doing something.

And does the scribe write or read, or teach you boys to write or read, your own names only, or did you write your enemies' names as well as your own and your friends'?

As much one as the other.

And was there anything meddling or intemperate in this?

Certainly not.

And yet if reading and writing are the same as doing, you were doing what was not your own business?

But they are the same as doing.

And the healing art, my friend, and building, and weaving, and doing anything whatever which is done by art, — these all clearly come under the head of doing?

Certainly.

And do you think that a state would be well ordered by a law which compelled every man to weave and wash his own coat, and make his own shoes, and his own flask and strigil, and other implements, on this principle of every one doing and performing his own, and abstaining from what is not his own?

I think not, he said.

But, I said, a temperate state will be a well-ordered state.

Of course, he replied.

Then temperance, I said, will not be doing one's own business; not at least in this way, or doing things of this sort?

Clearly not.

Then, as I was just now saying, he who declared that temperance is a man doing his own business had another and a hidden meaning; for I do not think that he could have been such a fool as to mean this. Was he a fool who told you, Charmides?

Nay, he replied, I certainly thought him a very wise man.

Then I am quite certain that he put forth his definition as a riddle, thinking that no one would know the meaning of the words 'doing his own business.'

I dare say, he replied.

And what is the meaning of a man doing his own business? Can you tell me?

Indeed, I cannot; and I should not wonder if the man himself who used this phrase did not understand what he was saying. Whereupon he laughed slyly, and looked at Critias.

Critias had long been showing uneasiness, for he felt that he had a reputation to maintain with Charmides and the rest of the company. He had, however, hitherto managed to restrain himself; but now he could no longer forbear, and I am convinced of the truth of the suspicion which I entertained at the time, that Charmides had heard this answer about temperance from Critias. And Charmides, who did not want to answer himself, but to make Critias answer, tried to stir him up. He went on pointing out that he had been refuted, at which Critias grew angry, and appeared, as I thought, inclined to quarrel with him; just as a poet might quarrel with an actor who spoiled his poems in repeating them; so he looked hard at him and said —

Do you imagine, Charmides, that the author of this definition of temperance did not understand the meaning of his own words, because you do not understand them?

Why, at his age, I said, most excellent Critias, he can hardly be expected to understand; but you, who are older, and have studied, may well be assumed to know the meaning of them; and therefore, if you agree with him, and accept his definition of temperance, I would much rather argue with you than with him about the truth or falsehood of the definition.

I entirely agree, said Critias, and accept the definition.

Very good, I said; and now let me repeat my question — Do you admit, as I was just now saying, that all craftsmen make or do something?

I do.

And do they make or do their own business only, or that of others also?

They make or do that of others also.

And are they temperate, seeing that they make not for themselves or their own business only?

Why not? he said.

No objection on my part, I said, but there may be a difficulty on his who proposes as a definition of temperance, ‘doing one’s own business,’ and then says that there is no reason why those who do the business of others should not be temperate.

Nay (The English reader has to observe that the word ‘make’ (Greek), in Greek, has also the sense of ‘do’ (Greek).), said he; did I ever acknowledge that those who do the business of others are temperate? I said, those who make, not those who do.

What! I asked; do you mean to say that doing and making are not the same?

No more, he replied, than making or working are the same; thus much I have learned from Hesiod, who says that ‘work is no disgrace.’ Now do you imagine that if he had meant by working and doing such things as you were describing, he would have said that there was no disgrace in them — for example, in the manufacture of shoes, or in selling pickles, or sitting for hire in a house of ill-fame? That, Socrates, is not to be supposed: but I conceive him to have distinguished making from doing and work; and, while admitting that the making anything might sometimes become a disgrace, when the employment was not honourable, to have thought that work was never any disgrace at all. For things nobly and usefully made he called works; and such makings he called workings, and doings; and he must be supposed to have called such things only man’s proper business, and what is hurtful, not his business: and in that sense Hesiod, and any other wise man, may be reasonably supposed to call him wise who does his own work.

O Critias, I said, no sooner had you opened your mouth, than I pretty well knew that you would call that which is proper to a man, and that which is his own, good; and that the makings

(Greek) of the good you would call doings (Greek), for I am no stranger to the endless distinctions which Prodicus draws about names. Now I have no objection to your giving names any signification which you please, if you will only tell me what you mean by them. Please then to begin again, and be a little plainer. Do you mean that this doing or making, or whatever is the word which you would use, of good actions, is temperance?

I do, he said.

Then not he who does evil, but he who does good, is temperate?

Yes, he said; and you, friend, would agree.

No matter whether I should or not; just now, not what I think, but what you are saying, is the point at issue.

Well, he answered; I mean to say, that he who does evil, and not good, is not temperate; and that he is temperate who does good, and not evil: for temperance I define in plain words to be the doing of good actions.

And you may be very likely right in what you are saying; but I am curious to know whether you imagine that temperate men are ignorant of their own temperance?

I do not think so, he said.

And yet were you not saying, just now, that craftsmen might be temperate in doing another's work, as well as in doing their own?

I was, he replied; but what is your drift?

I have no particular drift, but I wish that you would tell me whether a physician who cures a patient may do good to himself and good to another also?

I think that he may.

And he who does so does his duty?

Yes.

And does not he who does his duty act temperately or wisely?

Yes, he acts wisely.

But must the physician necessarily know when his treatment is likely to prove beneficial, and when not? or must the craftsman necessarily know when he is likely to be benefited, and when not to be benefited, by the work which he is doing?

I suppose not.

Then, I said, he may sometimes do good or harm, and not know what he is himself doing, and yet, in doing good, as you say, he has done temperately or wisely. Was not that your statement?

Yes.

Then, as would seem, in doing good, he may act wisely or temperately, and be wise or temperate, but not know his own wisdom or temperance?

But that, Socrates, he said, is impossible; and therefore if this is, as you imply, the necessary consequence of any of my previous admissions, I will withdraw them, rather than admit that a man can be temperate or wise who does not know himself; and I am not ashamed to confess that I was in error. For self-knowledge would certainly be maintained by me to be the very essence of knowledge, and in this I agree with him who dedicated the inscription, 'Know thyself!' at Delphi. That word, if I am not mistaken, is put there as a sort of salutation which the god addresses to those who enter the temple; as much as to say that the ordinary salutation of 'Hail!' is not right, and that the exhortation 'Be temperate!' would be a far better way of saluting one another. The notion of him who dedicated the inscription was, as I believe, that the god speaks to those who enter his temple, not as men speak; but, when a worshipper enters, the first word which he hears is 'Be temperate!' This, however, like a prophet he expresses in a sort of riddle, for 'Know thyself!' and 'Be temperate!' are the same, as I maintain, and as the letters imply (Greek), and yet they may be easily

misunderstood; and succeeding sages who added ‘Never too much,’ or, ‘Give a pledge, and evil is nigh at hand,’ would appear to have so misunderstood them; for they imagined that ‘Know thyself!’ was a piece of advice which the god gave, and not his salutation of the worshippers at their first coming in; and they dedicated their own inscription under the idea that they too would give equally useful pieces of advice. Shall I tell you, Socrates, why I say all this? My object is to leave the previous discussion (in which I know not whether you or I are more right, but, at any rate, no clear result was attained), and to raise a new one in which I will attempt to prove, if you deny, that temperance is self-knowledge.

Yes, I said, Critias; but you come to me as though I professed to know about the questions which I ask, and as though I could, if I only would, agree with you. Whereas the fact is that I enquire with you into the truth of that which is advanced from time to time, just because I do not know; and when I have enquired, I will say whether I agree with you or not. Please then to allow me time to reflect.

Reflect, he said.

I am reflecting, I replied, and discover that temperance, or wisdom, if implying a knowledge of anything, must be a science, and a science of something.

Yes, he said; the science of itself.

Is not medicine, I said, the science of health?

True.

And suppose, I said, that I were asked by you what is the use or effect of medicine, which is this science of health, I should answer that medicine is of very great use in producing health, which, as you will admit, is an excellent effect.

Granted.

And if you were to ask me, what is the result or effect of architecture, which is the science of building, I should say houses, and so of other arts, which all have their different results. Now I want you, Critias, to answer a similar question about temperance, or wisdom, which, according to you, is the science of itself. Admitting this view, I ask of you, what good work, worthy of the name wise, does temperance or wisdom, which is the science of itself, effect? Answer me.

That is not the true way of pursuing the enquiry, Socrates, he said; for wisdom is not like the other sciences, any more than they are like one another: but you proceed as if they were alike. For tell me, he said, what result is there of computation or geometry, in the same sense as a house is the result of building, or a garment of weaving, or any other work of any other art? Can you show me any such result of them? You cannot.

That is true, I said; but still each of these sciences has a subject which is different from the science. I can show you that the art of computation has to do with odd and even numbers in their numerical relations to themselves and to each other. Is not that true?

Yes, he said.

And the odd and even numbers are not the same with the art of computation?

They are not.

The art of weighing, again, has to do with lighter and heavier; but the art of weighing is one thing, and the heavy and the light another. Do you admit that?

Yes.

Now, I want to know, what is that which is not wisdom, and of which wisdom is the science?

You are just falling into the old error, Socrates, he said. You come asking in what wisdom or temperance differs from the

other sciences, and then you try to discover some respect in which they are alike; but they are not, for all the other sciences are of something else, and not of themselves; wisdom alone is a science of other sciences, and of itself. And of this, as I believe, you are very well aware: and that you are only doing what you denied that you were doing just now, trying to refute me, instead of pursuing the argument.

And what if I am? How can you think that I have any other motive in refuting you but what I should have in examining into myself? which motive would be just a fear of my unconsciously fancying that I knew something of which I was ignorant. And at this moment I pursue the argument chiefly for my own sake, and perhaps in some degree also for the sake of my other friends. For is not the discovery of things as they truly are, a good common to all mankind?

Yes, certainly, Socrates, he said.

Then, I said, be cheerful, sweet sir, and give your opinion in answer to the question which I asked, never minding whether Critias or Socrates is the person refuted; attend only to the argument, and see what will come of the refutation.

I think that you are right, he replied; and I will do as you say.

Tell me, then, I said, what you mean to affirm about wisdom.

I mean to say that wisdom is the only science which is the science of itself as well as of the other sciences.

But the science of science, I said, will also be the science of the absence of science.

Very true, he said.

Then the wise or temperate man, and he only, will know himself, and be able to examine what he knows or does not know, and to see what others know and think that they know and do really know; and what they do not know, and fancy that they know, when they do not. No other person will be able to do this. And

this is wisdom and temperance and self-knowledge — for a man to know what he knows, and what he does not know. That is your meaning?

Yes, he said.

Now then, I said, making an offering of the third or last argument to Zeus the Saviour, let us begin again, and ask, in the first place, whether it is or is not possible for a person to know that he knows and does not know what he knows and does not know; and in the second place, whether, if perfectly possible, such knowledge is of any use.

That is what we have to consider, he said.

And here, Critias, I said, I hope that you will find a way out of a difficulty into which I have got myself. Shall I tell you the nature of the difficulty?

By all means, he replied.

Does not what you have been saying, if true, amount to this: that there must be a single science which is wholly a science of itself and of other sciences, and that the same is also the science of the absence of science?

Yes.

But consider how monstrous this proposition is, my friend: in any parallel case, the impossibility will be transparent to you.

How is that? and in what cases do you mean?

In such cases as this: Suppose that there is a kind of vision which is not like ordinary vision, but a vision of itself and of other sorts of vision, and of the defect of them, which in seeing sees no colour, but only itself and other sorts of vision: Do you think that there is such a kind of vision?

Certainly not.

Or is there a kind of hearing which hears no sound at all, but only itself and other sorts of hearing, or the defects of them?

There is not.

Or take all the senses: can you imagine that there is any sense of itself and of other senses, but which is incapable of perceiving the objects of the senses?

I think not.

Could there be any desire which is not the desire of any pleasure, but of itself, and of all other desires?

Certainly not.

Or can you imagine a wish which wishes for no good, but only for itself and all other wishes?

I should answer, No.

Or would you say that there is a love which is not the love of beauty, but of itself and of other loves?

I should not.

Or did you ever know of a fear which fears itself or other fears, but has no object of fear?

I never did, he said.

Or of an opinion which is an opinion of itself and of other opinions, and which has no opinion on the subjects of opinion in general?

Certainly not.

But surely we are assuming a science of this kind, which, having no subject-matter, is a science of itself and of the other sciences?

Yes, that is what is affirmed.

But how strange is this, if it be indeed true: we must not however as yet absolutely deny the possibility of such a science; let us rather consider the matter.

You are quite right.

Well then, this science of which we are speaking is a science of something, and is of a nature to be a science of something?

Yes.

Just as that which is greater is of a nature to be greater than something else? (Socrates is intending to show that science differs from the object of science, as any other relative differs from the object of relation. But where there is comparison — greater, less, heavier, lighter, and the like — a relation to self as well as to other things involves an absolute contradiction; and in other cases, as in the case of the senses, is hardly conceivable. The use of the genitive after the comparative in Greek, (Greek), creates an unavoidable obscurity in the translation.)

Yes.

Which is less, if the other is conceived to be greater?

To be sure.

And if we could find something which is at once greater than itself, and greater than other great things, but not greater than those things in comparison of which the others are greater, then that thing would have the property of being greater and also less than itself?

That, Socrates, he said, is the inevitable inference.

Or if there be a double which is double of itself and of other doubles, these will be halves; for the double is relative to the half?

That is true.

And that which is greater than itself will also be less, and that which is heavier will also be lighter, and that which is older will also be younger: and the same of other things; that which has a nature relative to self will retain also the nature of its object: I mean to say, for example, that hearing is, as we say, of sound or voice. Is that true?

Yes.

Then if hearing hears itself, it must hear a voice; for there is no other way of hearing.

Certainly.

And sight also, my excellent friend, if it sees itself must see a colour, for sight cannot see that which has no colour.

No.

Do you remark, Critias, that in several of the examples which have been recited the notion of a relation to self is altogether inadmissible, and in other cases hardly credible — inadmissible, for example, in the case of magnitudes, numbers, and the like?

Very true.

But in the case of hearing and sight, or in the power of self-motion, and the power of heat to burn, this relation to self will be regarded as incredible by some, but perhaps not by others. And some great man, my friend, is wanted, who will satisfactorily determine for us, whether there is nothing which has an inherent property of relation to self, or some things only and not others; and whether in this class of self-related things, if there be such a class, that science which is called wisdom or temperance is included. I altogether distrust my own power of determining these matters: I am not certain whether there is such a science of science at all; and even if there be, I should not acknowledge this to be wisdom or temperance, until I can also see whether such a science would or would not do us any good; for I have an impression that temperance is a benefit and a good. And therefore, O son of Callaeschrus, as you maintain that temperance or wisdom is a science of science, and also of the absence of science, I will request you to show in the first place, as I was saying before, the possibility, and in the second place, the advantage, of such a science; and then perhaps you may satisfy me that you are right in your view of temperance.

Critias heard me say this, and saw that I was in a difficulty; and as one person when another yawns in his presence catches the infection of yawning from him, so did he seem to be driven into a difficulty by my difficulty. But as he had a reputation to maintain, he was ashamed to admit before the company that he could not answer my challenge or determine the question at issue; and he made an unintelligible attempt to hide his perplexity. In order that the argument might proceed, I said to him, Well then Critias, if you like, let us assume that there is this science of science; whether the assumption is right or wrong may hereafter be investigated. Admitting the existence of it, will you tell me how such a science enables us to distinguish what we know or do not know, which, as we were saying, is self-knowledge or wisdom: so we were saying?

Yes, Socrates, he said; and that I think is certainly true: for he who has this science or knowledge which knows itself will become like the knowledge which he has, in the same way that he who has swiftness will be swift, and he who has beauty will be beautiful, and he who has knowledge will know. In the same way he who has that knowledge which is self-knowing, will know himself.

I do not doubt, I said, that a man will know himself, when he possesses that which has self-knowledge: but what necessity is there that, having this, he should know what he knows and what he does not know?

Because, Socrates, they are the same.

Very likely, I said; but I remain as stupid as ever; for still I fail to comprehend how this knowing what you know and do not know is the same as the knowledge of self.

What do you mean? he said.

This is what I mean, I replied: I will admit that there is a science of science; — can this do more than determine that of two things one is and the other is not science or knowledge?

No, just that.

But is knowledge or want of knowledge of health the same as knowledge or want of knowledge of justice?

Certainly not.

The one is medicine, and the other is politics; whereas that of which we are speaking is knowledge pure and simple.

Very true.

And if a man knows only, and has only knowledge of knowledge, and has no further knowledge of health and justice, the probability is that he will only know that he knows something, and has a certain knowledge, whether concerning himself or other men.

True.

Then how will this knowledge or science teach him to know what he knows? Say that he knows health; — not wisdom or temperance, but the art of medicine has taught it to him; — and he has learned harmony from the art of music, and building from the art of building, — neither, from wisdom or temperance: and the same of other things.

That is evident.

How will wisdom, regarded only as a knowledge of knowledge or science of science, ever teach him that he knows health, or that he knows building?

It is impossible.

Then he who is ignorant of these things will only know that he knows, but not what he knows?

True.

Then wisdom or being wise appears to be not the knowledge of the things which we do or do not know, but only the knowledge that we know or do not know?

That is the inference.

Then he who has this knowledge will not be able to examine whether a pretender knows or does not know that which he says that he knows: he will only know that he has a knowledge of some kind; but wisdom will not show him of what the knowledge is?

Plainly not.

Neither will he be able to distinguish the pretender in medicine from the true physician, nor between any other true and false professor of knowledge. Let us consider the matter in this way: If the wise man or any other man wants to distinguish the true physician from the false, how will he proceed? He will not talk to him about medicine; and that, as we were saying, is the only thing which the physician understands.

True.

And, on the other hand, the physician knows nothing of science, for this has been assumed to be the province of wisdom.

True.

And further, since medicine is science, we must infer that he does not know anything of medicine.

Exactly.

Then the wise man may indeed know that the physician has some kind of science or knowledge; but when he wants to discover the nature of this he will ask, What is the subject-matter? For the several sciences are distinguished not by the mere fact that they are sciences, but by the nature of their subjects. Is not that true?

Quite true.

And medicine is distinguished from other sciences as having the subject-matter of health and disease?

Yes.

And he who would enquire into the nature of medicine must pursue the enquiry into health and disease, and not into what is extraneous?

True.

And he who judges rightly will judge of the physician as a physician in what relates to these?

He will.

He will consider whether what he says is true, and whether what he does is right, in relation to health and disease?

He will.

But can any one attain the knowledge of either unless he have a knowledge of medicine?

He cannot.

No one at all, it would seem, except the physician can have this knowledge; and therefore not the wise man; he would have to be a physician as well as a wise man.

Very true.

Then, assuredly, wisdom or temperance, if only a science of science, and of the absence of science or knowledge, will not be able to distinguish the physician who knows from one who does not know but pretends or thinks that he knows, or any other professor of anything at all; like any other artist, he will only know his fellow in art or wisdom, and no one else.

That is evident, he said.

But then what profit, Critias, I said, is there any longer in wisdom or temperance which yet remains, if this is wisdom? If, indeed, as we were supposing at first, the wise man had been able to distinguish what he knew and did not know, and that he knew the one and did not know the other, and to recognize a similar faculty of discernment in others, there would certainly have been a great advantage in being wise; for then we should

never have made a mistake, but have passed through life the unerring guides of ourselves and of those who are under us; and we should not have attempted to do what we did not know, but we should have found out those who knew, and have handed the business over to them and trusted in them; nor should we have allowed those who were under us to do anything which they were not likely to do well; and they would be likely to do well just that of which they had knowledge; and the house or state which was ordered or administered under the guidance of wisdom, and everything else of which wisdom was the lord, would have been well ordered; for truth guiding, and error having been eliminated, in all their doings, men would have done well, and would have been happy. Was not this, Critias, what we spoke of as the great advantage of wisdom — to know what is known and what is unknown to us?

Very true, he said.

And now you perceive, I said, that no such science is to be found anywhere.

I perceive, he said.

May we assume then, I said, that wisdom, viewed in this new light merely as a knowledge of knowledge and ignorance, has this advantage: — that he who possesses such knowledge will more easily learn anything which he learns; and that everything will be clearer to him, because, in addition to the knowledge of individuals, he sees the science, and this also will better enable him to test the knowledge which others have of what he knows himself; whereas the enquirer who is without this knowledge may be supposed to have a feebler and weaker insight? Are not these, my friend, the real advantages which are to be gained from wisdom? And are not we looking and seeking after something more than is to be found in her?

That is very likely, he said.

That is very likely, I said; and very likely, too, we have been enquiring to no purpose; as I am led to infer, because I observe that if this is wisdom, some strange consequences would follow. Let us, if you please, assume the possibility of this science of sciences, and further admit and allow, as was originally suggested, that wisdom is the knowledge of what we know and do not know. Assuming all this, still, upon further consideration, I am doubtful, Critias, whether wisdom, such as this, would do us much good. For we were wrong, I think, in supposing, as we were saying just now, that such wisdom ordering the government of house or state would be a great benefit.

How so? he said.

Why, I said, we were far too ready to admit the great benefits which mankind would obtain from their severally doing the things which they knew, and committing the things of which they are ignorant to those who were better acquainted with them.

Were we not right in making that admission?

I think not.

How very strange, Socrates!

By the dog of Egypt, I said, there I agree with you; and I was thinking as much just now when I said that strange consequences would follow, and that I was afraid we were on the wrong track; for however ready we may be to admit that this is wisdom, I certainly cannot make out what good this sort of thing does to us.

What do you mean? he said; I wish that you could make me understand what you mean.

I dare say that what I am saying is nonsense, I replied; and yet if a man has any feeling of what is due to himself, he cannot let the thought which comes into his mind pass away unheeded and unexamined.

I like that, he said.

Hear, then, I said, my own dream; whether coming through the horn or the ivory gate, I cannot tell. The dream is this: Let us suppose that wisdom is such as we are now defining, and that she has absolute sway over us; then each action will be done according to the arts or sciences, and no one professing to be a pilot when he is not, or any physician or general, or any one else pretending to know matters of which he is ignorant, will deceive or elude us; our health will be improved; our safety at sea, and also in battle, will be assured; our coats and shoes, and all other instruments and implements will be skilfully made, because the workmen will be good and true. Aye, and if you please, you may suppose that prophecy, which is the knowledge of the future, will be under the control of wisdom, and that she will deter deceivers and set up the true prophets in their place as the revealers of the future. Now I quite agree that mankind, thus provided, would live and act according to knowledge, for wisdom would watch and prevent ignorance from intruding on us. But whether by acting according to knowledge we shall act well and be happy, my dear Critias, — this is a point which we have not yet been able to determine.

Yet I think, he replied, that if you discard knowledge, you will hardly find the crown of happiness in anything else.

But of what is this knowledge? I said. Just answer me that small question. Do you mean a knowledge of shoemaking?

God forbid.

Or of working in brass?

Certainly not.

Or in wool, or wood, or anything of that sort?

No, I do not.

Then, I said, we are giving up the doctrine that he who lives according to knowledge is happy, for these live according to

knowledge, and yet they are not allowed by you to be happy; but I think that you mean to confine happiness to particular individuals who live according to knowledge, such for example as the prophet, who, as I was saying, knows the future. Is it of him you are speaking or of some one else?

Yes, I mean him, but there are others as well.

Yes, I said, some one who knows the past and present as well as the future, and is ignorant of nothing. Let us suppose that there is such a person, and if there is, you will allow that he is the most knowing of all living men.

Certainly he is.

Yet I should like to know one thing more: which of the different kinds of knowledge makes him happy? or do all equally make him happy?

Not all equally, he replied.

But which most tends to make him happy? the knowledge of what past, present, or future thing? May I infer this to be the knowledge of the game of draughts?

Nonsense about the game of draughts.

Or of computation?

No.

Or of health?

That is nearer the truth, he said.

And that knowledge which is nearest of all, I said, is the knowledge of what?

The knowledge with which he discerns good and evil.

Monster! I said; you have been carrying me round in a circle, and all this time hiding from me the fact that the life according to knowledge is not that which makes men act rightly and be happy, not even if knowledge include all the sciences, but one

science only, that of good and evil. For, let me ask you, Critias, whether, if you take away this, medicine will not equally give health, and shoemaking equally produce shoes, and the art of the weaver clothes? — whether the art of the pilot will not equally save our lives at sea, and the art of the general in war?

Quite so.

And yet, my dear Critias, none of these things will be well or beneficially done, if the science of the good be wanting.

True.

But that science is not wisdom or temperance, but a science of human advantage; not a science of other sciences, or of ignorance, but of good and evil: and if this be of use, then wisdom or temperance will not be of use.

And why, he replied, will not wisdom be of use? For, however much we assume that wisdom is a science of sciences, and has a sway over other sciences, surely she will have this particular science of the good under her control, and in this way will benefit us.

And will wisdom give health? I said; is not this rather the effect of medicine? Or does wisdom do the work of any of the other arts, — do they not each of them do their own work? Have we not long ago asseverated that wisdom is only the knowledge of knowledge and of ignorance, and of nothing else?

That is obvious.

Then wisdom will not be the producer of health.

Certainly not.

The art of health is different.

Yes, different.

Nor does wisdom give advantage, my good friend; for that again we have just now been attributing to another art.

Very true.

How then can wisdom be advantageous, when giving no advantage?

That, Socrates, is certainly inconceivable.

You see then, Critias, that I was not far wrong in fearing that I could have no sound notion about wisdom; I was quite right in depreciating myself; for that which is admitted to be the best of all things would never have seemed to us useless, if I had been good for anything at an enquiry. But now I have been utterly defeated, and have failed to discover what that is to which the imposer of names gave this name of temperance or wisdom. And yet many more admissions were made by us than could be fairly granted; for we admitted that there was a science of science, although the argument said No, and protested against us; and we admitted further, that this science knew the works of the other sciences (although this too was denied by the argument), because we wanted to show that the wise man had knowledge of what he knew and did not know; also we nobly disregarded, and never even considered, the impossibility of a man knowing in a sort of way that which he does not know at all; for our assumption was, that he knows that which he does not know; than which nothing, as I think, can be more irrational. And yet, after finding us so easy and good-natured, the enquiry is still unable to discover the truth; but mocks us to a degree, and has gone out of its way to prove the inutility of that which we admitted only by a sort of supposition and fiction to be the true definition of temperance or wisdom: which result, as far as I am concerned, is not so much to be lamented, I said. But for your sake, Charmides, I am very sorry — that you, having such beauty and such wisdom and temperance of soul, should have no profit or good in life from your wisdom and temperance. And still more am I grieved about the charm which I learned with so much pain, and to so little profit, from the Thracian, for the sake of a thing which is nothing worth. I think indeed that there is a

mistake, and that I must be a bad enquirer, for wisdom or temperance I believe to be really a great good; and happy are you, Charmides, if you certainly possess it. Wherefore examine yourself, and see whether you have this gift and can do without the charm; for if you can, I would rather advise you to regard me simply as a fool who is never able to reason out anything; and to rest assured that the more wise and temperate you are, the happier you will be.

Charmides said: I am sure that I do not know, Socrates, whether I have or have not this gift of wisdom and temperance; for how can I know whether I have a thing, of which even you and Critias are, as you say, unable to discover the nature? — (not that I believe you.) And further, I am sure, Socrates, that I do need the charm, and as far as I am concerned, I shall be willing to be charmed by you daily, until you say that I have had enough.

Very good, Charmides, said Critias; if you do this I shall have a proof of your temperance, that is, if you allow yourself to be charmed by Socrates, and never desert him at all.

You may depend on my following and not deserting him, said Charmides: if you who are my guardian command me, I should be very wrong not to obey you.

And I do command you, he said.

Then I will do as you say, and begin this very day.

You sirs, I said, what are you conspiring about?

We are not conspiring, said Charmides, we have conspired already.

And are you about to use violence, without even going through the forms of justice?

Yes, I shall use violence, he replied, since he orders me; and therefore you had better consider well.

But the time for consideration has passed, I said, when violence is employed; and you, when you are determined on anything,

and in the mood of violence, are irresistible.

Do not you resist me then, he said.

I will not resist you, I replied.

Hippias Minor

ΙΠΠΙΑΣ ΜΙΚΡΟΣ

Eudicus: Why are you silent, Socrates, after the magnificent display which Hippias has been making? Why do you not either refute his words, if he seems to you to have been wrong in any point, or join with us in commending him? There is the more reason why you should speak, because we are now alone, and the audience is confined to those who may fairly claim to take part in a philosophical discussion.

Socrates: I should greatly like, Eudicus, to ask Hippias the meaning of what he was saying just now about Homer. I have heard your father, Apemantus, declare that the Iliad of Homer is a finer poem than the Odyssey in the same degree that Achilles was a better man than Odysseus; Odysseus, he would say, is the central figure of the one poem and Achilles of the other. Now, I should like to know, if Hippias has no objection to tell me, what he thinks about these two heroes, and which of them he maintains to be the better; he has already told us in the course of his exhibition many things of various kinds about Homer and divers other poets.

Eudicus: I am sure that Hippias will be delighted to answer anything which you would like to ask; tell me, Hippias, if Socrates asks you a question, will you answer him?

Hippias: Indeed, Eudicus, I should be strangely inconsistent if I refused to answer Socrates, when at each Olympic festival, as I went up from my house at Elis to the temple of Olympia, where all the Hellenes were assembled, I continually professed my

willingness to perform any of the exhibitions which I had prepared, and to answer any questions which any one had to ask.

Socrates: Truly, Hippias, you are to be congratulated, if at every Olympic festival you have such an encouraging opinion of your own wisdom when you go up to the temple. I doubt whether any muscular hero would be so fearless and confident in offering his body to the combat at Olympia, as you are in offering your mind.

Hippias: And with good reason, Socrates; for since the day when I first entered the lists at Olympia I have never found any man who was my superior in anything. (Compare Gorgias.)

Socrates: What an ornament, Hippias, will the reputation of your wisdom be to the city of Elis and to your parents! But to return: what say you of Odysseus and Achilles? Which is the better of the two? and in what particular does either surpass the other? For when you were exhibiting and there was company in the room, though I could not follow you, I did not like to ask what you meant, because a crowd of people were present, and I was afraid that the question might interrupt your exhibition. But now that there are not so many of us, and my friend Eudicus bids me ask, I wish you would tell me what you were saying about these two heroes, so that I may clearly understand; how did you distinguish them?

Hippias: I shall have much pleasure, Socrates, in explaining to you more clearly than I could in public my views about these and also about other heroes. I say that Homer intended Achilles to be the bravest of the men who went to Troy, Nestor the wisest, and Odysseus the wiliest.

Socrates: O rare Hippias, will you be so good as not to laugh, if I find a difficulty in following you, and repeat my questions several times over? Please to answer me kindly and gently.

Hippias: I should be greatly ashamed of myself, Socrates, if I, who teach others and take money of them, could not, when I

was asked by you, answer in a civil and agreeable manner.

Socrates: Thank you: the fact is, that I seemed to understand what you meant when you said that the poet intended Achilles to be the bravest of men, and also that he intended Nestor to be the wisest; but when you said that he meant Odysseus to be the wiliest, I must confess that I could not understand what you were saying. Will you tell me, and then I shall perhaps understand you better; has not Homer made Achilles wily?

Hippias: Certainly not, Socrates; he is the most straight-forward of mankind, and when Homer introduces them talking with one another in the passage called the Prayers, Achilles is supposed by the poet to say to Odysseus: —

‘Son of Laertes, sprung from heaven, crafty Odysseus, I will speak out plainly the word which I intend to carry out in act, and which will, I believe, be accomplished. For I hate him like the gates of death who thinks one thing and says another. But I will speak that which shall be accomplished.’

Now, in these verses he clearly indicates the character of the two men; he shows Achilles to be true and simple, and Odysseus to be wily and false; for he supposes Achilles to be addressing Odysseus in these lines.

Socrates: Now, Hippias, I think that I understand your meaning; when you say that Odysseus is wily, you clearly mean that he is false?

Hippias: Exactly so, Socrates; it is the character of Odysseus, as he is represented by Homer in many passages both of the Iliad and Odyssey.

Socrates: And Homer must be presumed to have meant that the true man is not the same as the false?

Hippias: Of course, Socrates.

Socrates: And is that your own opinion, Hippias?

Hippias: Certainly; how can I have any other?

Socrates: Well, then, as there is no possibility of asking Homer what he meant in these verses of his, let us leave him; but as you show a willingness to take up his cause, and your opinion agrees with what you declare to be his, will you answer on behalf of yourself and him?

Hippias: I will; ask shortly anything which you like.

Socrates: Do you say that the false, like the sick, have no power to do things, or that they have the power to do things?

Hippias: I should say that they have power to do many things, and in particular to deceive mankind.

Socrates: Then, according to you, they are both powerful and wily, are they not?

Hippias: Yes.

Socrates: And are they wily, and do they deceive by reason of their simplicity and folly, or by reason of their cunning and a certain sort of prudence?

Hippias: By reason of their cunning and prudence, most certainly.

Socrates: Then they are prudent, I suppose?

Hippias: So they are — very.

Socrates: And if they are prudent, do they know or do they not know what they do?

Hippias: Of course, they know very well; and that is why they do mischief to others.

Socrates: And having this knowledge, are they ignorant, or are they wise?

Hippias: Wise, certainly; at least, in so far as they can deceive.

Socrates: Stop, and let us recall to mind what you are saying; are you not saying that the false are powerful and prudent and knowing and wise in those things about which they are false?

Hippias: To be sure.

Socrates: And the true differ from the false — the true and the false are the very opposite of each other?

Hippias: That is my view.

Socrates: Then, according to your view, it would seem that the false are to be ranked in the class of the powerful and wise?

Hippias: Assuredly.

Socrates: And when you say that the false are powerful and wise in so far as they are false, do you mean that they have or have not the power of uttering their falsehoods if they like?

Hippias: I mean to say that they have the power.

Socrates: In a word, then, the false are they who are wise and have the power to speak falsely?

Hippias: Yes.

Socrates: Then a man who has not the power of speaking falsely and is ignorant cannot be false?

Hippias: You are right.

Socrates: And every man has power who does that which he wishes at the time when he wishes. I am not speaking of any special case in which he is prevented by disease or something of that sort, but I am speaking generally, as I might say of you, that you are able to write my name when you like. Would you not call a man able who could do that?

Hippias: Yes.

Socrates: And tell me, Hippias, are you not a skilful calculator and arithmetician?

Hippias: Yes, Socrates, assuredly I am.

Socrates: And if some one were to ask you what is the sum of 3 multiplied by 700, you would tell him the true answer in a moment, if you pleased?

Hippias: certainly I should.

Socrates: Is not that because you are the wisest and ablest of men in these matters?

Hippias: Yes.

Socrates: And being as you are the wisest and ablest of men in these matters of calculation, are you not also the best?

Hippias: To be sure, Socrates, I am the best.

Socrates: And therefore you would be the most able to tell the truth about these matters, would you not?

Hippias: Yes, I should.

Socrates: And could you speak falsehoods about them equally well? I must beg, Hippias, that you will answer me with the same frankness and magnanimity which has hitherto characterized you. If a person were to ask you what is the sum of 3 multiplied by 700, would not you be the best and most consistent teller of a falsehood, having always the power of speaking falsely as you have of speaking truly, about these same matters, if you wanted to tell a falsehood, and not to answer truly? Would the ignorant man be better able to tell a falsehood in matters of calculation than you would be, if you chose? Might he not sometimes stumble upon the truth, when he wanted to tell a lie, because he did not know, whereas you who are the wise man, if you wanted to tell a lie would always and consistently lie?

Hippias: Yes, there you are quite right.

Socrates: Does the false man tell lies about other things, but not about number, or when he is making a calculation?

Hippias: To be sure; he would tell as many lies about number as about other things.

Socrates: Then may we further assume, Hippias, that there are men who are false about calculation and number?

Hippias: Yes.

Socrates: Who can they be? For you have already admitted that he who is false must have the ability to be false: you said, as you will remember, that he who is unable to be false will not be false?

Hippias: Yes, I remember; it was so said.

Socrates: And were you not yourself just now shown to be best able to speak falsely about calculation?

Hippias: Yes; that was another thing which was said.

Socrates: And are you not likewise said to speak truly about calculation?

Hippias: Certainly.

Socrates: Then the same person is able to speak both falsely and truly about calculation? And that person is he who is good at calculation — the arithmetician?

Hippias: Yes.

Socrates: Who, then, Hippias, is discovered to be false at calculation? Is he not the good man? For the good man is the able man, and he is the true man.

Hippias: That is evident.

Socrates: Do you not see, then, that the same man is false and also true about the same matters? And the true man is not a whit better than the false; for indeed he is the same with him and not the very opposite, as you were just now imagining.

Hippias: Not in that instance, clearly.

Socrates: Shall we examine other instances?

Hippias: Certainly, if you are disposed.

Socrates: Are you not also skilled in geometry?

Hippias: I am.

Socrates: Well, and does not the same hold in that science also? Is not the same person best able to speak falsely or to speak truly about diagrams; and he is — the geometrician?

Hippias: Yes.

Socrates: He and no one else is good at it?

Hippias: Yes, he and no one else.

Socrates: Then the good and wise geometer has this double power in the highest degree; and if there be a man who is false about diagrams the good man will be he, for he is able to be false; whereas the bad is unable, and for this reason is not false, as has been admitted.

Hippias: True.

Socrates: Once more — let us examine a third case; that of the astronomer, in whose art, again, you, Hippias, profess to be a still greater proficient than in the preceding — do you not?

Hippias: Yes, I am.

Socrates: And does not the same hold of astronomy?

Hippias: True, Socrates.

Socrates: And in astronomy, too, if any man be able to speak falsely he will be the good astronomer, but he who is not able will not speak falsely, for he has no knowledge.

Hippias: Clearly not.

Socrates: Then in astronomy also, the same man will be true and false?

Hippias: It would seem so.

Socrates: And now, Hippias, consider the question at large about all the sciences, and see whether the same principle does not always hold. I know that in most arts you are the wisest of men, as I have heard you boasting in the agora at the tables of the money-changers, when you were setting forth the great and

enviable stores of your wisdom; and you said that upon one occasion, when you went to the Olympic games, all that you had on your person was made by yourself. You began with your ring, which was of your own workmanship, and you said that you could engrave rings; and you had another seal which was also of your own workmanship, and a strigil and an oil flask, which you had made yourself; you said also that you had made the shoes which you had on your feet, and the cloak and the short tunic; but what appeared to us all most extraordinary and a proof of singular art, was the girdle of your tunic, which, you said, was as fine as the most costly Persian fabric, and of your own weaving; moreover, you told us that you had brought with you poems, epic, tragic, and dithyrambic, as well as prose writings of the most various kinds; and you said that your skill was also pre-eminent in the arts which I was just now mentioning, and in the true principles of rhythm and harmony and of orthography; and if I remember rightly, there were a great many other accomplishments in which you excelled. I have forgotten to mention your art of memory, which you regard as your special glory, and I dare say that I have forgotten many other things; but, as I was saying, only look to your own arts — and there are plenty of them — and to those of others; and tell me, having regard to the admissions which you and I have made, whether you discover any department of art or any description of wisdom or cunning, whichever name you use, in which the true and false are different and not the same: tell me, if you can, of any. But you cannot.

Hippias: Not without consideration, Socrates.

Socrates: Nor will consideration help you, Hippias, as I believe; but then if I am right, remember what the consequence will be.

Hippias: I do not know what you mean, Socrates.

Socrates: I suppose that you are not using your art of memory, doubtless because you think that such an accomplishment is not needed on the present occasion. I will therefore remind you of

what you were saying: were you not saying that Achilles was a true man, and Odysseus false and wily?

Hippias: I was.

Socrates: And now do you perceive that the same person has turned out to be false as well as true? If Odysseus is false he is also true, and if Achilles is true he is also false, and so the two men are not opposed to one another, but they are alike.

Hippias: O Socrates, you are always weaving the meshes of an argument, selecting the most difficult point, and fastening upon details instead of grappling with the matter in hand as a whole. Come now, and I will demonstrate to you, if you will allow me, by many satisfactory proofs, that Homer has made Achilles a better man than Odysseus, and a truthful man too; and that he has made the other crafty, and a teller of many untruths, and inferior to Achilles. And then, if you please, you shall make a speech on the other side, in order to prove that Odysseus is the better man; and this may be compared to mine, and then the company will know which of us is the better speaker.

Socrates: O Hippias, I do not doubt that you are wiser than I am. But I have a way, when anybody else says anything, of giving close attention to him, especially if the speaker appears to me to be a wise man. Having a desire to understand, I question him, and I examine and analyse and put together what he says, in order that I may understand; but if the speaker appears to me to be a poor hand, I do not interrogate him, or trouble myself about him, and you may know by this who they are whom I deem to be wise men, for you will see that when I am talking with a wise man, I am very attentive to what he says; and I ask questions of him, in order that I may learn, and be improved by him. And I could not help remarking while you were speaking, that when you recited the verses in which Achilles, as you argued, attacks Odysseus as a deceiver, that you must be strangely mistaken, because Odysseus, the man of wiles, is never found to tell a lie; but Achilles is found to be wily on your own showing. At any rate

he speaks falsely; for first he utters these words, which you just now repeated, —

‘He is hateful to me even as the gates of death who thinks one thing and says another:’ —

And then he says, a little while afterwards, he will not be persuaded by Odysseus and Agamemnon, neither will he remain at Troy; but, says he, —

‘To-morrow, when I have offered sacrifices to Zeus and all the Gods, having loaded my ships well, I will drag them down into the deep; and then you shall see, if you have a mind, and if such things are a care to you, early in the morning my ships sailing over the fishy Hellespont, and my men eagerly plying the oar; and, if the illustrious shaker of the earth gives me a good voyage, on the third day I shall reach the fertile Phthia.’

And before that, when he was reviling Agamemnon, he said, —

‘And now to Phthia I will go, since to return home in the beaked ships is far better, nor am I inclined to stay here in dishonour and amass wealth and riches for you.’

But although on that occasion, in the presence of the whole army, he spoke after this fashion, and on the other occasion to his companions, he appears never to have made any preparation or attempt to draw down the ships, as if he had the least intention of sailing home; so nobly regardless was he of the truth. Now I, Hippias, originally asked you the question, because I was in doubt as to which of the two heroes was intended by the poet to be the best, and because I thought that both of them were the best, and that it would be difficult to decide which was the better of them, not only in respect of truth and falsehood, but of virtue generally, for even in this matter of speaking the truth they are much upon a par.

Hippias: There you are wrong, Socrates; for in so far as Achilles speaks falsely, the falsehood is obviously unintentional. He is compelled against his will to remain and rescue the army in

their misfortune. But when Odysseus speaks falsely he is voluntarily and intentionally false.

Socrates: You, sweet Hippias, like Odysseus, are a deceiver yourself.

Hippias: Certainly not, Socrates; what makes you say so?

Socrates: Because you say that Achilles does not speak falsely from design, when he is not only a deceiver, but besides being a braggart, in Homer's description of him is so cunning, and so far superior to Odysseus in lying and pretending, that he dares to contradict himself, and Odysseus does not find him out; at any rate he does not appear to say anything to him which would imply that he perceived his falsehood.

Hippias: What do you mean, Socrates?

Socrates: Did you not observe that afterwards, when he is speaking to Odysseus, he says that he will sail away with the early dawn; but to Ajax he tells quite a different story?

Hippias: Where is that?

Socrates: Where he says, —

'I will not think about bloody war until the son of warlike Priam, illustrious Hector, comes to the tents and ships of the Myrmidons, slaughtering the Argives, and burning the ships with fire; and about my tent and dark ship, I suspect that Hector, although eager for the battle, will nevertheless stay his hand.'

Now, do you really think, Hippias, that the son of Thetis, who had been the pupil of the sage Cheiron, had such a bad memory, or would have carried the art of lying to such an extent (when he had been assailing liars in the most violent terms only the instant before) as to say to Odysseus that he would sail away, and to Ajax that he would remain, and that he was not rather practising upon the simplicity of Odysseus, whom he regarded as an ancient, and thinking that he would get the better of him

by his own cunning and falsehood?

Hippias: No, I do not agree with you, Socrates; but I believe that Achilles is induced to say one thing to Ajax, and another to Odysseus in the innocence of his heart, whereas Odysseus, whether he speaks falsely or truly, speaks always with a purpose.

Socrates: Then Odysseus would appear after all to be better than Achilles?

Hippias: Certainly not, Socrates.

Socrates: Why, were not the voluntary liars only just now shown to be better than the involuntary?

Hippias: And how, Socrates, can those who intentionally err, and voluntarily and designedly commit iniquities, be better than those who err and do wrong involuntarily? Surely there is a great excuse to be made for a man telling a falsehood, or doing an injury or any sort of harm to another in ignorance. And the laws are obviously far more severe on those who lie or do evil, voluntarily, than on those who do evil involuntarily.

Socrates: You see, Hippias, as I have already told you, how pertinacious I am in asking questions of wise men. And I think that this is the only good point about me, for I am full of defects, and always getting wrong in some way or other. My deficiency is proved to me by the fact that when I meet one of you who are famous for wisdom, and to whose wisdom all the Hellenes are witnesses, I am found out to know nothing. For speaking generally, I hardly ever have the same opinion about anything which you have, and what proof of ignorance can be greater than to differ from wise men? But I have one singular good quality, which is my salvation; I am not ashamed to learn, and I ask and enquire, and am very grateful to those who answer me, and never fail to give them my grateful thanks; and when I learn a thing I never deny my teacher, or pretend that the lesson is a discovery of my own; but I praise his wisdom, and proclaim what

I have learned from him. And now I cannot agree in what you are saying, but I strongly disagree. Well, I know that this is my own fault, and is a defect in my character, but I will not pretend to be more than I am; and my opinion, Hippias, is the very contrary of what you are saying. For I maintain that those who hurt or injure mankind, and speak falsely and deceive, and err voluntarily, are better far than those who do wrong involuntarily. Sometimes, however, I am of the opposite opinion; for I am all abroad in my ideas about this matter, a condition obviously occasioned by ignorance. And just now I happen to be in a crisis of my disorder at which those who err voluntarily appear to me better than those who err involuntarily. My present state of mind is due to our previous argument, which inclines me to believe that in general those who do wrong involuntarily are worse than those who do wrong voluntarily, and therefore I hope that you will be good to me, and not refuse to heal me; for you will do me a much greater benefit if you cure my soul of ignorance, than you would if you were to cure my body of disease. I must, however, tell you beforehand, that if you make a long oration to me you will not cure me, for I shall not be able to follow you; but if you will answer me, as you did just now, you will do me a great deal of good, and I do not think that you will be any the worse yourself. And I have some claim upon you also, O son of Apemantus, for you incited me to converse with Hippias; and now, if Hippias will not answer me, you must entreat him on my behalf.

Eudicus: But I do not think, Socrates, that Hippias will require any entreaty of mine; for he has already said that he will refuse to answer no man. — Did you not say so, Hippias?

Hippias: Yes, I did; but then, Eudicus, Socrates is always troublesome in an argument, and appears to be dishonest. (Compare Gorgias; Republic.)

Socrates: Excellent Hippias, I do not do so intentionally (if I did, it would show me to be a wise man and a master of wiles, as you

would argue), but unintentionally, and therefore you must pardon me; for, as you say, he who is unintentionally dishonest should be pardoned.

Eudicus: Yes, Hippias, do as he says; and for our sake, and also that you may not belie your profession, answer whatever Socrates asks you.

Hippias: I will answer, as you request me; and do you ask whatever you like.

Socrates: I am very desirous, Hippias, of examining this question, as to which are the better — those who err voluntarily or involuntarily? And if you will answer me, I think that I can put you in the way of approaching the subject: You would admit, would you not, that there are good runners?

Hippias: Yes.

Socrates: And there are bad runners?

Hippias: Yes.

Socrates: And he who runs well is a good runner, and he who runs ill is a bad runner?

Hippias: Very true.

Socrates: And he who runs slowly runs ill, and he who runs quickly runs well?

Hippias: Yes.

Socrates: Then in a race, and in running, swiftness is a good, and slowness is an evil quality?

Hippias: To be sure.

Socrates: Which of the two then is a better runner? He who runs slowly voluntarily, or he who runs slowly involuntarily?

Hippias: He who runs slowly voluntarily.

Socrates: And is not running a species of doing?

Hippias: Certainly.

Socrates: And if a species of doing, a species of action?

Hippias: Yes.

Socrates: Then he who runs badly does a bad and dishonourable action in a race?

Hippias: Yes; a bad action, certainly.

Socrates: And he who runs slowly runs badly?

Hippias: Yes.

Socrates: Then the good runner does this bad and disgraceful action voluntarily, and the bad involuntarily?

Hippias: That is to be inferred.

Socrates: Then he who involuntarily does evil actions, is worse in a race than he who does them voluntarily?

Hippias: Yes, in a race.

Socrates: Well, but at a wrestling match — which is the better wrestler, he who falls voluntarily or involuntarily?

Hippias: He who falls voluntarily, doubtless.

Socrates: And is it worse or more dishonourable at a wrestling match, to fall, or to throw another?

Hippias: To fall.

Socrates: Then, at a wrestling match, he who voluntarily does base and dishonourable actions is a better wrestler than he who does them involuntarily?

Hippias: That appears to be the truth.

Socrates: And what would you say of any other bodily exercise — is not he who is better made able to do both that which is strong and that which is weak — that which is fair and that which is foul? — so that when he does bad actions with the body, he who is better made does them voluntarily, and he who is

worse made does them involuntarily.

Hippias: Yes, that appears to be true about strength.

Socrates: And what do you say about grace, Hippias? Is not he who is better made able to assume evil and disgraceful figures and postures voluntarily, as he who is worse made assumes them involuntarily?

Hippias: True.

Socrates: Then voluntary ungracefulness comes from excellence of the bodily frame, and involuntary from the defect of the bodily frame?

Hippias: True.

Socrates: And what would you say of an unmusical voice; would you prefer the voice which is voluntarily or involuntarily out of tune?

Hippias: That which is voluntarily out of tune.

Socrates: The involuntary is the worse of the two?

Hippias: Yes.

Socrates: And would you choose to possess goods or evils?

Hippias: Goods.

Socrates: And would you rather have feet which are voluntarily or involuntarily lame?

Hippias: Feet which are voluntarily lame.

Socrates: But is not lameness a defect or deformity?

Hippias: Yes.

Socrates: And is not blinking a defect in the eyes?

Hippias: Yes.

Socrates: And would you rather always have eyes with which you might voluntarily blink and not see, or with which you might involuntarily blink?

Hippias: I would rather have eyes which voluntarily blink.

Socrates: Then in your own case you deem that which voluntarily acts ill, better than that which involuntarily acts ill?

Hippias: Yes, certainly, in cases such as you mention.

Socrates: And does not the same hold of ears, nostrils, mouth, and of all the senses — those which involuntarily act ill are not to be desired, as being defective; and those which voluntarily act ill are to be desired as being good?

Hippias: I agree.

Socrates: And what would you say of instruments; — which are the better sort of instruments to have to do with? — those with which a man acts ill voluntarily or involuntarily? For example, had a man better have a rudder with which he will steer ill, voluntarily or involuntarily?

Hippias: He had better have a rudder with which he will steer ill voluntarily.

Socrates: And does not the same hold of the bow and the lyre, the flute and all other things?

Hippias: Very true.

Socrates: And would you rather have a horse of such a temper that you may ride him ill voluntarily or involuntarily?

Hippias: I would rather have a horse which I could ride ill voluntarily.

Socrates: That would be the better horse?

Hippias: Yes.

Socrates: Then with a horse of better temper, vicious actions would be produced voluntarily; and with a horse of bad temper involuntarily?

Hippias: Certainly.

Socrates: And that would be true of a dog, or of any other animal?

Hippias: Yes.

Socrates: And is it better to possess the mind of an archer who voluntarily or involuntarily misses the mark?

Hippias: Of him who voluntarily misses.

Socrates: This would be the better mind for the purposes of archery?

Hippias: Yes.

Socrates: Then the mind which involuntarily errs is worse than the mind which errs voluntarily?

Hippias: Yes, certainly, in the use of the bow.

Socrates: And what would you say of the art of medicine; — has not the mind which voluntarily works harm to the body, more of the healing art?

Hippias: Yes.

Socrates: Then in the art of medicine the voluntary is better than the involuntary?

Hippias: Yes.

Socrates: Well, and in lute-playing and in flute-playing, and in all arts and sciences, is not that mind the better which voluntarily does what is evil and dishonourable, and goes wrong, and is not the worse that which does so involuntarily?

Hippias: That is evident.

Socrates: And what would you say of the characters of slaves? Should we not prefer to have those who voluntarily do wrong and make mistakes, and are they not better in their mistakes than those who commit them involuntarily?

Hippias: Yes.

Socrates: And should we not desire to have our own minds in the best state possible?

Hippias: Yes.

Socrates: And will our minds be better if they do wrong and make mistakes voluntarily or involuntarily?

Hippias: O, Socrates, it would be a monstrous thing to say that those who do wrong voluntarily are better than those who do wrong involuntarily!

Socrates: And yet that appears to be the only inference.

Hippias: I do not think so.

Socrates: But I imagined, Hippias, that you did. Please to answer once more: Is not justice a power, or knowledge, or both? Must not justice, at all events, be one of these?

Hippias: Yes.

Socrates: But if justice is a power of the soul, then the soul which has the greater power is also the more just; for that which has the greater power, my good friend, has been proved by us to be the better.

Hippias: Yes, that has been proved.

Socrates: And if justice is knowledge, then the wiser will be the juster soul, and the more ignorant the more unjust?

Hippias: Yes.

Socrates: But if justice be power as well as knowledge — then will not the soul which has both knowledge and power be the more just, and that which is the more ignorant be the more unjust? Must it not be so?

Hippias: Clearly.

Socrates: And is not the soul which has the greater power and wisdom also better, and better able to do both good and evil in every action?

Hippias: Certainly.

Socrates: The soul, then, which acts ill, acts voluntarily by power and art — and these either one or both of them are elements of justice?

Hippias: That seems to be true.

Socrates: And to do injustice is to do ill, and not to do injustice is to do well?

Hippias: Yes.

Socrates: And will not the better and abler soul when it does wrong, do wrong voluntarily, and the bad soul involuntarily?

Hippias: Clearly.

Socrates: And the good man is he who has the good soul, and the bad man is he who has the bad?

Hippias: Yes.

Socrates: Then the good man will voluntarily do wrong, and the bad man involuntarily, if the good man is he who has the good soul?

Hippias: Which he certainly has.

Socrates: Then, Hippias, he who voluntarily does wrong and disgraceful things, if there be such a man, will be the good man?

Hippias: There I cannot agree with you.

Socrates: Nor can I agree with myself, Hippias; and yet that seems to be the conclusion which, as far as we can see at present, must follow from our argument. As I was saying before, I am all abroad, and being in perplexity am always changing my opinion. Now, that I or any ordinary man should wander in perplexity is not surprising; but if you wise men also wander, and we cannot come to you and rest from our wandering, the matter begins to be serious both to us and to you.

Euthydemus

ΕΥΘΥΔΗΜΟΣ

Crito: Who was the person, Socrates, with whom you were talking yesterday at the Lyceum? There was such a crowd around you that I could not get within hearing, but I caught a sight of him over their heads, and I made out, as I thought, that he was a stranger with whom you were talking: who was he?

Socrates: There were two, Crito; which of them do you mean?

Crito: The one whom I mean was seated second from you on the right-hand side. In the middle was Cleinias the young son of Axiochus, who has wonderfully grown; he is only about the age of my own Critobulus, but he is much forwarder and very good-looking: the other is thin and looks younger than he is.

Socrates: He whom you mean, Crito, is Euthydemus; and on my left hand there was his brother Dionysodorus, who also took part in the conversation.

Crito: Neither of them are known to me, Socrates; they are a new importation of Sophists, as I should imagine. Of what country are they, and what is their line of wisdom?

Socrates: As to their origin, I believe that they are natives of this part of the world, and have migrated from Chios to Thurii; they were driven out of Thurii, and have been living for many years past in these regions. As to their wisdom, about which you ask, Crito, they are wonderful — consummate! I never knew what the true pancratiast was before; they are simply made up of fighting, not like the two Acarnanian brothers who fight with their bodies only, but this pair of heroes, besides being perfect

in the use of their bodies, are invincible in every sort of warfare; for they are capital at fighting in armour, and will teach the art to any one who pays them; and also they are most skilful in legal warfare; they will plead themselves and teach others to speak and to compose speeches which will have an effect upon the courts. And this was only the beginning of their wisdom, but they have at last carried out the pancratiastic art to the very end, and have mastered the only mode of fighting which had been hitherto neglected by them; and now no one dares even to stand up against them: such is their skill in the war of words, that they can refute any proposition whether true or false. Now I am thinking, Crito, of placing myself in their hands; for they say that in a short time they can impart their skill to any one.

Crito: But, Socrates, are you not too old? there may be reason to fear that.

Socrates: Certainly not, Crito; as I will prove to you, for I have the consolation of knowing that they began this art of disputation which I covet, quite, as I may say, in old age; last year, or the year before, they had none of their new wisdom. I am only apprehensive that I may bring the two strangers into disrepute, as I have done Connus the son of Metrobius, the harp-player, who is still my music-master; for when the boys who go to him see me going with them, they laugh at me and call him grandpapa's master. Now I should not like the strangers to experience similar treatment; the fear of ridicule may make them unwilling to receive me; and therefore, Crito, I shall try and persuade some old men to accompany me to them, as I persuaded them to go with me to Connus, and I hope that you will make one: and perhaps we had better take your sons as a bait; they will want to have them as pupils, and for the sake of them willing to receive us.

Crito: I see no objection, Socrates, if you like; but first I wish that you would give me a description of their wisdom, that I may know beforehand what we are going to learn.

Socrates: In less than no time you shall hear; for I cannot say that I did not attend — I paid great attention to them, and I remember and will endeavour to repeat the whole story. Providentially I was sitting alone in the dressing-room of the Lyceum where you saw me, and was about to depart; when I was getting up I recognized the familiar divine sign: so I sat down again, and in a little while the two brothers Euthydemus and Dionysodorus came in, and several others with them, whom I believe to be their disciples, and they walked about in the covered court; they had not taken more than two or three turns when Cleinias entered, who, as you truly say, is very much improved: he was followed by a host of lovers, one of whom was Ctesippus the Paeanian, a well-bred youth, but also having the wildness of youth. Cleinias saw me from the entrance as I was sitting alone, and at once came and sat down on the right hand of me, as you describe; and Dionysodorus and Euthydemus, when they saw him, at first stopped and talked with one another, now and then glancing at us, for I particularly watched them; and then Euthydemus came and sat down by the youth, and the other by me on the left hand; the rest anywhere. I saluted the brothers, whom I had not seen for a long time; and then I said to Cleinias: Here are two wise men, Euthydemus and Dionysodorus, Cleinias, wise not in a small but in a large way of wisdom, for they know all about war, — all that a good general ought to know about the array and command of an army, and the whole art of fighting in armour: and they know about law too, and can teach a man how to use the weapons of the courts when he is injured.

They heard me say this, but only despised me. I observed that they looked at one another, and both of them laughed; and then Euthydemus said: Those, Socrates, are matters which we no longer pursue seriously; to us they are secondary occupations.

Indeed, I said, if such occupations are regarded by you as secondary, what must the principal one be; tell me, I beseech

you, what that noble study is?

The teaching of virtue, Socrates, he replied, is our principal occupation; and we believe that we can impart it better and quicker than any man.

My God! I said, and where did you learn that? I always thought, as I was saying just now, that your chief accomplishment was the art of fighting in armour; and I used to say as much of you, for I remember that you professed this when you were here before. But now if you really have the other knowledge, O forgive me: I address you as I would superior beings, and ask you to pardon the impiety of my former expressions. But are you quite sure about this, Dionysodorus and Euthydemus? the promise is so vast, that a feeling of incredulity steals over me.

You may take our word, Socrates, for the fact.

Then I think you happier in having such a treasure than the great king is in the possession of his kingdom. And please to tell me whether you intend to exhibit your wisdom; or what will you do?

That is why we have come hither, Socrates; and our purpose is not only to exhibit, but also to teach any one who likes to learn.

But I can promise you, I said, that every unvirtuous person will want to learn. I shall be the first; and there is the youth Cleinias, and Ctesippus: and here are several others, I said, pointing to the lovers of Cleinias, who were beginning to gather round us. Now Ctesippus was sitting at some distance from Cleinias; and when Euthydemus leaned forward in talking with me, he was prevented from seeing Cleinias, who was between us; and so, partly because he wanted to look at his love, and also because he was interested, he jumped up and stood opposite to us: and all the other admirers of Cleinias, as well as the disciples of Euthydemus and Dionysodorus, followed his example. And these were the persons whom I showed to Euthydemus, telling him that they were all eager to learn: to which Ctesippus and all of

them with one voice vehemently assented, and bid him exhibit the power of his wisdom. Then I said: O Euthydemus and Dionysodorus, I earnestly request you to do myself and the company the favour to exhibit. There may be some trouble in giving the whole exhibition; but tell me one thing, — can you make a good man of him only who is already convinced that he ought to learn of you, or of him also who is not convinced, either because he imagines that virtue is a thing which cannot be taught at all, or that you are not the teachers of it? Has your art power to persuade him, who is of the latter temper of mind, that virtue can be taught; and that you are the men from whom he will best learn it?

Certainly, Socrates, said Dionysodorus; our art will do both.

And you and your brother, Dionysodorus, I said, of all men who are now living are the most likely to stimulate him to philosophy and to the study of virtue?

Yes, Socrates, I rather think that we are.

Then I wish that you would be so good as to defer the other part of the exhibition, and only try to persuade the youth whom you see here that he ought to be a philosopher and study virtue. Exhibit that, and you will confer a great favour on me and on every one present; for the fact is I and all of us are extremely anxious that he should become truly good. His name is Cleinias, and he is the son of Axiochus, and grandson of the old Alcibiades, cousin of the Alcibiades that now is. He is quite young, and we are naturally afraid that some one may get the start of us, and turn his mind in a wrong direction, and he may be ruined. Your visit, therefore, is most happily timed; and I hope that you will make a trial of the young man, and converse with him in our presence, if you have no objection.

These were pretty nearly the expressions which I used; and Euthydemus, in a manly and at the same time encouraging tone, replied: There can be no objection, Socrates, if the young man is

only willing to answer questions.

He is quite accustomed to do so, I replied; for his friends often come and ask him questions and argue with him; and therefore he is quite at home in answering.

What followed, Crito, how can I rightly narrate? For not slight is the task of rehearsing infinite wisdom, and therefore, like the poets, I ought to commence my relation with an invocation to Memory and the Muses. Now Euthydemus, if I remember rightly, began nearly as follows: O Cleinias, are those who learn the wise or the ignorant?

The youth, overpowered by the question blushed, and in his perplexity looked at me for help; and I, knowing that he was disconcerted, said: Take courage, Cleinias, and answer like a man whichever you think; for my belief is that you will derive the greatest benefit from their questions.

Whichever he answers, said Dionysodorus, leaning forward so as to catch my ear, his face beaming with laughter, I prophesy that he will be refuted, Socrates.

While he was speaking to me, Cleinias gave his answer: and therefore I had no time to warn him of the predicament in which he was placed, and he answered that those who learned were the wise.

Euthydemus proceeded: There are some whom you would call teachers, are there not?

The boy assented.

And they are the teachers of those who learn — the grammar-master and the lyre-master used to teach you and other boys; and you were the learners?

Yes.

And when you were learners you did not as yet know the things which you were learning?

No, he said.

And were you wise then?

No, indeed, he said.

But if you were not wise you were unlearned?

Certainly.

You then, learning what you did not know, were unlearned when you were learning?

The youth nodded assent.

Then the unlearned learn, and not the wise, Cleinias, as you imagine.

At these words the followers of Euthydemus, of whom I spoke, like a chorus at the bidding of their director, laughed and cheered. Then, before the youth had time to recover his breath, Dionysodorus cleverly took him in hand, and said: Yes, Cleinias; and when the grammar-master dictated anything to you, were they the wise boys or the unlearned who learned the dictation?

The wise, replied Cleinias.

Then after all the wise are the learners and not the unlearned; and your last answer to Euthydemus was wrong.

Then once more the admirers of the two heroes, in an ecstasy at their wisdom, gave vent to another peal of laughter, while the rest of us were silent and amazed. Euthydemus, observing this, determined to persevere with the youth; and in order to heighten the effect went on asking another similar question, which might be compared to the double turn of an expert dancer. Do those, said he, who learn, learn what they know, or what they do not know?

Again Dionysodorus whispered to me: That, Socrates, is just another of the same sort.

Good heavens, I said; and your last question was so good!

Like all our other questions, Socrates, he replied — inevitable.

I see the reason, I said, why you are in such reputation among your disciples.

Meanwhile Cleinias had answered Euthydemus that those who learned learn what they do not know; and he put him through a series of questions the same as before.

Do you not know letters?

He assented.

All letters?

Yes.

But when the teacher dictates to you, does he not dictate letters?

To this also he assented.

Then if you know all letters, he dictates that which you know?

This again was admitted by him.

Then, said the other, you do not learn that which he dictates; but he only who does not know letters learns?

Nay, said Cleinias; but I do learn.

Then, said he, you learn what you know, if you know all the letters?

He admitted that.

Then, he said, you were wrong in your answer.

The word was hardly out of his mouth when Dionysodorus took up the argument, like a ball which he caught, and had another throw at the youth. Cleinias, he said, Euthydemus is deceiving you. For tell me now, is not learning acquiring knowledge of that which one learns?

Cleinias assented.

And knowing is having knowledge at the time?

He agreed.

And not knowing is not having knowledge at the time?

He admitted that.

And are those who acquire those who have or have not a thing?

Those who have not.

And have you not admitted that those who do not know are of the number of those who have not?

He nodded assent.

Then those who learn are of the class of those who acquire, and not of those who have?

He agreed.

Then, Cleinias, he said, those who do not know learn, and not those who know.

Euthydemus was proceeding to give the youth a third fall; but I knew that he was in deep water, and therefore, as I wanted to give him a respite lest he should be disheartened, I said to him consolingly: You must not be surprised, Cleinias, at the singularity of their mode of speech: this I say because you may not understand what the two strangers are doing with you; they are only initiating you after the manner of the Corybantes in the mysteries; and this answers to the enthronement, which, if you have ever been initiated, is, as you will know, accompanied by dancing and sport; and now they are just prancing and dancing about you, and will next proceed to initiate you; imagine then that you have gone through the first part of the sophistical ritual, which, as Prodicus says, begins with initiation into the correct use of terms. The two foreign gentlemen, perceiving that you did not know, wanted to explain to you that the word ‘to learn’ has two meanings, and is used, first, in the sense of acquiring knowledge of some matter of which you previously have no knowledge, and also, when you have the knowledge, in the sense of reviewing this matter, whether something done or

spoken by the light of this newly-acquired knowledge; the latter is generally called ‘knowing’ rather than ‘learning,’ but the word ‘learning’ is also used; and you did not see, as they explained to you, that the term is employed of two opposite sorts of men, of those who know, and of those who do not know. There was a similar trick in the second question, when they asked you whether men learn what they know or what they do not know. These parts of learning are not serious, and therefore I say that the gentlemen are not serious, but are only playing with you. For if a man had all that sort of knowledge that ever was, he would not be at all the wiser; he would only be able to play with men, tripping them up and oversetting them with distinctions of words. He would be like a person who pulls away a stool from some one when he is about to sit down, and then laughs and makes merry at the sight of his friend overturned and laid on his back. And you must regard all that has hitherto passed between you and them as merely play. But in what is to follow I am certain that they will exhibit to you their serious purpose, and keep their promise (I will show them how); for they promised to give me a sample of the hortatory philosophy, but I suppose that they wanted to have a game with you first. And now, Euthydemus and Dionysodorus, I think that we have had enough of this. Will you let me see you explaining to the young man how he is to apply himself to the study of virtue and wisdom? And I will first show you what I conceive to be the nature of the task, and what sort of a discourse I desire to hear; and if I do this in a very inartistic and ridiculous manner, do not laugh at me, for I only venture to improvise before you because I am eager to hear your wisdom: and I must therefore ask you and your disciples to refrain from laughing. And now, O son of Axiochus, let me put a question to you: Do not all men desire happiness? And yet, perhaps, this is one of those ridiculous questions which I am afraid to ask, and which ought not to be asked by a sensible man: for what human being is there who does not desire happiness?

There is no one, said Cleinias, who does not.

Well, then, I said, since we all of us desire happiness, how can we be happy? — that is the next question. Shall we not be happy if we have many good things? And this, perhaps, is even a more simple question than the first, for there can be no doubt of the answer.

He assented.

And what things do we esteem good? No solemn sage is required to tell us this, which may be easily answered; for every one will say that wealth is a good.

Certainly, he said.

And are not health and beauty goods, and other personal gifts?

He agreed.

Can there be any doubt that good birth, and power, and honours in one's own land, are goods?

He assented.

And what other goods are there? I said. What do you say of temperance, justice, courage: do you not verily and indeed think, Cleinias, that we shall be more right in ranking them as goods than in not ranking them as goods? For a dispute might possibly arise about this. What then do you say?

They are goods, said Cleinias.

Very well, I said; and where in the company shall we find a place for wisdom — among the goods or not?

Among the goods.

And now, I said, think whether we have left out any considerable goods.

I do not think that we have, said Cleinias.

Upon recollection, I said, indeed I am afraid that we have left out the greatest of them all.

What is that? he asked.

Fortune, Cleinias, I replied; which all, even the most foolish, admit to be the greatest of goods.

True, he said.

On second thoughts, I added, how narrowly, O son of Axiochus, have you and I escaped making a laughing-stock of ourselves to the strangers.

Why do you say so?

Why, because we have already spoken of good-fortune, and are but repeating ourselves.

What do you mean?

I mean that there is something ridiculous in again putting forward good-fortune, which has a place in the list already, and saying the same thing twice over.

He asked what was the meaning of this, and I replied: Surely wisdom is good-fortune; even a child may know that.

The simple-minded youth was amazed; and, observing his surprise, I said to him: Do you not know, Cleinias, that flute-players are most fortunate and successful in performing on the flute?

He assented.

And are not the scribes most fortunate in writing and reading letters?

Certainly.

Amid the dangers of the sea, again, are any more fortunate on the whole than wise pilots?

None, certainly.

And if you were engaged in war, in whose company would you rather take the risk — in company with a wise general, or with a foolish one?

With a wise one.

And if you were ill, whom would you rather have as a companion in a dangerous illness — a wise physician, or an ignorant one?

A wise one.

You think, I said, that to act with a wise man is more fortunate than to act with an ignorant one?

He assented.

Then wisdom always makes men fortunate: for by wisdom no man would ever err, and therefore he must act rightly and succeed, or his wisdom would be wisdom no longer.

We contrived at last, somehow or other, to agree in a general conclusion, that he who had wisdom had no need of fortune. I then recalled to his mind the previous state of the question. You remember, I said, our making the admission that we should be happy and fortunate if many good things were present with us?

He assented.

And should we be happy by reason of the presence of good things, if they profited us not, or if they profited us?

If they profited us, he said.

And would they profit us, if we only had them and did not use them? For example, if we had a great deal of food and did not eat, or a great deal of drink and did not drink, should we be profited?

Certainly not, he said.

Or would an artisan, who had all the implements necessary for his work, and did not use them, be any the better for the possession of them? For example, would a carpenter be any the better for having all his tools and plenty of wood, if he never worked?

Certainly not, he said.

And if a person had wealth and all the goods of which we were just now speaking, and did not use them, would he be happy because he possessed them?

No indeed, Socrates.

Then, I said, a man who would be happy must not only have the good things, but he must also use them; there is no advantage in merely having them?

True.

Well, Cleinias, but if you have the use as well as the possession of good things, is that sufficient to confer happiness?

Yes, in my opinion.

And may a person use them either rightly or wrongly?

He must use them rightly.

That is quite true, I said. And the wrong use of a thing is far worse than the non-use; for the one is an evil, and the other is neither a good nor an evil. You admit that?

He assented.

Now in the working and use of wood, is not that which gives the right use simply the knowledge of the carpenter?

Nothing else, he said.

And surely, in the manufacture of vessels, knowledge is that which gives the right way of making them?

He agreed.

And in the use of the goods of which we spoke at first — wealth and health and beauty, is not knowledge that which directs us to the right use of them, and regulates our practice about them?

He assented.

Then in every possession and every use of a thing, knowledge is that which gives a man not only good-fortune but success?

He again assented.

And tell me, I said, O tell me, what do possessions profit a man, if he have neither good sense nor wisdom? Would a man be better off, having and doing many things without wisdom, or a few things with wisdom? Look at the matter thus: If he did fewer things would he not make fewer mistakes? if he made fewer mistakes would he not have fewer misfortunes? and if he had fewer misfortunes would he not be less miserable?

Certainly, he said.

And who would do least — a poor man or a rich man?

A poor man.

A weak man or a strong man?

A weak man.

A noble man or a mean man?

A mean man.

And a coward would do less than a courageous and temperate man?

Yes.

And an indolent man less than an active man?

He assented.

And a slow man less than a quick; and one who had dull perceptions of seeing and hearing less than one who had keen ones?

All this was mutually allowed by us.

Then, I said, Cleinias, the sum of the matter appears to be that the goods of which we spoke before are not to be regarded as goods in themselves, but the degree of good and evil in them depends on whether they are or are not under the guidance of knowledge: under the guidance of ignorance, they are greater evils than their opposites, inasmuch as they are more able to

minister to the evil principle which rules them; and when under the guidance of wisdom and prudence, they are greater goods: but in themselves they are nothing?

That, he replied, is obvious.

What then is the result of what has been said? Is not this the result — that other things are indifferent, and that wisdom is the only good, and ignorance the only evil?

He assented.

Let us consider a further point, I said: Seeing that all men desire happiness, and happiness, as has been shown, is gained by a use, and a right use, of the things of life, and the right use of them, and good-fortune in the use of them, is given by knowledge, — the inference is that everybody ought by all means to try and make himself as wise as he can?

Yes, he said.

And when a man thinks that he ought to obtain this treasure, far more than money, from a father or a guardian or a friend or a suitor, whether citizen or stranger — the eager desire and prayer to them that they would impart wisdom to you, is not at all dishonourable, Cleinias; nor is any one to be blamed for doing any honourable service or ministration to any man, whether a lover or not, if his aim is to get wisdom. Do you agree? I said.

Yes, he said, I quite agree, and think that you are right.

Yes, I said, Cleinias, if only wisdom can be taught, and does not come to man spontaneously; for this is a point which has still to be considered, and is not yet agreed upon by you and me —

But I think, Socrates, that wisdom can be taught, he said.

Best of men, I said, I am delighted to hear you say so; and I am also grateful to you for having saved me from a long and tiresome investigation as to whether wisdom can be taught or not. But now, as you think that wisdom can be taught, and that

wisdom only can make a man happy and fortunate, will you not acknowledge that all of us ought to love wisdom, and you individually will try to love her?

Certainly, Socrates, he said; I will do my best.

I was pleased at hearing this; and I turned to Dionysodorus and Euthydemus and said: That is an example, clumsy and tedious I admit, of the sort of exhortations which I would have you give; and I hope that one of you will set forth what I have been saying in a more artistic style: or at least take up the enquiry where I left off, and proceed to show the youth whether he should have all knowledge; or whether there is one sort of knowledge only which will make him good and happy, and what that is. For, as I was saying at first, the improvement of this young man in virtue and wisdom is a matter which we have very much at heart.

Thus I spoke, Crito, and was all attention to what was coming. I wanted to see how they would approach the question, and where they would start in their exhortation to the young man that he should practise wisdom and virtue. Dionysodorus, who was the elder, spoke first. Everybody's eyes were directed towards him, perceiving that something wonderful might shortly be expected. And certainly they were not far wrong; for the man, Crito, began a remarkable discourse well worth hearing, and wonderfully persuasive regarded as an exhortation to virtue.

Tell me, he said, Socrates and the rest of you who say that you want this young man to become wise, are you in jest or in real earnest?

I was led by this to imagine that they fancied us to have been jesting when we asked them to converse with the youth, and that this made them jest and play, and being under this impression, I was the more decided in saying that we were in profound earnest. Dionysodorus said:

Reflect, Socrates; you may have to deny your words.

I have reflected, I said; and I shall never deny my words.

Well, said he, and so you say that you wish Cleinias to become wise?

Undoubtedly.

And he is not wise as yet?

At least his modesty will not allow him to say that he is.

You wish him, he said, to become wise and not, to be ignorant?

That we do.

You wish him to be what he is not, and no longer to be what he is?

I was thrown into consternation at this.

Taking advantage of my consternation he added: You wish him no longer to be what he is, which can only mean that you wish him to perish. Pretty lovers and friends they must be who want their favourite not to be, or to perish!

When Ctesippus heard this he got very angry (as a lover well might) and said: Stranger of Thurii — if politeness would allow me I should say, A plague upon you! What can make you tell such a lie about me and the others, which I hardly like to repeat, as that I wish Cleinias to perish?

Euthydemus replied: And do you think, Ctesippus, that it is possible to tell a lie?

Yes, said Ctesippus; I should be mad to say anything else.

And in telling a lie, do you tell the thing of which you speak or not?

You tell the thing of which you speak.

And he who tells, tells that thing which he tells, and no other?

Yes, said Ctesippus.

And that is a distinct thing apart from other things?

Certainly.

And he who says that thing says that which is?

Yes.

And he who says that which is, says the truth. And therefore Dionysodorus, if he says that which is, says the truth of you and no lie.

Yes, Euthydemus, said Ctesippus; but in saying this, he says what is not.

Euthydemus answered: And that which is not is not?

True.

And that which is not is nowhere?

Nowhere.

And can any one do anything about that which has no existence, or do to Cleinias that which is not and is nowhere?

I think not, said Ctesippus.

Well, but do rhetoricians, when they speak in the assembly, do nothing?

Nay, he said, they do something.

And doing is making?

Yes.

And speaking is doing and making?

He agreed.

Then no one says that which is not, for in saying what is not he would be doing something; and you have already acknowledged that no one can do what is not. And therefore, upon your own showing, no one says what is false; but if Dionysodorus says anything, he says what is true and what is.

Yes, Euthydemus, said Ctesippus; but he speaks of things in a certain way and manner, and not as they really are.

Why, Ctesippus, said Dionysodorus, do you mean to say that any one speaks of things as they are?

Yes, he said — all gentlemen and truth-speaking persons.

And are not good things good, and evil things evil?

He assented.

And you say that gentlemen speak of things as they are?

Yes.

Then the good speak evil of evil things, if they speak of them as they are?

Yes, indeed, he said; and they speak evil of evil men. And if I may give you a piece of advice, you had better take care that they do not speak evil of you, since I can tell you that the good speak evil of the evil.

And do they speak great things of the great, rejoined Euthydemus, and warm things of the warm?

To be sure they do, said Ctesippus; and they speak coldly of the insipid and cold dialectician.

You are abusive, Ctesippus, said Dionysodorus, you are abusive!

Indeed, I am not, Dionysodorus, he replied; for I love you and am giving you friendly advice, and, if I could, would persuade you not like a boor to say in my presence that I desire my beloved, whom I value above all men, to perish.

I saw that they were getting exasperated with one another, so I made a joke with him and said: O Ctesippus, I think that we must allow the strangers to use language in their own way, and not quarrel with them about words, but be thankful for what they give us. If they know how to destroy men in such a way as to make good and sensible men out of bad and foolish ones — whether this is a discovery of their own, or whether they have learned from some one else this new sort of death and destruction which enables them to get rid of a bad man and turn

him into a good one — if they know this (and they do know this — at any rate they said just now that this was the secret of their newly-discovered art) — let them, in their phraseology, destroy the youth and make him wise, and all of us with him. But if you young men do not like to trust yourselves with them, then fiat experimentum in corpore senis; I will be the Carian on whom they shall operate. And here I offer my old person to Dionysodorus; he may put me into the pot, like Medea the Colchian, kill me, boil me, if he will only make me good.

Ctesippus said: And I, Socrates, am ready to commit myself to the strangers; they may skin me alive, if they please (and I am pretty well skinned by them already), if only my skin is made at last, not like that of Marsyas, into a leathern bottle, but into a piece of virtue. And here is Dionysodorus fancying that I am angry with him, when really I am not angry at all; I do but contradict him when I think that he is speaking improperly to me: and you must not confound abuse and contradiction, O illustrious Dionysodorus; for they are quite different things.

Contradiction! said Dionysodorus; why, there never was such a thing.

Certainly there is, he replied; there can be no question of that. Do you, Dionysodorus, maintain that there is not?

You will never prove to me, he said, that you have heard any one contradicting any one else.

Indeed, said Ctesippus; then now you may hear me contradicting Dionysodorus.

Are you prepared to make that good?

Certainly, he said.

Well, have not all things words expressive of them?

Yes.

Of their existence or of their non-existence?

Of their existence.

Yes, Ctesippus, and we just now proved, as you may remember, that no man could affirm a negative; for no one could affirm that which is not.

And what does that signify? said Ctesippus; you and I may contradict all the same for that.

But can we contradict one another, said Dionysodorus, when both of us are describing the same thing? Then we must surely be speaking the same thing?

He assented.

Or when neither of us is speaking of the same thing? For then neither of us says a word about the thing at all?

He granted that proposition also.

But when I describe something and you describe another thing, or I say something and you say nothing — is there any contradiction? How can he who speaks contradict him who speaks not?

Here Ctesippus was silent; and I in my astonishment said: What do you mean, Dionysodorus? I have often heard, and have been amazed to hear, this thesis of yours, which is maintained and employed by the disciples of Protagoras, and others before them, and which to me appears to be quite wonderful, and suicidal as well as destructive, and I think that I am most likely to hear the truth about it from you. The dictum is that there is no such thing as falsehood; a man must either say what is true or say nothing. Is not that your position?

He assented.

But if he cannot speak falsely, may he not think falsely?

No, he cannot, he said.

Then there is no such thing as false opinion?

No, he said.

Then there is no such thing as ignorance, or men who are ignorant; for is not ignorance, if there be such a thing, a mistake of fact?

Certainly, he said.

And that is impossible?

Impossible, he replied.

Are you saying this as a paradox, Dionysodorus; or do you seriously maintain no man to be ignorant?

Refute me, he said.

But how can I refute you, if, as you say, to tell a falsehood is impossible?

Very true, said Euthydemus.

Neither did I tell you just now to refute me, said Dionysodorus; for how can I tell you to do that which is not?

O Euthydemus, I said, I have but a dull conception of these subtleties and excellent devices of wisdom; I am afraid that I hardly understand them, and you must forgive me therefore if I ask a very stupid question: if there be no falsehood or false opinion or ignorance, there can be no such thing as erroneous action, for a man cannot fail of acting as he is acting — that is what you mean?

Yes, he replied.

And now, I said, I will ask my stupid question: If there is no such thing as error in deed, word, or thought, then what, in the name of goodness, do you come hither to teach? And were you not just now saying that you could teach virtue best of all men, to any one who was willing to learn?

And are you such an old fool, Socrates, rejoined Dionysodorus, that you bring up now what I said at first — and if I had said

anything last year, I suppose that you would bring that up too — but are non-plussed at the words which I have just uttered?

Why, I said, they are not easy to answer; for they are the words of wise men: and indeed I know not what to make of this word 'nonplussed,' which you used last: what do you mean by it, Dionysodorus? You must mean that I cannot refute your argument. Tell me if the words have any other sense.

No, he replied, they mean what you say. And now answer.

What, before you, Dionysodorus? I said.

Answer, said he.

And is that fair?

Yes, quite fair, he said.

Upon what principle? I said. I can only suppose that you are a very wise man who comes to us in the character of a great logician, and who knows when to answer and when not to answer — and now you will not open your mouth at all, because you know that you ought not.

You prate, he said, instead of answering. But if, my good sir, you admit that I am wise, answer as I tell you.

I suppose that I must obey, for you are master. Put the question.

Are the things which have sense alive or lifeless?

They are alive.

And do you know of any word which is alive?

I cannot say that I do.

Then why did you ask me what sense my words had?

Why, because I was stupid and made a mistake. And yet, perhaps, I was right after all in saying that words have a sense; — what do you say, wise man? If I was not in error, even you will not refute me, and all your wisdom will be non-plussed; but if I did fall into error, then again you are wrong in saying that there

is no error, — and this remark was made by you not quite a year ago. I am inclined to think, however, Dionysodorus and Euthydemus, that this argument lies where it was and is not very likely to advance: even your skill in the subtleties of logic, which is really amazing, has not found out the way of throwing another and not falling yourself, now any more than of old.

Ctesippus said: Men of Chios, Thurii, or however and whatever you call yourselves, I wonder at you, for you seem to have no objection to talking nonsense.

Fearing that there would be high words, I again endeavoured to soothe Ctesippus, and said to him: To you, Ctesippus, I must repeat what I said before to Cleinias — that you do not understand the ways of these philosophers from abroad. They are not serious, but, like the Egyptian wizard, Proteus, they take different forms and deceive us by their enchantments: and let us, like Menelaus, refuse to let them go until they show themselves to us in earnest. When they begin to be in earnest their full beauty will appear: let us then beg and entreat and beseech them to shine forth. And I think that I had better once more exhibit the form in which I pray to behold them; it might be a guide to them. I will go on therefore where I left off, as well as I can, in the hope that I may touch their hearts and move them to pity, and that when they see me deeply serious and interested, they also may be serious. You, Cleinias, I said, shall remind me at what point we left off. Did we not agree that philosophy should be studied? and was not that our conclusion?

Yes, he replied.

And philosophy is the acquisition of knowledge?

Yes, he said.

And what knowledge ought we to acquire? May we not answer with absolute truth — A knowledge which will do us good?

Certainly, he said.

And should we be any the better if we went about having a knowledge of the places where most gold was hidden in the earth?

Perhaps we should, he said.

But have we not already proved, I said, that we should be none the better off, even if without trouble and digging all the gold which there is in the earth were ours? And if we knew how to convert stones into gold, the knowledge would be of no value to us, unless we also knew how to use the gold? Do you not remember? I said.

I quite remember, he said.

Nor would any other knowledge, whether of money-making, or of medicine, or of any other art which knows only how to make a thing, and not to use it when made, be of any good to us. Am I not right?

He agreed.

And if there were a knowledge which was able to make men immortal, without giving them the knowledge of the way to use the immortality, neither would there be any use in that, if we may argue from the analogy of the previous instances?

To all this he agreed.

Then, my dear boy, I said, the knowledge which we want is one that uses as well as makes?

True, he said.

And our desire is not to be skilful lyre-makers, or artists of that sort — far otherwise; for with them the art which makes is one, and the art which uses is another. Although they have to do with the same, they are divided: for the art which makes and the art which plays on the lyre differ widely from one another. Am I not right?

He agreed.

And clearly we do not want the art of the flute-maker; this is only another of the same sort?

He assented.

But suppose, I said, that we were to learn the art of making speeches — would that be the art which would make us happy?

I should say, no, rejoined Cleinias.

And why should you say so? I asked.

I see, he replied, that there are some composers of speeches who do not know how to use the speeches which they make, just as the makers of lyres do not know how to use the lyres; and also some who are of themselves unable to compose speeches, but are able to use the speeches which the others make for them; and this proves that the art of making speeches is not the same as the art of using them.

Yes, I said; and I take your words to be a sufficient proof that the art of making speeches is not one which will make a man happy. And yet I did think that the art which we have so long been seeking might be discovered in that direction; for the composers of speeches, whenever I meet them, always appear to me to be very extraordinary men, Cleinias, and their art is lofty and divine, and no wonder. For their art is a part of the great art of enchantment, and hardly, if at all, inferior to it: and whereas the art of the enchanter is a mode of charming snakes and spiders and scorpions, and other monsters and pests, this art of their's acts upon dicasts and ecclesiasts and bodies of men, for the charming and pacifying of them. Do you agree with me?

Yes, he said, I think that you are quite right.

Whither then shall we go, I said, and to what art shall we have recourse?

I do not see my way, he said.

But I think that I do, I replied.

And what is your notion? asked Cleinias.

I think that the art of the general is above all others the one of which the possession is most likely to make a man happy.

I do not think so, he said.

Why not? I said.

The art of the general is surely an art of hunting mankind.

What of that? I said.

Why, he said, no art of hunting extends beyond hunting and capturing; and when the prey is taken the huntsman or fisherman cannot use it; but they hand it over to the cook, and the geometricians and astronomers and calculators (who all belong to the hunting class, for they do not make their diagrams, but only find out that which was previously contained in them) — they, I say, not being able to use but only to catch their prey, hand over their inventions to the dialectician to be applied by him, if they have any sense in them.

Good, I said, fairest and wisest Cleinias. And is this true?

Certainly, he said; just as a general when he takes a city or a camp hands over his new acquisition to the statesman, for he does not know how to use them himself; or as the quail-taker transfers the quails to the keeper of them. If we are looking for the art which is to make us blessed, and which is able to use that which it makes or takes, the art of the general is not the one, and some other must be found.

Crito: And do you mean, Socrates, that the youngster said all this?

Socrates: Are you incredulous, Crito?

Crito: Indeed, I am; for if he did say so, then in my opinion he needs neither Euthydemus nor any one else to be his instructor.

Socrates: Perhaps I may have forgotten, and Ctesippus was the real answerer.

Crito: Ctesippus! nonsense.

Socrates: All I know is that I heard these words, and that they were not spoken either by Euthydemus or Dionysodorus. I dare say, my good Crito, that they may have been spoken by some superior person: that I heard them I am certain.

Crito: Yes, indeed, Socrates, by some one a good deal superior, as I should be disposed to think. But did you carry the search any further, and did you find the art which you were seeking?

Socrates: Find! my dear sir, no indeed. And we cut a poor figure; we were like children after larks, always on the point of catching the art, which was always getting away from us. But why should I repeat the whole story? At last we came to the kingly art, and enquired whether that gave and caused happiness, and then we got into a labyrinth, and when we thought we were at the end, came out again at the beginning, having still to seek as much as ever.

Crito: How did that happen, Socrates?

Socrates: I will tell you; the kingly art was identified by us with the political.

Crito: Well, and what came of that?

Socrates: To this royal or political art all the arts, including the art of the general, seemed to render up the supremacy, that being the only one which knew how to use what they produce. Here obviously was the very art which we were seeking — the art which is the source of good government, and which may be described, in the language of Aeschylus, as alone sitting at the helm of the vessel of state, piloting and governing all things, and utilizing them.

Crito: And were you not right, Socrates?

Socrates: You shall judge, Crito, if you are willing to hear what followed; for we resumed the enquiry, and a question of this sort was asked: Does the kingly art, having this supreme authority,

do anything for us? To be sure, was the answer. And would not you, Crito, say the same?

Crito: Yes, I should.

Socrates: And what would you say that the kingly art does? If medicine were supposed to have supreme authority over the subordinate arts, and I were to ask you a similar question about that, you would say — it produces health?

Crito: I should.

Socrates: And what of your own art of husbandry, supposing that to have supreme authority over the subject arts — what does that do? Does it not supply us with the fruits of the earth?

Crito: Yes.

Socrates: And what does the kingly art do when invested with supreme power? Perhaps you may not be ready with an answer?

Crito: Indeed I am not, Socrates.

Socrates: No more were we, Crito. But at any rate you know that if this is the art which we were seeking, it ought to be useful.

Crito: Certainly.

Socrates: And surely it ought to do us some good?

Crito: Certainly, Socrates.

Socrates: And Cleinias and I had arrived at the conclusion that knowledge of some kind is the only good.

Crito: Yes, that was what you were saying.

Socrates: All the other results of politics, and they are many, as for example, wealth, freedom, tranquillity, were neither good nor evil in themselves; but the political science ought to make us wise, and impart knowledge to us, if that is the science which is likely to do us good, and make us happy.

Crito: Yes; that was the conclusion at which you had arrived, according to your report of the conversation.

Socrates: And does the kingly art make men wise and good?

Crito: Why not, Socrates?

Socrates: What, all men, and in every respect? and teach them all the arts, — carpentering, and cobbling, and the rest of them?

Crito: I think not, Socrates.

Socrates: But then what is this knowledge, and what are we to do with it? For it is not the source of any works which are neither good nor evil, and gives no knowledge, but the knowledge of itself; what then can it be, and what are we to do with it? Shall we say, Crito, that it is the knowledge by which we are to make other men good?

Crito: By all means.

Socrates: And in what will they be good and useful? Shall we repeat that they will make others good, and that these others will make others again, without ever determining in what they are to be good; for we have put aside the results of politics, as they are called. This is the old, old song over again; and we are just as far as ever, if not farther, from the knowledge of the art or science of happiness.

Crito: Indeed, Socrates, you do appear to have got into a great perplexity.

Socrates: Thereupon, Crito, seeing that I was on the point of shipwreck, I lifted up my voice, and earnestly entreated and called upon the strangers to save me and the youth from the whirlpool of the argument; they were our Castor and Pollux, I said, and they should be serious, and show us in sober earnest what that knowledge was which would enable us to pass the rest of our lives in happiness.

Crito: And did Euthydemus show you this knowledge?

Socrates: Yes, indeed; he proceeded in a lofty strain to the following effect: Would you rather, Socrates, said he, that I should show you this knowledge about which you have been

doubting, or shall I prove that you already have it?

What, I said, are you blessed with such a power as this?

Indeed I am.

Then I would much rather that you should prove me to have such a knowledge; at my time of life that will be more agreeable than having to learn.

Then tell me, he said, do you know anything?

Yes, I said, I know many things, but not anything of much importance.

That will do, he said: And would you admit that anything is what it is, and at the same time is not what it is?

Certainly not.

And did you not say that you knew something?

I did.

If you know, you are knowing.

Certainly, of the knowledge which I have.

That makes no difference; — and must you not, if you are knowing, know all things?

Certainly not, I said, for there are many other things which I do not know.

And if you do not know, you are not knowing.

Yes, friend, of that which I do not know.

Still you are not knowing, and you said just now that you were knowing; and therefore you are and are not at the same time, and in reference to the same things.

A pretty clatter, as men say, Euthydemus, this of yours! and will you explain how I possess that knowledge for which we were seeking? Do you mean to say that the same thing cannot be and also not be; and therefore, since I know one thing, that I know

all, for I cannot be knowing and not knowing at the same time, and if I know all things, then I must have the knowledge for which we are seeking — May I assume this to be your ingenious notion?

Out of your own mouth, Socrates, you are convicted, he said.

Well, but, Euthydemus, I said, has that never happened to you? for if I am only in the same case with you and our beloved Dionysodorus, I cannot complain. Tell me, then, you two, do you not know some things, and not know others?

Certainly not, Socrates, said Dionysodorus.

What do you mean, I said; do you know nothing?

Nay, he replied, we do know something.

Then, I said, you know all things, if you know anything?

Yes, all things, he said; and that is as true of you as of us.

O, indeed, I said, what a wonderful thing, and what a great blessing! And do all other men know all things or nothing?

Certainly, he replied; they cannot know some things, and not know others, and be at the same time knowing and not knowing.

Then what is the inference? I said.

They all know all things, he replied, if they know one thing.

O heavens, Dionysodorus, I said, I see now that you are in earnest; hardly have I got you to that point. And do you really and truly know all things, including carpentering and leather-cutting?

Certainly, he said.

And do you know stitching?

Yes, by the gods, we do, and cobbling, too.

And do you know things such as the numbers of the stars and of the sand?

Certainly; did you think we should say No to that?

By Zeus, said Ctesippus, interrupting, I only wish that you would give me some proof which would enable me to know whether you speak truly.

What proof shall I give you? he said.

Will you tell me how many teeth Euthydemus has? and Euthydemus shall tell how many teeth you have.

Will you not take our word that we know all things?

Certainly not, said Ctesippus: you must further tell us this one thing, and then we shall know that you are speak the truth; if you tell us the number, and we count them, and you are found to be right, we will believe the rest. They fancied that Ctesippus was making game of them, and they refused, and they would only say in answer to each of his questions, that they knew all things. For at last Ctesippus began to throw off all restraint; no question in fact was too bad for him; he would ask them if they knew the foulest things, and they, like wild boars, came rushing on his blows, and fearlessly replied that they did. At last, Crito, I too was carried away by my incredulity, and asked Euthydemus whether Dionysodorus could dance.

Certainly, he replied.

And can he vault among swords, and turn upon a wheel, at his age? has he got to such a height of skill as that?

He can do anything, he said.

And did you always know this?

Always, he said.

When you were children, and at your birth?

They both said that they did.

This we could not believe. And Euthydemus said: You are incredulous, Socrates.

Yes, I said, and I might well be incredulous, if I did not know you to be wise men.

But if you will answer, he said, I will make you confess to similar marvels.

Well, I said, there is nothing that I should like better than to be self-convicted of this, for if I am really a wise man, which I never knew before, and you will prove to me that I know and have always known all things, nothing in life would be a greater gain to me.

Answer then, he said.

Ask, I said, and I will answer.

Do you know something, Socrates, or nothing?

Something, I said.

And do you know with what you know, or with something else?

With what I know; and I suppose that you mean with my soul?

Are you not ashamed, Socrates, of asking a question when you are asked one?

Well, I said; but then what am I to do? for I will do whatever you bid; when I do not know what you are asking, you tell me to answer nevertheless, and not to ask again.

Why, you surely have some notion of my meaning, he said.

Yes, I replied.

Well, then, answer according to your notion of my meaning.

Yes, I said; but if the question which you ask in one sense is understood and answered by me in another, will that please you — if I answer what is not to the point?

That will please me very well; but will not please you equally well, as I imagine.

I certainly will not answer unless I understand you, I said.

You will not answer, he said, according to your view of the meaning, because you will be prating, and are an ancient.

Now I saw that he was getting angry with me for drawing distinctions, when he wanted to catch me in his springes of words. And I remembered that Connus was always angry with me when I opposed him, and then he neglected me, because he thought that I was stupid; and as I was intending to go to Euthydemus as a pupil, I reflected that I had better let him have his way, as he might think me a blockhead, and refuse to take me. So I said: You are a far better dialectician than myself, Euthydemus, for I have never made a profession of the art, and therefore do as you say; ask your questions once more, and I will answer.

Answer then, he said, again, whether you know what you know with something, or with nothing.

Yes, I said; I know with my soul.

The man will answer more than the question; for I did not ask you, he said, with what you know, but whether you know with something.

Again I replied, Through ignorance I have answered too much, but I hope that you will forgive me. And now I will answer simply that I always know what I know with something.

And is that something, he rejoined, always the same, or sometimes one thing, and sometimes another thing?

Always, I replied, when I know, I know with this.

Will you not cease adding to your answers?

My fear is that this word ‘always’ may get us into trouble.

You, perhaps, but certainly not us. And now answer: Do you always know with this?

Always; since I am required to withdraw the words ‘when I know.’

You always know with this, or, always knowing, do you know some things with this, and some things with something else, or do you know all things with this?

All that I know, I replied, I know with this.

There again, Socrates, he said, the addition is superfluous.

Well, then, I said, I will take away the words ‘that I know.’

Nay, take nothing away; I desire no favours of you; but let me ask: Would you be able to know all things, if you did not know all things?

Quite impossible.

And now, he said, you may add on whatever you like, for you confess that you know all things.

I suppose that is true, I said, if my qualification implied in the words ‘that I know’ is not allowed to stand; and so I do know all things.

And have you not admitted that you always know all things with that which you know, whether you make the addition of ‘when you know them’ or not? for you have acknowledged that you have always and at once known all things, that is to say, when you were a child, and at your birth, and when you were growing up, and before you were born, and before the heaven and earth existed, you knew all things, if you always know them; and I swear that you shall always continue to know all things, if I am of the mind to make you.

But I hope that you will be of that mind, reverend Euthydemus, I said, if you are really speaking the truth, and yet I a little doubt your power to make good your words unless you have the help of your brother Dionysodorus; then you may do it. Tell me now, both of you, for although in the main I cannot doubt that I really do know all things, when I am told so by men of your prodigious wisdom — how can I say that I know such things, Euthydemus, as that the good are unjust; come, do I know that or not?

Certainly, you know that.

What do I know?

That the good are not unjust.

Quite true, I said; and that I have always known; but the question is, where did I learn that the good are unjust?

Nowhere, said Dionysodorus.

Then, I said, I do not know this.

You are ruining the argument, said Euthydemus to Dionysodorus; he will be proved not to know, and then after all he will be knowing and not knowing at the same time.

Dionysodorus blushed.

I turned to the other, and said, What do you think, Euthydemus? Does not your omniscient brother appear to you to have made a mistake?

What, replied Dionysodorus in a moment; am I the brother of Euthydemus?

Thereupon I said, Please not to interrupt, my good friend, or prevent Euthydemus from proving to me that I know the good to be unjust; such a lesson you might at least allow me to learn.

You are running away, Socrates, said Dionysodorus, and refusing to answer.

No wonder, I said, for I am not a match for one of you, and a fortiori I must run away from two. I am no Heracles; and even Heracles could not fight against the Hydra, who was a she-Sophist, and had the wit to shoot up many new heads when one of them was cut off; especially when he saw a second monster of a sea-crab, who was also a Sophist, and appeared to have newly arrived from a sea-voyage, bearing down upon him from the left, opening his mouth and biting. When the monster was growing troublesome he called Iolaus, his nephew, to his help, who ably succoured him; but if my Iolaus, who is my

brother Patrocles (the statuary), were to come, he would only make a bad business worse.

And now that you have delivered yourself of this strain, said Dionysodorus, will you inform me whether Iolaus was the nephew of Heracles any more than he is yours?

I suppose that I had best answer you, Dionysodorus, I said, for you will insist on asking — that I pretty well know — out of envy, in order to prevent me from learning the wisdom of Euthydemus.

Then answer me, he said.

Well then, I said, I can only reply that Iolaus was not my nephew at all, but the nephew of Heracles; and his father was not my brother Patrocles, but Iphicles, who has a name rather like his, and was the brother of Heracles.

And is Patrocles, he said, your brother?

Yes, I said, he is my half-brother, the son of my mother, but not of my father.

Then he is and is not your brother.

Not by the same father, my good man, I said, for Chaeredemus was his father, and mine was Sophroniscus.

And was Sophroniscus a father, and Chaeredemus also?

Yes, I said; the former was my father, and the latter his.

Then, he said, Chaeredemus is not a father.

He is not my father, I said.

But can a father be other than a father? or are you the same as a stone?

I certainly do not think that I am a stone, I said, though I am afraid that you may prove me to be one.

Are you not other than a stone?

I am.

And being other than a stone, you are not a stone; and being other than gold, you are not gold?

Very true.

And so Chaeredemus, he said, being other than a father, is not a father?

I suppose that he is not a father, I replied.

For if, said Euthydemus, taking up the argument, Chaeredemus is a father, then Sophroniscus, being other than a father, is not a father; and you, Socrates, are without a father.

Ctesippus, here taking up the argument, said: And is not your father in the same case, for he is other than my father?

Assuredly not, said Euthydemus.

Then he is the same?

He is the same.

I cannot say that I like the connection; but is he only my father, Euthydemus, or is he the father of all other men?

Of all other men, he replied. Do you suppose the same person to be a father and not a father?

Certainly, I did so imagine, said Ctesippus.

And do you suppose that gold is not gold, or that a man is not a man?

They are not ‘in pari materia,’ Euthydemus, said Ctesippus, and you had better take care, for it is monstrous to suppose that your father is the father of all.

But he is, he replied.

What, of men only, said Ctesippus, or of horses and of all other animals?

Of all, he said.

And your mother, too, is the mother of all?

Yes, our mother too.

Yes; and your mother has a progeny of sea-urchins then?

Yes; and yours, he said.

And gudgeons and puppies and pigs are your brothers?

And yours too.

And your papa is a dog?

And so is yours, he said.

If you will answer my questions, said Dionysodorus, I will soon extract the same admissions from you, Ctesippus. You say that you have a dog.

Yes, a villain of a one, said Ctesippus.

And he has puppies?

Yes, and they are very like himself.

And the dog is the father of them?

Yes, he said, I certainly saw him and the mother of the puppies come together.

And is he not yours?

To be sure he is.

Then he is a father, and he is yours; ergo, he is your father, and the puppies are your brothers.

Let me ask you one little question more, said Dionysodorus, quickly interposing, in order that Ctesippus might not get in his word: You beat this dog?

Ctesippus said, laughing, Indeed I do; and I only wish that I could beat you instead of him.

Then you beat your father, he said.

I should have far more reason to beat yours, said Ctesippus; what could he have been thinking of when he begat such wise sons? much good has this father of you and your brethren the puppies got out of this wisdom of yours.

But neither he nor you, Ctesippus, have any need of much good.

And have you no need, Euthydemus? he said.

Neither I nor any other man; for tell me now, Ctesippus, if you think it good or evil for a man who is sick to drink medicine when he wants it; or to go to war armed rather than unarmed.

Good, I say. And yet I know that I am going to be caught in one of your charming puzzles.

That, he replied, you will discover, if you answer; since you admit medicine to be good for a man to drink, when wanted, must it not be good for him to drink as much as possible; when he takes his medicine, a cartload of hellebore will not be too much for him?

Ctesippus said: Quite so, Euthydemus, that is to say, if he who drinks is as big as the statue of Delphi.

And seeing that in war to have arms is a good thing, he ought to have as many spears and shields as possible?

Very true, said Ctesippus; and do you think, Euthydemus, that he ought to have one shield only, and one spear?

I do.

And would you arm Geryon and Briareus in that way? Considering that you and your companion fight in armour, I thought that you would have known better...Here Euthydemus held his peace, but Dionysodorus returned to the previous answer of Ctesippus and said: —

Do you not think that the possession of gold is a good thing?

Yes, said Ctesippus, and the more the better.

And to have money everywhere and always is a good?

Certainly, a great good, he said.

And you admit gold to be a good?

Certainly, he replied.

And ought not a man then to have gold everywhere and always, and as much as possible in himself, and may he not be deemed the happiest of men who has three talents of gold in his belly, and a talent in his pate, and a stater of gold in either eye?

Yes, Euthydemus, said Ctesippus; and the Scythians reckon those who have gold in their own skulls to be the happiest and bravest of men (that is only another instance of your manner of speaking about the dog and father), and what is still more extraordinary, they drink out of their own skulls gilt, and see the inside of them, and hold their own head in their hands.

And do the Scythians and others see that which has the quality of vision, or that which has not? said Euthydemus.

That which has the quality of vision clearly.

And you also see that which has the quality of vision? he said. [Note: the ambiguity of (Greek), 'things visible and able to see,' (Greek), 'the speaking of the silent,' the silent denoting either the speaker or the subject of the speech, cannot be perfectly rendered in English.] Compare Aristot. Soph. Elenchi (Poste's translation): —

'Of ambiguous propositions the following are instances: —

'I hope that you the enemy may slay.

'Whom one knows, he knows. Either the person knowing or the person known is here affirmed to know.

'What one sees, that one sees: one sees a pillar: ergo, that one pillar sees.

‘What you ARE holding, that you are: you are holding a stone: ergo, a stone you are.

’Is a speaking of the silent possible? “The silent” denotes either the speaker are the subject of speech.

‘There are three kinds of ambiguity of term or proposition. The first is when there is an equal linguistic propriety in several interpretations; the second when one is improper but customary; the third when the ambiguity arises in the combination of elements that are in themselves unambiguous, as in “knowing letters.” “Knowing” and “letters” are perhaps separately unambiguous, but in combination may imply either that the letters are known, or that they themselves have knowledge. Such are the modes in which propositions and terms may be ambiguous.’

Yes, I do.

Then do you see our garments?

Yes.

Then our garments have the quality of vision.

They can see to any extent, said Ctesippus.

What can they see?

Nothing; but you, my sweet man, may perhaps imagine that they do not see; and certainly, Euthydemus, you do seem to me to have been caught napping when you were not asleep, and that if it be possible to speak and say nothing — you are doing so.

And may there not be a silence of the speaker? said Dionysodorus.

Impossible, said Ctesippus.

Or a speaking of the silent?

That is still more impossible, he said.

But when you speak of stones, wood, iron bars, do you not speak of the silent?

Not when I pass a smithy; for then the iron bars make a tremendous noise and outcry if they are touched: so that here your wisdom is strangely mistaken; please, however, to tell me how you can be silent when speaking (I thought that Ctesippus was put upon his mettle because Cleinias was present).

When you are silent, said Euthydemus, is there not a silence of all things?

Yes, he said.

But if speaking things are included in all things, then the speaking are silent.

What, said Ctesippus; then all things are not silent?

Certainly not, said Euthydemus.

Then, my good friend, do they all speak?

Yes; those which speak.

Nay, said Ctesippus, but the question which I ask is whether all things are silent or speak?

Neither and both, said Dionysodorus, quickly interposing; I am sure that you will be ‘non-plussed’ at that answer.

Here Ctesippus, as his manner was, burst into a roar of laughter; he said, That brother of yours, Euthydemus, has got into a dilemma; all is over with him. This delighted Cleinias, whose laughter made Ctesippus ten times as uproarious; but I cannot help thinking that the rogue must have picked up this answer from them; for there has been no wisdom like theirs in our time. Why do you laugh, Cleinias, I said, at such solemn and beautiful things?

Why, Socrates, said Dionysodorus, did you ever see a beautiful thing?

Yes, Dionysodorus, I replied, I have seen many.

Were they other than the beautiful, or the same as the beautiful?

Now I was in a great quandary at having to answer this question, and I thought that I was rightly served for having opened my mouth at all: I said however, They are not the same as absolute beauty, but they have beauty present with each of them.

And are you an ox because an ox is present with you, or are you Dionysodorus, because Dionysodorus is present with you?

God forbid, I replied.

But how, he said, by reason of one thing being present with another, will one thing be another?

Is that your difficulty? I said. For I was beginning to imitate their skill, on which my heart was set.

Of course, he replied, I and all the world are in a difficulty about the non-existent.

What do you mean, Dionysodorus? I said. Is not the honourable honourable and the base base?

That, he said, is as I please.

And do you please?

Yes, he said.

And you will admit that the same is the same, and the other other; for surely the other is not the same; I should imagine that even a child will hardly deny the other to be other. But I think, Dionysodorus, that you must have intentionally missed the last question; for in general you and your brother seem to me to be good workmen in your own department, and to do the dialectician’s business excellently well.

What, said he, is the business of a good workman? tell me, in the first place, whose business is hammering?

The smith’s.

And whose the making of pots?

The potter’s.

And who has to kill and skin and mince and boil and roast?

The cook, I said.

And if a man does his business he does rightly?

Certainly.

And the business of the cook is to cut up and skin; you have admitted that?

Yes, I have admitted that, but you must not be too hard upon me.

Then if some one were to kill, mince, boil, roast the cook, he would do his business, and if he were to hammer the smith, and make a pot of the potter, he would do their business.

Poseidon, I said, this is the crown of wisdom; can I ever hope to have such wisdom of my own?

And would you be able, Socrates, to recognize this wisdom when it has become your own?

Certainly, I said, if you will allow me.

What, he said, do you think that you know what is your own?

Yes, I do, subject to your correction; for you are the bottom, and Euthydemus is the top, of all my wisdom.

Is not that which you would deem your own, he said, that which you have in your own power, and which you are able to use as you would desire, for example, an ox or a sheep — would you not think that which you could sell and give and sacrifice to any god whom you pleased, to be your own, and that which you could not give or sell or sacrifice you would think not to be in your own power?

Yes, I said (for I was certain that something good would come out of the questions, which I was impatient to hear); yes, such things, and such things only are mine.

Yes, he said, and you would mean by animals living beings?

Yes, I said.

You agree then, that those animals only are yours with which you have the power to do all these things which I was just naming?

I agree.

Then, after a pause, in which he seemed to be lost in the contemplation of something great, he said: Tell me, Socrates, have you an ancestral Zeus? Here, anticipating the final move, like a person caught in a net, who gives a desperate twist that he may get away, I said: No, Dionysodorus, I have not.

What a miserable man you must be then, he said; you are not an Athenian at all if you have no ancestral gods or temples, or any other mark of gentility.

Nay, Dionysodorus, I said, do not be rough; good words, if you please; in the way of religion I have altars and temples, domestic and ancestral, and all that other Athenians have.

And have not other Athenians, he said, an ancestral Zeus?

That name, I said, is not to be found among the Ionians, whether colonists or citizens of Athens; an ancestral Apollo there is, who is the father of Ion, and a family Zeus, and a Zeus guardian of the phratry, and an Athene guardian of the phratry. But the name of ancestral Zeus is unknown to us.

No matter, said Dionysodorus, for you admit that you have Apollo, Zeus, and Athene.

Certainly, I said.

And they are your gods, he said.

Yes, I said, my lords and ancestors.

At any rate they are yours, he said, did you not admit that?

I did, I said; what is going to happen to me?

And are not these gods animals? for you admit that all things which have life are animals; and have not these gods life?

They have life, I said.

Then are they not animals?

They are animals, I said.

And you admitted that of animals those are yours which you could give away or sell or offer in sacrifice, as you pleased?

I did admit that, Euthydemus, and I have no way of escape.

Well then, said he, if you admit that Zeus and the other gods are yours, can you sell them or give them away or do what you will with them, as you would with other animals?

At this I was quite struck dumb, Crito, and lay prostrate. Ctesippus came to the rescue.

Bravo, Heracles, brave words, said he.

Bravo Heracles, or is Heracles a Bravo? said Dionysodorus.

Poseidon, said Ctesippus, what awful distinctions. I will have no more of them; the pair are invincible.

Then, my dear Crito, there was universal applause of the speakers and their words, and what with laughing and clapping of hands and rejoicings the two men were quite overpowered; for hitherto their partisans only had cheered at each successive hit, but now the whole company shouted with delight until the columns of the Lyceum returned the sound, seeming to sympathize in their joy. To such a pitch was I affected myself, that I made a speech, in which I acknowledged that I had never seen the like of their wisdom; I was their devoted servant, and fell to praising and admiring of them. What marvellous dexterity

of wit, I said, enabled you to acquire this great perfection in such a short time? There is much, indeed, to admire in your words, Euthydemus and Dionysodorus, but there is nothing that I admire more than your magnanimous disregard of any opinion — whether of the many, or of the grave and reverend seigniors — you regard only those who are like yourselves. And I do verily believe that there are few who are like you, and who would approve of such arguments; the majority of mankind are so ignorant of their value, that they would be more ashamed of employing them in the refutation of others than of being refuted by them. I must further express my approval of your kind and public-spirited denial of all differences, whether of good and evil, white or black, or any other; the result of which is that, as you say, every mouth is sewn up, not excepting your own, which graciously follows the example of others; and thus all ground of offence is taken away. But what appears to me to be more than all is, that this art and invention of yours has been so admirably contrived by you, that in a very short time it can be imparted to any one. I observed that Ctesippus learned to imitate you in no time. Now this quickness of attainment is an excellent thing; but at the same time I would advise you not to have any more public entertainments; there is a danger that men may undervalue an art which they have so easy an opportunity of acquiring; the exhibition would be best of all, if the discussion were confined to your two selves; but if there must be an audience, let him only be present who is willing to pay a handsome fee; — you should be careful of this; — and if you are wise, you will also bid your disciples discourse with no man but you and themselves. For only what is rare is valuable; and ‘water,’ which, as Pindar says, is the ‘best of all things,’ is also the cheapest. And now I have only to request that you will receive Cleinias and me among your pupils.

Such was the discussion, Crito; and after a few more words had passed between us we went away. I hope that you will come to them with me, since they say that they are able to teach any one

who will give them money; no age or want of capacity is an impediment. And I must repeat one thing which they said, for your especial benefit, — that the learning of their art did not at all interfere with the business of money-making.

Crito: Truly, Socrates, though I am curious and ready to learn, yet I fear that I am not like-minded with Euthydemus, but one of the other sort, who, as you were saying, would rather be refuted by such arguments than use them in refutation of others. And though I may appear ridiculous in venturing to advise you, I think that you may as well hear what was said to me by a man of very considerable pretensions — he was a professor of legal oratory — who came away from you while I was walking up and down. 'Crito,' said he to me, 'are you giving no attention to these wise men?' 'No, indeed,' I said to him; 'I could not get within hearing of them — there was such a crowd.' 'You would have heard something worth hearing if you had.' 'What was that?' I said. 'You would have heard the greatest masters of the art of rhetoric discoursing.' 'And what did you think of them?' I said. 'What did I think of them?' he said:— 'theirs was the sort of discourse which anybody might hear from men who were playing the fool, and making much ado about nothing.' That was the expression which he used. 'Surely,' I said, 'philosophy is a charming thing.' 'Charming!' he said; 'what simplicity! philosophy is nought; and I think that if you had been present you would have been ashamed of your friend — his conduct was so very strange in placing himself at the mercy of men who care not what they say, and fasten upon every word. And these, as I was telling you, are supposed to be the most eminent professors of their time. But the truth is, Crito, that the study itself and the men themselves are utterly mean and ridiculous.' Now censure of the pursuit, Socrates, whether coming from him or from others, appears to me to be undeserved; but as to the impropriety of holding a public discussion with such men, there, I confess that, in my opinion, he was in the right.

Socrates: O Crito, they are marvellous men; but what was I going to say? First of all let me know; — What manner of man was he who came up to you and censured philosophy; was he an orator who himself practises in the courts, or an instructor of orators, who makes the speeches with which they do battle?

Crito: He was certainly not an orator, and I doubt whether he had ever been into court; but they say that he knows the business, and is a clever man, and composes wonderful speeches.

Socrates: Now I understand, Crito; he is one of an amphibious class, whom I was on the point of mentioning — one of those whom Prodicus describes as on the border-ground between philosophers and statesmen — they think that they are the wisest of all men, and that they are generally esteemed the wisest; nothing but the rivalry of the philosophers stands in their way; and they are of the opinion that if they can prove the philosophers to be good for nothing, no one will dispute their title to the palm of wisdom, for that they are themselves really the wisest, although they are apt to be mauled by Euthydemus and his friends, when they get hold of them in conversation. This opinion which they entertain of their own wisdom is very natural; for they have a certain amount of philosophy, and a certain amount of political wisdom; there is reason in what they say, for they argue that they have just enough of both, and so they keep out of the way of all risks and conflicts and reap the fruits of their wisdom.

Crito: What do you say of them, Socrates? There is certainly something specious in that notion of theirs.

Socrates: Yes, Crito, there is more speciousness than truth; they cannot be made to understand the nature of intermediates. For all persons or things, which are intermediate between two other things, and participate in both of them — if one of these two things is good and the other evil, are better than the one and worse than the other; but if they are in a mean between two

good things which do not tend to the same end, they fall short of either of their component elements in the attainment of their ends. Only in the case when the two component elements which do not tend to the same end are evil is the participant better than either. Now, if philosophy and political action are both good, but tend to different ends, and they participate in both, and are in a mean between them, then they are talking nonsense, for they are worse than either; or, if the one be good and the other evil, they are better than the one and worse than the other; only on the supposition that they are both evil could there be any truth in what they say. I do not think that they will admit that their two pursuits are either wholly or partly evil; but the truth is, that these philosopher-politicians who aim at both fall short of both in the attainment of their respective ends, and are really third, although they would like to stand first. There is no need, however, to be angry at this ambition of theirs — which may be forgiven; for every man ought to be loved who says and manfully pursues and works out anything which is at all like wisdom: at the same time we shall do well to see them as they really are.

Crito: I have often told you, Socrates, that I am in a constant difficulty about my two sons. What am I to do with them? There is no hurry about the younger one, who is only a child; but the other, Critobulus, is getting on, and needs some one who will improve him. I cannot help thinking, when I hear you talk, that there is a sort of madness in many of our anxieties about our children: — in the first place, about marrying a wife of good family to be the mother of them, and then about heaping up money for them — and yet taking no care about their education. But then again, when I contemplate any of those who pretend to educate others, I am amazed. To me, if I am to confess the truth, they all seem to be such outrageous beings: so that I do not know how I can advise the youth to study philosophy.

Socrates: Dear Crito, do you not know that in every profession the inferior sort are numerous and good for nothing, and the good are few and beyond all price: for example, are not gymnastic and rhetoric and money-making and the art of the general, noble arts?

Crito: Certainly they are, in my judgment.

Socrates: Well, and do you not see that in each of these arts the many are ridiculous performers?

Crito: Yes, indeed, that is very true.

Socrates: And will you on this account shun all these pursuits yourself and refuse to allow them to your son?

Crito: That would not be reasonable, Socrates.

Socrates: Do you then be reasonable, Crito, and do not mind whether the teachers of philosophy are good or bad, but think only of philosophy herself. Try and examine her well and truly, and if she be evil seek to turn away all men from her, and not your sons only; but if she be what I believe that she is, then follow her and serve her, you and your house, as the saying is, and be of good cheer.

Hipparchus

ΙΠΠΑΡΧΟΣ

Socrates: Whether therefore do they appear to you to do this in consequence of knowing, or being ignorant that these are things of no worth? For if they do this through ignorance, you call the lovers of gain stupid.

Hippias: But I do not call them stupid, but perfectly crafty and base; men who are vanquished by gain, who know that the things from which they have the boldness to acquire wealth, are of no worth, and yet at the same time, through their impudence, dare to love gain.

Socrates: Do you, therefore, call a character of the following kind a lover of gain? I mean, as if a husbandman, planting a tree or herb, and knowing that it is of no worth, should nevertheless think it worth while to enrich himself from the cultivation of such a plant? Do you call such a one as this a lover of gain?

Hippias: A lover of gain, Socrates, thinks he ought to enrich himself from every thing.

Socrates: Do not thus rashly answer me, like a man who has been injured by someone; but, attending to what I fay, answer me as if I should again interrogate you from the beginning. Do you agree with me, that a lover of

gain knows the value of that thing whence he thinks it worth while to enrich

Socrates: Who then is he that has a knowledge of the worth of plants f and who like wise knows in what region, and at what

time of the year it is worth while to plant them? that we also may adopt something from those words of the wise, which lawyers employ for the lake of elegance.

Socrates: Do you, therefore, fay that the term, It is worth while to acquire wealth, is any thing else than to think that it is requisite to acquire wealth?

Socrates: Do not therefore you, who are so young, endeavour to deceive me, who am now an elderly man, by answering, as)ou do at present, what you by no means think; but answer me' truly, whether you think that the man who is a husbandman, and who knows that it is not worth while to set a certain plant, will yet expect to he enriched by such a plant?

Socrates: What then? Will a jockey who know s that the food which he gives a horse is of no worth, be ignorant that by such food he will destroy the horse.?

Socrates: He will not, therefore, think that from such aliment as this, which is of no worth, he shall be enriched.

Socrates: What then? Do you think that a pilot who furnishes a ship with a rudder and fails, which are of no value, can be ignorant that he shall sustain an injury, be himself in danger of perishing, and both destroy the ship and all it contains?

Socrates: He will not therefore think that he shall be enriched by furniture of no value.

Socrates: Will the general of an army, likewise, when he knows that his soldiers have arms which are of no value, think that he shall acquire wealth, or that it is worth while to be enriched by these?

Socrates: In like manner, if a piper a pipe of no value, a a lyre, an archer a bow, or in short if any other artist or (skilful perl'on possesses instruments, or any other apparatus of no value, will he think that he shall be enriched by these?

Socrates: Who then do you call lovers of gain? For they are certainly not those whom we have already mentioned, who expect to be enriched from things which they know are of no value. And thus, O wonderful man, according to what you fay, no one is a lover of gain.

Hippias: But I, Socrates, wish to fay, that those are lovers of gain, who, through insatiable avidity, transcendently aspire after things very small and trifling, and which are of no value, and this for the fake of gain.

Socrates: But certainly, O belt of men, they do not aft in this manner, knowing that they are things of no worth; for we have granted that this is impossible.

Socrates: If, therefore, they do not aft in this manner knowingly, it is evident that their conduct mull be the effect of ignorance; the consequence of thinking that things which are of no worth are highly valuable.

Socrates: Do the lovers of gain, love any thing else than gain?

Socrates: But do you fay that gain is contrary to loss?

Socrates: Is it therefore good to any one to suffer a loss?

Socrates: Are men, therefore, injured by loss?

Socrates: Do you, therefore, call those that love good, lovers of gain?

Socrates: You do not then, my friend, call the lovers of gain insane persons. But with respect to yourself, whether do you love that which is good, or do not love it?

Socrates: Is there a certain good which you do not love, but a certain evil which you do?

Socrates: But you love all good things equally.

Socrates: Aik me, if also do not. ‘ For I also shall acknowledge to you, that I love things good. But besides I and you, do not all other men appear to you to love things good, and hate such as

are evil?

Socrates: But have we not acknowledged that gain is good?

Socrates: After this manner, therefore, all lovers of gain appear; but according to that mode which we before mentioned, no one was a lover of gain. By employing which of these two, then, shall we not err?

Hippias: If any one, Socrates, rightly apprehends what a lover of gain is, I think he will rightly consider him to be a character of this kind, who earnestly applies himself to the acquisition of wealth, and thinks it worth while to enrich himself from those things from which good men never dare to enrich themselves.

Socrates: But do you not see, O sweetest of men, that we ju/i now acknowledged that to be enriched is to be benefited?

Socrates: Because this also we previously admitted, that all men always aspired after things good.

Socrates: Will not, therefore, good men with to possess every thing lucrative, since every thing lucrative is good?

Hippias: But they will not, Socrates, desire things lucrative, by which they may be injured.

Socrates: Do you fay that to be injured, is to suffer a loss, or that it is el.e?

Hippias: I fay it is no other than to suffer a loss.

Socrates: Do men, therefore, suffer a loss through gain, or through loss?

Hippias: Through both. For they suffer a loss through loss, and through bale gain.

Socrates: Does it therefore appear to you that any thing useful and good is base?

Socrates: Did we not then, a little before this, acknowledge that gain is contrary to loss, which is an evil i

Socrates: And that being contrary to evil, it is good?

Socrates: You see therefore that you endeavour to deceive me, and that you designedly assert the contrary to that which we just uow granted.

Hippias: I do not, by Jupiter, Socrates: but, on the contrary, you deceive me j and I do not know how it is, but in your discourse you turn all things upwards and downwards.

Socrates: Good words, I beseech you. For indeed I should not ait well, if I were not persuaded by a good and wise man.

Hippias: Who is he? and to what purpose is this?

Socrates: My fellow citizen, and likewise yours, Hipparchus the foil of the Philaedonic Pisistratus, and the eldest and wisest of the sons of Pisistratus. This man, besides exhibiting many other illustrious works of wisdom, was the first that introduced into this land the writings of Homer, and compelled the rhapsodists to recite them in the Panathenaia, alternately, and in order, just as you know they do at present. He likewise brought back Anacreon, who was sent to Teium, in a ship of fifty oars: and always had about him Simonides of Chius; persuading him to reside with him, by great rewards and gifts. He did these things, wishing to persuade his citizens, that thus he might rule over tile best of men; thinking, that it was not proper to

envy any man the possession of wisdom, and this because he himself was a worthy and good man. As, therefore, his fellow citizens were well educated men, and admired him for his wisdom, he likewise endeavoured to instruct the husbandmen, and in order to this, placed Hermae for them in the roads., in the middle of the city, and in each of the towns. Afterwards, from this wisdom of his, which he partly learned, and partly himself discovered, selecting such things as he thought were the wisest, he inserted them in an elegy, and inscribed this work, ms POEMS, and specimens op wisdom. This he did, in the <1rsl place, that his citizens might not admire wile inscriptions in the

temple of Delphi, “ Know thyself,” “ Nothing too much,” and the rest of this kind, but that they might think the words «f Hipparchus were to for wisdom to these: and, in the next place, that by every where reading and receiving a taste of his wisdom, they might come from the fields, and be instructed in the other branches of learning. But there are two epigrams, one on the left hand part of each of the Hermae, in which, according to the inscription, Hermes says, that the column Should stand in -the middle of the city, and the people; and the other on the right hand part; which was thus inscribed: “This monument was raised by Hipparchus—Persist in paying.attention to justice.” There are also many other beautiful inscriptions, on other Hermae; and the following is to be seen in the Stiriac road: “ This monument was raised by Hipparchus—Do not deceive your friend.” I therefore, being your friend, dare not deceive you, and oppose the mandate of so great a man; after whole death, the Athenians were under tyrannic subjection to his brother Hippias. And you Hiuft have heard from all old men, that there never was a tyranny in Athens till these three years past, and that during every other time, the Athenians lived somewhat nearly after the same manner, as when Saturn reigned. But it is said by more elegant men, that he did not die in the way which the multitude report, viz. through the ignominy of his sister Canephoria; (for it is absurd to suppose that this was the case;) but that Harmodius was beloved and instructed by Ariftogiton, who valued himself very highly on this account, and thought that Hipparchus would be his antagonist. But at that time it happened that Harmodius was the lover of a certain noble and beautiful youth, whole name I have heard, but do not at present remember. This

young man then at first admired Harmodius and Ariftogiton, as wise men, but afterwards associating with Hipparchus, he despised them; and they being very much afflicted with the disgrace, (lew Hipparchus.

Hippias: You appear, therefore, Socrates, either not to consider me as a friend; or, if you do think me a friend, not to be persuaded by Hipparchus:• for I do not know how to persuade myself that you have not deceived me indie preceding discourse..

Socrates: But indeed, just as in the game of chefs, Tam willing to retract. whatever you please, that you may not think I have deceived you; Whether therefore shall I retract this assertion for you, that all men desire good?

Socrates: Shall I retract this then, that neither to sustain a loss itself, is an evil?

Socrates: Shall it be this then, that gain, and to acquire gain, are contrary to less, and to sufFer a loss?:

Hippias: Nor this neither Soc. Shall I retract this assertion, that to acquire gain, as being evil, is good h

Hippias: You shall not retract any thing of this.

Socrates: It appears to you, therefore, as-it seems, that of gain-one part is good, and another part evil Hip. To me it does appear so.

Socrates: I will therefore retract this for you. For let it be that one kind of. gain is good, and another kind evil: but gain itself is not more good than evil. For is it?'

Socrates: I will tell you. Is there good, and is there likewise bad, food?

Socrates: Is therefore one of them more food than the other? or are both of them similarly food? and does the one in no respect differ from the other, so far as each is food, but so far as one is good, and the other bad?

Socrates: And does it not likewise follow with respect to drink, and all ether things which participate of the good and the bad, that they differ in no

respect from each other, in that in which they are the same? Just as with respect to our own species, one man is good, and another bad.

Socrates: But with respect to men, I think that one man is neither more a man than another, neither the good than the bad, nor the bad than the good.

Socrates: Mu ft we not therefore think in the same manner respecting gain, that both the good and the bad are gain?

Socrates: He, therefore, who possesses good gain, is not in any respect more enriched than he who possesses bad gain: for we have granted that neither of these appears to be more gain than the other.

Socrates: For neither the more nor the less is present to either of these.

Socrates: But how can any one do, or suffer, more or less with respect to a thing to which neither of these pertains?

Socrates: Since, therefore, both are similarly gain and lucrative, it is requisite that we should still further consider this; on what account you call both of them gain, and what it is that you discover to be in both the same. Just as if you should alk me why I just now called both good and bad food similarly food, I should fav. It is because each is a dry aliment of the body. And this you will also grant. Or will you not?

Socrates: And there will be the same mode of answering respecting drink, that we give this appellation to the moist aliment of the body, whether it is good or bad: and the reply in other things will be similar. Do you, therefore, endeavour to imitate me, by answering as follows. You fay with respect to good and bad gain, that each of them is gain. What same thing is it then which, perceiving in these, you denominate gain? But if you are not able to answer me this question, attend to what l am now going to fay. Do you then call every possession which any one obtains gain, when he either (pends nothing, or receives

more than he Spends?

Hippias: It appears to me that this should be called gain.

Socrates: Do you, therefore, thus denominate such things If any one at a feast should spend nothing, but when satiated should become diseased?

Socrates: But if he should obtain health from feasting, would he acquire gain, or suffer a loss?

Socrates: This, therefore, is not gain, to acquire any kind of possession whatever.

Socrates: Does it therefore follow that gain is not to be acquired from every kind of possession, whether it be good or bad?

Socrates: And does it likewise follow that loss will not be sustained from every thing, whether it be good or bad?

Socrates: Do you, therefore, perceive how you again revolve to the same thing? For gain appears to be good, but loss evil.

Socrates: And this not unjustly. But Bill further, answer me this: If any one obtains more than he spends, do you fay that this is gain?

Hippias: I do, if his gain is not base, but he receives more than he spends, either of gold or silver.

Socrates: And I (hall also ask you this: If any one, spending half a pound of gold, should receive double this weight of silver, would he be a gainer, or a loser?

Hippias: A loser, certainly, Socrates: for he would only receive half the value of what he spent.

Socrates: But yet he would receive more. Or is not double more than half?

Hippias: But silver is not of the same value as gold.

Socrates: It is requisite therefore, as it seems, to add value to gain: for in this case, though the silver is more than the gold, yet

you fay it is not of equal value.

Hippias: And very much so: for thus it is.

Socrates: Value, therefore, is lucrative, whether it is small or great: but that which is without value is without gain,.

Socrates: Do you fay that value is any other value than that which deserve* to be acquired?

Socrates: But what do you call deserves to be acquired? The useless, or the useful.

Socrates: The useful, therefore, is good..

Socrates: Hence, O most virile of all men, have we not a third or a fourth: time granted that the lucrative is good?

Socrates: Do you remember, therefore, whence this discourse of oursoriginated?

Socrates: If you do not, I will remind you. It originated from your denying that good men would be willing to acquire every kind.of gain, but that, they would, with' to possess good, and not bale gain.

Socrates: But did not our, discourse compel us to acknowledge, that all kinds of gain, both small and great, are good?

Hippias: It did compel, Socrates, rather than persuade me.

Socrates: But perhaps,after this, it will also persuade you. Now, however, whether you are persuaded, or in whatever manner you may be affected, do, you agree with us, that is good, both small and great?

Socrates: And do you agree with me, or. not, that all good men aspire after that are good?

Socrates: But you said that bad men love gain of every kind, both small and. great.

Socrates: According to your assertion, therefore, all men will be lovers of gain, both good and bad men.

Soc, No one, therefore, who blames the love of gain will blame rightly. Cnee he who does so is himself also a lover of gain.

The Rival Lovers

ΕΡΑΣΤΑΙ

X WENT into the School of Dionyfuis the grammarian; and I there saw the comeliest: and finest of our young gentry, accompanied by such

2 The narration is made in the person of Socrates: who is here feigned by Plato to relate to some of his friends a certain conversation, in which he had been engaged; but how long before this narration is left undetermined.—Now we know, it is usual and natural for all men to begin their relation of any thing pall, whether it confided of facts or words, with an account of the time when those facts happened or those words were spoken; unless the relation immediately succeeds the thing related —Accordingly Plato, in every one of his narrative Dialogues, points out the precise line of the conversation there related, except in this, and in The Lysis: but the words, with which he begins The Lysis, manifestly, we think, imply the time to have been the morning of the same day. The Rivals therefore, remaining a Jingle exception to the general rule, it seems

as courted their esteem and friendship 4. Two of these youths happened at that time to be disputing: but what was the subject of their dispute I

necessary to suppose, that Plato in this Dialogue, agreeably to the usage of all men, dilated to them by nature and common sense, and agreeably to his usual dramatic manner, intended to represent Socrates, immediately on his quitting the school of Dionysius, meeting with some of his friends, who happened not

to have attended him thither, and relating to them a conversation, to which they had not been witnesses. For Socrates appears never to have used the didactic manner, in the instructing his disciples: but to have taught them his divine doctrine in the more engaging way of familiar conversation. If then he be supposed to have made them this narration in answer to these questions of have you been, and what have you been doing since you left time, Just now, is evidently implied in the very first sentence. Or if he be supposed to have given them the recital from his own motion, as being yet warm from the discourse recited, and having his head dill full of the this case, the abrupt manner of beginning, without of the time, is more animated, and shows the mind pregnant with the matter to be delivered.—Dacier, in his translation of this Dialogue, has here thrust in, without any warrant from the original, the words " Vautre jour which give an air of coldness to the whole narration. But it mull be observed, that he is every where more attentive to make his translation of Plato agreeable to modern readers, than to preserve those seemingly slight and trivial dramatic circumstances, which would have cost him the trouble of many a note to illustrate and explain.—S.

scholar would give him here the more honourable title of T^a^xTixo; -. It is further to be

4 There was a law or custom in Sparta, instituted by Lycurgus, that young gentlemen, who had gone through the whole course of their studies, and were become perfect in the pra< 5 tice of those virtues they had learnt, should take under their own immediate eye the younger sort, who were then training up in the same discipline. The intention of which law was this j that the continual presence and example of those adepts might animate the learners, and fire them with emulation and an ardour to arrive at the same excellence. To further this end, particular friendships[3]

[3] observed, that Olympiodorus, when he calls him r^a/xy.arurrr.g, fpealcs of him historically, and not citing the words of Plato in this passage, as Dr. Windet in his notes on Olympiodorus, and Dr.. Forster after him, crroncoufly seem to think.—S.

did not perfectly apprehend. There was reason however to suppose it related either to Anaxagoras or to Oenopides ': for they appeared to be

were highly encouraged, and grew into great fashion, between two Inch persons. They were contracted in this manner: the elder chose out from among the youth one, whose genius he thought similar to his own, and whom he had conceived the belt hopes of being able to improve; attached himself to him, and accompanied him in all his (Indies, his performances in music, and his gymnic exercises, the two principal parts of a Spartan education; encouraging and applauding him, endeavouring to acquire his confidence, and engage him to a reciprocal esteem and friendship. In imitation of this custom amongst. the Spartans, Solon either introduced or authorized friendships of this kind the Athenians; laying them under the same restrictions as in Sparta; and prohibiting (saves, though frequently employed as schoolmasters and pedagogues to their youth, from aspiring to be their private tutors, guides, and constant companions, in this way of intimacy and friendship. This was all the caution deemed requisite, in those ancient and virtuous times, to preserve their youth fro‘111 the contagion of hase sentiments and bad manners. But when afterwards the riches of Alia flowed into Athens, and thence into the rest of Greece, through the channels of trade and commerce; and when luxury and effeminacy, which always come with the tide of riches, had corrupted the Grecians, and debauched their manners; friendship, which only can subsist amongst the virtuous, no longer flourished in its purity, but degenerated into a commerce of lewdness; entered into and managed, at first, under the mask of friend (hip, and those laudable motives before mentioned; but at length, especially amongst the rich and great, carried on

more openly, and with little or no disguise. Instances in both ways we meet with frequently in Plato; in the way of virtuous friendship, Socrates in particular, every where seeking out the heft disposed amongst the youth, attracting their regards and cultivating their esteem, with a view to communicate to them his wisdom, to avert them from the parties of bad men, and to engage them on his own fide, the fide of virtue. The Man of Learning in this Dialogue is plainly enough, from his whole description, another instance of like kind. Of which sort were the other persons, mentioned in the passage here before us, is uncertain: and examples of the vicious kinds in fume other Dialogues need not to be pointed out. Thefpeeeh of Alcihiades in The Banquet is too flagrant a proof, that the profligacy of that young nobleman was no very astonishing or Angular thing at Athens. When any other such passages occur in Plato, it will be sufficient to refer our readers to this note.—S.[121]

describing circles; and by holding their hands in an inclining and oblique portion, seemed to be representing, not in play, but with much seriousness, certain inclinations of the pole. Upon which, as I had seated myself next to an admirer of one of the young disputants, I moved him with my elbow to turn his face to me, and then asked him what point it was which engaged

those two youths so earnestly in debate; adding, It must certainly be something of great importance, and a matter of fine speculation, that, on which they bellowed so serious an attention.—What call you great and fine 1? said he. They arc prating about things up in the Sky, and trifle away their time

you, said he, by great and fine?" If this reading be right, Dr. Forster rightly says, there is a pleonasm here in the words tint and But, perhaps, instead of we should read

Grammarians, in explaining ancient authors, love all opportunities of having recourse to figures of speech; and verbal critics take as much delight in all occasions to amend the text. But as this makes only asmall part of the office we have

undertaken, wc hope we are moderate in the execution of it. We therefore contend not in this place, but leave it to the determination of our learned

in the Phsedo is opposed to npovruievTuv “ the speaking about what concerns a man.” But by the multitude, by the men of business, and all other the enemies of philosophy, it was specially used to signify those who held much conversation together on philosophical subjects. Thus Strepfiades in Aristophanes at first calls the house, where men addicted to fisch studies used to assemble,, “ the considering place of wise souls and when afterwards he

is made to change his mind, he calls it t»v t m “ the house of the philosophie praters.” The sense of this passage is expressed in The Phcedrus by one word, ^tTxfiv. —S.

t. \»

For the real nature of these things on high Ne’er had I sound out rightly, if, 8cc.- And near the end of the comedy, where Strcpfiade9, in mimicry, repeats the former of twa passages, AipoQaxu, k. t. a. he adds, speaking to Socrates in scoff,

The dwellings of the moon too have yc >[7]

[7] The Greek is thus printed; 'O 3’ sure, IIoiov, e$>«, fxeya kx\ xa\ov: i(And he replied, What mean

in philosophizing.—This answer of his seemed to me a strange one; and I said, Young man, do you then think it mean and dishonourable for a man to philosophize? or for what other reason do you speak so harshly of what they are employed my putting this question to him, another person ', who happened to be a rival of his for the esteem of the youths T

ridiculing in this the doctrine of Anaxagoras and his followers, that the moon was inhabited, like the earth, which the poets called

* It will soon appear probable, that Socrates knew who this person was; for he tells us what kind of life he led; which resembled rather that of a philosopher than that of a sophist. It is probable that he was a stranger at Athens, and chose to be concealed. It was polite, therefore, in Socrates to suppress the mention of his name. Had he been an Athenian, it would have been natural for Socrates to speak of him by name, as he was speaking to his fellow-citizens. And had he been a sophist, we could not fail to have been told his name, because Socrates never spared the sophists. He appears then to have been some foreign philosopher, whom Socrates had discovered notwithstanding his affected privacy. Now none of the philosophers of that age lived a life so retired, or so obscure, as did Democritus. He sought not same: speculative knowledge for its own fake seemed to be his only end. For he despised, not only the multitude, but all men. He concerned not himself with any human affairs; but laughed at all human pursuits, and even at all social engagements. Quite opposite in this respects was the character of Socrates. For he always lived the mod social life, in the midst of the mod populous city at that time in the known world. He conversed familiarly with all forts of men, with a Ample and constant view to make them better men in private life, and better citizens, whether as governors or as subjects. His peculiar philosophy was wholly of the practic kind. He was indeed the first who investigated the principles of morals and of politics, and thus railed them into sciences: whereas before his time political and even moral precepts lay unconnected, loose, and scattered; and were consequently vague and uncertain. He first discovered them to be founded in the stable and eternal essence of mind, and in the government of mind, by nature, over all things inferior to itself. Thus the philosophy of Socrates is like the ladder in the patriarch Jacob’s dream: his metaphysics ascend gradually up to the first cause of things; from which depend, and from whence come down to earth, the sciences of ethics and of politics, to bless mankind. Such being the sum of

the Socratic doctrine; and the drift of this Dialogue in particular being to {how, that no other doctrine than this deserves the name of philosophy; none of the philosophers, so called, was so proper to be opposed here to Socrates, as Democritus; not only for the reasons already given, but because also, like moll modern philosophers, he was merely a naturalist; making body the foie subject of his philosophical researches; attributing to body a natural and necessary motion; and in the nature[813152529]

mentioned,'and was therefore seated near us, having heard my questions, with his answers to them, interposed, and said to me, It is unworthy of you, Socrates, to ask the opinion of this man, whether he thinks it mean and dishonourable to philosophize. Know you not him, that he has spent all his time in wrestling, cramming himself, and sleeping? What other answer then can you expect from him than this, that the study of philosophy is dishonourable and the person, who thus spake to me, ye are to understand, employed his whole time in the improvement of his mind, and in the study of the arts and sciences; the other, whom he had vilified,

of body seeking for the cause of all things. There seems to be another propriety too in introducing Democritus in this Dialogue, as attentive to the astronomical dispute between the two youths. For we have some reason to think, that he favoured the Pythagorean, or at lead the Semi-Tyehonic, system of the world. His master in natural philosophy wc know was Leucippus: and by all writers of philosophic history he is accounted of the same fe£t, the Eleatic. Now Leucippus, as we are informed by Diogenes Laertius, held r»v y»v Trepi to “that the earth was carried wheeling round the middle.” If the middle here means a central body at some distance from the earth, (and it is certain, that every where else signifies to ride, or to be carried aloft,) it follows, that Leucippus held the Pythagorean system of the world. But if it means only the axis of the earth’s motion, then the doctrine of Leucippus is agreeable to that

hypothesis, since called the Scms-Tychonic.—S.

a In the Greek, i pour See Dr. Forster’s note on this place, to which nothing needs to be here added, —S.[9]

[9] Tltpt rov fxirtupuv. Aristotle retrained the meaning of the word /xtrecopx to signify the phenomena in the air or lower sky, with their influences on the water; and those only in the upper sky which seem mutable or transient, such as comets; or indistinct, as the milky Way; exclusively of those which appear distin& in their forms, and are constant and invariable in their motions, called the heavenly bodies. But Plato by the word /xtrtupx always means principally, if not solely, these last, as the word commonly signified. Thus in The Clouds of Arifiophanes, where Socrates is called one of the fxntupocrcipiinut, he is made to fay, Ae/>octxtw, xai Tripurao-iru tc» h\sov y “ I walk in air, and contemplate the sun.” And prefenlly after,

spent his in the care and improvement of his body by the gymnic ' exercises. I therefore thought it proper to desist: from putting my questions to him, this robust body of a man; seeing that he professed not to be well-practised in the arts of reasoning and discoursing, but in feats only of activity and strength: and I chose rather to interrogate and fist the other, who pretended to be the wiser man; in hopes that, if it were possible for me, I might receive from him some improvement in knowledge. Addressing myself therefore to him, I told him that I had proposed my question before all who heard me; and if you think yourself,

1 These exercises were, running, leaping, catling of quoits, throwing of javelins, wrestling, and boxing: but wrestling was the principal. They were called gymnic, because they were all of them usually, and wrestling was always, performed with the limbs and the upper part of the body quite naked. They were taught according to rules of art: mailers were appointed to teach them; and schools were built, and places set 3part, proper for the exercise of them. Skill in them, particularly in wrestling, and the exercise according to art, was called the word here used by Plato.—S.

3 One of the moll linking features in the character of Socrates was the ironical manner which he used in converting with the

Tophi (Is, complimenting them on their pretended wisdom, and dissembling his own real knowledge. For before them he affected ignorance even in those subjects, which he had studied the molt and knew the bed of any man; and was always asking them questions on those very points, seemingly for the fake of information. By this conduct he engaged them to expose their own ignorance, and by that means undeceived their followers and admirers, who by them were misled and had their minds corrupted. But the sentence now before us, where Socrates is speaking, not to the Man of Learning himself, but of him to his own friends and disciples, we presume, cannot be ironical: it is one of those many passages in Plato, where appears another, equally strong, hut more amiable feature, in the character of that wise and good man; his unassuming modesty, and truly polite regard to others, according to their rank or merit.—S.[623]

4 In the original here is a transition from the narrative or historical Tty In to the dramatic or

said I, capable of giving me a better answer than that man, I repeat the same question to you. Whether you think it honourable, or not, to philosophize?—About the time we had proceeded thus far in our conversation, the two youths, overhearing what we said, became silent; and breaking off the dispute between themselves, gave their attention to us. Now, what were the sentiments of their professed friends and admirers on this occasion I know not; but, for my own part, I was struck with admiration at the scene; as I always am, when I see such a disposition in the young and handsome. One of them, however, the person to whom I bad proposed my question last, seemed to me no less charmed with it than myself: not but that he answered with a free and open air, as if ambitious only of having the preference and the praise given to his own studies.—' Should I ever, Socrates, said he, come to think meanly of philosophy, I should no longer deem myself a human being; as I deem not any person, who entertains such a sentiment worthy of

that character;—hinting at his Rival, and raising his voice, that he might be heard by the youths, of whose esteem both of them were then, said I, think highly of philosophy. —Most highly, replied what? said I: do you suppose it possible for a man to know the true dignity of any thing, to know whether it be bale or honourable, unless he first knows what the nature of that thing is?—

that of dialogue. But as we use no such figure or mode of speech in our language, the translator has inserted the words, * said I," to make his sentence good Engliftw—S.[11]

[11] In all editions of the Greek we read, Tor tpepsm, a word justly suspected by every' learned and careful reader not to have been written in this place by Plato. Dr. Fortier, in his edition of this Dialogue, proposes an emendation, made by a very ingenious and learned man, Mr. Mudge, formerly of Exeter College in Oxford; it is Tor: in favour of which we heartily resign

I do not, answered you then, said T, what it is to philosophize? --Perfectly well, said is it then? said I.—What other tiling, answered he, than that described by Solon in these verses,

To various knowledge, I had before,

And thus old age increases fills my (lore.[12]

[12] two former conjectures of our own;— one was rc:r Epa/Atvcir, in the same sense, in which Plato had just before said oero; tciv Epy.yrutv: - the other was Tor Epa ^tsror, a word which we imagined might distinguish this man's regard for the youth from that of the other, the (xovnuop. We embrace Mr. Mudgc's emendation the more readily, because the description, given of the Man of Exercise in the word cppupuov, is well opposed to the description of the Man of Learning, given us by Plato presently afterwards.—S.

Agreeably to this is my opinion, said he, that the man, who would philosophize, ought to be always, in his old age as well as in his youth, still adding to his flock of knowledge by some new acquisition; making use of life to learn as many things as this account of his* seemed to me,

* at ei mWa. JiJourxojuEvo!. In these words is this celebrated verse of Solon's cited her*

by Plato. And we have given a paraphrase of it according to this reading, and answering the purpose for which it is introduced. A more literal translation would be this: " Old as I grow, I still learn many things." But the verse, as cited by other ancient writers, is this.

to be translated thus:

Yet have to learn much more than yet I know.

Or, if the word ^, in the future tense, has here the force of a verb desiderative or meditative, and signifies resolved, or ready, or about to learn, it may then he thus translated:[14]

[14] ruiAotns iroiucOai fcoyov. " It is a thing befitting human beings, to make more account of the soul, than of the body. For the soul, improved in the highest degree, rectifies what is amiss in its tabernacle," meaning the body; " whereas strength of this, without the exercise of reason, betters not a w hit the condition of the soul." fi/xn ptiv yap reMuTsny rxr,ncs (Ao%dr;i iv cfki' <r#r,vto? yap anu Xoy«r/uos/ ov ei> t i a/teim riQrui. —S.

I still grow older; yet I still aspire

In many things more knowledge to acquire.

The verse, we see, whichever he the true reading, and whichever the precise sense of it, is evidently in praise of polymathy; and consequently is agreeable to the mind and taste of our Man of Learning: but the meaning of it, last given, seems to he so the most; the second has indeed a greater appearance of modesty j and the first perhaps favours too much of vanity and ostentation.—S.

going much toil and labour in said he: for how should a man, who labours little, or uses little exercise, acquire a good habit of body. —Here I thought it mod advisable to call in to my assistance our champion for the gymnastic art, on account of his experience. I therefore said to him, How can you fit (isent, tny friend, and hear this man talk fir strangely? Are you of opinion too, that a good habit of body is acquired through great toil, labour, and exercise, and not rather by means of finch as are my part, Socrates, said he, I was thinking that I had an evident

proof before my eyes, at this very time, to confirm the truth of that well-known saying, that moderate labour is bell for the so? said I.—Do I not see him there, said he, in want of deep and good nourishment, scarce able to turn his head, and worn away to a shadow with much study and hard labour of the this sarcasm, the youths, who heard him, were pleased, and could not refrain from laughing; a circumstance which put our great student a little out of countenance.—I then said to him, Well; do you now agree with us, that a good habit of body is procured neither by much nor by little labour, but by that only which is moderate? or will you dispute the point with us, one against him, replied he, I would enter the lifts with much pleasure, well assured that I should be able to support my fide of the argument, even though it were worse and weaker than it is: for in such combats, he is a mere nothing. But against you, Socrates, I would not choose to contend for

1 This must ever be the case of such a man as Democritus, who was always poring on his books, his experiments, and his diflTections. From hence it was, and from extreme attention to his (Indies, that he did not at first, as Laertius relates, know his own father, when lie came to visit him.—S.

3 These athletic gentlemen were remarkable for their slowness, heaviness, and want of adroitness, in all exercises of the mind. Sec the third book of the Republic. S.[16]

[16] at first appearance, to have some weight in it: but after reviewing it a JittJe within myself, I asked him, whether philosophy in his judgment consisted in multiplicity of knowledge.—That, replied he, is entirely my opinion. —And is it your opinion too, suid I, that philosophy is only a becoming and an honourable study? or do you deem it also good and beneficial?— Good and beneficial, replied he, in the highest degree.—Docs this appear to you the peculiar property of philosophy? or think you that other studies partake of the same advantage? For instance, love of the gymnic exercises, do you deem it not only honourable and becoming a man, but good for him all'o? or think you otherwise?—To this question, he facetiously replied,! have two answers to give. To this man here would fay, It is neither: but to you, Socrates, I acknowledge it to be both, to be good for a man, as well as becoming him.—Then I asked him, whether in these exercises he thought the undergoing much toil to be the same thing with love cf exercise.—By all means, said he; just as in philosophizing, I take the acquisition of much knowledge to be the lame thing with philosophy.— ■Do you think then, said I, that the lovers of those exercises have any other view than to acquire a good habit of body?—-No other, replied he.—Is a good habit of body then, said I, acquired by using much exercise, and under useful to man, that which our elegant philosophic poet terms, the only science of mankind.—One cannot but wonder, that Wower, in his treatise de Polymathia, c. ii. § 7. could so much mistake Plato's meaning, as to cite him asserting in this very Dialogue that philosophy is polymathy. We cannot suppose Wower to have meant, that such an account of philosophy was given us somewhere in this Dialogue, that is, by the Man of Learning: for to confirm what he tell us as the opinion of Plato himself, he immediately adds the following quotation, as out of Plato's Republic, r:ye noXv/AxOsi x<*i <pi\o<rcQov tuutov. Unhappily for his argument, the word in this last passage is not nrohuy-aQa, but and means a love of that knowledge which by nature is sami liar to the mind of man; which is indeed the same thing with the love of wisdom, or philosophy. It is not at all surprising, that Wower should elevate above measure the charms of his own mistress; for such sentiments infeparably attend the passion of love: but to imagine that every other man must see her in the same light, can proceed only from being in love to a degree of madness. Besides; men, who aspire to the same of vast erudition, are apt to read in too hasty and cursory a manner.—S.

any kind of paradox: and therefore I admit, that 'not violent but moderate exercise procures men a good habit of how is it with respect to food? said I. Is it much or moderate, which contributes to the same end r— a With respect to food also he acknowledged moderation to be best. And thus I led him on through all other things which had relation to the body; urging him to own, that it w as best to be moderate in the use of them all, and neither to exceed, nor to be deficient: and all this he granted and how is it with respect to the soul? said I. Is this benefited mod by a moderate or by an immoderate quantity of

those things which it receives? —By a moderate quantity, said he.—Is not learning one of the things administered to the was admitted.—Moll beneficial therefore to the soul is moderate learning, and not an immense granted now is the proper person for us to advise with concerning the body; would we know, what kinds and degrees of exercise are moderate, and what is a moderate quantity of food? Wemuft all three of us agree, that it is either a physician or 1 3 a master of exercise. And concerning corn,

a In the Greek, K^i t a cma In this sentence the word or or other word of like import, seems wanting, and mud be understood. But we suspect that, instead of tx amt, we (should read tx f/tr tx. This concession of ihe Man of Learning thus agrees exactly, and in the same terms, with his two subsequent conccflTions on the same point. We have, however. given a turn to our translation of this sentence, as to adapt it to either way of reading a passage, parallel to this, in Aristotle's Nicomach. Ethics. 1. ii. c. ii.—S.[18]

[18] ' This description of our Man of Learning, in his person and appearance, agrees exactly with the description given of Democritus by Hippocrates, in that epistle of his cited before;—that he was uxg laxws vravu xxi XtirctaBKo;, " extremely pale in his visage and walled in his flesh —that he sound him with a book," 0 iCxiov svts r otv yovaroiv, " which lay [open] on his knees;" trtpx rivet a/if Oiv rav ixtfoiv atira TOffCifxirm, " and that other books lay by him, some on each fide;"— on fjtiv cumvat; tycap iv t yxiipmf, that " by turns he wrote, poring over his writing with earnest attention;" ovt 01 ■naixzoXv—tv tauru " and by turns relied, pondering very much

3 This properly signifies the master, appointed to teach the youth their exercises, and direct every motion to be used in them. But Plato here, and in other places, uses the word to signify a person whose knowledge was of the same kind with that of the if, or gymnastic physician; to know the power of each particular exercise in the cure of each particular disease; and how much of it was to be used in each particular case; a science, which has for many ages been too much neglected. Perhaps, from the time of Herodicus, (who as Plato tells us in his 3d book dc Republic^, uv for a few ages, the offices of -nc and

belonged to men versed in the same kinds of knowledge; though in process of time they came to be very different, and were assigned to men of very different abilities. It is certain, that in the time of Galen, the " the matter of the exercises," was subordinate to the

** the physician" who prescribed the proper exercise j and that he was under his direction. Such an

what is and due quantity for sowing, we a^rce, that the husbandman is the fittest perl'on to be consulted. But concerning the soul, and the discipline or learning to be there (own and planted, of whom ought we to inquire, what measure and what Share is to be accounted moderate?— We were here all of us at a Stand. Upon which, in a jocular way, said» Since wc are at a loss, ourselves, what to answer, will you consent to aSk the opinion of these youths here on the point in question? But perhaps we are above that; ' like the wooers of Penelope, of whom Homer says, that

they disdained! to suffer any to draw the bow before themselves.—! When thev now seemed to be giving up the argument, in despair of coming to a conclusion; I bethought myself how to put the inquiry on another footing. And accordingly I proposed this question, What forts of learning, to the best of our conjecture, does it become a philosopher to acquire principally?

'This knot, or rather break, in the thread of the argument, forewarns us of new matter to be now brought upon the carpet. But there is, besides, n peculiar reason for the pause in this place; and

we have already sound, that it is not all forts, nor even this[19]

[19] We understand the following passage of Xenophon, as having a view to the vehement lover* of bodily exercise, a character common amongst the young men of that age: to /xcr ow w7Tfpe<r0iom* v7Tss7rov £iv a7Tt$oxipz£t (fc. TaufXTr.Sj) to so oca j5eu; r foxtrot, raura ixxvcof sMIIVttv t'oxtfxxgt*

my learned companion answered, That the finest forts of learning, and the mold becoming to the philosophic character, were those which give a man the highest reputation as a philosopher: and this reputation, fa id he, that man would gain, who should appear conversant in all the arts and sciences, at leaf!: in as many as possible, especially in those which are held in esteem the mold, and arc the mold deserving of it the man, who having studied these arts, as far as is requisite to a liberal education, hath acquired so much knowledge in them, as depends on taste and judgment, not on the mechanical exercise of any, or on the labour of the you mean in the lame wav, said I, as it is in building? For in that affair, if you have occasion for artificers and artists, a bricklayer or a carpenter you may hire for five or six minus

therefore it has here a peculiar beauty. Tt seems to be contrived on purpose to give every reader an opportunity of consulting his own mind, and of finding there the proper answer to the last question put by Socrates: it prepares him, therefore, for what is to follow, where he will see his inward conjecture explicitly confirmed, and the conceptions of his own mind from the precedent part of the argument produced to light, in a plain and full description of what is justly to be called the study of wisdom or

and proper sense, to signify arts as distinct from sciences; yet Plato, in the passage to which this annotation belongs, seems to include in the word t all the particular sciences: and it it be so, then the whole account which Laertius gives of the knowledge of Democritus, answers in every part to the philosophic character, as here drawn by our Man of Learning. It is certain, that every particular science has some art immediately derived from it, and particularly dependent on it. In mathematics, the art of numbering and computing depends on the science of arithmetic; the art of measuring on the science of geometry; the art of music on the science of the same name; and ssi art of

calculating eclipses, &c. on the science of astronomy. In the. arts and sciences of higher order it is the same: the art of government thus immediately depends on the science of mankind » the art of leading a good and happy life, on the knowledge of ourselves; and the art of reasoning, on the science of mind. We the rather produce these latter instances, for that they have a near relation to, and serve to illustrate, the last part of this Dialogue.—S.[20]

[20] alteration in the practice was very natural: for when any art is considerably improved, and the principles of it come to be established on science, the inferior branches of it, those which require manual operations, or any labour of the body, of course devolve to inferior persons.—What confirms our supposition is, that yEfchines the Socratic, Plato's fellow-disciple, in his Dialogue irtpi experts, si tita,xrot> t attributes to the nxitorpiGai knowledge and judgment in the constitution and habit of men's bodies. The same writer, in his Dialogue named Axiochus, mentions the vraitionpctai and yv/juxcnai together, as persons equal in authority over the youth committed to their care and teaching. Neither Mercurialis nor Peter Faber cite these last-mentioned Dialogues: they seem indeed to have overlooked them, as being in their days numbered amongst the fuppofititious Dialogues of Plato; for otherwise they would not so hastily have concluded, nor so rashly have asserted, that by Traitjr^Sns Plato means yvfivuffrvs* See the former of these writers in his treatise dc Arte Gymnaftica, lib. i. c. xii. and the latter, in Agonifticon, lib. ii. c. vi.- In the next age after that of Plato, very little alteration seems to have been made. For Aristotle, in the beginning of the 4th book of his Politics, having mentioned this kind of general knowledge, the knowing what sort of exercise is agreeable to each particular habit of body, attributes this knowledge to the traitorgiGrit, as well as to the yv/xvaerms, which lad word we beg leave to read in that passage, instead of yu//,va<niKo;; for we know of no master or teacher of the exercises, or any subordinate officer or minifterin the teaching them, who was ever called by the name of yi^etwnxof. The corruption of the text of Aristotle in this passage arose perhaps from comparing it with another pa ft age in the same work, at the end of the 3d chapter of the 8th book, where the arts yuixvao-riHr, kxi rraitorp& tx* are mentioned together; and where (by the way) the exact distinction is made between them, as they were practised at that time; and the latter, the art of the iraitarpiGw, is shown to be instrumental to the former, the art of the yu/M/ann, though knowledge of the same kind still belonged to both.—S.

3 Less than twenty pounds of our money. For the attic y.va was equal to 3I. 4s. 7d.

but an architect will cost you above ten thousand drachmas so few of these are to be sound in all Greece. Do you mean to distinguish in same such way as admitted such to be his this, I

asked him, if it was not impossible for one man to be a perfect mailer of any two arts, much more to attain a mastership in any considerable number, especially of such as are great and not imagine, Socrates, said he, that I mean, it is requisite for a philosopher to have so thorough a knowledge of any art, as the man who makes it his profession; but to be able, as becomes a gentleman of a liberal education, to understand what the artist says, when he is speaking of his work, better than any of the bystanders; and to interpose judiciously his own advice about the workmanship: so as always to appear, in every conversation relating to the arts, and in criticising on every performance of the artists, to have a liner tulle, and more knowledge, than any other person I, for I was not yet quite certain what he meant, said to him thus; Do I conceive rightly, w lint kind of man you call a philosopher? You seem to me to have described such a man, as the general combatants are in the Olympic games, compared with the racers or

a By an unaccountable error, all the editions of Plato read here But according to a mod certain emendation of Mr. Le Clerc’s, with which Dr. Forller is highly pleased, we ought to read Which reading we have not scrupled to follow in our translation, as Dacier Jtas had the judgment to do in his.—S.

the wrestlers. For in each kind of competition, those universalists fall short of the respective excellencies of the particular professors, and are but the next best men to them in their own way, but at the same time are superior to the professors of the other kind, and easily get the better of these, whole excellence lies only in the other way. Such a degree of (kill as this, you may perhaps mean, that the study of philos'philosophy begets in those who are addicted to it; a degree, by which they fail of supreme excellence in knowledge of the arts, but attaining an excellence which is next to the supreme, they excel all men except the artists: so that he, who has studied philosophy, is, in every employment or business of

life, a man, and below the pitch of perfection. Some fuel) man, I think, as this you point out to us for a philosopher.—You seem, Socrates, replied he, to have a just conception of what belongs to a philosopher, in likening him to a general combatant in the public games. For he is absolutely such a man, as not to be a (lave to any thing; nor has he studied any branch of knowledge so accurately and minutely, as, through entire attention to that one, to be deficient in all the rest, like vulgar artists, and the professors of one only science; but he has bestowed a competent measure of application on them he had made me this answer, I, desirous he should explain himself more fully and clearly, asked him, whether he thought the good, in any way of life, to be useful men, or useless.—Useful, without doubt, Socrates, laid then the good are useful, arc not the bad then, said I; do

you take philosophers to be useful men, or not?—He acknowledged they were useful: and not only so, laid he, but I account them the mod useful of all now, laid I; let us examine whether this be true. How can they be even of any use at all, these men? For it is plain, that your philosopher is inferior in every art or science to the man who is a perfect mailer of he acknowledged.—Well; suppose now, said I, that you yourself, or any friend of yours, for whom you have a great regard, should happen to fall lick, I ask you, whether, with a view to the recovery of health, you would fend for that man, the philosopher; or whether you would lend for a physician.—For both of them, said he.—I ask you not that, said 1; but which of the two you would fend for in the first place, or in preference to the man, said he, would doubt, in such a case, to give the preference to the physician.—And how in the case of a Form at sea, said I? to whom rather would you choose to intrust yourself and your concerns; to a pilot, or to a philosopher?—To a pilot, said he, I for my thus it is in every other affair, said 1; so long as a man, professing skill in it, is to be sound, a philosopher is of no it appears, said he.—A philosopher therefore, said 1, we have discovered to be a man entirely useless; since it is clear, that in

every affair of life, men, who profess (kill therein, are to be sound. And wc agreed before, that the good in any way were the useful men, and the bad were the useless.— Sie was forced to own it.— But now, said I, that we have carried our reasoning to this length, may I go on with my questions? or would it not be rather impolite and rude to push the point any questions that you please, said laid I; I desire nothing else, than to recapitulate what has been already said. The present Hate of the argument then is this: We acknowledged, that philosophy was an honourable study, and professed to be philosophers ourselves: we acknowledged ledged that philosophers were, in their way, good as well as honourable; that the good, in any way, were useful men, and the bad useless-. O.i the other hand, we acknowledged. shat philosophers were useless, whenever we could find good workmen and men of skill of every kind; and that good workmen of every kind, professors of the several sciences, and of the several arts, were always to be sound, for was not all this was, said he.—We grant therefore, agreeably

to those our own concessions, that, if philosophy be, what you fay it is, knowledge in the arts and sciences, the spending our time in philosophizing is then a bad and useless way of life, and philosophers are useless men, and good for nothing. But what, my friend, if their case be otherwise? what, if the philosophic life consist not in studying the arts; nor in busying a man’s self about a multitude of experiments, and continually poring over them; nor in acquiring a multiplicity of knowledge; but in something else? For I thought, that such employments were accounted dishonourable and base, and that those who followed them were called, by w r ay of reproach, dirty mechanics and bellows-blowers. Whether my suspicions are just or[22]

[22] their apprehcnfions of his doing that to which they sound themselves unequal. Rut this criticism of his (hows that lie entered not thoroughly into the sense either of Plato or of Homer in this place: for, in the lines to which he refers us, Homer says, that when Ulysses had offered to try his strength in drawing the bow, they (his rivals) were beyond measure offended, and ove rflowed with indignation and resentment; being afraid left Ulysses should succeed in the attempt, if they permitted it; that is, they were at the same time secretly afraid of his success: for we are to Observe, that Homer writes this as inspired by the Muse, who was supposed not only cognisant of all the past actions and speeches of those % who were the subjects of his poem, but also privy to the secret motives of the actors, and to the minds of the speakers. But the avowed motives of Antinous and Eurymachus, in rejecting the offer made by Ulysses, were indignation at his preemption, and a sense of honour, not suffering them to enter the lifts with an antagonist deemed so much their inferior. In refusing therefore to admit of his proposal, they pleaded, not the danger they were jn of his prevailing, but the (shame that would arise to them in case he should happen to prevail. Thus, under the pretence of the superiority of their rank to his, they concealed the sense they had of their own deficience, and their opinion of his real superior excellence. Affected haughtiness and contcmptuoufnefs is the usual mask of conscious meanness. In this light Plato saw the behaviour of Antinous and his assuming companions, described in the twenly-first book of the Odyssey; and in that ftily jocose manner, which he every where attributes to Socrates, he insinuates that his Man of Learning on the present occasion might naturally have his mind poflt fltd w ith the same sentiments. When Socrates proposed a reference to the two youths, it should seem, from what he immediately adds, that a futile of disdain appeared in the countenance of the professed philosopher. Rut the likening his case to that of Penelope’s suitors contains a hint that he was under secret apprehenffons of having his ignorance exposed. The proper answer to the question of Socrates he knew' was obvious; but his very profession of philosophy would not admit him to speak it openly himself: he was conscious of not possessing any such science as that of mind, and of not having studied any such art as that of medicine for the soul. Therefore, though Socrates at the end of their conversation drive? him to shame, and exposes his ignorance in the nature and ends of philosophy, he endeavoured to conceal this ignorance as long as he could, and was unwilling to have the answer given by any. At the same time it is suggested to our thoughts by Plato, that nothing more than common sense and a candid mind, chiefly to be sound in youths of gooc^difpofnions, was requisite to make that answer;. and that fair reasoning, joined to these, was sufficient to lead a man to true philosophy.—S.

not, will,evidently appear, if you but answer ' to the following questions_

What men are those who underhand how to give proper chastisement to

’ We are now come to the third and last part of the Dialogue. In the two former we have seen what philosophy, truly so called, is

not; in this latter, Plato will show us what it is; for which he here briefly prepares his readers, by informing them, that Socrates will now open a new scene, and begin a new series of

vicious horses? arA they those very men who can give a horse alt the improvement he is capable of; or are they a different sort of men?—The very same men, he those, said I, who are able to improve the useful qualities of a dog, do not the same men know how properly to chastise dogs Which are vicious 'They do, said one and the same art then, said I, are those animals improved and properly agree, said he.—Well; but, said I, is it also the same art, through which a man distinguishes amongst those animals the good from the vicious? or is this an art different

from that, through which they receive improvement and due correction?_

It is still, said he, the same you admit then, said I, that this holds true with regard to the human species in like manner; that the art, whatever it be, by which men are made to excel in virtue, is the same art with that through which bad men are properly chastised, and the same also with that though which and the bad are known and distinguished one sort from the all means, said he.— 1 Now the art, which[24]

[24] Equal to 342!. 18s. 4tl. The tax was worth fyaxi ««. Plato therefore, in this place, might have said one hundred minas instead of ten thousand drachmas: but he chose to express the slim according to its value in the fmallcr coin, to give it at firs't light the greater appearance: as the French choose to compute by litres rather than by pounds llcrling.—Architect seems here to mean no other artist than the mailer-builder.—S,

uses the term art to express both; as he frequently does elsewhere, when he means any art which is founded on science, and without science cannot be exercised. For this note thus much

* Plato proceeds in the next place to the knowledge of mankind; that is, to the knowledge of the same passions and affections in the souls of other men that we feel in our own. Be (hows it to be

consequently one and the same kind of knowledge with the knowledge of ourselves, differing only in the object, of it; as it is applied either to many men, or to a Angle one j for of men every one is a man. He therefore, who thoroughly knows himself who knows what is right and good in his own soul, and what is there wrong and evil, must know at the same time' all men in general, mud know what is good and what is evil in the whole human nature: and he who thus knows others, mud also thus know himself. The subject of all this knowledge id the superior part of the soul of man, mind and reason: the object is itself, and also that part which is inferior, with the passions and animal affections there dated. The knowledge of itself implies the knowledge of its power over the inferior part. Now as no man can help following- known good, nor can help avoiding known evil; the true knowledge of good and evil must be attended with an exercise of that power over the inferior part, improving what is there sound right and good, and rectifying what is wrong and evil. And since all men partake of the same nature, the same knowledge, through which a man manages himself rightly, betters what in himself is good, and corrects what in himself is evil, must qualify him as well to dispense justice to other men, to encourage the good and to correct the bad. Now this is the office of the judge and of the magistrate; and the science, which enables him to execute his office well is the judicial science, which is no other than the science of justice. It follows, therefore, that the wise and good man, he who is matter of this science, and employs it in the proper management of himself, is qualified for the office of a judge and of a magistrate.—S.

gives this power and this knowledge with respect to one man, has it the same efficacy with respect to many men? And the art of thus managing and judging of many, has it the same abilities with respect to one?—Certainly, said he.—Is it so in the case of horses too, said I, and in all other cafes after the same manner?—Beyond a doubt, said what science, said I, is that, through which proper chastisement is given to the licentious

and the lawless in civil Rates? Is it not the judicial science, that of judges and other magistrates?—It is, said he.—Is the science of justice, laid I, any other than this other, answered is it not through the same science that the good and the bad are both known?— He replied, it was through the same the science, said I, through which one man is known, will give equal skill to know many said whoever, said I, through want of this science, hath not the skill to know many, will be equally deficient in the knowledge of laid a horse therefore, said I, as being but a horse, be incapable of knowing and distinguishing between good and bad horses, must he not be ignorant of which sort he himself said he. —And if an ox, said I, being but an ox, knows not how to distinguish and judge of good and bad oxen, is it possible that he can know of which sort he is himself?—Certainly not, said is not the same thing certain, said I, with respect to the ignorance of is, said how is it in the case of men? said I. When a man knows not who are the good men and who the bad, is he not at the same time ignorant of himself, and unable to tell whether he is good or bad, in as much as he also is a man?— He allowed it to be to be ignorant of oneself, said I, is it to be sound of mind, or to be be insane, he know oneself therefore, said I, is to be sound of mind.—I agree, laid then,

No words have more puzzled us, in the translating of Plato than the words v, and The difficulty arises from in different places they are used in different senses; and we could find no words in tire English language answering to them every where. At length, therefore, we sound ourselves obliged, it we would everywhere express their precise meaning, to use different words in different places. Our labours, however, on this point have enabled us to give a kind of history of those words, and of the several alterations they have undergone in their meaning. Homer, the mod ancient Greek writer extant, by the word evidently means prudence, or discretion. Sec his

said T, should seem to be the precept contained in the Delphic inscription; it is to exercise wisdom and Should seem so, replied through the same Science we know how to correct others duly and rightly.—

True, said that, through which we have this knowledge, is the science of justice; and that, through which a man has the knowledge of himself, and of other men, is soundness of mind, or appears so to] be, said science therefore of just-ice, said I, and the science belonging to every sound mind, wisdom, are one and the same appears, said he, to be so proved.— 3 Again, said I, by the same means arc civil states well governed; that is, when the doers of injustice are duly[26]

[26] The whole passage of Laertius, referred to in note I to p 319, and also in note toperfons of the Dialogue, is this, as amended;— wvrtp oi Avt epa7rai TlxxTavog tsai, <$v\7i ©pxvuMof, ourog xv ci» i napayivo/jtv.oi aviMv/Ao;, tuv 7rts>i Otvomdriv xxi AvccZayopav sTai'Cog, o([in(lead of irtpog, as it is printed] ty r»j ■jTfcg TuMpctTw bfjuXia i xteyofAtvo; Trspi Qibcvopias [here we omit the w] Qr.atv, ug niVTaCha eoixtv o tyihoa-oQot' xai w ig oiMtOuf tv <pt\a<ro<pnz ntvrafaog To, yap <f>vcnna wxnro [as If. "If the Rivals be a dialogue of Plato's,, says Thrasyllus, the anonymous person there introduced, as the friend of those who were deputing about Oenopides and Anaxagoras, mud be this Democritus; who in the conversation he had with Socrates concerning philosophy, there related, says, that a philosopher is like a general combatant in the games. And he himself was in fatt a general combatant in philosophy. For he had cultivated physics, and ethics; moreover, mathematics, and all the common learning of those times: and in all the arts he was experienced."—S

wise, who followed the same distinction of the cardinal virtues, defined every one of them by science of one kind or other; as appears from Stobeeus, Eclog. I. ii. p. 167. And one science, the science of mind, includes them all.—S.

* From the science of ethics, and that of law, truly so called, (for, in a philosophical sense, right Only is law, law eternal and divine,) Plato makes a short and easy (lep to of politics and the art of government. The art of government is founded on knowledge of the different tempers and humours, minds and

characters of men. For none can have the (kill to manage <hem, but those who know them, and who know by what methods to lead the good and gentle ie obedience, and to prevent the disobedience of the perverse and evil. This knowledge of mankind

punished—Right, said he. — The same science therefore, said I, is the science of when a civil Rate is thus well governed by one man, is not that man called ' either a tyrant 2, or a is, said

kind supposes the knowledge of who are the good and who the evil; which supposes also th* knowledge of what is good and what is evil; the same, which is the knowledge of

* The word in the original here is The meaning of which word, as it is always used by Plato, and fully explained by Aridotle in Politic. 1. iii. answers to our idea of an arbitrary monarch, governing his people, not according to established laws, but according to his own will and pleasure; whether such his will and* pleasure be agreeable to natural law, to judice and equity, or not. On the other hand, by the word 0 o^ king, was understood a person who made the laws established in his country, whether written or customary, the rules of his government. The regal office was to put these laws into execution, and to administer the government; which, properly speaking, was a government of the laws. Such were the mod ancient kings in Greece, where kingly government at first universally prevailed, long before any laws were written for the rule of conduct both to prince and people. And, whatever some men pretend concerning the high antiquity of arbitrary or despotic governments; or others fancy concerning governments originally vested in the people; the mod ancient records of history in all nations prove, that kingly government took place the first every where upon earth. It is natural to suppose that general customs in all countries were founded originally on reason, one universal reason adapting itself to the genius of each country, that is, to the peculiar situation and other relative

circumstances of each, and to the peculiar temper of the inhabitants naturally thence anting: so that, although in some instances, what was reasonable and right to practise in one country was unreasonable and wrong in another, yet one universal reason, the natural law of all men, was the dictator and legislator to them all. And, whereas all true authority is founded in the opinion of superior wisdom, it is natural also to suppose, that in the infancy of every date, the little multitude should lookup to a person deemed the wisest amongst they should hear*[10]

[10] In the Greek, Tpxxntoctpevof. Mod of the interpreters agree in the general meaning of the word in this place, that it relates to wrestling. But as they all differ in the manner how, we beg leave to differ from them all, and to suppose it means, u held by the neck," as is usual in the a£tion of wrestling. The word, thus understood, presents to the imagination the mod ridiculous image, and is therefore the mod proper in a description intended to be ridiculous. Agreeably to this, Lucian, in several places of his Anacharsis, represents these wreftlersas throttling and half strangling each other. As to the red of the description, it agrees with the account, given us by Plutarch, of the life of the athletics, i/nva tb ttoXA u f xai 7r^n7fxovatf ev&Afpcecrt, kcu nmncrtcri Ttraypeiaii nat Y\7i%ia i?, a v£gvtwv re xai &a$v*aTTcvTuv rv\v e£iv. <e By much deep and continual full feeding, by regulated motions, and dated times of red, improving and preserving in its improvement the habit of their bodies." Plutarch, in his Life of Philopoemen.—The main of the description is jutlly applicable to the life of every man, wh» makes the exercise of his body in general his foie business, or is addicted to the violent exercise of it in anyone way. Galen, with this very description apparently in.his mind, has improved and heightened the colouring of it, in a passage cited by Dr. Forder, to which vve refer our learned readers. —S.

he not thus govern, said I, through the kingly art, or the tyrannic? '—-He does, said arts therefore, said I, the kingly and the[28]

[28] In the greek, Bamwrovs. By this name were called all artists, who operated by means of fire but properly (peaking, they were such only as used furnaces in their operations. For so Hesychius,— Bavainria, rrxax t txm & a rrvpoj, uveites dr « ntqi racs xx/xtrovs. In using this word, Plato seems to allude to the metallurgic and the chymical experiments of Democritus. Concerning this very fa£t indeed, whether Democritus made any such experiments, or not, much controversy has arisen, particularly between Olaus Borrichius and Conringius, in contending, the first of them for the high antiquity of chvmiftry, the other for the novel invention of that useful art. Each of them perhaps has pushed his point further than the truth will bear him our. The treatise which Democritus wrote min ns Xitov, was certainly not concerning the philosopher's hone, as Borrichius and the alchymifls pretend; but concerning the magnet, or loadflone, which, perhaps, for its peculiar and celebrated virtues, was by the ancients eminently styled theJhpie. Yet we do not see how it can with reason be denied, that the great man in question was philofophns per ignem; because he could not, but through fusion by fire, have done what ancient writers agree he did, coverted common Hones into precious; nor could he well have sound out the virtues of herbs and plants without the help of chymical experiments. However, we would not lay too much stress on the interpretation of the word Bxsawna, given by Hcfychius, though it agrees with the etymology. It seems too confined. The word, as used by many of the ancients, particularly by Aristotle in the 8th book of his Politics, and by Plutarch in many places, seems to comprise all those arts we call mechanical: Plato's argumentation requires that we should understand it to be used here with the lame latitude; and this larger meaning bed confirms the supposition, that our Man of Learning and Knowledge in this Dialogue was Democritus. To express therefore the whole meaning of Plato in this place, we have used in our translation both those terms of contempt, which may answer to the full sense of the word sat/mms- —S.

attend to, and obey him, as the belt conservator and guardian of their unwritten laws or general customs, acknowledged by them all to be right. It is further, as natural to suppose that these petty princes, having established their authority with the people by wisdom and good government, should derive a particular regard in that people towards their families; and that their Ions, trained up in obedience to the laws, and being presumed to have learnt, from the examples and private instructions of their fathers, the art of government, should easily, by the tacit consent of all the.people, succeed to their fathers in their authority and dignity; unless they were apparently unfit, through nonage, known want of understanding or of prudence, or other incapacity for government. The first regal families, being thus for many generations well settled in the throne or

feat of royalty, claimed a kind of legal right, the right of custom, to their kingly thrones: and in that claim the people acquiesced for the fake of peace and order. And thus arose hereditary kingdoms. In process of time, as the people increased in number, and many private persons increased in riches, and in power thence arising, neither the rich nor the poor were any longer to be governed by the mere authority of one man: the multitude grew (editions, and the powerful grew factious. It became necessary to rule by force and compulsion, if the regal establishment was still to be preserved- The person of the king was to be defended by a guard, and the people were to be kept in awe and obedience by a Handing army. Then was the king possessed of power to change the laws and customs of his country at his own pleasure, and to make all his people submissive to his will. Such was the origin and rise of tyranny, the natural degeneracy of kingly government in a great and powerful kingdom. Now it is well known that unlimited power in man is every moment liable to be abused. To wise men indeed right reason is law; and in the government of themselves and of others they follow the dictates of wisdom. But men unwise arc in the principal part of their conduct, in that which is the mod important to themselves and others, governed by their'passions: and the evil consequences of human passions under no restraint, either from within the soul or from without, are infinite. Few men, therefore, being wise, what evil is not to be expelled from tyrants, that is, arbitrary monarchs? In faCt, the tyrants of old were, mod of them, guilty of numberless and flagrant a£ts of injustice, in open violation of the ancient unwritten laws. But things could not remain long in this situation, wherever common sense remained in men, a sense of their natural and just rights. Among such people then were sound patriots, men of true fortitude, despising all danger in the public cause; and these undertook to free their country from so insupportable a yoke. Their undertakings were successful. The tyrants and their families were either expelled or murdered.

New civil establishments were formed; but not on the ancient plan: that was the work of nature; and began naturally in the infant state of civil societies. Government was now to be the work of art and reason. And what proved very favourable to this work, was the cultivation of true philosophy about the same time, and the great advances consequently made in moral and political science. Accordingly it is to be observed, to the honour of philosophy, that wherever this favourable conjuncture happened not, jn all countries whither philosophy never travelled, when the people could no longer bear their[233]

tyrannic, are the same with that art and science just before mentioned.—. So they appear, said he.—Well, said I, and when a family is in like manner well governed by one man, what is this man called? Either the steward of the household, or else the master of the family; is he not?—He is, said

tyrants, they only changed them for others; the tyranny fill continued. For wisdom was wanting to frame good constitutions of government: so that, if ever they had the spirit to emerge from slavery, and rise to freedom, immediately they funk again. But wherever true philosopher s were sound, they undertook on such occasions the office of legislators. New laws were made, written and promulged, obligatory alike to all. By these laws was the power of princes and of magistrates limited and ascertained; and by their known sanctions the general obedience of the people was secured. And thus were legal governments first established, of different forms in different countries, monarchies, aristocracies, democracies, or mixed governments, as bed suited the numbers and the genius of each people. The ancient kingly governments, however, (till remained in some places in the time of Plato; and the few tyrants, subsisting amongst a people enlightened by philosophy, now ruled with some degree of equity and mildness, through fear of their intelligent subjects, ready to be succoured and protected, on occasion, by their free and therefore brave neighbours. This

(hort history of civil governments, from their beginning down to the age when Plato lived, we thought necessary to (how the distinction then made between the kingly and the tyrannic; giving an account of the rise of each; of the former built upon authority and esteem, and by them alone supported; of the latter, acquired often by false pretences, and intriguing practices at home, and sometimes by conquests from abroad made in war; but always maintained by military force. A tyrant, therefore, according to the foregoing explanation of the word, may, as well as a king, be a wise and good governor, if he has wisdom and the science ofjustice; though the ways and means, by which he governs, muff he very different from those of a king.—S.[4]

[4] Prados, in giving a short history of the rise and progress of geometry, refers to this place in the following words: Aux^ccyopjif b '>ro>.xwv tp-.^xTO xara ysui/xsTpiav, xxi OnoTriCrt; 6 Xicf,

It was usual in ancient times, as well as it is in modern, for princes, and other rich and great men, who kept a multitude of domestics, to depute the care and management of them all, and the dispensation ofjustice among them, to one man, whom they called and we call major-domo, maitre or, in the Englifli term we choose to make use of in an Engliffi translation, steward of the household.—S.

J AfrrroT r., that is, the lord and master himself, governing in his own right, with authority and power

is it the science of justice now, said I, which enables this man also to govern well his family? or is it any other art or science of justice only, laid same kind of person, it seems then, said I, is a king, a tyrant, a politician* a steward of a household, a lord and mailer of a family, a man of wisdom, and a just and good man. And one and the same art is the kingly, the tyrannic, the political, the despotic, and the economical, the same with the science of justice, and the same with wisdom.— So, said he, it then, said I: is it a shame for a philosopher not to understand

what the physician says, when speaking of his patient's malady; nor to be able to give a judicious opinion, himself, upon the case? and so with regard to other artists and their arts, is it a shame for him to be ignorant? and yet, when a magistrate, or a king, or any of the others, just now enumerated, is speaking of the affairs or functions of his office, is it not shameful in a philosopher not to understand perfectly what any of these persons fay, nor to be able to give good counsel himself in such Socrates, said he, can it be otherwise than shameful to him, to have nothing pertinent to fay on subjects so important?—Are we of opinion then, said I, that in these cafes it becomes a philosopher to be like a general combatant, a man, to come next behind all who have these offices, and to be useless, so long as any such are to be sound? or do we hold quite the contrary, that he ought, in the first place, not to commit the management of his domestic affairs to another man, nor to come next behind some other in his own house; but that he ought himself to be the ruler, corrector, and impartial judge, if he would, have right order and good government at he granted me.— And besides this, said I, if his friends should submit their differences to his arbitration, or if the state should refer to his judgment the decision of any controverted point, is it not a shame that he should appear in such cafes[30]

[30] Odyssey, book xxiii. ver. 30. from which we conclude, that the true etymology of the word is from mo a. iv, a sound mind. To which agrees this of Porphyry, —non yap atafppomvn (rao^>po<rv\m ti?, Apud Stobaeum, Serm. 19.—In the time of Homer, and for a long time after, the doCtrine of morals was far from being improved to such a degree of perfection as to become a science. It was delivered in loose and unconnected precepts, agreeing to the experience of wise men, without any known principles for their foundation. The first, who attempted to raise it into a science, and to treat of it with order and method, were the Pythagoreans. These philosophers, having considered that the soul of man was the subjeCt of virtue and of vice, considered next the constitution and (economy of this souls they saw it distinguishable into two parts, the rational and the irrational, and the irrational part again into irascible and concupifcible. Now as every thing in nature has a peculiar virtue of its own belonging to it, the defeCt of which is its imperfection, and the contrary quality its vice, the Pythagoreans made their primary distinction of the virtues of man, according to their distinction of the parts of his soul. The virtue of the rational part they termed ppovn<ns, prudence \ the virtue of the irascible part,, avfceta, fortitude; that of the concupifcible, trutyoaum, temperance; and the virtue of the whole soul, or the habit produced therein by the harmony of all its parts, they called $uuuovmn 9i justice,—Thus far did these philosophers advance in the science of morals; deducing all the other, the particular virtues, which are exercised but occasionally, from these four, which in every good man are in constant practice: but they ascended no higher. It was left for a Socrates and a Plato to put a head to this beautiful body of moral philosophy, to trace all the virtues up to one principle, and thus represent them to our view united. Yet thus only can. the doCtrine of morals be properly termed a science. This principle is mind j for mind, being measure itsfelf, and being also the governor of all things, contains the measures of reCtitude in all things, and governs all things aright and for the best. The principle of virtue therefore being mind, on the soundness of mind is all sincere and uncorrupt virtue established; for the soundness of every thing depends on the soundness of its principle. And thus also, as morals are founded on mind, and as no true science of any thing, according to Plato, can be without the science of its principle, the science of morals either is the same thing with the science of mind, or is immediately thereon dependent. Accordingly, Plato, in the Charmides, uses the word <rappo<rim in its original signification, as it means soundness of mind. In the same sense is the word <ru<ppoauvr\ used by Xenophon, in Anonw/x. 1. i. c. i. § 16 where* it is opposed to peon a. See Dr. Simpson’s annotation to that passage. So it is again used by Plato, and opposed to//«v<«, in his first book de Republica, p. 16. ed. Cantab. Moll commonly, however, Plato used this word in the Pythagorean sense, to signify one of the four cardinal virtues: in which sense it is used by Aristotle in all his moral treatises. Yet even in this particular sense, the peculiar relation which it has to prudence, the proper virtue of the rational part of the soul, is well observed by the very learned author of Hermes, in his notes (for his they are) to» ArUlotle’s treatise, steps Apvrm not » K aniuv } lately published by Mr. Fawconer, p. il 6. Zeno like

This word, as used by Plato, and the other ancient writers on politic, is of a very large and extensive import, including all those statesmen or politicians in aristocracies and democracies, who were, either for life, or for a certain time, inverted with the whole or a part of kingly authority, and the power thereto belonging: and such are here particularly meant by Plat®. Agreeably to this passage, he tells us in his Politicus, that the science of a politician differs only in name from the kingly science. For the proof of which position we refer our readers to that Dialogue, where the nature of the kingly office is so admirably well elucidated and

to be but a second or a third rate man, and not to have the lead?—1 must own myself of that opinion, said he —Philofophizitig, therefore, my friend, is a thing quite different, we find, from the acquiring a multiplicity of various knowledge, or the being busied in the circle of arts and sciences.—When [had said this, the Man of Learning, ashamed of what he had before asserted, was silent: the man without learning said, I had made it a clear case: and the rest of our audience gave their assent and approbation.

1 It equally follows from the foregoing reasoning, that a king ought himself, in the first place, truly to philosophize: in the next place, that he ought to choose a true philosopher, if such a man can be sound, to be of his council: and lastly, it follows that a true philosopher, when duty to his prince or to his country, or other good occasion, sent to him from above, calls him forth to light, and places him in his proper sphere of action, must always be sound adequate to any part of the kingly office, These conclusions may seem to favour a little of what is called philosophic arrogance; and for this very reason perhaps it is, that Plato has declined the making them, especially as from the mouth of his great matter, a man so remarkable for his rare

1 HIS piece of Plato, though entitled a Dialogue, consists chiefly of an Oration, to which the Dialogue was intended to serve only

for an introduction or vehicle; and is accordingly very short. The subject of this Oration is the commemoration of all those Athenians, who, from the beginning of the commonwealth to the time of Plato, had died in the service of their country; a subject that takes in so considerable a portion of the history of Athens, that I rather choose to refer the reader to those authors who have treated at large of the transactions of that state, than to set down the several events here alluded to in notes, which would soon swell to a bulk much larger than the Oration itself. It may not, however, be improper to premise a Short account of the custom, which gave birth to this and many other orations, spoken by some of the greatest orators of Athens; as such an account may tend to put the reader into a proper situation of mind to judge of the beauties of this famous panegyric, by leading him as it were to Athens, and making him one of the audience. Take it, therefore, in the words of Thucydides, thus translated.

“ In the same winter (namely, in the first year of the Peloponnesian war) the Athenians, in obedience to the laws of their country, performed, at the public expense, the obsequies of those citizens who first loft their lives in

1 This introduction is ext rafted from the Argument of Mr. West to this Dialogue, by whom also it was translated into English. I have adopted his version of it wherever I sound it to be sufficiently faithful, and given my own translation where it was

this war: the mann'er of which is as follows. Three days before that appointed for the funeral, they erect a pavilion, underneath which they lay out the bones of the deceased, allowing to their respective friends and relations the liberty of bringing whatever they judge proper to add, by way of (hawing their particular concern or regard for those who belonged to them. On the day of the interment there are brought in for hearses) so many chests (or coffins) made of cypress, one for every tribe, in which are put the bones of the deceased, each man according to his

tribe. Besides these there is an empty bier, properly covered in honour of those whose bodies could not be sound and brought away in order for their interment. In the funeral procession, whosoever is disposed, whether he be q citizen or foreigner, has leave to march, together with the female kindred of the deceased, who assist at the sepulchre, making great lamentations. After this they deposite the bones in the public cemetery, which is situated in the most beautiful suburb of the city; and here they have always been accustomed to bury all who fall in battle, those only excepted who were (lain at Marathon, to whom, as to men of distinguished and uncommon virtue, they performed their obsequies in the very place where they loft their lives. As loon as the remains are buried in the ground, some Athenian, eminent as Well for his wisdom as his dignity, is appointed by the state to pronounce a suitable oration in honour of the dead: after which the whole company depart. This is the manner in which the Athenians perform the funerals of those who are (lain in battle, and this custom they constantly observe in every war, as often as the case happens, in conformity to a law enacted for that purpose."

From this account, and some other particulars mentioned in the ensuing Oration, it is evident that these public funerals were performed with great pomp and solemnity by the whole body of the Athenian people; to whom therefore, considered upon this occasion under two heads, namely, as citizens of Athens and as relations and friends of the deceased, the orator was in reason obliged to accommodate his discourse: which from hence he was under a necessity of dividing likewise into two heads. Under the first he was to apply himself to the citizens of Athens in general; under the second, to the parents, children, and kindred of the deceased in particular, for the topics proper to be infilled upon under these two heads, he was left at liberty

to select such as he judged most suitable to the occasion on which he was to speak. The occasion was solemn and mournful.

Confolatories, therefore, were to be administered as well to the public as to individuals, wise were there come together to perform the last offices to their fellow-citizens and relations. To the public, no topic of consolation could be so effectual as that which, by setting before them the' glory and advantages accruing to the commonwealth from the actions of those brave citizens who had loft their lives in the service of their country, tended t6 call off their attention from the calamity which they were then assembled to commemorate. And this topic was very naturally suggested to the orator by the many public monuments erected in honour of those who had fallen in battle, and scattered up and down the place where he was to pronounce his oration. Plato accordingly made choice of this topic; and hath dwelt upon it with equal judgment and eloquence through the greater part of the following panegyric.

The remaining part of this first division contains an artful and noble panegyric in honour of the state and people of Athens; which evidently proves, what indeed will appear to any one who attentively examines the Grecian history, that the Athenians were unquestionably the first and greatest people of Greece.

The second part, in which the orator addresses himself to the relations of the deceased, is as beautiful a piece of oratory as is to be met with in all antiquity. I shall not here forestall the reader’s judgment or pleasure, by pointing out the particular passages worthy of admiration. They are so striking that he cannot fail taking notice of them; and the more they surprise, the more they will please.

Notes

[1] Proclus, if that passage, cited from him in note i, p. 376, be not corrupted, mu ft have supposed this Man of Learning to be Theodorus of Cyrcne, the mathematician. It mud be confefifed, that the character of Theodorus the Cyrenean, given us by Plato in his Thcaetetus, tallies well enough with that of the Man of Learning, or universal scholar, in this Dialogue. But wc presume, the note referred to makes it appear highly

probable, at least, that the passage there cited is grossly corrupt; and that Proclus could not entertain any such supposition. We therefore embrace the opinion of Thrasyllus, who, as Diogenes Laertius informs us, pronounced him to be Democritus. To this opinion Laertius himself fubferibes, and Dr. Forster seems to agree with them. The reasons, by which it may be supported, together with answers to fume ©objections, to which it may be liable, will be given in our notes to the Dialogue. —S.

[2] Y(>ay.n%Tixou. Thus all the editions of Plato, and consequently those manuscript copies, from which the four first were printed. But Dr. Forster, in his late excellent edition of this and other Dialogues of Plato, prefers the reading of r^a/xuxriirrou, that is, teacher of the elements of grammar, which has the authority of only one manuscript to support it. It appears indeed, from the very passage now before U3, that teaching the elements of grammar was the profefliorc of this Dionysius; and we team, from several ancient writers, that he had taught Plato. But if it be true, what Olympiodorus supposes, and the supposition seems very natural and just, that Plato introduces the mention of his master in this passage, on purpose to record his memory, and to give his name what place he could in his writings, it is probable that, in pursuance of the same folieitude for his master's honour, he would mention him in the molt respect«$tful manner, and though Dionysius was T^a/x/zaTto-Tvs, a grammar-fehoolniafter by profession, yet that his grateful

[5] o rov 7©y fxYivicr.ou reTpayuujfxcv cupxu, xai ®HUI o Kuptvztcs, o*r/a veurtpoi uv rou A ■ ci% ■:ycpou' uv xoci o Tlxcrrui' ev Tci; ctsTcpzTrcuf f/x-.ru'-arim:',, us it. t rois fxaO/i/xz<n eofsv ((Anaxagoras the Clazo menian touched on many points in geometry; as also did Oenopides the Chian, he who sound out the squaring of the Mcnifcus; and Theodoras the Cyrencan, somewhat junior to Anaxagor.>; who are recorded by Plato in The Rivals, as men of reputation for mathematical science.' Prod. Comment, in Luclid. 1. ii. p. 19. But we find no where in this Dialogue any mention j#ade of Thcodorus by name. It should seem, therefore, that Proclue imagined, one of the two

[6] nameless Rivals, the Man of Learning, to be this very Thcodorus. But indeed the sentence, here cited from Proclus, appears to us erroneously copied by some old transcriber. For it is immediately followed by this other sentence; cp' oi$ l7nroKparn j o Xicc, o rev rou fxnvitntou rtrpayuvir/xvi n/puv, Mai Qeohpo; b K upnvaies, eyevovro nept yiupsrpiav empavtif. " After whom Hippocrates the Chian, he who sound out the squaring of the Meniscus, and Theodorus the Cyrencan, became illustrious for their (kill in geometry.** Now these two sentences, taken together, evidently contain two egregious blunders; one is, that the [first] discovery of squaring the Meniscus, is attributed to two different persons; the other is, that one and

the same person, Theodoras, is introduced as po fieri or in point of time to himself. We have therefore no doubt but that the whole passage in Proclus ought to be read as follows: A vaZayopas o K xafy/xeviog sroXAwv epn-^aro Kara ytupurpiav, mm OwTnhis b Xic$‘ uv mm b llXaruv ev toj$ avreparrais ef/.vn{MVEv<reu f u; tm rots /xa9t jftacri Jbfav XaScvruv. tp’ ois'lnTTOHparvis b Xioj, b rat rtu /xmruou reTpaywiafiat titpav, km Qsotfwpof b K vswMoSf ouya veurtpo; <uv reu A\ta%ayopov, eywoitro mtpi yeu/xerpiav empavetf. “ Anaxagoras the Clazoivenian touched on many points in geometry; as also did Oenopides the Chian; who are [both of them] recorded by Plato in The Rivals, as men of reputation for mathematical science. After w hom, Hippocrates the Chian, he who sound out the squaring of the Meniscus, and Theodorus the Cyrencan, who was somewhat junior to Anaxagoras, became illustrious for their (kill in geometry.” The mistake of the transcriber of this passage is easy to be accounted for by such as are used to ancient manuscripts, in the following manner. The transcriber, we presume, had no other person to read to him; as those had, who copied books, for which there was always a great demand, such as Homer, for in (lance; in which case there was one reader to many scribes. But the writings of Proclus were the purchase only of a few. The transcriber, therefore, being alone, his eye must have been often changing from his own writing to that which he wrote after. We suppose, that the words 'hnroKparris 6 Xio$ occurcd in the next line to, and immediately under, the words Om-nsas b X<oj. We suppose that the transcriber having written so far as OivoTictf » Xios, and looking into his original, had his eye caught by 0 Xtot in the next line; from which words there he went on transcribing, with the omission of a whole line: and that afterwards on a review finding his mistake, iranferibed in the margin the words omitted (a large margin being always left for such purposes); and added a few words which followed, to point cut where the omission was made. But when this very transcript came afterwards to be copied, we suppose that the latter transcriber inserted the marginal words into the body of his copy, iu a wrong place, after the words rov Avotfayopcv. But the matter is put out of dispute by Simplicius, who, in his learned Commentary on Aristotle’s Physics, fol. 12. has shown us mathematically how to square the Meniscus; the invention, as he expressly tells us, of Hippocrates the Chinn, as a step to the discovery of squaring the Circle.—S.

[8] In the Greek, xfotecxowi ntps rwv /xcreupav. A$oM<rytiv is to talk idly and impertinently, and

[13] Those, called sophists, were not only proud of this very title, which signifies men who knew things wise, that is, things above the knowledge of the vulgar, but they also affected to be thought and called aotpot, wise

men. The Pythagoreans, after their matter, only assumed the title of philosophers, lovers of wisdom, or (students in it. Thus, in the beginning of this Dialogue, philosophizing means, applying the mind to the study of wisdom. We are told by Laertius, that Democritus admired Pythagoras, and emulated the Pythagoreans. Now it is certain, that he was no follower of their doctrines, or way of teaching; it mutt be meant therefore of their manners, their modesty, and their other virtues. We find our Man of Learning here pro selling nothing more than a high esteem for philosophy. The sentiment, here attributed to him, is the very same with that of Democritus, in Stobxus, Serm. I. 'Avfyxuyroij a£notiiov f n^>-ov w

[15] For indeed at first fight it looks very like to that, which Socrates in Xenophon gives of himself and his own studies, where he lays; orou -nip Zwuvai ra Xtyoixwctnfapm, ov TrunoTe Jieautov xat (Vr uv xat [xavQavwv o ti t^una/xrw ayaOcv. Xen. in Soe. Apolog. u Ever ft nee I began to understand the subjectsof discourse, I have never ceased inquiring into and learning every good thing I was able." But on nearer infpcction, the same difference will he sound between them, that appears in this Dialogue between philosophy, as described at first by the Man of Learning, and that which at the conclusion proves to he genuine philosophy, that knowledge which is eminently good and

[17] Tnv irohu jU rAuxv.—Agreeably to this, Clemens of Alexandria, citing a passage out of Democritus, where this philosopher boasts of his much travelling through various countries, of the accurate researches which he made in them all, of his long abode in Egypt, and of his skill superior to that of all men every where in geometrical demon(1 rations, observes, that the philosopher wrote thus, mi tv vrotopzbicx npnnefitvof, " glorying in his polymathy.** Stromat. 1. i. —S.

[21] Socrates speaks here jocosely, as if he thought the Man of Learning might possibly be affronted, and piqued in point of honour, if the question were referred to the two youths, persons who seemed so much less able to answer it: in like manner as the wooers of Penelope pretended, that the offer of the seeming beggar to try his strength with them was an affront to their superior rank. Mons. Ducier, in his note on this passage, seems to insinuate, that Plato has given a turn to the passage in Homer here alluded to, different from the intention of the poet. For he says that Penelope's wooers openly avowed their fear of the superior strength of the concealed Ulysses, and

[23] Dr. Forster very justly observes that the character which the Man of Learning here gives of a philosopher exactly agrees with the character of Democritus himself, as given us by Diogenes Laertius j that, besides his being a great naturalist and rnoralifi, hefules his being veiled in mathematical learning, and in all the popular erudition, he had a thorough

experience in the arts, Trtpi Tiyjiav ircijxv tiytu tu.7rsi:sav. If the right reading of this (sentence in Laertius be, as we suspect, txgx. or Kac-Z:', instead of Trxvav, the agreement with the words of Plato in this place is (till more cxa£t. However, though Laertius in this passage plainly uses the word in the philosophical

[25] The.-particular combatants in these games were such as had devoted themselves wholly to one particular sort of exercise, and therefore had attained to excel in it beyond all other men. The general combatants were such as had divided their studies, and had been exercised in them ail, and consequently could not be supposed equal in any one to those who had made it their peculiar study. They engaged in all the combats at these games, but contended only with such as themselves. They were called TrivraSxcJi, the term here used by Plato, Combatants in the live Exercises, because the sixth, that is, boxing, or lighting with fills, was not introduced till the 23d Olympic, having been thought till then too mean and ignoble. And after it was introduced, the general combatants {till retained the name of imraSti«. All the learning on this subject has been collected by Peter Faber in his Agoniftica. But an Englifl) reader, curious to be further informed, may find full satisfaction in an excellent dissertation, written by Mr. West,

[27] ■ no\uirpxyiumvnx. Concerning this kind of sroXi/srfay/nsei/rn, our learned readers may consult Wower de Polymathifl, cap. ii. §. 3. or Suidaa in voce Ao-aXnirmJoTij;. Democritus not only took the pains to elide the bodies of animals, in order to investigate the animal oeconomy, but also expressed the juices of every plant and herb he met with, to make experiments of their several virtues. Omnium herb arum fuccos Democritus exprejfit, says Petronius; et ne lapidum virgultorumque vis laleret, xtatem inter experimenta confumpfit. We have some instances of his knowledge of this kind recorded in Pliny's Natural History.—S.

[29] Plato lays the foundation of true philosophy in the knowledge of ourselves, that is, of our own souls. He begins with the inferior part of the soul; the feat of the passions and animal affections. These he characterizes, as is usual with him, under the allegorical names of brute animals, horse and dog; to which soon afterwards he adds that of ox. The horse is a propel emblem of the love of glory; because of all brute animals the horse is the only one which appears to be delighted with foie trappings, to be ostentatious, to be emulous of glory, and fond of proving his superiority over his rivals. No less properly docs the dog reprefeat the passion of anger; because of all animals he is th.e mod sob}e& to it, has it roused in him on the slighted occasions, entertains H the longed, and is.the mod vindictive. And the ox is the fitted representative of sensuality, because that animal, when not employed by man in laborious offices, is

always either eating or chewing the cud, that is, eating over again wjbat he had eat before: as sensual meD, after they have feaded, are apt to sead it over again in reflection; as well as before they feast, to daft in imagination. Plato makes a distinction at the same time between the good, and the bad or vicious, amongst these animals. Of the latter sort are the perverse and refractory; horse*, that are almost unmanageable by their riders; dogs, that hardly can be broken, or made to obey their mader's will; oxen, that are stubborn, that refuse to quit the flail, and to labour. These are the emblems of bad men; whose passions, such as correspond to the tempera of those several animals, are immoderate or inordinate, and not to be governed, or restrained within /heir due bounds, without much difficulty. Good horses, dogs, and oxen, he calls those, whose natural temper is gentle, and pliant, and easily made obedient. And by such he signifies to us men naturally good, that is, men, whose brutal passions of each kind arc by nature moderate, and easily obey the government of reason, that superior part of the soul, whose whole office and government he delineates or (ketches out in the following manner.—If any of our passions are wild and irregular, if our horse, for instance, would throw off and trample on his rider, if our dog barks at his master or his matter's friends, or if our ox knows not his owner and his feeder, they are to be chastised and reduced to order. If our passions are all tame and gentle, it is the business of reason to employ them in her own service, to apply them each to its proper use, and thus to make them highly beneficial to the whole man. But neither of these offices can be well performed, unless it be known what is moderate and regular in the passions, and what the contrary; that is, unless die boundaries between good and evil be well settled, so that the one may be distinguished from the other. The making this distinction, therefore, is the inward operation of knowledge in the mind; as the application of it to practice, in the discharge of those office?, is an exertion of the mind's power over the inferior man. The former is the theory of moral*; the latter is praCtic virtue. This properly is art > that, science. But Plato in this place a tiles

[31] The inscription here meant, is that mod ancient one, in the temple of Apollo at Delphi, rND©I 2 EATTON, Know thvsklf. This was generally supposed to be the dictate or response of the Pythian oracle to the question asked of it;—What was man's greatest good. See Ale nag. Annotat. in Laertium, p. 22 and 23, and Dr. Simpson's note on Xenophon's Memorab. 1. iv, c. ii. §. 24. In what sense Plato understood this truly divine precept, is evident from hisbrief definition of it in this sentence, as explained by the preceding argumentation. From which it appears, that by the knowledge of one's self he means the knowledge of the whole soul, or the knowledge of what is good and what is evil. For the superior part of the soul contains in itself the feeds of all moral good; the inferior, the feeds of

all moral evil. Bot the subject of all this knowledge, of both kinds, is only the superior part of the soul, the rational. For, as the Stoics well express themselves on this point, no other faculty in man contemplates and knows itself, besides the faculty of reason. This alone also knows and judges of all other things, whether' without or within the soul: for in itself it hath the rule and standard of right, according to which it judges, and distinguishes between right and wrong; approving the one, which is agreeable to its own nature, and disapproving the other, which is disagreeable and contrary to it. Truly and properly speaking, mind itself is rule and measure, being the measure and the rule of all things. The science of mind, therefore, which is wisdom, is the science of right and wrong, gives the dis. cernmcnt of good and evil in ourselves, and enables us at the same time to distinguish rightly between good and bad men; and thus is it the science of justice, and the judicial science, belonging to the magistrate and to the judge. After what has been said, we presume it needless to make any apology, or to give any further reason for translating o-upfxxm'i in this place wisdom.—But concerning this wisdom, or knowledge of self, see more at large in Plato's First Alcibiades, where it makes the principal subjeCt.—S.

[32] In the Greek, rupavvos re xai 0zcri*evt, translated literally, "both a tyrant and a king." But Plato does not mean, that tyrant and king are synonymous terms: so far from that is his meaning that in his Dialogue called IIoXm#oj, "The Politician," he says, that "a tyrant and a king are avoiMmccroi, mod unlike one to the other:" and in his 9th book de Republic^, that " the bed of all governments is the kingly, and that the word of all is the tyrannic." What he means by a king, and what by a tyrant, will be explained in the very next note. But in this they agree, that government by a king and government by a tyrant are both of them governments by one man r which is the whole of his meaning in the place now before us. However, to prevent his meaning from being misunderstood, -we have taken the liberty of using the conjunctions disjunctive in translating this sentence. Mons. Dacier, as well here as in what follows, has entirely omitted the words tyrant and tyrannic, through excessive caution we imagine: but for such caution in England we have no occasion. A king of England, while the Ensjifh conffitutign lads, and the fundamental laws of English government subsist, can never be suspeCted of being, what it is impossible for him to be, a tyrant.—S.

[33] We are now arrived at the science of (economics. This indeed in the order of things precedes the science of politics. For a civil Hate is composed of many families; and arises from the agreement of their minds, in perceiving the necessity of civil or kingly government for their common good. But Plato here speaks of it the last, probably for this reason, that the government of a family is 0 <x<nxix>i te hxi Tvpavnxv, partly

authoritative and kingly, partly compulsive and tyrannical: the paternal part of it is kingly; and thus a king is as the father of all his people, and governs them as through paternal authority and filial awe: the despotic part is tyrannical; and thus a tyrant is the lord and master of the whole people, ruling them by compulsion, as a mailer rules his (saves, and such were all domestic servants in the age and country of Plato.— S.

Menexenus

ΜΕΝΕΞΕΝΟΣ

Socrates: Whence come you, Menexenus? Are you from the Agora?

Menexenus: Yes, Socrates; I have been at the Council.

Socrates: And what might you be doing at the Council? And yet I need hardly ask, for I see that you, believing yourself to have arrived at the end of education and of philosophy, and to have had enough of them, are mounting upwards to things higher still, and, though rather young for the post, are intending to govern us elder men, like the rest of your family, which has always provided some one who kindly took care of us.

Menexenus: Yes, Socrates, I shall be ready to hold office, if you allow and advise that I should, but not if you think otherwise. I went to the council chamber because I heard that the Council was about to choose some one who was to speak over the dead. For you know that there is to be a public funeral?

Socrates: Yes, I know. And whom did they choose?

Menexenus: No one; they delayed the election until tomorrow, but I believe that either Archinus or Dion will be chosen.

Socrates: O Menexenus! Death in battle is certainly in many respects a noble thing. The dead man gets a fine and costly funeral, although he may have been poor, and an elaborate speech is made over him by a wise man who has long ago prepared what he has to say, although he who is praised may not have been good for much. The speakers praise him for what

he has done and for what he has not done — that is the beauty of them — and they steal away our souls with their embellished words; in every conceivable form they praise the city; and they praise those who died in war, and all our ancestors who went before us; and they praise ourselves also who are still alive, until I feel quite elevated by their laudations, and I stand listening to their words, Menexenus, and become enchanted by them, and all in a moment I imagine myself to have become a greater and nobler and finer man than I was before. And if, as often happens, there are any foreigners who accompany me to the speech, I become suddenly conscious of having a sort of triumph over them, and they seem to experience a corresponding feeling of admiration at me, and at the greatness of the city, which appears to them, when they are under the influence of the speaker, more wonderful than ever. This consciousness of dignity lasts me more than three days, and not until the fourth or fifth day do I come to my senses and know where I am; in the meantime I have been living in the Islands of the Blest. Such is the art of our rhetoricians, and in such manner does the sound of their words keep ringing in my ears.

Menexenus: You are always making fun of the rhetoricians, Socrates; this time, however, I am inclined to think that the speaker who is chosen will not have much to say, for he has been called upon to speak at a moment’s notice, and he will be compelled almost to improvise.

Socrates: But why, my friend, should he not have plenty to say? Every rhetorician has speeches ready made; nor is there any difficulty in improvising that sort of stuff. Had the orator to praise Athenians among Peloponnesians, or Peloponnesians among Athenians, he must be a good rhetorician who could succeed and gain credit. But there is no difficulty in a man’s winning applause when he is contending for fame among the persons whom he is praising.

Menexenus: Do you think not, Socrates?

Socrates: Certainly ‘not.’

Menexenus: Do you think that you could speak yourself if there should be a necessity, and if the Council were to choose you?

Socrates: That I should be able to speak is no great wonder, Menexenus, considering that I have an excellent mistress in the art of rhetoric, — she who has made so many good speakers, and one who was the best among all the Hellenes — Pericles, the son of Xanthippus.

Menexenus: And who is she? I suppose that you mean Aspasia.

Socrates: Yes, I do; and besides her I had Connus, the son of Metrobius, as a master, and he was my master in music, as she was in rhetoric. No wonder that a man who has received such an education should be a finished speaker; even the pupil of very inferior masters, say, for example, one who had learned music of Lamprus, and rhetoric of Antiphon the Rhamnusian, might make a figure if he were to praise the Athenians among the Athenians.

Menexenus: And what would you be able to say if you had to speak?

Socrates: Of my own wit, most likely nothing; but yesterday I heard Aspasia composing a funeral oration about these very dead. For she had been told, as you were saying, that the Athenians were going to choose a speaker, and she repeated to me the sort of speech which he should deliver, partly improvising and partly from previous thought, putting together fragments of the funeral oration which Pericles spoke, but which, as I believe, she composed.

Menexenus: And can you remember what Aspasia said?

Socrates: I ought to be able, for she taught me, and she was ready to strike me because I was always forgetting.

Menexenus: Then why will you not rehearse what she said?

Socrates: Because I am afraid that my mistress may be angry with me if I publish her speech.

Menexenus: Nay, Socrates, let us have the speech, whether Aspasia’s or any one else’s, no matter. I hope that you will oblige me.

Socrates: But I am afraid that you will laugh at me if I continue the games of youth in old age.

Menexenus: Far otherwise, Socrates; let us by all means have the speech.

Socrates: Truly I have such a disposition to oblige you, that if you bid me dance naked I should not like to refuse, since we are alone. Listen then: If I remember rightly, she began as follows, with the mention of the dead: — (Thucyd.)

There is a tribute of deeds and of words. The departed have already had the first, when going forth on their destined journey they were attended on their way by the state and by their friends; the tribute of words remains to be given to them, as is meet and by law ordained. For noble words are a memorial and a crown of noble actions, which are given to the doers of them by the hearers. A word is needed which will duly praise the dead and gently admonish the living, exhorting the brethren and descendants of the departed to imitate their virtue, and consoling their fathers and mothers and the survivors, if any, who may chance to be alive of the previous generation. What sort of a word will this be, and how shall we rightly begin the praises of these brave men? In their life they rejoiced their own friends with their valour, and their death they gave in exchange for the salvation of the living. And I think that we should praise them in the order in which nature made them good, for they were good because they were sprung from good fathers. Wherefore let us first of all praise the goodness of their birth; secondly, their nurture and education; and then let us set forth how noble their actions were, and how worthy of the education which they had received.

And first as to their birth. Their ancestors were not strangers, nor are these their descendants sojourners only, whose fathers have come from another country; but they are the children of the soil, dwelling and living in their own land. And the country which brought them up is not like other countries, a stepmother to her children, but their own true mother; she bore them and nourished them and received them, and in her bosom they now repose. It is meet and right, therefore, that we should begin by praising the land which is their mother, and that will be a way of praising their noble birth.

The country is worthy to be praised, not only by us, but by all mankind; first, and above all, as being dear to the Gods. This is proved by the strife and contention of the Gods respecting her. And ought not the country which the Gods praise to be praised by all mankind? The second praise which may be fairly claimed by her, is that at the time when the whole earth was sending forth and creating diverse animals, tame and wild, she our mother was free and pure from savage monsters, and out of all animals selected and brought forth man, who is superior to the rest in understanding, and alone has justice and religion. And a great proof that she brought forth the common ancestors of us and of the departed, is that she provided the means of support for her offspring. For as a woman proves her motherhood by giving milk to her young ones (and she who has no fountain of milk is not a mother), so did this our land prove that she was the mother of men, for in those days she alone and first of all brought forth wheat and barley for human food, which is the best and noblest sustenance for man, whom she regarded as her true offspring. And these are truer proofs of motherhood in a country than in a woman, for the woman in her conception and generation is but the imitation of the earth, and not the earth of the woman. And of the fruit of the earth she gave a plenteous supply, not only to her own, but to others also; and afterwards she made the olive to spring up to be a boon to her children, and to help them in their toils. And when she had herself nursed

them and brought them up to manhood, she gave them Gods to be their rulers and teachers, whose names are well known, and need not now be repeated. They are the Gods who first ordered our lives, and instructed us in the arts for the supply of our daily needs, and taught us the acquisition and use of arms for the defence of the country.

Thus born into the world and thus educated, the ancestors of the departed lived and made themselves a government, which I ought briefly to commemorate. For government is the nurture of man, and the government of good men is good, and of bad men bad. And I must show that our ancestors were trained under a good government, and for this reason they were good, and our contemporaries are also good, among whom our departed friends are to be reckoned. Then as now, and indeed always, from that time to this, speaking generally, our government was an aristocracy — a form of government which receives various names, according to the fancies of men, and is sometimes called democracy, but is really an aristocracy or government of the best which has the approval of the many. For kings we have always had, first hereditary and then elected, and authority is mostly in the hands of the people, who dispense offices and power to those who appear to be most deserving of them. Neither is a man rejected from weakness or poverty or obscurity of origin, nor honoured by reason of the opposite, as in other states, but there is one principle — he who appears to be wise and good is a governor and ruler. The basis of this our government is equality of birth; for other states are made up of all sorts and unequal conditions of men, and therefore their governments are unequal; there are tyrannies and there are oligarchies, in which the one party are slaves and the others masters. But we and our citizens are brethren, the children all of one mother, and we do not think it right to be one another’s masters or servants; but the natural equality of birth compels us to seek for legal equality, and to recognize no superiority except in the reputation of virtue and wisdom.

And so their and our fathers, and these, too, our brethren, being nobly born and having been brought up in all freedom, did both in their public and private capacity many noble deeds famous over the whole world. They were the deeds of men who thought that they ought to fight both against Hellenes for the sake of Hellenes on behalf of freedom, and against barbarians in the common interest of Hellas. Time would fail me to tell of their defence of their country against the invasion of Eumolpus and the Amazons, or of their defence of the Argives against the Cadmeians, or of the Heracleids against the Argives; besides, the poets have already declared in song to all mankind their glory, and therefore any commemoration of their deeds in prose which we might attempt would hold a second place. They already have their reward, and I say no more of them; but there are other worthy deeds of which no poet has worthily sung, and which are still wooing the poet's muse. Of these I am bound to make honourable mention, and shall invoke others to sing of them also in lyric and other strains, in a manner becoming the actors. And first I will tell how the Persians, lords of Asia, were enslaving Europe, and how the children of this land, who were our fathers, held them back. Of these I will speak first, and praise their valour, as is meet and fitting. He who would rightly estimate them should place himself in thought at that time, when the whole of Asia was subject to the third king of Persia. The first king, Cyrus, by his valour freed the Persians, who were his countrymen, and subjected the Medes, who were their lords, and he ruled over the rest of Asia, as far as Egypt; and after him came his son, who ruled all the accessible part of Egypt and Libya; the third king was Darius, who extended the land boundaries of the empire to Scythia, and with his fleet held the sea and the islands. None presumed to be his equal; the minds of all men were enthralled by him — so many and mighty and warlike nations had the power of Persia subdued. Now Darius had a quarrel against us and the Eretrians, because, as he said, we had conspired against Sardis, and he sent 500,000 men in

transports and vessels of war, and 300 ships, and Datis as commander, telling him to bring the Eretrians and Athenians to the king, if he wished to keep his head on his shoulders. He sailed against the Eretrians, who were reputed to be amongst the noblest and most warlike of the Hellenes of that day, and they were numerous, but he conquered them all in three days; and when he had conquered them, in order that no one might escape, he searched the whole country after this manner: his soldiers, coming to the borders of Eretria and spreading from sea to sea, joined hands and passed through the whole country, in order that they might be able to tell the king that no one had escaped them. And from Eretria they went to Marathon with a like intention, expecting to bind the Athenians in the same yoke of necessity in which they had bound the Eretrians. Having effected one-half of their purpose, they were in the act of attempting the other, and none of the Hellenes dared to assist either the Eretrians or the Athenians, except the Lacedaemonians, and they arrived a day too late for the battle; but the rest were panic-stricken and kept quiet, too happy in having escaped for a time. He who has present to his mind that conflict will know what manner of men they were who received the onset of the barbarians at Marathon, and chastened the pride of the whole of Asia, and by the victory which they gained over the barbarians first taught other men that the power of the Persians was not invincible, but that hosts of men and the multitude of riches alike yield to valour. And I assert that those men are the fathers not only of ourselves, but of our liberties and of the liberties of all who are on the continent, for that was the action to which the Hellenes looked back when they ventured to fight for their own safety in the battles which ensued: they became disciples of the men of Marathon. To them, therefore, I assign in my speech the first place, and the second to those who fought and conquered in the sea fights at Salamis and Artemisium; for of them, too, one might have many things to say — of the assaults which they endured by sea and land, and

how they repelled them. I will mention only that act of theirs which appears to me to be the noblest, and which followed that of Marathon and came nearest to it; for the men of Marathon only showed the Hellenes that it was possible to ward off the barbarians by land, the many by the few; but there was no proof that they could be defeated by ships, and at sea the Persians retained the reputation of being invincible in numbers and wealth and skill and strength. This is the glory of the men who fought at sea, that they dispelled the second terror which had hitherto possessed the Hellenes, and so made the fear of numbers, whether of ships or men, to cease among them. And so the soldiers of Marathon and the sailors of Salamis became the schoolmasters of Hellas; the one teaching and habituating the Hellenes not to fear the barbarians at sea, and the others not to fear them by land. Third in order, for the number and valour of the combatants, and third in the salvation of Hellas, I place the battle of Plataea. And now the Lacedaemonians as well as the Athenians took part in the struggle; they were all united in this greatest and most terrible conflict of all; wherefore their virtues will be celebrated in times to come, as they are now celebrated by us. But at a later period many Hellenic tribes were still on the side of the barbarians, and there was a report that the great king was going to make a new attempt upon the Hellenes, and therefore justice requires that we should also make mention of those who crowned the previous work of our salvation, and drove and purged away all barbarians from the sea. These were the men who fought by sea at the river Eurymedon, and who went on the expedition to Cyprus, and who sailed to Egypt and divers other places; and they should be gratefully remembered by us, because they compelled the king in fear for himself to look to his own safety instead of plotting the destruction of Hellas.

And so the war against the barbarians was fought out to the end by the whole city on their own behalf, and on behalf of their countrymen. There was peace, and our city was held in honour;

and then, as prosperity makes men jealous, there succeeded a jealousy of her, and jealousy begat envy, and so she became engaged against her will in a war with the Hellenes. On the breaking out of war, our citizens met the Lacedaemonians at Tanagra, and fought for the freedom of the Boeotians; the issue was doubtful, and was decided by the engagement which followed. For when the Lacedaemonians had gone on their way, leaving the Boeotians, whom they were aiding, on the third day after the battle of Tanagra, our countrymen conquered at Oenophyta, and righteously restored those who had been unrighteously exiled. And they were the first after the Persian war who fought on behalf of liberty in aid of Hellenes against Hellenes; they were brave men, and freed those whom they aided, and were the first too who were honourably interred in this sepulchre by the state. Afterwards there was a mighty war, in which all the Hellenes joined, and devastated our country, which was very ungrateful of them; and our countrymen, after defeating them in a naval engagement and taking their leaders, the Spartans, at Sphagia, when they might have destroyed them, spared their lives, and gave them back, and made peace, considering that they should war with the fellow-countrymen only until they gained a victory over them, and not because of the private anger of the state destroy the common interest of Hellas; but that with barbarians they should war to the death. Worthy of praise are they also who waged this war, and are here interred; for they proved, if any one doubted the superior prowess of the Athenians in the former war with the barbarians, that their doubts had no foundation — showing by their victory in the civil war with Hellas, in which they subdued the other chief state of the Hellenes, that they could conquer single-handed those with whom they had been allied in the war against the barbarians. After the peace there followed a third war, which was of a terrible and desperate nature, and in this many brave men who are here interred lost their lives — many of them had won victories in Sicily, whither they had gone over

the seas to fight for the liberties of the Leontines, to whom they were bound by oaths; but, owing to the distance, the city was unable to help them, and they lost heart and came to misfortune, their very enemies and opponents winning more renown for valour and temperance than the friends of others. Many also fell in naval engagements at the Hellespont, after having in one day taken all the ships of the enemy, and defeated them in other naval engagements. And what I call the terrible and desperate nature of the war, is that the other Hellenes, in their extreme animosity towards the city, should have entered into negotiations with their bitterest enemy, the king of Persia, whom they, together with us, had expelled; — him, without us, they again brought back, barbarian against Hellenes, and all the hosts, both of Hellenes and barbarians, were united against Athens. And then shone forth the power and valour of our city. Her enemies had supposed that she was exhausted by the war, and our ships were blockaded at Mitylene. But the citizens themselves embarked, and came to the rescue with sixty other ships, and their valour was confessed of all men, for they conquered their enemies and delivered their friends. And yet by some evil fortune they were left to perish at sea, and therefore are not interred here. Ever to be remembered and honoured are they, for by their valour not only that sea-fight was won for us, but the entire war was decided by them, and through them the city gained the reputation of being invincible, even though attacked by all mankind. And that reputation was a true one, for the defeat which came upon us was our own doing. We were never conquered by others, and to this day we are still unconquered by them; but we were our own conquerors, and received defeat at our own hands. Afterwards there was quiet and peace abroad, but there sprang up war at home; and, if men are destined to have civil war, no one could have desired that his city should take the disorder in a milder form. How joyful and natural was the reconciliation of those who came from the Piraeus and those who came from the city; with what

moderation did they order the war against the tyrants in Eleusis, and in a manner how unlike what the other Hellenes expected! And the reason of this gentleness was the veritable tie of blood, which created among them a friendship as of kinsmen, faithful not in word only, but in deed. And we ought also to remember those who then fell by one another's hands, and on such occasions as these to reconcile them with sacrifices and prayers, praying to those who have power over them, that they may be reconciled even as we are reconciled. For they did not attack one another out of malice or enmity, but they were unfortunate. And that such was the fact we ourselves are witnesses, who are of the same race with them, and have mutually received and granted forgiveness of what we have done and suffered. After this there was perfect peace, and the city had rest; and her feeling was that she forgave the barbarians, who had severely suffered at her hands and severely retaliated, but that she was indignant at the ingratitude of the Hellenes, when she remembered how they had received good from her and returned evil, having made common cause with the barbarians, depriving her of the ships which had once been their salvation, and dismantling our walls, which had preserved their own from falling. She thought that she would no longer defend the Hellenes, when enslaved either by one another or by the barbarians, and did accordingly. This was our feeling, while the Lacedaemonians were thinking that we who were the champions of liberty had fallen, and that their business was to subject the remaining Hellenes. And why should I say more? for the events of which I am speaking happened not long ago and we can all of us remember how the chief peoples of Hellas, Argives and Boeotians and Corinthians, came to feel the need of us, and, what is the greatest miracle of all, the Persian king himself was driven to such extremity as to come round to the opinion, that from this city, of which he was the destroyer, and from no other, his salvation would proceed.

And if a person desired to bring a deserved accusation against our city, he would find only one charge which he could justly urge — that she was too compassionate and too favourable to the weaker side. And in this instance she was not able to hold out or keep her resolution of refusing aid to her injurers when they were being enslaved, but she was softened, and did in fact send out aid, and delivered the Hellenes from slavery, and they were free until they afterwards enslaved themselves. Whereas, to the great king she refused to give the assistance of the state, for she could not forget the trophies of Marathon and Salamis and Plataea; but she allowed exiles and volunteers to assist him, and they were his salvation. And she herself, when she was compelled, entered into the war, and built walls and ships, and fought with the Lacedaemonians on behalf of the Parians. Now the king fearing this city and wanting to stand aloof, when he saw the Lacedaemonians growing weary of the war at sea, asked of us, as the price of his alliance with us and the other allies, to give up the Hellenes in Asia, whom the Lacedaemonians had previously handed over to him, he thinking that we should refuse, and that then he might have a pretence for withdrawing from us. About the other allies he was mistaken, for the Corinthians and Argives and Boeotians, and the other states, were quite willing to let them go, and swore and covenanted, that, if he would pay them money, they would make over to him the Hellenes of the continent, and we alone refused to give them up and swear. Such was the natural nobility of this city, so sound and healthy was the spirit of freedom among us, and the instinctive dislike of the barbarian, because we are pure Hellenes, having no admixture of barbarism in us. For we are not like many others, descendants of Pelops or Cadmus or Egyptus or Danaus, who are by nature barbarians, and yet pass for Hellenes, and dwell in the midst of us; but we are pure Hellenes, uncontaminated by any foreign element, and therefore the hatred of the foreigner has passed unadulterated into the life-blood of the city. And so,

notwithstanding our noble sentiments, we were again isolated, because we were unwilling to be guilty of the base and unholy act of giving up Hellenes to barbarians. And we were in the same case as when we were subdued before; but, by the favour of Heaven, we managed better, for we ended the war without the loss of our ships or walls or colonies; the enemy was only too glad to be quit of us. Yet in this war we lost many brave men, such as were those who fell owing to the ruggedness of the ground at the battle of Corinth, or by treason at Lechaeum. Brave men, too, were those who delivered the Persian king, and drove the Lacedaemonians from the sea. I remind you of them, and you must celebrate them together with me, and do honour to their memories.

Such were the actions of the men who are here interred, and of others who have died on behalf of their country; many and glorious things I have spoken of them, and there are yet many more and more glorious things remaining to be told — many days and nights would not suffice to tell of them. Let them not be forgotten, and let every man remind their descendants that they also are soldiers who must not desert the ranks of their ancestors, or from cowardice fall behind. Even as I exhort you this day, and in all future time, whenever I meet with any of you, shall continue to remind and exhort you, O ye sons of heroes, that you strive to be the bravest of men. And I think that I ought now to repeat what your fathers desired to have said to you who are their survivors, when they went out to battle, in case anything happened to them. I will tell you what I heard them say, and what, if they had only speech, they would fain be saying, judging from what they then said. And you must imagine that you hear them saying what I now repeat to you: —

‘Sons, the event proves that your fathers were brave men; for we might have lived dishonourably, but have preferred to die honourably rather than bring you and your children into disgrace, and rather than dishonour our own fathers and

forefathers; considering that life is not life to one who is a dishonour to his race, and that to such a one neither men nor Gods are friendly, either while he is on the earth or after death in the world below. Remember our words, then, and whatever is your aim let virtue be the condition of the attainment of your aim, and know that without this all possessions and pursuits are dishonourable and evil. For neither does wealth bring honour to the owner, if he be a coward; of such a one the wealth belongs to another, and not to himself. Nor does beauty and strength of body, when dwelling in a base and cowardly man, appear comely, but the reverse of comely, making the possessor more conspicuous, and manifesting forth his cowardice. And all knowledge, when separated from justice and virtue, is seen to be cunning and not wisdom; wherefore make this your first and last and constant and all-absorbing aim, to exceed, if possible, not only us but all your ancestors in virtue; and know that to excel you in virtue only brings us shame, but that to be excelled by you is a source of happiness to us. And we shall most likely be defeated, and you will most likely be victors in the contest, if you learn so to order your lives as not to abuse or waste the reputation of your ancestors, knowing that to a man who has any self-respect, nothing is more dishonourable than to be honoured, not for his own sake, but on account of the reputation of his ancestors. The honour of parents is a fair and noble treasure to their posterity, but to have the use of a treasure of wealth and honour, and to leave none to your successors, because you have neither money nor reputation of your own, is alike base and dishonourable. And if you follow our precepts you will be received by us as friends, when the hour of destiny brings you hither; but if you neglect our words and are disgraced in your lives, no one will welcome or receive you. This is the message which is to be delivered to our children.

‘Some of us have fathers and mothers still living, and we would urge them, if, as is likely, we shall die, to bear the calamity as lightly as possible, and not to condole with one another; for they

have sorrows enough, and will not need any one to stir them up. While we gently heal their wounds, let us remind them that the Gods have heard the chief part of their prayers; for they prayed, not that their children might live for ever, but that they might be brave and renowned. And this, which is the greatest good, they have attained. A mortal man cannot expect to have everything in his own life turning out according to his will; and they, if they bear their misfortunes bravely, will be truly deemed brave fathers of the brave. But if they give way to their sorrows, either they will be suspected of not being our parents, or we of not being such as our panegyrists declare. Let not either of the two alternatives happen, but rather let them be our chief and true panegyrists, who show in their lives that they are true men, and had men for their sons. Of old the saying, “Nothing too much,” appeared to be, and really was, well said. For he whose happiness rests with himself, if possible, wholly, and if not, as far as is possible, — who is not hanging in suspense on other men, or changing with the vicissitude of their fortune, — has his life ordered for the best. He is the temperate and valiant and wise; and when his riches come and go, when his children are given and taken away, he will remember the proverb— “Neither rejoicing overmuch nor grieving overmuch,” for he relies upon himself. And such we would have our parents to be — that is our word and wish, and as such we now offer ourselves, neither lamenting overmuch, nor fearing overmuch, if we are to die at this time. And we entreat our fathers and mothers to retain these feelings throughout their future life, and to be assured that they will not please us by sorrowing and lamenting over us. But, if the dead have any knowledge of the living, they will displease us most by making themselves miserable and by taking their misfortunes too much to heart, and they will please us best if they bear their loss lightly and temperately. For our life will have the noblest end which is vouchsafed to man, and should be glorified rather than lamented. And if they will direct their minds to the care and nurture of our wives and children,

they will soonest forget their misfortunes, and live in a better and nobler way, and be dearer to us.

‘This is all that we have to say to our families: and to the state we would say — Take care of our parents and of our sons: let her worthily cherish the old age of our parents, and bring up our sons in the right way. But we know that she will of her own accord take care of them, and does not need any exhortation of ours.’

This, O ye children and parents of the dead, is the message which they bid us deliver to you, and which I do deliver with the utmost seriousness. And in their name I beseech you, the children, to imitate your fathers, and you, parents, to be of good cheer about yourselves; for we will nourish your age, and take care of you both publicly and privately in any place in which one of us may meet one of you who are the parents of the dead. And the care of you which the city shows, you know yourselves; for she has made provision by law concerning the parents and children of those who die in war; the highest authority is specially entrusted with the duty of watching over them above all other citizens, and they will see that your fathers and mothers have no wrong done to them. The city herself shares in the education of the children, desiring as far as it is possible that their orphanhood may not be felt by them; while they are children she is a parent to them, and when they have arrived at man’s estate she sends them to their several duties, in full armour clad; and bringing freshly to their minds the ways of their fathers, she places in their hands the instruments of their fathers’ virtues; for the sake of the omen, she would have them from the first begin to rule over their own houses arrayed in the strength and arms of their fathers. And as for the dead, she never ceases honouring them, celebrating in common for all rites which become the property of each; and in addition to this, holding gymnastic and equestrian contests, and musical festivals of every sort. She is to the dead in the place of a son

and heir, and to their sons in the place of a father, and to their parents and elder kindred in the place of a guardian — ever and always caring for them. Considering this, you ought to bear your calamity the more gently; for thus you will be most endeared to the dead and to the living, and your sorrows will heal and be healed. And now do you and all, having lamented the dead in common according to the law, go your ways.

You have heard, Menexenus, the oration of Aspasia the Milesian.

Menexenus: Truly, Socrates, I marvel that Aspasia, who is only a woman, should be able to compose such a speech; she must be a rare one.

Socrates: Well, if you are incredulous, you may come with me and hear her.

Menexenus: I have often met Aspasia, Socrates, and know what she is like.

Socrates: Well, and do you not admire her, and are you not grateful for her speech?

Menexenus: Yes, Socrates, I am very grateful to her or to him who told you, and still more to you who have told me.

Socrates: Very good. But you must take care not to tell of me, and then at some future time I will repeat to you many other excellent political speeches of hers.

Menexenus: Fear not, only let me hear them, and I will keep the secret.

Socrates: Then I will keep my promise.

Clitophon

ΚΛΕΙΤΟΦΩΝ

SOCRATES. A CERTAIN person has lately told me that Clitophon, the son of Aristonymus, has been conversing with Lysias, and blaming the passing the time with Socrates, but been praising immoderately the intercourse with Thrasymachus.

CLITOPHON. Whoever he was, Socrates, he has not accurately related to you the conversation I had with Lysias about you. For in some things indeed I did not praise you, but in others I did. But since you are evidently blaming me, although you pretend to care nothing about the matter, I will most willingly go through the conversation myself, especially since we happen to be alone, in order that you may the less imagine that I am ill disposed towards you. For now perhaps you have not heard correctly; so that you appear to be more harshly disposed towards me than is fitting. But if you will grant me the liberty of speech I shall most cheerfully accept it, and am willing to speak.

SOCRATES. Nay it would be disgraceful for myself when you are willing to benefit me, not to bear with you. For it is evident that, when I know in what respect lam better and worse, I shall pursue some things, and avoid others, to the utmost of my power.

CLITOPHON. You shall hear then. For while I am with yon, Socrates, I am often astonished on hearing you; and you appear to me, as compared with other men, to speak most beautifully, when, reproving men, yon exclaim like a god upon a machine — Whither are ye borne along ? And — Are ye ignorant, that ye are

doing nothing that ye ought, ye,- who make every exertion how ye may get money, but neglect your children, to whom ye are to leave it, and the means whereby they may know how to use it justly; and do not find for them teachers of justice, if indeed it can be taught, and who, if it is to be made the subject of meditation and exercise, may sufficiently exercise them in it. Nor yet do ye previously attend to yourselves; but, seeing that both ye and your children have learnt sufficiently grammar, and music, and the gymnastic arts, which ye have considered as the perfect discipline of virtue, yet afterwards that ye become no less depraved with respect to riches, why do ye not despise the present mode of education, and seek after those, who will cause you to cease from this illiberal line of life ? And yet it is through this neglect of what is right, and indolence, and not through the foot being out of time with the lyre, that brother himself arrays himself against brother, and states against states, and, out of all measure and harmony, are stirring up strife and war upon each other, and do and suffer the extreme of ill But ye say, that they, who are unjust, are unjust not through the want of instruction, nor through ignorance, but voluntarily ; and again, ye dare to assert that injustice is disgraceful and hateful to the gods. How then can any one voluntarily choose so great an evil ? He (does so) ye say, through being conquered by pleasure. Is not this then an involuntary act, since to conquer is a voluntary one ? So that reason perfectly convinces us, that to act unjustly is involuntary ; and that every man privately, and all cities publicly, ought to pay more attention than they do at present to their conduct.”

When therefore, Socrates, I hear you perpetually speaking so, I am greatly delighted with you, and pay you in a wonderful manner the tribute of praise. And when you say what follows in order upon this, that they, who cultivate their bodies, but neglect their soul, ‘do something different of this kind, in neglecting that, which is to govern, but busily attending to what is to be governed ; and when you assert that it is better for him, who does not know how to use a thing, to leave alone the use of

it; for if a person does not know how to use his eyes or ears, or his whole body, it is better for him not to hear, nor see, nor to use his body for any need, than to use it in any way; and in a similar manner with respect to art. For it is evident (as you say) that he, who does not know how to use his own lyre, will not (know how to use) that of his neighbour; nor will he, who (knows not how to use) the (lyre) of others, (know how to use) his own, nor any other instrument or chattel whatever; and this your discourse ended beautifully (by inferring), that for him, who does not know how to use his soul, it is better to be at rest with respect to his soul, and not to live, than to live and act according to his own caprice; but, if there is any necessity for such a person to live, that it is better for him to lead the life of a slave, than of a freeman. For that this is to deliver the rudder of the mind, like that of a ship, to mother, who has learnt the art of governing men; which, Socrates, you have often called the statesman's art, and said it is the same as that of the judge and justice. To these, and many other and very beautiful reasonings, in which it is asserted that virtue can be taught, and that a person ought above all things to pay attention to himself, I have scarcely at any time said a word in opposition, nor do I think that I shall ever say. For I deem them to be very exhortatory and useful, and really awakening us, as if we were asleep. I have therefore given my mind to them, as one about to hear what is to follow and I have asked at first, not yourself Socrates, but your equals in age, or fellow-thinkers, or Mends, or in whatever name one must call the (party) thus disposed towards you. For among them, I have first of all asked those, who are thought by you to be something, by inquiring what would be the discourse after this; and laying down a subject after your manner, I have said to them — How are we to receive for the present, O best of men, the exhortation of Socrates to virtue ? as being merely a word, but that it is not in oar power to follow it up in deed, and to comprehend it thoroughly? And will this be our employment through the whole of life, to exhort those who have not been

exhorted as yet? and for them (to exhort) others? Or is it requisite r us after this to inquire of Socrates and each other, since we confess that this should be done, what is to come next? How, say we, ought we to begin the discipline relating to justice? As if some one had exhorted us to pay attention to the body, on perceiving that we, like boys, had no notion that the care of the body belongs to the gymnastic and medical arts, and afterwards reproached us by saying, that it was disgraceful to pay every attention to wheat and barley, and vines, and such .other things as we labour to obtain for the sake of the body, but that we search after no art or device, so that the body may be rendered in the best condition, and this too when there is such an art. If then we inquired of the person so exhorting us — Do you say there are such arts as these? perhaps he would say, There are the gymnastic and medical arts. ‘And what now, we said, is the art that relates to the virtue of the soul ? Let it be mentioned. But he, who seemed to be of the greatest strength for giving an answer to these questions, said to myself, that the very art, which you have heard Socrates mention, is no other than justice. And on my saying — Tell me not merely the name of the art, but explain it further in this way. There is an art called the medical. By this two things are effected; one, that physicians are always forming other physicians in addition to those already existing; the other, to effect health. Now of these one is no longer an art, but the work of the art, which teaches and is taught, which we call health. And in the case of carpentry, there is the building and the art; one the effect, and the other the teaching. So too of justice, one part is to make persons just, as each (of the arts mentioned) above (makes) artists. But what shall we say is the other, work, which a just man is able to do for us ? State it. One person has, I think, said in answer to us, that it is “the conducible;” another, that it is “the becoming;” another, that it, is “the useful;” and another, that it is “the profitable.” But I rejoined by saying, that these very names exist in each of the arts, namely, to act rightly, profitably, usefully, and the like.

But that, to which all these tend, each art will state itself. Thus, the art of carpentry will say, that " the right," " the beautiful,'' M the becoming," (tend to this,) that wooden furniture may be (aptly) made; which is not art, (but the work of art). Let in like manner be mentioned, the work of justice. At last one of your friends, Socrates, who appeared to speak most elegantly, answered me, that this was .the work peculiar to justice, which does not belong to any other science, namely, to cause a friendship amongst states. But he, on the other hand, on being interrogated, said that friendship was a good, and by no means an evil. But on being asked about the friendships of boys and of wild animals, for by that name we call (their attachments), he did not admit that they are friendships; for it happened that such (friendships) of theirs were for the greater part hurtful rather than advantageous; and that those, who call them so, call them falsely; but that friendship existing really and truly was most clearly an union of sentiment. But on being asked whether he meant by an union of sentiment, an agreement in opinion or science, he repudiated the agreement in opinion; for many and hurtful agreements in opinion are compelled to take place amongst men; but he conceded that friendship was entirely a good, and the work of justice; so that he said, an agreement in sentiment was the same as science really existing, but not opinion. But when we were at this part of our discourse, the parties present being in a state of doubt were competent to find fault with him, and to say, that the reasoning had run round to the point first mooted; and they affirmed that the medical art is a certain agreement in sentiment; 'and so are all the other arts; and that they are able to state about what they are conversant; but that the art called by you justice, or an agreement in sentiment, it had escaped them as to whither it tends, and that it is not manifest what is its work. At last I inquired of yourself, Socrates, upon these points; and you told me that it is the work of justice to injure enemies, and benefit friends,; but afterwards it appeared to you, that the just man will never injure any one,

but will act to the ad-f vantage of every one in all things. Having endured this not once, nor even twice, but for a length of time, and being .urgent with you, Socrates, I was tired out; thinking, indeed, that you effected in the best manner of all men, the exhortation to the study of virtue; but that one of two things (must take place), either that you are able to effect thus much alone, but nothing further — which might happen in the case of any other art — as, for instance, that he who is not a pilot, may exercise himself in praising the pilot's art, as a thing of great value to man; and similarly in the case of other arts — so a person may perhaps apply the same remark on the subject of justice to yourself as not having a greater knowledge than others of its nature, because you praise it in a beautiful manner. Such however is not my (opinion), but (as I say), one of two things (take place) ; either that you do not know (what justice is), or that you are unwilling to impart (the knowledge of it) to me. On this account then, I think I shall go to Thrasymachus, and wherever else I can, as being in doubt, (and where I hope I shall be freed from doubts; nor should I betake myself elsewhere,) if you were willing to finish your exhortatory discourses to me. Now, for instance, if I had been exhorted on the subject of the gymnastic art, that I ought not to neglect the body, you would state to me what comes next after the exhortation-speech, what is the nature of my body, and what attention it requires. And let this be done at present Lay it down then that Clitophon acknowledges it to be ridiculous to pay attention to other things, but to neglect the soul, for the sake of which we labour in other things; and imagine that I have really spoken upon all other points, next in order to those, which I have just now gone through. I beg of yon not to act in any respect otherwise, that I may not (hereafter), as at present, partly praise yon before Lysias and the rest, and blame you likewise in part. For I will say, Socrates, that you are worth every thing to the man, who is not yet exhorted; but to him who has been exhorted, you are nearly an impediment to his arriving

at the end of virtue, and becoming happy.

Ion

ΙΩΝ

Socrates: Welcome, Ion. Are you from your native city of Ephesus?

Ion: No, Socrates; but from Epidaurus, where I attended the festival of Asclepius.

Socrates: And do the Epidaurians have contests of rhapsodes at the festival?

Ion: O yes; and of all sorts of musical performers.

Socrates: And were you one of the competitors — and did you succeed?

Ion: I obtained the first prize of all, Socrates.

Socrates: Well done; and I hope that you will do the same for us at the Panathenaea.

Ion: And I will, please heaven.

Socrates: I often envy the profession of a rhapsode, Ion; for you have always to wear fine clothes, and to look as beautiful as you can is a part of your art. Then, again, you are obliged to be continually in the company of many good poets; and especially of Homer, who is the best and most divine of them; and to understand him, and not merely learn his words by rote, is a thing greatly to be envied. And no man can be a rhapsode who does not understand the meaning of the poet. For the rhapsode ought to interpret the mind of the poet to his hearers, but how can he interpret him well unless he knows what he means? All this is greatly to be envied.

Ion: Very true, Socrates; interpretation has certainly been the most laborious part of my art; and I believe myself able to speak about Homer better than any man; and that neither Metrodorus of Lampsacus, nor Stesimbrotus of Thasos, nor Glaucon, nor any one else who ever was, had as good ideas about Homer as I have, or as many.

Socrates: I am glad to hear you say so, Ion; I see that you will not refuse to acquaint me with them.

Ion: Certainly, Socrates; and you really ought to hear how exquisitely I render Homer. I think that the Homeridae should give me a golden crown.

Socrates: I shall take an opportunity of hearing your embellishments of him at some other time. But just now I should like to ask you a question: Does your art extend to Hesiod and Archilochus, or to Homer only?

Ion: To Homer only; he is in himself quite enough.

Socrates: Are there any things about which Homer and Hesiod agree?

Ion: Yes; in my opinion there are a good many.

Socrates: And can you interpret better what Homer says, or what Hesiod says, about these matters in which they agree?

Ion: I can interpret them equally well, Socrates, where they agree.

Socrates: But what about matters in which they do not agree? — for example, about divination, of which both Homer and Hesiod have something to say, —

Ion: Very true:

Socrates: Would you or a good prophet be a better interpreter of what these two poets say about divination, not only when they agree, but when they disagree?

Ion: A prophet.

Socrates: And if you were a prophet, would you not be able to interpret them when they disagree as well as when they agree?

Ion: Clearly.

Socrates: But how did you come to have this skill about Homer only, and not about Hesiod or the other poets? Does not Homer speak of the same themes which all other poets handle? Is not war his great argument? and does he not speak of human society and of intercourse of men, good and bad, skilled and unskilled, and of the gods conversing with one another and with mankind, and about what happens in heaven and in the world below, and the generations of gods and heroes? Are not these the themes of which Homer sings?

Ion: Very true, Socrates.

Socrates: And do not the other poets sing of the same?

Ion: Yes, Socrates; but not in the same way as Homer.

Socrates: What, in a worse way?

Ion: Yes, in a far worse.

Socrates: And Homer in a better way?

Ion: He is incomparably better.

Socrates: And yet surely, my dear friend Ion, in a discussion about arithmetic, where many people are speaking, and one speaks better than the rest, there is somebody who can judge which of them is the good speaker?

Ion: Yes.

Socrates: And he who judges of the good will be the same as he who judges of the bad speakers?

Ion: The same.

Socrates: And he will be the arithmetician?

Ion: Yes.

Socrates: Well, and in discussions about the wholesomeness of food, when many persons are speaking, and one speaks better than the rest, will he who recognizes the better speaker be a different person from him who recognizes the worse, or the same?

Ion: Clearly the same.

Socrates: And who is he, and what is his name?

Ion: The physician.

Socrates: And speaking generally, in all discussions in which the subject is the same and many men are speaking, will not he who knows the good know the bad speaker also? For if he does not know the bad, neither will he know the good when the same topic is being discussed.

Ion: True.

Socrates: Is not the same person skilful in both?

Ion: Yes.

Socrates: And you say that Homer and the other poets, such as Hesiod and Archilochus, speak of the same things, although not in the same way; but the one speaks well and the other not so well?

Ion: Yes; and I am right in saying so.

Socrates: And if you knew the good speaker, you would also know the inferior speakers to be inferior?

Ion: That is true.

Socrates: Then, my dear friend, can I be mistaken in saying that Ion is equally skilled in Homer and in other poets, since he himself acknowledges that the same person will be a good judge of all those who speak of the same things; and that almost all poets do speak of the same things?

Ion: Why then, Socrates, do I lose attention and go to sleep and have absolutely no ideas of the least value, when any one speaks of any other poet; but when Homer is mentioned, I wake up at once and am all attention and have plenty to say?

Socrates: The reason, my friend, is obvious. No one can fail to see that you speak of Homer without any art or knowledge. If you were able to speak of him by rules of art, you would have been able to speak of all other poets; for poetry is a whole.

Ion: Yes.

Socrates: And when any one acquires any other art as a whole, the same may be said of them. Would you like me to explain my meaning, Ion?

Ion: Yes, indeed, Socrates; I very much wish that you would: for I love to hear you wise men talk.

Socrates: O that we were wise, Ion, and that you could truly call us so; but you rhapsodes and actors, and the poets whose verses you sing, are wise; whereas I am a common man, who only speak the truth. For consider what a very commonplace and trivial thing is this which I have said — a thing which any man might say: that when a man has acquired a knowledge of a whole art, the enquiry into good and bad is one and the same. Let us consider this matter; is not the art of painting a whole?

Ion: Yes.

Socrates: And there are and have been many painters good and bad?

Ion: Yes.

Socrates: And did you ever know any one who was skilful in pointing out the excellences and defects of Polygnotus the son of Aglaophon, but incapable of criticizing other painters; and when the work of any other painter was produced, went to sleep and was at a loss, and had no ideas; but when he had to give his opinion about Polygnotus, or whoever the painter might be, and

about him only, woke up and was attentive and had plenty to say?

Ion: No indeed, I have never known such a person.

Socrates: Or did you ever know of any one in sculpture, who was skilful in expounding the merits of Daedalus the son of Metion, or of Epeius the son of Panopeus, or of Theodorus the Samian, or of any individual sculptor; but when the works of sculptors in general were produced, was at a loss and went to sleep and had nothing to say?

Ion: No indeed; no more than the other.

Socrates: And if I am not mistaken, you never met with any one among flute-players or harp-players or singers to the harp or rhapsodes who was able to discourse of Olympus or Thamyras or Orpheus, or Phemius the rhapsode of Ithaca, but was at a loss when he came to speak of Ion of Ephesus, and had no notion of his merits or defects?

Ion: I cannot deny what you say, Socrates. Nevertheless I am conscious in my own self, and the world agrees with me in thinking that I do speak better and have more to say about Homer than any other man. But I do not speak equally well about others — tell me the reason of this.

Socrates: I perceive, Ion; and I will proceed to explain to you what I imagine to be the reason of this. The gift which you possess of speaking excellently about Homer is not an art, but, as I was just saying, an inspiration; there is a divinity moving you, like that contained in the stone which Euripides calls a magnet, but which is commonly known as the stone of Heraclea. This stone not only attracts iron rings, but also imparts to them a similar power of attracting other rings; and sometimes you may see a number of pieces of iron and rings suspended from one another so as to form quite a long chain: and all of them derive their power of suspension from the original stone. In like manner the Muse first of all inspires men herself; and from

these inspired persons a chain of other persons is suspended, who take the inspiration. For all good poets, epic as well as lyric, compose their beautiful poems not by art, but because they are inspired and possessed. And as the Corybantian revellers when they dance are not in their right mind, so the lyric poets are not in their right mind when they are composing their beautiful strains: but when falling under the power of music and metre they are inspired and possessed; like Bacchic maidens who draw milk and honey from the rivers when they are under the influence of Dionysus but not when they are in their right mind. And the soul of the lyric poet does the same, as they themselves say; for they tell us that they bring songs from honeyed fountains, culling them out of the gardens and dells of the Muses; they, like the bees, winging their way from flower to flower. And this is true. For the poet is a light and winged and holy thing, and there is no invention in him until he has been inspired and is out of his senses, and the mind is no longer in him: when he has not attained to this state, he is powerless and is unable to utter his oracles. Many are the noble words in which poets speak concerning the actions of men; but like yourself when speaking about Homer, they do not speak of them by any rules of art: they are simply inspired to utter that to which the Muse impels them, and that only; and when inspired, one of them will make dithyrambs, another hymns of praise, another choral strains, another epic or iambic verses — and he who is good at one is not good at any other kind of verse: for not by art does the poet sing, but by power divine. Had he learned by rules of art, he would have known how to speak not of one theme only, but of all; and therefore God takes away the minds of poets, and uses them as his ministers, as he also uses diviners and holy prophets, in order that we who hear them may know them to be speaking not of themselves who utter these priceless words in a state of unconsciousness, but that God himself is the speaker, and that through them he is conversing with us. And Tynnichus the Chalcidian affords a striking instance of what I am saying:

he wrote nothing that any one would care to remember but the famous paean which is in every one's mouth, one of the finest poems ever written, simply an invention of the Muses, as he himself says. For in this way the God would seem to indicate to us and not allow us to doubt that these beautiful poems are not human, or the work of man, but divine and the work of God; and that the poets are only the interpreters of the Gods by whom they are severally possessed. Was not this the lesson which the God intended to teach when by the mouth of the worst of poets he sang the best of songs? Am I not right, Ion?

Ion: Yes, indeed, Socrates, I feel that you are; for your words touch my soul, and I am persuaded that good poets by a divine inspiration interpret the things of the Gods to us.

Socrates: And you rhapsodists are the interpreters of the poets?

Ion: There again you are right.

Socrates: Then you are the interpreters of interpreters?

Ion: Precisely.

Socrates: I wish you would frankly tell me, Ion, what I am going to ask of you: When you produce the greatest effect upon the audience in the recitation of some striking passage, such as the apparition of Odysseus leaping forth on the floor, recognized by the suitors and casting his arrows at his feet, or the description of Achilles rushing at Hector, or the sorrows of Andromache, Hecuba, or Priam, — are you in your right mind? Are you not carried out of yourself, and does not your soul in an ecstasy seem to be among the persons or places of which you are speaking, whether they are in Ithaca or in Troy or whatever may be the scene of the poem?

Ion: That proof strikes home to me, Socrates. For I must frankly confess that at the tale of pity my eyes are filled with tears, and when I speak of horrors, my hair stands on end and my heart throbs.

Socrates: Well, Ion, and what are we to say of a man who at a sacrifice or festival, when he is dressed in holiday attire, and has golden crowns upon his head, of which nobody has robbed him, appears weeping or panic-stricken in the presence of more than twenty thousand friendly faces, when there is no one despoiling or wronging him; — is he in his right mind or is he not?

Ion: No indeed, Socrates, I must say that, strictly speaking, he is not in his right mind.

Socrates: And are you aware that you produce similar effects on most of the spectators?

Ion: Only too well; for I look down upon them from the stage, and behold the various emotions of pity, wonder, sternness, stamped upon their countenances when I am speaking: and I am obliged to give my very best attention to them; for if I make them cry I myself shall laugh, and if I make them laugh I myself shall cry when the time of payment arrives.

Socrates: Do you know that the spectator is the last of the rings which, as I am saying, receive the power of the original magnet from one another? The rhapsode like yourself and the actor are intermediate links, and the poet himself is the first of them. Through all these the God sways the souls of men in any direction which he pleases, and makes one man hang down from another. Thus there is a vast chain of dancers and masters and under-masters of choruses, who are suspended, as if from the stone, at the side of the rings which hang down from the Muse. And every poet has some Muse from whom he is suspended, and by whom he is said to be possessed, which is nearly the same thing; for he is taken hold of. And from these first rings, which are the poets, depend others, some deriving their inspiration from Orpheus, others from Musaeus; but the greater number are possessed and held by Homer. Of whom, Ion, you are one, and are possessed by Homer; and when any one repeats the words of another poet you go to sleep, and know not what to say; but when any one recites a strain of Homer you wake up in

a moment, and your soul leaps within you, and you have plenty to say; for not by art or knowledge about Homer do you say what you say, but by divine inspiration and by possession; just as the Corybantian revellers too have a quick perception of that strain only which is appropriated to the God by whom they are possessed, and have plenty of dances and words for that, but take no heed of any other. And you, Ion, when the name of Homer is mentioned have plenty to say, and have nothing to say of others. You ask, 'Why is this?' The answer is that you praise Homer not by art but by divine inspiration.

Ion: That is good, Socrates; and yet I doubt whether you will ever have eloquence enough to persuade me that I praise Homer only when I am mad and possessed; and if you could hear me speak of him I am sure you would never think this to be the case.

Socrates: I should like very much to hear you, but not until you have answered a question which I have to ask. On what part of Homer do you speak well? — not surely about every part.

Ion: There is no part, Socrates, about which I do not speak well: of that I can assure you.

Socrates: Surely not about things in Homer of which you have no knowledge?

Ion: And what is there in Homer of which I have no knowledge?

Socrates: Why, does not Homer speak in many passages about arts? For example, about driving; if I can only remember the lines I will repeat them.

Ion: I remember, and will repeat them.

Socrates: Tell me then, what Nestor says to Antilochus, his son, where he bids him be careful of the turn at the horserace in honour of Patroclus.

Ion: 'Bend gently,' he says, 'in the polished chariot to the left of them, and urge the horse on the right hand with whip and voice;

and slacken the rein. And when you are at the goal, let the left horse draw near, yet so that the nave of the well-wrought wheel may not even seem to touch the extremity; and avoid catching the stone (Il.).'

Socrates: Enough. Now, Ion, will the charioteer or the physician be the better judge of the propriety of these lines?

Ion: The charioteer, clearly.

Socrates: And will the reason be that this is his art, or will there be any other reason?

Ion: No, that will be the reason.

Socrates: And every art is appointed by God to have knowledge of a certain work; for that which we know by the art of the pilot we do not know by the art of medicine?

Ion: Certainly not.

Socrates: Nor do we know by the art of the carpenter that which we know by the art of medicine?

Ion: Certainly not.

Socrates: And this is true of all the arts; — that which we know with one art we do not know with the other? But let me ask a prior question: You admit that there are differences of arts?

Ion: Yes.

Socrates: You would argue, as I should, that when one art is of one kind of knowledge and another of another, they are different?

Ion: Yes.

Socrates: Yes, surely; for if the subject of knowledge were the same, there would be no meaning in saying that the arts were different, — if they both gave the same knowledge. For example, I know that here are five fingers, and you know the same. And if I were to ask whether I and you became acquainted with this

fact by the help of the same art of arithmetic, you would acknowledge that we did?

Ion: Yes.

Socrates: Tell me, then, what I was intending to ask you, — whether this holds universally? Must the same art have the same subject of knowledge, and different arts other subjects of knowledge?

Ion: That is my opinion, Socrates.

Socrates: Then he who has no knowledge of a particular art will have no right judgment of the sayings and doings of that art?

Ion: Very true.

Socrates: Then which will be a better judge of the lines which you were reciting from Homer, you or the charioteer?

Ion: The charioteer.

Socrates: Why, yes, because you are a rhapsode and not a charioteer.

Ion: Yes.

Socrates: And the art of the rhapsode is different from that of the charioteer?

Ion: Yes.

Socrates: And if a different knowledge, then a knowledge of different matters?

Ion: True.

Socrates: You know the passage in which Hecamede, the concubine of Nestor, is described as giving to the wounded Machaon a posset, as he says,

‘Made with Pramnian wine; and she grated cheese of goat’s milk with a grater of bronze, and at his side placed an onion which gives a relish to drink (Il.).’

Now would you say that the art of the rhapsode or the art of medicine was better able to judge of the propriety of these lines?

Ion: The art of medicine.

Socrates: And when Homer says,

‘And she descended into the deep like a leaden plummet, which, set in the horn of ox that ranges in the fields, rushes along carrying death among the ravenous fishes (Il.),’ —

will the art of the fisherman or of the rhapsode be better able to judge whether these lines are rightly expressed or not?

Ion: Clearly, Socrates, the art of the fisherman.

Socrates: Come now, suppose that you were to say to me: ‘Since you, Socrates, are able to assign different passages in Homer to their corresponding arts, I wish that you would tell me what are the passages of which the excellence ought to be judged by the prophet and prophetic art’; and you will see how readily and truly I shall answer you. For there are many such passages, particularly in the Odyssee; as, for example, the passage in which Theoclymenus the prophet of the house of Melampus says to the suitors: —

‘Wretched men! what is happening to you? Your heads and your faces and your limbs underneath are shrouded in night; and the voice of lamentation bursts forth, and your cheeks are wet with tears. And the vestibule is full, and the court is full, of ghosts descending into the darkness of Erebus, and the sun has perished out of heaven, and an evil mist is spread abroad (Od.).’

And there are many such passages in the Iliad also; as for example in the description of the battle near the rampart, where he says: —

‘As they were eager to pass the ditch, there came to them an omen: a soaring eagle, holding back the people on the left, bore a huge bloody dragon in his talons, still living and panting; nor

had he yet resigned the strife, for he bent back and smote the bird which carried him on the breast by the neck, and he in pain let him fall from him to the ground into the midst of the multitude. And the eagle, with a cry, was borne afar on the wings of the wind (Il.).'

These are the sort of things which I should say that the prophet ought to consider and determine.

Ion: And you are quite right, Socrates, in saying so.

Socrates: Yes, Ion, and you are right also. And as I have selected from the Iliad and Odyssee for you passages which describe the office of the prophet and the physician and the fisherman, do you, who know Homer so much better than I do, Ion, select for me passages which relate to the rhapsode and the rhapsode's art, and which the rhapsode ought to examine and judge of better than other men.

Ion: All passages, I should say, Socrates.

Socrates: Not all, Ion, surely. Have you already forgotten what you were saying? A rhapsode ought to have a better memory.

Ion: Why, what am I forgetting?

Socrates: Do you not remember that you declared the art of the rhapsode to be different from the art of the charioteer?

Ion: Yes, I remember.

Socrates: And you admitted that being different they would have different subjects of knowledge?

Ion: Yes.

Socrates: Then upon your own showing the rhapsode, and the art of the rhapsode, will not know everything?

Ion: I should exclude certain things, Socrates.

Socrates: You mean to say that you would exclude pretty much the subjects of the other arts. As he does not know all of them,

which of them will he know?

Ion: He will know what a man and what a woman ought to say, and what a freeman and what a slave ought to say, and what a ruler and what a subject.

Socrates: Do you mean that a rhapsode will know better than the pilot what the ruler of a sea-tossed vessel ought to say?

Ion: No; the pilot will know best.

Socrates: Or will the rhapsode know better than the physician what the ruler of a sick man ought to say?

Ion: He will not.

Socrates: But he will know what a slave ought to say?

Ion: Yes.

Socrates: Suppose the slave to be a cowherd; the rhapsode will know better than the cowherd what he ought to say in order to soothe the infuriated cows?

Ion: No, he will not.

Socrates: But he will know what a spinning-woman ought to say about the working of wool?

Ion: No.

Socrates: At any rate he will know what a general ought to say when exhorting his soldiers?

Ion: Yes, that is the sort of thing which the rhapsode will be sure to know.

Socrates: Well, but is the art of the rhapsode the art of the general?

Ion: I am sure that I should know what a general ought to say.

Socrates: Why, yes, Ion, because you may possibly have a knowledge of the art of the general as well as of the rhapsode; and you may also have a knowledge of horsemanship as well as

of the lyre: and then you would know when horses were well or ill managed. But suppose I were to ask you: By the help of which art, Ion, do you know whether horses are well managed, by your skill as a horseman or as a performer on the lyre — what would you answer?

Ion: I should reply, by my skill as a horseman.

Socrates: And if you judged of performers on the lyre, you would admit that you judged of them as a performer on the lyre, and not as a horseman?

Ion: Yes.

Socrates: And in judging of the general's art, do you judge of it as a general or a rhapsode?

Ion: To me there appears to be no difference between them.

Socrates: What do you mean? Do you mean to say that the art of the rhapsode and of the general is the same?

Ion: Yes, one and the same.

Socrates: Then he who is a good rhapsode is also a good general?

Ion: Certainly, Socrates.

Socrates: And he who is a good general is also a good rhapsode?

Ion: No; I do not say that.

Socrates: But you do say that he who is a good rhapsode is also a good general.

Ion: Certainly.

Socrates: And you are the best of Hellenic rhapsodes?

Ion: Far the best, Socrates.

Socrates: And are you the best general, Ion?

Ion: To be sure, Socrates; and Homer was my master.

Socrates: But then, Ion, what in the name of goodness can be the reason why you, who are the best of generals as well as the best of rhapsodes in all Hellas, go about as a rhapsode when you might be a general? Do you think that the Hellenes want a rhapsode with his golden crown, and do not want a general?

Ion: Why, Socrates, the reason is, that my countrymen, the Ephesians, are the servants and soldiers of Athens, and do not need a general; and you and Sparta are not likely to have me, for you think that you have enough generals of your own.

Socrates: My good Ion, did you never hear of Apollodorus of Cyzicus?

Ion: Who may he be?

Socrates: One who, though a foreigner, has often been chosen their general by the Athenians: and there is Phanosthenes of Andros, and Heraclides of Clazomenae, whom they have also appointed to the command of their armies and to other offices, although aliens, after they had shown their merit. And will they not choose Ion the Ephesian to be their general, and honour him, if he prove himself worthy? Were not the Ephesians originally Athenians, and Ephesus is no mean city? But, indeed, Ion, if you are correct in saying that by art and knowledge you are able to praise Homer, you do not deal fairly with me, and after all your professions of knowing many glorious things about Homer, and promises that you would exhibit them, you are only a deceiver, and so far from exhibiting the art of which you are a master, will not, even after my repeated entreaties, explain to me the nature of it. You have literally as many forms as Proteus; and now you go all manner of ways, twisting and turning, and, like Proteus, become all manner of people at once, and at last slip away from me in the disguise of a general, in order that you may escape exhibiting your Homeric lore. And if you have art, then, as I was saying, in falsifying your promise that you would exhibit Homer, you are not dealing fairly with me. But if, as I believe, you have no art, but speak all these beautiful words

about Homer unconsciously under his inspiring influence, then I acquit you of dishonesty, and shall only say that you are inspired. Which do you prefer to be thought, dishonest or inspired?

Ion: There is a great difference, Socrates, between the two alternatives; and inspiration is by far the nobler.

Socrates: Then, Ion, I shall assume the nobler alternative; and attribute to you in your praises of Homer inspiration, and not art.

Cratylus

ΚΡΑΤΥΛΟΣ

Hermogenes: Suppose that we make Socrates a party to the argument?

Cratylus: If you please.

Hermogenes: I should explain to you, Socrates, that our friend Cratylus has been arguing about names; he says that they are natural and not conventional; not a portion of the human voice which men agree to use; but that there is a truth or correctness in them, which is the same for Hellenes as for barbarians. Whereupon I ask him, whether his own name of Cratylus is a true name or not, and he answers 'Yes.' And Socrates? 'Yes.' Then every man's name, as I tell him, is that which he is called. To this he replies— 'If all the world were to call you Hermogenes, that would not be your name.' And when I am anxious to have a further explanation he is ironical and mysterious, and seems to imply that he has a notion of his own about the matter, if he would only tell, and could entirely convince me, if he chose to be intelligible. Tell me, Socrates, what this oracle means; or rather tell me, if you will be so good, what is your own view of the truth or correctness of names, which I would far sooner hear.

Socrates: Son of Hipponicus, there is an ancient saying, that 'hard is the knowledge of the good.' And the knowledge of names is a great part of knowledge. If I had not been poor, I might have heard the fifty-drachma course of the great Prodicus, which is a complete education in grammar and

language — these are his own words — and then I should have been at once able to answer your question about the correctness of names. But, indeed, I have only heard the single-drachma course, and therefore, I do not know the truth about such matters; I will, however, gladly assist you and Cratylus in the investigation of them. When he declares that your name is not really Hermogenes, I suspect that he is only making fun of you; — he means to say that you are no true son of Hermes, because you are always looking after a fortune and never in luck. But, as I was saying, there is a good deal of difficulty in this sort of knowledge, and therefore we had better leave the question open until we have heard both sides.

Hermogenes: I have often talked over this matter, both with Cratylus and others, and cannot convince myself that there is any principle of correctness in names other than convention and agreement; any name which you give, in my opinion, is the right one, and if you change that and give another, the new name is as correct as the old — we frequently change the names of our slaves, and the newly-imposed name is as good as the old: for there is no name given to anything by nature; all is convention and habit of the users; — such is my view. But if I am mistaken I shall be happy to hear and learn of Cratylus, or of any one else.

Socrates: I dare say that you may be right, Hermogenes: let us see; — Your meaning is, that the name of each thing is only that which anybody agrees to call it?

Hermogenes: That is my notion.

Socrates: Whether the giver of the name be an individual or a city?

Hermogenes: Yes.

Socrates: Well, now, let me take an instance; — suppose that I call a man a horse or a horse a man, you mean to say that a man will be rightly called a horse by me individually, and rightly called a man by the rest of the world; and a horse again would

be rightly called a man by me and a horse by the world: — that is your meaning?

Hermogenes: He would, according to my view.

Socrates: But how about truth, then? you would acknowledge that there is in words a true and a false?

Hermogenes: Certainly.

Socrates: And there are true and false propositions?

Hermogenes: To be sure.

Socrates: And a true proposition says that which is, and a false proposition says that which is not?

Hermogenes: Yes; what other answer is possible?

Socrates: Then in a proposition there is a true and false?

Hermogenes: Certainly.

Socrates: But is a proposition true as a whole only, and are the parts untrue?

Hermogenes: No; the parts are true as well as the whole.

Socrates: Would you say the large parts and not the smaller ones, or every part?

Hermogenes: I should say that every part is true.

Socrates: Is a proposition resolvable into any part smaller than a name?

Hermogenes: No; that is the smallest.

Socrates: Then the name is a part of the true proposition?

Hermogenes: Yes.

Socrates: Yes, and a true part, as you say.

Hermogenes: Yes.

Socrates: And is not the part of a falsehood also a falsehood?

Hermogenes: Yes.

Socrates: Then, if propositions may be true and false, names may be true and false?

Hermogenes: So we must infer.

Socrates: And the name of anything is that which any one affirms to be the name?

Hermogenes: Yes.

Socrates: And will there be so many names of each thing as everybody says that there are? and will they be true names at the time of uttering them?

Hermogenes: Yes, Socrates, I can conceive no correctness of names other than this; you give one name, and I another; and in different cities and countries there are different names for the same things; Hellenes differ from barbarians in their use of names, and the several Hellenic tribes from one another.

Socrates: But would you say, Hermogenes, that the things differ as the names differ? and are they relative to individuals, as Protagoras tells us? For he says that man is the measure of all things, and that things are to me as they appear to me, and that they are to you as they appear to you. Do you agree with him, or would you say that things have a permanent essence of their own?

Hermogenes: There have been times, Socrates, when I have been driven in my perplexity to take refuge with Protagoras; not that I agree with him at all.

Socrates: What! have you ever been driven to admit that there was no such thing as a bad man?

Hermogenes: No, indeed; but I have often had reason to think that there are very bad men, and a good many of them.

Socrates: Well, and have you ever found any very good ones?

Hermogenes: Not many.

Socrates: Still you have found them?

Hermogenes: Yes.

Socrates: And would you hold that the very good were the very wise, and the very evil very foolish? Would that be your view?

Hermogenes: It would.

Socrates: But if Protagoras is right, and the truth is that things are as they appear to any one, how can some of us be wise and some of us foolish?

Hermogenes: Impossible.

Socrates: And if, on the other hand, wisdom and folly are really distinguishable, you will allow, I think, that the assertion of Protagoras can hardly be correct. For if what appears to each man is true to him, one man cannot in reality be wiser than another.

Hermogenes: He cannot.

Socrates: Nor will you be disposed to say with Euthydemus, that all things equally belong to all men at the same moment and always; for neither on his view can there be some good and others bad, if virtue and vice are always equally to be attributed to all.

Hermogenes: There cannot.

Socrates: But if neither is right, and things are not relative to individuals, and all things do not equally belong to all at the same moment and always, they must be supposed to have their own proper and permanent essence: they are not in relation to us, or influenced by us, fluctuating according to our fancy, but they are independent, and maintain to their own essence the relation prescribed by nature.

Hermogenes: I think, Socrates, that you have said the truth.

Socrates: Does what I am saying apply only to the things themselves, or equally to the actions which proceed from them? Are not actions also a class of being?

Hermogenes: Yes, the actions are real as well as the things.

Socrates: Then the actions also are done according to their proper nature, and not according to our opinion of them? In cutting, for example, we do not cut as we please, and with any chance instrument; but we cut with the proper instrument only, and according to the natural process of cutting; and the natural process is right and will succeed, but any other will fail and be of no use at all.

Hermogenes: I should say that the natural way is the right way.

Socrates: Again, in burning, not every way is the right way; but the right way is the natural way, and the right instrument the natural instrument.

Hermogenes: True.

Socrates: And this holds good of all actions?

Hermogenes: Yes.

Socrates: And speech is a kind of action?

Hermogenes: True.

Socrates: And will a man speak correctly who speaks as he pleases? Will not the successful speaker rather be he who speaks in the natural way of speaking, and as things ought to be spoken, and with the natural instrument? Any other mode of speaking will result in error and failure.

Hermogenes: I quite agree with you.

Socrates: And is not naming a part of speaking? for in giving names men speak.

Hermogenes: That is true.

Socrates: And if speaking is a sort of action and has a relation to acts, is not naming also a sort of action?

Hermogenes: True.

Socrates: And we saw that actions were not relative to ourselves, but had a special nature of their own?

Hermogenes: Precisely.

Socrates: Then the argument would lead us to infer that names ought to be given according to a natural process, and with a proper instrument, and not at our pleasure: in this and no other way shall we name with success.

Hermogenes: I agree.

Socrates: But again, that which has to be cut has to be cut with something?

Hermogenes: Yes.

Socrates: And that which has to be woven or pierced has to be woven or pierced with something?

Hermogenes: Certainly.

Socrates: And that which has to be named has to be named with something?

Hermogenes: True.

Socrates: What is that with which we pierce?

Hermogenes: An awl.

Socrates: And with which we weave?

Hermogenes: A shuttle.

Socrates: And with which we name?

Hermogenes: A name.

Socrates: Very good: then a name is an instrument?

Hermogenes: Certainly.

Socrates: Suppose that I ask, ‘What sort of instrument is a shuttle?’ And you answer, ‘A weaving instrument.’

Hermogenes: Well.

Socrates: And I ask again, ‘What do we do when we weave?’ — The answer is, that we separate or disengage the warp from the woof.

Hermogenes: Very true.

Socrates: And may not a similar description be given of an awl, and of instruments in general?

Hermogenes: To be sure.

Socrates: And now suppose that I ask a similar question about names: will you answer me? Regarding the name as an instrument, what do we do when we name?

Hermogenes: I cannot say.

Socrates: Do we not give information to one another, and distinguish things according to their natures?

Hermogenes: Certainly we do.

Socrates: Then a name is an instrument of teaching and of distinguishing natures, as the shuttle is of distinguishing the threads of the web.

Hermogenes: Yes.

Socrates: And the shuttle is the instrument of the weaver?

Hermogenes: Assuredly.

Socrates: Then the weaver will use the shuttle well — and well means like a weaver? and the teacher will use the name well — and well means like a teacher?

Hermogenes: Yes.

Socrates: And when the weaver uses the shuttle, whose work will he be using well?

Hermogenes: That of the carpenter.

Socrates: And is every man a carpenter, or the skilled only?

Hermogenes: Only the skilled.

Socrates: And when the piercer uses the awl, whose work will he be using well?

Hermogenes: That of the smith.

Socrates: And is every man a smith, or only the skilled?

Hermogenes: The skilled only.

Socrates: And when the teacher uses the name, whose work will he be using?

Hermogenes: There again I am puzzled.

Socrates: Cannot you at least say who gives us the names which we use?

Hermogenes: Indeed I cannot.

Socrates: Does not the law seem to you to give us them?

Hermogenes: Yes, I suppose so.

Socrates: Then the teacher, when he gives us a name, uses the work of the legislator?

Hermogenes: I agree.

Socrates: And is every man a legislator, or the skilled only?

Hermogenes: The skilled only.

Socrates: Then, Hermogenes, not every man is able to give a name, but only a maker of names; and this is the legislator, who of all skilled artisans in the world is the rarest.

Hermogenes: True.

Socrates: And how does the legislator make names? and to what does he look? Consider this in the light of the previous instances: to what does the carpenter look in making the shuttle? Does he not look to that which is naturally fitted to act as a shuttle?

Hermogenes: Certainly.

Socrates: And suppose the shuttle to be broken in making, will he make another, looking to the broken one? or will he look to the form according to which he made the other?

Hermogenes: To the latter, I should imagine.

Socrates: Might not that be justly called the true or ideal shuttle?

Hermogenes: I think so.

Socrates: And whatever shuttles are wanted, for the manufacture of garments, thin or thick, of flaxen, woollen, or other material, ought all of them to have the true form of the shuttle; and whatever is the shuttle best adapted to each kind of work, that ought to be the form which the maker produces in each case.

Hermogenes: Yes.

Socrates: And the same holds of other instruments: when a man has discovered the instrument which is naturally adapted to each work, he must express this natural form, and not others which he fancies, in the material, whatever it may be, which he employs; for example, he ought to know how to put into iron the forms of awls adapted by nature to their several uses?

Hermogenes: Certainly.

Socrates: And how to put into wood forms of shuttles adapted by nature to their uses?

Hermogenes: True.

Socrates: For the several forms of shuttles naturally answer to the several kinds of webs; and this is true of instruments in general.

Hermogenes: Yes.

Socrates: Then, as to names: ought not our legislator also to know how to put the true natural name of each thing into sounds and syllables, and to make and give all names with a view to the

ideal name, if he is to be a namer in any true sense? And we must remember that different legislators will not use the same syllables. For neither does every smith, although he may be making the same instrument for the same purpose, make them all of the same iron. The form must be the same, but the material may vary, and still the instrument may be equally good of whatever iron made, whether in Hellas or in a foreign country; — there is no difference.

Hermogenes: Very true.

Socrates: And the legislator, whether he be Hellene or barbarian, is not therefore to be deemed by you a worse legislator, provided he gives the true and proper form of the name in whatever syllables; this or that country makes no matter.

Hermogenes: Quite true.

Socrates: But who then is to determine whether the proper form is given to the shuttle, whatever sort of wood may be used? the carpenter who makes, or the weaver who is to use them?

Hermogenes: I should say, he who is to use them, Socrates.

Socrates: And who uses the work of the lyre-maker? Will not he be the man who knows how to direct what is being done, and who will know also whether the work is being well done or not?

Hermogenes: Certainly.

Socrates: And who is he?

Hermogenes: The player of the lyre.

Socrates: And who will direct the shipwright?

Hermogenes: The pilot.

Socrates: And who will be best able to direct the legislator in his work, and will know whether the work is well done, in this or any other country? Will not the user be the man?

Hermogenes: Yes.

Socrates: And this is he who knows how to ask questions?

Hermogenes: Yes.

Socrates: And how to answer them?

Hermogenes: Yes.

Socrates: And him who knows how to ask and answer you would call a dialectician?

Hermogenes: Yes; that would be his name.

Socrates: Then the work of the carpenter is to make a rudder, and the pilot has to direct him, if the rudder is to be well made.

Hermogenes: True.

Socrates: And the work of the legislator is to give names, and the dialectician must be his director if the names are to be rightly given?

Hermogenes: That is true.

Socrates: Then, Hermogenes, I should say that this giving of names can be no such light matter as you fancy, or the work of light or chance persons; and Cratylus is right in saying that things have names by nature, and that not every man is an artificer of names, but he only who looks to the name which each thing by nature has, and is able to express the true forms of things in letters and syllables.

Hermogenes: I cannot answer you, Socrates; but I find a difficulty in changing my opinion all in a moment, and I think that I should be more readily persuaded, if you would show me what this is which you term the natural fitness of names.

Socrates: My good Hermogenes, I have none to show. Was I not telling you just now (but you have forgotten), that I knew nothing, and proposing to share the enquiry with you? But now that you and I have talked over the matter, a step has been

gained; for we have discovered that names have by nature a truth, and that not every man knows how to give a thing a name.

Hermogenes: Very good.

Socrates: And what is the nature of this truth or correctness of names? That, if you care to know, is the next question.

Hermogenes: Certainly, I care to know.

Socrates: Then reflect.

Hermogenes: How shall I reflect?

Socrates: The true way is to have the assistance of those who know, and you must pay them well both in money and in thanks; these are the Sophists, of whom your brother, Callias, has — rather dearly — bought the reputation of wisdom. But you have not yet come into your inheritance, and therefore you had better go to him, and beg and entreat him to tell you what he has learnt from Protagoras about the fitness of names.

Hermogenes: But how inconsistent should I be, if, whilst repudiating Protagoras and his truth ('Truth' was the title of the book of Protagoras; compare Theaet.), I were to attach any value to what he and his book affirm!

Socrates: Then if you despise him, you must learn of Homer and the poets.

Hermogenes: And where does Homer say anything about names, and what does he say?

Socrates: He often speaks of them; notably and nobly in the places where he distinguishes the different names which Gods and men give to the same things. Does he not in these passages make a remarkable statement about the correctness of names? For the Gods must clearly be supposed to call things by their right and natural names; do you not think so?

Hermogenes: Why, of course they call them rightly, if they call them at all. But to what are you referring?

Socrates: Do you not know what he says about the river in Troy who had a single combat with Hephaestus?

‘Whom,’ as he says, ‘the Gods call Xanthus, and men call Scamander.’

Hermogenes: I remember.

Socrates: Well, and about this river — to know that he ought to be called Xanthus and not Scamander — is not that a solemn lesson? Or about the bird which, as he says,

‘The Gods call Chalcis, and men Cymindis:’

to be taught how much more correct the name Chalcis is than the name Cymindis — do you deem that a light matter? Or about Batieia and Myrina? (Compare Il. ‘The hill which men call Batieia and the immortals the tomb of the sportive Myrina.’) And there are many other observations of the same kind in Homer and other poets. Now, I think that this is beyond the understanding of you and me; but the names of Scamandrius and Astyanax, which he affirms to have been the names of Hector’s son, are more within the range of human faculties, as I am disposed to think; and what the poet means by correctness may be more readily apprehended in that instance: you will remember I dare say the lines to which I refer? (Il.)

Hermogenes: I do.

Socrates: Let me ask you, then, which did Homer think the more correct of the names given to Hector’s son — Astyanax or Scamandrius?

Hermogenes: I do not know.

Socrates: How would you answer, if you were asked whether the wise or the unwise are more likely to give correct names?

Hermogenes: I should say the wise, of course.

Socrates: And are the men or the women of a city, taken as a class, the wiser?

Hermogenes: I should say, the men.

Socrates: And Homer, as you know, says that the Trojan men called him Astyanax (king of the city); but if the men called him Astyanax, the other name of Scamandrius could only have been given to him by the women.

Hermogenes: That may be inferred.

Socrates: And must not Homer have imagined the Trojans to be wiser than their wives?

Hermogenes: To be sure.

Socrates: Then he must have thought Astyanax to be a more correct name for the boy than Scamandrius?

Hermogenes: Clearly.

Socrates: And what is the reason of this? Let us consider: — does he not himself suggest a very good reason, when he says,

'For he alone defended their city and long walls'?

This appears to be a good reason for calling the son of the saviour king of the city which his father was saving, as Homer observes.

Hermogenes: I see.

Socrates: Why, Hermogenes, I do not as yet see myself; and do you?

Hermogenes: No, indeed; not I.

Socrates: But tell me, friend, did not Homer himself also give Hector his name?

Hermogenes: What of that?

Socrates: The name appears to me to be very nearly the same as the name of Astyanax — both are Hellenic; and a king (anax) and a holder (ektor) have nearly the same meaning, and are both descriptive of a king; for a man is clearly the holder of that of which he is king; he rules, and owns, and holds it. But, perhaps,

you may think that I am talking nonsense; and indeed I believe that I myself did not know what I meant when I imagined that I had found some indication of the opinion of Homer about the correctness of names.

Hermogenes: I assure you that I think otherwise, and I believe you to be on the right track.

Socrates: There is reason, I think, in calling the lion's whelp a lion, and the foal of a horse a horse; I am speaking only of the ordinary course of nature, when an animal produces after his kind, and not of extraordinary births; — if contrary to nature a horse have a calf, then I should not call that a foal but a calf; nor do I call any inhuman birth a man, but only a natural birth. And the same may be said of trees and other things. Do you agree with me?

Hermogenes: Yes, I agree.

Socrates: Very good. But you had better watch me and see that I do not play tricks with you. For on the same principle the son of a king is to be called a king. And whether the syllables of the name are the same or not the same, makes no difference, provided the meaning is retained; nor does the addition or subtraction of a letter make any difference so long as the essence of the thing remains in possession of the name and appears in it.

Hermogenes: What do you mean?

Socrates: A very simple matter. I may illustrate my meaning by the names of letters, which you know are not the same as the letters themselves with the exception of the four epsilon, upsilon, omicron, omega; the names of the rest, whether vowels or consonants, are made up of other letters which we add to them; but so long as we introduce the meaning, and there can be no mistake, the name of the letter is quite correct. Take, for example, the letter beta — the addition of eta, tau, alpha, gives no offence, and does not prevent the whole name from having

the value which the legislator intended — so well did he know how to give the letters names.

Hermogenes: I believe you are right.

Socrates: And may not the same be said of a king? a king will often be the son of a king, the good son or the noble son of a good or noble sire; and similarly the offspring of every kind, in the regular course of nature, is like the parent, and therefore has the same name. Yet the syllables may be disguised until they appear different to the ignorant person, and he may not recognize them, although they are the same, just as any one of us would not recognize the same drugs under different disguises of colour and smell, although to the physician, who regards the power of them, they are the same, and he is not put out by the addition; and in like manner the etymologist is not put out by the addition or transposition or subtraction of a letter or two, or indeed by the change of all the letters, for this need not interfere with the meaning. As was just now said, the names of Hector and Astyanax have only one letter alike, which is tau, and yet they have the same meaning. And how little in common with the letters of their names has Archepolis (ruler of the city) — and yet the meaning is the same. And there are many other names which just mean ‘king.’ Again, there are several names for a general, as, for example, Agis (leader) and Polemarchus (chief in war) and Eupolemus (good warrior); and others which denote a physician, as Iatrocles (famous healer) and Acesimbrotus (curer of mortals); and there are many others which might be cited, differing in their syllables and letters, but having the same meaning. Would you not say so?

Hermogenes: Yes.

Socrates: The same names, then, ought to be assigned to those who follow in the course of nature?

Hermogenes: Yes.

Socrates: And what of those who follow out of the course of nature, and are prodigies? for example, when a good and religious man has an irreligious son, he ought to bear the name not of his father, but of the class to which he belongs, just as in the case which was before supposed of a horse foaling a calf.

Hermogenes: Quite true.

Socrates: Then the irreligious son of a religious father should be called irreligious?

Hermogenes: Certainly.

Socrates: He should not be called Theophilus (beloved of God) or Mnesitheus (mindful of God), or any of these names: if names are correctly given, his should have an opposite meaning.

Hermogenes: Certainly, Socrates.

Socrates: Again, Hermogenes, there is Orestes (the man of the mountains) who appears to be rightly called; whether chance gave the name, or perhaps some poet who meant to express the brutality and fierceness and mountain wildness of his hero's nature.

Hermogenes: That is very likely, Socrates.

Socrates: And his father's name is also according to nature.

Hermogenes: Clearly.

Socrates: Yes, for as his name, so also is his nature; Agamemnon (admirable for remaining) is one who is patient and persevering in the accomplishment of his resolves, and by his virtue crowns them; and his continuance at Troy with all the vast army is a proof of that admirable endurance in him which is signified by the name Agamemnon. I also think that Atreus is rightly called; for his murder of Chrysippus and his exceeding cruelty to Thyestes are damaging and destructive to his reputation — the name is a little altered and disguised so as not to be intelligible to every one, but to the etymologist there is no difficulty in seeing the meaning, for whether you think of him as ateires the

stubborn, or as atrestos the fearless, or as ateros the destructive one, the name is perfectly correct in every point of view. And I think that Pelops is also named appropriately; for, as the name implies, he is rightly called Pelops who sees what is near only (o ta pelas oron).

Hermogenes: How so?

Socrates: Because, according to the tradition, he had no forethought or foresight of all the evil which the murder of Myrtilus would entail upon his whole race in remote ages; he saw only what was at hand and immediate, — or in other words, pelas (near), in his eagerness to win Hippodamia by all means for his bride. Every one would agree that the name of Tantalus is rightly given and in accordance with nature, if the traditions about him are true.

Hermogenes: And what are the traditions?

Socrates: Many terrible misfortunes are said to have happened to him in his life — last of all, came the utter ruin of his country; and after his death he had the stone suspended (talanteia) over his head in the world below — all this agrees wonderfully well with his name. You might imagine that some person who wanted to call him Talantatos (the most weighted down by misfortune), disguised the name by altering it into Tantalus; and into this form, by some accident of tradition, it has actually been transmuted. The name of Zeus, who is his alleged father, has also an excellent meaning, although hard to be understood, because really like a sentence, which is divided into two parts, for some call him Zena, and use the one half, and others who use the other half call him Dia; the two together signify the nature of the God, and the business of a name, as we were saying, is to express the nature. For there is none who is more the author of life to us and to all, than the lord and king of all. Wherefore we are right in calling him Zena and Dia, which are one name, although divided, meaning the God through whom all creatures always have life (di on zen aei pasi tois zosin

uparchei). There is an irreverence, at first sight, in calling him son of Cronos (who is a proverb for stupidity), and we might rather expect Zeus to be the child of a mighty intellect. Which is the fact; for this is the meaning of his father's name: Kronos quasi Koros (Choreo, to sweep), not in the sense of a youth, but signifying to chatharon chai acheraton tou nou, the pure and garnished mind (sc. apo tou chorein). He, as we are informed by tradition, was begotten of Uranus, rightly so called (apo tou oran ta ano) from looking upwards; which, as philosophers tell us, is the way to have a pure mind, and the name Uranus is therefore correct. If I could remember the genealogy of Hesiod, I would have gone on and tried more conclusions of the same sort on the remoter ancestors of the Gods, — then I might have seen whether this wisdom, which has come to me all in an instant, I know not whence, will or will not hold good to the end.

Hermogenes: You seem to me, Socrates, to be quite like a prophet newly inspired, and to be uttering oracles.

Socrates: Yes, Hermogenes, and I believe that I caught the inspiration from the great Euthyphro of the Prospaltian deme, who gave me a long lecture which commenced at dawn: he talked and I listened, and his wisdom and enchanting ravishment has not only filled my ears but taken possession of my soul, and to-day I shall let his superhuman power work and finish the investigation of names — that will be the way; but to-morrow, if you are so disposed, we will conjure him away, and make a purgation of him, if we can only find some priest or sophist who is skilled in purifications of this sort.

Hermogenes: With all my heart; for am very curious to hear the rest of the enquiry about names.

Socrates: Then let us proceed; and where would you have us begin, now that we have got a sort of outline of the enquiry? Are there any names which witness of themselves that they are not given arbitrarily, but have a natural fitness? The names of heroes and of men in general are apt to be deceptive because

they are often called after ancestors with whose names, as we were saying, they may have no business; or they are the expression of a wish like Eutychides (the son of good fortune), or Sosias (the Saviour), or Theophilus (the beloved of God), and others. But I think that we had better leave these, for there will be more chance of finding correctness in the names of immutable essences; — there ought to have been more care taken about them when they were named, and perhaps there may have been some more than human power at work occasionally in giving them names.

Hermogenes: I think so, Socrates.

Socrates: Ought we not to begin with the consideration of the Gods, and show that they are rightly named Gods?

Hermogenes: Yes, that will be well.

Socrates: My notion would be something of this sort: — I suspect that the sun, moon, earth, stars, and heaven, which are still the Gods of many barbarians, were the only Gods known to the aboriginal Hellenes. Seeing that they were always moving and running, from their running nature they were called Gods or runners (Theous, Theontas); and when men became acquainted with the other Gods, they proceeded to apply the same name to them all. Do you think that likely?

Hermogenes: I think it very likely indeed.

Socrates: What shall follow the Gods?

Hermogenes: Must not demons and heroes and men come next?

Socrates: Demons! And what do you consider to be the meaning of this word? Tell me if my view is right.

Hermogenes: Let me hear.

Socrates: You know how Hesiod uses the word?

Hermogenes: I do not.

Socrates: Do you not remember that he speaks of a golden race of men who came first?

Hermogenes: Yes, I do.

Socrates: He says of them —

‘But now that fate has closed over this race They are holy demons upon the earth, Beneficent, averters of ills, guardians of mortal men.’ (Hesiod, Works and Days.)

Hermogenes: What is the inference?

Socrates: What is the inference! Why, I suppose that he means by the golden men, not men literally made of gold, but good and noble; and I am convinced of this, because he further says that we are the iron race.

Hermogenes: That is true.

Socrates: And do you not suppose that good men of our own day would by him be said to be of golden race?

Hermogenes: Very likely.

Socrates: And are not the good wise?

Hermogenes: Yes, they are wise.

Socrates: And therefore I have the most entire conviction that he called them demons, because they were daemones (knowing or wise), and in our older Attic dialect the word itself occurs. Now he and other poets say truly, that when a good man dies he has honour and a mighty portion among the dead, and becomes a demon; which is a name given to him signifying wisdom. And I say too, that every wise man who happens to be a good man is more than human (daimonion) both in life and death, and is rightly called a demon.

Hermogenes: Then I rather think that I am of one mind with you; but what is the meaning of the word ‘hero’? (Eros with an eta, in the old writing eros with an epsilon.)

Socrates: I think that there is no difficulty in explaining, for the name is not much altered, and signifies that they were born of love.

Hermogenes: What do you mean?

Socrates: Do you not know that the heroes are demigods?

Hermogenes: What then?

Socrates: All of them sprang either from the love of a God for a mortal woman, or of a mortal man for a Goddess; think of the word in the old Attic, and you will see better that the name heros is only a slight alteration of Eros, from whom the heroes sprang: either this is the meaning, or, if not this, then they must have been skilful as rhetoricians and dialecticians, and able to put the question (erotan), for eirein is equivalent to legein. And therefore, as I was saying, in the Attic dialect the heroes turn out to be rhetoricians and questioners. All this is easy enough; the noble breed of heroes are a tribe of sophists and rhetors. But can you tell me why men are called anthropoi? — that is more difficult.

Hermogenes: No, I cannot; and I would not try even if I could, because I think that you are the more likely to succeed.

Socrates: That is to say, you trust to the inspiration of Euthyphro.

Hermogenes: Of course.

Socrates: Your faith is not vain; for at this very moment a new and ingenious thought strikes me, and, if I am not careful, before to-morrow's dawn I shall be wiser than I ought to be. Now, attend to me; and first, remember that we often put in and pull out letters in words, and give names as we please and change the accents. Take, for example, the word Dii Philos; in order to convert this from a sentence into a noun, we omit one of the iotas and sound the middle syllable grave instead of acute; as, on the other hand, letters are sometimes inserted in

words instead of being omitted, and the acute takes the place of the grave.

Hermogenes: That is true.

Socrates: The name anthropos, which was once a sentence, and is now a noun, appears to be a case just of this sort, for one letter, which is the alpha, has been omitted, and the acute on the last syllable has been changed to a grave.

Hermogenes: What do you mean?

Socrates: I mean to say that the word ‘man’ implies that other animals never examine, or consider, or look up at what they see, but that man not only sees (opope) but considers and looks up at that which he sees, and hence he alone of all animals is rightly anthropos, meaning anathron a opopen.

Hermogenes: May I ask you to examine another word about which I am curious?

Socrates: Certainly.

Hermogenes: I will take that which appears to me to follow next in order. You know the distinction of soul and body?

Socrates: Of course.

Hermogenes: Let us endeavour to analyze them like the previous words.

Socrates: You want me first of all to examine the natural fitness of the word psuche (soul), and then of the word soma (body)?

Hermogenes: Yes.

Socrates: If I am to say what occurs to me at the moment, I should imagine that those who first used the name psuche meant to express that the soul when in the body is the source of life, and gives the power of breath and revival (anapsuchon), and when this reviving power fails then the body perishes and dies, and this, if I am not mistaken, they called psyche. But please stay a moment; I fancy that I can discover something

which will be more acceptable to the disciples of Euthyphro, for I am afraid that they will scorn this explanation. What do you say to another?

Hermogenes: Let me hear.

Socrates: What is that which holds and carries and gives life and motion to the entire nature of the body? What else but the soul?

Hermogenes: Just that.

Socrates: And do you not believe with Anaxagoras, that mind or soul is the ordering and containing principle of all things?

Hermogenes: Yes; I do.

Socrates: Then you may well call that power phuseche which carries and holds nature (e phusin okei, kai ekei), and this may be refined away into psuche.

Hermogenes: Certainly; and this derivation is, I think, more scientific than the other.

Socrates: It is so; but I cannot help laughing, if I am to suppose that this was the true meaning of the name.

Hermogenes: But what shall we say of the next word?

Socrates: You mean soma (the body).

Hermogenes: Yes.

Socrates: That may be variously interpreted; and yet more variously if a little permutation is allowed. For some say that the body is the grave (sema) of the soul which may be thought to be buried in our present life; or again the index of the soul, because the soul gives indications to (semainei) the body; probably the Orphic poets were the inventors of the name, and they were under the impression that the soul is suffering the punishment of sin, and that the body is an enclosure or prison in which the soul is incarcerated, kept safe (soma, sozetai), as the name soma implies, until the penalty is paid; according to this view, not even a letter of the word need be changed.

Hermogenes: I think, Socrates, that we have said enough of this class of words. But have we any more explanations of the names of the Gods, like that which you were giving of Zeus? I should like to know whether any similar principle of correctness is to be applied to them.

Socrates: Yes, indeed, Hermogenes; and there is one excellent principle which, as men of sense, we must acknowledge, — that of the Gods we know nothing, either of their natures or of the names which they give themselves; but we are sure that the names by which they call themselves, whatever they may be, are true. And this is the best of all principles; and the next best is to say, as in prayers, that we will call them by any sort or kind of names or patronymics which they like, because we do not know of any other. That also, I think, is a very good custom, and one which I should much wish to observe. Let us, then, if you please, in the first place announce to them that we are not enquiring about them; we do not presume that we are able to do so; but we are enquiring about the meaning of men in giving them these names, — in this there can be small blame.

Hermogenes: I think, Socrates, that you are quite right, and I would like to do as you say.

Socrates: Shall we begin, then, with Hestia, according to custom?

Hermogenes: Yes, that will be very proper.

Socrates: What may we suppose him to have meant who gave the name Hestia?

Hermogenes: That is another and certainly a most difficult question.

Socrates: My dear Hermogenes, the first imposers of names must surely have been considerable persons; they were philosophers, and had a good deal to say.

Hermogenes: Well, and what of them?

Socrates: They are the men to whom I should attribute the imposition of names. Even in foreign names, if you analyze them, a meaning is still discernible. For example, that which we term ousia is by some called esia, and by others again osia. Now that the essence of things should be called estia, which is akin to the first of these (esia = estia), is rational enough. And there is reason in the Athenians calling that estia which participates in ousia. For in ancient times we too seem to have said esia for ousia, and this you may note to have been the idea of those who appointed that sacrifices should be first offered to estia, which was natural enough if they meant that estia was the essence of things. Those again who read osia seem to have inclined to the opinion of Heracleitus, that all things flow and nothing stands; with them the pushing principle (othoun) is the cause and ruling power of all things, and is therefore rightly called osia. Enough of this, which is all that we who know nothing can affirm. Next in order after Hestia we ought to consider Rhea and Cronos, although the name of Cronos has been already discussed. But I dare say that I am talking great nonsense.

Hermogenes: Why, Socrates?

Socrates: My good friend, I have discovered a hive of wisdom.

Hermogenes: Of what nature?

Socrates: Well, rather ridiculous, and yet plausible.

Hermogenes: How plausible?

Socrates: I fancy to myself Heracleitus repeating wise traditions of antiquity as old as the days of Cronos and Rhea, and of which Homer also spoke.

Hermogenes: How do you mean?

Socrates: Heracleitus is supposed to say that all things are in motion and nothing at rest; he compares them to the stream of a river, and says that you cannot go into the same water twice.

Hermogenes: That is true.

Socrates: Well, then, how can we avoid inferring that he who gave the names of Cronos and Rhea to the ancestors of the Gods, agreed pretty much in the doctrine of Heracleitus? Is the giving of the names of streams to both of them purely accidental? Compare the line in which Homer, and, as I believe, Hesiod also, tells of

'Ocean, the origin of Gods, and mother Tethys (Il. — the line is not found in the extant works of Hesiod.).'

And again, Orpheus says, that

'The fair river of Ocean was the first to marry, and he espoused his sister Tethys, who was his mother's daughter.'

You see that this is a remarkable coincidence, and all in the direction of Heracleitus.

Hermogenes: I think that there is something in what you say, Socrates; but I do not understand the meaning of the name Tethys.

Socrates: Well, that is almost self-explained, being only the name of a spring, a little disguised; for that which is strained and filtered (diattomenon, ethoumenon) may be likened to a spring, and the name Tethys is made up of these two words.

Hermogenes: The idea is ingenious, Socrates.

Socrates: To be sure. But what comes next? — of Zeus we have spoken.

Hermogenes: Yes.

Socrates: Then let us next take his two brothers, Poseidon and Pluto, whether the latter is called by that or by his other name.

Hermogenes: By all means.

Socrates: Poseidon is Posidesmos, the chain of the feet; the original inventor of the name had been stopped by the watery element in his walks, and not allowed to go on, and therefore he called the ruler of this element Poseidon; the epsilon was

probably inserted as an ornament. Yet, perhaps, not so; but the name may have been originally written with a double lamda and not with a sigma, meaning that the God knew many things (Polla eidos). And perhaps also he being the shaker of the earth, has been named from shaking (seiein), and then pi and delta have been added. Pluto gives wealth (Ploutos), and his name means the giver of wealth, which comes out of the earth beneath. People in general appear to imagine that the term Hades is connected with the invisible (aeides) and so they are led by their fears to call the God Pluto instead.

Hermogenes: And what is the true derivation?

Socrates: In spite of the mistakes which are made about the power of this deity, and the foolish fears which people have of him, such as the fear of always being with him after death, and of the soul denuded of the body going to him (compare Rep.), my belief is that all is quite consistent, and that the office and name of the God really correspond.

Hermogenes: Why, how is that?

Socrates: I will tell you my own opinion; but first, I should like to ask you which chain does any animal feel to be the stronger? and which confines him more to the same spot, — desire or necessity?

Hermogenes: Desire, Socrates, is stronger far.

Socrates: And do you not think that many a one would escape from Hades, if he did not bind those who depart to him by the strongest of chains?

Hermogenes: Assuredly they would.

Socrates: And if by the greatest of chains, then by some desire, as I should certainly infer, and not by necessity?

Hermogenes: That is clear.

Socrates: And there are many desires?

Hermogenes: Yes.

Socrates: And therefore by the greatest desire, if the chain is to be the greatest?

Hermogenes: Yes.

Socrates: And is any desire stronger than the thought that you will be made better by associating with another?

Hermogenes: Certainly not.

Socrates: And is not that the reason, Hermogenes, why no one, who has been to him, is willing to come back to us? Even the Sirens, like all the rest of the world, have been laid under his spells. Such a charm, as I imagine, is the God able to infuse into his words. And, according to this view, he is the perfect and accomplished Sophist, and the great benefactor of the inhabitants of the other world; and even to us who are upon earth he sends from below exceeding blessings. For he has much more than he wants down there; wherefore he is called Pluto (or the rich). Note also, that he will have nothing to do with men while they are in the body, but only when the soul is liberated from the desires and evils of the body. Now there is a great deal of philosophy and reflection in that; for in their liberated state he can bind them with the desire of virtue, but while they are flustered and maddened by the body, not even father Cronos himself would suffice to keep them with him in his own far-famed chains.

Hermogenes: There is a deal of truth in what you say.

Socrates: Yes, Hermogenes, and the legislator called him Hades, not from the unseen (aeides) — far otherwise, but from his knowledge (eidenai) of all noble things.

Hermogenes: Very good; and what do we say of Demeter, and Here, and Apollo, and Athene, and Hephaestus, and Ares, and the other deities?

Socrates: Demeter is e didousa meter, who gives food like a mother; Here is the lovely one (erate) — for Zeus, according to tradition, loved and married her; possibly also the name may have been given when the legislator was thinking of the heavens, and may be only a disguise of the air (aer), putting the end in the place of the beginning. You will recognize the truth of this if you repeat the letters of Here several times over. People dread the name of Pherephatta as they dread the name of Apollo, — and with as little reason; the fear, if I am not mistaken, only arises from their ignorance of the nature of names. But they go changing the name into Phersephone, and they are terrified at this; whereas the new name means only that the Goddess is wise (sophe); for seeing that all things in the world are in motion (pheromenon), that principle which embraces and touches and is able to follow them, is wisdom. And therefore the Goddess may be truly called Pherepaphe (Pherepapha), or some name like it, because she touches that which is in motion (tou pheromenon ephaptomene), herein showing her wisdom. And Hades, who is wise, consorts with her, because she is wise. They alter her name into Pherephatta now-a-days, because the present generation care for euphony more than truth. There is the other name, Apollo, which, as I was saying, is generally supposed to have some terrible signification. Have you remarked this fact?

Hermogenes: To be sure I have, and what you say is true.

Socrates: But the name, in my opinion, is really most expressive of the power of the God.

Hermogenes: How so?

Socrates: I will endeavour to explain, for I do not believe that any single name could have been better adapted to express the attributes of the God, embracing and in a manner signifying all four of them, — music, and prophecy, and medicine, and archery.

Hermogenes: That must be a strange name, and I should like to hear the explanation.

Socrates: Say rather an harmonious name, as beseems the God of Harmony. In the first place, the purgations and purifications which doctors and diviners use, and their fumigations with drugs magical or medicinal, as well as their washings and lustral sprinklings, have all one and the same object, which is to make a man pure both in body and soul.

Hermogenes: Very true.

Socrates: And is not Apollo the purifier, and the washer, and the absolver from all impurities?

Hermogenes: Very true.

Socrates: Then in reference to his ablutions and absolutions, as being the physician who orders them, he may be rightly called Apolouon (purifier); or in respect of his powers of divination, and his truth and sincerity, which is the same as truth, he may be most fitly called Aplos, from aplous (sincere), as in the Thessalian dialect, for all the Thessalians call him Aplos; also he is aei Ballon (always shooting), because he is a master archer who never misses; or again, the name may refer to his musical attributes, and then, as in akolouthos, and akoitis, and in many other words the alpha is supposed to mean 'together,' so the meaning of the name Apollo will be 'moving together,' whether in the poles of heaven as they are called, or in the harmony of song, which is termed concord, because he moves all together by an harmonious power, as astronomers and musicians ingeniously declare. And he is the God who presides over harmony, and makes all things move together, both among Gods and among men. And as in the words akolouthos and akoitis the alpha is substituted for an omicron, so the name Apollon is equivalent to omopolon; only the second lambda is added in order to avoid the ill-omened sound of destruction (apolon). Now the suspicion of this destructive power still haunts the minds of

some who do not consider the true value of the name, which, as I was saying just now, has reference to all the powers of the God, who is the single one, the everdarting, the purifier, the mover together (aplous, aei Ballon, apolouon, omopolon). The name of the Muses and of music would seem to be derived from their making philosophical enquiries (mosthai); and Leto is called by this name, because she is such a gentle Goddess, and so willing (ethelemon) to grant our requests; or her name may be Letho, as she is often called by strangers — they seem to imply by it her amiability, and her smooth and easy-going way of behaving. Artemis is named from her healthy (artemes), well-ordered nature, and because of her love of virginity, perhaps because she is a proficient in virtue (arete), and perhaps also as hating intercourse of the sexes (ton aroton misesasa). He who gave the Goddess her name may have had any or all of these reasons.

Hermogenes: What is the meaning of Dionysus and Aphrodite?

Socrates: Son of Hipponicus, you ask a solemn question; there is a serious and also a facetious explanation of both these names; the serious explanation is not to be had from me, but there is no objection to your hearing the facetious one; for the Gods too love a joke. Dionusos is simply didous oinon (giver of wine), Didoinusos, as he might be called in fun, — and oinos is properly oionous, because wine makes those who drink, think (oiesthai) that they have a mind (noun) when they have none. The derivation of Aphrodite, born of the foam (aphros), may be fairly accepted on the authority of Hesiod.

Hermogenes: Still there remains Athene, whom you, Socrates, as an Athenian, will surely not forget; there are also Hephaestus and Ares.

Socrates: I am not likely to forget them.

Hermogenes: No, indeed.

Socrates: There is no difficulty in explaining the other appellation of Athene.

Hermogenes: What other appellation?

Socrates: We call her Pallas.

Hermogenes: To be sure.

Socrates: And we cannot be wrong in supposing that this is derived from armed dances. For the elevation of oneself or anything else above the earth, or by the use of the hands, we call shaking (pallein), or dancing.

Hermogenes: That is quite true.

Socrates: Then that is the explanation of the name Pallas?

Hermogenes: Yes; but what do you say of the other name?

Socrates: Athene?

Hermogenes: Yes.

Socrates: That is a graver matter, and there, my friend, the modern interpreters of Homer may, I think, assist in explaining the view of the ancients. For most of these in their explanations of the poet, assert that he meant by Athene ‘mind’ (nous) and ‘intelligence’ (dianoia), and the maker of names appears to have had a singular notion about her; and indeed calls her by a still higher title, ‘divine intelligence’ (Thou noesis), as though he would say: This is she who has the mind of God (Theonoa); — using alpha as a dialectical variety for eta, and taking away iota and sigma (There seems to be some error in the MSS. The meaning is that the word theonoa = theounoa is a curtailed form of theou noesis, but the omitted letters do not agree.). Perhaps, however, the name Theonoe may mean ‘she who knows divine things’ (Theia noousa) better than others. Nor shall we be far wrong in supposing that the author of it wished to identify this Goddess with moral intelligence (en ethei noesin), and therefore gave her the name ethonoe; which, however, either he or his successors have altered into what they thought a nicer form,

and called her Athene.

Hermogenes: But what do you say of Hephaestus?

Socrates: Speak you of the princely lord of light (Phaeos istora)?

Hermogenes: Surely.

Socrates: Ephaistos is Phaistos, and has added the eta by attraction; that is obvious to anybody.

Hermogenes: That is very probable, until some more probable notion gets into your head.

Socrates: To prevent that, you had better ask what is the derivation of Ares.

Hermogenes: What is Ares?

Socrates: Ares may be called, if you will, from his manhood (arren) and manliness, or if you please, from his hard and unchangeable nature, which is the meaning of arratos: the latter is a derivation in every way appropriate to the God of war.

Hermogenes: Very true.

Socrates: And now, by the Gods, let us have no more of the Gods, for I am afraid of them; ask about anything but them, and thou shalt see how the steeds of Euthyphro can prance.

Hermogenes: Only one more God! I should like to know about Hermes, of whom I am said not to be a true son. Let us make him out, and then I shall know whether there is any meaning in what Cratylus says.

Socrates: I should imagine that the name Hermes has to do with speech, and signifies that he is the interpreter (ermeneus), or messenger, or thief, or liar, or bargainer; all that sort of thing has a great deal to do with language; as I was telling you, the word eirein is expressive of the use of speech, and there is an often-recurring Homeric word emesato, which means ‘he contrived’ — out of these two words, eirein and mesasthai, the legislator formed the name of the God who invented language

and speech; and we may imagine him dictating to us the use of this name: ‘O my friends,’ says he to us, ‘seeing that he is the contriver of tales or speeches, you may rightly call him Eirhemes.’ And this has been improved by us, as we think, into Hermes. Iris also appears to have been called from the verb ‘to tell’ (eirein), because she was a messenger.

Hermogenes: Then I am very sure that Cratylus was quite right in saying that I was no true son of Hermes (Ermogenes), for I am not a good hand at speeches.

Socrates: There is also reason, my friend, in Pan being the double-formed son of Hermes.

Hermogenes: How do you make that out?

Socrates: You are aware that speech signifies all things (pan), and is always turning them round and round, and has two forms, true and false?

Hermogenes: Certainly.

Socrates: Is not the truth that is in him the smooth or sacred form which dwells above among the Gods, whereas falsehood dwells among men below, and is rough like the goat of tragedy; for tales and falsehoods have generally to do with the tragic or goatish life, and tragedy is the place of them?

Hermogenes: Very true.

Socrates: Then surely Pan, who is the declarer of all things (pan) and the perpetual mover (aei polon) of all things, is rightly called aipolos (goat-herd), he being the two-formed son of Hermes, smooth in his upper part, and rough and goatlike in his lower regions. And, as the son of Hermes, he is speech or the brother of speech, and that brother should be like brother is no marvel. But, as I was saying, my dear Hermogenes, let us get away from the Gods.

Hermogenes: From these sort of Gods, by all means, Socrates. But why should we not discuss another kind of Gods — the sun,

moon, stars, earth, aether, air, fire, water, the seasons, and the year?

Socrates: You impose a great many tasks upon me. Still, if you wish, I will not refuse.

Hermogenes: You will oblige me.

Socrates: How would you have me begin? Shall I take first of all him whom you mentioned first — the sun?

Hermogenes: Very good.

Socrates: The origin of the sun will probably be clearer in the Doric form, for the Dorians call him alios, and this name is given to him because when he rises he gathers (alizoi) men together or because he is always rolling in his course (aei eilein ion) about the earth; or from aiolein, of which the meaning is the same as poikillein (to variegate), because he variegates the productions of the earth.

Hermogenes: But what is selene (the moon)?

Socrates: That name is rather unfortunate for Anaxagoras.

Hermogenes: How so?

Socrates: The word seems to forestall his recent discovery, that the moon receives her light from the sun.

Hermogenes: Why do you say so?

Socrates: The two words selas (brightness) and phos (light) have much the same meaning?

Hermogenes: Yes.

Socrates: This light about the moon is always new (neon) and always old (enon), if the disciples of Anaxagoras say truly. For the sun in his revolution always adds new light, and there is the old light of the previous month.

Hermogenes: Very true.

Socrates: The moon is not unfrequently called selanaia.

Hermogenes: True.

Socrates: And as she has a light which is always old and always new (enon neon aei) she may very properly have the name selaenoneoaeia; and this when hammered into shape becomes selanaia.

Hermogenes: A real dithyrambic sort of name that, Socrates. But what do you say of the month and the stars?

Socrates: Meis (month) is called from meiousthai (to lessen), because suffering diminution; the name of astra (stars) seems to be derived from astrape, which is an improvement on anastrope, signifying the upsetting of the eyes (anastrephein opa).

Hermogenes: What do you say of pur (fire) and udor (water)?

Socrates: I am at a loss how to explain pur; either the muse of Euthyphro has deserted me, or there is some very great difficulty in the word. Please, however, to note the contrivance which I adopt whenever I am in a difficulty of this sort.

Hermogenes: What is it?

Socrates: I will tell you; but I should like to know first whether you can tell me what is the meaning of the pur?

Hermogenes: Indeed I cannot.

Socrates: Shall I tell you what I suspect to be the true explanation of this and several other words? — My belief is that they are of foreign origin. For the Hellenes, especially those who were under the dominion of the barbarians, often borrowed from them.

Hermogenes: What is the inference?

Socrates: Why, you know that any one who seeks to demonstrate the fitness of these names according to the Hellenic language, and not according to the language from which the words are derived, is rather likely to be at fault.

Hermogenes: Yes, certainly.

Socrates: Well then, consider whether this pur is not foreign; for the word is not easily brought into relation with the Hellenic tongue, and the Phrygians may be observed to have the same word slightly changed, just as they have udor (water) and kunes (dogs), and many other words.

Hermogenes: That is true.

Socrates: Any violent interpretations of the words should be avoided; for something to say about them may easily be found. And thus I get rid of pur and udor. Aer (air), Hermogenes, may be explained as the element which raises (airei) things from the earth, or as ever flowing (aei rei), or because the flux of the air is wind, and the poets call the winds 'air-blasts,' (aetai); he who uses the term may mean, so to speak, air-flux (aetorroun), in the sense of wind-flux (pneumatorroun); and because this moving wind may be expressed by either term he employs the word air (aer = aetes rheo). Aither (aether) I should interpret as aeitheer; this may be correctly said, because this element is always running in a flux about the air (aei thei peri tou aera reon). The meaning of the word ge (earth) comes out better when in the form of gaia, for the earth may be truly called 'mother' (gaia, genneteira), as in the language of Homer (Od.) gegaasi means gegennesthai.

Hermogenes: Good.

Socrates: What shall we take next?

Hermogenes: There are orai (the seasons), and the two names of the year, eniautos and etos.

Socrates: The orai should be spelt in the old Attic way, if you desire to know the probable truth about them; they are rightly called the orai because they divide (orizousin) the summers and winters and winds and the fruits of the earth. The words eniautos and etos appear to be the same,— 'that which brings to light the plants and growths of the earth in their turn, and passes them in review within itself (en eauto exetazei)': this is

broken up into two words, eniautos from en eauto, and etos from etazei, just as the original name of Zeus was divided into Zena and Dia; and the whole proposition means that his power of reviewing from within is one, but has two names, two words etos and eniautos being thus formed out of a single proposition.

Hermogenes: Indeed, Socrates, you make surprising progress.

Socrates: I am run away with.

Hermogenes: Very true.

Socrates: But am not yet at my utmost speed.

Hermogenes: I should like very much to know, in the next place, how you would explain the virtues. What principle of correctness is there in those charming words — wisdom, understanding, justice, and the rest of them?

Socrates: That is a tremendous class of names which you are disinterring; still, as I have put on the lion's skin, I must not be faint of heart; and I suppose that I must consider the meaning of wisdom (phronesis) and understanding (sunesis), and judgment (gnome), and knowledge (episteme), and all those other charming words, as you call them?

Hermogenes: Surely, we must not leave off until we find out their meaning.

Socrates: By the dog of Egypt I have a not bad notion which came into my head only this moment: I believe that the primeval givers of names were undoubtedly like too many of our modern philosophers, who, in their search after the nature of things, are always getting dizzy from constantly going round and round, and then they imagine that the world is going round and round and moving in all directions; and this appearance, which arises out of their own internal condition, they suppose to be a reality of nature; they think that there is nothing stable or permanent, but only flux and motion, and that the world is always full of every sort of motion and change. The consideration of the

names which I mentioned has led me into making this reflection.

Hermogenes: How is that, Socrates?

Socrates: Perhaps you did not observe that in the names which have been just cited, the motion or flux or generation of things is most surely indicated.

Hermogenes: No, indeed, I never thought of it.

Socrates: Take the first of those which you mentioned; clearly that is a name indicative of motion.

Hermogenes: What was the name?

Socrates: Phronesis (wisdom), which may signify phoras kai rhou noesis (perception of motion and flux), or perhaps phoras onesis (the blessing of motion), but is at any rate connected with pheresthai (motion); gnome (judgment), again, certainly implies the ponderation or consideration (nomesis) of generation, for to ponder is the same as to consider; or, if you would rather, here is noesis, the very word just now mentioned, which is neou esis (the desire of the new); the word neos implies that the world is always in process of creation. The giver of the name wanted to express this longing of the soul, for the original name was neoesis, and not noesis; but eta took the place of a double epsilon. The word sophrosune is the salvation (soteria) of that wisdom (phronesis) which we were just now considering. Epioteme (knowledge) is akin to this, and indicates that the soul which is good for anything follows (epetai) the motion of things, neither anticipating them nor falling behind them; wherefore the word should rather be read as epistemene, inserting epsilon nu. Sunesis (understanding) may be regarded in like manner as a kind of conclusion; the word is derived from sunienai (to go along with), and, like epistasthai (to know), implies the progression of the soul in company with the nature of things. Sophia (wisdom) is very dark, and appears not to be of native growth; the meaning is, touching the motion or stream of things. You must remember that the poets, when they speak of the

commencement of any rapid motion, often use the word esuthe (he rushed); and there was a famous Lacedaemonian who was named Sous (Rush), for by this word the Lacedaemonians signify rapid motion, and the touching (epaphe) of motion is expressed by sophia, for all things are supposed to be in motion. Good (agathon) is the name which is given to the admirable (agasto) in nature; for, although all things move, still there are degrees of motion; some are swifter, some slower; but there are some things which are admirable for their swiftness, and this admirable part of nature is called agathon. Dikaiosune (justice) is clearly dikaiou sunesis (understanding of the just); but the actual word dikaion is more difficult: men are only agreed to a certain extent about justice, and then they begin to disagree. For those who suppose all things to be in motion conceive the greater part of nature to be a mere receptacle; and they say that there is a penetrating power which passes through all this, and is the instrument of creation in all, and is the subtlest and swiftest element; for if it were not the subtlest, and a power which none can keep out, and also the swiftest, passing by other things as if they were standing still, it could not penetrate through the moving universe. And this element, which superintends all things and pierces (diaion) all, is rightly called dikaion; the letter k is only added for the sake of euphony. Thus far, as I was saying, there is a general agreement about the nature of justice; but I, Hermogenes, being an enthusiastic disciple, have been told in a mystery that the justice of which I am speaking is also the cause of the world: now a cause is that because of which anything is created; and some one comes and whispers in my ear that justice is rightly so called because partaking of the nature of the cause, and I begin, after hearing what he has said, to interrogate him gently: ‘Well, my excellent friend,’ say I, ‘but if all this be true, I still want to know what is justice.’ Thereupon they think that I ask tiresome questions, and am leaping over the barriers, and have been already sufficiently answered, and they try to satisfy me with one derivation after

another, and at length they quarrel. For one of them says that justice is the sun, and that he only is the piercing (diaionta) and burning (kaonta) element which is the guardian of nature. And when I joyfully repeat this beautiful notion, I am answered by the satirical remark, 'What, is there no justice in the world when the sun is down?' And when I earnestly beg my questioner to tell me his own honest opinion, he says, 'Fire in the abstract'; but this is not very intelligible. Another says, 'No, not fire in the abstract, but the abstraction of heat in the fire.' Another man professes to laugh at all this, and says, as Anaxagoras says, that justice is mind, for mind, as they say, has absolute power, and mixes with nothing, and orders all things, and passes through all things. At last, my friend, I find myself in far greater perplexity about the nature of justice than I was before I began to learn. But still I am of opinion that the name, which has led me into this digression, was given to justice for the reasons which I have mentioned.

Hermogenes: I think, Socrates, that you are not improvising now; you must have heard this from some one else.

Socrates: And not the rest?

Hermogenes: Hardly.

Socrates: Well, then, let me go on in the hope of making you believe in the originality of the rest. What remains after justice? I do not think that we have as yet discussed courage (andreia), — injustice (adikia), which is obviously nothing more than a hindrance to the penetrating principle (diaiontos), need not be considered. Well, then, the name of andreia seems to imply a battle; — this battle is in the world of existence, and according to the doctrine of flux is only the counterflux (enantia rhon): if you extract the delta from andreia, the name at once signifies the thing, and you may clearly understand that andreia is not the stream opposed to every stream, but only to that which is contrary to justice, for otherwise courage would not have been praised. The words arren (male) and aner (man) also contain a

similar allusion to the same principle of the upward flux (te ano rhon). Gune (woman) I suspect to be the same word as goun (birth): thelu (female) appears to be partly derived from thele (the teat), because the teat is like rain, and makes things flourish (tethelenai).

Hermogenes: That is surely probable.

Socrates: Yes; and the very word thallein (to flourish) seems to figure the growth of youth, which is swift and sudden ever. And this is expressed by the legislator in the name, which is a compound of thein (running), and allesthai (leaping). Pray observe how I gallop away when I get on smooth ground. There are a good many names generally thought to be of importance, which have still to be explained.

Hermogenes: True.

Socrates: There is the meaning of the word techne (art), for example.

Hermogenes: Very true.

Socrates: That may be identified with echonoe, and expresses the possession of mind: you have only to take away the tau and insert two omichrons, one between the chi and nu, and another between the nu and eta.

Hermogenes: That is a very shabby etymology.

Socrates: Yes, my dear friend; but then you know that the original names have been long ago buried and disguised by people sticking on and stripping off letters for the sake of euphony, and twisting and bedizening them in all sorts of ways: and time too may have had a share in the change. Take, for example, the word katoptron; why is the letter rho inserted? This must surely be the addition of some one who cares nothing about the truth, but thinks only of putting the mouth into shape. And the additions are often such that at last no human being can possibly make out the original meaning of the word. Another

example is the word sphigx, sphiggos, which ought properly to be phigx, phiggos, and there are other examples.

Hermogenes: That is quite true, Socrates.

Socrates: And yet, if you are permitted to put in and pull out any letters which you please, names will be too easily made, and any name may be adapted to any object.

Hermogenes: True.

Socrates: Yes, that is true. And therefore a wise dictator, like yourself, should observe the laws of moderation and probability.

Hermogenes: Such is my desire.

Socrates: And mine, too, Hermogenes. But do not be too much of a precisian, or 'you will unnerve me of my strength (Iliad.).' When you have allowed me to add mechane (contrivance) to techne (art) I shall be at the top of my bent, for I conceive mechane to be a sign of great accomplishment — anein; for mekos has the meaning of greatness, and these two, mekos and anein, make up the word mechane. But, as I was saying, being now at the top of my bent, I should like to consider the meaning of the two words arete (virtue) and kakia (vice); arete I do not as yet understand, but kakia is transparent, and agrees with the principles which preceded, for all things being in a flux (ionton), kakia is kakos ion (going badly); and this evil motion when existing in the soul has the general name of kakia, or vice, specially appropriated to it. The meaning of kakos ienai may be further illustrated by the use of deilia (cowardice), which ought to have come after andreia, but was forgotten, and, as I fear, is not the only word which has been passed over. Deilia signifies that the soul is bound with a strong chain (desmos), for lian means strength, and therefore deilia expresses the greatest and strongest bond of the soul; and aporia (difficulty) is an evil of the same nature (from a (alpha) not, and poreuesthai to go), like anything else which is an impediment to motion and movement. Then the word kakia appears to mean kakos ienai, or going

badly, or limping and halting; of which the consequence is, that the soul becomes filled with vice. And if kakia is the name of this sort of thing, arete will be the opposite of it, signifying in the first place ease of motion, then that the stream of the good soul is unimpeded, and has therefore the attribute of ever flowing without let or hindrance, and is therefore called arete, or, more correctly, aeireite (ever-flowing), and may perhaps have had another form, airete (eligible), indicating that nothing is more eligible than virtue, and this has been hammered into arete. I daresay that you will deem this to be another invention of mine, but I think that if the previous word kakia was right, then arete is also right.

Hermogenes: But what is the meaning of kakon, which has played so great a part in your previous discourse?

Socrates: That is a very singular word about which I can hardly form an opinion, and therefore I must have recourse to my ingenious device.

Hermogenes: What device?

Socrates: The device of a foreign origin, which I shall give to this word also.

Hermogenes: Very likely you are right; but suppose that we leave these words and endeavour to see the rationale of kalon and aischron.

Socrates: The meaning of aischron is evident, being only aei ischon roes (always preventing from flowing), and this is in accordance with our former derivations. For the name-giver was a great enemy to stagnation of all sorts, and hence he gave the name aeischoroun to that which hindered the flux (aei ischon roun), and that is now beaten together into aischron.

Hermogenes: But what do you say of kalon?

Socrates: That is more obscure; yet the form is only due to the quantity, and has been changed by altering omicron upsilon into

omicron.

Hermogenes: What do you mean?

Socrates: This name appears to denote mind.

Hermogenes: How so?

Socrates: Let me ask you what is the cause why anything has a name; is not the principle which imposes the name the cause?

Hermogenes: Certainly.

Socrates: And must not this be the mind of Gods, or of men, or of both?

Hermogenes: Yes.

Socrates: Is not mind that which called (kalesan) things by their names, and is not mind the beautiful (kalon)?

Hermogenes: That is evident.

Socrates: And are not the works of intelligence and mind worthy of praise, and are not other works worthy of blame?

Hermogenes: Certainly.

Socrates: Physic does the work of a physician, and carpentering does the works of a carpenter?

Hermogenes: Exactly.

Socrates: And the principle of beauty does the works of beauty?

Hermogenes: Of course.

Socrates: And that principle we affirm to be mind?

Hermogenes: Very true.

Socrates: Then mind is rightly called beauty because she does the works which we recognize and speak of as the beautiful?

Hermogenes: That is evident.

Socrates: What more names remain to us?

Hermogenes: There are the words which are connected with agathon and kalon, such as sumpheron and lusiteloun, ophelimon, kerdaleon, and their opposites.

Socrates: The meaning of sumpheron (expedient) I think that you may discover for yourself by the light of the previous examples, — for it is a sister word to episteme, meaning just the motion (pora) of the soul accompanying the world, and things which are done upon this principle are called sumphora or sumpheronta, because they are carried round with the world.

Hermogenes: That is probable.

Socrates: Again, cherdaleon (gainful) is called from cherdos (gain), but you must alter the delta into nu if you want to get at the meaning; for this word also signifies good, but in another way; he who gave the name intended to express the power of admixture (kerannumenon) and universal penetration in the good; in forming the word, however, he inserted a delta instead of a nu, and so made kerdos.

Hermogenes: Well, but what is lusiteloun (profitable)?

Socrates: I suppose, Hermogenes, that people do not mean by the profitable the gainful or that which pays (luei) the retailer, but they use the word in the sense of swift. You regard the profitable (lusiteloun), as that which being the swiftest thing in existence, allows of no stay in things and no pause or end of motion, but always, if there begins to be any end, lets things go again (luei), and makes motion immortal and unceasing: and in this point of view, as appears to me, the good is happily denominated lusiteloun — being that which looses (luon) the end (telos) of motion. Ophelimon (the advantageous) is derived from ophellein, meaning that which creates and increases; this latter is a common Homeric word, and has a foreign character.

Hermogenes: And what do you say of their opposites?

Socrates: Of such as are mere negatives I hardly think that I need speak.

Hermogenes: Which are they?

Socrates: The words axumphoron (inexpedient), anopheles (unprofitable), alusiteles (unadvantageous), akerdes (ungainful).

Hermogenes: True.

Socrates: I would rather take the words blaberon (harmful), zemiodes (hurtful).

Hermogenes: Good.

Socrates: The word blaberon is that which is said to hinder or harm (blaptein) the stream (roun); blapton is boulomenon aptein (seeking to hold or bind); for aptein is the same as dein, and dein is always a term of censure; boulomenon aptein roun (wanting to bind the stream) would properly be boulapteroun, and this, as I imagine, is improved into blaberon.

Hermogenes: You bring out curious results, Socrates, in the use of names; and when I hear the word boulapteroun I cannot help imagining that you are making your mouth into a flute, and puffing away at some prelude to Athene.

Socrates: That is the fault of the makers of the name, Hermogenes; not mine.

Hermogenes: Very true; but what is the derivation of zemiodes?

Socrates: What is the meaning of zemiodes? — let me remark, Hermogenes, how right I was in saying that great changes are made in the meaning of words by putting in and pulling out letters; even a very slight permutation will sometimes give an entirely opposite sense; I may instance the word deon, which occurs to me at the moment, and reminds me of what I was going to say to you, that the fine fashionable language of modern times has twisted and disguised and entirely altered the original meaning both of deon, and also of zemiodes, which in the old language is clearly indicated.

Hermogenes: What do you mean?

Socrates: I will try to explain. You are aware that our forefathers loved the sounds iota and delta, especially the women, who are most conservative of the ancient language, but now they change iota into eta or epsilon, and delta into zeta; this is supposed to increase the grandeur of the sound.

Hermogenes: How do you mean?

Socrates: For example, in very ancient times they called the day either imera or emera (short e), which is called by us emera (long e).

Hermogenes: That is true.

Socrates: Do you observe that only the ancient form shows the intention of the giver of the name? of which the reason is, that men long for (imeirousi) and love the light which comes after the darkness, and is therefore called imera, from imeros, desire.

Hermogenes: Clearly.

Socrates: But now the name is so travestied that you cannot tell the meaning, although there are some who imagine the day to be called emera because it makes things gentle (emera different accents).

Hermogenes: Such is my view.

Socrates: And do you know that the ancients said duogon and not zugon?

Hermogenes: They did so.

Socrates: And zugon (yoke) has no meaning, — it ought to be duogon, which word expresses the binding of two together (duein agoge) for the purpose of drawing; — this has been changed into zugon, and there are many other examples of similar changes.

Hermogenes: There are.

Socrates: Proceeding in the same train of thought I may remark that the word deon (obligation) has a meaning which is the

opposite of all the other appellations of good; for deon is here a species of good, and is, nevertheless, the chain (desmos) or hinderer of motion, and therefore own brother of blaberon.

Hermogenes: Yes, Socrates; that is quite plain.

Socrates: Not if you restore the ancient form, which is more likely to be the correct one, and read dion instead of deon; if you convert the epsilon into an iota after the old fashion, this word will then agree with other words meaning good; for dion, not deon, signifies the good, and is a term of praise; and the author of names has not contradicted himself, but in all these various appellations, deon (obligatory), ophelimon (advantageous), lusiteloun (profitable), kerdaleon (gainful), agathon (good), sumpheron (expedient), euporon (plenteous), the same conception is implied of the ordering or all-pervading principle which is praised, and the restraining and binding principle which is censured. And this is further illustrated by the word zemiodes (hurtful), which if the zeta is only changed into delta as in the ancient language, becomes demiodes; and this name, as you will perceive, is given to that which binds motion (dounti ion).

Hermogenes: What do you say of edone (pleasure), lupe (pain), epithumia (desire), and the like, Socrates?

Socrates: I do not think, Hermogenes, that there is any great difficulty about them — edone is e (eta) onesis, the action which tends to advantage; and the original form may be supposed to have been eone, but this has been altered by the insertion of the delta. Lupe appears to be derived from the relaxation (luein) which the body feels when in sorrow; ania (trouble) is the hindrance of motion (alpha and ienai); algedon (distress), if I am not mistaken, is a foreign word, which is derived from aleinos (grievous); odune (grief) is called from the putting on (endusis) sorrow; in achthedon (vexation) ‘the word too labours,’ as any one may see; chara (joy) is the very expression of the fluency and diffusion of the soul (cheo); terpsis (delight) is so called

from the pleasure creeping (erpon) through the soul, which may be likened to a breath (pnoe) and is properly erpnoun, but has been altered by time into terpnon; eupherosune (cheerfulness) and epithumia explain themselves; the former, which ought to be eupherosune and has been changed euphrosune, is named, as every one may see, from the soul moving (pheresthai) in harmony with nature; epithumia is really e epi ton thumon iousa dunamis, the power which enters into the soul; thumos (passion) is called from the rushing (thuseos) and boiling of the soul; imeros (desire) denotes the stream (rous) which most draws the soul dia ten esin tes roes — because flowing with desire (iemenos), and expresses a longing after things and violent attraction of the soul to them, and is termed imeros from possessing this power; pothos (longing) is expressive of the desire of that which is not present but absent, and in another place (pou); this is the reason why the name pothos is applied to things absent, as imeros is to things present; eros (love) is so called because flowing in (esron) from without; the stream is not inherent, but is an influence introduced through the eyes, and from flowing in was called esros (influx) in the old time when they used omicron for omega, and is called eros, now that omega is substituted for omicron. But why do you not give me another word?

Hermogenes: What do you think of doxa (opinion), and that class of words?

Socrates: Doxa is either derived from dioxis (pursuit), and expresses the march of the soul in the pursuit of knowledge, or from the shooting of a bow (toxon); the latter is more likely, and is confirmed by oiesis (thinking), which is only oisis (moving), and implies the movement of the soul to the essential nature of each thing — just as boule (counsel) has to do with shooting (bole); and boulesthai (to wish) combines the notion of aiming and deliberating — all these words seem to follow doxa, and all involve the idea of shooting, just as aboulia, absence of counsel,

on the other hand, is a mishap, or missing, or mistaking of the mark, or aim, or proposal, or object.

Hermogenes: You are quickening your pace now, Socrates.

Socrates: Why yes, the end I now dedicate to God, not, however, until I have explained anagke (necessity), which ought to come next, and ekousion (the voluntary). Ekousion is certainly the yielding (eikon) and unresisting — the notion implied is yielding and not opposing, yielding, as I was just now saying, to that motion which is in accordance with our will; but the necessary and resistant being contrary to our will, implies error and ignorance; the idea is taken from walking through a ravine which is impassable, and rugged, and overgrown, and impedes motion — and this is the derivation of the word anagkaion (necessary) an agke ion, going through a ravine. But while my strength lasts let us persevere, and I hope that you will persevere with your questions.

Hermogenes: Well, then, let me ask about the greatest and noblest, such as aletheia (truth) and pseudos (falsehood) and on (being), not forgetting to enquire why the word onoma (name), which is the theme of our discussion, has this name of onoma.

Socrates: You know the word maiesthai (to seek)?

Hermogenes: Yes; — meaning the same as zetein (to enquire).

Socrates: The word onoma seems to be a compressed sentence, signifying on ou zetema (being for which there is a search); as is still more obvious in onomaston (notable), which states in so many words that real existence is that for which there is a seeking (on ou masma); aletheia is also an agglomeration of theia ale (divine wandering), implying the divine motion of existence; pseudos (falsehood) is the opposite of motion; here is another ill name given by the legislator to stagnation and forced inaction, which he compares to sleep (eudein); but the original meaning of the word is disguised by the addition of psi; on and ousia are ion with an iota broken off; this agrees with the true

principle, for being (on) is also moving (ion), and the same may be said of not being, which is likewise called not going (oukion or ouki on = ouk ion).

Hermogenes: You have hammered away at them manfully; but suppose that some one were to say to you, what is the word ion, and what are reon and doun? — show me their fitness.

Socrates: You mean to say, how should I answer him?

Hermogenes: Yes.

Socrates: One way of giving the appearance of an answer has been already suggested.

Hermogenes: What way?

Socrates: To say that names which we do not understand are of foreign origin; and this is very likely the right answer, and something of this kind may be true of them; but also the original forms of words may have been lost in the lapse of ages; names have been so twisted in all manner of ways, that I should not be surprised if the old language when compared with that now in use would appear to us to be a barbarous tongue.

Hermogenes: Very likely.

Socrates: Yes, very likely. But still the enquiry demands our earnest attention and we must not flinch. For we should remember, that if a person go on analysing names into words, and enquiring also into the elements out of which the words are formed, and keeps on always repeating this process, he who has to answer him must at last give up the enquiry in despair.

Hermogenes: Very true.

Socrates: And at what point ought he to lose heart and give up the enquiry? Must he not stop when he comes to the names which are the elements of all other names and sentences; for these cannot be supposed to be made up of other names? The word agathon (good), for example, is, as we were saying, a compound of agastos (admirable) and thoos (swift). And

probably thoos is made up of other elements, and these again of others. But if we take a word which is incapable of further resolution, then we shall be right in saying that we have at last reached a primary element, which need not be resolved any further.

Hermogenes: I believe you to be in the right.

Socrates: And suppose the names about which you are now asking should turn out to be primary elements, must not their truth or law be examined according to some new method?

Hermogenes: Very likely.

Socrates: Quite so, Hermogenes; all that has preceded would lead to this conclusion. And if, as I think, the conclusion is true, then I shall again say to you, come and help me, that I may not fall into some absurdity in stating the principle of primary names.

Hermogenes: Let me hear, and I will do my best to assist you.

Socrates: I think that you will acknowledge with me, that one principle is applicable to all names, primary as well as secondary — when they are regarded simply as names, there is no difference in them.

Hermogenes: Certainly not.

Socrates: All the names that we have been explaining were intended to indicate the nature of things.

Hermogenes: Of course.

Socrates: And that this is true of the primary quite as much as of the secondary names, is implied in their being names.

Hermogenes: Surely.

Socrates: But the secondary, as I conceive, derive their significance from the primary.

Hermogenes: That is evident.

Socrates: Very good; but then how do the primary names which precede analysis show the natures of things, as far as they can be shown; which they must do, if they are to be real names? And here I will ask you a question: Suppose that we had no voice or tongue, and wanted to communicate with one another, should we not, like the deaf and dumb, make signs with the hands and head and the rest of the body?

Hermogenes: There would be no choice, Socrates.

Socrates: We should imitate the nature of the thing; the elevation of our hands to heaven would mean lightness and upwardness; heaviness and downwardness would be expressed by letting them drop to the ground; if we were describing the running of a horse, or any other animal, we should make our bodies and their gestures as like as we could to them.

Hermogenes: I do not see that we could do anything else.

Socrates: We could not; for by bodily imitation only can the body ever express anything.

Hermogenes: Very true.

Socrates: And when we want to express ourselves, either with the voice, or tongue, or mouth, the expression is simply their imitation of that which we want to express.

Hermogenes: It must be so, I think.

Socrates: Then a name is a vocal imitation of that which the vocal imitator names or imitates?

Hermogenes: I think so.

Socrates: Nay, my friend, I am disposed to think that we have not reached the truth as yet.

Hermogenes: Why not?

Socrates: Because if we have we shall be obliged to admit that the people who imitate sheep, or cocks, or other animals, name that which they imitate.

Hermogenes: Quite true.

Socrates: Then could I have been right in what I was saying?

Hermogenes: In my opinion, no. But I wish that you would tell me, Socrates, what sort of an imitation is a name?

Socrates: In the first place, I should reply, not a musical imitation, although that is also vocal; nor, again, an imitation of what music imitates; these, in my judgment, would not be naming. Let me put the matter as follows: All objects have sound and figure, and many have colour?

Hermogenes: Certainly.

Socrates: But the art of naming appears not to be concerned with imitations of this kind; the arts which have to do with them are music and drawing?

Hermogenes: True.

Socrates: Again, is there not an essence of each thing, just as there is a colour, or sound? And is there not an essence of colour and sound as well as of anything else which may be said to have an essence?

Hermogenes: I should think so.

Socrates: Well, and if any one could express the essence of each thing in letters and syllables, would he not express the nature of each thing?

Hermogenes: Quite so.

Socrates: The musician and the painter were the two names which you gave to the two other imitators. What will this imitator be called?

Hermogenes: I imagine, Socrates, that he must be the namer, or name-giver, of whom we are in search.

Socrates: If this is true, then I think that we are in a condition to consider the names ron (stream), ienai (to go), schesis

(retention), about which you were asking; and we may see whether the namer has grasped the nature of them in letters and syllables in such a manner as to imitate the essence or not.

Hermogenes: Very good.

Socrates: But are these the only primary names, or are there others?

Hermogenes: There must be others.

Socrates: So I should expect. But how shall we further analyse them, and where does the imitator begin? Imitation of the essence is made by syllables and letters; ought we not, therefore, first to separate the letters, just as those who are beginning rhythm first distinguish the powers of elementary, and then of compound sounds, and when they have done so, but not before, they proceed to the consideration of rhythms?

Hermogenes: Yes.

Socrates: Must we not begin in the same way with letters; first separating the vowels, and then the consonants and mutes (letters which are neither vowels nor semivowels), into classes, according to the received distinctions of the learned; also the semivowels, which are neither vowels, nor yet mutes; and distinguishing into classes the vowels themselves? And when we have perfected the classification of things, we shall give them names, and see whether, as in the case of letters, there are any classes to which they may be all referred (cf. Phaedrus); and hence we shall see their natures, and see, too, whether they have in them classes as there are in the letters; and when we have well considered all this, we shall know how to apply them to what they resemble — whether one letter is used to denote one thing, or whether there is to be an admixture of several of them; just, as in painting, the painter who wants to depict anything sometimes uses purple only, or any other colour, and sometimes mixes up several colours, as his method is when he has to paint flesh colour or anything of that kind — he uses his

colours as his figures appear to require them; and so, too, we shall apply letters to the expression of objects, either single letters when required, or several letters; and so we shall form syllables, as they are called, and from syllables make nouns and verbs; and thus, at last, from the combinations of nouns and verbs arrive at language, large and fair and whole; and as the painter made a figure, even so shall we make speech by the art of the namer or the rhetorician, or by some other art. Not that I am literally speaking of ourselves, but I was carried away — meaning to say that this was the way in which (not we but) the ancients formed language, and what they put together we must take to pieces in like manner, if we are to attain a scientific view of the whole subject, and we must see whether the primary, and also whether the secondary elements are rightly given or not, for if they are not, the composition of them, my dear Hermogenes, will be a sorry piece of work, and in the wrong direction.

Hermogenes: That, Socrates, I can quite believe.

Socrates: Well, but do you suppose that you will be able to analyse them in this way? for I am certain that I should not.

Hermogenes: Much less am I likely to be able.

Socrates: Shall we leave them, then? or shall we seek to discover, if we can, something about them, according to the measure of our ability, saying by way of preface, as I said before of the Gods, that of the truth about them we know nothing, and do but entertain human notions of them. And in this present enquiry, let us say to ourselves, before we proceed, that the higher method is the one which we or others who would analyse language to any good purpose must follow; but under the circumstances, as men say, we must do as well as we can. What do you think?

Hermogenes: I very much approve.

Socrates: That objects should be imitated in letters and syllables, and so find expression, may appear ridiculous, Hermogenes, but it cannot be avoided — there is no better principle to which we can look for the truth of first names. Deprived of this, we must have recourse to divine help, like the tragic poets, who in any perplexity have their gods waiting in the air; and must get out of our difficulty in like fashion, by saying that 'the Gods gave the first names, and therefore they are right.' This will be the best contrivance, or perhaps that other notion may be even better still, of deriving them from some barbarous people, for the barbarians are older than we are; or we may say that antiquity has cast a veil over them, which is the same sort of excuse as the last; for all these are not reasons but only ingenious excuses for having no reasons concerning the truth of words. And yet any sort of ignorance of first or primitive names involves an ignorance of secondary words; for they can only be explained by the primary. Clearly then the professor of languages should be able to give a very lucid explanation of first names, or let him be assured he will only talk nonsense about the rest. Do you not suppose this to be true?

Hermogenes: Certainly, Socrates.

Socrates: My first notions of original names are truly wild and ridiculous, though I have no objection to impart them to you if you desire, and I hope that you will communicate to me in return anything better which you may have.

Hermogenes: Fear not; I will do my best.

Socrates: In the first place, the letter rho appears to me to be the general instrument expressing all motion (kinesis). But I have not yet explained the meaning of this latter word, which is just iesis (going); for the letter eta was not in use among the ancients, who only employed epsilon; and the root is kiein, which is a foreign form, the same as ienai. And the old word kinesis will be correctly given as iesis in corresponding modern

letters. Assuming this foreign root kiein, and allowing for the change of the eta and the insertion of the nu, we have kinesis, which should have been kieinsis or eisis; and stasis is the negative of ienai (or eisis), and has been improved into stasis. Now the letter rho, as I was saying, appeared to the imposer of names an excellent instrument for the expression of motion; and he frequently uses the letter for this purpose: for example, in the actual words rein and roe he represents motion by rho; also in the words tromos (trembling), trachus (rugged); and again, in words such as krouein (strike), thrauein (crush), ereikein (bruise), thruptein (break), kermatixein (crumble), rumbein (whirl): of all these sorts of movements he generally finds an expression in the letter R, because, as I imagine, he had observed that the tongue was most agitated and least at rest in the pronunciation of this letter, which he therefore used in order to express motion, just as by the letter iota he expresses the subtle elements which pass through all things. This is why he uses the letter iota as imitative of motion, ienai, iesthai. And there is another class of letters, phi, psi, sigma, and xi, of which the pronunciation is accompanied by great expenditure of breath; these are used in the imitation of such notions as psuchron (shivering), xeon (seething), seiesthai, (to be shaken), seismos (shock), and are always introduced by the giver of names when he wants to imitate what is phusodes (windy). He seems to have thought that the closing and pressure of the tongue in the utterance of delta and tau was expressive of binding and rest in a place: he further observed the liquid movement of lambda, in the pronunciation of which the tongue slips, and in this he found the expression of smoothness, as in leios (level), and in the word oliothanein (to slip) itself, liparon (sleek), in the word kollodes (gluey), and the like: the heavier sound of gamma detained the slipping tongue, and the union of the two gave the notion of a glutinous clammy nature, as in glischros, glukus, gloiodes. The nu he observed to be sounded from within, and therefore to have a notion of inwardness;

hence he introduced the sound in endos and entos: alpha he assigned to the expression of size, and nu of length, because they are great letters: omicron was the sign of roundness, and therefore there is plenty of omicron mixed up in the word goggulon (round). Thus did the legislator, reducing all things into letters and syllables, and impressing on them names and signs, and out of them by imitation compounding other signs. That is my view, Hermogenes, of the truth of names; but I should like to hear what Cratylus has more to say.

Hermogenes: But, Socrates, as I was telling you before, Cratylus mystifies me; he says that there is a fitness of names, but he never explains what is this fitness, so that I cannot tell whether his obscurity is intended or not. Tell me now, Cratylus, here in the presence of Socrates, do you agree in what Socrates has been saying about names, or have you something better of your own? and if you have, tell me what your view is, and then you will either learn of Socrates, or Socrates and I will learn of you.

Cratylus: Well, but surely, Hermogenes, you do not suppose that you can learn, or I explain, any subject of importance all in a moment; at any rate, not such a subject as language, which is, perhaps, the very greatest of all.

Hermogenes: No, indeed; but, as Hesiod says, and I agree with him, ‘to add little to little’ is worth while. And, therefore, if you think that you can add anything at all, however small, to our knowledge, take a little trouble and oblige Socrates, and me too, who certainly have a claim upon you.

Socrates: I am by no means positive, Cratylus, in the view which Hermogenes and myself have worked out; and therefore do not hesitate to say what you think, which if it be better than my own view I shall gladly accept. And I should not be at all surprized to find that you have found some better notion. For you have evidently reflected on these matters and have had teachers, and if you have really a better theory of the truth of names, you may count me in the number of your disciples.

Cratylus: You are right, Socrates, in saying that I have made a study of these matters, and I might possibly convert you into a disciple. But I fear that the opposite is more probable, and I already find myself moved to say to you what Achilles in the 'Prayers' says to Ajax, —

'Illustrious Ajax, son of Telamon, lord of the people, You appear to have spoken in all things much to my mind.'

And you, Socrates, appear to me to be an oracle, and to give answers much to my mind, whether you are inspired by Euthyphro, or whether some Muse may have long been an inhabitant of your breast, unconsciously to yourself.

Socrates: Excellent Cratylus, I have long been wondering at my own wisdom; I cannot trust myself. And I think that I ought to stop and ask myself What am I saying? for there is nothing worse than self-deception — when the deceiver is always at home and always with you — it is quite terrible, and therefore I ought often to retrace my steps and endeavour to 'look fore and aft,' in the words of the aforesaid Homer. And now let me see; where are we? Have we not been saying that the correct name indicates the nature of the thing: — has this proposition been sufficiently proven?

Cratylus: Yes, Socrates, what you say, as I am disposed to think, is quite true.

Socrates: Names, then, are given in order to instruct?

Cratylus: Certainly.

Socrates: And naming is an art, and has artificers?

Cratylus: Yes.

Socrates: And who are they?

Cratylus: The legislators, of whom you spoke at first.

Socrates: And does this art grow up among men like other arts? Let me explain what I mean: of painters, some are better and

some worse?

Cratylus: Yes.

Socrates: The better painters execute their works, I mean their figures, better, and the worse execute them worse; and of builders also, the better sort build fairer houses, and the worse build them worse.

Cratylus: True.

Socrates: And among legislators, there are some who do their work better and some worse?

Cratylus: No; there I do not agree with you.

Socrates: Then you do not think that some laws are better and others worse?

Cratylus: No, indeed.

Socrates: Or that one name is better than another?

Cratylus: Certainly not.

Socrates: Then all names are rightly imposed?

Cratylus: Yes, if they are names at all.

Socrates: Well, what do you say to the name of our friend Hermogenes, which was mentioned before: — assuming that he has nothing of the nature of Hermes in him, shall we say that this is a wrong name, or not his name at all?

Cratylus: I should reply that Hermogenes is not his name at all, but only appears to be his, and is really the name of somebody else, who has the nature which corresponds to it.

Socrates: And if a man were to call him Hermogenes, would he not be even speaking falsely? For there may be a doubt whether you can call him Hermogenes, if he is not.

Cratylus: What do you mean?

Socrates: Are you maintaining that falsehood is impossible? For if this is your meaning I should answer, that there have been plenty of liars in all ages.

Cratylus: Why, Socrates, how can a man say that which is not? — say something and yet say nothing? For is not falsehood saying the thing which is not?

Socrates: Your argument, friend, is too subtle for a man of my age. But I should like to know whether you are one of those philosophers who think that falsehood may be spoken but not said?

Cratylus: Neither spoken nor said.

Socrates: Nor uttered nor addressed? For example: If a person, saluting you in a foreign country, were to take your hand and say: 'Hail, Athenian stranger, Hermogenes, son of Smicrion' — these words, whether spoken, said, uttered, or addressed, would have no application to you but only to our friend Hermogenes, or perhaps to nobody at all?

Cratylus: In my opinion, Socrates, the speaker would only be talking nonsense.

Socrates: Well, but that will be quite enough for me, if you will tell me whether the nonsense would be true or false, or partly true and partly false: — which is all that I want to know.

Cratylus: I should say that he would be putting himself in motion to no purpose; and that his words would be an unmeaning sound like the noise of hammering at a brazen pot.

Socrates: But let us see, Cratylus, whether we cannot find a meeting-point, for you would admit that the name is not the same with the thing named?

Cratylus: I should.

Socrates: And would you further acknowledge that the name is an imitation of the thing?

Cratylus: Certainly.

Socrates: And you would say that pictures are also imitations of things, but in another way?

Cratylus: Yes.

Socrates: I believe you may be right, but I do not rightly understand you. Please to say, then, whether both sorts of imitation (I mean both pictures or words) are not equally attributable and applicable to the things of which they are the imitation.

Cratylus: They are.

Socrates: First look at the matter thus: you may attribute the likeness of the man to the man, and of the woman to the woman; and so on?

Cratylus: Certainly.

Socrates: And conversely you may attribute the likeness of the man to the woman, and of the woman to the man?

Cratylus: Very true.

Socrates: And are both modes of assigning them right, or only the first?

Cratylus: Only the first.

Socrates: That is to say, the mode of assignment which attributes to each that which belongs to them and is like them?

Cratylus: That is my view.

Socrates: Now then, as I am desirous that we being friends should have a good understanding about the argument, let me state my view to you: the first mode of assignment, whether applied to figures or to names, I call right, and when applied to names only, true as well as right; and the other mode of giving and assigning the name which is unlike, I call wrong, and in the case of names, false as well as wrong.

Cratylus: That may be true, Socrates, in the case of pictures; they may be wrongly assigned; but not in the case of names — they must be always right.

Socrates: Why, what is the difference? May I not go to a man and say to him, 'This is your picture,' showing him his own likeness, or perhaps the likeness of a woman; and when I say 'show,' I mean bring before the sense of sight.

Cratylus: Certainly.

Socrates: And may I not go to him again, and say, 'This is your name'? — for the name, like the picture, is an imitation. May I not say to him— 'This is your name'? and may I not then bring to his sense of hearing the imitation of himself, when I say, 'This is a man'; or of a female of the human species, when I say, 'This is a woman,' as the case may be? Is not all that quite possible?

Cratylus: I would fain agree with you, Socrates; and therefore I say, Granted.

Socrates: That is very good of you, if I am right, which need hardly be disputed at present. But if I can assign names as well as pictures to objects, the right assignment of them we may call truth, and the wrong assignment of them falsehood. Now if there be such a wrong assignment of names, there may also be a wrong or inappropriate assignment of verbs; and if of names and verbs then of the sentences, which are made up of them. What do you say, Cratylus?

Cratylus: I agree; and think that what you say is very true.

Socrates: And further, primitive nouns may be compared to pictures, and in pictures you may either give all the appropriate colours and figures, or you may not give them all — some may be wanting; or there may be too many or too much of them — may there not?

Cratylus: Very true.

Socrates: And he who gives all gives a perfect picture or figure; and he who takes away or adds also gives a picture or figure, but not a good one.

Cratylus: Yes.

Socrates: In like manner, he who by syllables and letters imitates the nature of things, if he gives all that is appropriate will produce a good image, or in other words a name; but if he subtracts or perhaps adds a little, he will make an image but not a good one; whence I infer that some names are well and others ill made.

Cratylus: That is true.

Socrates: Then the artist of names may be sometimes good, or he may be bad?

Cratylus: Yes.

Socrates: And this artist of names is called the legislator?

Cratylus: Yes.

Socrates: Then like other artists the legislator may be good or he may be bad; it must surely be so if our former admissions hold good?

Cratylus: Very true, Socrates; but the case of language, you see, is different; for when by the help of grammar we assign the letters alpha or beta, or any other letters to a certain name, then, if we add, or subtract, or misplace a letter, the name which is written is not only written wrongly, but not written at all; and in any of these cases becomes other than a name.

Socrates: But I doubt whether your view is altogether correct, Cratylus.

Cratylus: How so?

Socrates: I believe that what you say may be true about numbers, which must be just what they are, or not be at all; for example, the number ten at once becomes other than ten if a

unit be added or subtracted, and so of any other number: but this does not apply to that which is qualitative or to anything which is represented under an image. I should say rather that the image, if expressing in every point the entire reality, would no longer be an image. Let us suppose the existence of two objects: one of them shall be Cratylus, and the other the image of Cratylus; and we will suppose, further, that some God makes not only a representation such as a painter would make of your outward form and colour, but also creates an inward organization like yours, having the same warmth and softness; and into this infuses motion, and soul, and mind, such as you have, and in a word copies all your qualities, and places them by you in another form; would you say that this was Cratylus and the image of Cratylus, or that there were two Cratyluses?

Cratylus: I should say that there were two Cratyluses.

Socrates: Then you see, my friend, that we must find some other principle of truth in images, and also in names; and not insist that an image is no longer an image when something is added or subtracted. Do you not perceive that images are very far from having qualities which are the exact counterpart of the realities which they represent?

Cratylus: Yes, I see.

Socrates: But then how ridiculous would be the effect of names on things, if they were exactly the same with them! For they would be the doubles of them, and no one would be able to determine which were the names and which were the realities.

Cratylus: Quite true.

Socrates: Then fear not, but have the courage to admit that one name may be correctly and another incorrectly given; and do not insist that the name shall be exactly the same with the thing; but allow the occasional substitution of a wrong letter, and if of a letter also of a noun in a sentence, and if of a noun in a sentence also of a sentence which is not appropriate to the

matter, and acknowledge that the thing may be named, and described, so long as the general character of the thing which you are describing is retained; and this, as you will remember, was remarked by Hermogenes and myself in the particular instance of the names of the letters.

Cratylus: Yes, I remember.

Socrates: Good; and when the general character is preserved, even if some of the proper letters are wanting, still the thing is signified; — well, if all the letters are given; not well, when only a few of them are given. I think that we had better admit this, lest we be punished like travellers in Aegina who wander about the street late at night: and be likewise told by truth herself that we have arrived too late; or if not, you must find out some new notion of correctness of names, and no longer maintain that a name is the expression of a thing in letters or syllables; for if you say both, you will be inconsistent with yourself.

Cratylus: I quite acknowledge, Socrates, what you say to be very reasonable.

Socrates: Then as we are agreed thus far, let us ask ourselves whether a name rightly imposed ought not to have the proper letters.

Cratylus: Yes.

Socrates: And the proper letters are those which are like the things?

Cratylus: Yes.

Socrates: Enough then of names which are rightly given. And in names which are incorrectly given, the greater part may be supposed to be made up of proper and similar letters, or there would be no likeness; but there will be likewise a part which is improper and spoils the beauty and formation of the word: you would admit that?

Cratylus: There would be no use, Socrates, in my quarrelling with you, since I cannot be satisfied that a name which is incorrectly given is a name at all.

Socrates: Do you admit a name to be the representation of a thing?

Cratylus: Yes, I do.

Socrates: But do you not allow that some nouns are primitive, and some derived?

Cratylus: Yes, I do.

Socrates: Then if you admit that primitive or first nouns are representations of things, is there any better way of framing representations than by assimilating them to the objects as much as you can; or do you prefer the notion of Hermogenes and of many others, who say that names are conventional, and have a meaning to those who have agreed about them, and who have previous knowledge of the things intended by them, and that convention is the only principle; and whether you abide by our present convention, or make a new and opposite one, according to which you call small great and great small — that, they would say, makes no difference, if you are only agreed. Which of these two notions do you prefer?

Cratylus: Representation by likeness, Socrates, is infinitely better than representation by any chance sign.

Socrates: Very good: but if the name is to be like the thing, the letters out of which the first names are composed must also be like things. Returning to the image of the picture, I would ask, How could any one ever compose a picture which would be like anything at all, if there were not pigments in nature which resembled the things imitated, and out of which the picture is composed?

Cratylus: Impossible.

Socrates: No more could names ever resemble any actually existing thing, unless the original elements of which they are compounded bore some degree of resemblance to the objects of which the names are the imitation: And the original elements are letters?

Cratylus: Yes.

Socrates: Let me now invite you to consider what Hermogenes and I were saying about sounds. Do you agree with me that the letter rho is expressive of rapidity, motion, and hardness? Were we right or wrong in saying so?

Cratylus: I should say that you were right.

Socrates: And that lamda was expressive of smoothness, and softness, and the like?

Cratylus: There again you were right.

Socrates: And yet, as you are aware, that which is called by us sklerotes, is by the Eretrians called skleroter.

Cratylus: Very true.

Socrates: But are the letters rho and sigma equivalents; and is there the same significance to them in the termination rho, which there is to us in sigma, or is there no significance to one of us?

Cratylus: Nay, surely there is a significance to both of us.

Socrates: In as far as they are like, or in as far as they are unlike?

Cratylus: In as far as they are like.

Socrates: Are they altogether alike?

Cratylus: Yes; for the purpose of expressing motion.

Socrates: And what do you say of the insertion of the lamda? for that is expressive not of hardness but of softness.

Cratylus: Why, perhaps the letter lamda is wrongly inserted, Socrates, and should be altered into rho, as you were saying to Hermogenes and in my opinion rightly, when you spoke of adding and subtracting letters upon occasion.

Socrates: Good. But still the word is intelligible to both of us; when I say skleros (hard), you know what I mean.

Cratylus: Yes, my dear friend, and the explanation of that is custom.

Socrates: And what is custom but convention? I utter a sound which I understand, and you know that I understand the meaning of the sound: this is what you are saying?

Cratylus: Yes.

Socrates: And if when I speak you know my meaning, there is an indication given by me to you?

Cratylus: Yes.

Socrates: This indication of my meaning may proceed from unlike as well as from like, for example in the lamda of sklerotes. But if this is true, then you have made a convention with yourself, and the correctness of a name turns out to be convention, since letters which are unlike are indicative equally with those which are like, if they are sanctioned by custom and convention. And even supposing that you distinguish custom from convention ever so much, still you must say that the signification of words is given by custom and not by likeness, for custom may indicate by the unlike as well as by the like. But as we are agreed thus far, Cratylus (for I shall assume that your silence gives consent), then custom and convention must be supposed to contribute to the indication of our thoughts; for suppose we take the instance of number, how can you ever imagine, my good friend, that you will find names resembling every individual number, unless you allow that which you term convention and agreement to have authority in determining the correctness of names? I quite agree with you that words should

as far as possible resemble things; but I fear that this dragging in of resemblance, as Hermogenes says, is a shabby thing, which has to be supplemented by the mechanical aid of convention with a view to correctness; for I believe that if we could always, or almost always, use likenesses, which are perfectly appropriate, this would be the most perfect state of language; as the opposite is the most imperfect. But let me ask you, what is the force of names, and what is the use of them?

Cratylus: The use of names, Socrates, as I should imagine, is to inform: the simple truth is, that he who knows names knows also the things which are expressed by them.

Socrates: I suppose you mean to say, Cratylus, that as the name is, so also is the thing; and that he who knows the one will also know the other, because they are similars, and all similars fall under the same art or science; and therefore you would say that he who knows names will also know things.

Cratylus: That is precisely what I mean.

Socrates: But let us consider what is the nature of this information about things which, according to you, is given us by names. Is it the best sort of information? or is there any other? What do you say?

Cratylus: I believe that to be both the only and the best sort of information about them; there can be no other.

Socrates: But do you believe that in the discovery of them, he who discovers the names discovers also the things; or is this only the method of instruction, and is there some other method of enquiry and discovery.

Cratylus: I certainly believe that the methods of enquiry and discovery are of the same nature as instruction.

Socrates: Well, but do you not see, Cratylus, that he who follows names in the search after things, and analyses their meaning, is in great danger of being deceived?

Cratylus: How so?

Socrates: Why clearly he who first gave names gave them according to his conception of the things which they signified — did he not?

Cratylus: True.

Socrates: And if his conception was erroneous, and he gave names according to his conception, in what position shall we who are his followers find ourselves? Shall we not be deceived by him?

Cratylus: But, Socrates, am I not right in thinking that he must surely have known; or else, as I was saying, his names would not be names at all? And you have a clear proof that he has not missed the truth, and the proof is — that he is perfectly consistent. Did you ever observe in speaking that all the words which you utter have a common character and purpose?

Socrates: But that, friend Cratylus, is no answer. For if he did begin in error, he may have forced the remainder into agreement with the original error and with himself; there would be nothing strange in this, any more than in geometrical diagrams, which have often a slight and invisible flaw in the first part of the process, and are consistently mistaken in the long deductions which follow. And this is the reason why every man should expend his chief thought and attention on the consideration of his first principles: — are they or are they not rightly laid down? and when he has duly sifted them, all the rest will follow. Now I should be astonished to find that names are really consistent. And here let us revert to our former discussion: Were we not saying that all things are in motion and progress and flux, and that this idea of motion is expressed by names? Do you not conceive that to be the meaning of them?

Cratylus: Yes; that is assuredly their meaning, and the true meaning.

Socrates: Let us revert to episteme (knowledge) and observe how ambiguous this word is, seeming rather to signify stopping the soul at things than going round with them; and therefore we should leave the beginning as at present, and not reject the epsilon, but make an insertion of an iota instead of an epsilon (not pioteme, but epiisteme). Take another example: bebaion (sure) is clearly the expression of station and position, and not of motion. Again, the word istoria (enquiry) bears upon the face of it the stopping (istanai) of the stream; and the word piston (faithful) certainly indicates cessation of motion; then, again, mneme (memory), as any one may see, expresses rest in the soul, and not motion. Moreover, words such as amartia and sumphora, which have a bad sense, viewed in the light of their etymologies will be the same as sunesis and episteme and other words which have a good sense (compare omartein, sunienai, epesthai, sumpheresthai); and much the same may be said of amathia and akolasia, for amathia may be explained as e ama theo iontos poreia, and akolasia as e akolouthia tois pragmasin. Thus the names which in these instances we find to have the worst sense, will turn out to be framed on the same principle as those which have the best. And any one I believe who would take the trouble might find many other examples in which the giver of names indicates, not that things are in motion or progress, but that they are at rest; which is the opposite of motion.

Cratylus: Yes, Socrates, but observe; the greater number express motion.

Socrates: What of that, Cratylus? Are we to count them like votes? and is correctness of names the voice of the majority? Are we to say of whichever sort there are most, those are the true ones?

Cratylus: No; that is not reasonable.

Socrates: Certainly not. But let us have done with this question and proceed to another, about which I should like to know

whether you think with me. Were we not lately acknowledging that the first givers of names in states, both Hellenic and barbarous, were the legislators, and that the art which gave names was the art of the legislator?

Cratylus: Quite true.

Socrates: Tell me, then, did the first legislators, who were the givers of the first names, know or not know the things which they named?

Cratylus: They must have known, Socrates.

Socrates: Why, yes, friend Cratylus, they could hardly have been ignorant.

Cratylus: I should say not.

Socrates: Let us return to the point from which we digressed. You were saying, if you remember, that he who gave names must have known the things which he named; are you still of that opinion?

Cratylus: I am.

Socrates: And would you say that the giver of the first names had also a knowledge of the things which he named?

Cratylus: I should.

Socrates: But how could he have learned or discovered things from names if the primitive names were not yet given? For, if we are correct in our view, the only way of learning and discovering things, is either to discover names for ourselves or to learn them from others.

Cratylus: I think that there is a good deal in what you say, Socrates.

Socrates: But if things are only to be known through names, how can we suppose that the givers of names had knowledge, or were legislators before there were names at all, and therefore before they could have known them?

Cratylus: I believe, Socrates, the true account of the matter to be, that a power more than human gave things their first names, and that the names which are thus given are necessarily their true names.

Socrates: Then how came the giver of the names, if he was an inspired being or God, to contradict himself? For were we not saying just now that he made some names expressive of rest and others of motion? Were we mistaken?

Cratylus: But I suppose one of the two not to be names at all.

Socrates: And which, then, did he make, my good friend; those which are expressive of rest, or those which are expressive of motion? This is a point which, as I said before, cannot be determined by counting them.

Cratylus: No; not in that way, Socrates.

Socrates: But if this is a battle of names, some of them asserting that they are like the truth, others contending that THEY are, how or by what criterion are we to decide between them? For there are no other names to which appeal can be made, but obviously recourse must be had to another standard which, without employing names, will make clear which of the two are right; and this must be a standard which shows the truth of things.

Cratylus: I agree.

Socrates: But if that is true, Cratylus, then I suppose that things may be known without names?

Cratylus: Clearly.

Socrates: But how would you expect to know them? What other way can there be of knowing them, except the true and natural way, through their affinities, when they are akin to each other, and through themselves? For that which is other and different from them must signify something other and different from them.

Cratylus: What you are saying is, I think, true.

Socrates: Well, but reflect; have we not several times acknowledged that names rightly given are the likenesses and images of the things which they name?

Cratylus: Yes.

Socrates: Let us suppose that to any extent you please you can learn things through the medium of names, and suppose also that you can learn them from the things themselves — which is likely to be the nobler and clearer way; to learn of the image, whether the image and the truth of which the image is the expression have been rightly conceived, or to learn of the truth whether the truth and the image of it have been duly executed?

Cratylus: I should say that we must learn of the truth.

Socrates: How real existence is to be studied or discovered is, I suspect, beyond you and me. But we may admit so much, that the knowledge of things is not to be derived from names. No; they must be studied and investigated in themselves.

Cratylus: Clearly, Socrates.

Socrates: There is another point. I should not like us to be imposed upon by the appearance of such a multitude of names, all tending in the same direction. I myself do not deny that the givers of names did really give them under the idea that all things were in motion and flux; which was their sincere but, I think, mistaken opinion. And having fallen into a kind of whirlpool themselves, they are carried round, and want to drag us in after them. There is a matter, master Cratylus, about which I often dream, and should like to ask your opinion: Tell me, whether there is or is not any absolute beauty or good, or any other absolute existence?

Cratylus: Certainly, Socrates, I think so.

Socrates: Then let us seek the true beauty: not asking whether a face is fair, or anything of that sort, for all such things appear to

be in a flux; but let us ask whether the true beauty is not always beautiful.

Cratylus: Certainly.

Socrates: And can we rightly speak of a beauty which is always passing away, and is first this and then that; must not the same thing be born and retire and vanish while the word is in our mouths?

Cratylus: Undoubtedly.

Socrates: Then how can that be a real thing which is never in the same state? for obviously things which are the same cannot change while they remain the same; and if they are always the same and in the same state, and never depart from their original form, they can never change or be moved.

Cratylus: Certainly they cannot.

Socrates: Nor yet can they be known by any one; for at the moment that the observer approaches, then they become other and of another nature, so that you cannot get any further in knowing their nature or state, for you cannot know that which has no state.

Cratylus: True.

Socrates: Nor can we reasonably say, Cratylus, that there is knowledge at all, if everything is in a state of transition and there is nothing abiding; for knowledge too cannot continue to be knowledge unless continuing always to abide and exist. But if the very nature of knowledge changes, at the time when the change occurs there will be no knowledge; and if the transition is always going on, there will always be no knowledge, and, according to this view, there will be no one to know and nothing to be known: but if that which knows and that which is known exists ever, and the beautiful and the good and every other thing also exist, then I do not think that they can resemble a process or flux, as we were just now supposing. Whether there is this

eternal nature in things, or whether the truth is what Heracleitus and his followers and many others say, is a question hard to determine; and no man of sense will like to put himself or the education of his mind in the power of names: neither will he so far trust names or the givers of names as to be confident in any knowledge which condemns himself and other existences to an unhealthy state of unreality; he will not believe that all things leak like a pot, or imagine that the world is a man who has a running at the nose. This may be true, Cratylus, but is also very likely to be untrue; and therefore I would not have you be too easily persuaded of it. Reflect well and like a man, and do not easily accept such a doctrine; for you are young and of an age to learn. And when you have found the truth, come and tell me.

Cratylus: I will do as you say, though I can assure you, Socrates, that I have been considering the matter already, and the result of a great deal of trouble and consideration is that I incline to Heracleitus.

Socrates: Then, another day, my friend, when you come back, you shall give me a lesson; but at present, go into the country, as you are intending, and Hermogenes shall set you on your way.

Cratylus: Very good, Socrates; I hope, however, that you will continue to think about these things yourself.

Epistles

ΕΠΙΣΤΟΛΑΙ

I

Plato to Dionysius wishes well-doing.

After I had spent so long a time with you and was trusted above all others in my administration of your government, while you were enjoying the benefits I was enduring the slanders, grievous as they were. For I knew that men would not believe that any of your more brutal acts were done with my consent, seeing that I have for my witnesses all those who take a part in your government, many of whom I have helped in their times of trial and saved them from no small damage. But after I had oftentimes kept guard over your City as sole Dictator, I was dismissed with more ignominy than a beggar would deserve who had stayed with you for so long a time, were you to pack him off and order him to sail away. For the future, therefore, I for my part will consult my own interests in less philanthropic fashion, while you, “gross tyrant that you are, will dwell alone.” And as for the splendid sum of gold which you gave for my journey home, Baccheius, the bearer of this letter, is taking it back to you. For it was neither a sufficient sum for my journey nor was it otherwise useful for my support; and since it reflects the greatest disgrace on you who offer it, and not much less on me if I accept it, I therefore refuse to accept it. But evidently neither the giving nor the accepting of such an amount makes any difference to you; take it, then, and befriend therewith some

other companion of yours as you did me; for I, in sooth, have had enough of your “befriending.” Indeed, I may appropriately quote the verse of Euripides — that one day, when other fortunes befall you,

Thou’lt pray for such a helper by thy side.

And I desire to remind you that most of the other tragedians also, when they show a tyrant on the stage slaughtered by someone, represent him as crying out —

Bereft of friends — ah! woe is me — I die.

But not one of them has represented him as dying for lack of gold. This other poem also to men of judgement seemeth not amiss —

In this our human life, with halting hopes,It is not glittering gold that rarest is:Not diamond nor couches silver-wroughtAppear so brilliant in the eyes of men:Nor do the fertile fields of earth’s broad breast,Laden with crops, so all-sufficing seemAs gallant men’s unanimous resolve.

Farewell; and may you learn how much you have lost in us, so that you may behave yourself better towards all others.

II

Plato to Dionysius wishes well-doing.

I hear from Archedemus that you think that not only I myself should keep quiet but my friends also from doing or saying anything bad about you; and that “you except Dion only.” Now your saying this, that Dion is excepted, implies that I have no control over my friends; for had I had this control over you and Dion, as well as the rest, more blessings would have come to us all and to the rest of the Greeks also, as I affirm. But as it is, my greatness consists in making myself follow my own instructions. However, I do not say this as though what Cratistolus and Polyxenus have told you is to be trusted; for it is said that one of

these men declares that at Olympia he heard quite a number of my companions maligning you. No doubt his hearing is more acute than mine; for I certainly heard no such thing. For the future, whenever anyone makes such a statement about any of us, what you ought, I think, to do is to send me a letter of inquiry; for I shall tell the truth without scruple or shame. Now as for you and me, the relation in which we stand towards each other is really this. There is not a single Greek, one may say, to whom we are unknown, and our intercourse is a matter of common talk; and you may be sure of this, that it will be common talk also in days to come, because so many have heard tell of it owing to its duration and its publicity. What, now, is the point of this remark? I will go back to the beginning and tell you. It is natural for wisdom and great power to come together, and they are for ever pursuing and seeking each other and consorting together. Moreover, these are qualities which people delight in discussing themselves in private conversation and hearing others discuss in their poems. For example, when men talk about Hiero or about Pausanias the Lacedaemonian they delight to bring in their meeting with Simonides and what he did and said to them; and they are wont to harp on Periander of Corinth and Thales of Miletus, and on Pericles and Anaxagoras, and on Croesus also and Solon as wise men with Cyrus as potentate. The poets, too, follow their example, and bring together Creon and Tiresias, Polyeidus and Minos, Agamemnon and Nestor, Odysseus and Palamedes; and so it was, I suppose, that the earliest men also brought together Prometheus and Zeus. And of these some were — as the poets tell — at feud with each other, and others were friends; while others again were now friends and now foes, and partly in agreement and partly in disagreement. Now my object in saying all this is to make it clear, that when we ourselves die men’s talk about us will not likewise be silenced; so that we must be careful about it. We must necessarily, it seems, have a care also for the future, seeing that, by some law of nature, the most slavish men pay no

regard to it, whereas the most upright do all they can to ensure that they shall be well spoken of in the future. Now I count this as a proof that the dead have some perception of things here on earth; for the best souls divine that this is so, while the worst deny it; and the divinings of men who are godlike are of more authority than those of men who are not. I certainly think that, had it been in their power to rectify what was wrong in their intercourse, those men of the past whom I have mentioned would have striven to the utmost to ensure a better report of themselves than they now have. In our case, then — if God so grant — it still remains possible to put right whatever has been amiss in word or deed during our intercourse in the past. For I maintain that, as regards the true philosophy, men will think and speak well of it if we ourselves are upright, and ill if we are base. And in truth we could do nothing more pious than to give attention to this matter, nothing more impious than to disregard it. How this result should be brought about, and what is the just course to pursue, I will now explain. I came to Sicily with the reputation of being by far the most eminent of those engaged in philosophy; and I desired, on my arrival in Syracuse, to gain your testimony as well, in order that I might get philosophy held in honor even by the multitude. In this, however, I was disappointed. But the reason I give for this is not that which is commonly given; rather it was because you showed that you did not fully trust me but wished rather to get rid of me somehow and invite others in my place; and owing, as I believe, to your distrust of me, you showed yourself inquisitive as to what my business was. Thereupon it was proclaimed aloud by many that you utterly despised me and were devoted to other affairs. This certainly was the story noised abroad. And now I will tell you what it is right to do after this, that so I may reply also to your question how you and I ought to behave towards each other. If you altogether despise philosophy, leave it alone. If, again, you have been taught by someone else or have yourself invented better doctrines than mine, hold them in honor. But if you are

contented with my doctrines, then you should hold me also in special honor. So now, just as at the beginning, do you lead the way and I will follow. If I am honored by you, I will honor you; but if I am not honored I will keep to myself. Moreover, if you honor me and take the lead in so doing, you will be thought to be honoring philosophy; and the very fact that you have studied other systems as well will gain you the credit, in the eyes of many, of being a philosopher yourself. But if I honor you, while you do not honor me, I shall be deemed to be a man who worships and pursues after wealth; and to such conduct everyone, we know, gives a bad name. So, to sum it all up, if you pay the honor, it will be a credit to both of us, but if I pay it a disgrace to both. So much, then, about this subject. As to the globe, there is something wrong with it; and Archedemus will point it out to you when he arrives. There is also another matter — much more valuable and divine than the globe — which he most certainly must explain, as you were puzzled about it when you sent him. For, according to his report, you say that you have not had a sufficient demonstration of the doctrine concerning the nature of "the First." Now I must expound it to you in a riddling way in order that, should the tablet come to any harm "in folds of ocean or of earth," he that readeth may not understand. The matter stands thus: Related to the King of All are all things, and for his sake they are, and of all things fair He is the cause. And related to the Second are the second things and related to the Third the third. About these, then, the human soul strives to learn, looking to the things that are akin to itself, whereof none is fully perfect. But as to the King and the objects I have mentioned, they are of quite different quality. In the next place the soul inquires— "Well then, what quality have they?" But the cause of all the mischief, O son of Dionysius and Doris, lies in this very question, or rather in the travail which this question creates in the soul; and unless a man delivers himself from this he will never really attain the truth. You, however, declared to me in the garden, under the laurels, that you had

formed this notion yourself and that it was a discovery of your own; and I made answer that if it was plain to you that this was so, you would have saved me from a long discourse. I said, however, that I had never met with any other person who had made this discovery; on the contrary most of the trouble I had was about this very problem. So then, after you had either, as is probable, got the true solution from someone else, or had possibly (by Heaven's favor) hit on it yourself, you fancied you had a firm grip on the proofs of it, and so you omitted to make them fast; thus your view of the truth sways now this way, now that, round about the apparent object; whereas the true object is wholly different. Nor are you alone in this experience; on the contrary, there has never yet been anyone, I assure you, who has not suffered the same confusion at the beginning, when he first learnt this doctrine from me; and they all overcome it with difficulty, one man having more trouble and another less, but scarcely a single one of them escapes with but little. So now that this has occurred, and things are in this state, we have pretty well found an answer, as I think, to the question how we ought to behave towards each other. For seeing that you are testing my doctrines both by attending the lectures of other teachers and by examining my teaching side by side with theirs, as well as by itself, then, if the test you make is a true one, not only will these doctrines implant themselves now in your mind, but you also will be devoted both to them and to us. How, then, will this, and all that I have said, be brought to pass? You have done right now in sending Archedemus; and in the future also, after he returns to you and reports my answer, you will probably be beset later on with fresh perplexities. Then, if you are rightly advised, you will send Archedemus back to me, and he with his cargo will return to you again. And if you do this twice or thrice, and fully test the doctrines I send you, I shall be surprised if your present difficulties do not assume quite a new aspect. Do you, therefore, act so, and with confidence; for there is no merchandise more fair than this or dearer to Heaven which you

can ever dispatch or Archedemus transport. Beware, however, lest these doctrines be ever divulged to uneducated people. For there are hardly any doctrines, I believe, which sound more absurd than these to the vulgar, or, on the other hand, more admirable and inspired to men of fine disposition. For it is through being repeated and listened to frequently for many years that these doctrines are refined at length, like gold, with prolonged labor. But listen now to the most remarkable result of all. Quite a number of men there are who have listened to these doctrines — men capable of learning and capable also of holding them in mind and judging them by all sorts of tests — and who have been hearers of mine for no less than thirty years and are now quite old; and these men now declare that the doctrines that they once held to be most incredible appear to them now the most credible, and what they then held most credible now appears the opposite. So, bearing this in mind, have a care lest one day you should repent of what has now been divulged improperly. The greatest safeguard is to avoid writing and to learn by heart; for it is not possible that what is written down should not get divulged. For this reason I myself have never yet written anything on these subjects, and no treatise by Plato exists or will exist, but those which now bear his name belong to a Socrates become fair and young. Fare thee well, and give me credence; and now, to begin with, read this letter over repeatedly and then burn it up.

So much, then, for that. You were surprised at my sending Polyxenus to you; but now as of old I repeat the same statement about Lycophron also and the others you have with you, that, as respects dialectic, you are far superior to them all both in natural intelligence and in argumentative ability; and I maintain that if any of them is beaten in argument, this defeat is not voluntary, as some imagine, but involuntary. All the same, it appears that you treat them with the greatest consideration and make them presents. So much, then, about these men; too much, indeed, about such as they! As for Philistion, if you are

making use of him yourself by all means do so; but if not, lend him if possible to Speusippus and send him home. Speusippus, too, begs you to do so; and Philistion also promised me, that, if you would release him, he would gladly come to Athens. Many thanks for releasing the man in the stone-quarries; and my request with regard to his household and Hegesippus, the son of Ariston, is no hard matter; for in your letter you said that should anyone wrong him or them and you come to know of it you would not allow it. It is proper for me also to say what is true about Lysicleides; for of all those who have come to Athens from Sicily he is the only one who has not misrepresented your association with me; on the contrary, he always speaks nicely about past events and puts the best construction on them.

III

Plato to Dionysius wishes well-doing.

“Plato to Dionysius wishes joy!”

If I wrote thus, should I be hitting on the best mode of address? Or rather, by writing, according to my custom, “wishes well-doing,” this being my usual mode of address, in my letters to my friends? You, indeed, — as was reported by the spectators then present — addressed even the God himself at Delphi in this same flattering phrase, and wrote, as they say, this verse —

I wish you joy! And may you always keepThe tyrant’s life a life of pleasantness.

But as for me, I would not call upon a man, and much less a god, and bid him enjoy himself — a god, because I would be imposing a task contrary to his nature (since the Deity has his abode far beyond pleasure or pain), — nor yet a man, because pleasure and pain generate mischief for the most part, since they breed in the soul mental sloth and forgetfulness and witlessness and insolence. Let such, then, be my declaration regarding the mode of address; and you, when you read it, accept it in what sense

you please. It is stated by not a few that you related to some of the ambassadors at your Court, that upon one occasion I heard you speaking of your intention to occupy the Greek cities in Italy and to relieve the Syracusans by changing the government to a monarchy instead of a tyranny, and at that time (as you assert) I stopped you from doing so, although you were most eager to do it, whereas now I am urging Dion to do precisely the same thing; and thus we are robbing you of your empire by means of your own plans. Whether you derive any benefit from this talk you know best yourself, but you certainly wrong me by saying what is contrary to the fact. For of false accusation I have had enough from Philistides and many others who accused me to the mercenaries and to the Syracusan populace because I stayed in the acropolis; and the people outside, whenever a mistake occurred, ascribed it entirely to me, alleging that you obeyed me in all things. But you yourself know for certain that I willingly took part in some few of your political acts at the first, when I thought that I was doing some good by it and that I gave a fair amount of attention to the Preludes of the laws, besides other small matters, apart from the additions in writing made by you or anyone else — for I am told that some of you afterwards revised my Preludes; but no doubt the several contributions will be evident to those who are competent to appreciate my style. Well then, as I said just now, what I need is not any further accusation to the Syracusans, or any others there may be who believe your story, but much rather a defence not only against the previous false accusations, but also against the graver and more violent accusation which is now being concocted to follow it. Against the two accusations I must necessarily make a twofold defence — stating, firstly, that I reasonably avoided sharing in your political transactions; and, secondly, that neither the advice was mine, nor yet the hindrance you alleged, — when you said that I had stopped you when you proposed to plant colonists in the Greek cities.

So, listen first to the origin of the first of the accusations I have mentioned. It was on your invitation and Dion's that I came to Syracuse. Dion was a tried comrade of mine and a guest-friend of old standing, and he was a man of staid middle age, — qualities that are specially required by men who possess even a particle of sense when they intend to advise concerning affairs so important as yours then were. You, on the other hand, were extremely young, and in your case I was quite without experience of those points regarding which experience was required, as I was totally unacquainted with you. Thereafter, some man or god or chance, with your assistance, cast out Dion, and you were left alone. Do you suppose, then, that I took any part with you in your political acts, when I had lost my wise partner and saw the unwise one left behind in the company of a crowd of evil men, not ruling himself, but being ruled by men of that sort, while fancying himself the ruler? In these circumstances what ought I to have done? Was I not bound to do as I did, — to bid farewell for the future to politics, shunning the slanders which proceed from envy, and to use every endeavor to make you and Dion as friendly to each other as possible, separated though you were and at variance with each other? Yea, you yourself also are a witness of this, that I have never yet ceased to strive for this very object. And it was agreed between us — although with difficulty — that I should sail home, since you were engaged in war, and that, when peace was restored, Dion and I should go to Syracuse and that you should invite us. And that was how things took place as regards my first sojourn at Syracuse and my safe return home again. But on the second occasion, when peace was restored, you did not keep to our agreement in the invitation you gave me but wrote that I should come alone, and stated that you would send for Dion later on. On this account I did not go; and, moreover, I was vexed also with Dion; for he was of opinion that it was better for me to go and to yield to your wishes. Subsequently, after a year's interval, a trireme arrived with letters from you, and the first

words written in the letters were to the effect that if I came I should find that Dion's affairs would all proceed as I desired, but the opposite if I failed to come. And indeed I am ashamed to say how many letters came at that time from Italy and Sicily from you and from others on your account, or to how many of my friends and acquaintances they were addressed, all enjoining me to go and beseeching me to trust you entirely. It was the firm opinion of everyone, beginning with Dion, that it was my duty to make the voyage and not be faint-hearted. But I always made my age an excuse; and as for you, I kept assuring them that you would not be able to withstand those who slander us and desire that we should quarrel; for I saw then, as I see now, that, as a rule, when great and exorbitant wealth is in the hands either of private citizens or of monarchs, the greater it is, the greater and more numerous are the slanderers it breeds and the hordes of parasites and wastrels — than which there is no greater evil generated by wealth or by the other privileges of power. Notwithstanding, I put aside all these considerations and went, resolving that none of my friends should lay it to my charge that owing to my lack of energy all their fortunes were ruined when they might have been saved from ruin. On my arrival — for you know, to be sure, all that subsequently took place — I, of course, requested, in accordance with the agreement in your letters, that you should, in the first place, recall Dion on terms of friendship — which terms I mentioned; and if you had then yielded to this request, things would probably have turned out better than they have done now both for you and Syracuse and for the rest of Greece — that, at least, is my own intuitive belief. Next, I requested that Dion's family should have possession of his property, instead of the distributors, whom you wot of, having the distribution of it. And further, I deemed it right that the revenue which was usually paid over to him year by year should be forwarded to him all the more, rather than all the less, because of my presence. None of these requests being granted, I asked leave to depart. Thereupon you kept urging me to stop

for the year, declaring that you would sell all Dion's property and send one half of the proceeds to Corinth and retain the other half for his son. And I could mention many other promises none of which you fulfilled; but the number of them is so great that I cut it short. For when you had sold all the goods, without Dion's consent — though you had declared that without his consent you would not dispose of them — you put the coping-stone on all your promises, my admirable friend, in a most outrageous way: you invented a plan that was neither noble nor ingenious nor just nor profitable — namely, to scare me off from so much as seeking for the dispatch of the money, as being in ignorance of the events then going on. For when you sought to expel Heracleides unjustly, as it seemed to the Syracusans as well as to myself — because I had joined with Theodotes and Eurybius in entreating you not to do so, you took this as an ample excuse, and asserted that it had long been plain to you that I paid no regard to you, but only to Dion and Dion's friends and connections, and now that Theodotes and Heracleides, who were Dion's connections, were the subjects of accusations, I was using every means to prevent their paying the just penalty.

Such, then, was the course of events as regards our association in political affairs. And if you perceived any other estrangement in my attitude towards you, you may reasonably suppose that that was the way in which all these things took place. Nor need you be surprised; for I should justly be accounted base by any man of sense had I been influenced by the greatness of your power to betray my old and intimate guest-friend — a man, to say the least, in no wise inferior to you — when, because of you, he was in distress, and to prefer you, the man who did the wrong, and to do everything just as you bade me — for filthy lucre's sake, obviously; for to this, and nothing else, men would have ascribed this change of front in me, if I had changed. Well, then, it was the fact that things took this course, owing to you, which produced this wolf-love and want of fellowship between

you and me.

Practically continuous with the statement made just now there comes, I find, that other statement against which, as I said, I have to make my second defence. Consider now and pay the closest attention, in case I seem to you to be lying at all and not speaking the truth. I affirm that when Archedemus and Aristocritus were with us in the garden, some twenty days before I departed home from Syracuse, you made the same complaint against me that you are making now — that I cared more for Heracleides and for all the rest than for you. And in the presence of those men you asked me whether I remembered bidding you, when I first arrived, to plant settlers in the Greek cities. I granted you that I did remember, and that I still believed that this was the best policy. But, Dionysius, I must also repeat, the next observation that was made on this occasion. For I asked you whether this and this only was what I advised, or something else besides and you made answer to me in a most indignant and most mocking tone, as you supposed — and consequently the object of your mockery then has now turned out a reality instead of a dream; for you said with a very artificial laugh, if my memory serves me— “You bade me be educated before I did all these things or else not do them.” I replied that your memory was excellent. You then said— “Did you mean educated in land-measuring or what?” But I refrained from making the retort which it occurred to me to make, for I was alarmed about the homeward voyage I was hoping for, lest instead of having an open road I should find it shut, and all because of a short saying. Well then, the purpose of all I have said is this: do not slander me by declaring that I was hindering you from colonizing the Greek cities that were ruined by the barbarians, and from relieving the Syracusans by substituting a monarchy for a tyranny. For you could never bring any false accusation against me that was less appropriate than these; and, moreover, in refutation of them I could bring still clearer statements if any competent tribunal were anywhere to be seen

— showing that it was I who was urging you, and you who were refusing, to execute these plans. And, verily, it is easy to affirm frankly that these plans, if they had been executed, were the best both for you and the Syracusans, and for all the Siceliots. But, my friend, if you deny having said this, when you have said it, I am justified; while if you confess it, you should further agree that Stesichorus was a wise man, and imitate his palinode, and renounce the false for the true tale.

IV

Plato to Dion of Syracuse wishes well-doing.

It has been plain, I believe, all along that I took a keen interest in the operations that have been carried out, and that I was most anxious to see them finally completed. In this I was mainly prompted by my jealous regard for what is noble; for I esteem it just that those who are truly virtuous, and who act accordingly, should achieve the reputation they deserve. Now for the present (God willing) affairs are going well; but it is in the future that the chief struggle lies. For while it might be thought that excellence in courage and speed and strength might belong to various other men, everyone would agree that surpassing excellence in truth, justice, generosity and the outward exhibition of all these virtues naturally belongs to those who profess to hold them in honor. Now the point of this remark is plain; but none the less it is right that we should remind ourselves that it behoves certain persons (who these are of course you know) to surpass the rest of mankind as if they were less than children. It is, therefore, incumbent upon us to show plainly that we are the sort of men we claim to be, and that all the more because (God willing) it will be an easy task. For whereas all other men find it necessary to wander far afield if they mean to get themselves known, you are in such a position now that people all the world over — bold though it be to say so — have their eyes fixed on one place only, and in that place upon

you above all men. Seeing, then, that you have the eyes of all upon you, prepare yourself to play the part of that ancient worthy Lycurgus and of Cyrus and of all those others who have been famed hitherto for their excellence of character and of statesmanship; and that all the more because there are many, including nearly all the people here, who keep saying that, now that Dionysius is overthrown, there is every prospect that things will go to ruin owing to the jealous rivalry of yourself, and Heracleides and Theodotes and the other notables. I pray, then, that no one, if possible, may suffer from this complaint; but in case anyone should, after all, do so, you must play the part of a physician; and so things will turn out best for you all.

Probably it strikes you as ridiculous that I should say this, seeing that you yourself also know it quite well; but I notice how even in the theaters the players are spurred on by the plaudits of the children — not to speak of their own friends — whenever a player believes them to be genuine and well-meaning in their encouragement. So do you also play your parts now; and if you have need of anything send us word. Affairs with us are in much the same state as when you were here. Send us word also about what you have already done or happen to be doing now, since we know nothing although we hear many reports. Even at this moment letters have come to Lacedaemon and Aegina from Theodotes and Heracleides; but we, as I said, know nothing, although we hear many reports from the people here. And, Dion, do you also bear in mind that you are thought by some to be unduly wanting in affability; so do not forget that successful action depends on pleasing people, whereas arrogance is next neighbor to isolation. Good-luck attend thee!

V

Plato to Perdiccas wishes well-doing.

I counselled Euphraeus, in accordance with your message, to devote his time to the task of caring for your interests; and I feel

myself bound also to give you friendly, and what is called "sacred," counsel both about the other matters you mention and as to how you ought now to make use of Euphraeus. For the man is useful for many things, the most important being that in which you yourself are deficient owing to your youth, and also because it is a matter about which there are not many counsellors available for the young. For forms of government, like animals, have each their own kind of language, one for democracy, another for oligarchy, and a third kind for monarchy; and though a vast number of people would assert that they understand these languages, yet all but a few of them are very far indeed from discerning them. Now each of these polities, if it speaks its own language both to gods and to men, and renders its actions conformable to its language, remains always flourishing and secure; but if it imitates another it becomes corrupted. It is for this study, then, that Euphraeus will be specially useful to you, although there are also other studies in which he is competent. For he, I hope, will help you to explore the speech of monarchy as well as any of the persons you employ. So if you make use of him for this purpose you will not only benefit yourself but will also be helping him immensely. Suppose, however, that on hearing this someone were to say: "Plato, as it seems, is claiming to know what is of advantage to democracy; yet when he has had it in his power to speak before the demos and to counsel it for the best he has never yet stood up and made a speech" — to this you may reply that "Plato was born late in the history of his country, and he found the demos already old and habituated by the previous statesmen to do many things at variance with his own counsel. For he would have given counsel to it, as to his father, with the greatest possible pleasure, had he not supposed that he would be running risks in vain, and would do no good. And I suppose that he would do the same as regards counselling me. For if he deemed us to be in an incurable state, he would bid us a long farewell and leave off giving counsel about me or my affairs."

Good-luck be thine!

VI

Plato to Hermeias and Erastus and Coriscus wishes well-doing.

Some God, as it seems plain to me, is preparing for you good fortune in a gracious and bountiful way, if only you accept it with grace. For you dwell near together as neighbors in close association so that you can help one another in the things of greatest importance. For Hermeias will find in his multitude of horses or of other military equipment, or even in the gaining of gold itself, no greater source of power for all purposes than in the gaining of steadfast friends possessed of a sound character; while Erastus and Coriscus, in addition to this fair Science of Ideas, need also — as I, old though I am, assert — the science which is a safeguard in dealing with the wicked and unjust, and a kind of self-defensive power. For they lack experience owing to the fact that they have spent a large part of their lives in company with us who are men of moderation and free from vice; and for this reason, as I have said, they need these additional qualities, so that they may not be compelled to neglect the true Science, and to pay more attention than is right to that which is human and necessitated. Now Hermeias, on the other hand, seems to me — so far as I can judge without having met him as yet — to possess this practical ability both by nature and also through the skill bred of experience. What, then, do I suggest? To you, Hermeias, I, who have made trial of Erastus and Coriscus more fully than you, affirm and proclaim and testify that you will not easily discover more trustworthy characters than these your neighbors; and I counsel you to hold fast to these men by every righteous means, and regard this as a duty of no secondary importance. To Coriscus and Erastus the counsel I give is this — that they in turn should hold fast to Hermeias, and endeavor by thus holding to one another to become united in the bonds of friendship. But in case any one of

you should be thought to be breaking up this union in any way — for what is human is not altogether durable — send a letter here to me and my friends stating the grounds of complaint; for I believe that — unless the disruption should happen to be serious — the arguments sent you from here by us, based on justice and reverence, will serve better than any incantation to weld you and bind you together once again into your former state of friendship and fellowship. If, then, all of us — both we and you — practice this philosophy, as each is able, to the utmost of our power, the prophecy I have now made will come true; but if we fail to do this, I keep silence as to the consequence; for the prophecy I am making is one of good omen, and I declare that we shall, God willing, do all these things well. All you three must read this letter, all together if possible, or if not by twos; and as often as you possibly can read it in common, and use it as a form of covenant and a binding law, as is right; and with an earnestness that is not out of tune combined with the playfulness that is sister to earnestness, swear by the God that is Ruler of all that is and that shall be, and swear by the Lord and Father of the Ruler and Cause, Whom, if we are real philosophers, we shall all know truly so far as men well-fortuned can.

VII

The seventh letter is addressed to Plato’s associates and the companions of Dion, most likely after Dion’s assassination in 353 BCE. It is the longest of the epistles and is now considered to be the most important. It contains a defense of Plato’s political activities in Syracuse as well as a long digression concerning the nature of philosophy, the theory of the forms, and the problems inherent to teaching. It also espouses the so called “unwritten doctrine” of Plato which urges that nothing of importance should be committed to writing.

Plato to Dion’s associates and friends wishes well-doing.

You wrote to me that I ought to consider that your policy was the same as that which Dion had; and moreover you charged me to support it, so far as I can, both by deed and word. Now if you really hold the same views and aims as he, I consent to support them, but if not, I will ponder the matter many times over. And what was his policy and his aim I will tell you, and that, as I may say, not from mere conjecture but from certain knowledge. For when I originally arrived at Syracuse, being about forty years old, Dion was of the age which Hipparinus has now reached, and the views which he had then come to hold he continued to hold unchanged; for he believed that the Syracusans ought to be free and dwell under the best laws. Consequently, it is no matter of surprise if some Deity has made Hipparinus also come to share his views about government and be of the same mind. Now the manner in which these views originated is a story well worth hearing for young and old alike, and I shall endeavor to narrate it to you from the beginning; for at the present moment it is opportune.

In my youth I went through the same experience as many other men. I fancied that if, early in life, I became my own master, I should at once embark on a political career. And I found myself confronted with the following occurrences in the public affairs of my own city. The existing constitution being generally condemned, a revolution took place, and fifty-one men came to the front as rulers of the revolutionary government, namely eleven in the city and ten in the Peiraeus — each of these bodies being in charge of the market and municipal matters — while thirty were appointed rulers with full powers over public affairs as a whole. Some of these were relatives and acquaintances of mine, and they at once invited me to share in their doings, as something to which I had a claim. The effect on me was not surprising in the case of a young man. I considered that they would, of course, so manage the State as to bring men out of a bad way of life into a good one. So I watched them very closely to see what they would do.

And seeing, as I did, that in quite a short time they made the former government seem by comparison something precious as gold — for among other things they tried to send a friend of mine, the aged Socrates, whom I should scarcely scruple to describe as the most upright man of that day, with some other persons to carry off one of the citizens by force to execution, in order that, whether he wished it, or not, he might share the guilt of their conduct; but he would not obey them, risking all consequences in preference to becoming a partner in their iniquitous deeds — seeing all these things and others of the same kind on a considerable scale, I disapproved of their proceedings, and withdrew from any connection with the abuses of the time.

Not long after that a revolution terminated the power of the thirty and the form of government as it then was. And once more, though with more hesitation, I began to be moved by the desire to take part in public and political affairs. Well, even in the new government, unsettled as it was, events occurred which one would naturally view with disapproval; and it was not surprising that in a period of revolution excessive penalties were inflicted by some persons on political opponents, though those who had returned from exile at that time showed very considerable forbearance. But once more it happened that some of those in power brought my friend Socrates, whom I have mentioned, to trial before a court of law, laying a most iniquitous charge against him and one most inappropriate in his case: for it was on a charge of impiety that some of them prosecuted and others condemned and executed the very man who would not participate in the iniquitous arrest of one of the friends of the party then in exile, at the time when they themselves were in exile and misfortune.

As I observed these incidents and the men engaged in public affairs, the laws too and the customs, the more closely I examined them and the farther I advanced in life, the more

difficult it seemed to me to handle public affairs aright. For it was not possible to be active in politics without friends and trustworthy supporters; and to find these ready to my hand was not an easy matter, since public affairs at Athens were not carried on in accordance with the manners and practices of our fathers; nor was there any ready method by which I could make new friends. The laws too, written and unwritten, were being altered for the worse, and the evil was growing with startling rapidity. The result was that, though at first I had been full of a strong impulse towards political life, as I looked at the course of affairs and saw them being swept in all directions by contending currents, my head finally began to swim; and, though I did not stop looking to see if there was any likelihood of improvement in these symptoms and in the general course of public life, I postponed action till a suitable opportunity should arise. Finally, it became clear to me, with regard to all existing communities, that they were one and all misgoverned. For their laws have got into a state that is almost incurable, except by some extraordinary reform with good luck to support it. And I was forced to say, when praising true philosophy that it is by this that men are enabled to see what justice in public and private life really is. Therefore, I said, there will be no cessation of evils for the sons of men, till either those who are pursuing a right and true philosophy receive sovereign power in the States, or those in power in the States by some dispensation of providence become true philosophers.

With these thoughts in my mind I came to Italy and Sicily on my first visit. My first impressions on arrival were those of strong disapproval — disapproval of the kind of life which was there called the life of happiness, stuffed full as it was with the banquets of the Italian Greeks and Syracusans, who ate to repletion twice every day, and were never without a partner for the night; and disapproval of the habits which this manner of life produces. For with these habits formed early in life, no man under heaven could possibly attain to wisdom — human nature

is not capable of such an extraordinary combination. Temperance also is out of the question for such a man; and the same applies to virtue generally. No city could remain in a state of tranquillity under any laws whatsoever, when men think it right to squander all their property in extravagant spending, and consider it a duty to be idle in everything else except eating and drinking and the laborious prosecution of debauchery. It follows necessarily that the constitutions of such cities must be constantly changing, tyrannies, oligarchies and democracies succeeding one another, while those who hold the power cannot so much as endure the name of any form of government which maintains justice and equality of rights.

With a mind full of these thoughts, on the top of my previous convictions, I crossed over to Syracuse — led there perhaps by chance — but it really looks as if some higher power was even then planning to lay a foundation for all that has now come to pass with regard to Dion and Syracuse — and for further troubles too, I fear, unless you listen to the advice which is now for the second time offered by me. What do I mean by saying that my arrival in Sicily at that movement proved to be the foundation on which all the sequel rests? I was brought into close intercourse with Dion who was then a young man, and explained to him my views as to the ideals at which men should aim, advising him to carry them out in practice. In doing this I seem to have been unaware that I was, in a fashion, without knowing it, contriving the overthrow of the tyranny which subsequently took place. For Dion, who rapidly assimilated my teaching as he did all forms of knowledge, listened to me with an eagerness which I had never seen equalled in any young man, and resolved to live for the future in a better way than the majority of Italian and Sicilian Greeks, having set his affection on virtue in preference to pleasure and self-indulgence. The result was that until the death of Dionysios he lived in a way which rendered him somewhat unpopular among those whose manner of life was that which is usual in the courts of despots.

After that event he came to the conclusion that this conviction, which he himself had gained under the influence of good teaching, was not likely to be confined to himself. Indeed, he saw it being actually implanted in other minds — not many perhaps, but certainly in some; and he thought that with the aid of the Gods, Dionysios might perhaps become one of these, and that, if such a thing did come to pass, the result would be a life of unspeakable happiness both for himself and for the rest of the Syracusans. Further, he thought it essential that I should come to Syracuse by all manner of means and with the utmost possible speed to be his partner in these plans, remembering in his own case how readily intercourse with me had produced in him a longing for the noblest and best life. And if it should produce a similar effect on Dionysios, as his aim was that it should, he had great hope that, without bloodshed, loss of life, and those disastrous events which have now taken place, he would be able to introduce the true life of happiness throughout the whole territory.

Holding these sound views, Dion persuaded Dionysios to send for me; he also wrote himself entreating me to come by all manner of means and with the utmost possible speed, before certain other persons coming in contact with Dionysios should turn him aside into some way of life other than the best. What he said, though perhaps it is rather long to repeat, was as follows: “What opportunities,” he said, “shall we wait for, greater than those now offered to us by Providence?” And he described the Syracusan empire in Italy and Sicily, his own influential position in it, and the youth of Dionysios and how strongly his desire was directed towards philosophy and education. His own nephews and relatives, he said, would be readily attracted towards the principles and manner of life described by me, and would be most influential in attracting Dionysios in the same direction, so that, now if ever, we should see the accomplishment of every hope that the same persons might actually become both philosophers and the rulers of great

States. These were the appeals addressed to me and much more to the same effect.

My own opinion, so far as the young men were concerned, and the probable line which their conduct would take, was full of apprehension — for young men are quick in forming desires, which often take directions conflicting with one another. But I knew that the character of Dion's mind was naturally a stable one and had also the advantage of somewhat advanced years.

Therefore, I pondered the matter and was in two minds as to whether I ought to listen to entreaties and go, or how I ought to act; and finally the scale turned in favour of the view that, if ever anyone was to try to carry out in practice my ideas about laws and constitutions, now was the time for making the attempt; for if only I could fully convince one man, I should have secured thereby the accomplishment of all good things.

With these views and thus nerved to the task, I sailed from home, in the spirit which some imagined, but principally through a feeling of shame with regard to myself, lest I might some day appear to myself wholly and solely a mere man of words, one who would never of his own will lay his hand to any act. Also there was reason to think that I should be betraying first and foremost my friendship and comradeship with Dion, who in very truth was in a position of considerable danger. If therefore anything should happen to him, or if he were banished by Dionysios and his other enemies and coming to us as exile addressed this question to me: "Plato, I have come to you as a fugitive, not for want of hoplites, nor because I had no cavalry for defence against my enemies, but for want of words and power of persuasion, which I knew to be a special gift of yours, enabling you to lead young men into the path of goodness and justice, and to establish in every case relations of friendship and comradeship among them. It is for the want of this assistance on your part that I have left Syracuse and am here now. And the disgrace attaching to your treatment of me is a small matter.

But philosophy — whose praises you are always singing, while you say she is held in dishonour by the rest of mankind — must we not say that philosophy along with me has now been betrayed, so far as your action was concerned? Had I been living at Megara, you would certainly have come to give me your aid towards the objects for which I asked it; or you would have thought yourself the most contemptible of mankind. But as it is, do you think that you will escape the reputation of cowardice by making excuses about the distance of the journey, the length of the sea voyage, and the amount of labour involved? Far from it." To reproaches of this kind what creditable reply could I have made? Surely none.

I took my departure, therefore, acting, so far as a man can act, in obedience to reason and justice, and for these reasons leaving my own occupations, which were certainly not discreditable ones, to put myself under a tyranny which did not seem likely to harmonise with my teaching or with myself. By my departure I secured my own freedom from the displeasure of Zeus Xenios, and made myself clear of any charge on the part of philosophy, which would have been exposed to detraction, if any disgrace had come upon me for faint-heartedness and cowardice.

On my arrival, to cut a long story short, I found the court of Dionysios full of intrigues and of attempts to create in the sovereign ill-feeling against Dion. I combated these as far as I could, but with very little success; and in the fourth month or thereabouts, charging Dion with conspiracy to seize the throne, Dionysios put him on board a small boat and expelled him from Syracuse with ignominy. All of us who were Dion's friends were afraid that he might take vengeance on one or other of us as an accomplice in Dion's conspiracy. With regard to me, there was even a rumour current in Syracuse that I had been put to death by Dionysios as the cause of all that had occurred. Perceiving that we were all in this state of mind and apprehending that our fears might lead to some serious consequence, he now tried to

win all of us over by kindness: me in particular he encouraged, bidding me be of good cheer and entreating me on all grounds to remain. For my flight from him was not likely to redound to his credit, but my staying might do so. Therefore, he made a great pretence of entreating me. And we know that the entreaties of sovereigns are mixed with compulsion. So to secure his object he proceeded to render my departure impossible, bringing me into the acropolis, and establishing me in quarters from which not a single ship's captain would have taken me away against the will of Dionysios, nor indeed without a special messenger sent by him to order my removal. Nor was there a single merchant, or a single official in charge of points of departure from the country, who would have allowed me to depart unaccompanied, and would not have promptly seized me and taken me back to Dionysios, especially since a statement had now been circulated contradicting the previous rumours and giving out that Dionysios was becoming extraordinarily attached to Plato. What were the facts about this attachment? I must tell the truth. As time went on, and as intercourse made him acquainted with my disposition and character, he did become more and more attached to me, and wished me to praise him more than I praised Dion, and to look upon him as more specially my friend than Dion, and he was extraordinarily eager about this sort of thing. But when confronted with the one way in which this might have been done, if it was to be done at all, he shrank from coming into close and intimate relations with me as a pupil and listener to my discourses on philosophy, fearing the danger suggested by mischief-makers, that he might be ensnared, and so Dion would prove to have accomplished all his object. I endured all this patiently, retaining the purpose with which I had come and the hope that he might come to desire the philosophic life. But his resistance prevailed against me.

The time of my first visit to Sicily and my stay there was taken up with all these incidents. On a later occasion I left home and again came on an urgent summons from Dionysios. But before

giving the motives and particulars of my conduct then and showing how suitable and right it was, I must first, in order that I may not treat as the main point what is only a side issue, give you my advice as to what your acts should be in the present position of affairs; afterwards, to satisfy those who put the question why I came a second time, I will deal fully with the facts about my second visit; what I have now to say is this.

He who advises a sick man, whose manner of life is prejudicial to health, is clearly bound first of all to change his patient's manner of life, and if the patient is willing to obey him, he may go on to give him other advice. But if he is not willing, I shall consider one who declines to advise such a patient to be a man and a physician, and one who gives in to him to be unmanly and unprofessional. In the same way with regard to a State, whether it be under a single ruler or more than one, if, while the government is being carried on methodically and in a right course, it asks advice about any details of policy, it is the part of a wise man to advise such people. But when men are travelling altogether outside the path of right government and flatly refuse to move in the right path, and start by giving notice to their adviser that he must leave the government alone and make no change in it under penalty of death — if such men should order their counsellors to pander to their wishes and desires and to advise them in what way their object may most readily and easily be once for all accomplished, I should consider as unmanly one who accepts the duty of giving such forms of advice, and one who refuses it to be a true man.

Holding these views, whenever anyone consults me about any of the weightiest matters affecting his own life, as, for instance, the acquisition of property or the proper treatment of body or mind, if it seems to me that his daily life rests on any system, or if he seems likely to listen to advice about the things on which he consults me, I advise him with readiness, and do not content myself with giving him a merely perfunctory answer. But if a

man does not consult me at all, or evidently does not intend to follow my advice, I do not take the initiative in advising such a man, and will not use compulsion to him, even if he be my own son. I would advise a slave under such circumstances, and would use compulsion to him if he were unwilling. To a father or mother I do not think that piety allows one to offer compulsion, unless they are suffering from an attack of insanity; and if they are following any regular habits of life which please them but do not please me, I would not offend them by offering useless advice, nor would I flatter them or truckle to them, providing them with the means of satisfying desires which I myself would sooner die than cherish. The wise man should go through life with the same attitude of mind towards his country. If she should appear to him to be following a policy which is not a good one, he should say so, provided that his words are not likely either to fall on deaf ears or to lead to the loss of his own life. But force against his native land he should not use in order to bring about a change of constitution, when it is not possible for the best constitution to be introduced without driving men into exile or putting them to death; he should keep quiet and offer up prayers for his own welfare and for that of his country.

These are the principles in accordance with which I should advise you, as also, jointly with Dion, I advised Dionysios, bidding him in the first place to live his daily life in a way that would make him as far as possible master of himself and able to gain faithful friends and supporters, in order that he might not have the same experience as his father. For his father, having taken under his rule many great cities of Sicily which had been utterly destroyed by the barbarians, was not able to found them afresh and to establish in them trustworthy governments carried on by his own supporters, either by men who had no ties of blood with him, or by his brothers whom he had brought up when they were younger, and had raised from humble station to high office and from poverty to immense wealth. Not one of these was he able to work upon by persuasion, instruction,

services and ties of kindred, so as to make him a partner in his rule; and he showed himself inferior to Darius with a sevenfold inferiority. For Darius did not put his trust in brothers or in men whom he had brought up, but only in his confederates in the overthrow of the Mede and Eunuch; and to these he assigned portions of his empire, seven in number, each of them greater than all Sicily; and they were faithful to him and did not attack either him or one another. Thus he showed a pattern of what the good lawgiver and king ought to be; for he drew up laws by which he has secured the Persian empire in safety down to the present time.

Again, to give another instance, the Athenians took under their rule very many cities not founded by themselves, which had been hard hit by the barbarians but were still in existence, and maintained their rule over these for seventy years, because they had in each of them men whom they could trust. But Dionysios, who had gathered the whole of Sicily into a single city, and was so clever that he trusted no one, only secured his own safety with great difficulty. For he was badly off for trustworthy friends; and there is no surer criterion of virtue and vice than this, whether a man is or is not destitute of such friends.

This, then, was the advice which Dion and I gave to Dionysios, since, owing to the bringing up which he had received from his father, he had had no advantages in the way of education or of suitable lessons, in the first place . . . ; and, in the second place, that, after starting in this way, he should make friends of others among his connections who were of the same age and were in sympathy with his pursuit of virtue, but above all that he should be in harmony with himself; for this it was of which he was remarkably in need. This we did not say in plain words, for that would not have been safe; but in covert language we maintained that every man in this way would save both himself and those whom he was leading, and if he did not follow this path, he would do just the opposite of this. And after proceeding on the

course which we described, and making himself a wise and temperate man, if he were then to found again the cities of Sicily which had been laid waste, and bind them together by laws and constitutions, so as to be loyal to him and to one another in their resistance to the attacks of the barbarians, he would, we told him, make his father's empire not merely double what it was but many times greater. For, if these things were done, his way would be clear to a more complete subjugation of the Carthaginians than that which befell them in Gelon's time, whereas in our own day his father had followed the opposite course of levying attribute for the barbarians. This was the language and these the exhortations given by us, the conspirators against Dionysios according to the charges circulated from various sources — charges which, prevailing as they did with Dionysios, caused the expulsion of Dion and reduced me to a state of apprehension. But when — to summarise great events which happened in no great time — Dion returned from the Peloponnese and Athens, his advice to Dionysios took the form of action.

To proceed — when Dion had twice over delivered the city and restored it to the citizens, the Syracusans went through the same changes of feeling towards him as Dionysios had gone through, when Dion attempted first to educate him and train him to be a sovereign worthy of supreme power and, when that was done, to be his coadjutor in all the details of his career. Dionysios listened to those who circulated slanders to the effect that Dion was aiming at the tyranny in all the steps which he took at that time, his intention being that Dionysios, when his mind had fallen under the spell of culture, should neglect the government and leave it in his hands, and that he should then appropriate it for himself and treacherously depose Dionysios. These slanders were victorious on that occasion; they were so once more when circulated among the Syracusans, winning a victory which took an extraordinary course and proved disgraceful to its authors. The story of what then took place is

one which deserves careful attention on the part of those who are inviting me to deal with the present situation.

I, an Athenian and friend of Dion, came as his ally to the court of Dionysios, in order that I might create good will in place of a state of war; in my conflict with the authors of these slanders I was worsted. When Dionysios tried to persuade me by offers of honours and wealth to attach myself to him, and with a view to giving a decent colour to Dion's expulsion a witness and friend on his side, he failed completely in his attempt. Later on, when Dion returned from exile, he took with him from Athens two brothers, who had been his friends, not from community in philosophic study, but with the ordinary companionship common among most friends, which they form as the result of relations of hospitality and the intercourse which occurs when one man initiates the other in the mysteries. It was from this kind of intercourse and from services connected with his return that these two helpers in his restoration became his companions. Having come to Sicily, when they perceived that Dion had been misrepresented to the Sicilian Greeks, whom he had liberated, as one that plotted to become monarch, they not only betrayed their companion and friend, but shared personally in the guilt of his murder, standing by his murderers as supporters with weapons in their hands. The guilt and impiety of their conduct I neither excuse nor do I dwell upon it. For many others make it their business to harp upon it, and will make it their business in the future. But I do take exception to the statement that, because they were Athenians, they have brought shame upon this city. For I say that he too is an Athenian who refused to betray this same Dion, when he had the offer of riches and many other honours. For his was no common or vulgar friendship, but rested on community in liberal education, and this is the one thing in which a wise man will put his trust, far more than in ties of personal and bodily kinship. So the two murderers of Dion were not of sufficient importance to be causes of disgrace to this city, as though they had been men of any note.

All this has been said with a view to counselling the friends and family of Dion. And in addition to this I give for the third time to you the same advice and counsel which I have given twice before to others — not to enslave Sicily or any other State to despots — this is my counsel — but to put it under the rule of laws — for the other course is better neither for the enslavers nor for the enslaved, for themselves, their children's children and descendants; the attempt is in every way fraught with disaster. It is only small and mean natures that are bent upon seizing such gains for themselves, natures that know nothing of goodness and justice, divine as well as human, in this life and in the next.

These are the lessons which I tried to teach, first to Dion, secondly to Dionysios, and now for the third time to you. Do you obey me thinking of Zeus the Preserver, the patron of third ventures, and looking at the lot of Dionysios and Dion, of whom the one who disobeyed me is living in dishonour, while he who obeyed me has died honourably. For the one thing which is wholly right and noble is to strive for that which is most honourable for a man's self and for his country, and to face the consequences whatever they may be. For none of us can escape death, nor, if a man could do so, would it, as the vulgar suppose, make him happy. For nothing evil or good, which is worth mentioning at all, belongs to things soulless; but good or evil will be the portion of every soul, either while attached to the body or when separated from it.

And we should in very truth always believe those ancient and sacred teachings, which declare that the soul is immortal, that it has judges, and suffers the greatest penalties when it has been separated from the body. Therefore also we should consider it a lesser evil to suffer great wrongs and outrages than to do them. The covetous man, impoverished as he is in the soul, turns a deaf ear to this teaching; or if he hears it, he laughs it to scorn with fancied superiority, and shamelessly snatches for himself

from every source whatever his bestial fancy supposes will provide for him the means of eating or drinking or glutting himself with that slavish and gross pleasure which is falsely called after the goddess of love. He is blind and cannot see in those acts of plunder which are accompanied by impiety what heinous guilt is attached to each wrongful deed, and that the offender must drag with him the burden of this impiety while he moves about on earth, and when he has travelled beneath the earth on a journey which has every circumstance of shame and misery.

It was by urging these and other like truths that I convinced Dion, and it is I who have the best right to be angered with his murderers in much the same way as I have with Dionysios. For both they and he have done the greatest injury to me, and I might almost say to all mankind, they by slaying the man that was willing to act righteously, and he by refusing to act righteously during the whole of his rule, when he held supreme power, in which rule if philosophy and power had really met together, it would have sent forth a light to all men, Greeks and barbarians, establishing fully for all the true belief that there can be no happiness either for the community or for the individual man, unless he passes his life under the rule of righteousness with the guidance of wisdom, either possessing these virtues in himself, or living under the rule of godly men and having received a right training and education in morals. These were the aims which Dionysios injured, and for me everything else is a trifling injury compared with this.

The murderer of Dion has, without knowing it, done the same as Dionysios. For as regards Dion, I know right well, so far as it is possible for a man to say anything positively about other men, that, if he had got the supreme power, he would never have turned his mind to any other form of rule, but that, dealing first with Syracuse, his own native land, when he had made an end of her slavery, clothed her in bright apparel, and given her the

garb of freedom, he would then by every means in his power have ordered aright the lives of his fellow-citizens by suitable and excellent laws; and the thing next in order, which he would have set his heart to accomplish, was to found again all the States of Sicily and make them free from the barbarians, driving out some and subduing others, an easier task for him than it was for Hiero. If these things had been accomplished by a man who was just and brave and temperate and a philosopher, the same belief with regard to virtue would have been established among the majority which, if Dionysios had been won over, would have been established, I might almost say, among all mankind and would have given them salvation. But now some higher power or avenging fiend has fallen upon them, inspiring them with lawlessness, godlessness and acts of recklessness issuing from ignorance, the seed from which all evils for all mankind take root and grow and will in future bear the bitterest harvest for those who brought them into being. This ignorance it was which in that second venture wrecked and ruined everything.

And now, for good luck’s sake, let us on this third venture abstain from words of ill omen. But, nevertheless, I advise you, his friends, to imitate in Dion his love for his country and his temperate habits of daily life, and to try with better auspices to carry out his wishes — what these were, you have heard from me in plain words. And whoever among you cannot live the simple Dorian life according to the customs of your forefathers, but follows the manner of life of Dion’s murderers and of the Sicilians, do not invite this man to join you, or expect him to do any loyal or salutary act; but invite all others to the work of resettling all the States of Sicily and establishing equality under the laws, summoning them from Sicily itself and from the whole Peloponnese — and have no fear even of Athens; for there, also, are men who excel all mankind in their devotion to virtue and in hatred of the reckless acts of those who shed the blood of friends.

But if, after all, this is work for a future time, whereas immediate action is called for by the disorders of all sorts and kinds which arise every day from your state of civil strife, every man to whom Providence has given even a moderate share of right intelligence ought to know that in times of civil strife there is no respite from trouble till the victors make an end of feeding their grudge by combats and banishments and executions, and of wreaking their vengeance on their enemies. They should master themselves and, enacting impartial laws, framed not to gratify themselves more than the conquered party, should compel men to obey these by two restraining forces, respect and fear; fear, because they are the masters and can display superior force; respect, because they rise superior to pleasures and are willing and able to be servants to the laws. There is no other way save this for terminating the troubles of a city that is in a state of civil strife; but a constant continuance of internal disorders, struggles, hatred and mutual distrust is the common lot of cities which are in that plight.

Therefore, those who have for the time being gained the upper hand, when they desire to secure their position, must by their own act and choice select from all Hellas men whom they have ascertained to be the best for the purpose. These must in the first place be men of mature years, who have children and wives at home, and, as far as possible, a long line of ancestors of good repute, and all must be possessed of sufficient property. For a city of ten thousand householders their numbers should be fifty; that is enough. These they must induce to come from their own homes by entreaties and the promise of the highest honours; and having induced them to come they must entreat and command them to draw up laws after binding themselves by oath to show no partiality either to conquerors or to conquered, but to give equal and common rights to the whole State.

When laws have been enacted, what everything then hinges on is this. If the conquerors show more obedience to the laws than

the conquered, the whole State will be full of security and happiness, and there will be an escape from all your troubles. But if they do not, then do not summon me or any other helper to aid you against those who do not obey the counsel I now give you. For this course is akin to that which Dion and I attempted to carry out with our hearts set on the welfare of Syracuse. It is indeed a second best course. The first and best was that scheme of welfare to all mankind which we attempted to carry out with the co-operation of Dionysios; but some chance, mightier than men, brought it to nothing. Do you now, with good fortune attending you and with Heaven's help, try to bring your efforts to a happier issue.

Let this be the end of my advice and injunction and of the narrative of my first visit to Dionysios. Whoever wishes may next hear of my second journey and voyage, and learn that it was a reasonable and suitable proceeding. My first period of residence in Sicily was occupied in the way which I related before giving my advice to the relatives and friends of Dion. After those events I persuaded Dionysios by such arguments as I could to let me go; and we made an agreement as to what should be done when peace was made; for at that time there was a state of war in Sicily. Dionysios said that, when he had put the affairs of his empire in a position of greater safety for himself, he would send for Dion and me again; and he desired that Dion should regard what had befallen him not as an exile, but as a change of residence. I agreed to come again on these conditions.

When peace had been made, he began sending for me; he requested that Dion should wait for another year, but begged that I should by all means come. Dion now kept urging and entreating me to go. For persistent rumours came from Sicily that Dionysios was now once more possessed by an extraordinary desire for philosophy. For this reason Dion pressed me urgently not to decline his invitation. But though I was well aware that as regards philosophy such symptoms were

not uncommon in young men, still it seemed to me safer at that time to part company altogether with Dion and Dionysios; and I offended both of them by replying that I was an old man, and that the steps now being taken were quite at variance with the previous agreement.

After this, it seems, Archytes came to the court of Dionysios. Before my departure I had brought him and his Tarentine circle into friendly relations with Dionysios. There were some others in Syracuse who had received some instruction from Dion, and others had learnt from these, getting their heads full of erroneous teaching on philosophical questions. These, it seems, were attempting to hold discussions with Dionysios on questions connected with such subjects, in the idea that he had been fully instructed in my views. Now he is not at all devoid of natural gifts for learning, and he has a great craving for honour and glory. What was said probably pleased him, and he felt some shame when it became clear that he had not taken advantage of my teaching during my visit. For these reasons he conceived a desire for more definite instruction, and his love of glory was an additional incentive to him. The real reasons why he had learnt nothing during my previous visit have just been set forth in the preceding narrative. Accordingly, now that I was safe at home and had refused his second invitation, as I just now related, Dionysios seems to have felt all manner of anxiety lest certain people should suppose that I was unwilling to visit him again because I had formed a poor opinion of his natural gifts and character, and because, knowing as I did his manner of life, I disapproved of it.

It is right for me to speak the truth, and make no complaint if anyone, after hearing the facts, forms a poor opinion of my philosophy, and thinks that the tyrant was in the right. Dionysios now invited me for the third time, sending a trireme to ensure me comfort on the voyage; he sent also Archedemos — one of those who had spent some time with Archytes, and of whom he

supposed that I had a higher opinion than of any of the Sicilian Greeks — and, with him, other men of repute in Sicily. These all brought the same report, that Dionysios had made progress in philosophy. He also sent a very long letter, knowing as he did my relations with Dion and Dion's eagerness also that I should take ship and go to Syracuse. The letter was framed in its opening sentences to meet all these conditions, and the tenor of it was as follows: "Dionysios to Plato," here followed the customary greeting and immediately after it he said, "If in compliance with our request you come now, in the first place, Dion's affairs will be dealt with in whatever way you yourself desire; I know that you will desire what is reasonable, and I shall consent to it. But if not, none of Dion's affairs will have results in accordance with your wishes, with regard either to Dion himself or to other matters." This he said in these words; the rest it would be tedious and inopportune to quote. Other letters arrived from Archytes and the Tarentines, praising the philosophical studies of Dionysios and saying that, if I did not now come, I should cause a complete rupture in their friendship with Dionysios, which had been brought about by me and was of no small importance to their political interests.

When this invitation came to me at that time in such terms, and those who had come from Sicily and Italy were trying to drag me thither, while my friends at Athens were literally pushing me out with their urgent entreaties, it was the same old tale — that I must not betray Dion and my Tarentine friends and supporters. Also I myself had a lurking feeling that there was nothing surprising in the fact that a young man, quick to learn, hearing talk of the great truths of philosophy, should feel a craving for the higher life. I thought therefore that I must put the matter definitely to the test to see whether his desire was genuine or the reverse, and on no account leave such an impulse unaided nor make myself responsible for such a deep and real disgrace, if the reports brought by anyone were really true. So blindfolding myself with this reflection, I set out, with many

fears and with no very favourable anticipations, as was natural enough. However, I went, and my action on this occasion at any rate was really a case of “the third to the Preserver,” for I had the good fortune to return safely; and for this I must, next to the God, thank Dionysios, because, though many wished to make an end of me, he prevented them and paid some proper respect to my situation.

On my arrival, I thought that first I must put to the test the question whether Dionysios had really been kindled with the fire of philosophy, or whether all the reports which had come to Athens were empty rumours. Now there is a way of putting such things to the test which is not to be despised and is well suited to monarchs, especially to those who have got their heads full of erroneous teaching, which immediately upon my arrival I found to be very much the case with Dionysios. One should show such men what philosophy is in all its extent; what their range of studies is by which it is approached, and how much labour it involves. For the man who has heard this, if he has the true philosophic spirit and that godlike temperament which makes him akin to philosophy and worthy of it, thinks that he has been told of a marvellous road lying before him, that he must forthwith press on with all his strength, and that life is not worth living if he does anything else. After this he uses to the full his own powers and those of his guide in the path, and relaxes not his efforts, till he has either reached the end of the whole course of study or gained such power that he is not incapable of directing his steps without the aid of a guide. This is the spirit and these are the thoughts by which such a man guides his life, carrying out his work, whatever his occupation may be, but throughout it all ever cleaving to philosophy and to such rules of diet in his daily life as will give him inward sobriety and therewith quickness in learning, a good memory, and reasoning power; the kind of life which is opposed to this he consistently hates. Those who have not the true philosophic temper, but a mere surface colouring of opinions penetrating, like sunburn,

only skin deep, when they see how great the range of studies is, how much labour is involved in it, and how necessary to the pursuit it is to have an orderly regulation of the daily life, come to the conclusion that the thing is difficult and impossible for them, and are actually incapable of carrying out the course of study; while some of them persuade themselves that they have sufficiently studied the whole matter and have no need of any further effort. This is the sure test and is the safest one to apply to those who live in luxury and are incapable of continuous effort; it ensures that such a man shall not throw the blame upon his teacher but on himself, because he cannot bring to the pursuit all the qualities necessary to it. Thus it came about that I said to Dionysios what I did say on that occasion.

I did not, however, give a complete exposition, nor did Dionysios ask for one. For he professed to know many, and those the most important, points, and to have a sufficient hold of them through instruction given by others. I hear also that he has since written about what he heard from me, composing what professes to be his own handbook, very different, so he says, from the doctrines which he heard from me; but of its contents I know nothing; I know indeed that others have written on the same subjects; but who they are, is more than they know themselves. Thus much at least, I can say about all writers, past or future, who say they know the things to which I devote myself, whether by hearing the teaching of me or of others, or by their own discoveries — that according to my view it is not possible for them to have any real skill in the matter. There neither is nor ever will be a treatise of mine on the subject. For it does not admit of exposition like other branches of knowledge; but after much converse about the matter itself and a life lived together, suddenly a light, as it were, is kindled in one soul by a flame that leaps to it from another, and thereafter sustains itself. Yet this much I know — that if the things were written or put into words, it would be done best by me, and that, if they were written badly, I should be the person most pained. Again, if they had

appeared to me to admit adequately of writing and exposition, what task in life could I have performed nobler than this, to write what is of great service to mankind and to bring the nature of things into the light for all to see? But I do not think it a good thing for men that there should be a disquisition, as it is called, on this topic — except for some few, who are able with a little teaching to find it out for themselves. As for the rest, it would fill some of them quite illogically with a mistaken feeling of contempt, and others with lofty and vain-glorious expectations, as though they had learnt something high and mighty.

On this point I intend to speak a little more at length; for perhaps, when I have done so, things will be clearer with regard to my present subject. There is an argument which holds good against the man who ventures to put anything whatever into writing on questions of this nature; it has often before been stated by me, and it seems suitable to the present occasion.

For everything that exists there are three instruments by which the knowledge of it is necessarily imparted; fourth, there is the knowledge itself, and, as fifth, we must count the thing itself which is known and truly exists. The first is the name, the second the definition, the third the image, and the fourth the knowledge. If you wish to learn what I mean, take these in the case of one instance, and so understand them in the case of all. A circle is a thing spoken of, and its name is that very word which we have just uttered. The second thing belonging to it is its definition, made up names and verbal forms. For that which has the name “round,” “annular,” or, “circle,” might be defined as that which has the distance from its circumference to its centre everywhere equal. Third, comes that which is drawn and rubbed out again, or turned on a lathe and broken up — none of which things can happen to the circle itself — to which the other things mentioned have reference; for it is something of a different order from them. Fourth, comes knowledge,

intelligence and right opinion about these things. Under this one head we must group everything which has its existence, not in words nor in bodily shapes, but in souls — from which it is clear that it is something different from the nature of the circle itself and from the three things mentioned before. Of these things intelligence comes closest in kinship and likeness to the fifth, and the others are farther distant.

The same applies to straight as well as to circular form, to colours, to the good, the beautiful, the just, to all bodies whether manufactured or coming into being in the course of nature, to fire, water, and all such things, to every living being, to character in souls, and to all things done and suffered. For in the case of all these, no one, if he has not somehow or other got hold of the four things first mentioned, can ever be completely a partaker of knowledge of the fifth. Further, on account of the weakness of language, these (i.e., the four) attempt to show what each thing is like, not less than what each thing is. For this reason no man of intelligence will venture to express his philosophical views in language, especially not in language that is unchangeable, which is true of that which is set down in written characters.

Again you must learn the point which comes next. Every circle, of those which are by the act of man drawn or even turned on a lathe, is full of that which is opposite to the fifth thing. For everywhere it has contact with the straight. But the circle itself, we say, has nothing in either smaller or greater, of that which is its opposite. We say also that the name is not a thing of permanence for any of them, and that nothing prevents the things now called round from being called straight, and the straight things round; for those who make changes and call things by opposite names, nothing will be less permanent (than a name). Again with regard to the definition, if it is made up of names and verbal forms, the same remark holds that there is no sufficiently durable permanence in it. And there is no end to the

instances of the ambiguity from which each of the four suffers; but the greatest of them is that which we mentioned a little earlier, that, whereas there are two things, that which has real being, and that which is only a quality, when the soul is seeking to know, not the quality, but the essence, each of the four presenting to the soul by word and in act that which it is not seeking (i.e., the quality), a thing open to refutation by the senses, being merely the thing presented to the soul in each particular case whether by statement or the act of showing, fills, one may say, every man with puzzlement and perplexity.

Now in subjects in which, by reason of our defective education, we have not been accustomed even to search for the truth, but are satisfied with whatever images are presented to us, we are not held up to ridicule by one another, the questioned by questioners, who can pull to pieces and criticise the four things. But in subjects where we try to compel a man to give a clear answer about the fifth, any one of those who are capable of overthrowing an antagonist gets the better of us, and makes the man, who gives an exposition in speech or writing or in replies to questions, appear to most of his hearers to know nothing of the things on which he is attempting to write or speak; for they are sometimes not aware that it is not the mind of the writer or speaker which is proved to be at fault, but the defective nature of each of the four instruments. The process however of dealing with all of these, as the mind moves up and down to each in turn, does after much effort give birth in a well-constituted mind to knowledge of that which is well constituted. But if a man is ill-constituted by nature (as the state of the soul is naturally in the majority both in its capacity for learning and in what is called moral character) — or it may have become so by deterioration — not even Lynceus could endow such men with the power of sight.

In one word, the man who has no natural kinship with this matter cannot be made akin to it by quickness of learning or

memory; for it cannot be engendered at all in natures which are foreign to it. Therefore, if men are not by nature or kinship allied to justice and all other things that are honourable, though they may be good at learning and remembering other knowledge of various kinds — or if they have the kinship but are slow learners and have no memory — none of all these will ever learn to the full the truth about virtue and vice. For both must be learnt together; and together also must be learnt, by complete and long continued study, as I said at the beginning, the true and the false about all that has real being. After much effort, as names, definitions, sights, and other data of sense are brought into contact and friction one with another, in the course of scrutiny and kindly testing by men who proceed by question and answer without ill will, with a sudden flash there shines forth understanding about every problem, and an intelligence whose efforts reach the furthest limits of human powers. Therefore every man of worth, when dealing with matters of worth, will be far from exposing them to ill feeling and misunderstanding among men by committing them to writing. In one word, then, it may be known from this that, if one sees written treatises composed by anyone, either the laws of a lawgiver, or in any other form whatever, these are not for that man the things of most worth, if he is a man of worth, but that his treasures are laid up in the fairest spot that he possesses. But if these things were worked at by him as things of real worth, and committed to writing, then surely, not gods, but men “have themselves bereft him of his wits.”

Anyone who has followed this discourse and digression will know well that, if Dionysios or anyone else, great or small, has written a treatise on the highest matters and the first principles of things, he has, so I say, neither heard nor learnt any sound teaching about the subject of his treatise; otherwise, he would have had the same reverence for it, which I have, and would have shrunk from putting it forth into a world of discord and uncomeliness. For he wrote it, not as an aid to memory — since

there is no risk of forgetting it, if a man's soul has once laid hold of it; for it is expressed in the shortest of statements — but if he wrote it at all, it was from a mean craving for honour, either putting it forth as his own invention, or to figure as a man possessed of culture, of which he was not worthy, if his heart was set on the credit of possessing it. If then Dionysios gained this culture from the one lesson which he had from me, we may perhaps grant him the possession of it, though how he acquired it — God wot, as the Theban says; for I gave him the teaching, which I have described, on that one occasion and never again.

The next point which requires to be made clear to anyone who wishes to discover how things really happened, is the reason why it came about that I did not continue my teaching in a second and third lesson and yet oftener. Does Dionysios, after a single lesson, believe himself to know the matter, and has he an adequate knowledge of it, either as having discovered it for himself or learnt it before from others, or does he believe my teaching to be worthless, or, thirdly, to be beyond his range and too great for him, and himself to be really unable to live as one who gives his mind to wisdom and virtue? For if he thinks it worthless, he will have to contend with many who say the opposite, and who would be held in far higher repute as judges than Dionysios; if, on the other hand, he thinks he has discovered or learnt the things and that they are worth having as part of a liberal education, how could he, unless he is an extraordinary person, have so recklessly dishonoured the master who has led the way in these subjects? How he dishonoured him, I will now state.

Up to this time he had allowed Dion to remain in possession of his property and to receive the income from it. But not long after the foregoing events, as if he had entirely forgotten his letter to that effect, he no longer allowed Dion's trustees to send him remittances to the Peloponnese, on the pretence that the owner of the property was not Dion but Dion's son, his own

nephew, of whom he himself was legally the trustee. These were the actual facts which occurred up to the point which we have reached. They had opened my eyes as to the value of Dionysios' desire for philosophy, and I had every right to complain, whether I wished to do so or not. Now by this time it was summer and the season for sea voyages; therefore I decided that I must not be vexed with Dionysios rather than with myself and those who had forced me to come for the third time into the strait of Scylla, that once again I might to fell Charybdis measure back my course, but must tell Dionysios that it was impossible for me to remain after this outrage had been put upon Dion. He tried to soothe me and begged me to remain, not thinking it desirable for himself that I should arrive post haste in person as the bearer of such tidings. When his entreaties produced no effect, he promised that he himself would provide me with transport. For my intention was to embark on one of the trading ships and sail away, being indignant and thinking it my duty to face all dangers, in case I was prevented from going — since plainly and obviously I was doing no wrong, but was the party wronged.

Seeing me not at all inclined to stay, he devised the following scheme to make me stay during that sailing season. On the next day he came to me and made a plausible proposal: "Let us put an end," he said, "to these constant quarrels between you and me about Dion and his affairs. For your sake I will do this for Dion. I require him to take his own property and reside in the Peloponnese, not as an exile, but on the understanding that it is open for him to migrate here, when this step has the joint approval of himself, me, and you his friends; and this shall be open to him on the understanding that he does not plot against me. You and your friends and Dion's friends here must be sureties for him in this, and he must give you security. Let the funds which he receives be deposited in the Peloponnese and at Athens, with persons approved by you, and let Dion enjoy the income from them but have no power to take them out of

deposit without the approval of you and your friends. For I have no great confidence in him, that, if he has this property at his disposal, he will act justly towards me, for it will be no small amount; but I have more confidence in you and your friends. See if this satisfies you; and on these conditions remain for the present year, and at the next season you shall depart taking the property with you. I am quite sure that Dion will be grateful to you, if you accomplish so much on his behalf."

When I heard this proposal I was vexed, but after reflection said I would let him know my view of it on the following day. We agreed to that effect for the moment, and afterwards when I was by myself I pondered the matter in much distress. The first reflection that came up, leading the way in my self-communing, was this: "Come, suppose that Dionysios intends to do none of the things which he has mentioned, but that, after my departure, he writes a plausible letter to Dion, and orders several of his creatures to write to the same effect, telling him of the proposal which he has now made to me, making out that he was willing to do what he proposed, but that I refused and completely neglected Dion's interests. Further, suppose that he is not willing to allow my departure, and without giving personal orders to any of the merchants, makes it clear, as he easily can, to all that he not wish me to sail, will anyone consent to take me as a passenger, when I leave the house of Dionysios?"

For in addition to my other troubles, I was lodging at that time in the garden which surrounds his house, from which even the gatekeeper would have refused to let me go, unless an order had been sent to him from Dionysios. "Suppose however that I wait for the year, I shall be able to write word of these things to Dion, stating the position in which I am, and the steps which I am trying to take. And if Dionysios does any of the things which he says, I shall have accomplished something that is not altogether to be sneered at; for Dion's property is, at a fair estimate, perhaps not less than a hundred talents. If however

the prospect which I see looming in the future takes the course which may reasonably be expected, I know not what I shall do with myself. Still it is perhaps necessary to go on working for a year, and to attempt to prove by actual fact the machinations of Dionysios."

Having come to this decision, on the following day I said to Dionysios, "I have decided to remain. But," I continued, "I must ask that you will not regard me as empowered to act for Dion, but will along with me write a letter to him, stating what has now been decided, and enquire whether this course satisfies him. If it does not, and if he has other wishes and demands, he must write particulars of them as soon as possible, and you must not as yet take any hasty step with regard to his interests."

This was what was said and this was the agreement which was made, almost in these words. Well, after this the trading-ships took their departure, and it was no longer possible for me to take mine, when Dionysios, if you please, addressed me with the remark that half the property must be regarded as belonging to Dion and half to his son. Therefore, he said, he would sell it, and when it was sold would give half to me to take away, and would leave half on the spot for the son. This course, he said, was the most just. This proposal was a blow to me, and I thought it absurd to argue any longer with him; however, I said that we must wait for Dion's letter, and then once more write to tell him of this new proposal. His next step was the brilliant one of selling the whole of Dion's property, using his own discretion with regard to the manner and terms of the sale and of the purchasers. He spoke not a word to me about the matter from beginning to end, and I followed his example and never talked to him again about Dion's affairs; for I did not think that I could do any good by doing so. This is the history so far of my efforts to come to the rescue of philosophy and of my friends.

After this Dionysios and I went on with our daily life, I with my eyes turned abroad like a bird yearning to fly from its perch, and

he always devising some new way of scaring me back and of keeping a tight hold on Dion's property. However, we gave out to all Sicily that we were friends. Dionysios, now deserting the policy of his father, attempted to lower the pay of the older members of his body guard. The soldiers were furious, and, assembling in great numbers, declared that they would not submit. He attempted to use force to them, shutting the gates of the acropolis; but they charged straight for the walls, yelling out an unintelligible and ferocious war cry. Dionysios took fright and conceded all their demands and more to the peltasts then assembled.

A rumour soon spread that Heracleides had been the cause of all the trouble. Hearing this, Heracleides kept out of the way. Dionysios was trying to get hold of him, and being unable to do so, sent for Theodotes to come to him in his garden. It happened that I was walking in the garden at the same time. I neither know nor did I hear the rest of what passed between them, but what Theodotes said to Dionysios in my presence I know and remember. "Plato," he said, "I am trying to convince our friend Dionysios that, if I am able to bring Heracleides before us to defend himself on the charges which have been made against him, and if he decides that Heracleides must no longer live in Sicily, he should be allowed (this is my point) to take his son and wife and sail to the Peloponnese and reside there, taking no action there against Dionysios and enjoying the income of his property. I have already sent for him and will send for him again; and if he comes in obedience either to my former message or to this one — well and good. But I beg and entreat Dionysios that, if anyone finds Heracleides either in the country or here, no harm shall come to him, but that he may retire from the country till Dionysios comes to some other decision. Do you agree to this?" he added, addressing Dionysios. "I agree," he replied, "that even if he is found at your house, no harm shall be done to him beyond what has now been said."

On the following day Eurybios and Theodotes came to me in the evening, both greatly disturbed. Theodotes said, “Plato, you were present yesterday during the promises made by Dionysios to me and to you about Heracleides?” “Certainly,” I replied. “Well,” he continued, “at this moment peltasts are scouring the country seeking to arrest Heracleides; and he must be somewhere in this neighbourhood. For Heaven’s sake come with us to Dionysios.” So we went and stood in the presence of Dionysios; and those two stood shedding silent tears, while I said: “These men are afraid that you may take strong measures with regard to Heracleides contrary to what was agreed yesterday. For it seems that he has returned and has been seen somewhere about here.” On hearing this he blazed up and turned all colours, as a man would in a rage. Theodotes, falling before him in tears, took his hand and entreated him to do nothing of the sort. But I broke in and tried to encourage him, saying: “Be of good cheer, Theodotes; Dionysios will not have the heart to take any fresh step contrary to his promises of yesterday.” Fixing his eye on me, and assuming his most autocratic air he said, “To you I promised nothing small or great.” “By the gods,” I said, “you did promise that forbearance for which our friend here now appeals.” With these words I turned away and went out. After this he continued the hunt for Heracleides, and Theodotes, sending messages, urged Heracleides to take flight. Dionysios sent out Teisias and some peltasts with orders to pursue him. But Heracleides, as it was said, was just in time, by a small fraction of a day, in making his escape into Carthaginian territory.

After this Dionysios thought that his long-cherished scheme not to restore Dion’s property would give him a plausible excuse for hostility towards me; and first of all he sent me out of the acropolis, finding a pretext that the women were obliged to hold a sacrificial service for ten days in the garden in which I had my lodging. He therefore ordered me to stay outside in the house of Archedemos during this period. While I was there, Theodotes

sent for me and made a great outpouring of indignation at these occurrences, throwing the blame on Dionysios. Hearing that I had been to see Theodotes he regarded this as another excuse, sister to the previous one, for quarrelling with me. Sending a messenger, he enquired if I had really been conferring with Theodotes on his invitation. “Certainly,” I replied. “Well,” continued the messenger, “he ordered me to tell you that you are not acting at all well in preferring always Dion and Dion’s friends to him.” And he did not send for me to return to his house, as though it were now clear that Theodotes and Heracleides were my friends, and he my enemy. He also thought that I had no kind feelings towards him because the property of Dion was now entirely done for.

After this I resided outside the acropolis among the mercenaries. Various people then came to me, among them those of the ships’ crews who came from Athens, my own fellow citizens, and reported that I was evil spoken of among the peltasts, and that some of them were threatening to make an end of me, if they could get hold of me. Accordingly I devised the following plan for my safety.

I sent to Archytes and my other friends in Taras, telling them the plight I was in. Finding some excuse for an embassy from their city, they sent a thirty-oared galley with Lamiscos, one of themselves, who came and entreated Dionysios about me, saying that I wanted to go, and that he should on no account stand in my way. He consented and allowed me to go, giving me money for the journey. But for Dion’s property I made no further request, nor was any of it restored.

I made my way to the Peloponnese to Olympia, where I found Dion a spectator at the Games, and told him what had occurred. Calling Zeus to be his witness, he at once urged me with my relatives and friends to make preparations for taking vengeance on Dionysios — our ground for action being the breach of faith to a guest — so he put it and regarded it, while his own was his

unjust expulsion and banishment. Hearing this, I told him that he might call my friends to his aid, if they wished to go; “But for myself,” I continued, “you and others in a way forced me to be the sharer of Dionysios’ table and hearth and his associate in the acts of religion. He probably believed the current slanders, that I was plotting with you against him and his despotic rule; yet feelings of scruple prevailed with him, and he spared my life. Again, I am hardly of the age for being comrade in arms to anyone; also I stand as a neutral between you, if ever you desire friendship and wish to benefit one another; so long as you aim at injuring one another, call others to your aid.” This I said, because I was disgusted with my misguided journeyings to Sicily and my ill-fortune there. But they disobeyed me and would not listen to my attempts at reconciliation, and so brought on their own heads all the evils which have since taken place. For if Dionysios had restored to Dion his property or been reconciled with him on any terms, none of these things would have happened, so far as human foresight can foretell. Dion would have easily been kept in check by my wishes and influence. But now, rushing upon one another, they have caused universal disaster.

Dion’s aspiration however was the same that I should say my own or that of any other right-minded man ought to be. With regard to his own power, his friends and his country the ideal of such a man would be to win the greatest power and honour by rendering the greatest services. And this end is not attained if a man gets riches for himself, his supporters and his country, by forming plots and getting together conspirators, being all the while a poor creature, not master of himself, overcome by the cowardice which fears to fight against pleasures; nor is it attained if he goes on to kill the men of substance, whom he speaks of as the enemy, and to plunder their possessions, and invites his confederates and supporters to do the same, with the object that no one shall say that it is his fault, if he complains of being poor. The same is true if anyone renders services of this

kind to the State and receives honours from her for distributing by decrees the property of the few among the many — or if, being in charge of the affairs of a great State which rules over many small ones, he unjustly appropriates to his own State the possessions of the small ones. For neither a Dion nor any other man will, with his eyes open, make his way by steps like these to a power which will be fraught with destruction to himself and his descendants for all time; but he will advance towards constitutional government and the framing of the justest and best laws, reaching these ends without executions and murders even on the smallest scale.

This course Dion actually followed, thinking it preferable to suffer iniquitous deeds rather than to do them; but, while taking precautions against them, he nevertheless, when he had reached the climax of victory over his enemies, took a false step and fell, a catastrophe not at all surprising. For a man of piety, temperance and wisdom, when dealing with the impious, would not be entirely blind to the character of such men, but it would perhaps not be surprising if he suffered the catastrophe that might befall a good ship’s captain, who would not be entirely unaware of the approach of a storm, but might be unaware of its extraordinary and startling violence, and might therefore be overwhelmed by its force. The same thing caused Dion’s downfall. For he was not unaware that his assailants were thoroughly bad men, but he was unaware how high a pitch of infatuation and of general wickedness and greed they had reached. This was the cause of his downfall, which has involved Sicily in countless sorrows.

What counsel I have to offer, after this narrative of events, has been given already, and so let it suffice. But I deemed it necessary to explain the reasons why I undertook my second journey to Sicily because absurd and irrational stories are being told about it. If, therefore, the account I have now given appears to anyone more rational, and if anyone believes that it supplies

sufficient excuses for what took place, then I shall regard that account as both reasonable and sufficient.

VIII

The eighth epistle is addressed to the companions of Dion and was probably written some months after the Seventh Letter but before Dion’s assassin, Callippus, had been driven out by Hipparinus. It councels compromise between the parties of Dion and Dionysius the Younger, the former favoring democracy, the latter, tyranny. The compromise would be a monarchy limited by laws.Plato to the relatives and companions of Dion wishes well-doing.

The policy which would best serve to secure your real “well-doing” is that which I shall now endeavor as best I can to describe to you. And I hope that my advice will not only be salutary to you (though to you in special), but also to all the Syracusans, in the second place, and, in the third, to your enemies and your foes, unless any of them be a doer of impious deeds; for such deeds are irremediable and none could ever wash out their stain. Mark, then, what I now say. Now that the tyranny is broken down over the whole of Sicily all your fighting rages round this one subject of dispute, the one party desiring to recover the headship, and the other to put the finishing touch to the expulsion of the tyrants. Now the majority of men always believe that the right advice about these matters is the advising of such action as will do the greatest possible harm to one’s enemies and the greatest possible good to one’s friends; whereas it is by no means easy to do much harm to others without also suffering in turn much harm oneself. And without going far afield one may see such consequences clearly in the recent events in Sicily itself, where the one faction is trying to inflict injury and the other to ward off the injurers; and the tale thereof, if ever you told it to others, would inevitably prove a most impressive lesson. Of such policies, one may say, there is

no lack; but as for a policy which would prove beneficial to all alike, foes as well as friends, or at least as little detrimental as possible to either, such a policy is neither easy to discern, nor, when discerned, easy to carry out; and to advise such a policy or attempt to describe it is much like saying a prayer. Be it so, then, that this is nothing but a prayer (and in truth every man ought always to begin his speaking and his thinking with the gods); yet may it attain fulfilment in indicating some such counsel as this: — Now and almost ever since the war began both you and your enemies have been ruled continuously by that one family which your fathers set on the throne in the hour of their greatest distress, when Greek Sicily was in the utmost danger of being entirely overrun by the Carthaginians and barbarized. On that occasion they chose Dionysius because of his youth and warlike prowess to take charge of the military operations for which he was suited, with Hipparinus, who was older, as his fellow-counsellor, appointing them dictators for the safeguarding of Sicily, with the title, as men say, of “tyrants.” But whether one prefers to suppose that the cause which ultimately brought about their salvation was divine Fortune and the Deity, or the virtue of the rulers, or possibly the combination of both assisted by the citizens of that age — as to this let everyone form his own notion; in any case this was the way in which salvation for the men of that generation came about. Seeing, then, that they proved themselves men of such a quality, it is surely right that they should be repaid with gratitude by all those whom they saved. But if in after times the tyrant’s house has wrongly abused the bounty of the city, the penalty for this it has suffered in part, and in part it will have to pay. What, then, is the penalty rightly to be exacted from them under existing circumstances? If you were able to get quit of them easily, without serious dangers and trouble, or if they were able to regain the empire without difficulty, then, in either case, it would not have been possible for me so much as to offer the advice which I am now about to utter; but as it is, both of you

ought to bear in mind and remember how many times each party has hopefully imagined that it lacked but a little of achieving complete success almost every time; and, what is more, that it is precisely this little deficiency which is always turning out to be the cause of great and numberless evils. And of these evils no limit is ever reached, but what seems to be the end of the old is always being linked on to the beginning of a new brood; and because of this endless chain of evil the whole tribe of tyrants and democrats alike will be in danger of destruction. But should any of these consequences — likely as they are though lamentable — come to pass, hardly a trace of the Greek tongue will remain in all Sicily, since it will have been transformed into a province or dependency of Phoenicians or Opicians. Against this all the Greeks must with all zeal provide a remedy. If, therefore, any man knows of a remedy that is truer and better than that which I am now about to propose, and puts it openly before us, he shall have the best right to the title "Friend of Greece." The remedy, however, which commends itself to me I shall now endeavor to explain, using the utmost freedom of speech and a tone of impartial justice. For indeed I am speaking somewhat like an arbitrator, and addressing to the two parties, the former despot and his subjects, as though each were a single person, the counsel I gave of old. And now also my word of advice to every despot would be that he should shun the despot's title and his task, and change his despotism for kingship. That this is possible has been actually proved by that wise and good man Lycurgus; for when he saw that the family of his kinsmen in Argos and in Messene had in both cases destroyed both themselves and their city by advancing from kingship to despotic power, he was alarmed about his own city as well as his own family, and as a remedy he introduced the authority of the Elders and of the Ephors to serve as a bond of safety for the kingly power; and because of this they have already been kept safe and glorious all these generations since Law became with them supreme king over men instead of men

being despots over the laws. And now also I urgently admonish you all to do the same. Those of you who are rushing after despotic power I exhort to change their course and to flee betimes from what is counted as “bliss” by men of insatiable cravings and empty heads, and to try to transform themselves into the semblance of a king, and to become subject to kingly laws, owing their possession of the highest honors to the voluntary goodwill of the citizens and to the laws. And I should counsel those who follow after the ways of freedom, and shun as a really evil thing the yoke of bondage, to beware lest by their insatiable craving for an immoderate freedom they should ever fall sick of their forefathers’ disease, which the men of that time suffered because of their excessive anarchy, through indulging an unmeasured love of freedom. For the Siceliots of the age before Dionysius and Hipparinus began to rule were living blissfully, as they supposed, being in luxury and ruling also over their rulers; and they even stoned to death the ten generals who preceded Dionysius, without any legal trial, to show that they were no slaves of any rightful master, nor of any law, but were in all ways altogether free. Hence it was that the rule of the despots befell them. For as regards both slavery and freedom, when either is in excess it is wholly evil, but when in moderation wholly good; and moderate slavery consists in being the slave of God, immoderate, in being the slave of men; and men of sound sense have Law for their God, but men without sense Pleasure. Since these things are naturally ordained thus, I exhort Dion’s friends to declare what I am advising to all the Syracusans, as being the joint advice both of Dion and myself; and I will be the interpreter of what he would have said to you now, were he alive and able to speak. “Pray then,” someone might say, “what message does the advice of Dion declare to us concerning the present situation?” It is this: “Above all else, O ye Syracusans, accept such laws as do not appear to you likely to turn your minds covetously to money-making and wealth; but rather — since there are three objects, the soul, the body, and money

besides, — accept such laws as cause the virtue of the soul to be held first in honor, that of the body second, subordinate to that of the soul, and the honor paid to money to come third and last, in subjection to both the body and the soul. The ordinance which effects this will be truly laid down by you as law, since it really makes those who obey it blessed; whereas the phrase which terms the rich “blessed” is not only a miserable one in itself, being the senseless phrase of women and children, but also renders those who believe it equally miserable. That this exhortation of mine is true you will learn by actual experience if you make trial of what I am now saying concerning laws; for in all matters experience is held to be the truest test. And when you have accepted laws of this kind, inasmuch as Sicily is beset with dangers, and you are neither complete victors nor utterly vanquished, it will be, no doubt, both just and profitable for you all to pursue a middle course — not only those of you who flee from the harshness of the tyranny, but also those who crave to win back that tyranny — the men whose ancestors in those days performed the mightiest deed in saving the Greeks from the barbarians, with the result that it is possible for us now to talk about constitutions; whereas, if they had then been ruined, no place would have been left at all for either talk or hope. So, then, let the one party of you gain freedom by the aid of kingly rule, and the other gain a form of kingly rule that is not irresponsible, with the laws exercising despotic sway over the kings themselves as well as the rest of the citizens, in case they do anything illegal. On these conditions set up kings for all of you, by the help of the gods and with honest and sound intent, — my own son first in return for twofold favors, namely that conferred by me and that conferred by my father; for he delivered the city from barbarians in his own day, while I, in the present day, have twice delivered it from tyrants, whereof you yourselves are witnesses. And as your second king created the man who possesses the same name as my father and is son to Dionysius, in return for his present assistance and for his pious

disposition; for he, though he is sprung from a tyrant's loins, is in act of delivering the city of his own free will, gaining thereby for himself and for his race everlasting honor in place of a transitory and unrighteous tyranny. And, thirdly, you ought to invite to become king of Syracuse — as willing king of a willing city — him who is now commander of your enemies' army, Dionysius, son of Dionysius, if so be that he is willing of his own accord to transform himself into a king, being moved thereto by fear of fortune's changes, and by pity for his country and the untended state of her temples and her tombs, lest because of his ambition he utterly ruin all and become a cause of rejoicing to the barbarians. And these three, — whether you grant them the power of the Laconian kings or curtail that power by a common agreement, — you should establish as kings in some such manner as the following, which indeed has been described to you before, yet listen to it now again. If you find that the family of Dionysius and Hipparinus is willing to make an end of the evils now occurring in order to secure the salvation of Sicily provided that they receive honors both in the present and for the future for themselves and for their family, then on these terms, as was said before, convoke envoys empowered to negotiate a pact, such men as they may choose, whether they come from Sicily or from abroad or both, and in such numbers as may be mutually agreed. And these men, on their arrival, should first lay down laws and a constitution which is so framed as to permit the kings to be put in control of the temples and of all else that fitly belongs to those who once were benefactors. And as controllers of war and peace they should appoint Law-wardens, thirty-five in number, in conjunction with the People and the Council. And there should be various courts of law for various suits, but in matters involving death or exile the Thirty-five should form the court; and in addition to these there should be judges selected from the magistrates of each preceding year, one from each magistracy — the one, that is, who is approved as the most good and just; and these should

decide for the ensuing year all cases which involve the death, imprisonment or transportation of citizens; and it should not be permissible for a king to be a judge of such suits, but he, like a priest, should remain clean from bloodshed and imprisonment and exile. This is what I planned for you when I was alive, and it is still my plan now. With your aid, had not Furies in the guise of guests prevented me, I should then have overcome our foes, and established the State in the way I planned; and after this, had my intentions been realized, I should have resettled the rest of Sicily by depriving the barbarians of the land they now hold — excepting those who fought in defence of the common liberty against the tyranny — and restoring the former occupiers of the Greek regions to their ancient and ancestral homes. And now likewise I counsel you all with one accord to adopt and execute these same plans, and to summon all to this task, and to count him who refuses as a common enemy. Nor is such a course impossible; for when plans actually exist in two souls, and when they are readily perceived upon reflection to be the best, he who pronounces such plans impossible is hardly a man of understanding. And by the “two souls” I mean the soul of Hipparinus the son of Dionysius and that of my own son; for should these agree together, I believe that all the rest of the Syracusans who have a care for their city will consent. Well then, when you have paid due honor, with prayer, to all the gods and all the other powers to whom, along with the gods, it is due, cease not from urging and exhorting both friends and opponents by gentle means and every means, until, like a heaven-sent dream presented to waking eyes, the plan which I have pictured in words be wrought by you into plain deeds and brought to a happy consummation.”

IX

Plato to Archytas of Tarentum wishes well-doing.

Archippus and Philonides and their party have arrived, bringing us the letter which you gave them, and also reporting your news. Their business with the city they have completed without difficulty — for in truth it was not at all a hard task; and they have given us a full account of you, telling us that you are somewhat distressed at not being able to get free from your public engagements. Now it is plain to almost everyone that the pleasantest thing in life is to attend to one's own business, especially when the business one chooses is such as yours; yet you ought also to bear in mind that no one of us exists for himself alone, but one share of our existence belongs to our country, another to our parents, a third to the rest of our friends, while a great part is given over to those needs of the hour with which our life is beset. And when our country itself calls us to public duties, it were surely improper not to hearken to the call; for to do so will involve the further consequence of leaving room to worthless men who engage in public affairs from motives that are by no means the best. Enough, however, of this subject. We are looking after Echecrates now and we shall do so in the future also, for your sake and that of his father Phrynion, as well as for the sake of the youth himself.

XI

Plato to laodamas wishes well-doing.

I wrote to you before that in view of all that you say it is of great importance that you yourself should come to Athens. But since you say that this is impossible, the second best course would have been that I, if possible, or Socrates should go to you, as in fact you said in your letter. At present, however, Socrates is laid up with an attack of strangury; while if I were to go there, it would be humiliating if I failed to succeed in the task for which you are inviting me. But I myself have no great hopes of success (as to my reasons for this, another long letter would be required to explain them in full), and moreover, because of my age, I am

not physically fit to go wandering about and to run such risks as one encounters both by sea and land; and at present there is nothing but danger for travellers everywhere. I am able, however, to give you and the settlers advice which may seem to be, as Hesiod says, “Trivial when uttered by me, but hard to be understanded.” For they are mistaken if they believe that a constitution could ever be well established by any kind of legislation whatsoever without the existence of some authority in the State which supervises the daily life both of slaves and freemen, to see that it is both temperate and manly. And this condition might be secured if you already possess men who are worthy of such authority. If, however, you require someone to train them, you do not, in my opinion, possess either the trainer or the pupils to be trained; so it only remains for you to pray to the gods. For, in truth, the earlier States also were mostly organized in this way; and they came to have a good constitution at a later date, as a result of their being confronted with grave troubles, either through war or other difficulties, whenever there arose in their midst at such a crisis a man of noble character in possession of great power. So it is both right and necessary that you should at first be eager for these results, but also that you should conceive of them in the way I suggest, and not be so foolish as to suppose that you will readily accomplish anything. Good-fortune attend you!

XIII

Plato to Dionysius, Tyrant of Syracuse, wishes well-doing.

Let this greeting not only commence my letter but serve at the same time as a token that it is from me. Once when you were feasting the Locrian youths and were seated at a distance from me, you got up and came over to me and in a friendly spirit made some remark which I thought excellent, as also did my neighbor at the table, who was one of the beautiful youths. And he then said— “No doubt, Dionysius, you find Plato of great

benefit as regards philosophy!" And you replied— "Yes, and in regard to much else; since from the very moment of my inviting him I derived benefit at once from the very fact that I had invited him." This tone, then, should be carefully preserved, in order that the mutual benefit we derive from one another may always go on increasing. So by way of helping towards this end I am now sending you some of the Pythagorean works and of the "Divisions," and also, as we arranged at that time, a man of whom you and Archytas — if Archytas has come to your court — may be able to make use. His name is Helicon, he is a native of Cyzicus, and he is a pupil of Eudoxus and exceedingly well versed in all his doctrine. Moreover, he has associated with one of the pupils of Isocrates and with Polyxenus, one of Bryson's companions; and, what is rare in these cases, he is not without charm of address nor is he of a churlish disposition; rather he would seem to be gay and good-tempered. This, however, I say with trepidation, since I am uttering an opinion about a man, and man though not a worthless is an inconstant creature, save in very few instances and in few respects. For even in this man's case my fears and suspicions were such that, when I met him, I observed him carefully myself and I made inquiry also from his fellow-citizens, and no one had anything bad to say of the man. But do you yourself also keep him under observation and be cautious. It were best, then, if you have any leisure at all, to take lessons from him in addition to your other studies in philosophy; but if not, get someone else thoroughly taught so that you may learn from him when you have leisure, and thereby make progress and gain glory, — that so the benefit you gain from me may still continue. So much, then, for this subject.

As regards the things you wrote to me to send you, I have had the Apollo made and Leptines is bringing it to you. It is by a young and good craftsman named Leochares. He had at his shop another piece which was, as I thought, very artistic; so I bought it with the intention of presenting it to your wife, because she tended me both in health and sickness in a manner which did

credit both to you and to me. So will you give it to her, unless you prefer to do otherwise. I am also sending twelve jars of sweet wine for the children and two of honey. We arrived too late for the stoling of the figs, and the myrtle-berries that were stored have rotted; but in future we shall take better care of them. About the plants Leptines will tell you. The money to meet these expenses — I mean for the purchases mentioned and for certain State taxes — I obtained from Leptines, telling him what I thought it best became us to tell him, it being also true, — that the sum of about sixteen minas which we spent on the Leucadian ship belonged to us; this, then, was the sum I obtained, and on obtaining it I used it myself and sent off these purchases to you. Next, let me tell you what your position is in regard to money, both what you have at Athens and my own. I shall make use of your money, as I told you previously, just as I do that of all my other friends; I use as little as I possibly can, only just so much as I and the man I get it from agree to be necessary or right or fitting. Now this is how I am situated at present. I have in my charge four daughters of those nieces of mine who died at the time when you bade me to wear a crown, and I refused; and of these one is of marriageable age, one eight years old, one a little over three years, and the fourth not yet a year old. To these girls I and my friends must give portions — to all of them, that is, whom I live to see married; as to the rest, they must look to themselves. Nor should I give portions to any whose fathers may get to be richer than I; though at present I am the wealthiest of them, and it was I who, with the help of Dion and others, gave their mothers their portions. Now the eldest one is marrying Speusippus, she being his sister’s daughter. So for her I require no more than thirty minas, that being for us a reasonable dowry. Moreover, in case my own mother should die, no more than ten minas would be required for the building of her tomb. For such purposes, then, these are pretty well all my necessary requirements at the present time. And should any further expense, private or public, be incurred

owing to my visit to your court, we must do as I said before: I must strive hard to keep the expense as low as possible, and if ever that is beyond my power, the charge must fall upon you. In the next place, as regards the spending of your own money at Athens, I have to tell you, first of all, that, contrary to what we supposed, you have not a single friend who will advance money in case I am required to spend something on furnishing a chorus or the like; and further, if you yourself have some urgent affair on hand in which prompt expenditure is to your advantage, whereas it is to your disadvantage to have the expenditure deferred until the arrival of a messenger from you, such a state of affairs is not only awkward but reflects also on your honor. And in fact I discovered this myself when I sent Erastus to Andromedes the Aeginetan — from whom, as a friend of yours, you told me to borrow what I needed; as I wished to send you also some other valuable items which you had written for. He replied — naturally enough, as any man might — that when, on a previous occasion, he had advanced money on your father's account he had had difficulty in recovering it, and that he would now loan a small amount but no more. That was how I came to borrow from Leptines; and for this Leptines is deserving of praise, not that he gave it, but that he did so readily, and plainly showed his friendship and its quality in all else that he did or said regarding you. For it is surely right that I should report such actions, as well as the opposite kind, to show what I believe to be each man's attitude towards you. However, I will tell you candidly the position with regard to money matters; for it is right to do so, and, moreover, I shall be speaking from experience of your court. The agents who bring you the reports every time are unwilling to report anything which they think entails an expense, as being likely to bring them odium. Do you therefore accustom them and compel them to declare these matters as well as the rest; for it is right that you should know the whole state of affairs so far as you can and act as the judge, and not avoid this knowledge. For such a course will best serve

to enhance your authority. For expenditure that is rightly laid out and rightly paid back is a good thing — as you yourself maintain and will maintain — not only for other purposes but also for the acquisition of money itself. Therefore, do not let those who profess to be devoted to you slander you before the world; for to have the reputation of being ill to deal with is neither good for your reputation nor honorable.

In the next place I shall speak about Dion. Other matters I cannot speak of as yet, until the letters from you arrive, as you said; with regard, however, to those matters which you forbade me to mention to him, I neither mentioned nor discussed them, but I did try to discover whether he would take their occurrence hardly or calmly, and it seemed to me that if they occurred it would cause him no small vexation. As to all else Dion's attitude towards you seems to me to be reasonable both in word and deed.

To Cratinus the brother of Timotheus, and my own companion, let us present a hoplite's corslet, one of the soft kind for foot-soldiers; and to the daughters of Cebes three tunics of seven cubits, not made of the costly Amorgos stuff but of the Sicilian linen. The name of Cebes you probably know; for he is mentioned in writing in the Socratic discourses as conversing with Socrates, in company with Simmias, in the discourse concerning the Soul, he being an intimate and kindly friend of us all.

Concerning the sign which indicates which of my letters are seriously written and which not, I suppose that you remember it, but none the less bear it in mind and pay the utmost attention; for there are many bidding me to write, whom it is not easy to repulse openly. "God," then, is at the head of the serious letter, but "gods" of the less serious. The ambassadors requested me to write to you, and naturally so; for they are everywhere lauding both you and me with the utmost zeal; and not least Philagrus, who was then suffering with his hand. Philaides also, on his

arrival from the Great King, was talking about you; and if it had not required a very long letter I would have told you in writing what he said; but as it is, ask Leptines to tell you. If you are sending the corslet or any of the other things I have written about, in case you have anyone you prefer yourself, give it to him, but if not, give it to Terillus; he is one of those who are constantly making the voyage, and he is a friend of ours who is skilled in philosophy as well as in other things. He is also a son-in-law of Teison who was city-steward at the time when we sailed away. Keep well and study philosophy and exhort thereto all the other young men; and greet for me your comrades at the game of ball; and charge Aristocritus, as well as the rest, that if any message or letter from me should come to your palace, he must take care that you are informed of it as soon as possible; and bid him remind you not to neglect the contents of my letters. So too now, do not neglect to repay Leptines his money, but pay it back as promptly as possible, in order that the others also, seeing how you deal with him, may be the more ready to assist us.

Iatrocles, the man whom I released on that occasion, along with Myronides, is now sailing with the things that I am sending: I ask you, then, to give him some paid post, as he is well-disposed towards you, and employ him for whatever you wish. Preserve also this letter, either itself or a precis of it, and continue as you are.
